APRIL TWENTY-NINE

is the date of the issue of the 1911 big annual "SPRING NUMBER" of the

THE BICYCLING WORLD and MOTORCYCLE REVIEW

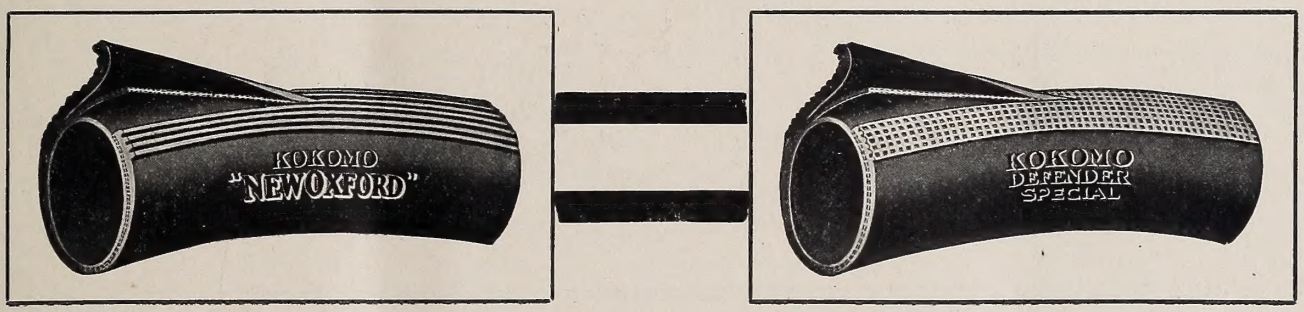
Founded 1877

¶Coming at the real opening of the riding season, the "Spring Number" will be a timely guide to the sport of motorcycling and cycling. As usual it will illustrate and describe all the principal new models of motorcycle, giving details and prices that will aid the prospective buyer to determine his choice. All the world's motorcycle and cycle records will be given in tabular form. These are but two out of the array of special and pictorial features that will make this year's "Spring Number" as important an event to the sport and the trade as each "Spring Number" has been in the past.

¶Crystallizing in word and picture the joy of riding and of exploring the great outdoors, the special articles and the photographic reproductions will stir every drop of blood that has even a latent yearning for Nature and the conquering of distance. These special features are backed by practical information and dollars and sense facts that combine to make the "Spring Number" at once a delight to the mind and a wise counsellor to the pocketbook.

¶The great market place for machines and accessories that is provided in the advertising pages, too, will be a veritable treasure store of interesting and valuable information.

¶Copies of the 1911 "Spring Number" will be sent to any address on receipt of 10 cents for each copy. Orders should be placed now to insure prompt delivery. Think of every-one on your list of friends who should have a copy, and send 10 cents for each name.



ADVERTISING COPY FOR THE "SPRING NUMBER" MUST BE IN EARLY

KOKOMO

Bicycle Tires

Kokomo service and satisfaction has brought Kokomo Tires to prominence as one of the big factors in the cycle trade.

Are you profiting by what we offer you in Kokomo Tires?

KOKOMO RUBBER CO.

Kokomo, Ind., U. S. A.

PIERCE

"The superiority of the Pierce over all other motorcycles is conspicuous in design, construction, smooth riding qualities, and durability when in service."

The Best Service—The Best Satisfaction Can Only Be Given by the Pierce

Pierce motorcycles are sold in the leading trade centers of the country (and the world too); and everywhere, they are sold by the leading—the most progressive dealers. Listen: you can sell the Pierce in your store, and if you recognize the needs of your trade (*i.e.*, that they require good machines), if you consult your own best interests, you will make haste to secure the Pierce revenue-producing, customer-satisfying agency.

The single cylinder and four cylinder models satisfy every demand of the most exacting, most discriminating trade. For every country—rough or smooth—the Pierce will do the work best and will do it wholly. No hill is too steep; no road too long.

Every dealer—every rider should have our catalog "A." It is a handbook of excellence and contains convincing arguments of Pierce supremacy.

Save Motorcycle Tire Expense—Use the Most Serviceable Tires

The very best tire you can get is the most economical in the long run. Tire value must be based on tire mileage.

The tire which wears longest—gives greatest mileage—is the **lowest-price** tire to the rider. For **all** the rider buys is **mileage.**

Getting **greater mileage** at the price you have been paying for **less** tire milage means a big saving of actual **cash.**

Do you want the **cash** you may now be wasting on tire expense? Do you want **more** mileage for the same price?

Then consider these facts about tires:

The competitive tire-mileage test, here described, will tell you **which** is the world's longest-wearing motorcycle tire—**which** is capable of **greatest mileage.**

This test—the most rigid ever given motorcycle tires—is accomplished on a great machine which revolves each tire on an axis with the tire's tread bearing down against a revolving "treadmill"—exactly the usage that tires get on your motorcycle.

All makes of motorcycle tires—purchased in the open market—are placed on the axis of the test machines.

Each manufacturer's tire is worn down to destruction to ascertain its mileage.

Then the Goodyear tire—the very duplicate of the tire you buy—is worn down to destruction.

The **Goodyear** motorcycle tire **must** give greater mileage than any other make—or its twin tires cannot leave the factory—so careful are we of the Goodyear's reputation.

Now, then, **which** tire must give greater mileage?

Which will cut your tire expense **in two?** Naturally the longest-wearing motorcycle tire—the Goodyear—will stop the waste of cash on tire mileage.

A Tire for Every Road Condition

You have a wider range of choice in types of **Goodyear** tires than in any other make of tire—for here are five **great** motorcycle tires, one for **every** road condition. No other manufacturer makes so many types.

One of these types is built for the special usage to which **your** machine is put.

For recreation purposes on give-and-take roads—the average use of a motorcycle—the greatest mileage can be secured in **THE GOODYEAR CORRUGATED TREAD TIRE.** The bulk of the rubber is on the **tread,** where it belongs—not on the **sides** as in commonplace tires. This feature alone, not allowing for its first-grade materials, adds to the mileage other tires give.

THE GOODYEAR STUDDED TREAD TIRE is built especially for travel on muddy country roads. When studs of other tires are clogged with mud and are worthless, the Goodyear is free from mud, for its studs are wider apart and cannot gather mud. This makes the Goodyear the most practical of all studded tread tires.

THE GOODYEAR NON-SKID TIRE prevents slipping on paved city streets. The spaces between the squares on the tread form a vacuum that permits only a forward motion of the tire. This is the best tire manufactured for traveling on slippery pavements. It prevents the falls that so often result disastrously.

THE GOODYEAR BLUE STREAK TIRES, built primarily for racing purposes. We have one Blue Streak tire for board-track racing and another Blue Streak tire for racing on dirt tracks.

At Los Angeles on February 7th DeRosier made a new world's speed record of one-half to 92 miles. He rode 92 miles on Blue Streak tires in 66 minutes and 35 seconds.

Go see the Goodyear at the nearest branch office or agency or at your dealer's. But be sure you write us today for our illustrated booklet on motorcycle tires. We will send you a copy by return mail.

Here's the Policy

YOU have heard about "intensive farming." Over in France where land is very expensive the farmers have to get every franc that is possible out of a piece of ground. It is an actual fact that near Paris certain experts are making their small farms yield seven crops a year bringing them a profit of something like $6,000, in our money, per acre. That is "intensive farming" with a vengeance, and is almost beyond the conception of the average American farmer who is used to scattering his energies over a large number of acres.

Now the Harley-Davidson Motor Company has set out to carry into effect an "intensive sales" policy. We are going to give our dealers all the business they can handle, and, furthermore, are going to make enough machines to supply that demand throughout the whole season. Like the intensive farmer who works his farm to the limit, we are going to work our field to the limit, and this is the way we are putting the policy into effect:

We have mapped out and already have under way the largest and most expensive national advertising campaign that has ever been attempted by any manufacturer in the motorcycle field. As the old saying goes, we are "taking Time by the forelock." We are not waiting for the demand for motorcycles to be created of its own accord. We are creating that demand ourselves. Rather a big task you say. No, not if one goes at it right and analyzes and understands the market.

A folder outlining our plans in detail is now in course of preparation and will be in the hands of every Harley-Davidson dealer within the next few days. This folder, which is certainly an eye opener, gives all the details and shows the magnitude and importance of our campaign and contains many timely suggestions for our dealers which, if carried out, will result in almost immediate returns.

The Harley-Davidson Motor Company stands back of every machine it builds with an absolute guarantee, and has made good every promise it has ever made to its dealers and customers. Our policy has always been to protect our dealers. We make no sales direct. We sell only through dealers and protect these dealers in their own territory. What is more, we sell to no catalog or mail order houses.

We are on the right track—our dealers have told us so—we know we are and you know it too.

Davidson Policy

Here's the Result

OUR campaign, as we said before, is now under way, and, although hardly started, is bringing results to our dealers in actual sales, to say nothing of thousands of inquiries to follow up for future business. Our folder tells in detail how these inquiries will be followed up.

The first ad we ran in the Saturday Evening Post appeared February 18th. The following letter was written February 20th, two days later, and speaks for itself:

Denver, Colo., February 20, 1911.

HARLEY-DAVIDSON MOTOR CO.,
Milwaukee, Wis.

Gentlemen:—Well, I guess that's some ad you carry in the Saturday Evening Post, because I sold a machine today to a man who never heard of a **Harley-Davidson** before in his life until he read that ad Saturday. It looked pretty good to him, so while he was in town today he hunted up the agency and I finally got a deposit of $75.00 which is for the magneto machine which should reach here tomorrow. The last magneto machine I got I sold yesterday, so I am not complaining at all, as I have been back in Denver two days and sold a magneto model each day, and the snow is four inches deep on the ground, too.

This man whom I sold to today came in town to close a deal for the sale of his farm, and while here hunted up the agency. His brother, who was with him, says he will get a machine, too, if this one shows up well, so I just figure that one sold, too.

I think that is a very well gotten up ad. There are few enough words so a man can remember a little of what he reads, and every word is right to the point. A great many people have called my attention to that, and I think it will pay.

Please rush along another of the magneto machines I have on order, as I have none here now and will very likely have that one sold before it gets here.

Yours very truly,
(Signed) W. W. WHITING.

In past years our advertising has been small. Season after season our entire output has been sold months in advance. In spite of repeated additions to our plant we could not make nearly enough machines to supply the demand, and instead of looking for more dealers, we devoted our energies to making machines. Last year we turned down hundreds of requests for agencies simply because our capacity made it impossible for us to take care of even the dealers we had.

But this year it's another story. We have trebled our capacity and have been making prompt deliveries ever since the season opened up. Way back in November we were on the job making 1911 deliveries in quantities. Many of our dealers have already sold more 1911 models than they sold during the entire 1910 season.

Until this year no dealer could get all the Harley-Davidsons he could sell, but in spite of this not one dealer has ever voluntarily given up the agency.

When a dealer takes the Harley-Davidson agency he does not sell Harley-Davidsons one year and change the next. He sells them year after year. He realizes that the agency becomes the greatest asset in his business, and you realize it too. Harley-Davidsons sell and when it comes to a real show-down the Harley-Davidson dealers get the business every time. Now be honest with yourself, don't they?

We want a dealer in every town in the United States—and some in other countries too. In some localities we have not yet made satisfactory arrangements and if you are seriously considering the Harley-Davidson line now is the time to get in your application. Next week, or even tomorrow, may be too late. This year is going to be a Harley-Davidson year—distinctly so. We know it, and you know it. Are you with us?

TORRINGTON, CONNECTICUT

An American Machine with All-Weather Transmission

"The Minneapolis, an American machine, presents some interesting features. The engine is a single-cylinder of 5 H. P., and has side by side M. O. I. V. and a gear-driven magneto. A multiple-disc clutch and two-speed gear are mounted in one unit with the engine crankcase. Compound gears connect the drive from the engine-shaft to a countershaft enclosed in an extension of the back of the crankcase. The clutch is on the engine shaft, and the change-speed mechanism is on the countershaft. Thence the drive to the back wheel is by single chain running over even-sized chain sprockets. This gives the machine quite a neat appearance. The gears used are 4½ to 1 and 9 to 1. The clutch is controlled from the handlebar by the Bowden Cable, and the engine control is by twisting grips. Illustrations appear on this page showing the machine and the power unit."

MECHANISM

37/41 Pratt Street, Camden Town,
London N.W. February 27th, 1911.

MESSRS. J. S. BRETZ COMPANY,
250 West 54th St., New York.

Dear Sirs:--We enclose herewith cutting from "Motor Cycling", London, of the 21st inst., re Bowden Mechanism fitted as clutch control on the Minneapolis machine. We send this as we are glad to note that American motor cycle manufacturers are beginning to realize the advantages our Bowden control offers, and we think perhaps the time may not be far distant when the Bowden system will be as well known for this purpose on your side as an ours. We do not know a single manufacturer of motor cycles here who does not use the Bowden Wire Mechanism, and at the great Motor Cycle Show held in London in November last, in which a number of imported machines were also exhibited, there was not one without our system, and not infrequently four or five adaptations appeared on one machine. You will therefore see it is universally adopted here, and we trust it will soon be as largely used in the States.

Yours faithfully,

DWM/LEC

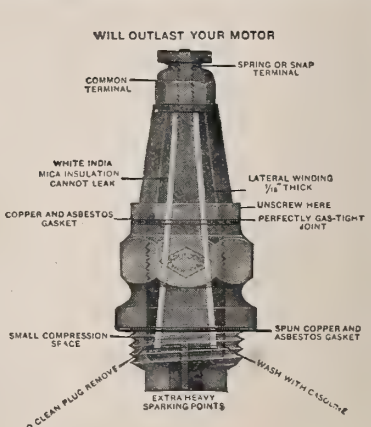
219 Clinton Ave., Newark, N. J.

We also make Yale Motorcycles, Hussey Handle Bars and Drop Forgings of every description.

De Rosier's Wonderful Ride



Have you read De Rosier's graphic account of his great ride in which he broke the hour record ?

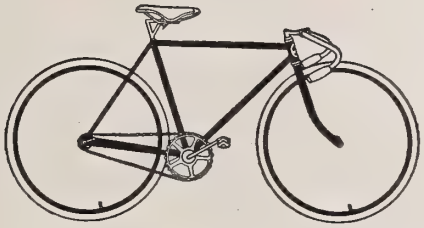
It is well worth your perusal.

It gives one some idea of how it feels to tear along at over 83 miles an hour.

Think of it ! At a pace which would make the fastest express train look as if it was tied to a post.

De Rosier's mount was equipped with

Splitdorf Motorcycle Plugs



From start to finish he had Absolutely Perfect Ignition—not a single miss throughout all that terrific pace.

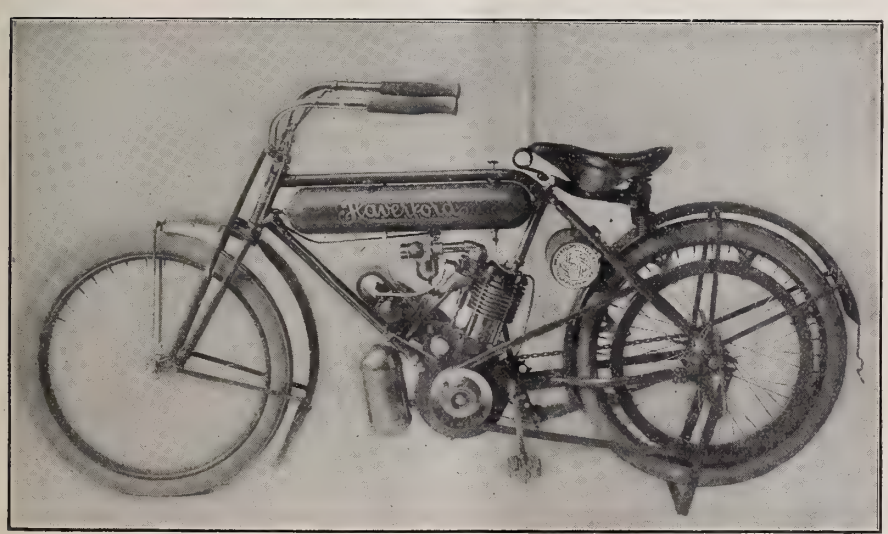
If you want the same superior service you should specify and insist on SPLITDORF Plugs.

C. F. SPLITDORF

Walton Ave. and 138th St. Branch, 1679 Broadway NEW YORK

Trade Follows the Pope Trademark

The Pope Trademark has always inspired public confidence because the public knows that it is a seal of quality which has only been identified with the standard American bicycles.



The Pope Trademark is found today on all Columbia, Rambler, Cleveland, Tribune and other Pope nameplate bicycles.

Why sell wheels of unknown make and inferior quality when the very name "Pope" inspires public confidence and commands the most desirable trade.

WORM DRIVE FOR MOTORCYCLES

May be Competitor Against Both Chain and Belt—Pontiac Company Secures Important Patent Rights.

Worm drive motorcycles, which already have been developed in various experimental forms, at no extremely distant date may be large contenders for popular favor and exploitation in rivalry with the more familiar belt drive and chain drive. It became known this week that the Flanders Mfg. Co., of Pontiac, Mich., which includes the Pontiac Motorcycle Co. project, has secured the American rights to produce and use the machinery employed in the cutting of a type of English worm gear which has proved highly successful on motor cars and which is not impracticable in application to motorcycles. There are no patents on the gear itself, but there are on the machinery for making it.

Robert M. Brownson, president of the Flanders company, recently made a quiet visit to England and closed the necessary contracts. The worm drive is slated for a sudden blossoming out in the automobile field, and the Flanders company is preparing to supply either the gearing itself to the automobile manufacturers, or the machinery for making the gears, and, in addition to this, will not overlook whatever possibilities exist in the use of worm gear drive for its own motorcycles.

May Manufacture Motorcycles.

Millville, N. J., may have a big motorcycle factory some day, if preliminary indications hold true. The Auto-Machine Co., of that place, has been incorporated under New Jersey laws, with a capitalization of $125,000, and among the objects of the corporation, according to its application filed with the secretary of state, is the manufacture of motorcycles, along with wagons and motor vehicles. The incorporators are R. C. Bowne, Sr., R. C. Bowne, Jr., and I. Bowne, all of Camden, N. J.

Bartsch to Handle Bosch Advertising.

A. H. Bartsch, formerly advertising manager for the N. S. U. Motor Co., has been appointed advertising manager of the Bosch Magneto Co., of New York, succeeding Harlow Hyde. Bartsch is one of New York's veteran motorcyclists. He has been with the Bosch company for about a year.

Rick to Take Larger Quarters.

F. F. Rick & Co., of Buffalo, N. Y., pioneers in that city in the jobbing of general cycle supplies and owners of several trade marked brands, will soon be located in larger quarters. The present office and salesroom is at 517 Main street, but the new address will be 635 Main street.

Buffalonians Added to Jobbers' List.

The official list of jobbers as compiled by the National Association of Cycle Jobbers has been expanded by one more name. The Cycle & Auto Supply Co., of 342 Genesee street, Buffalo, N. Y., has been added.

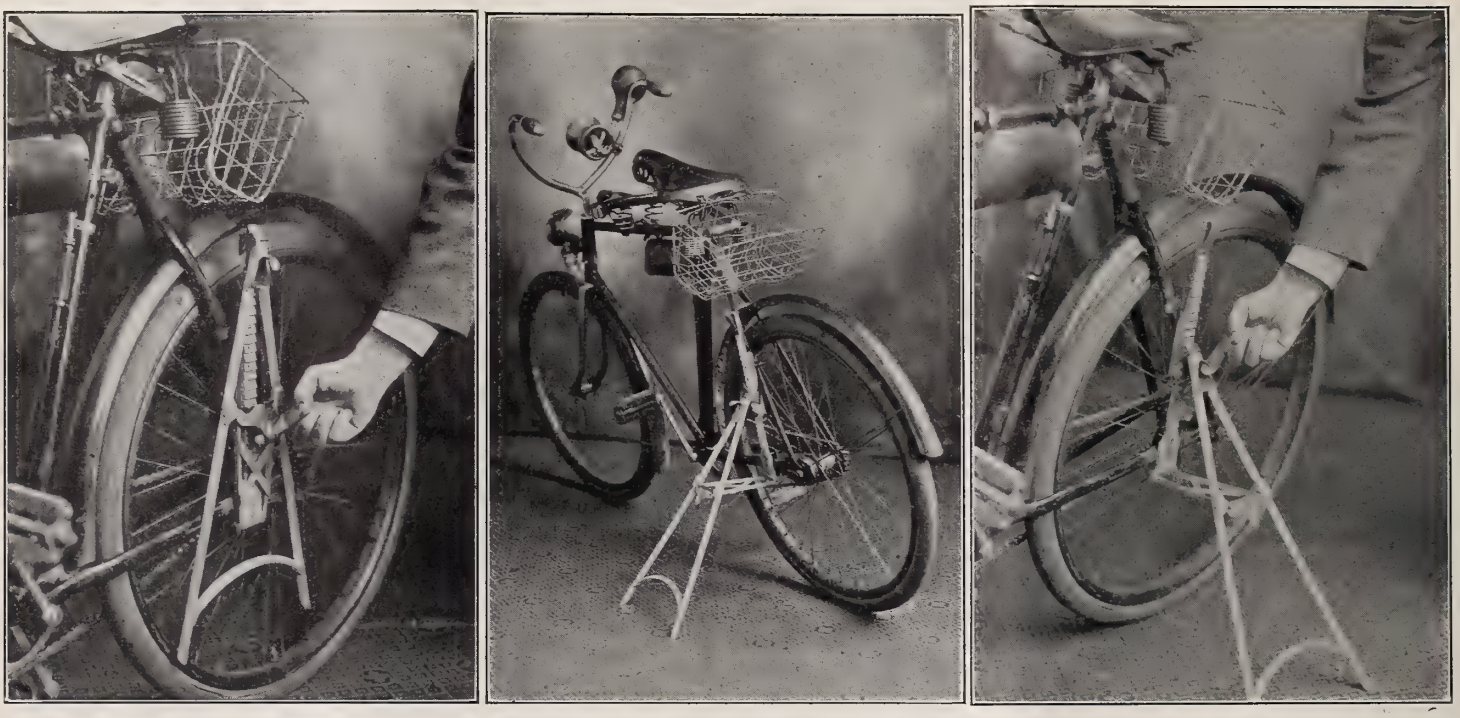
Cleveland Autocycle Incorporates.

The Cleveland Autocycle Co., of Cleveland, O., has been incorporated under Ohio laws with a capitalization of $10,000. Roland A. Bashur and others are the incorporators.

Will Handle Indians in Dover.

Arthur F. Tibbets, of Dover, N. H., has reopened his cycle shop at 4 First street, and is to handle Indian motorcycles in addition to bicycles and sundries.

FOR FRIENDSHIP AMONG DEALERS



New York's Association Promotes a Social Gathering—Dancing and Refreshments Provided.

Timed to take place just before the rush business sets in, a rousing "sociability session" is set for Wednesday night, 29th inst., by the Cycle and Accessories Dealers' Association of Greater New York, Inc, The affair is to take place at Turn Hall, Eighth avenue and 54th street, Manhattan, and all the bicycle and motorcycle dealers in the metropolis have been invited to come and to bring two or three of their nearest competitors.

"Sociability begets friendship," is the opening declaration of the invitation. "Friendship begets a host of better things. One of these is the betterment of business relations between individuals engaged in the one industry. That is the reason why our organization at its last meeting decided that for the next one it would lay aside its labors and give up its time to sociability and the sowing of seeds of friendship, from which latter, it is hoped, will come a plentiful harvest of good for all members, including those that are and those that will be.

"Be prepared to enjoy an evening that may be of great benefit to you, and do not come alone, but bring with you two or three of your nearest competitors. Invite them and tell them to bring their wives and sweethearts with them. We are going to have some dancing and refreshments. Remember this is for the good of all, and it will be the last opportunity we shall have of getting together before the rush of spring business sets in."

AFFORDS BICYCLES AN INDEPENDENT SUPPORT OF THEIR OWN

Providing the bicycle with a stand or prop that will give it the same independence of support from curbstones, fences, walls and cycle racks as is enjoyed by the motorcycle, a device known as the Silsby bicycle prop has been brought out by Frank S. Silsby, proprietor of Silsby's Bicycle Co., 461 Dauphin street, Mobile, Ala. Although applicable to light motorcycles, as well, the prop is primarily intended for bicycles, its appearance and method of operation being indicated by the accompanying illustrations. Among the emphasized claims for it is its being "rattle proof," in addition to being light in weight, quickly operated, automatic in adjusting itself when released and automatic in locking securely to the frame when folded, so that it is completely out of the way when not in use. Silsby points out that the prop does away with "the necessity of kicking the pedals around to rest on a curbstone or leaning the machine against something or letting it fall over on the ground, which latter practice in particular is to be condemned as it causes the loss of more or less time and considerable damage to the bicycle, in the way of sprung pedal-cranks, bent-up pedals, broken lamps, broken bells, ruined handle bar grips, scratched and marred frames, and the like." He expects his final letters patent the latter part of March, after which he will put the prop on the market.

Tire Production Up and Prices Down.

Lower prices for Diamond motorcycle tires have gone into effect this month, and F. H. Harris, manager of the motorcycle tire forces of the Diamond Rubber Co., Akron, O., explains that the reduction, which amounts to a little more than 10 per cent., is made possible by the fact that the company has tripled its motorcycle tire output within the last three months. Harris also maintains that the Diamond company was a pioneer in making motorcycle tires along automobile tire lines, in recognition of the requirements imposed by motor weight and high speed.

Foley Sticks to the Thor Agency.

J. C. Foley, Jerome avenue and 165th street, New York City, has closed for the uptown Thor agency again for 1911. He will work his old territory, the Bronx, where he has been preaching the Thor gospel for several years.

Winnipeg Dealers Reorganize.

Dealers in Winnipeg, Canada, who handle motorcycles and bicycles, held a reorganization meeting the first week in March, for the purpose of putting their association on a better footing. The following officers for the association were elected: B. B. Halladay and J. B. Urquart, honorary presidents; J. Crabtree, president; C. L. Cruikshank, vice-president; C. G. Cruikshank, secretary-treasurer; P. Cautnell, J. A. Hudson, W. Porn and B. Moore, executive committee.

Anthony Cycle Acquires More Room.

The Anthony Cycle Co., of Des Moines, Ia., has moved from 422 West Eighth street to 905 Walnut street. The new location gives the concern more room for the handling of its increasing bicycle and motorcycle business. The company has the agency for Merkel and Yale motorcycles.

Duquesne Handling Harley-Davidson.

The Duquesne Cycle Co., of Pittsburg, Pa., is handling Harley-Davidson motorcycles in addition to bicycles and sundries. T. C. Donahue is the manager, and the company is located at 6004 Beitler street, near Center and Highland avenues, E. E.

Schaal Takes Marvel for Erie.

William Schaal, of Erie, Pa., has taken the agency for Marvel motorcycles. He is located at 1015 State street.

Spinning Wants $50,000 Cash Loan.

In presenting his project for a bicycle and motorcycle factory in Seattle, Wash., Fred M. Spinning, a veteran dealer and jobber of that city, estimates that if the citizens will lend him $50,000, at 5 per cent. interest per year, he can, with his present facilities, get a good bicycle plant in operation in fairly short order, with a motorcycle department to come later. He proposes to pay the $50,000 back in instalments of 5 per cent. a year, so that the whole loan would be cleared in 20 years.

Progressive Proves Progressive.

After holding aloof from motorcycles since they first appeared, the Progressive Cycle & Supply Co., 81 Chambers street, New York City, finally has decided to take on the power driven two-wheeler. It has secured the Thor agency for the downtown section of Manhattan.

Hendee Registers in Illinois.

The Hendee Mfg. Co., of Springfield, Mass., has registered in Illinois, to do business in that state. According to its application, its capital in Illinois is $65,000. The Hendee company is capitalized at $2,600,000.

GETTING A PARTS CABINET CHEAP

Dealer Points the Way to How It May be Done—Saving Money on the Shop Furniture.

Parts cabinets are highly valuable to the average dealer, particularly if he carries much of a stock, but on the other hand a good sized piece of furniture of this sort costs more than many dealers care to put into it. Nevertheless such a cabinet is so needful and desirable to a dealer that if he tries to get along without one he soon will find his stock of parts becoming lost and mixed and his profits shrinking accordingly. The experience of one dealer shows that if a big financial outlay for a parts cabinet is inadvisable it still is possible to obtain a good cabinet for the expenditure of some gray matter and a small sum of money. "When I wanted a parts cabinet, instead of going down town and tying up in shop furniture a lot of money that I had better use for, I decided to build one myself and thus save the profit that otherwise would go to the manufacturer, wholesaler and retailer of the cabinet," says B. A. Swenson, of Providence, R. I. "After considering several schemes I finally hit upon one that looked better than the rest and then I got busy. First I spread the word among a lot of newsboys that I would pay two cents each for every good tobacco box that they would bring to my store. I mean boxes that plug tobacco comes in, not cigar boxes.

"These tobacco boxes are strongly built, and have dovetailed ends glued together. They will stand pretty rough usage. Returns began to come in pretty soon, for immediately they got the tip the 'newsies' pestered the cigar stores for boxes and good ones never went begging. Hardly a day passed but what some kid came around and cashed in on his boxes. The pile grew steadily, at two cents per grow, until one day when it had reached pretty good proportions I decided to withdraw the offer.

"I had over 100 boxes and I thought that that was enough for a starter. The boxes were the nucleus of the cabinet and I had obtained them for a mere song, whereas if I had had drawers built they would have cost a pretty penny, while they would not have been one whit better for my purpose. The next step I took was to call in a carpenter, show him where I wanted the cabinet to go, and told him to take measurements and build a framework to take the boxes, and with overall dimensions to fit the space where I wanted to put it. He went ahead and built the frame, which cost only a few dollars. Then I put handles on the boxes in spare moments, slipped them into the pigeon holes, tagged them with the names of the parts that were to be put in them, gave the whole thing a coat of varnish, and the job was done. Then I had a fine cabinet with capacity for thousands of parts, and it cost me only a trifle. I have since built another of the same sort for bicycle parts.

"When I wanted something in which to keep small screws, nuts and the like, I decided that it would not be advisable to attempt to build a cabinet for the purpose, because it did not need to be bulky, but required a great number of small compartments. Again I did some thinking, and it occurred to me that a thread spool cabinet would be just the thing. So I kept on the lookout for one and finally picked up a good one cheap at a second-hand furniture store. It is exactly suited for stocking small parts of this kind, and does not take up much space, but it holds an enormous quantity of small articles. Any dealer that wants to save money on his parts cabinets will find my methods pretty good, I think."

Andrews a Cycle Dealer in Toronto.

Walter Andrews, the amateur cycle sprint champion of Canada, has been appointed agent in Toronto, Ont., for Massey "Silver Ribbon" bicycles. He is located at 369 Yonge street, and in addition to handling bicycles and equipment, will maintain a repair shop.

Hill Gets New Era in Chicago.

Robert Hill is a newly appointed agent for the New Era autocycle in Chicago, Ill. He has been connected with the Halladay Motor Co., as sales assistant to Manager Hayes. At present he is seeking a suitable salesroom for displaying the New Era products.

Yale Opens in Minneapolis.

The Yale Motorcycle Co. has opened a showroom at 716 Third avenue South, Minneapolis, Minn., for the sale of Yale machines. A. R. Horn is the manager.

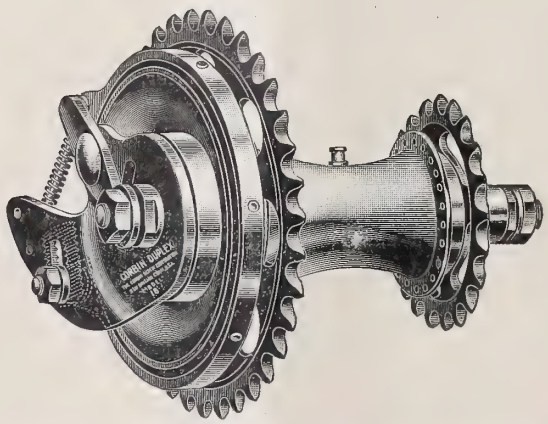
Price Transplants a Cycle Shop.

Worth Price, of Frankfort, Ind., has moved his cycle repair shop. He has transplanted it from the Model Machine Works to 304 East Washington street.

Marvel Agency in Portland, Ore.

Louis Carl Rose, successor to Max Krause, in Portland, Ore., has taken the agency for Marvel motorcycles. He is located at 518 Union avenue, North.

VIEWS IN THE STORE OF A BUSY BROOKLYN DEALER.



To cater to the needs of bicycle and motorcycle buyers in Brooklyn, N. Y., A. H. Patterson, 1080-82 Bedford avenue, maintains an immense stock in his salesrooms, ready for immediate delivery. His motorcycles are Pierce, Indian and New Era.

NEW YORK, MARCH 25, 1911.

"Knocking" vs. Making Sales.

In many cities and towns the motorcycle dealers utterly fail to pull together as they should. This condition is apparent to the prospective purchaser as well as to the field men of the various manufacturers, and it probably has been responsible for many intending purchasers of motorcycles abandoning all idea of taking up the sport.

Conclusive proof of the existence of such a state of affairs is to be had by anyone sufficiently interested to drop into a dealer's store, intimating that he is in the market for a machine and that he is favorably disposed toward other makes before making a decision. It will be a miracle if, upon hearing this, the dealer does not launch into a tirade against the machine his rival is handling, and give to the inquirer all kinds of arguments as to why the latter should not buy the machine for which he has indicated a preference.

In endeavoring to swing his prospect from the rival offering, the Blank's machine, the dealer in almost every instance will resort to "knocking" both the agent and the machine. Not satisfied with mentioning troubles that he has reason to believe his rival's machine is heir to, he enlarges on them and may not hesitate to make statements that are not true. When a prospective purchaser has made the rounds of the dealers and has listened to this line of "selling talk" from nearly every dealer he visits, he is likely to be pretty well bewildered, his chief conviction being that all the motorcycles on sale are "lemons" and all the dealers liars and crooks.

It is a wise dealer who studiously avoids reference to the machines handled by his rivals, and who, if the question is put to him squarely as to what he thinks of a rival machine, refrains from "knocking" it if he cannot bring himself to say something good of it. The average purchaser is more likely to believe and have confidence in the statements of such a dealer than in the kind who endeavor to make sales by "knocking" their rivals.

Dealers who make a study of other machines than their own, from the standpoint of salesmanship, are all too rare. The average dealer who never has handled the Star, for example, his rival's offering, as a rule is unfamiliar with the features of that machine. He may learn of the troubles it develops from riders who own them, but this usually is the extent of his knowledge, and this is the point upon which he dwells when talking to customers.

If one of the intelligently inquiring purchasers, who are becoming more general every day, drops in on a dealer handling a belt drive and wants to know why his machine is better than another with the same kind of drive, the dealer oftentimes is stumped. He, of course, will insist that his machine is better, but in many cases he cannot tell why. He has not compared the two machines to see what advantages his may or may not have over the other, and why the construction or design of the transmission on the machine that he represents is better than that on the other machine. The chief thing about rival machines that concerns most dealers is the troubles they have. These are "fed" to prospects to try and discourage them from buying other makes.

Selling motorcycles by emphasizing points of merit, and by studying the needs of the customer and the service for which he wants a machine, instead of endeavoring to make sales by "knocking" the other fellow and his goods, is a higher degree of salesmanship than the average motorcycle dealer yet has learned or given thought to. Nevertheless, it is the sort of salesmanship that will count most from now on. The class of people who now are taking up motorcycling do not want to have the dealer tell them the bad points of his competitors' machines, because his statements are biased. What they do want to know is the good points of the machine that the dealer himself is selling, and this is the subject to which he wholly should confine himself.

So many new motorcycle clubs are being formed nowadays, and the question of affiliation with the F. A. M. is obtruding itself so prominently in the affairs of these new born organizations, that it is a matter that should be settled once and for all when a club is founded. If the organizers of a club are enthusiastic F. A. M. boosters they can insert in the by-laws a clause making F. A. M. membership one of the conditions of club membership. Then when the by-laws come up for adoption this section can be discussed, and either adopted or rejected as the majority see fit. Whether or not a club decides to affiliate largely is dependent on how forcibly the club organizers present the case of the F. A. M., and the inducements which it offers to members. Much friction and possible disruption can be avoided by making a choice for or against affiliation, when a club is being organized. Then, whichever way the vote goes, it gives two alternatives to the defeated faction—either to abide by the wishes of the majority, or to withdraw from the club. The latter course probably will mean the organization of another club and that the F. A. M. will get one of them in the end.

Young clubs can take heart for the future, despite whatever present vicissitudes and struggles they may undergo, after contemplating an example that is afforded in Scranton, Pa. A bicycle club in that city has assets of $42,000 and enters 1911 with almost 300 members. But it has been running 30 years.

"Tried to get along without your paper this year, but I just can't do it, so here goes for another year. Good luck to you and your journal."—J. Schmidt, Tracy, Cal.

Coming Events

March 29, New York City—First social and reception of the Cycle and Accessories Dealers' Association of New York, at Turn Hall, 305 West 54th street.

March 31, Jacksonville, Fla.—Jacksonville Motorcycle Club's race meet on Atlantic-Pablo beach.

April 2, Mineola, L. I.—Motorcycle Touring Club of New York, Inc., 17 mile handicap road race on Long Island Motor Parkway; open to stock machines only.

April 2, New York City—Motorcycle Touring Club of New York (Affiliated), first club run, to Peekskill and return.

April 5, New York City—Concourse Motorcycle Club's annual dinner at Hotel Gerard.

April 8, New York City—Century Road Club of America's annual banquet, at Imperial Restaurant, Brooklyn.

April 9, Newark, N. J.—Opening bicycle race meet at the new Newark Velodrome.

April 16, New York City—Century Road Club Association's ten mile handicap road race, Floral Park, L. I.; open. Rain date, April 23.

April 18, Buffalo N. Y.—Motorcycle Manufacturers' Association meeting at Hotel Statler, 10 a. m.

April 19, Boston, Mass.—Boston Motorcycle Club's fourth annual Patriots' Day run to Worcester; open.

April 19, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Providence, Boston and return; 136 miles. First section.

April 23, New York City—Motorcycle Touring Club of New York's first cup trio-trial, Newburg and return, 150 miles; open.

April 30, New York City—Eastern Division C. R. C. A. spring century; open.

May 7, New York City—Empire City Wheelmen 15 mile handicap bicycle road race, open, starting from Floral Park, L. I.

May 7, Chicago, Ill.—Second annual reliability run of the Chicago Motorcycle Club to Waukegan, Libertyville, Elgin, Aurora and return.

May 7, New York City—New York Motorcycle Club's annual double spring century run to Southampton, L. I., and return.

May 14, New York City—Century Road Club of America, New York State Division, spring bicycle century run.

May 28 and 30, Chicago, Ill.—North Shore Motorcycling Club's two day race meet on Hawthorne track.

May 28, New York City—Century Road Club Association's 30 miles handicap road race, Floral Park, L. I.; open. Rain date, June 4.

May 28-29-30, Cleveland, O.—Three day endurance run of Cleveland Motorcycle Club

May 29-30, Newark, N. J.—Twenty-four hour endurance run of the New Jersey Motorcycle Club to Atlantic City and return.

May 30, Elmira, N. Y.—Elmira Motorcycle Club's first summer race meet.

May 30, Newport News, Va.—Peninsula Motorcycle Club's endurance run to Richmond and return.

May 30, Long Branch, N. J.—Long Branch Cycle Club's second annual road race meet; open.

May 30, Asbury Park, N. J.—Twenty-five mile road race of the Monmouth Cycle Club.

May 30, Grand Rapids, Mich.—Bicycle and motorcycle races at Michigan State Field Day, under auspices of the Western Michigan Cycle Club.

May 30, Plainfield, N. J.—Third annual 25 mile handicap cycle race of the Plainfield Cycling Club.

June 4, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Greenfield, Springfield and return; 175 miles. Second section.

June 18, Floral Park, L. I.—Century Road Club of America, New York State Division, 50 mile handicap bicycle road race; open.

July 3-9, Rockford, Ill.—Racing carnival of the Illinois-Iowa Motorcycle Association.

July 4, Asbury Park, N. J.—Opening motorcycle meet at the Asbury Park track.

July 4, Grand Rapids, Mich.—Annual open bicycle road race of the Western Michigan Cycle Club.

July 16, New York City—Motorcycle Touring Club of New York's second cup trio-trial, Newburg and return, 150 miles; open.

August 1-2-3-4, Atlantic City, N. J.—Summer meeting of the Cycle Parts and Accessories Association and the National Association of Cycle Jobbers.

Correspondence

Against the Repair Charge Discount.

Editor of the Bicycling World and Motorcycle Review:

In your issue of March 11 I read an article in regard to the giving of discounts to F. A. M. members, and wish to say a few words concerning this matter from the standpoint of the repairman.

In the first place, the primary purpose of a repair shop is to make money. The owner of the shop usually depends upon the profit from repairs and sales for his living; and, as any repairman knows, there are heavy expenses to meet in conducting such a shop, and the net profit in repair work is none too large at best. Now the profit on a dollar's worth of work may range anywhere from 20 to 35 cents. Part of this pays for heat, light, rent, etc.—perhaps ten cents of it. Take off ten cents discount to the customer and what have you left?

In the second place, what reason is there for giving F. A. M. members or any one else any discount at all? It does not help the organization in any way, except perhaps to induce "tightwad" riders to join in the hope of saving a few cents on repair bills. If the money saved in discounts went for good roads, maps, etc., it would be a different matter, but, as it is, the individual and not the organization is benefited.

As is stated in the article mentioned above, each rider will spend about ten dollars during the season for repairs and the like. This will be spent at various times in amounts ranging from 50 cents to two dollars, and the discount in each instance will be small. What a temptation for the repairman to add a small amount to each bill to cover his loss by the discount!

It seems to me that the knowledge that efficient work can be obtained at F. A. M. shops would be sufficient in itself; and if the committee that is endeavoring to get the repairman to give away a share of his hard earned profit would spend its time in a personal inspection of the repair shops it would result in much greater advantage both to the rider and organization.

I would like to hear from other repairmen in regard to this matter.

C. L. BOSSMEYER,
F. A. M. Shop No. 247, Freeport, Ill.

Herbert Kipp, Canada's Champion Motorcyclist, Racing Against the Ice Yacht "The Comet," on Toronto Bay, Toronto, Ont.

UNITED STATES TIRES

MOTORCYCLE DEALERS!

SUPERIORITY AND DEPENDABILITY

Their sales exceed the sales of all other motorcycle tires. They hold all the records which were ever made in America.

And in the daily endurance contest of good service they are always leaders and nearly every motorcyclist in America knows it.

They cost no more than any other tire and can be purchased everywhere.

UNIFORMLY SUPERIOR TIRES

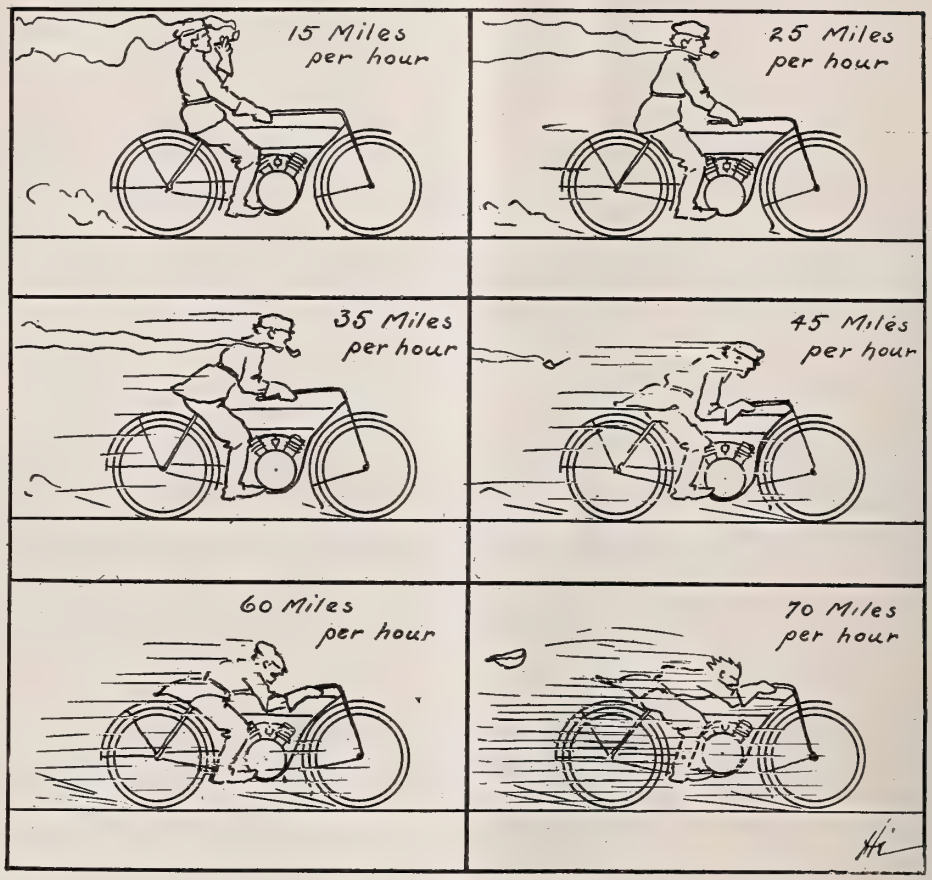
San Joseans Race "to Beat the Cars."

Three motorcycle events furnished some interesting sport at the aviation meet at San Jose, Cal., on the 18th inst., and again demonstrated that the two-wheeler is the master of the motor car on dirt tracks. The local motorcycle "cops," Emil Agraz and James Margason, riding Merkels, gave the motor car drivers who were present a line on what gait the latter would have to strike to get away if the bluecoats once got on their trail.

Margason was the first to gather honors, in a five mile mixed handicap. He was on scratch, together with a 40 horsepower car, and gave away 30 seconds to a 20 horsepower car. Despite the soft and dusty condition of the track and the advantage in power enjoyed by the car drivers, Margason trimmed them easily. His time was 6:31.

Agraz, who is a Mexican and a former professional bicycle rider, met Margason, who is a bitter speed rival, in a five mile pursuit. They put up a lively scrap, but Agraz, through superior track generalship, won. Time, 6:10. His best mile was run in 1:02.



Four started in the ten mile free-for-all, which proved easy for Fred Northrup, Jr., 5 Indian. Agraz and Margason, Merkels, had a hot fight for second place, the Mexican scoring. Time, 11:26. A large crowd attended the meet, which was held at the Driving Park.

Kipp and an Ice Yacht in Speed Battle.

Racing his motorcycle against an ice yacht, Herbert Kipp, the champion motorcyclist of Canada, provided a sensational contest on the bay at Toronto, Ont., on the 18th inst., the speed battle ending in what was practically a dead heat. The distance was approximately one mile, but no time was taken, because an exact measurement could not be made. Kipp rode his 7 horsepower Indian, while the ice yacht was "The Comet," the fastest kite in the harbor. There was just enough breeze blowing to drive the ice yacht at its highest speed.

The warm sun made the surface of the ice quite sticky, which helped the motorcyclist considerably and did not bother the yachtsmen particularly. There were several slushy surfaces on the course, which was a straightaway, and when the contenders struck these spots the motorcycle always shot ahead. On the smooth portions of the ice, however, Kipp was at a disadvantage, as the tires of his machine did not hold very well. Thus for the whole distance the two were fighting for the lead, first one and then the other showing the way. The strange contest has been one of the sport topics of Toronto ever since. Kipp has been appointed a Canadian representative of the Hendee Mfg. Co., of Springfield, Mass., and intends making a tour of the country with his Indian racer.

MOVING PICTURES—A SPEED STUDY IN SIX FLICKERS.

N. Y. M. C. Nominates Officers.

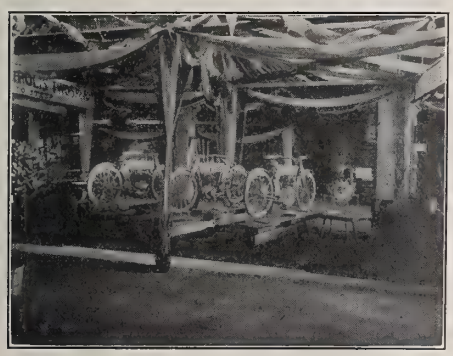
After holding off its nomination of officers since the first of the year to give the Motorcycle Touring Club of New York, Inc., a chance to consolidate and have a voice in the election if it so desired, the New York Motorcycle Club at its regular meeting this week decided to wait no longer for the other club to indicate its intentions, and named the following ticket to be voted for at the next meeting: William Wood, president; Frank Seery, vice-president; M. E. Toepel, secretary-treasurer; Albert Kreuder, captain; A. T. Klages, first lieutenant; J. F. McLaughlin, second lieutenant; directors, the president ex-officio, Eugene Kicherer, George P. Jenkins, Edward Malloy, T. J. Sixsmith. It was expected that an emissary from the other club would be present to state the intentions of the Touring Club, Incorporated, in regard to consolidation, but none appeared. Some changes were made in the plans for the club's annual spring double century run to Southampton on May 7. It was decided not to have a single century division to Patchogue, or a Brooklyn division for the benefit of riders across the river, both of which features have been incorporated in previous spring runs.

Kelsey Three-Wheeler Plugs West.

On its transcontinental trip from Hartford, Conn., to San Francisco, Cal., the three-wheel Kelsey motorette, made by the C. W. Kelsey Mfg. Co., of Hartford, has passed Roanoke, Va. The machine was badly delayed due to the heaviness of the roads below Wilmington, Del. The roads were so bad outside of Washington that it was necessary to turn back, striking into the route as originally planned at Roanoke.

Baker is Balked in Non-Stop Trial.

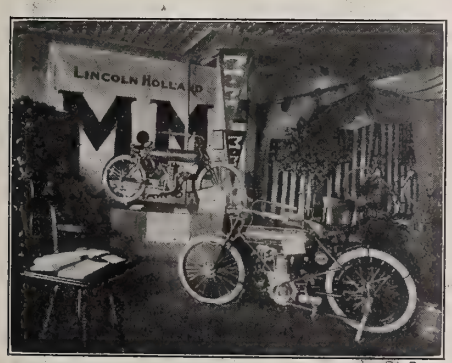
Erwin C. Baker, of Indianapolis, Ind., the long distance motorcycle specialist, riding a 4 horsepower Indian, made an unsuccessful attempt to break his non-stop record of 306 miles, on the Motor Speedway, Tuesday, 21st inst. The blowing out of a rear tire at 75 miles, brought the run to an end. Baker indicates, however, that he will make another attempt to beat his record within a week or ten days. He got under way shortly after 10 a. m., and quit just before noon, having averaged approximately 40 miles an hour while in action. Harry Graff, president of the Indianapolis Motorcycle Club, acted as referee of the trial, and the other officials were as follows: Fred Laphan, John Hohl, Myron Vestl, judges; O. C. Jones, Fred Stuart, Ray Scott, timers; W. T. McCoy, clerk of the course.



Owego Fixes a Speed Limit.

Owego, N. Y., has passed a new speed ordinance, limiting the speed of motorcycles to 15 miles an hour in the village. A fine of $25 is provided for each offense.

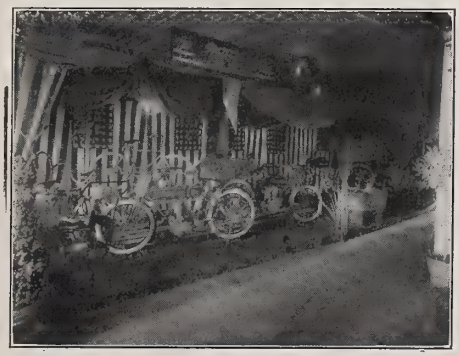
NOVEL ACCESSORIES AT LOS ANGELES SHOW



Wind Shields, Patent Pedals, Music and "Harem Skirts" Help Make Californians' Motorcycle Exhibition Successful—Fourteen Prominent Makes of Machine Staged—Big Crowds Every Day.

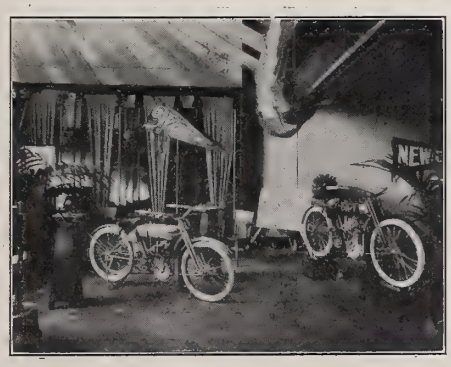
Far outdoing anything of the kind that had been attempted on the Pacific Coast before, the second annual motorcycle show, held by the Los Angeles Motorcycle Club, at 631 South Spring street, Los Angeles, Cal., which opened its doors on Monday, 13th inst., is remarkable by reason of the display of motorcycle accessories originating in the West, in addition to the

HARLEY-DAVIDSON DISPLAY



handsome array of well known motorcycles. Fourteen makes of motorcycle were revealed when the doors opened, and the accessories ran riot, not only on the machines, but in the balconies. The machines shown included Pierce, Emblem, Indian, Racycle, Harley-Davidson, M-M, New Era, Wagner, Merkel, Excelsior, Thor, Yale, Moto-Reve and Marvel. The R-S

LINCOLN HOLLAND'S M-M BOOTH



was delayed in its arrival. From the start the show was thronged with men, women and children, and, strange to say, the women were far and away the most numerous. An orchestra kept up a continuous melody and there was a welcome for everybody.

New ideas are plentiful in the exhibits that were contained in the beautifully decorated hall. J. T. Bill showed a wind shield attachment for the Pierce motorcycle that was a stunner to the crowds. It is beautifully made, of the best glass, and has a brass frame hinged in the center to

RACYCLES BACKED BY "OLD GLORY"

allow the shield to drop and give the rider an open view of the road if he desires. Possibly the most interesting of the accessory exhibits, of which there were a great many, was that of the Motorcycle Hanger Co., which concern had a big sign at the front of its booth, "Ride with Both Feet Down." A spring attachment on the right pedal unlocks the pedal and permits it to

WHERE WAGNERS WERE ON VIEW

drop level with the left. A ratchet clutch locks it in normal position when it is needed for pedaling.

"Harem skirts" in motorcycle costumes for ladies were a feature at W. H. Hoegee's exhibit. They were the real thing, too, and attracted no end of attention, not only from the ladies but from the men. Quite a neat waterproof motorcycle drive belt was offered by the Los Angeles Rubber Co. Holmes and Kittle had a handsome exhibit of spankers, tandem attachments and "speed belts." The Hollwell Co.'s new speed indicators for motorcycles also were on view.

W. H. Whitesell was in charge of the Excelsior exhibit; C. W. Risden bossed the Indian show; the J. T. Bill crowd put on the Emblem and Pierce; F. M. Jones staged the Racycle exhibit; C. L. Smith had the Merkel; W. H. Hoegee the Yale; C. M. Frink, Wagner; F. L. Everett, New Era; L.

INDIANS, WITH DE ROSIER OBLIGATO

Holland, M-M; A. Freed, Thor, and A. F. Porteous and Roy Symonds, the managers of the show, backed the Marvel exhibit.

Los Angeles is fortunate in being one city in the United States that can most successfully demonstrate the possibilities of a local exhibition given over exclusively to motorcycles. Because of the mildness of its climate, motorcycling is practically an

EMBLEMS AND A WIND SHIELD.

all-the-year-'round sport in its vicinity, and the Los Angeles motorcyclists number literally in the thousands. Because of the magnitude of its retail trade in motorcycles it had ample justification in undertaking a project such as New York and Chicago have not dared to attempt. The estimated attendance was about 1,500 people per day.

"Pointers" for the Motorcycle Novice

How well I remember my first motorcycle pointers. They were rare in those days—none of us then had had years of experience. The papers weren't full of hints and helps, nor did the manufacturers supply a book of instructions. We listened to each other's experiences. We read every possible hint and passed it along to our riding companions to dwell on and absorb—the day was sure to come when we would need it, for then 75 miles without tinkering was something marvelous.

It is with those "happy days" in view that I thought the new sheep coming into the fold of the "grandest of sports" would be interested in some of the primary tips, so as to be prepared when the expressman backs up to the door with the glittering "one lunger" or "twin," as the case may be. You have filled up your tank and turned on the gasolene and away you go—the engine runs perfectly at slow speed, but when the throttle is open for a few seconds the motor slows down, only to pick up again.

This is probably due to a partially choked gasoline pipe allowing the gasoline to feed in gushes, or, if the winter days are still in force, and the carbureter is set forward of the cylinder and quite away from the motor, the trouble may be due to partial freezing, which condition may be remedied temporarily by placing a shield forward of the carbureter to protect it from the icy draughts.

The engine starts easily, but will not take any extra air when running open.

This is no doubt due to too small a jet, and therefore it will be advisable to slightly (but very slightly) ream out the jet or file the slots, as the case may be, to admit more gasoline. In very rare cases (when the machine has been run for some time) the trouble may be due to a choked or clogged muffler.

Engine is difficult to start and will not take any air.

Provided the contact points and also the spark plug electrodes are the proper distance apart (0.5 mm.) the trouble would be due to too much air being admitted either through the extra air intake or the base (adapter) of the carbureter. If the extra air is closed, partially close the regular air adapter or intake and, if necessary, fit a larger jet as well.

Absence of compression through leakage often causes difficult starting, in which case the cure is obvious—new gaskets—tighten up the joints.

Engine starts well, but the best speed cannot be obtained with the throttle wide open, the motor showing up better when throttle is about half open.

If the engine is designed with automatically operated intake valves, the trouble may be located here, in that the valve may open too far or have too weak a spring, possibly both. Engines of this type should have their inlet valve opening or "lift" reduced to a minimum, 1-16 in, or 3-32 in., and the strength of the spring increased as much as possible, of course taking into consideration that too stiff a spring will cause very difficult starting and prevent the motor from running slowly. The spring tension and amount of opening, strictly speaking, vary according to the diameter of the valves, but with a normal single cylinder motor of about 3¼ in. bore the valve lift should not exceed ⅛ in., while the strength of the spring should be about 2 to 3 pounds. The general law is: For high speeds, less lift and stronger spring; for slow speeds, vice versa.

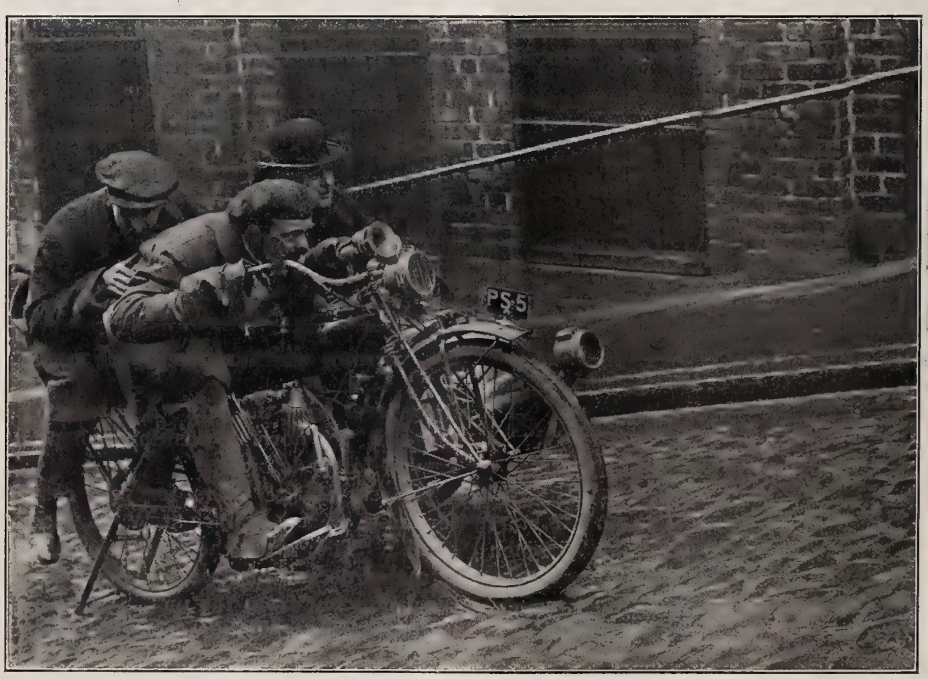
This trouble may be due to several other causes, as, for instance, too short an exhaust cam, insufficient lift or wrong timing of the same, a choked or clogged muffler, caused from feeding too much oil, or too rich a mixture. If mechanically operated valves are fitted, the trouble is probably due to wrong timing of the inlet or exhaust valves.

Carbureter takes full air at moderate speeds, and seems ready to take more if it were possible to offer it.

The jet in this case is too large—fit a smaller one immediately; also see that adapter or regular air intake at the base of the carbureter is not clogged.

Engine misses when running at all speeds; extra air cannot be given.

Your trouble undoubtedly will be found in the ignition system—loose connections, fouled plug, dead batteries, if magneto, oil on slip ring from over oiling the bearings. Sudden stops or missings are never due with but one exception to the carbureter, but to the ignition system. The one exception is a piece of grit floating about in the nozzle being sucked up, thus totally stopping the supply of gasoline.



Overheating of engine when running wide open—extra air cannot be given.

This is seldom due to the carbureter but may be due to the following: Wrong timing of the valves; late ignition; partial choking of the exhaust pipe or muffler; too high compression; or engine shielded so as not to receive cooling draughts.

The motor is subject to chronic knocking on grades and hills.

This may be due to high compression, or too early ignition, and may be partially overcome by closing the extra air valve or shutter and retarding gradually the position of the ignition timing. Knocking while on level roads may be caused by pre-ignition—small particles of carbon becoming red hot, or the thin points of a cheap spark plug becoming incandescent, thus exploding the mixture when only partially compressed.

A. H. BARTSCH.

Climbing a grade of 1 in 3½ on Arthur street, Edinburgh, Scotland. Ernest Frasetti, two passengers and a 7 Indian with side-car did it.

A Septuagenarian Convert's Rambles

That age, even when compounded with lack of mechanical skill, is no bar to motorcycling, is the opinion of T. J. Conley, Orlando, Cal., who at 74 years made a trip of over 3,000 miles with no trouble to speak of. The youthful septuagenarian, who rides a single cylinder Indian, toured through the Golden Gate State and well into the fastnesses of Oregon, requiring assistance only on one occasion. In addition to providing a most enjoyable outing at a minimum expense, his motorcycle was responsible for a happy family reunion between himself and his children, whom he had not seen in two decades. Told in his own words, an account of his rambles follows:

"After acquiring all of the information I could about the machine from the printed instructions and practice on the stand, together with a little skirmishing about town, I started from Orlando for southern California, through Marysville, Sacramento, Stockton, Merced, Madeira, Fresno, Visalia and Porterville, in the latter neighborhood where lived my nine children whom I had I had not seen for 19 years. My swoop down on them at a 25 mile clip was a surprise royal to them.

"By this time I began to realize that my mount was good for any road in the Sacramento valley, so I started west for the Coast range, crossing King river over a bridge south of Lemoore to the sheep shearing corrals. Crossing the San Joaquin river at Banty station I traveled north to Red Bluff and Anderson—shearing sheep at the different corrals on the way through Colusa and Glenn county—then up the Tamarack road to Big Valley, through Beber, Aden and Alturus to Lake View in Oregon.

"From here I went north to Summer Lake, to Silver Lake and Buck Creek, then back through Warner Valley to Cedarville, south, and then west over a range of hills to Big Valley again. Then I took the Tamarack road back to the Sacramento

T. J. CONLEY AND HIS MOUNT

valley. At Orlando my cyclometer registered 2,103 miles. Since then I have ridden 1,634 miles.

"I never have had assistance but once. That was owing to the rocks and washouts when climbing the 11 mile stretch from Whitmore to the mountain summit, going north. Diverting a moment at this point. I would advise any motorcyclist, when about to coast down a long and steep mountain road first to put his battery switch plug in his pocket or else disconnect the plug wires if he has a magneto. Then he can use the compression as a brake. Otherwise the bumping over rocks and big pine roots may advance the spark until the machine gets beyond control and then the rider will reach the bottom of the slope in record time if a tree or boulder on the way does not interfere.

"Never did a motorcycle get such a test for endurance. Over the oiled roads that were full of pot holes, the sand and gravel roads of the South, then the lava rock, pine roots and steep grades in the mountains. And if this punishment were not enough, there was the sage brush of Oregon and Nevada, coupled with the mechanical ignorance of the rider, all of which I think is sufficient to prove that a motorcycle was a very good investment for me. My machine seems to be just as good today as the day I received it. The only stops that I have had were to clean soot from the spark plug. Although I am now 74 years old, I expect to continue riding a motorcycle for several years to come."

Toronto Endurance Run Brewing.

From Toronto to London, Ont., and return is the route that has been selected for their project by some of the members of the Toronto Motorcycle Club who are proposing an endurance contest for May 24. The distance between the cities is 128 miles, making 256 miles for the round trip. The roads are good, bad and indifferent, so that the route would afford all the variety of going that could be desired for a contest of this character. The club has not yet officially taken up the project, but will consider it in the near future.

"Look at 'Em Go!"

Rival Claims for 100 Per Cent. Honors.

Challenging the claim recently made by the Motorcycle Touring Club of New York, affiliated, that it was the first 100 per cent. F. A. M. club, R. S. Morton, of the F. A. M. Night Owl Club, and J. U. Constant, of the Linden Motorcycle Club, both of Brooklyn, N. Y., respectively, lay claim to the honor in behalf of their organizations. Morton says that his club was the first one to affiliate, and became a 100 per cent. club at the same time. Constant states that the Lindens received affiliation number 4, and that they were the first to bring in a full quota. It is understood that the Tourists' claim to be the first 100 per centers was based on information received from Secretary Gibson to that effect at the time they affiliated. It would seem that he is the proper person to decide the controversy authoritatively.

Bridgeport Gets the Racing Bug.

Once a hotbed of bicycle racing, Bridgeport (Conn.) now is preparing to assume a similar position in the motorcycle world. The first step in this direction was taken this week when the Lake and Bridgeport Motorcycle Club was formed to promote motorcycle meets at the Bridgeport Aerodrome, formerly Nutmeg Park, situated in Stratford, a suburban town situated a few miles from the northern border of the Park City. The new organization is closely identified with the Bridgeport Motorcycle Club and will have its headquarters at the rooms of the latter. It is planned to hold eight meets during the summer, dates to be announced later, and to put on amateur and professional events. Liberal inducements will be offered to the leading riders in both classes to compete.

DeFraga May Be Another DeRosier.

Daredevil motorcycle racing of the most sensational sort is promised if Ernest Pye, manager of the Salt Lake City saucer, is successful in persuading Cecil DeFraga, of Melbourne, to come to the "States" and ride as he has been riding in Australia. DeFraga is Australia's star motorcyclist and automobile racer. He is daring to a degree that keeps him in splints and bandages no small portion of the time, but he has made the fastest times that ever have been made in the Antipodes. In racing he is described as a veritable madman. He is well versed in the mechanical and engineering side of motorcycling, and is able to get about all the power and speed there is out of a motor.

Jersey 24 Hour Run Sanction Delay.

Before granting a sanction for the 24 hour endurance run of the New Jersey Motorcycle Club, the chairman of the F. A. M. competition committee has insisted that the entry blanks have a clause providing that the contestants shall carry proper lights during the night part of the run, and that the blanks have an agreement form absolving the club and the F. A. M. from all liability from any cause. He required, also, that the club should arrange to distribute the prizes within five days after the conclusion of the run, which is to take place May 29-30. These matters having been straightened out, the club is to receive its sanction, and will issue its entry blanks immediately.

But Ain't It Natural?

Thornley Praises His Referees.

"I have nothing but the highest commendation for every referee that I have appointed," said Chairman Thornley, of the F. A. M. competition committee, the other day when the question of dissatisfaction over referees' decisions was brought up. "They have followed instructions to the letter, they have given every rider a square deal, notwithstanding the allegations of certain riders to the contrary, and while my representatives continue to officiate as they have been doing I propose to uphold and stand back of them to the very last ditch. A motorcycle referee and a baseball umpire can sympathize with each other. Neither has any friends, either among the participants in the sports where they officiate or the spectators. Criticism, roasting and abuse is their common lot, and it therefore is but right that they should receive their due."

Speed Might Upset Discipline.

For the militia of Canada a motorcycling corps is being proposed by the officials. Humorous objection is offered that discipline in the motorcycle corps might be badly upset where a captain had a 3 horsepower machine and a private owned a 7 horsepower, as the private might be inclined to "make a monkey" of the captain on the road.

Wichitans May Race to Kansas City.

Enthusiasts in Wichita, Kan., are projecting a motorcycle race from that place to Kansas City and return. The distance is 246 miles.

WHERE TIMID MOTORCYCLISTS TURN BACK TO SYDNEY, N. S. W.

This point on the South Coast is 30 miles from Sydney. To go further means riding hair-raising grades. Few go.

Speed Run for Spokane's Riders.

For its first road race of the season the Spokane Motorcycle Club, of Spokane, Wash., has chosen March 26 as the date, and for the route has selected a run to Coeur d'Alene city and return, the trip to cover close to 67 miles. Most of the members of the club have made the run in times past, and it is expected that last year's best time for the trip will be broken. In a practice run, on the 12th inst., a number of the new members of the club showed up in fine style, and it was evident that the older riders will have to extend themselves to the limit to beat them when the race is held. Captain Auld, of the club, is confident that there will be at least 75 entries for the event. J. S. Cook has been elected to take charge of the riders on the different runs that are planned, and he will have the power to fine any of the members who do not obey his instructions. He will have full charge of the road race while the riders are on the road.

Indianapolis Reiterates Its Plea.

From the viewpoint of Indianapolis motorcyclists there is every reason in the world why their city should be successful in its bid for the F. A. M. meet this year, and none whatever why it should not. In pleading its case one of the leading members of the Indianapolis Motorcycle club remarked: "Two years ago when no one else would take the meet, we did, and at that time the old track at the Motor Speedway was unfit for racing. Then we did not have a fair chance to entertain the visitors in the right way. Now we have a good track—the best in the country—and we want another chance to entertain the F. A. M. and to hold the meet. Indianapolis is so conveniently situated that a great many riders would find it more accessible than some of the other cities which are bidding for the meet. Furthermore, we have a track already built, not waiting to be built, and no other city can offer as good a track in time for this year's meet."

No Third Term for President Willis.

Fred I. Willis, Indianapolis, Ind., president of the Federation of American Motorcyclists, has declared that he will not be a candidate for a third term. Pressed for reasons for his refusal to run again, President Willis said: "I will not run for office next election as I am too busy now. My business interests demand my attention, which I have neglected a bit lately. However, my interests in the F. A. M. will not cease with the expiration of my term, for under the constitution as an ex-president I shall be a member of the board of directors next year. I am proud of the membership increase and hope to see 10,000 names on the roll when I go out of office."

North Shore's Successful Smoker.

Over 200 members and friends of the North Shore Motorcycling Club of Chicago, Ill., attended a "smoker" given by that progressive organization in its new club rooms at 732 Sheridan road, on the night of the 18th inst. The entertainment was of a quality that evoked many favorable comments for the house committee. The club has 150 members.

Louisville Will Make a Request.

If Indianapolis, Ind., succeeds in landing the F. A. M. national meet, the Louisville Motorcycle Club, of Louisville, Ky., intends to make a strong effort to have the national endurance run come through Louisville. The club contends that the South never has had any part of an F. A. M. endurance run in its territory, and that it should now have some of the benefit that the endurance run creates in stirring up interest. A suggested endurance run route is offered from Indianapolis to Louisville by way of Columbus and Peoria, and from Louisville to Cincinnati by way of Shelbyville, Frankfort, Versailles, Lexington and Paris, Ky. This would take the contestants through some of the finest scenery in the Blue Grass country. The club does not care how the endurance riders get from Cincinnati to Indianapolis, but indicates that the route might be through Columbus and Toledo.

Two Days of Racing for Chicagoans.

Encouraged by the success which attended its one entry into race promoting last season, the North Shore Motorcycling Club, of Chicago, Ill., is going to try to "repeat" on a larger scale, and thinks that it can get away with the undertaking as handily as before. It has scheduled a two day exclusive motorcycle meet at the Hawthorne track for Sunday, May 28, and Tuesday, 30th. A big card will be arranged, and efforts made to bring on some of the top notch executors of the Huyck skid, which was originated by that diminutive flier, and widely copied by other ambitious corner cutters.

CLUBS ARE SWARMING TO F. A. M.

All Parts of the Union Show Brisk Organization Activity—Estabrook and Gibson Busy.

A continued increase in new clubs and affiliations is the glad news which Chairman Estabrook of the F. A. M. membership committee embodies in his weekly report of his department. It did not require long for the F. A. M. serum to "take" with the new Atlanta (Ga.) Motorcycle Club, as is evidenced by its affiliation on the 11th inst. with 24 men. This club ran a dead heat with the South Chicago Motorcycle Club in the race for affiliation, both registering on the same day. Opposite affiliation number 94 stands the name of the Newcastle (Pa.) Motorcycle Club, which received its credentials on the 13th inst. Thirteen men enlisted under its banner.

C. G. Holmes, 165 Bushwick avenue, Trenton, N. J., having indicated his intention of trying to form a club in the Jersey capital, Chairman Estabrook is willing to back his faith in Holmes "making good" to the extent of a handful of good Havanas. Holmes thinks that he can corral at least 25 of the 100 unattached motorcyclists who are roaming about town, and weld them into a fine organization.

Sheboygan, Wis., has no motorcycle club but it needs one powerfully bad, according to the Wald Co., 317 N. Eighth street, dealers in that city, and it indicates its intention of putting Sheboygan where it belongs. There is said to be good club timber in that section, waiting to be shaped up.

Indications are not wanting that at last the South is developing a deep and lasting affection for motorcycles after somewhat disdaining to notice them heretofore. From the new Chattanooga (Tenn.) Motorcycle Club comes word that it will vote on the question of affiliation on the 30th. It is gaining members rapidly since its organization last month.

Business went on as usual in Secretary Gibson's office on the 17th inst., St. Patrick's Day, and while he does not indicate that he used green literature on that occasion it would not have been out of place. A green certificate of affiliation hanging in the quarters of the Indian Motorcycle Club, of Cleveland, O., would be a perpetual reminder to the 12 members of the day when they joined the family. The Clevelanders will be known as No. 95. E. M. Tracy, of Euclid, is secretary.

Even though he lives in a Puritanical state, noted for its strict observance of the Sabbath and for its severe punishment inflicted on those who do work on that day, Gibson takes chances of being put in the stocks for Sunday labor. On the 19th he gave the F. A. M. Motorcycle Club, of Oakland, Cal., its affiliation papers bearing number 97. The Californians came in 50 strong, indicating that Secretary E. F. Ross, 521 San Pablo avenue, Oakland, has no sinecure in that office.

Motorcyclists of Frankford, Pa., a suburb of Philadelphia, have the club bee buzzing in their ears, and likely will show results soon. They are favorably disposed to make it an F. A. M. club.

E. W. Lozier, Corona, Cal., is whirling the membership lasso among riders in that section and soon expects to corral enough of them to form a club. It will affiliate.

W. J. Coleman, 1915 Whitney avenue, Niagara Falls, N. Y., is directing the campaign for new members that the Niagara Falls Motorcycle Club is waging. In the meantime the charter is being held open.

F. A. Nemec, 712 St. Germain street, St. Cloud, Minn., and Ray Vyne, Prescott, Ariz., report that they have new clubs in process of incubation. The hatching is expected to occur shortly.

Youngstown, O., is one of the latest cities to qualify with a club. It serves notice that it will apply for its affiliation papers soon.

One hundred per cent. F. A. M. is the slogan that the newly formed Utica (N. Y.) Motorcycle Club has adopted. It closed its charter recently with 45 names on the list. A rapid increase in membership is already in process.

Roberts is Made an F. A. M. Referee.

H. T. Roberts, sales manager of the Aurora Automatic Machinery Co., Chicago, Ill., has been appointed official referee for the Western District, by the Federation of American Motorcyclists. He has accepted the office.

"A Hot Spark."

HOW TO VOTE AT NATIONAL MEET

Delegates Should be Instructed on Important Questions by Clubs, Willis Says—Advance Discussion.

Not all members are familiar with the machinery governing the annual national meet of the Federation of American Motorcyclists, and in order to have this year's meet efficient in carrying out the real wishes of the membership, President F. I. Willis is taking steps to have all the more important questions and "issues" that will come up, well discussed and digested before the meet takes place. In explaining the system that now prevails at national meets, President Willis says:

"The 1911 meet promises to be one of the most interesting since the organization of the F. A. M. The Federation has grown very rapidly during the last six or eight months.

"At the last meeting the constitution was revised so that the government of the body shall be by delegates. The constitution and by-laws require that a delegate be appointed for each 25 members or major portion thereof; that is, if an affiliated club had 38 members they would be entitled to two delegates. The state commissioners shall appoint one delegate for every 25 members or major portion thereof, after deducting the membership from affiliated clubs.

"Heretofore the meetings of the national body have been conducted in too short a space of time and consequently the best interests of the Federation have not always been paramount. It is therefore my desire that any member or any affiliated clubs of the F. A. M. that should desire to submit any proposition to the national body should send the same to Secretary Gibson at as early a date as is possible. These resolutions will then be made public and different clubs can discuss the matter in interest and pass resolutions for or against the same and instruct their delegates as to the best interests of the F. A. M.

"There is now a proposition to be brought before the F. A. M. for promoting a national racing circuit. There has also been a discussion as to the desirability of changing some of the racing rules, as well as many other questions to be brought up from time to time, and it is my desire that as much publicity be given to these matters as is possible.

"As the delegates will be representatives of the affiliated clubs, it is very necessary that they should go to the meet properly instructed as to the desires of their club. It is my desire that the F. A. M. be conducted in a manner that will bring about the greatest amount of good to the greatest number of its members."

BEACH RACES FOR MOTORCYCLES

Jacksonville Speed Carnival will Include Them, After All—Possibilities of Record Trials, Too.

Events of the past week now make it practically assured that there will be motorcycle racing, and perhaps record trials, in connection with the automobile speed carnival at Jacksonville, Fla., the latter part of this month. Although E. A. Moross, who is acting as manager of the carnival, stated that there would be no motorcycle events in connection with the meet, a sanction has been granted to the Jacksonville Motorcycle Club for March 31.

Ray E. Reed, who is the official F. A. M. referee for that district, will officiate at the motorcycle events. He is one of the leading spirits in arranging the motorcycle meet. The club has secured the use of the official electrical timing apparatus for the day of its races, thus assuring that all times will be as near correct as it is possible to have them. Of course, it is not expected that any records will be broken, at least not in the club events, as the riders and machines nearly all will be from the local district. It is the aim of the club to make as much of a local affair as possible, and therefore no effort is being made to attract outsiders, although they will not be barred should they desire to enter.

It has been rumored that some of the motorcycle manufacturers who are prominent in racing are desirous of sending men and machines to try for straightaway records during the carnival. In this connection it is understood that the attitude of the club is, that if such record trials be held that they take place entirely apart from the club meet and under a separate sanction. In behalf of the club, Referee Reed is reported as stating that if the competition committee insists on record trials being held in connection with the club meet and under the same sanction, the club would consent, but that it would prefer to have the trials run separately, as it is the belief of the members that if speed trials were held in connection with the meet they would overshadow the club's own events in prominence. The local riders want all the glory for themselves, if possible. However, Referee Reed indicates a desire on the part of himself and the club to do everything in their power to assist in making the record trials a success if they take place. Assurance is given that the electrical apparatus will be used to record any trials that are made, so that if any records are established they will be official.

Chairman Thornley, of the competition committee, is an ardent supporter of the suggestion advanced by the club regarding keeping the record trials, if there be any, separate from the regular club events. He is unwilling to upset the original plans of the club by shouldering it with the labor of handling the details of the record trials, and he says that he will have nothing to do with record trials unless they are run separately from the club events under a separate sanction.

The chairman has written to the manufacturers whom he considered interested in such trials, suggesting that if they desire to try for straightaway records a sanction be applied for and an entry fee named that would be sufficient to compensate the referee and other officials whose services would be necessary. If this suggestion is carried out, the trials will be purely a trade affair, promoted by the manufacturers concerned, and all moneys received for entries likely would be absorbed by fees and expenses incurred by the officials.

Worcester Club Wants a Speedfest.

Provided that the local speed platter, Greendale track, can be secured for the occasion, the Worcester (Mass.) Motorcycle Club is to hold a big race meet either on May 30, Decoration Day, or on July 4, Independence Day. The proposition came up for discussion at the last meeting and was enthusiastically received. The members were heartily in favor of staging a big motorcycle meet, something that Worcester never has had, and efforts will be made to put on an all-star card if the meet takes place. It all hinges on securing the track, and a committee was appointed to see if this can be done. Three new members were taken in at the meeting. The club, which has been meeting temporarily at the store of George F. Clark, the local Indian agent, decided to rent the Rice cottage on the Shrewsbury side of Lake Quinsigamond for the summer. Possession will be taken April 1, and the hat was passed at the meeting to raise funds for furnishing the new quarters. The response was very liberal, and enough was realized to furnish five rooms handsomely. Members are looking forward impatiently to April 19, when the first of the club's series of four endurance runs is scheduled to take place.

Springfield Seeks Hour Championship.

If the efforts of the Springfield Motorcycle Club are successful, the national one hour F. A. M. championship race will be held at Springfield, Mass., on Decoration Day. The club has made application to the competition committee of the Federation for the hour championship, and figures that if it can land it the event will be a rousing good headliner for the proposed Springfield meet. The suggestion also is being made that both professional and amateur riders be allowed to ride in the hour championship, the precedent being that in the national championships for cyclists professionals and amateurs have competed against each other by special permission, after the professional and amateur championships had been decided, to determine whether the professional or the amateur champions were the better riders.

What an amateur photographer snapped at the Guttenberg (N. J.) race track.

CLEVELANDERS HAPPILY FIXED

Have a Live Club and Plenty of Motorcycle Establishments—Numerous Contests Are Scheduled.

In Cleveland, O., the motorcyclists and prospective motorcyclists are very fortunate both as regards dealers and as regards a club. The latter is the Cleveland Motorcycle Club, Inc., which has a commodious club house at 1769 East 79th street, where there is always "something doing." The club holds its regular meetings every two weeks, but the club rooms are open every day for members and visitors. The meetings are well attended, and plainly indicate the great interest that is being taken in motorcycling in the Forest City. There are more than 750 registered motorcyclists in the city, as compared with about 15 two years ago. The dealers expect to see at least 600 more machines sold in the city during the coming season. With this outlook, steps already are being taken to have the F. A. M. national meet of 1912 held in Cleveland.

Plenty of contests already are scheduled for Cleveland riders this year. These will include at least three reliability runs, a hill climb, an economy test, and two or three big race meets, together with the three day endurance run which is to be run by the club on May 28-29-30 and sanction for which has been obtained from the F. A. M. In the endurance run each dealer will have his own trade rider team, a team consisting of three riders of one make of machine. The Cleveland News has put up a large loving cup as a prize for the trade team having the best score. The run, which includes Columbus and Toledo, will be about 500 miles. The dealers in Cleveland intend to encourage sociable runs more than ever before, as these have done more than anything else to better the motorcycle business.

The Morse Motor Sales Co., distributor for Flying Merkel and for New Era motorcycles, has recently opened a service department, for the comfort of Cleveland motorcyclists. H. H. Sill,, an expert repair man, has been given charge of the department. He spent considerable time at the motorcycle factories to become thoroughly acquainted with the machines. "Louie" Mueller, one of Cleveland's veteran dealers, has received a carload of Indians, which are steadily diminishing from his stock, and he expects to receive another carload of the Springfield product in the near future.

The Lister Motorcycle Co., which formerly was known as the Lister Bicycle Co. and which is composed of five Lister brothers, is making a number of Harley-Davidson converts. William Lister is an enthusiastic booster for the Cleveland Motorcycle Club, and has brought in quite a few new members. P. J. Carleton, who represents the Emblem, has disposed of his first shipment of machines and has placed orders for more. The Auto Repair Co., under the management of H. D. Hanna, handles the Reliance and Greyhound motorcycles, and is looking forward to a big season.

The Casino Cycle & Repair Co., which has the Cleveland agency for Thor, Pierce and Excelsior, is more than content with this season's business thus far, and is enjoying the reputation of making good on deliveries. E. J. Knapp, who has the Wagner line, is finding that his offerings are more than holding their own. Vincent Brothers, who handle the Minneapolis, say that this will be their banner year with the Minnesota product. The Marvel dealers in Cleveland are the well known Jepson brothers, who formerly handled the Curtiss and who are declared to be "delivering the goods."

"Pipe-Dreaming" in Cincinnati.

Exaggeration seems to have been a fault of a correspondent in Cincinnati, O., who sent in a story about two Cincinnati motorcycle clubs and about a projected tandem club in that city. A. K. Sanders rises to remark that there is but one club in the city, viz., the Motorcycle Club of Cincinnati, and that it has not yet come out of winter quarters. He knows of no clubs that are giving Sunday runs from Government square. As for the "tandem club," he regards the proposal as a joke originated by the correspondent.

ROAST A SPEEDER AT BANQUET

Toronto Club Member is Censured—Big Crowd Answers the Club's Invitation to Dine.

When the crowds began to arrive for the first annual banquet of the Toronto Motorcycle Club, Toronto, Ont., on Monday evening, 20th inst., the officers found that their hope for a good attendance was consummated almost to an uncomfortable degree, as the attendance was nearly 100 and it took some lively work to provide for them all. In fact, the turnout for the first dinner of the club exceeded all expectations. Several officials of the Canadian Wheelmen's Association were present, and their remarks indicated that the utmost harmony is to prevail between the cyclists and the motorcyclists during the coming season.

One of the younger members of the motorcycle club received a roasting at the dinner, from A. V. Wiggins, the social chairman, for street racing. The rider had engaged in a little brush with a stranger on one of the residential thoroughfares. Succeeding speakers also gave the offender a few digs, as one of the chief aims of the organization is to exercise a curb on all practices that have a tendency to put motorcycling in disrepute. The members also were warned to keep their mufflers closed. Representatives of several newspapers were present, and promised to give the club as much boosting as possible.

SOUTH AMERICA FAVORS MOTORCYCLES FROM "THE STATES."

The picture is that of Juan J. Billiet, on a 1909 four cylinder Pierce. He sells the Pierce in Buenos Aires, in rivalry with European machines.

PARKWAY HANDICAPS CHANGED

New System Adopted for Long Island Motorcycle Race—Course Has Been Shortened to 17 Miles.

Abandoning the somewhat complicated system of handicapping first proposed, which inflicted penalties on each rider according to whether his average per mile in the race itself exceeded or fell short of his claimed best time for a mile in a test before the race, the Motorcycle Touring Club of New York, Inc., has adopted a new method of handicapping for its road race on the Long Island Motor Parkway, on Sunday, April 2, that promises to give better results. Under the new system of handicapping there are six classes of machines provided for as follows: Class A, 7 horsepower; Class B, 6 horsepower; Class C, 5 horsepower; Class D, 4 horsepower; Class E, 3½ horsepower; Class F, 3 horsepower; Class G, 2¾ horsepower.

In figuring the handicaps, the machines in each class are arbitrarily credited with being capable of attaining certain speeds, as follows: 7 horsepower, 65 miles per hour; 6 horsepower, 60 miles; 5 horsepower, 58 miles; 4 horsepower, 55 miles; 3½ horsepower, 48 miles; 3 horsepower, 45 miles; 2¾ horsepower, 40 miles. These speed ratings are not based on any actual trials of machines in each class, but are arbitrarily taken as an average of what the various machines have shown heretofore in all around work in the hands of riders. On the whole, the various speed ratings appear fair to the machines to which they apply.

The handicaps are as follows: 7 horsepower, scratch; 6 horsepower, 1:15 time allowance in starting; 5 horsepower, 1:50; 4 horsepower, 2:50; 3½ horsepower, 5:30; 3 horsepower, 6:55; 2¾ horsepower, 9:45. Theoretically these handicaps ought to produce a corking finish, for they provide for all classes finishing within four seconds of each other, and three classes running dead heats. According to their rated speeds and the handicaps allotted to them, machines in Classes B, E, F and G, which is to say the 6, the 3½, the 3 and the 2¾ horsepower machines, respectively, all should cover the 17 miles course in the same scratch time, viz., 15:45. Machines in Class C, 5 horsepower, are due at the finish in 15:45⅙, or one-sixth of a second later than the others. Class D, the 4 horsepower machines, are allowed only 15:42¾ from scratch time to cover the course, while Class A, the 7 horsepower machines, must go still faster, or finish in 15:41½. On this basis, both the "fours" and "sevens" get a little the worst of it on the handicapping, the former 2¼ seconds and the latter 3½ seconds, but as it is very unlikely that the actual times made will agree with these assumed speeds absolutely, the apparent trifling disadvantage will be neutralized if not entirely wiped out in the race itself.

Because of the deep sand encountered where the finished section of the Motor Parkway ends, it was found impracticable to adhere to the 25 mile course originally set, and therefore the distance has been cut to 17 miles, which is all one way; that is to say, there will be no repeating. The race will start from Great Neck on the Parkway at 10 a. m. Entry blanks are out, and state that the race is sanctioned and will be run under F. A. M. rules, but as yet no sanction has been applied for or granted, according to Chairman Thornley.

One of the chief features of the race, aside from the fact that it will be the first motorcycle road race to be held in the vicinity of New York in several years, is that it is claimed to be a strictly stock event, and that the only change from regular equipment that will be permitted will be the fitting of racing bars. Perhaps the chief objection to the event is the short distance, as the race will be over in 20 minutes at the most, and will not afford a satisfactory test of machines. Despite the effort to handicap all machines equitably, it is practically certain that one of the big machines will win the race, for on such a short course, requiring no slow downs, they will be able to go the route at full speed without overheating.

Prospective entrants who have been trying out the course this week report some phenomenal speeds. It is claimed that one "7" pushed the dial on a Warner autometer up to 70 miles and kept it there for several minutes. Another rider reported a clip of 63 miles, and 60 mile speeds are quite common, apparently. Verification of one speed merchant's claims for fast traveling were to be had in a small silk American flag which was whipped to ribbons after one day's practice on the Parkway. Incidentally, the riders who are training on the course are finding that the cement surface is pretty severe on tires, and in a long race it would be a factor to be reckoned with.

There will be three prizes awarded as follows: First, gold filled watch; second, silver watch; third, gold medal. The entry fee is $1, and entries are being received by H. F. Bidwell, 2142 Broadway, New York City. It is expected that there will be about 30 starters. The race is open only to amateurs.

Detroiters Projecting a Saucer.

Chances for some good motorcycle racing in Detroit, Mich., this summer are pretty bright. The Detroit Motorcycle Club is contemplating building a board track, and has sent a representative to New York to confer with Chairman Thornley of the competition committee regarding sanctions and protection on dates that may be scheduled.

BROOKLYNITES "AWFUL SWELL"

Form a New Organization Styled the Invincible Motorcycle Club—Its Fine Home.

Taking for its name the formidable title of The Invincible Motorcycle Club of Brooklyn (N. Y.), a new organization devoted to the encouragement of motorcycling was launched in the City of Churches on Tuesday night, 21st inst. It represents the culmination of a movement that has been in progress for some time, looking to the formation of a new club in "the bedroom of New York" that would be different from any motorcycle organization that has existed in that city. The club starts with 27 charter members, who are said to represent the very elite of the motorcyclists of that section.

The membership limit has been placed at 50, and members state that it will be a very easy matter to bring the membership up to the limit at any time it is desired to do so, but that it is the intention of the club to maintain a high standard, and to inquire closely into the character and antecedents of every applicant. It is desired to keep the club exclusive, without snobbishness in any degree, but to admit to membership only the better class of riders. In short, the "rough necks" have no chance. It was decided to incorporate, and also to become an F. A. M. affiliated club, it being provided in the constitution that every one of the members shall belong to the F. A. M.

The initiation fee is $5, and the dues are $20 a year. In securing suitable quarters the new organization is particularly fortunate, having made arrangements to meet at the Invincible Club, 78 Herkimer street. The latter organization, from which the motorcycle body takes its name in part, is a prominent social and political club and possesses a $30,000 club house, including library, restaurant, bowling alleys, gymnasium, pool tables and storage room. All of these privileges are open to the motorcyclists, who, however, are not a branch of the Invincible Club, but an entirely separate organization. It is the intention of the new club to make a name for itself during the coming year for promoting sporting and social events.

The officers and committees are as follows: O. P. Warlich, president; H. E. Stout, vice-president; J. U. Constant, secretary; A. B. Pollock, treasurer; A. J. Rochow, captain. Executive board: Walter Goerke, H. J. Mann, M. M. Aiken, F. H. Chase. Competition committee: A. J. Rochow, Walter Goerke, A. B. Pollock, George Hochspring, J. U. Constant. House committee: H. E. Stout, H. J. Mann, M. M. Aiken, Frank Hochspring, J. C. Fawcett.

F. A. M. ENDS N. C. A. ALLIANCE

Complete Break Results from Former's Desire to Control Motor-Pacing for Bicycles—The Correspondence.

Formal breaking or cancelation of the affiliation existing between the Federation of American Motorcyclists and the National Cycling Association has been announced by the F. A. M.. The latter has ended the affiliation because the National Cycling Association will not let the Federation assume control of the pace-makers in motor-paced bicycle races. The cycling body claims that although by special agreement with the Federation the N. C. A. yielded control of motorcycle racing to the F. A. M., in 1906, there is no reason why it should also give the F. A. M. control over the pace-makers for bicycle racers.

The difficulty between the two associations started last summer in Salt Lake City, when there was a squabble over riders who were riding motorcycle races on some occasions and at other times were acting as pace-makers for the cyclists. The chairman of the F. A. M. competition committee conceived the idea that, contrary to all previous custom, the F. A. M. should have the control of the pacing men in the cycle races. The F. A. M. pushed the point, and the N. C. A. refused to yield.

Among its reasons for refusing to give the F. A. M. control of the pace-makers, it was pointed out by the N. C. A. that motor-paced bicycle racing commenced in 1898, under the League of American Wheelmen, and that in 1900 the National Cycling Association succeeded the L. A. W. as to all kinds of cycle racing, including motor-paced racing. The Federation of American Motorcyclists was not formed until 1903, and it was not until 1906, by permission of the National Cycling Association, that it took control of motorcycle racing. Furthermore, the N. C. A. maintains that it is not the pace-makers who are in competition in motor-paced bicycle racing, but the cyclists themselves, and that the pace-makers are simply track employes who are provided to serve the cyclists and who are under the direction of the latter. The N. C. A. does not assume to assert authority over bicycle pace-makers for Marathon runners, and the American Automobile Association, which controls automobile racing, waives all authority over automobile pacing for cyclists, so that with these parallel examples, the N. C. A. believes that the F. A. M. has no right to mingle in bicycle racing by trying to assume control of the pace makers.

When the strained relations first developed last year, the president of the N. C. A. wrote to the Federation with a view to having the F. A. M. recede from its position. At the national meet of the Federation in Philadelphia, the board of directors was instructed to straighten out the matter with the N. C. A. It was not until February of this year that the board acted, and under date of February 17, 1911, F. I. Willis, president of the F. A. M., wrote to Daniel M. Adee, president of the N. C. A., as follows:

Dear Sir:—

The board of directors of the Federation of American Motorcyclists desire to submit herewith the enclosed articles of alliance and solicit your recommendations in the adoption of the same:

"The board of directors of the Federation of American Motorcyclists assembled to consider the alliance between our two associations, and deem it desirable to obtain a more definite article than heretofore existing, and further that it is the sense of our directors that we desire an alliance that will be mutually satisfactory with your organization. We therefore submit the following:

"In a motorcycle paced bicycle event the N. C. A. is to have absolute control over its own bicycle riders, but the motorcycle rider and machine to be under the rules of the F. A. M., regarding the cubic capacity of machine and qualifications of rider; and the motorcycle rider to be a member of the F. A. M.

"A motorcycle rider taking part in N. C. A. sanctioned paced events does not require a sanction from the F. A. M.

"Each organization shall have absolute control over its own class of riders and machines whenever they appear in a public exhibition or race.

"The F. A. M. is to recognize all suspensions inflicted by the N. C. A. on bicycle riders while riding a bicycle, and the N. C. A. is to recognize all suspensions inflicted on motorcycle riders by the F. A. M. while riding a motorcycle.

"It is understood that this alliance does not permit the F. A. M. to run bicycle contests of exhibitions without N. C. A. sanctions or the N. C. A. to run motorcycle contests or exhibitions without F. A. M. sanctions."

Respectfully submitted for the board of directors.

After a period of consideration, resulting in a unanimous opinion by the N. C. A. board of control, President Adee, of the N. C. A., replied to President Willis, of the F. A. M., on March 17, as follows:

Dear Sir:—

Both of your favors of February 17 and March 10, relative to and submitting propositions for amendments to the existing alliance between the F. A. M. and the N. C. A. are at hand, and the contents of same have been submitted to the board of control of the N. C. A. for its consideration.

It is the unanimous opinion of the board of control that the existing agreement, as formulated by the F. A. M. and N. C. A. several years ago, is in accord with our other alliances, and the N. C. A. can see no reason for changing the conditions.

It would be impossible for us to consider any proposal to take the control of pacemakers in motor-paced bicycle races out of the hands of the N. C. A. Bicycle races, and all that pertaining thereto in the matter of pacing, whether the pacing is done by man or any type machine, comes distinctively within N. C. A. scope and jurisdiction. This principle is embodied in the constitution of the Union Cycliste Internationale, of which the National Cycling Association is a charter member, and is consequently one of the fundamentals of our international alliance.

We thank your board of directors and yourself for your courtesies in the past, and trust that our reasons for not being able to comply with your proposals will appear reasonable to you; and that your honorable body will see fit to continue the existing alliance as outlined in the original agreement.

The ending of the alliance between the two associations was embodied in the reply by President Willis, on March 18, as follows:

Dear Sir:—

I am in receipt of your favor of March 17th and note that your board of control cannot accept the alliance as submitted to you by our board of directors.

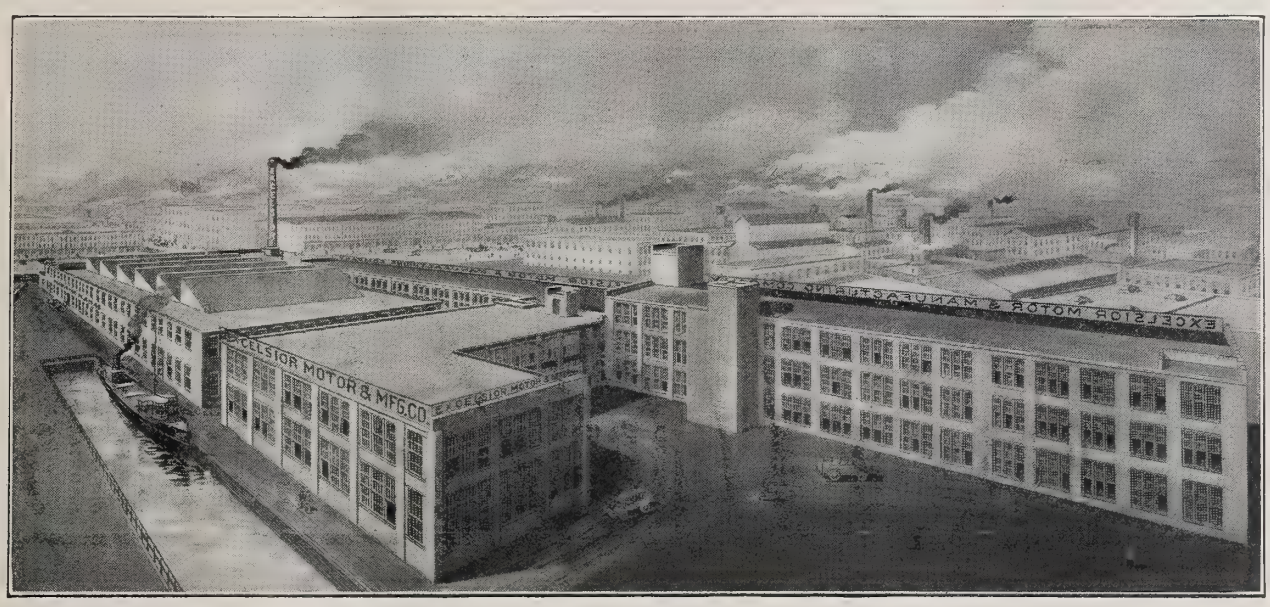
It is with regret that I therefore advise you that the alliance existing between the Federation of American Motorcyclists and the National Cycling Association is now at an end.

I assure you that we regret this course very much indeed, but inasmuch as our association has adopted rules whereby the safety of the motorcycle is guarded, I do not feel that this association would be justifiable in having an alliance with your association whereby you have no restriction whatsoever on the motorcycle that is being used in motorcycle paced races.

Moran and DeMara Riding Fast.

Walter DeMara, the American sprint cyclist, is riding well in Paris, according to mail advices from James Moran, and has "come back" to a degree that is a pleasant surprise to his friends abroad. DeMara gave Friol quite a tussle on March 5 in a big open race in Paris, and finished second to the world's champion. On Sunday, 12th inst., in a kilometer tandem-paced race at the Velodrome d'Hiver, Paris, France, Brocco won in the record time of 59:43⅗, with Berthet second and DeMara third. Moran triumphed in the three cornered motor-paced race, 40 kilometers, for the Albert Champion prize, which was a feature of the same program. He made the 28.4 miles in 34:00⅖, defeating Seres and Didier.

Sharpe Heads St. Louis Cyclists.



The annual election of officers of the St. Louis (Mo.) Cycling Club resulted as follows: H. S. Sharpe, president; C. B. Jansky, vice-president; O. F. Hassemer, secretary; Charles L. Barr, treasurer; C. Lindenschmidt, captain. The club has nearly 100 members on its roster and during the coming season will devote its efforts chiefly to the promotion of week-end tours and runs.

Keefe's 100 Mile Record Accepted.

Fred T. Keefe's unpaced 100 miles on a bicycle, in 5:02:00, which the Australian ground out at Los Angeles, Cal., on January 11, 1911, has been accepted by the National Cycling Association as the American professional road record for the distance. His claims for the intermediate records of 25 miles, 50 miles and 75 miles still await certification before being allowed.

The Factory Behind the Product

A strong plant is never grown in barren soil and the quality of any product is dependent upon the facilities for its manufacture.

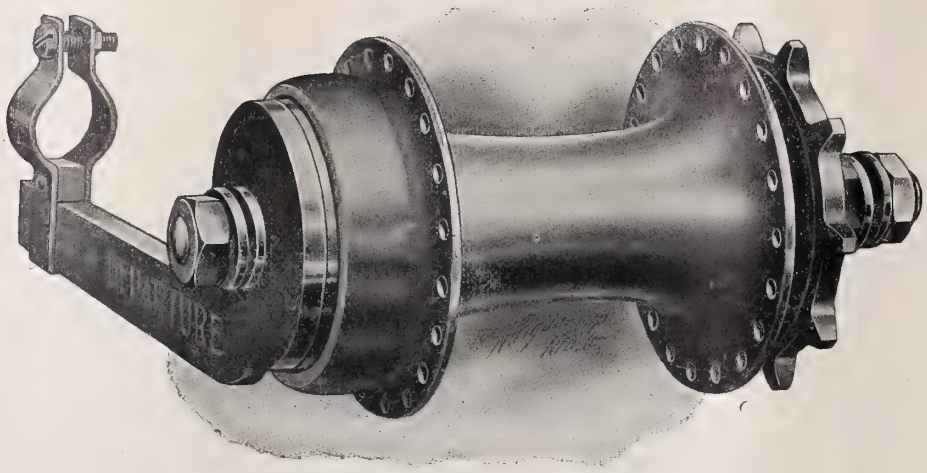
The factory producing the

EXCELSIOR AUTO-CYCLE

is beyond question the most thoroughly equipped and complete motorcycle factory in the world.

With the buildings just finished, the total floor space is slightly over 190,000 square feet and the machinery and equipment is the best obtainable.

A comparison of these facilities with those of factories with a limited product or building only a part of the machine will clearly indicate one of the reasons for



EXCELSIOR SUPERIORITY

Three models for 1911—two Singles and a Twin. All described in Catalog C-11. Write for it today.

San Francisco Branch—361-363 Golden Gate Ave.
Eastern Representative—STANLEY T. KELLOGG, 169 Beechwood Ave., Bridgeport, Conn.

This is the motorcycle coaster brake that

"Gives absolutely perfect satisfaction"

The merit of the New Departure internal expanding band coaster brake for motorcycles is recognized by every manufacturer, dealer and rider who has investigated it. The number of letters received strongly commending it is nothing short of remarkable. Here is one received from The F. B. Widmayer Company, of New York City. Everybody who is interested in making, selling or riding a motorcycle should read it.

NEW DEPARTURE MFG. CO.,
Bristol, Conn.

Gentlemen:—It gives me pleasure to say that I have used one of your internal expanding band coaster brakes on one of my heaviest tri-cars for twelve months and it has given absolutely perfect satisfaction. There is not the slightest evidence of dragging or binding, and if there has been any wear, I have not been able to find it. There has been no trace of slipping and the brake has been very positive in its action.

I have been much annoyed by the action of other brakes. Taking all in all, your brake is the most satisfactory I have ever used. I also wish to say that it is very free running, as anyone can see by examining the construction.

Very sincerely,

THE F. B. WIDMAYER CO.,
Per Frank B .Widmayer.

Coaster Brake Licensors.

NEWARK'S NEW BOARD SPEED SAUCER IN PROCESS OF ERECTION AND NOW NEARING COMPLETION.

When news was cabled over that the world's cycle championships for 1912 are to be held in America, the plans for the new Velodrome at Newark, N. J., were changed to make it a six lap instead of an eight lap track. The track will open April 9.

Fisher Leads Empire "Cork Pullers."

Brooklyn (N. Y.) cyclists who desire to participate in "cork" races will not have to cross the bridge to Manhattan to satisfy their whim, for the Empire City Wheelmen, of the former borough, instituted a season series of these events on last Sunday, and 45 riders turned out for the occasion. Franklin Fisher "corked" in first in the ten mile dash for the prize, closely pressed by Henry Murphy, an outsider. Then came Carl Ericson, of the Empires. The races will take place each Sunday throughout the season, weather permitting, and prizes will be awarded at the end of the year to the three riders scoring the highest total number of points. Points are awarded to the first three men in each race. It was Empire City riders who originated "cork pulling" races.

Reviving Road Races at Salt Lake.

Bicycle road races are to be revived vigorously in Salt Lake City, Utah, this year. No events of this kind were given last year, but E. B. Heagren announces that he has closed arrangements with the Lagoon resort people whereby he will conduct a bicycle race from Salt Lake to Farmington on Decoration Day, May 30. Ernest Pye, manager of the Salt Palace cycle track, also has a road race in preparation. He says that it will be to Murray, over the new State street road.

Berry Reappointed as N. C. A. Member.

C. L. Berry has been appointed member of the board of control of the National Cycling Association for the Rocky Mountain district, which includes Salt Lake City and everything west of Denver. Berry has served in this capacity in the past, his selection to the office being a reappointment.

Bardgett and Williams in Training.

Walter Bardgett and Saxon Williams have started training at Buffalo in preparation for the cycle racing season at Newark and on the Eastern circuit. "Hard work," says Walter, "but we simply had to do it."

Price $55

The New England Racer

A WINNER

Fast Strong
Light Snappy

The Only Bicycle in the World Built for Sprint RACING on Small Board Tracks.

Three Reasons Why

First. It brings the rear wheel four inches closer to the hanger, bringing more weight on the rear wheel, and relieves the strain from the front wheel and forks. This will be appreciated by all track riders, as it is a well established fact that in order to acquire any great amount of speed on tracks with sharp turns, it is essential to have all possible weight of the rider on the rear wheel.

Second. The **New England Racer** uses from 14 to 19 inches less chain than the average racing models. This is a big factor in racing, as a long chain is bound to swerve, and if not kept tight will jump the sprockets or catch on the top of a tooth and break. This is a frequent occurrence on board tracks. On the **New England Racer** the chain can be adjusted as loose as the rider desires without the least danger of jumping the sprocket or breaking.

Third. The rear stays being much shorter, are stronger, and will prevent the sprockets from pulling out of alignment with each other under great strain.

J.W. GRADY & CO. WORCESTER, MASS.

BICYCLE EVOLUTION EXEMPLIFIED.

At an exposition in Chemnitz, Germany, one of the feature exhibits was that showing representative or typical machines of various periods in bicycle evolution.

Irish-Americans Trim New Yorkers.

Brand new riding suits and reputations as past masters at flat floor riding did not save the New York Athletic Club's team from a good trouncing at the hands of the Irish-American A. C. team at the 23d Regiment games in Brooklyn, N. Y., on Saturday night, 18th inst. In a five mile Australian pursuit, the Irish-American team, consisting of Chris Mohrman, Edward Goodwin and Franklin Fisher, rubbed it into the Mercury-footers good and plenty. The New York's warriors were William Vanden Dries, H. R. Brown and Walter Raleigh, all riders of championship caliber and holders of several flat floor championships. Before the race it was the general opinion that the New Yorks would have a walkover, but when the men went into action the crowd got a surprise. The riding of the New Yorks was very pretty and even, while their rivals kept up a series of spasmodic dashes. Mohrman was the chief factor in bringing victory to his team, for he cut loose repeatedly with terrific sprints that not only shook off his rivals but his own team mates as well. This method of boring in eventually brought results and the wearers of the N. Y. A. C. emblem were passed at three miles and one lap.

Where Cycle Club Captains are Bred.

Considerable pride is being taken by the New York state division of the Century Road Club of America in the fact that its members seem to be of the sort that make good club captains, as attested by information brought out at a recent meeting that six of the members are captains of other clubs. They are as follows: Joseph G. Kopsky, captain, New England Wheelmen; John DeBruyn, Acme Wheelmen; R. G. Westervelt, Morris Park Cycle Club; Charles Akuntious, Iver Johnson Wheelmen; Charles Krudrle, Praha Bicycle Club; Adrian Bastide, Brooklyn division, C. R. C. of A. It is the belief of the New York division that no other cycling organization can equal this showing.

Empire Handicap Coming Along Well.

Basing its prediction on the rate at which entries for the 15 miles handicap at Floral Park, L. I., on May 7 are coming in, the Empire City Wheelmen, of Brooklyn, vaticinate that fully 100 riders will take the gun on the day of the race. In its quest for prizes the club is meeting with a gratifying response from the trade, and promises that the quantity and quality of the prizes offered will be a surprise to many.

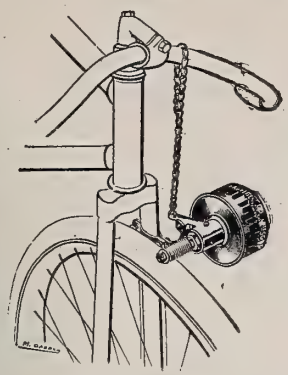
New Englanders Hold a "Cork" Race.

J. B. Hawkins was first over in the New England Wheelmen's regular weekly cork race on Pelham Parkway on Sunday, 19th inst. Joseph Kopsky bested George Polacsy for first among the club amateurs. As an indication of the popularity which these runs are attaining among riders, 32 men turned out last Sunday as against half that number in the preceding chase for the gilded guard to liquid pleasure.

"Little Rhody" Riders on Rollers.

The Little Rhody Cycle Club, 7 Greenwich street, Providence, R. I., is going to have some home trainer races soon. At the last meeting it was voted to purchase a set of rollers by subscription and a committee was appointed to solicit subscriptions from the local dealers. The latter are responding liberally and the necessary fund already is in sight.

Kelly=Racine Tires



For Motorcycles and Bicycles

are now being made in our new factory, which commences as the only tire factory in the world completely equipped at the outset with the most modern and advanced tire making facilities known to the art.

We shall produce 1,500 motorcycle tires and 3,000 bicycle tires per day, together with 1,200 inner tubes, a full line of tire sundries and a line of automobile, motor truck and carriage tires. Each tire, too, will have years of "know how" in it. Get acquainted with us promptly, as our earliest customers will have reason to rejoice.

No Mistake in Getting

DIAMOND CHAINS

Picking out the best chain, like many other cycle parts, comes right down to keeping out of repair troubles. This alone is sufficient reason for insisting upon Diamond Chains.

The Diamond Riveted Chains of today are eminently superior as when they were the pioneers. In the last few years our product has been greatly improved in density of the metal and hardness of the bearing surfaces, in tensile strength and in other ways that have increased life and tended to promote smooth running.

AURORA AUTOMATIC MACHINERY CO., Chicago, Ill.

Here is a quartet of

KOKOMO Bicycle Tires

that fully meet the spring situation.

Kokomo Defender Special

This popular guaranteed tire is specially designed and constructed for road use. It is made from the best materials obtainable, being carefully built up by hand with pure para inner tube, and, owing to the very high quality of the inner tube used, a puncture is very easily repaired.

Kokomo "New Oxford"

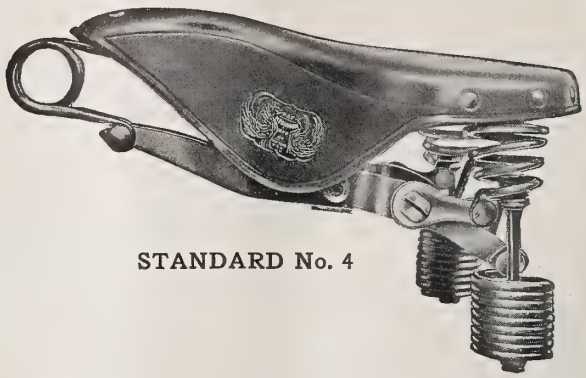
A medium price tire, yet so good in quality that it does not do it justice to call it a medium grade tire. We have built these tires so that in case of puncture they will not be worthless but can be repaired. Also furnished in smooth tread.

Kokomo Dotted Tread

A tire that prevents skidding and is safe and reliable on wet, slippery roads and city streets. Of high quality and careful construction. Furnished in road weight or in thick tread.

Kokomo Guaranteed Red Thorn

Made of red rubber, is extra heavy and is built especially for long service.



Are you profiting by what we offer you in Kokomo Tires?

KOKOMO RUBBER CO., Kokomo, Ind., U.S.A.

1801-1807 First Ave. New York City

The Patent Fibre Friction Shock Absorber, saving the rider and machine from disagreeable jolts.

Why

ARE

Diamond MOTORCYCLE TIRES

The Best?

THE DIAMOND RUBBER CO., Akron, Ohio

Distributing Establishments and Service Stations in 54 Principal Cities in All Sections.

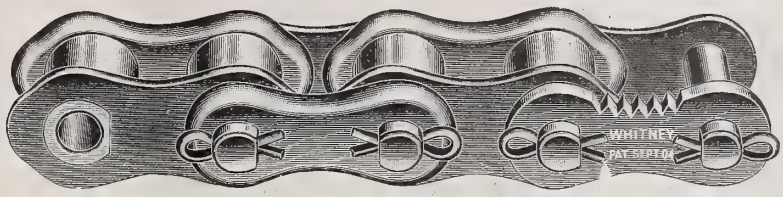
NOTE—Next week we will tell you how Diamond Motorcycle Inner Tubes are made.

BECAUSE—

We build up Diamond motorcycle tires with full weight, Sea Island Automobile Tire Fabric—The Best Foundation.

The specially toughened tread resists abrasion and road wear to the greatest degree—and is unusually resilient—The Best Protection for Our Foundation.

The necessary bond between the Foundation and its Protecting Tread is formed of extra tenacious Para friction—the finest put into a tire.



When built up and finished by exclusive Diamond methods the completed casing is a triumph of the tire builder's art.

Benefits?—The motorcycle owner gets from Diamond tires greatest mileage—staunch endurance!

Can you afford any motorcycle tires but Diamond motorcycle tires?

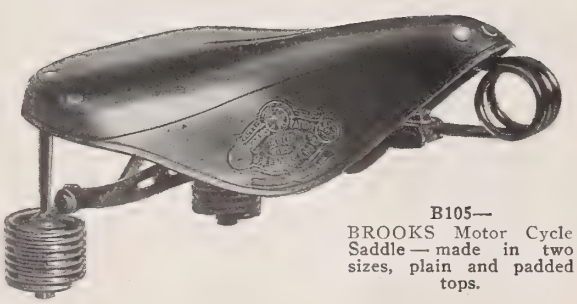
BROOKS Motor Cycle Saddle—specially constructed to give a low riding position.

When

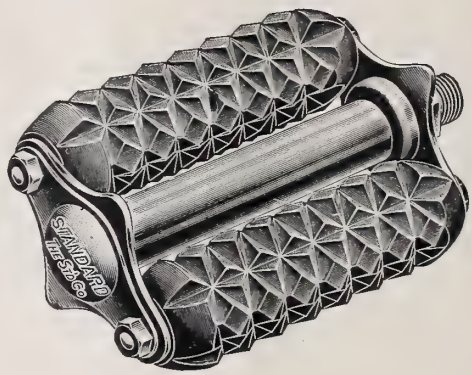
you sell a Motor Cycle there are many things will help you—none more than the



BROOKS SADDLE

for this, of all similar fitments, is the one saddle that will most strongly appeal to the buyer, and enhance his confidence in the machine which you are offering.

Why? Because the name of BROOKS is known throughout the world, and the saddle that bears it unapproached for its comfort-giving qualities.



Remember that this is the original and only genuine compound-spring Saddle—the only saddle embodying in its construction the springs that entirely absorb vibration within themselves and, by their compensating action, totally eradicate all tendency to bounce—the only saddle that will yield real comfort and true luxury awheel.

Story of a Pope Dealer's Success Selling Ramblers with Pope Spring Forks

The row of **Rambler Bicycles** shown in the above cut represents some of the recent sales made by a progressive dealer who believes in selling a popular line of high-grade Pope wheels and finds the **Pope Spring Fork** a great advantage in making sales. All but one of the wheels in the photograph have spring forks. Within a year, this same dealer has sold about a hundred **Rambler Bicycles** so equipped and has arranged for many more. Other **Rambler Dealers** are enjoying the same sort of success selling the Rambler line.

Why not profit by their example? The **Rambler** is a most popular high-grade wheel, with many distinctive and exclusive features. The **Pope Spring Fork,** which may be had only on **Rambler** or other **Pope Nameplate Bicycles,** is the most successful one on the market and offers another strong inducement to stimulate sales. Write today for particulars.

Pennsylvania
BICYCLE TIRES

For 1911

in various grades embody all of the features necessary for a complete line. Under a new arrangement of qualities we offer to the jobber an assortment of values which cannot be equaled elsewhere.

PENNSYLVANIA RUBBER CO., Jeannette, Pa.

World's Greatest Quintette of Motorcycle Tires

—Greatest because built by the world's greatest tire experts who have perfected in Goodyear Motorcycle Tires a tire for every road condition—a tire that is more efficient—more economical than any other motorcycle tire manufactured.

—A Huge Claim but backed by facts—proved before leaving the factory, by severest comparative tests ever devised by mortal man—proved afterwards by bursts of speeds and runs of endurance that have relegated all other motorcycle tires to a back seat.

Goodyear Motorcycle Tires are an evolution. They evolved from the brains, the practical knowledge of the most experienced and successful motorcyclists in the world combined with the skilful workmanship and experience of expert automobile tire builders. And they are built on the only true principle.

GOODYEAR Motorcycle Tires

Nothing but the finest grade NEW Para rubber properly compounded, and fabric, the toughest in existence, is used in their construction. And they are made larger and with thicker treads than any other tires for same size rims. With better cushioning effect, better rubber and thicker treads, they are the easiest running, most durable and most economical tires you can buy. They are bound to the rim by beads moulded, shaped and cured on exact duplicates of your own rims. They can't help fitting. They cling to the rim in a grip that never gives nor lets go.

Use One of These Great Motorcycle Tires

Goodyear Corrugated Tread Tires—for the average give-and-take road.

Goodyear Studded Tread Tires—for mud, sand, snow and ice travel. Great for endurance runs—mud can't gather on tread.

Goodyear Non-Skid Tires—for city use when pavements are often slippery and dangerous.

Goodyear Blue Streak Racing Tires—(See page opposite).

Read on next page how Goodyear Tires have outclassed and outdistanced all others in Exacting Tests of Speed and Endurance.

83 Miles, 135 Yards Covered in 60 Minutes on

GOODYEAR
BLUE STREAK
Racing Tires

At the end of 60 minutes, DeRosier on Blue Streak Tires covered 83 miles, 135 yards as against his own record of 79 7-8 miles, which he made on the same make machine on the same track, but on other tires.

Thus, in the most marvelous burst of speed and the severest test of endurance ever witnessed on a racing track DeRosier added yet another convincing proof to the unquestionable superiority of the Goodyear products—

—A proof of strength, endurance, resiliency, DEPENDABILITY never equaled or approached by any other motorcycle tire on earth.

—And a typical demonstration of the Superior tire value characterizing and making popular the entire line of Goodyear Motorcycle tires.

Two different treads for Blue Streak Tires—one for dirt tracks, another for board or cement. Both types made by our own exclusive methods of laying threads parallel which enables us to secure the maximum of resiliency and strength.

Blue Streak Tires bring home the trophies. Write for our booklet.

DEALERS HOLD SOCIAL SESSION

New Yorkers Brave the Rain to Attend Association's Friendship Promoting Affair—Its Results.

Heavy rain militated against the success of the "sociability session" of the Cycle and Accessories Dealers' Association of Greater New York, which took place at Turn Hall, Manhattan, on the evening of Wednesday, 29th ult., but the soundness of the idea in promoting it was well proved and the results accomplished are thought to have been of considerable effect. Although the crowd was not as large as that for which preparations had been made, the attendance nevertheless was quite satisfactory, as many motorcycle and bicycle dealers from distant parts of Greater New York, in company with ladies, braved the storm and recorded themselves as present.

The purely social character of the affair had the effect of making it neutral ground for the dealers that were present, and in consequence they were able to get more intimately acquainted in a few brief hours than would be possible by months of intermittent contact in business. According to one of the officers of the association, the "social session" worked out quite in the way it was planned to do, to an extent limited only by the limitations on the attendance, due to the storm. Another "session" of the same sort will be given by the association when the necessary steps have been taken to assure a large attendance irrespective of weather conditions.

Crosby Opens a Detroit Office.

In order to take better care of its growing trade in the district of which Detroit, Mich., is the center, the Crosby Co., of Buffalo, N. Y., one of the leading firms in the trade so far as concerns sheet metal stamping, has opened a sales office at 717 Ford building, Detroit. The office is in charge of Fred W. Coxe.

Newark Branch for Haverford Cycle.

The Haverford Cycle Co., of Philadelphia, Pa., jobbers of bicycles, motorcycles and accessories, has opened a branch at Newark, N. J., in order to take care of the dealers in the Newark district. The branch is located at 945 Broad street and will carry a full line of bicycles and accessories for the wholesale trade. This makes the company's fourth branch in addition to the main headquarters at 827-9 Arch street, Philadelphia. The other branches are at 411 Market street, Philadelphia; 427 Tenth street, N. W., Washington, D. C., and 763 Main street, Buffalo, N. Y.

New F-N Manager in Providence.

James H. Shippee has been appointed manager of the American F-N Co.'s branch in Providence, R. I., which has been with locked doors for some time, but which is to be reopened. The branch is located at 49 Union street, and Shippee says he intends to make it a headquarters for motorcyclists irrespective of what make of machine they ride.

Open a Howell Branch in Marion.

A. B. & B. M. Howell, of Columbus, O., the central Ohio agents for the New Era autocycle, have opened a branch in Marion, O. At the Marion branch they will handle the Harley-Davidson motorcycle in addition to the New Era.

Sixsmith Adds the Indian Line.

T. J. Sixsmith, 203 W. 100th street, New York City, who handles the Excelsior and R-S motorcycles, has taken on the Indian. His territory embraces the upper west side.

CHICAGOANS REVIVE "AMERICA"

Acquire Patent and Trade Mark Rights for Truss-Frame Bicycle—Will be Nameplate Machine.

Chicago, Ill., has a new bicycle manufacturing enterprise, known as the America Cycle Mfg. Co., which is the same name as that of one of the early makers of bicycles. Like the old company, the new concern also will produce the "America" truss-frame bicycle, a machine which at one time enjoyed a high reputation both in the United States and abroad.

The Chicago company has made arrangements with the owners of the America truss-frame patents and will market the product under the "America" nameplate exclusively. It has purchased the exclusive right to the "America" nameplate and trade mark, as well as to the trade mark of the "truss-frame." For this year the company has contracted with the Great Western Mfg. Co., of LaPorte, Ind., for the manufacture of its bicycles, pending the building and equipment of a factory of its own. A campaign to familiarize the public with the name and merits of the "America" truss-frame will be made this year, and in 1912 the company will be prepared to present its proposition to the dealers throughout the country on a broad scale.

Heil Locates Paterson Store.

Norman E. Heil, of Paterson, N. J., who has secured the agency for the Marvel, M-M and Merkel motorcycles, has taken a location at the prominent corner of Van Houten and Washington streets for his motorcycle and bicycle store. He formerly was located in Trenton, N. J.

WHERE WHITNEY MOTORCYCLE AND BICYCLE CHAINS ARE MADE.

After a protracted period of building and adding to its factory, the Whitney Mfg. Co., of Hartford, Conn., is completely settled in its enlarged plant, which is shown in the accompanying illustration, and which is devoted chiefly to Whitney chains for bicycles, motorcycles and motor vehicles. The single story building in the background and the five story addition to the main factory were completed during the year 1910. The five story addition gives an additional floor space of 24,000 square feet. The main factory and the connecting building on the right are of reinforced concrete construction, making the plant fireproof. The location is on the main line of the railroad from New York to Boston, and the company has its own side track. There are 11 acres on the property, which gives an opportunity for large extensions in the future should they be necessary. The Whitney plant is adjacent to the Hartford Rubber Works Co.'s plant and the West Works of the Pope Mfg. Co.

Will Sell the Yale in Columbus.

L. P. Birkenbach has opened a motorcycle store and garage in Columbus, O., at 70 North Fourth street. He is agent for the Yale. Birkenbach, who is one of the youngest motorcycle dealers in Ohio, has been operating a store in Lancaster, O., and is turning that establishment over to his brother, Matthew Birkenbach.

U. S. Tire Gives Mileage Figures.

Big mileage figures are recorded by the United States Tire Co. in connection with G & J motorcycle tires used by the Thor motorcycle agency in Brooklyn, N. Y. According to the record, four Thor motorcycles, used for renting purposes and equipped with G & J tires, have shown an aggregate of over 53,000 miles for the tires, and the latter are still in excellent condition. One set covered 18,00 miles, another 15,000 and the remaining two sets over 10,000 miles each.

Fostoria Has a Marvel Agent.

K. L. Shirley, of Fostoria, O., has taken the Marvel agency. He has the whole of Seneca county.

Penn Cycle Makes Itself Known.

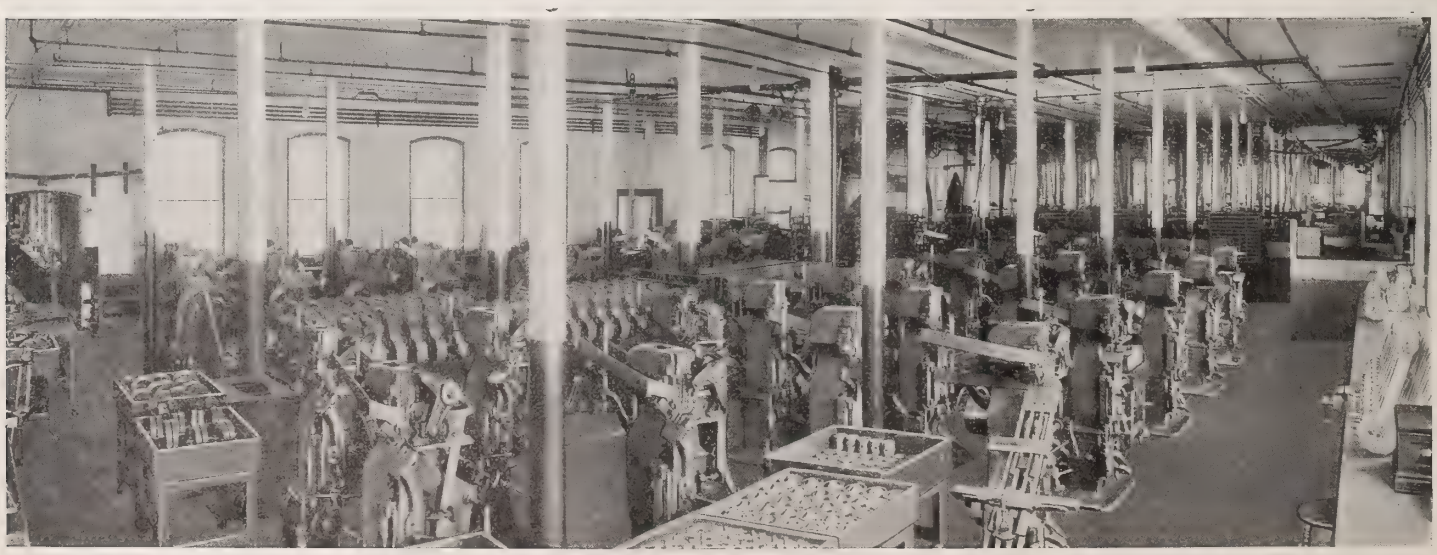
As a herald for the opening of the Penn Cycle & Motor Co., at 20 South Fourth street, Reading, Pa., the company has issued a four page house organ of its own, styled "The Penn Wheeler." It is described as a publication "devoted to the interests of those who go awheeling and who want to ride fast and far, comfortably and safely." It is given over to pictures and descriptive matter relating to the R-S and Thor motorcycles and Reading Standard bicycles, all of which are included in the company's lines.

Oklahoma Carriers Buying Mounts.

Five rural mail carriers have been added to the ranks of the motorcycle users by the Oklahoma Motor and Cycle Co., of Oklahoma City, Okla., which concern has supplied the carriers with Harley-Davidson machine. One of the machines went to Enid, another to Guthrie and three to carriers in Oklahoma City itself.

Shattuck Now Boasts a Branch.

The West Side Motorcycle Exchange, of Detroit, Mich., which handles Emblem, Marvel and Haverford motorcycles, and of which R. Shattuck is the proprietor, has opened a branch store in addition to the main establishment at 380 Dix avenue. The branch is at 862 Grand River avenue.



Cycle Dealer Goes to Waco.

Lawrence Hall is to open a store in Waco, Tex., on May 1, doing a general bicycle and electroplating business. It will be known as the Hall Cycle & Plating Co., Inc.

Neff Closes for Five Leaders.

Harry L. Neff, of Pittsburg, Pa., has closed contracts to handle the Indian, Yale, Thor, Marvel and Merkel motorcycles for 1911. He is located at 113 Federal street.

A GLIMPSE INTO A REPRESENTATIVE MOTORCYCLE MANUFACTORY.

The view shows an interior portion of the plant of the Wagner Motorcycle Co., St. Paul, Minn.

MACHINES TO MATCH CUSTOMERS

Radical Policy Practiced by a Motorcycle Dealer—An Experience With a Misfit Twin.

Fitting a motorcycle to the man who wants to buy one, just like fitting him with a suit of clothes, a hat or any other staple article, is a policy utterly at variance with the selling methods of most motorcycle dealers. It is the aim of the average dealer to sell the highest priced machine he handles, if possible, as naturally his profit on the sale will be greater than it would on a lower priced machine. This is one way most dealers regard the selling of motorcycles, and at first glance they would seem to be in the right, for motorcycle dealers, in common with other merchants, generally are supposed to be in business not for love, but for profit. However, the methods of some dealers show that there is another angle to motorcycle selling that deserves consideration.

That a motorcycle dealer should endeavor to discourage a prospect from buying a high priced machine on which the profit would be greater, and try to persuade his customer to take a lower priced machine, on the ground that it was better suited to the physical build of the rider, would seem a suicidal business policy in the eyes of the average motorcycle dealer, but some dealers think otherwise. Not a few of the novices who have begun their motorcycle education on high powered machines would not now be "sore" on the dealer who sold them their first machine, if he had looked beyond the profit that the sale held for him and realized that a satisfied rider was worth considerably more to him in the long run than the difference between his commission on a high and a low powered machine.

An instance of this sort, as related by a well known dealer, is particularly illuminative in showing how he studies his prospects and endeavors to sell them machines that are best suited to them, regardless of the profit he makes on the sale. He says that this policy is not founded purely on philanthropic motives, but that when he sells a man a motorcycle he wants him satisfied in every way. because he wants to sell that man another machine some day, and he finds that the rider who is satisfied at the beginning, and kept so, invariably comes back when he wants another machine.

"A young fellow with plenty of money came into my store one day last year and said he wanted to buy a motorcycle," says this dealer, in relating an instance in point. "After I had shown him the various models he indicated a preference for a 5 horsepower twin. However, he was a fellow of slight build, who had never had any previous experience with motorcycles, and I knew that a 'five' would be too much for him. He would have trouble starting it, and it required more attention than a single, so I endeavored to persuade him to take a 'four' single.

"I knew that he could handle a 'four' all right, and would have no trouble with it, and although I tried hard to get him to take it, he did not want one. There was more in it for me to sell him a 'five' than there would be in a 'four,' but I knew that a 'four' was better for him to start with. However, he was a headstrong fellow and insisted that he knew what he wanted and that if I would not sell him a 'five' I would not sell him anything.

"When he put up that argument, I gave in right away and said, 'All right; if you want a "five" I will sell it to you. But remember this: You will have more trouble with it and you will not like it as well because you are better fitted to handle a "four" and will get more pleasure and less trouble out of it. Now, I've warned you, and tried to help you avoid trouble, but if you won't listen to me, why, go ahead. It is up to you, and you can't say that I did not tell you about it before you bought.'

"He insisted that I have the machine ready to take away that night, and he would not let me show him how to run it or anything else. He said he would learn that himself at home. That night he came around with another fellow and together they wheeled that machine to the home of the fellow who bought it. I knew that I would soon hear from him, and I did.

"A day or so after he took the machine away I got a telephone call to go out about ten miles and help him out of trouble. He did not know what the matter was, but he said that he could not get started. I looked the machine over, could see nothing wrong, got on, gave the pedals a kick and off she went as good as ever. When I came back he said that I had done something to it; he could not say just what, but anyhow I had done something that fixed the trouble that he insisted was in it.

"'There is nothing wrong with that machine,' I said. 'It runs as good as it ever did, and the trouble is with you. You have not got strength enough to start it, just as I told you in the beginning.' 'Oh, well,' he replied, 'you have got a kick like a mule, and could start a steam roller if necessary.'

"After I got him started he was out of sight in less than a minute. Well, about every day or so for awhile I would get a telephone to go out and fix him up. He would stop and was unable to start again. This was no fault of the machine, for anyone that can kick an engine over compression can start a 'five,' but this fellow was not strong enough to overcome the two cylinders. When I would go out and find him, all I would have to do would be to put him on it and give him a push.

"It was not long, however, before he began to get sick of this hard starting business, and I was beginning to get weary of playing donkey and of chasing out to start his machine for him. In about a week after he got his machine he came around and said he wanted to trade it in for a 'four.' I made a deal with him, and put him on a 'four.' He was able to start it alone, and with the experience he had gained with the 'five' he got along fine.

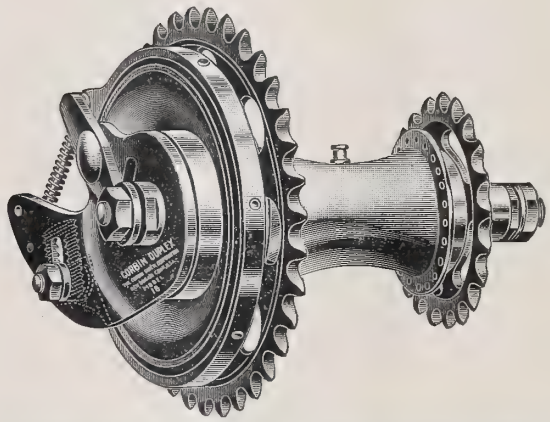
"He rode the 'four' all last season, and this year he has a 'seven' twin. He is able to handle a big machine now all right, as the free engine clutch makes starting easy for him. Still, he says that if I had tried to sell him a big machine in the first place, after things turned out the way they did, he would have 'got on his ear' and I would have lost him. But because I tried to fix him up right in the first place, and eventually did so when he realized that he had made a mistake, I've kept him satisfied, and this year he bought a new machine, so that I came out ahead in the long run. I always try to study my customers and advise them to get a machine that they will get the most pleasure out of. Then if they don't take my advice it is up to them, not me."

Bicycle Exports Still Increasing.

Exports of bicycles and parts for the month of February, 1911, were $79,724, as against $57,867 for the same month last year, showing a gain of $21,857, or more than 37 per cent. For the eight months ending with February 28 last the showing was even more impressive. During that period the United States exported bicycles and parts to the value of $529,082, which is greater than for the corresponding periods for the two years previous. The gain over last year was $152,868, or more than 40 per cent., and in comparison with 1909 the increase amounted to $60,801, or nearly 14 per cent.

Will Get Useful Tire Service Data.

Devoted exclusively to the exchange and promulgation of ideas and experiences bearing on tire maintenance, a special department is to be added to the numerous branches of the United States Tire Co.'s activities. This department will solicit from the users of tires of all descriptions communications recounting difficulties, and will be prepared to aid correction and perfection that will help get the greatest possible mileage service at the lowest possible cost per mile.



Hartford Rubber's High Mark.

By the addition of 300 men, the Hartford Rubber Works Co., of Hartford, Conn., on the 27th ult. attained the biggest working force in the history of the company, the total on the payroll being 1,500. The past three years has seen the plant double its capacity and output.

NEW YORK, APRIL 1, 1911.

Opportunity for Young Men.

As a business for the young man with only a modest bit of capital, irrespective of whether this capital is his own or is borrowed, the retailing of motorcycles has peculiar opportunities and advantages. As many a young man and many a young man's father knows, it is not the easiest thing in the world to find a line of business in which the newcomer with only a little capital has about an equal chance with everybody else, particularly if the business is of a nature where substantial profits are possible. In its present stage, however, the retailing of motorcycles is open to the young man most advantageously of all.

In the last two or three years it has been shown in innumerable instances that young men starting with practically no capital at all beyond their own investment in their first motorcycle can develop through the stages of "curbstone agent" and "desk room broker" to becoming the proprietor of a prosperous and established business. This has been accomplished time and time again in years that can by no means match the coming few years in point of activity and volume in motorcycle selling.

Motorcycle selling is peculiarly a young man's business, inasmuch as it is chiefly to young men that the machines are sold. It therefore takes a young man to go out and get in touch with prospective customers. All the business and executive ability that a young man has may be given full play in the conducting of a motorcycle agency. If he grows along the right lines, he can make his business national in its scope if he pleases. For those who have no interest whatever in motorcycles, the business is not to be recommended, but for the young man with small capital, who wants to go into business for himself and does not quite know where to begin, a motorcycle agency is the most promising choice.

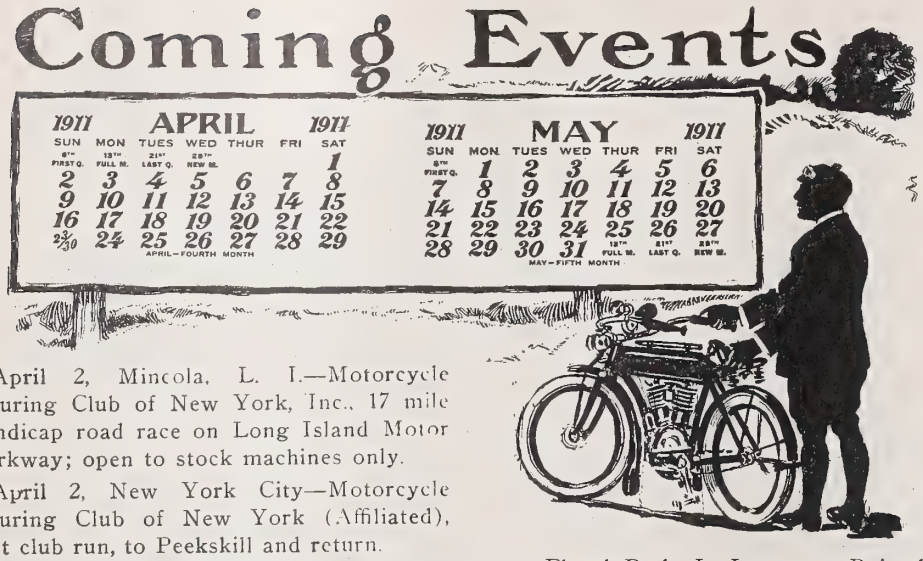
Higher Standards for Membership.

Heretofore glad to take in any rider of a motorcycle, without asking any questions in regard to his character or antecedents, it is highly significant that not a few of the new motorcycle clubs that are being formed are setting high membership standards and catering to quality rather than quantity of members. This disposition to eliminate the "pikers" and "overalls brigade" is a good sign, for it is this class that has been responsible for the shaping of public opinion that all motorcyclists are "a greasy, dirty crowd of cheap sports."

Now that the better class of people are taking up the sport, they are showing a disposition to put up the bars and shut out the undesirable element. It is the latter that are responsible for considerable of the club ructions and quarrels that have occurred in the past, and it is well that steps should be taken to eliminate them from the clubs where gentlemen congregate.

It would be better for all motorcycle clubs if in seeking members they would look for quality rather than a big membership of all classes. If motorcycle clubs ever are going to be the power for good in the sport that they have a chance to be, they will have to be conducted on better lines than most of them have been in the past. The members will have to give more care to the appearance of themselves and their machines, and to their deportment, as well, when out riding, and the bickerings and jealousies will have to be eliminated from club meetings. The answer is to get into the clubs a class of men who are of good breeding and know how to conduct themselves properly, and who will lend their aid to the upbuilding of the club and the sport it represents.

Preserving Pleasure in Picture.



Few motorcycle clubs have a club album and more is the pity, for in hardly any live club is there not at least one and usually several of the members who have cameras. One of the most interesting diversions in motorcycle club life is to drop into the club rooms on a winter afternoon, sink into a soft leather chair or couch, light a pipe, cigar or cigarette, take a big fat album across one's knee and commence to browse through it. If it is as well stocked and is kept up as it should be it will bring back to memory many pleasant trips, together with humorous incidents connected therewith. It will recall the race meets and hill climbs, the runs, and the old machines of other days, which in their time were the admiration of all, now antiquated when compared with the latest beauties. Not only the regular machines, but what club cannot boast of at least one genius who was unwilling to accept the ideas of any manufacturer, and built a machine of his own that embodied some startling ideas? All these and more should be found in an up-to-date club album, but such works are rare indeed. If clubs will accept the hint, albums will be more numerous in the future.

If the professional motorcycle riders really want championships created in which they are eligible it behooves them to speak out for themselves without delay. They are the ones directly concerned, and if they are not sufficiently interested to make known their wants the latter are very likely to go unfilled. There is a disposition on the part of the "powers that be" to provide professional championships if there is sufficient demand for such, but they first have got to "be shown." So far not a rider has given expression to his views.

"Your paper is certainly full of interesting and instructive items, and I should hate to be without it."—A. R. Case, Rice Lake, Wis.

"I enjoy reading your paper."—H. Norwood, Roxbury, Mass.

Coming Events

April 2, Mincola, L. I.—Motorcycle Touring Club of New York, Inc., 17 mile handicap road race on Long Island Motor Parkway; open to stock machines only.

April 2, New York City—Motorcycle Touring Club of New York (Affiliated), first club run, to Peekskill and return.

April 5, New York City—Concourse Motorcycle Club's annual dinner at Hotel Gerard.

April 9, Newark, N. J.—Opening bicycle race meet at the new Newark Velodrome.

April 15, New York City—Annual reunion dinner of the Century Road Club of America, at Raub's, 8 Nevins street, Brooklyn, N. Y.

April 16, New York City—Century Road Club Association's ten mile handicap road race, Floral Park, L. I.; open. Rain date, April 23.

April 18, Buffalo N. Y.—Motorcycle Manufacturers' Association meeting at Hotel Statler, 10 a. m.

April 19, Boston, Mass.—Boston Motorcycle Club's fourth annual Patriots' Day run to Worcester; open.

April 19, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Providence, Boston and return; 136 miles. First section.

April 23, New York City—Motorcycle Touring Club of New York's first cup trio-trial, Newburg and return, 150 miles; open.

April 30, New York City—Eastern Division C. R. C. A. spring century; open.

May 7, New York City—Empire City Wheelmen 15 mile handicap bicycle road race, open, starting from Floral Park, L. I.

May 7, Chicago, Ill.—Second annual reliability run of the Chicago Motorcycle Club to Waukegan, Libertyville, Elgin, Aurora and return.

May 7, New York City—New York Motorcycle Club's annual double spring century run to Southampton, L. I., and return.

May 14, New York City—Century Road Club of America, New York State Division, spring bicycle century run.

May 28 and 30, Chicago, Ill.—North Shore Motorcycling Club's two day race meet on Hawthorne track.

May 28, New York City—Century Road Club Association's 30 miles handicap road race, Floral Park, L. I.; open. Rain date, June 4.

May 28-29-30, Cleveland, O.—Three day endurance run of Cleveland Motorcycle Club

May 29-30, Newark, N. J.—Twenty-four hour endurance run of the New Jersey Motorcycle Club to Atlantic City and return.

May 30, Springfield, Mass.—Motorcycle race meet of the Springfield Motorcycle Club, at the Springfield Stadium.

May 30, Elmira, N. Y.—Elmira Motorcycle Club's first summer race meet.

May 30, Newport News, Va.—Peninsula Motorcycle Club's endurance run to Richmond and return.

May 30, Long Branch, N. J.—Long Branch Cycle Club's second annual road race meet; open.

May 30, Asbury Park, N. J.—Twenty-five mile road race of the Monmouth Cycle Club.

May 30, Grand Rapids, Mich.—Bicycle and motorcycle races at Michigan State Field Day, under auspices of the Western Michigan Cycle Club.

May 30, Plainfield, N. J.—Third annual 25 mile handicap cycle race of the Plainfield Cycling Club.

June 4, New York City—Concourse Motor cycle Club's fourth annual run to Savin Rock, Conn., and return; open.

June 4, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Greenfield, Springfield and return; 175 miles. Second section.

June 18, Floral Park, L. I.—Century Road Club of America, New York State Division, 50 mile handicap bicycle road race; open.

July 3-9, Rockford, Ill.—Racing carnival of the Illinois-Iowa Motorcycle Association.

July 4, Asbury Park, N. J.—Opening motorcycle meet at the Asbury Park track.

July 4, Grand Rapids, Mich.—Annual open bicycle road race of the Western Michigan Cycle Club.

July 16, New York City—Motorcycle Touring Club of New York's second cup trio-trial, Newburg and return, 150 miles; open.

August 1-2-3-4, Atlantic City, N. J.—Summer meeting of the Cycle Parts and Accessories Association and the National Association of Cycle Jobbers.

August 6, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Rockport and return; 200 miles.

August 20, Grand Rapids, Mich.—Annual open, six hour, two man bicycle team race of the Western Michigan Cycle Club.

September 10, New York City—Century Road Club Association's 100 miles record run; open. Rain date, September 17.

September 17, New York City—Motorcycle Touring Club of New York's third cup trio-trial, Newburg and return, 150 miles; open.

September 24, New York City—Century Road Club of America 100 mile bicycle record run, open, from Floral Park, L. I.; rain date, October 1.

October 1, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Springfield, Boston and return; 200 miles.

"Knocker" Scientifically Defined.

Being an expressive slang word, the term "knocker" is more or less extensively employed in discussions of motorcycling matters, and while almost everybody has a fairly definite idea of what it means, it has remained for the Scientific American to undertake a formal definition of its meaning, presumably with a due consideration for "scientific" exactitude. The Scientific American says:

"If we were to venture on a definition of a 'knocker,' we would describe him as one who has fallen into a chronic attitude of destructive criticism; one whose fault-finding is prompted by a certain twisted mental attitude, which takes but small account of the merits of the question involved."

Norwich Riders Project a Run.

Motorcyclists in Norwich, Conn., are getting together with the idea of promoting a motorcycle run on Memorial day, the proposed route being from Norwich to New London, New Haven, Hartford, Willimantic and back to Norwich. The affair may be run as a reliability contest. C. V. Pendleton, Jr., is the moving spirit in the enterprise. Motorcyclists from several towns near Norwich have indicated their willingness to take part.

"Just wish to state that the Motorcycle Review is of real value to anyone who has a machine, as it more than pays for itself in good reading and up-to-date kinks."—Herman Sager, Washingtonville, N. Y.

Plums for Pro's at Springfield Meet.

Rich prizes are being hung up, in cash for the professionals and in trophies for the amateurs, by the Springfield Motorcycle Club, of Springfield, Mass., for the big race meet which it is to hold on Decoration Day and for which it has applied for an F. A. M. sanction. An inter-city team race is one of the star numbers on the card, and assurances already have been received of teams from Hartford and Boston, to compete against the Springfield crowd, and teams from Providence and Worcester also are likely.

In addition to the inter-city team race, there will be a two mile novice race, 50 cubic inch limit, for gold, silver and bronze medals; a 25 mile race for trade riders, with silver cups for first, second and third prizes; and a 50 mile open professional race, in which the prizes will be $150 for first, $75 for second and $25 for third. In addition a guarantee of $25 will be given every professional starting in the race. The club is anxious to hear from all probable professional starters as early as possible.

Concourse Concourse at Savin Rock.

At the last meeting of the Concourse Motorcycle Club, New York City, it was voted to hold the fourth annual run to Savin Rock, Conn., on Sunday, June 4. Invitations will be sent to the clubs in Bridgeport, New Haven, Hartford and Springfield to meet at a general rendezvous at the resort and take dinner together, as was done last year. It is hoped to exceed last years' turnout when nearly 200 riders from Massachusetts, Connecticut and New York sat down to a shore dinner, making the largest gathering of motorcyclists that occurred in New England during the year. It is likely that the Concourse club again will offer a prize for the club other than itself having the most members on the run.

"Mile High Climb" for Motorcycles.

Officers of the Mile High Climb Association at Redlands, Cal., have arranged for a program of motorcycle and automobile races on April 21, in which there will be two events for the motorcycles. The card will open with a race for single cylinder motorcycles, and toward the end the free-for-all for motorcycles will be given.

Louisville Club to Foregather.

The next meeting of the Louisville Motorcycle Club, of Louisville, Ky., is scheduled to take place on Monday, April 3, at the garage of C. W. Fisher, agent for the Thor and Racycle, 403 East Broadway. It will be the first meeting of the club under the new officers for 1911.

Boston-Worcester Run Will be Large.

So many riders have signified their intention of taking part in the Boston (Mass.) Motorcycle Club's Patriot's Day run to Worcester on the 19th inst. that it is expected that fully 200 motorcyclists will participate in the event. The run will leave Boston in the form of a procession and will be under police escort to the city limits. Scorching is to be frowned on by the club officers, as it is the intention to prevent as far as possible the run deteriorating into a road race. Upon arrival at Worcester a reception and dinner will be held, arrangements now being under way. The run is open to all riders whether club members or not. The start will be from the quarters of the Boston club, 206 Massachusetts avenue.

Denver to Have Sunday Track Racing.

Motorcycle track racing in Denver, Col., is scheduled to commence on Sunday, April 9, according to an announcement by the management of the Tuilieries track, where the events will be run. Meets are to be held on each Sunday afternoon and on holidays during the summer. The dirt track is being banked two feet higher around the outer edge than it was last year, while a level runway ten feet wide at the base of the slope is being built.

"A Wrangling Delay."

INTERPRETS "STOCK MACHINES"

Competition Committee Chairman States the Requirements—Changes that are Allowed.

With the riding season on the threshold and plans in the making for the resumption of competition in its several forms, the ghost of that old chestnut, "What is a stock machine?" again is abroad in the land. At the request of D. E. Gassidy, of Denver, Col., and for the enlightment of promoters in general, Chairman Thornley has given his interpretation of the rules regarding stock machines and stripped stock machines, and indicates what action he will take when protests are filed in this connection.

Promoters can program meets with events restricted to belt driven motorcycles, but no restriction will be allowed otherwise as to the mechanism or make of machine. For instance, events cannot be restricted to certain machines having a particular make of carbureter, oiling system or ignition; in fact, no other restriction than that of belt drive is allowed.

Dropped handlebars, otherwise known as racing bars, will be allowed on stock machines, particularly on courses where such a bar would be safer than the regular bar, and they would not render the machine ineligible to the stock class. Promoters will be required to make a distinction between a stripped stock machine, and a fully equipped stock machine. When events are listed for stripped stock machines, stripping or substitution of lighter parts is permissible everywhere except in the frame and engine.

In this category is included spring forks, which in the opinion of the chairman should be replaced with rigid forks for racing. Lighter rims and smaller tires also may be used in this class. In the engine and frame, however, absolutely no change of any sort will be allowed. If nothing is said about stripping in an event for stock machines, they must be ridden with full equipment as sent from the factory. Full equipment means factory equipment and does not include accessories that later are fitted by the owner. Any protests against machines, based on their stock or stripped status, will be decided in conformance with these rulings.

In citing these interpretations of the rules, which will govern in future, the chairman states that while he feels that it is desirable for machines to be stripped for racing in the stock class, it is his aim to prevent a rider slipping into a stock event with a stripped machine and thus taking unfair advantage of another contestant who brings his machine to the tape fully equipped, and shows a disposition to live up to the spirit of the rules. In making up entry blanks where stock machines only are specified, they must come up to catalog specifications in all respects, and conform with the rules as well, while in events for stripped stock machines, any changes desired, other than in the engine and frame, are permitted.

Birmingham Holds a Hill Climb.

Devouring a 15 per cent. grade at the rate of 40 miles an hour, Gail Joyce, riding a "7" Indian, made the fastest time of the day in the Birmingham (Ala.) Motorcycle Club's annual hill climb on the 24th ult. Joyce made his record flight in the free-for-all class from a flying start. His time was 8½ seconds. Robert Stubbs, "5" Indian, pressed Joyce close for stellar honors, being clocked in 8¾ seconds.

Richard Gail, "4" Indian, won the open event for four horsepower machines in 15 seconds, beating out a victory from S. Knecht, Indian, by a quarter of a second. Stubbs, Indian, of course, was third in 16¼ seconds. Stubbs finally got among the winners by taking the 61 open class on a 1909 "5" Indian in 13 seconds, beating out Joyce by three-fourths of a second. C. Terryberry, Indian, was third, clocking 17 seconds for the hill. Indians made a clean sweep in all events.

The course was 500 feet long, and the grade was ascertained from the city engineer. All of the events were open to stock machines only, and the first two classes were run from rolling starts, the riders being allowed a 20 foot take-off before crossing the starting line. The climb was held under F. A. M. sanction, W. D. Gresham acting as referee. It is possible that a few new professionals were created by the contest, for Stubbs already was in this class, and those who rode against him now are also, if they were not before. Riders who compete against professionals become professionals themselves in doing so.

Northrup Triumphs at San Jose.

With the winner in doubt until the tape was crossed for the last time, C. H. Northrup, riding a 5 horsepower Indian, won one of the most exciting 25 mile motorcycle races ever held in San Jose, Cal., at the Driving Park track on the 19th ult., the closing day of the aviation meet. Edward Austin, Indian was a close second, and Will Baker, Indian, finished third. Time, 28:10. Twelve men started, but the contest soon narrowed down to three men, Northrup, Austin and Motorcycle Policeman James Margason, who rode a Merkel. Margason proved a formidable opponent until the breaking of a valve put him out of the running, when Northrup and Austin then had things all their own way, and repeatedly lapped the field. This pair were well matched and put up a battle royal that brought the crowd to its feet, Northrup gaining on the turns and Austin pulling up on the stretches. Northrup won by a foot with the crowd cheering wildly.

PRO RIDERS AND CHAMPIONSHIPS

Two of the National Title Events May Go to Cash Chasers—No Mixing of the Classes.

With a view to giving the professional motorcycle riders a chance to compete for the national championships, the suggestion has been offered that both professionals and amateurs be allowed to ride together in the championships. In support of the suggestion it is cited that this plan was tried several years ago in the bicycle championships by the N. C. A., and if special permission were granted, no harm would result in mixing the classes for this occasion. It would be greatly to the credit of an amateur who might defeat professionals in a mixed championship race. However, there are two great obstacles in the path of this plan; first, the competition rules, and second, the attitude of the chairman of the competition committee.

In the classification of competitors, an amateur rider is defined among other things as one who never has knowingly competed against a professional in any sport. It is apparent, therefore, that without a change or suspension of the present rules a trade rider or private owner cannot compete against a professional without automatically becoming one himself.

Chairman Thornley also has set his foot down strongly against any such arrangement, and states emphatically that he will not allow it. He admits that the professionals are entitled to recognition in the matter of championships, but the only recognition that can be accorded them this year in this respect is to convert a couple of the championships that are held at the national meet into professional events. The chairman is of the opinion that the rules give him authority to do this, and he expresses a willingness to do so if there is sufficient demand for professional championships, but he first wants to be assured that such is the case. He also is in favor of having two sets of championships, amateur and professional, but no action in that matter can be taken until the national assembly of the F. A. M. convenes.

Topekans in a Race Up Mt. Ored.

On its first club run to Lawrence on the 19th ult., the newly organized Topeka (Kan.) Motorcycle Club turned out 60 per cent. of its members. An impromptu hill climb was held on Mt. Ored en route, and attracted a large crowd. Fast time was made, but no records were kept.

Philadelphians Out on the Road.

Philadelphia's newest motorcycle club, the Frankford Motorcycle Club, held its first run on the 19th ult. There was a good turnout of members.

BIG FIELD IN PARKWAY HANDICAP

Famous Long Island Course to be the Scene of Hot Speed Battle—Stock Machine Ruling.

With 34 entries already in hand on Thursday night, 30th ult., and several more assured before Saturday night, 1st inst., the closing time, it is quite certain that at least 50 riders will start in the 17 mile stock road race of the Motorcycle Touring Club of New York, Incorporated, on the Long Island Motor Parkway, which starts from the Great Neck lodge at 10 a. m. While it is probable that there will be some post entries, these will pay the penalty for holding back until the last minute by being put on scratch regardless of machine, so that post entrants will not receive the benefit of the handicaps. That the race is not entirely local in character is shown by entries from Connecticut, Massachusetts and New Jersey.

PREPARING FOR A PRACTICE BRUSH

All turns on the course will be guarded by flagmen, and arrangements have been made with the lodge keepers to bar all motor cars and other non-contestants from the parkway during the race. The stock machine question has caused not a little anxiety on the part of riders of machines of last year or earlier vintage, who have added improvements to bring them up to date. Upon being asked for an opinion on this point, Chairman Thornley stated that it is permissible to add regularly catalogued improvements of later years to machines of earlier vintage, without changing their stock status, provided all parts so added are the product of the maker of the machine and are regularly sold in open market. No cross breeding of parts and machines will be allowed, however, which is to say, that parts for one make of machine cannot be fitted to another make to bring it up to date, and still leave it eligible for the race.

There also is some talk regarding allowing riders of machines fitted with free engine clutches to come to the line with their engines running. It is claimed in some quarters that to allow this is giving such riders too great an advantage over other riders whose machines are not fitted with clutches, and that all engines should be "dead" when the machines are on the line. No ruling has been made on this point, but it very likely will be brought up for decision at the starting line if not before.

It is safe to say that never before in this country has handicapping for a motorcycle race been carried so fine as on this occasion. To get as close and exciting a finish as possible, the handicaps have been revised again and provide for all classes finishing within one second. The revised handicaps are as follows: 7 horsepower, scratch; 6 horsepower, 1:18.45; 5 horsepower, 1:53.7; 4 horsepower, 2:51.1; 3½ horsepower, 5:33.4; 3 horsepower, 6:58.4; 2¾ horsepower, 9:48.4.

Up to the time of going to press the following entries had been filed: Earl S. Eckel, Washington, N. J., 7 horsepower Indian; Arthur Horn, Brooklyn, 5 Indian; S. T. Kellogg, Bridgeport, Conn., 6 Excelsior; Joseph Buckingham, New York City, 4 Harley-Davidson; W. F. Stubner, New York City, 3¾ N. S. U.; Robert Buttlar, New York City, 7 Indian; Wilmot Brewer, New York City, 7 Indian; Walter Goerke, Brooklyn, 7 Indian; Marshall McAnerney, New York City, 5 Indian; J. U. Constant, Brooklyn, 5 Indian; W. M. McClelland, New York City, 7 Indian; Irving Barnard, New York City, 4 Indian; Richard Buttlar, New York City, 4 Indian; Charles Cumiskey, New York City 1¾ Thor; J. W. Beach, 3 R-S; Basil Broadhurst, 3 R-S; Ferdinand Mercier, New York City, 5 Indian; Harold King, New York City, 4 Thor; Gene Coughlin, New York City, 6 Merkel; S. N. Newell, New York City, 4 R-S; Cuthbert Mills, New York City, 7 Indian; Charles Doris, New York City 4-5 Marvel; R. Steiner, New York City, 6 Excelsior; Frank Hart, New York City, 6 Excelsior; F. H. Van Deusen, Staten Island, 4 Thor; J. Ridder, New York City, 6 New Era; John J. Cox, New York City, 7 R-S; Edward Swain, New York City, 7 Indian; Frank Fitzsimmons, New York City, 7 R-S; Arthur Talbot, New York City, 4 Excelsior; George Philopeteaux, New York City, 5 Indian; J. Edwards, New York City, 6 R-S; Spencer Benham, New York City, 6 R-S.

A LONG STRAIGHTAWAY ON THE PARKWAY

Shoot First and Ask Afterward.

Motorcycle riders who venture into the fastnesses of the Tennessee mountains should be prepared for frequent hold-ups by mountaineers who suspect every stranger venturing into the region of being a revenue officer. Travelers are required to submit to most searching inspections, and the strongest credentials often are required to insure release. Moonshiners, who are sworn enemies of all government officers, have a habit of snuffing out the life of a suspect with little ceremony, so that it is not safe even for a motorcyclist to get "fresh" with the natives of that section.

UTICA BANQUET'S GOOD SUBJECTS

They Bring Correspondingly Good Speeches at Motorcycle Club's Affair—Live Topics Discussed.

Although scarcely more than a month old, the Utica (N. Y.) Motorcycle Club is losing no time in making good its boast of being a live wire organization. On the 16th ult. 40 members sat down to the club's first annual banquet, which was held in the grill room of the Hotel Martin. Preceding the feast there was held a short business session in the hotel parlors, at which the chief business transacted was the appointing of a committee to discuss the feasibility of holding an endurance run.

When the guests assembled in the banquet room they found tables loaded with good things to eat, drink and smoke awaiting them. Previous to the sounding of the charge on the tables, the banqueters posed for a flashlight photograph. The menu was arranged in a manner characteristic of the occasion, and included such popular and tempting dishes as "oysters with spark plugs," "carbureted Saratoga chips," "iced cucumbers with French dressing (chain drive)," "muffled roast turkey," "cranberry sauce with magnetos," "French peas (ball bearing size)," "coffee with oil," and "cigars (U. M. C. brand)."

After the cigars had been lighted and the guests settled themselves in their "saddles" prepared for a long run, President Dutton, who acted as toastmaster, introduced the first speaker of the evening, Albert Burrell, who took for his topic "Duties of a Captain." He dwelt on the duties of the captain and explained the scope of his authority on club runs. In conclusion, the speaker said that as captain of the club the orders given by him when out on club runs must be obeyed, and that any complaint concerning them should be brought up at the next meeting and not during the run.

"Club Socials" was the subject assigned to the next speaker, F. W. Chase. He asserted that the Utica club should be an all-year-'round club, and that during the closed riding season interest could be maintained by means of card parties, banquets, theater parties, dances and other social activities of a nature to bring the membe s together.

One of the best speakers of the evening, judging by the enthusiasm his remarks created, was L. R. Mather, who talked on "Sunday Runs." Interspersing his remarks with several witty anecdotes he said that the only time that the club members could turn out strong was on Sunday runs. He urged the members to attend the Sunday runs as regularly as possible, as a strong showing on these runs was good advertising for the club and the city.

"Motorcycling as a Sport" was the assignment of Arthur Ferris, who was well qualified to handle the subject. Ferris is a veteran rider, who has done considerable touring and competition work, and he described the pleasures and attractions to be had by indulging in the various branches of the sport.

In view of the fact that the club is still in its swaddling clothes, as far as age goes, "Past and Present" would seem a difficult subject to handle. However, Joseph Easton was equal to the occasion. Referring to the "past" he told of the long-felt need of such an organization as the Utica Motorcycle Club, and under the head of "present" dwelt on its good beginning, its large membership and its plans for the future.

Frank J. Bowen, a rider of several years standing, and with a wide acquaintance and familiarity with gasoline engines and their whims, gave the gathering some tips on "The Care of the Motorcycle." He explained in detail the various parts of which a motor is composed and told how each is best cared for. His address proved very instructive and valuable, not only for the novices but for the veterans.

Talking from the viewpoint of a business man and a user of a motorcycle in business, Prosper J. Jenny spoke very entertainingly on "Commercial Aid," and explained how a machine had made a place for itself in his business. He had used a motorcycle continually last summer for business trips, and much of the success attending the transactions he closed he attributed to the reliability of the motorcycle in getting him to his destination "on time."

A number of excellent "Club Runs" were described by N. Nelbach. Many attractive runs were suggested by the speaker, who has a wide knowledge of roads and routes in the vicinity.

O. L. Endres painted a glowing picture of "The Future of the Motorcycle," which he predicted would soon crowd all other vehicles off the road. He opined that it would enjoy a lasting popularity and that the wideawake dealer would reap a fine harvest of sales.

Last but not least interesting of the speakers was Frank Klein, who dilated on "Starting a Motorcycle," and gave several tips on coaxing balky motors to "mote." He enjoys the enviable reputation of always coming home on his machine under his own power.

It was in the wee sma' hours when the party broke up, rounding out the evening's entertainment by singing the club song, which runs as follows:

"I have carbureters on my fingers,
Crankshafts on my toes;
Handlebars in my ears,
And gasoline up my nose.
You spoiled my chain drive,
And I am here to say,
That all riders should join
The club from U. T. K."

SAVANNAH CLUB OPENS NEW HOME

Vaudeville, Refreshments and Speeches in Honor of the Occasion—Road Races Are Scheduled.

On Tuesday evening, 21st ult., the new club house of the Savannah Motorcycle Club, Savannah, Ga., was opened at Isle-of-Hope, with an attendance of 175 motorcycle owners. During the evening refreshments and vaudeville were provided, and speeches were made by prominent members of the club. The club has now a membership of 106 riders and claims to be the largest motorcycle organization in the state of Georgia.

At the meeting 29 new members were taken in. This is a record breaking number for a month. The club will try for a total of 200 before the next meeting. There are about 250 motorcycle owners in the city and the outlook is for at least 500 before the summer riding season comes to an end.

The idea of having another race on July 4th was taken up and discussed at length. S. N. Harris, who has the agency for the Indian, gave the suggestion of having a dealers' race and to have it in April. All the dealers seemed well pleased with the idea and it was decided to hold it. It will probably be run the second Saturday in April.

The races will be 100 miles, 50 miles and 30 miles, over a new course of ten miles, which will be in readiness by that time. The prizes, which will be cash, unless the riders object to being made professionals, will be given by the dealers, and the prizes for the Fourth of July will be furnished by the Savannah Motorcycle Club.

Following are the new members that the club added to its list:

A. N. Talley, J. D. Levy, H. M. Garwes, R. H. Boland, Martin Schroder, W. T. Rustin, W. T. Walls, W. E. Bronson, V. Seyden, D. T. Whitely, Walter Lang, C. M. Cregar, C. W. Stacey, C. B. Morgan, F. Keene, J. C. Thompson, M. M. Martin, T. M. Prater, Carl G. Pillman, Jr., E. C. Smith, Sam Carver, F. D. Williams, Joe Thompson, L. M. Callahan, W. W. Delph, J. E. Mosher, T. L. Davis, L. B. Boggs and D. Y. Dancy, Jr.

New Jerseyites Give a Dinner.

The New Jersey Motorcycle Club, of Newark, N. J., gave a dinner and entertainment on the evening of the 28th ult., at its club rooms, 18 New street. About 40 people were present. A business meeting preceded the festivities and several new members were elected. Thayer McLaren was named as referee for the Decoration day 24 hour endurance contest to Atlantic City and return.

ASKS FOR INDIVIDUAL OPINIONS

Willis Wants F. A. M. Members to Say Where National Meet Should be Held—A Canadian Question.

Two great questions confront President F. I. Willis, of the F. A. M., on which he wants the assistance of individual F. A. M. members all over the country in deciding. The first is as to where the national F. A. M. meet should be held, and he invites all members of the Federation to write him their personal views as to which city is the best, the chief cities in the contest being Buffalo, Detroit and Indianapolis. The second question is as to whether the F. A. M. should extend its scope to include Canada and the island possessions of the United States. There is already one Canadian club affiliated with the Federation, this being the Vancouver Autocycle Club, of Vancouver, B. C., and other Canadian clubs are asking the affiliation privilege. President Willis would like to have expressions of opinion from members generally as to whether the F. A. M. should take hold and govern the sport in Canada and in the outlying American possessions, or whether these should be left to develop governing bodies of their own.

The battle between Buffalo and Indianapolis for the national meet is waxing very warm. Buffalo is receiving the support of all the clubs in northern New York, and Indianapolis is likewise receiving aid from clubs in Chicago, Louisville, Terre Haute and other cities in the Middle West.

The Louisville club is anxious that Indianapolis get the meet in order that the national endurance run may be routed through Louisville. The Chicagoans are favorable to Indianapolis because of its being nearer to them than is Buffalo. The clubs in New York state are affected by similar reasons in lending Buffalo their support.

Giving a vivid account of his experiences as a contestant on the motor speedway at the 1909 national meet at Indianapolis, Forrest R. Casebeer, of Terre Haute, Indiana, tells why he thinks that Indianapolis should have a chance to retrieve itself. He says:

"Indianapolis should have the 1911 F. A. M. meet for several reasons. The city has a great number of riders and they are real boosters. It has a club that is strong and it has the finest speedway in the world, and nc other course that might be offered would be as safe or as fast. There is a chance of records being made at the meet. Further, the city is centrally located and it could guarantee a large sum for the meet.

"But the best reason of all is that Indianapolis ought to be given a chance to make up for the feeling caused by the miserable condition of the speedway at the time of the other meet. It took the 1909 meet when no one else wanted it, and it relied on the word of the speedway management that the course would be completed. Those connected with the racing end will remember the combination of bad luck that pursued the racing.

"First there was a hard rain that lasted till the bottom fell out of the roads. When we started riding on the speedway we found the surface very hard and rough and it was foolhardy to attempt 60 miles per hour. Each basin in the track was filled with water and when you splashed through them your goggles were filled. Then the sun came out very hot. The surface of the speedway was ground rock held together by a tar-asphalt combination. The white surface seemed to draw the heat, and soon the tar combination rose to the surface and got as thin as water. It ran down the banks of the track in streams. We drove our machines through this and the stuff spattered all over us.

"Wherever any of it struck it blistered. Before long our faces were completely blistered and the stuff began soaking through our underclothing on our backs. We used vaseline, fresh lard, cylinder oil and various other things for the burns. Personally, I felt very homesick and almost swore off on all future meets. That tar stuff never came off the machine and never will.

"That is the story from an entrant's standpoint. The speedway now is paved with brick and this could not happen. Rain would not kill the races as it would on a dirt track. It is certainly the place for the meet. I say let Indianapolis vindicate herself; give her a chance and she will make good."

Indianapolis sent in its written bid for the F. A. M meet on Monday of this week. Buffalo sent in its written application on the Saturday previous, and was consequently the first city to have its application on file. Detroit has not come forth with its application yet, so Indianapolis and Buffalo are the only two that have taken official action toward getting the meet. In the letter that accompanied Buffalo's application, the secretary of the Buffalo Motorcycle Club stated that he wished to impress upon the directors the fact that the scenes around Buffalo are very beautiful and he mentioned Niagara Falls as one of the sights that the motorcyclists would enjoy.

On behalf of Detroit it is urged that it is a wonderful holiday center and that the lake and river trips which it offers make it well worth consideration.

President Willis said on Tuesday:

"I am only expecting one or two more bids for the F. A. M. meet now. I was in Detroit yesterday and the boys there said they would very probably enter an application. The only other club that I might hear from would be that in Denver. However, that city has not decided yet upon its action and I would not be surprised if it fails to apply."

SEEKS ADDRESSES OF LOST SHEEP

Gibson is Trying to Straighten Out Predecessors' Tangles—Getting in Touch with Old Members.

Despite the systematic basis on which the work of the office of the secretary-treasurer of the F. A. M. now is being conducted, he finds it impossible to reach many members who joined during the administrations of Secretaries Cooke and Ball, because of the lax methods under which the work was carried on at that time. In explanation of the failure of many members to receive notices of membership expiration and requests for renewal, Secretary G. B. Gibson, of Westboro, Mass., makes the following statement:

"Renewal notices to F. A. M. members are sent out from this office promptly some time during the week previous to the month in which the membership expires. I have found it extremely hard to reach a great many of the members who joined during the times of my two immediate predecessors, because of the fact that so many of these letters come back to me marked either 'unknown' or 'not in directory.'

"A great many F. A. M. members may have wondered why they have not heard from this office; the above condition will probably explain why. I keep an accurate alphabetical file of the faces of all mail matter which comes back to this office undelivered, and have done so since I became secretary-treasurer. Any man whose membership has expired please communicate with this office if he has not heard from me."

Night Owls First to Have 100 Per Cent.

Search of his files by Secretary Gibson of the F. A. M., after learning in last week's Bicycling World and Motorcycle Review of the controversy that has arisen between the F. A. M. Night Owl Motorcycle Club of New York, the Motorcycle Touring Club of New York, affiliated, and the Linden Motorcycle Club of Brooklyn, each claiming to be the first 100 per cent. F. A. M. club, disclosed the information that the first named is entitled to the honor. The Night Owls were affiliated on August 1, 1908, all of the 16 members belonging to the F. A. M. When the Touring Club affiliated on January 11 of this year, Secretary Gibson wrote that it was the first 100 per cent. club, and its claim was based on this information. Closer investigation now reveals that it was the first 100 per cent. club to be affiliated during his administration and that it was through an oversight that the status of the Night Owls was overlooked. Just where the Linden club fits in with its claim is not apparent, but it evidently must yield to the Night Owls.

100 CLUBS ARE NOW AFFILIATED

F. A. M. Century Certificate Goes to Porterville, Cal.—Helping the New Riders to Organize.

Thirteen affiliated clubs, enrolling 312 new members in the F. A. M., is the recruiting record of the office of the chairman of the membership committee for March up to the 26th. The most notable event of the week from the standpoint of the membership office was the issuing of the one hundredth certificate of affiliation. The honor went to the Porterville (Cal.) Motorcycle Club.

Albany, N. Y., is giving evidence of proving to be fertile ground for F. A. M. seed. It is being sown by G. J. Sanders, 76 Livingstone avenue, who indicates that he expects to harvest a club of 25 members within two or three weeks. Needless to say, it will be an affiliated club.

D. B. Pierce, Hamburg, N. Y., is out gunning for prospective club members in that region. He has not bagged any game as yet. Not satisfied with the near half dozen clubs already within the precincts of Chicago, C. R. Schwarz, 447 W. North avenue, that city, is adding another to its quota. He has signed up 18 riders already, and the organization is to take definite shape soon.

Although Toronto, Canada, has a live club of 85 members, the F. A. M. is not very strong there as yet. H. M. Kipp, of the F. H. Lemon Co., dealers, is doing some missionary work with a view to interesting local riders to join. The Canadian club indicates that if Buffalo gets the national meet, they will take it in.

Chairman Estabrook has restocked his literature cabinet with some new and revised club constitutions and by-laws pamphlets, and leaflets on "How to Organize a Motorcycle Club." The former is a 20-page book containing a draft of a constitution and by-laws suitable for a local club. Blank spaces are left to be filled in with the name of the club, location, dues and other items of a directly local nature. These pamphlets are suitable for use in their present form or may be inserted in special covers. They will be furnished to clubs on request, making quite a saving for printing. The leaflet on club organization is intended as a guide for those undertaking the organization of clubs.

Connections are being established in the Philippines looking to the organization and affiliation of clubs, and with a future view to controlling competition and exercising a supervision over other matters pertaining to motorcycling that may arise in American possessions in the Far East. Canada, Mexico and Alaska also are scheduled to receive attention along the same lines.

Chairman Estabrook is sounding a final call to his lieutenants before the opening of the riding season to redouble their efforts to bring in new members and organize new clubs, the latter to be 100 per cent. F. A. M., of course. The big crop of new riders taking up the sport offers, in his opinion, a most fruitful field for missionary work, and it is his belief that vigorous recruiting among them will be rewarded with most gratifying results.

Lancaster Launches a New Club.

In Lancaster, Pa., the new Lancaster Motorcycle Club has completed its organization by the election of the following officers: Harry C. Volmer, president; Charles F. Hupper, vice-president; Ira K. Herr, secretary-treasurer; Harvey R. Williams, captain; Amos Kukus, David Reitzel, Roy Kendid, Herbert Moyer, Samuel Killian, committee. The club expects to hold race meets and a number of enjoyable club runs. All the members belong to the F. A. M. and it is probable that the club will vote for affiliation at the next meeting.

Topekans Provide for Picnics.

Motorcyclists of Topeka, Kan., have organized the Topeka Motorcycle Club with the following officers: W. L. Davis, president; J. L. Johnson, vice-president; M. E. Harding, secretary; G. T. Brummitt, treasurer; J. C. Hughes, doorkeeper. The club has 15 members, which is 50 per cent. of the local riders, and the charter is being held open for a limited time. One of the unusual objects of the club is to hold picnics as well as contests and to promote the general welfare of the sport.

Trenton Motorcyclists Organize.

Trenton, N. J., is to have a flourishing club before long, in the Central Jersey Motor Club. Twenty new candidates for membership are on the list, and the meetings, which are being held at Brock's garage, indicate that the organization will be strong and prosperous by the time the riding season is fully under way.

INDIANANS MAY SAVE RENT MONEY

Considering a Building Loan Scheme—To Give a Smoker—"Mystery Run" and Endurance Contest.

Finding it cheaper to build than to rent, the Indiana Motorcycle Club, of Indianapolis, Ind., is arranging to erect a $3,500 club house on the lot which it recently bought on the boulevard, on the road that leads to the Motor Speedway. At present the club is paying $35 a month rent for its quarters. It can build and pay off the indebtedness in instalments of $25 per month, so that it will be saving $10 a month rent and will have something to show for its money. The new club house may be completed early in June.

The Indianapolis club now has 85 members, and, as one of the steps in boosting the membership, it will give a smoker and dinner on April 14 for all motorcycle riders in Indianapolis who wish to attend. It is estimated that at present there are about 1,000 motorcycle riders in the city.

On Decoration day the club will give a big "mystery run" for all riders who care to take the trip. On the five succeeding Sundays after Decoration day, a four part endurance run will be held. There will really be five separate runs, but each rider will be permitted to take part only in four of the trips. The extra trip is for those who miss one of the four regular runs. Prizes well worth trying for will be awarded to the winners. The trips will take the tourists to practically every city in Indiana. Each journey will be at least 175 miles, and the various destinations will include Terre Haute, Logansport, Richmond and North Vernon, Ind.

Atlantic Reliability in Storage.

The Atlanta (Ga.) Motorcycle Club has a 200 miles reliability run in storage. It will be released soon.

Date MAR 26 1911 Price 50 Cents

This Ticket entitles the holder to entrance with one motor cycle upon the

LONG ISLAND MOTOR PARKWAY,

between the hours of 6 A. M. and 6 P. M., on the date stamped above, subject to the conditions on the back of this ticket. Not transferable and must be shown upon request to any representative of the Parkway Company at Lodges of the Company.

Registry No. Merkel W. K. Vanderbilt Jr.
President.

GREAT NECK LODGE No. 50

TICKET REQUIRED ON THE LONG ISLAND MOTOR PARKWAY

POLICE LIKE THE MOTORCYCLE

Its Swiftness Valuable in Preventing Crime and Catching Criminals—Now Used in Many Cities.

Motorcycles are effecting a complete reorganization of police department methods in the cities and larger towns throughout the country. Because of its great speed the machine is becoming a great factor in preventing crime and catching criminals—facts which account for the high place it occupies in the estimation of police officials. Criminals know of the motorcycle's speed. It discourages them in many projected crimes, for they realize that the hazard has increased. As a natural sequence, the law-abiding public has been given an added sense of security through the adoption of this modern invention as a part of the police machinery of the world.

Captain Bradish of the University police station, Los Angeles, Cal., has just installed two motorcycle substations. Nine men are assigned to motorcycle duty in the University division, three men being on duty at all times.

St. Joseph, Mo., is boasting of "one of the nattiest, best-looking police motorcycle squads in the whole country." Four officers are assigned to motorcycle duty in the St. Joseph police department, working night and day in teams of two each.

Memphis, Tenn., now has the motorcycle improvement in its police department. The police commissioner at Memphis expresses himself in this way: "As in the case of the fire department, quick service is half of the battle. Our motorcycle officers are under instruction to answer all emergency calls, and to get there quick."

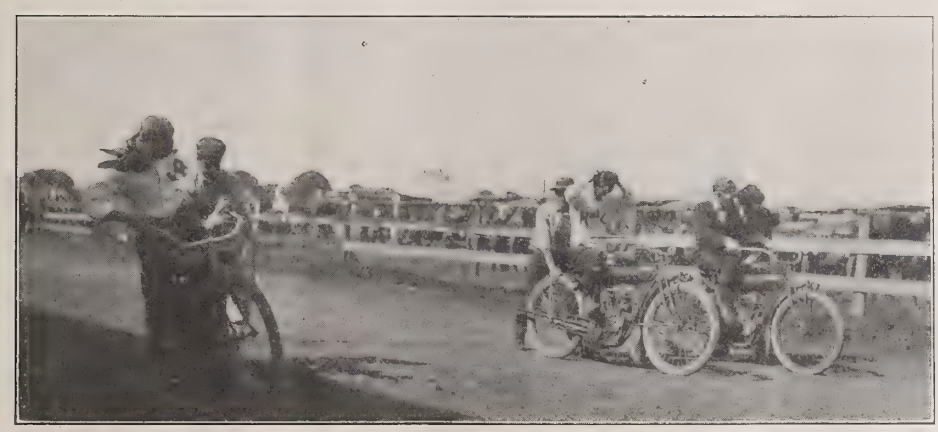
Houston, Texas, has its motorcycle officers. One of the councilmen in Indianapolis insists that the motorcycle squad be increased. Chicago has them. So has Milwaukee, and even smaller cities like Dayton, Ohio, and Riverside, Cal., have been quick to adopt this new aid to police efficiency.

MUNICIPAL INSPECTORS WHO UTILIZE MOTORCYCLES.

W. C. Howe, carpenter inspector of the department of buildings, Cleveland, O., is shown on the left, and F. B. Preston, general inspector of the department, on the right.

More Linemen Get Motorcycles.

After several months test, in which motorcycles proved very superior to horses and wagons in expediting the work of the telephone linemen, the Pacific States Telephone and Telegraph Co. has placed an order for 16 machines with A. Freed, the Thor agent in San Francisco, Cal. The motorcycles are to be placed in service in the San Joaquin and Santa Clara valleys, and later other machines are to be bought for the northern section of the state. The telephone company found in its tests that linemen mounted on motorcycles could reach the seat of trouble so promptly that the loss checked by quick repairs to damaged wires and the time saved by the workmen in reaching and returning from the trouble point will more than pay for the initial expense and the upkeep of the motorcycles.



San Jose Aids Prince's Project.

With money provided by the local traction companies, the Driving Park Association and the local motorcycle dealers, and with permission from a lumber company to go as far as he likes in ordering timber, Jack Prince is in a fair way to carry through his project for a motorcycle and bicycle board saucer track in San Jose, Cal. Prince, who has a reputation for building saucer tracks, plans to make the track three laps to the mile, with banking steep enough to hold a speed of 95 miles an hour. It is probable that the track will be built in the vicinity of the San Jose Driving Park.

F. A. M. Membership Reaches 7,000.

The F. A. M. membership passed the 7,000 mark this week, according to Secretary Gibson. It will have to gain about 750 members a month for the next four months to reach the goal of 10,000 members which it hopes to have at the next annual meet.

HAWAII TAKES TO TRACK RACING.

The first motorcycle race ever run in Hilo, Hawaii, took place on Washington's Birthday, and was won by P. C. Beaver, or an Indian. The picture shows the starters.

QUITS WALK TO SELL MACHINES

Long Distance Pedestrian an Easy Convert —Was Sick of Tramping Through the Soft Sand.

When Frank B. Surman started out from Wilmington, Del., last November to walk to Los Angeles, if anyone had predicted that he would abandon his task at Atlanta, Ga., and take up the selling of motorcycles, the disciple of Weston would have voted the prophet a candidate for the Ananias Club. Yet that is exactly what Surman did, and he likes his new vocation so well that he has abandoned all thought of continuing his travels via the Thespian line.

CHAPPLE PERSUADING SURMAN TO GIVE UP HIS LONG TRAMP

Surman, accompanied by a companion, Morris Roberts, and a bull dog, which answers to the gentle title of "Lady," turned his back on Wilmington on the 26th of November last, intending to tramp to Los Angeles. The undertaking was attempted to promote interest in out-door sports, and the conditions of the ramble were that the men should have no money to start with, should beg for or receive none from any outside source, but should work their way from place to place, earning their keep in a legitimate way.

Striking out toward the South, everything went well, and the back-to-Nature tourists were enjoying their trip immensely until Frederick, Md., was reached. Here Roberts had the misfortune to slip on the ice and injure his spine, which forced him to quit. Undaunted, Surman and "Lady" plugged along alone, determined to complete the undertaking. At least, Surman was, and "Lady" took the cue from him and was ready to walk around the world, if necessary.

It was while hoofing it through a stretch of deep, sugary sand between Sumter and Columbia, S. C., that the incident occurred which completely changed Surman's plans. The spot was a veritable sea of sand in which he sank above his shoe tops every step he took, and progress was slow and laborious, with no cooling breezes to temper the heat of the sun.

Suddenly Surman heard the beat of a motor and looking around saw a motorcyclist plunging through the soft sand, and coming toward him. He stopped to watch with interest the rider's effort to stay in the saddle as the machine swayed and rocked as it forced itself through the treacherous ground. When the motorcyclist came up he stopped and greetings were exchanged. He proved to be A. G. Chapple, the Merkel traveler, who was bound for Columbia. The two men soon became quite friendly, and in their talk Chapple discovered that his new acquaintance was quite familiar with motorcycles.

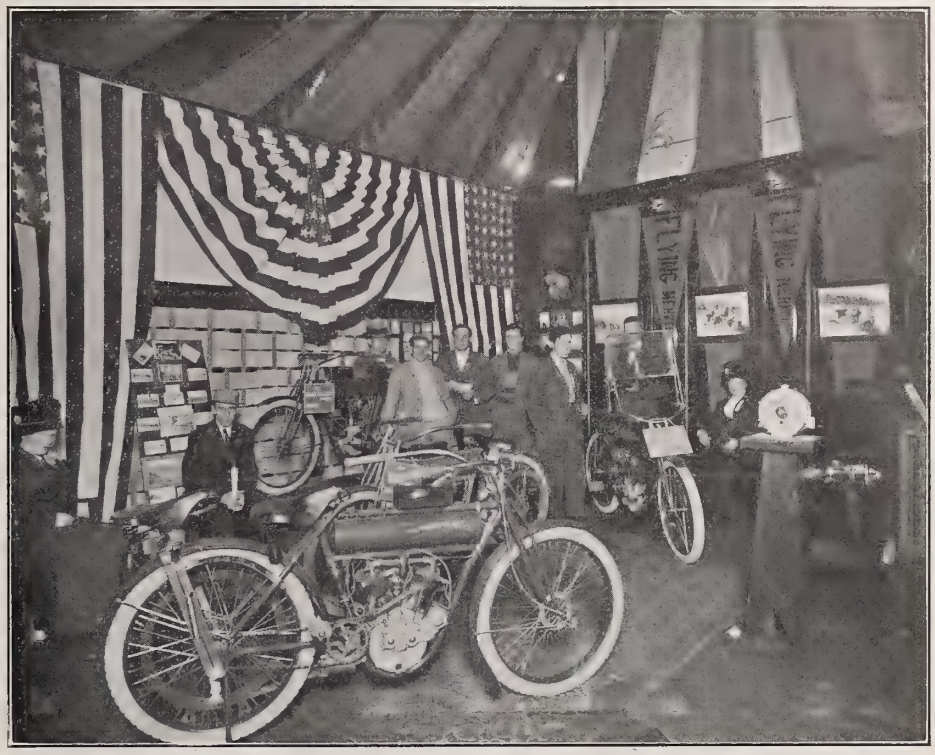
Surman intimated that he was getting rather weary of his walk and would much prefer to go to work. Believing that Surman's knowledge of motorcycles would make him valuable to some agent, Chapple gave him a list of agents along his route and suggested that he call on them and see if he could "connect." Then they parted. Chapple heard no more from his pedestrian friend until he again was in Atlanta, recently, when he was surprised to find Surman on the staff of the Motorcycle Supply Co., the Merkel distributor for Georgia. Manager Colburn reported that Surman was "making good," had proved popular with the local riders, and that soon he would be sent out on demonstrating trips. "Lady," the bull dog, has been adopted by the Atlanta Motorcycle Club as a mascot, and now is the recipient of much attention.

Kenneth Norton Killed in Accident.

While aiding a pair of motorcycle policemen in the pursuit of a speeding motorcyclist, Kenneth Norton, Kansas City, Mo., 23 years old, a local motorcycle dealer, was hurled against a tree by the bursting of a tire, and sustained injuries which caused his death a few hours later, on the 23d ult. Norton was a member of the Norton & Newby Motorcycle Co., 3033 Main street. The accident occurred at 27th street and Gillham road on a turn which the pursued and pursuers took at terrific speed. Norton skidded to the outside of the turn close to the curb, and at this point a tire exploded, and the machine crashed into a tree. The officers did not know of the accident until they were a block away, when they looked back to see if Norton was with them, and discovered what had happened. They immediately abandoned the chase and went back to the injured man, and called an ambulance. Immediately upon reaching the hospital Norton was operated on, although it was seen that his case was hopeless from the first.

Army Officer Finds Touring Cheap.

Something of a surprise rewarded an army officer, Lieutenant Sampson, of Fort D. A. Russell, as the result of his calculations as to what a long tour on a motorcycle costs, when he came to figure up expenses in connection with a journey of his own. According to one of the motorcycle agents in Denver, Col., the lieutenant some months ago left the fort on his motorcycle and journeyed to the northwestern part of Michigan, and, after a visit, returned over a course that led him through the Southern states, making a total of several thousand miles. During the trip Lieutenant Sampson took a number of photographs and purchased all the supplies necessary for his machine. When he returned to the fort he added up the entire cost of his trip and found that it had averaged less than half a cent a mile.



Damages Awarded Motorcyclist.

For injuries received while riding a motorcycle and alleged to be due to the fault of an automobile driver, William A. Eager, of Newark, N. J., has won a verdict of damages to the amount of $2,777, against Adolph L. Boyce. Eager was riding on Howard street when he was struck by an automobile owned by the defendant. He was seriously injured. Boyce was not in the automobile at the time, but was made responsible as its owner since it was being driven under his orders.

Buffalo Sportsmen See Latest Models.

Eight dealers, representing eleven makes of motorcycles and a similar number of brands of bicycles, took space at the Sportsmen's Show held in the Broadway Arsenal, Buffalo, N. Y., during the week of March 27. The following are the exhibitors, the machines they showed and the attendants in charge: Neal, Clark & Neal, Indian, three machines; Excelsior, two machines; B. E. Neal in charge. This firm also showed Xanthaline, an anti-puncture compound for tires. Herman L. Peters, Yale, 3 machines; H. B .Alderman in attendance. Glouster Cycle Co., Thor, four machines; represented by Charles Haberer. E. P. Seeber, Pierce, three machines; also Pierce bicycles; Pierce features were explained by E. P. Seeber and M. M. Ditch. The Poppenberg Bicycle House, Emblem, five machines; Yale, Columbia, Emblem, Harvard, Rambler, Iver Johnson and Capitol bicycles; Otto Brucker looked out for visitors. W. D. Andrews, Merkel, six machines; Wagner, two machines; New Era, three machines; Andrews Bicycles; W. D. Andrews was in command. Edward G. Schultz, Jr., Harley-Davidson, two machines; E. G. Schultz, Jr., was the chief of his show staff. F. F. Rick & Co., R-S, one machine; Rick and Buffalo bicycles; E. P. Young on deck. Not to be outdone in enterprise by the dealers, the Buffalo Motorcycle Club also took space and distributed pamphlets setting forth the objects of the organization, its efforts to obtain the F. A. M. meet this year, and the advantages of membership. All of the booths were prettily decorated. The total number of motorcycles exhibited was 34.

ONE OF THE EXHIBITS AT THE LOS ANGELES SHOW.

At the motorcycle show in Los Angeles, Cal., during the week of March 13, C. L. Smith, of Los Angeles, staged the Merkel, in the setting shown.

Magneto "Don'ts" for the Novice.

For the benefit of the novice who regards a magneto as a "box of tricks," and for the more experienced rider who may be inclined to tinker with the instrument with the idea of "getting a hotter spark," M. E. Toepel, of New York City, a magneto expert, offers the following "don'ts," the observance of which will save much trouble and expense. Here they are:

Don't test the magneto unless it is assembled completely, with all wires properly connected.

Don't open up the spark plug gaps or permit them to burn themselves apart more than 1-32 of an inch.

Don't flood the breaker box when oiling the small roller on the breaker bar. The oil should be applied with a toothpick about once a month.

Don't expect the magneto to operate if the frayed ends of the wires are allowed to come in contact with each other or with parts other than the terminals to which they belong.

Don't dissect the instrument to see what makes the wheels go 'round, unless you are an expert. The right number of wheels were put in the magneto when it was built.

Don't drive the motor with the spark retarded, but have it as far advanced as possible.

Don't try to improve the adjustment of the platinum points in the breaker box until they stop "breaking."

Don't pull out the carbon brushes in the secondary terminals because you think there is not enough tension on the springs.

BROOKLYN'S NEW EXCLUSIVE CLUB.

First photograph of the Invincible Motorcycle Club, of Brooklyn, N. Y.; taken in front of the Invincible club house, where it has its home.

Memphis Enforces Registration.

Motorcycles in Memphis, Tenn., must be registered in future, just like the automobiles. A number will be given each machine at police headquarters, and it must be carried at all times. No charge will be made for registering or securing numbers.

Music's Effect on Six Day Cyclists

Contestants in the recent New York six day race made better time when the band played than they did when it was silent, according to a series of tests conducted during the races held in Madison Square Garden from December 4 to 10 last. These tests cover 46 miles separately timed on three evenings. One half of the miles, or 23 of them, were ridden while the band played and the other 23 while it was silent. The average time per mile while the band was playing was 3 minutes 4 seconds, or at the rate of 19.6 miles per hour. When the band was not playing the average time was 3 minutes and 21 seconds, or at the rate of only 17.9 miles per hour. In other words, the miles ridden with music averaged 17 seconds faster than those riddden without. The fastest mile of the 46 timed was ridden while the band played, and was covered in 2 minutes 28 seconds. The slowest mile was covered in 4 minutes and 11 seconds.

These results are not surprising, for it is the common verdict of experience that music has a real and considerable stimulating influence on physical effort. Military men have always testified that soldiers march faster, further and with less fatigue when they march to the accompaniment of martial music.

Literature is full of reference to the psychological effect of music, ranging from Dryden's declaration that "Music hath charms to soothe the savage breast," to Carlisle's exclamation: "Give me, Oh give me, the man who sings at his work! He will do more work in a given time, do it better, and with less fatigue . . . ." and so on. The quotations are from memory and may not be exact.

The conditions of the six day race offer a peculiar opportunity for testing in a quantitative way the stimulating power of the music of the military band. The contestants are in continuous action hour after hour, and generally ride so close together that the time consumed in covering each mile may be accurately observed and recorded. During the entire race, night and day, the band plays a selection generally lasting several minutes, is silent for an interval of a few minutes, and then plays another selection. This combination of conditions offers an ideal opportunity for measuring the effect of the one varying factor, which is the music.

There is, of course, one important disturbing effect, in the occasional sprints; but at times hours elapse without a real sprint occurring.

The tests actually conducted are inadequate to demonstrate anything more than that the music of the band has a real influence on the speed of the riders. The plan followed was to take the time of the rider leading the bunch during a mile when the band was not playing, and record it in minutes and seconds, always dropping the number of fifths of a second. No more timing was done until the band played, when two laps were allowed to be ridden before the timing commenced, and one mile was timed just as before. After the music stopped, at least two laps were allowed to be ridden before another record was taken.

The first set of tests was made on the evening of Tuesday, December 6, and covered 20 miles, ten with music and ten without music. The second similar set of records was made on the evening of Thursday, December 8, and again covered 20 miles, of which ten were ridden with music and ten without. The third set was taken on the evening of Saturday, December 10, the last day of the race. Owing to delay in reaching the hall, it was possible to secure records of only six miles, of which three were ridden with music and three without.

In each case, the records were made alternately, as above described, the timing was done with a split-second stop-watch, and fifths of a second were not recorded. Each evening two persons worked together, one of them holding the watch and recording the time, and the other one keeping track of the laps covered, so as to avoid all possibility of error.

The following table shows the records for Tuesday, December 6, when the times for 20 miles were recorded:

Time in Minutes and Seconds for 20 Miles. Tuesday, December 6.

No Music		Music	
Mile No.	Time	Mile No.	Time
1	2:49	2	2:46
3	2:41	4	2:44
5	2:49	6	2:36
7	3:17	8	2:28
9	3:27	10	3:01
11	3:13	12	3:25
13	3:37	14	2:42
15	3:51	16	3:06
17	3:09	18	3:03
19	3:05	20	2:46
—	—	—	—
Average,	3:12	Average,	2:51

Average rate per hour without music, 18.8 miles.

Average rate per hour with music, 21 miles.

By referring to the table it will be seen that the miles ridden to music averaged 21 seconds faster apiece than those ridden without. The figures also show that there are constant and considerable variations in the speed even when the times show that there was no real sprinting going on.

On Thursday evening the race was very slow and there was little sprinting, as is shown by the following table:

Time in Minutes and Seconds for 20 Miles, Thursday, December 8.

No Music		Music	
Mile No.	Time	Mile No.	Time
1	3:48	2	3:01
3	3:52	4	3:34
5	4:05	6	4:11
7	3:29	8	3:46
9	2:50	10	2:45
11	3:17	12	3:06
13	2:56	14	3:25
15	3:57	16	3:32
17	3:36	18	3:03
19	3:59	20	3:39
—	—	—	—
Average,	3:35	Average,	3:24

Average rate per hour without music, 16.7 miles.

Average rate per hour with music, 17.6 miles.

The difference in the average time on Thursday evening between the miles ridden to music and those ridden without is 11 seconds. The final set of records shows conditions during the closing hour of the great contest, but before the final sprints:

Time in Minutes and Seconds of Six Miles. Saturday, December 10.

No Music		Music	
Mile No.	Time	Mile No.	Time
1	3:41	2	2:40
3	2:53	4	2:48
5	2:46	6	2:32
—	—	—	—
Average,	3:06	Average,	2:40

Average rate per hour without music, 19.3 miles.

Average rate with music, 22.5 miles.

The data as they stand seem to show that the music of the band does have a genuine and considerable stimulating effect on the riders and that this is true even after six days and nights of riding. It is probable that some of this stimulus is indirect. When the band played the crowd in the arena and in the galleries almost invariably responded with applause and shouts of encouragement for any slightest sign of increased speed among the riders. It often seemed as though the resulting faster riding came rather because the music stimulated the spectators and their shouts encouraged the riders than because it affected the riders directly.

Accurate data showing results for a considerable number of miles each day could easily be gathered during the next race and would throw light on the questions raised by the present observations. It is to be hoped that this will be undertaken next December by some pairs of careful observers, equipped with accurate stop-watches, sporting sympathies, scientific training and infinite capacity to survive in an atmosphere of dense tobacco smoke.

LEONARD P. AYRES, Ph.D.

DINNER PLANS OF C. R. C. OF A.

Told in All Amplitude in the Invitation—"Wives, Sisters and Soul Mates" Invited, Too.

Invitations to the annual reunion dinner of the Century Road Club of America are being sent out by Fred E. Mommer, 54 East 91st street, New York City. Giving full details and directions, the invitation reads as follows:

"Our annual reunion dinner will be held this year on Saturday evening, April 15, 1911, at Raub's, 8 Nevins street, Brooklyn, N. Y. The dinner will be held in Brooklyn this year because of the numerous requests on the part of our members living in that borough, to give their 'home town' a chance to make good in the banquet line. Raub's is located at 8 Nevins street, near Fulton street, a few steps from Nevins street subway station and Flatbush avenue L station, very easily reached by subway, surface, elevated or aeroplane routes; it has a reputation second to none for serving high class dinners.

"It is doubtless known to you that with this year our club has reached the age of 20 years; this will therefore be our 20th anniversary dinner, and this fact alone should make you feel proud to be able to participate in it. It is to be hoped that over 100 members and friends will be in attendance, in fact, members are urged to invite their cycling friends in order that they may become acquainted with the club and its work. The price of admittance is, as usual, $1.50 per person. While I should appreciate a remittance with your application for seats, I shall not insist upon it and shall be pleased to receive same any time before the dinner, of course at your earliest convenience.

"The presence of the fair sex has always been a factor in the success of our dinners; bring along your wife, sister or soul mate; remember, each lady will be presented with a souvenir, while the gentlemen will enjoy smokes. Full dress, tuxedo or business suit—any one is appropriate and you are welcome to appear as best suits your fancy. Be sure, brother, to wear your lapel button and your century bars. No one will be needlessly embarrassed by being requested to 'speech' against his wish. It is my sincere wish and hope that the old time members especially will take advantage of this anniversary dinner to get together once more and talk over the happiness of the good old days. I can assure you a most enjoyable time and trust to have the pleasure of your and your friends' attendance."

Willimantic Cyclists Have Beefsteak.

Members and friends of the Thread City Cyclers, Willimantic, Conn., to the number of 35, enjoyed a beefsteak dinner at the Windham Inn, on Thursday night, 23d ult. When the tables had been lightened of their viands, several members of the party entertained with short talks and stories. The gathering was entirely informal, but the evening passed away so pleasantly that it was with regret that the merrymakers broke up. Clinton C. Wood had charge of the arrangements.

New Englanders Hold Cork Handicap.

For the second Sunday in succession, J. B. Hawkins captured the regular weekly cork race of the New England Wheelmen of New York City on the 25th ult. E. Schuber, was a close second, J. W. Clement registered third, and Joseph Kopsky arrived fourth. A dash of variety was injected into the event, by changing it from a scratch race to a handicap. The distance was six miles as usual, the course being in the vicinity of Hunter's Island in the Bronx. Hawkins, Anderson and Kopsky were on scratch, the remainder of the field being allowed one minute leeway. This arrangement furnished a hot finish, as the scratch men did not catch the leaders until 500 yards from the tape, which was at the top of a stiff grade. At this point Hawkins came abreast of Schuber, and after a snappy brush between them the former forged ahead and led the bunch over the finish line.

J. B. HAWKINS

Acme's Try a Three Mile Scramble.

The Acme Wheelmen, of New York City, held a three mile trial scratch bicycle race on Pelham Parkway, on Sunday, 26th ult. The first five riders finishing were I. E. Higgins, John DeBruyn, Ed Ricke, J. B. Schmid and P. E. Wilke. The course was one and a half miles north from Bronx Park and return. The club is making arrangements to meet the other bicycle clubs in the vicinity of Greater New York, in races of any distance or style.

SPORT FOR FLAT FLOOR FANS

Buffalonians See Two Warm Races at 74th Regiment—Schieder Captures the Two Mile Lap.

Two exciting bicycle races were put on at the 74th Regiment games in Buffalo, N. Y., on Saturday night, 25th ult. Joseph Schieder, the local pride, captured the two mile lap race easily, scoring 63 points. E. C. Arenz scored 42 points, entitling him to second, and Al. Krushel was third with 37 tallies. Time, 4:31⅗. In the mile handicap, however, the scratch men did not have a chance, and all the plums went to the distance men. W. G. Penseyres (110) was first, Leo Breitweiser (115) second, and L. Safford (90) third. Time, 2:07⅖.

Seven qualified for the final in the lap race. Schieder, however, won as he pleased and the real battle was between Arenz and Krushel for second, the former scoring. Arenz gained double points by capturing the last lap, giving him a five point margin on second place. In the mile race the distance men kept away from the back markers by changing pace frequently.

Lots of Prizes for C. R. C. A. Handicap.

Plenty of prizes are assured in the ten mile handicap bicycle road race on April 16 that is to be given by the Eastern Division of the Century Road Club Association. Aside from 30 time and place prizes offered, there are enough other prizes to provide for practically every rider who finishes in a limited time. The race will start at Floral Park, L. I., and the course, which has been newly macadamized, is in such good condition that it will prove a boon to the scratch men in their attempt to win time prizes. Among the riders who have already filed their entries are A. R. Cooley, G. Polacsy, B. Boyes, E. Schuber, H. Kelly, J. M. Clement, J. P. Berlenbach, R. Jones and Joseph Kopsky. Entries should be sent to George Bieregel, secretary, 417 West 114th street, New York City.

Germantown's New Cycle Club.

Germantown, Pa., has a new bicycle club, recently organized by the class of 1914 Germantown Academy, and which will be known as the Buds Bicycle Club. The club will give weekly runs, probably on Friday afternoons. Valley Forge and other neighboring places of historic interest will be visited. There are 15 boys in the club. F. K. Deacon is the president.

Wilmington Cyclists to Organize.

Cyclists in Wilmington, N. C., are considering the organization of a bicycle club in that city. About 75 riders already have been interested and it is probable that the club will be formally organized within a few weeks.

CYCLISTS "KEEP FIT" ALL WINTER ON BASKET BALL TRAINING

The group at the left hand is the senior basket ball team of the Long Branch Cycle Club, of Long Branch, N. J. The other group is the junior team. As the winter alternative for cycling they have taken up basket ball as being better than non-athletic club diversions. Each team has made practically a clean sweep in competition with others of its class during the past winter.

Cycle Race in "All-Around" Challenge.

Bicycle racing is included among the 15 branches of athletic sports mentioned in the sweeping challenge issued by John R. Weber, of the Victorian College, Melbourne, Australia, offering to meet anyone in the events named for the all-around championship of the world. The challenge has been accepted by Charles Wilson, of Manchester, England.

Holds "Cop's" Coat for Security.

Anxious to borrow a civilian's bicycle in order to give chase to a criminal, a London policeman was accommodated on very unusual terms. The officer was allowed to take the bicycle, but he was compelled to leave his overcoat with the cyclist as security for the machine's return.

Shower Money on Cycle Policeman.

A bicycle policeman in Los Angeles, Cal., was hurt by being thrown while following a speeding machine. A committee of automobilists was formed and a purse of $1,000 was raised and presented to the injured man.

N. Y. A. C. Bicycle Committee.

Bicycle events conducted by the New York Athletic Club during the ensuing year will be in charge of a sub-committee composed of A. Parker Smith, J. H. McGinley and Godfrey P. Farley.

Trick Rider Bradley Joins Kaufmann's.

Wallace A. Bradley, trick bicycle rider, who has been connected with a bicycle troupe in Berlin, Germany, has returned to the United States to take the place of his brother in the Kaufmann troupe of trick riders. His brother was injured several days ago and will be unable to perform for some time.

Moran to Stay the Season in Europe.

James Moran, the American pace follower, has decided to remain in Europe all this year, and will do considerable riding on the German tracks. He has engaged as his pacemakes, Lauthier, who formerly was the pacemaker for Nat Butler.

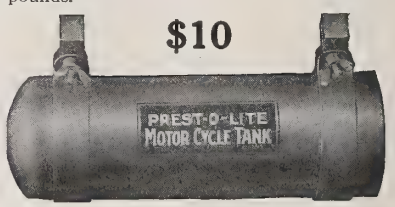
Good Light Costs Less Than Accidents

Unless you can see the ruts, bumps, holes and obstacles along your path at night, you are exposing your machine, yourself and possibly a passenger, to constant risk of serious accident. One such accident would cost you more than a whole year's supply of Prest-O-Lite.

PREST-O-LITE Gas Tank



Shows up every detail of the road, and floods it far ahead with strong, unwavering light, which you turn on and off like a gas jet.

The Prest-O-Lite Tank gives you 40 hours of steady, dependable light (using a ¼ ft. burner) at a cost of less than a penny an hour. When empty, exchange it for a full tank, at a small fee. No dirty work, no uncertainty of light flaring up or dying out, and yet Prest-O-Lite service costs no more—usually costs less—than the carbide which a generator consumes.

Remember, too, that the genuine Prest-O-Lite Tank is in universal use and demand, and is always saleable for about what you put into it. It is the **only** tank that, when empty, can be promptly exchanged, **anywhere and always.** Don't let anyone give you a counterfeit—you may not be able to "pass" it.

A Few Words on Brakes

particularly those in

The 1911 READING STANDARD

The inadequacy of the self-contained hub brake has been too often proven, but still the Reading Standard is the only American made motorcycle to fully provide against this weakness.

In addition to the best hub brakes obtainable, the 1911 R-S is equipped with a powerful, foot-operated brake working on the belt rim.

This brake, with 5½ square inches of effective surface acting near the wheel rim, is at once the most powerful and flexible brake ever put on a motorcycle. This is but one of 35 distinct and exclusive features that make

THE READING STANDARD

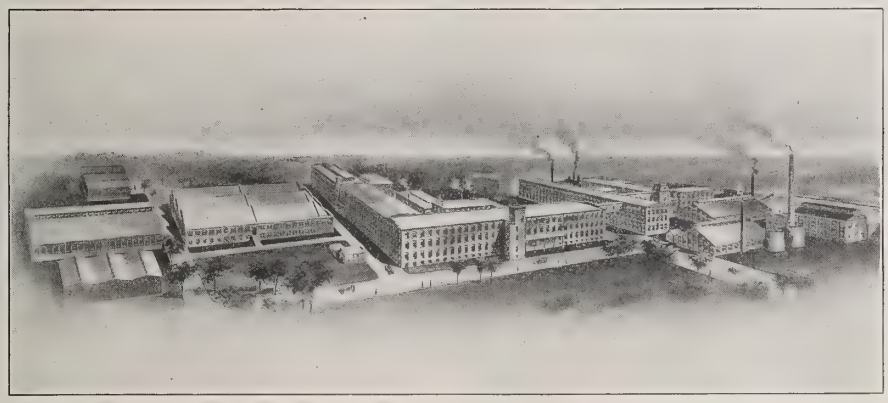
the finest motorcycle in the world. Our catalog tells about the others. Write for it today.

READING STANDARD COMPANY, 310 Water St., Reading, Pa.

ARE YOU READY

for the opening of the Spring Season with your shelves stocked with

New Departure Coaster Brakes



New Departure Bells

New Departure Cyclometers

and your counters, walls and windows showing

New Departure Signs, Booklets

FOLDERS, ETC., ETC.

The demand for New Departures was never so extensive as now. Our big factory has been running twenty-three hours a day, six days a week for months, filling orders. We have been busy before, but never like this.

WHY? Because the New Departure coaster brake is better made than ever before. Progress in the art of treatment of the steel has resulted in important improvements that make all the wearing and working parts practically and actually tool steel—indestructible.

The design remains the same so that all parts of the present model are interchangeable with parts of models for several years back.

One dealer writes, "The 1911 refinements have given us a faultless brake." Another writes, "It is 100 per cent better," etc., etc.

The dealer who stocks New Departures offers his customers the best. The dealer who does not stock New Departures is surely driving trade to his competitors.

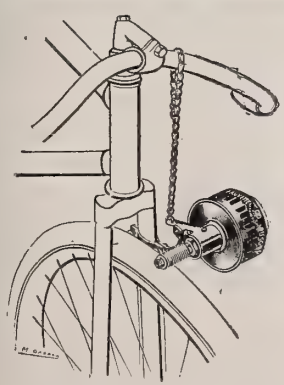
The New England Racer Price $55

A WINNER

Fast Strong
Light Snappy

The Only Bicycle in the World Built for Sprint RACING on Small Board Tracks.



Three Reasons Why

First. It brings the rear wheel four inches closer to the hanger, bringing more weight on the rear wheel, and relieves the strain from the front wheel and forks. This will be appreciated by all track riders, as it is a well established fact that in order to acquire any great amount of speed on tracks with sharp turns, it is essential to have all possible weight of the rider on the rear wheel.

Second. The **New England Racer** uses from 14 to 19 inches less chain than the average racing models. This is a big factor in racing, as a long chain is bound to swerve, and if not kept tight will jump the sprockets or catch on the top of a tooth and break. This is a frequent occurrence on board tracks. On the **New England Racer** the chain can be adjusted as loose as the rider desires without the least danger of jumping the sprockets or breaking.

Third. The rear stays being much shorter, are stronger, and will prevent the sprockets from pulling out of alignment with each other under great strain.

Well made, durable and sold at attractive prices.

Here is a quartet of

KOKOMO Bicycle Tires

that fully meet the spring situation.

Kokomo Defender Special

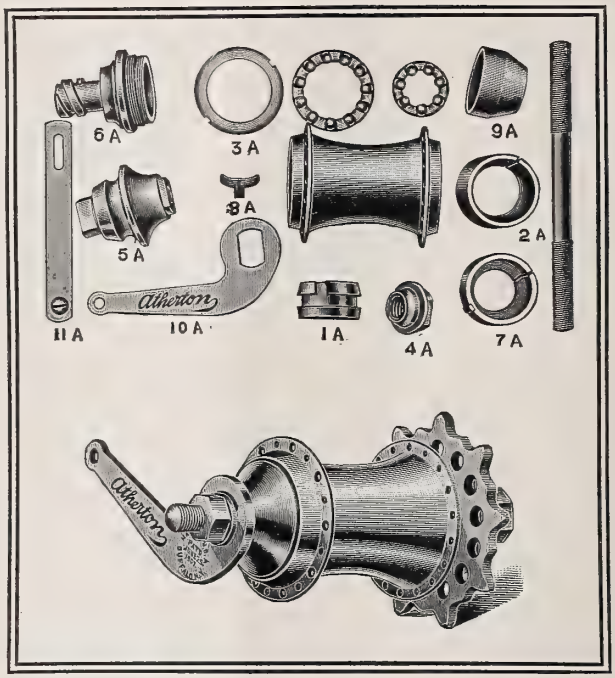
This popular guaranteed tire is specially designed and constructed for road use. It is made from the best materials obtainable, being carefully built up by hand with pure para inner tube, and, owing to the very high quality of the inner tube used, a puncture is very easily repaired.

Kokomo "New Oxford"

A medium price tire, yet so good in quality that it does not do it justice to call it a medium grade tire. We have built these tires so that in case of puncture they will not be worthless but can be repaired. Also furnished in smooth tread.

Kokomo Dotted Tread

A tire that prevents skidding and is safe and reliable on wet, slippery roads and city streets. Of high quality and careful construction. Furnished in road weight or in thick tread.



Kokomo Guaranteed Red Thorn

Made of red rubber, is extra heavy and is built especially for long service.

Are you profiting by what we offer you in Kokomo Tires?

KOKOMO RUBBER CO., Kokomo, Ind., U.S.A.

Greater Development and More Simplicity

mark another advance in coaster brake construction, as exemplified in the

CONCAVE ATHERTON

More efficiency, with longer life, appeals to everyone, and this is the brake that can show both cause and effect so far as these qualities are concerned.

Saving Tire Money for Riders Increases Dealers' Business

The Goodyear Pathfinder Single Tube Tire is the biggest-value bicycle tire that *can* be offered to riders.

For it is made of the finest grade of new Para rubber; it gives greater mileage than any other bicycle tire—hence the tire cost per mile is *cheapest* with the Goodyear Pathfinder—it costs far less than any other in the end.

The **Goodyear Pathfinder,** because of its tube of new Para rubber, can be repaired quickly either by plugs or vulcanization.

Thus the rider whose bicycle is Goodyear-equipped saves money on tires and dispenses with repair difficulties—he gets tremendous satisfaction from his tires.

That means a repeat order for the dealer who sold him **Goodyear Pathfinder Bicycle Tires.** The pleased rider is a constant, steady advertisement—a business producer—for that dealer.

That's why dealers in **Goodyear Pathfinder Single Tube Bicycle Tires** are doing a big business on this product alone—are making big money by selling them.

Our **Pathfinder Non-Skid Extra Heavy Bicycle Tire** means additional business for dealers. Its block tread forms a vacuum upon contact with slippery streets and *prevents skidding and side-slipping.*

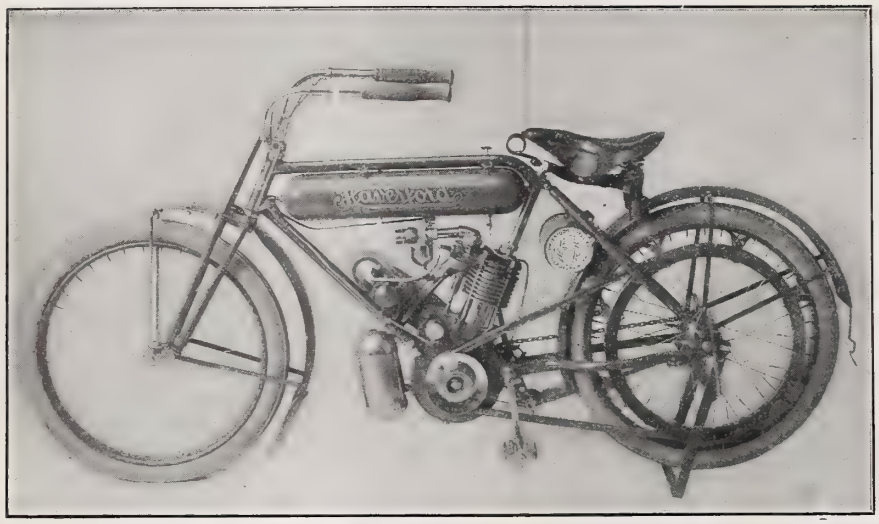
Please note from the illustration how the construction of these two business-producing tires give durability greater than any other tire.

In addition to the finest new Para rubber, the special closely-woven Egyptian fabric is superior to that of ordinary tires. A strip of this fabric one inch wide has a tensile strength of 150 pounds, while that of the ordinary muslin used in commonplace tires is but 40 to 60 pounds.

The rim side of the **Pathfinder Non-Skid Tire** is pebbled so as to give the rim-cement a tight grip—this abolishes the possibility of "creeping."

The reinforcing strip is made of toughened rubber that preserves the resiliency and gives additional resistance to wear.

These facts are of vast importance to the rider—hence taking advantage of them in your business means a decided increase in sales.



That is our message to dealers—it means something to *you.* Write us today.

THE PERSONS MANUFACTURING COMPANY

WORCESTER, MASS.

THE OLDEST SADDLE MANUFACTURERS IN THE U. S. A. ESTABLISHED 1892.

You read last week of the way

Diamond MOTORCYCLE CASINGS

are manufactured. Why our exclusive methods produce casings that give you staunch endurance and greatest mileage with unusual resiliency.

We tell you now how Diamond inner tubes are made.

As an inner tube has no foundation of fabric like the casing it cannot be stronger than the crude material from which it is constructed.

Pure Para rubber refined by exclusive Diamond methods is the only rubber good enough for Diamond tubes. It makes them strong and tough and durable.

Diamond tubes are so made that they can be and are inspected both inside and outside. This double inspection insures you against defects. It is our own exclusive method.

As the finishing touch we wrap each Diamond tube in tissue paper and pack it in an individual box. This protects the tube from injury in transit or on the dealer's shelves.

The best motorcycle casings—Diamond—demand the best tubes—Diamond.

The Motorcycle Business is no longer a Game—it's an Industry

There may have been a time when the motorcycle business was looked upon by many as a game. Maybe it was a game then, but if such is the case one thing is certain, that is that Harley-Davidson dealers played with marked cards—they couldn't lose.

Motorcycles are here to stay. The demand is increasing daily and we are doing our part by forcing that demand by our national advertising. Municipalities, telephone and telegraph companies, gas, water and electric light companies, in fact large corporations of all kinds are buying motorcycles in quantities. Doctors, solicitors, collectors, farmers, R. F. D. Carriers, and men in almost every walk of life have found that the motorcycle greatly increases their efficiency and their earning power.

Harley-Davidson dealers are getting a big share of this business. They are selling a machine that has proved to be a success for commercial work. The fortunate ones who, a few years ago, took up the Harley-Davidson agency are reaping their rewards.

We are proud of the record made by Harley-Davidson dealers. Not one has ever gone out of business and not one has ever voluntarily given up the Harley-Davidson agency. There is just one reason for this: the Harley-Davidson agency is a big money maker.

We want a few more live dealers in towns where we have not yet made satisfactory arrangements. We have something more to offer than a mere "agency"—a business with a permanent future.

Harley-Davidson Motor Company

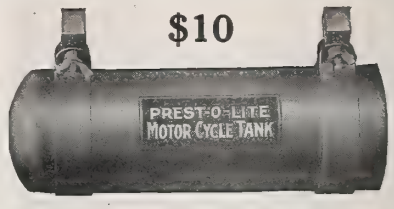
158 L Street **Milwaukee, Wis.**

The Best and Cheapest Light for Motorcycles

You probably know that the Prest-O-Lite Gas Tank is the standard equipment for automobiles. Why? Simply because it has proven more dependable, more efficient, and more economical than any other lighting system.

It has precisely the same claims on the motorcyclist! Its first cost ($10) is not alarming, when you remember that the genuine Prest-O-Lite tank is in universal use and demand, and is always saleable for about what you put into it.

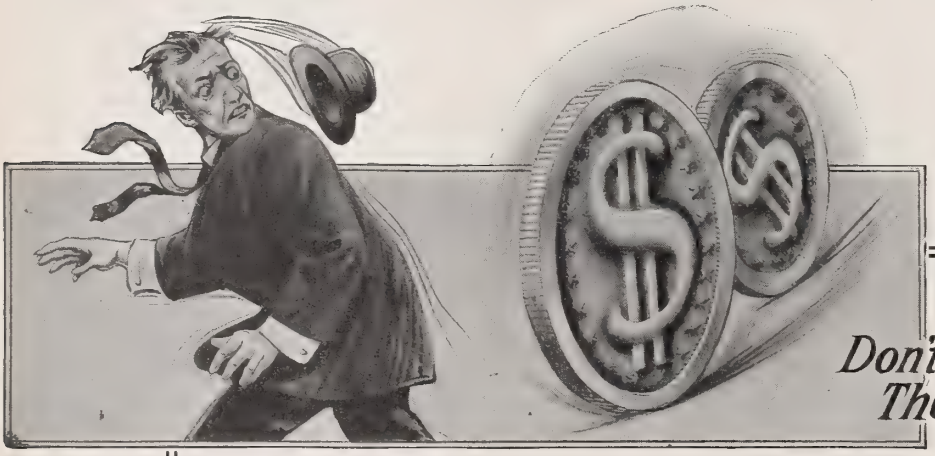
PREST-O-LITE Gas Tank



Floods the road far ahead with strong, steady light, turned on and off like a gas jet. Each tank gives over 40 hours of light (using a ¼ ft. burner), at a cost of less than a penny an hour. This clean, convenient Prest-O-Lite service costs no more—usually costs less—than the carbide a generator consumes.

Prest-O-Lite is the best and cheapest **accident insurance** you can carry. Feeble, uncertain lamps expose the rider to constant risk. One accident due to poor light would cost more than a whole year's supply of Prest-O-Lite.

The genuine Prest-O-Lite is the **only** tank that possesses a permanent cash value, and the **only** tank that, when empty, can be promptly exchanged, **anywhere and always.** Don't let anyone give you a counterfeit—you may not be able to "pass" it.



Write For Our FREE BOOK

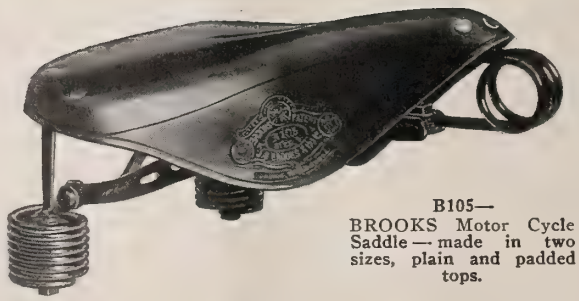
B104P—
BROOKS Motor Cycle Saddle—specially constructed to give a low riding position.

When

you sell a Motor Cycle there are many things will help you—none more than the

BROOKS SADDLE

for this, of all similar fitments, is the one saddle that will most strongly appeal to the buyer, and enhance his confidence in the machine which you are offering.



Why? Because the name of BROOKS is known throughout the world, and the saddle that bears it unapproached for its comfort-giving qualities.

Remember that this is the original and only genuine compound-spring Saddle—the only saddle embodying in its construction the springs that entirely absorb vibration within themselves and, by their compensating action, totally eradicate all tendency to bounce—the only saddle that will yield real comfort and true luxury awheel.

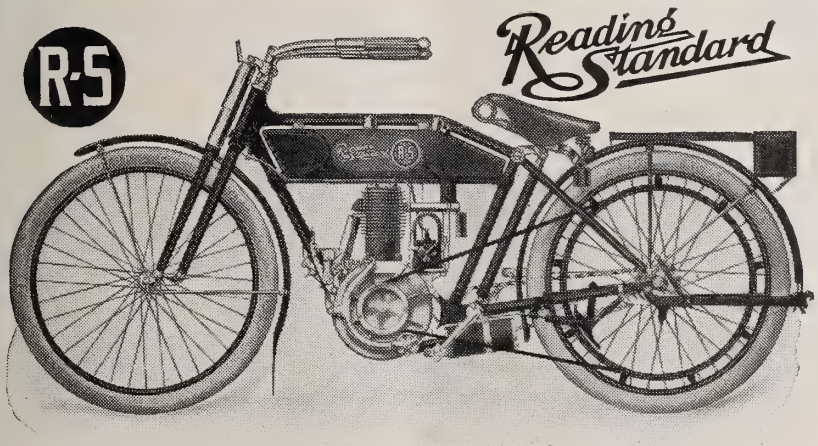
A Demonstration of Pope Quality

Pope Cones and Cases

HOW MATERIALS ARE TESTED

POPE QUALITY as applied to Pope Bicycles in the finished state is determined at the outset by the scientific methods of selecting and testing raw materials and by the various processes of treating these materials in order to adapt them perfectly to their particular uses.



The steel used in Pope Bicycles is selected only after scientific tests have shown that it contains the exact properties needed.

Various tests have proven that tool steel highly tempered throughout, such as is used in the bearings of most machines, is too brittle, but the Harveyized steel cups and cones such as are used on all Pope Nameplate Bicycles have been found to possess just the proper qualities. Pope cones and cases are cut from solid bars of steel and by our special process the bearing surfaces are case hardened, while the inner core retains its flexibility. This produces the toughness and perfect bearing surface which is necessary for a finely adjusted bicycle.

Are You in a position to demonstrate these and other points of Pope Superiority?

IF NOT WRITE TODAY FOR PARTICULARS AND TERMS.

THE POPE MANUFACTURING COMPANY, Hartford, Conn.

A Few Words on Brakes

particularly those in

The 1911 READING STANDARD

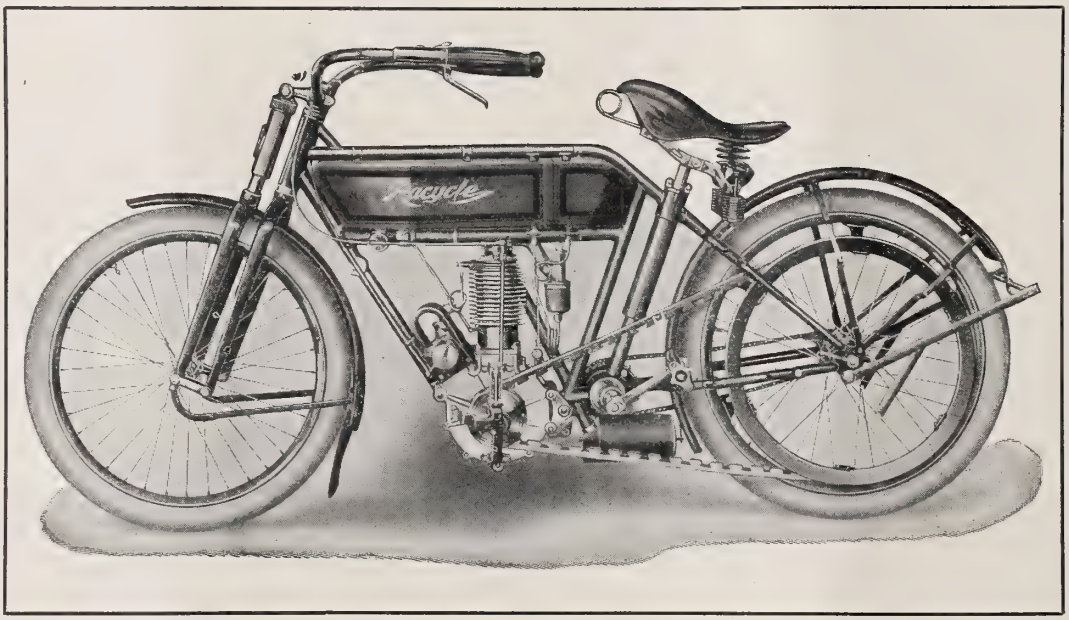
The inadequacy of the self-contained hub brake has been too often proven, but still the Reading Standard is the only American made motorcycle to fully provide against this weakness.

In addition to the best hub brakes obtainable, the 1911 R-S is equipped with a powerful, foot-operated brake working on the belt rim.

This brake, with 5½ square inches of effective surface acting near the wheel rim, is at once the most powerful and flexible brake ever put on a motorcycle. This is but one of 35 distinct and exclusive features that make

THE READING STANDARD

the finest motorcycle in the world. Our catalog tells about the others. Write for it today.



READING STANDARD COMPANY, 310 Water St., Reading, Pa.

WALKER BUYS CROUCH BUSINESS

Motorcycle Will Continue Crouch Name but Will be Changed Mechanically—Twin Model Coming.

Through the purchase this week by the Walker Motor Co., Danvers, Mass., of the Crouch Motor Co., of Stoneham, Mass., the first named place attains the dignity and prestige of a motorcycle manufacturing industry at the expense of its neighbor. Both are suburbs of Boston. While the Crouch will continue to be manufactured under that name, after the present stock is disposed of two new models, a 4 horsepower belt drive single, and a 7 horsepower twin will be marketed. W. J. Walker, who conducts a bicycle and motorcycle business in Danvers under the style of W. J. Walker & Co., is the "power plant" of the Walker Motor Co.

Made in one model, a 3 horsepower single with belt drive, and several features all its own, the Crouch attained somewhat of a local reputation during its prime, but never achieved a wide acquaintance outside its own bailiwick. For the past few years its manufacture was conducted on only a small scale.

New Departure Opens Detroit Office.

The New Departure Mfg. Co., of Bristol, Conn., is to open a western branch selling office in Detroit, Mich., on the 15th inst. It will be located at 1016-1017 Ford building. The company will maintain an engineering and sales force at the branch, who will be immediately available to customers in Detroit and the West. Secretary Page, of the New Departure company, invites members of the trade to make their headquarters at the branch office when in Detroit. Stenographic, telegraphic, telephonic and other conveniences will be provided especially for guests.

Hertzel Enlarges His Business.

Edward E. Hertzel, of Warren, Pa., who handles bicycles and bicycle supplies at 229 Pennsylvania avenue West, has purchased the Oil Field Supply hardware store in the same city and will combine the business of the two stores at 244 Pennsylvania avenue West. He will maintain a well equipped bicycle repair shop in addition to the bicycle sales department.

Pacific Coast Office for Miami.

A Western sales office in Oakland, Cal., has been opened by the Miami Cycle and Mfg. Co., of Middletown, O., for the sale of Racycles and Miami bicycles, Racycle motorcycles and Musselman coaster brakes. The branch is located at 152 Ridgeway avenue.

Will Make Bicycle Accessories.

Carbureters and bicycle accessories are to be the products of the Preston Carburettor Co., a new concern in Chicago, Ill., which has incorporated under Illinois laws with $50,000 capital stock. The incorporators are Charles F. Preston, David B. Graham and E. F. Patterson.

Ideal Takes Merkel for St. Paul.

The Ideal Auto Co., of St. Paul, Minn., has taken the St. Paul agency for the Merkel motorcycle. The company is located at 518 St. Peter street.

Swartz Has Three Marvel Counties.

E. H. Swartz, of Ellwood City, Pa., is the Marvel motorcycle agent for that district. His territory includes Lawrence, Butler and Beaver counties.

CYCLE MAKERS EXPAND FACTORY

Great Western Takes Steps to Meet Swelling Demand for Machines—Lets Contracts for an Addition.

A flood of business which has almost overwhelmed the capacity of the present plant is responsible for the letting of a contract this week for a four story brick addition to the factory of the Great Western Mfg. Co., LaPorte, Ind., makers of Adlake, American and Crown bicycles and Fauber hangers. The structure, which will be situated at the corner of Washington and Chicago street, will be 50 x 200 dimensions and will cost in the neighborhood of $10,000.

Fireproof mill construction will be used in the new addition. Each of the four floors will be divided into two rooms, and the entire floor space will be taken up by the stock, assembling and shipping departments. A large elevator, 9 x 12, enclosed in a fireproof shaft will provide transportation to all floors. Ground will be broken shortly, and the building is expected to be ready for occupancy in September. Increased shipping facilities also have been provided at the factory by the building of a 450 foot side track which accommodates ten cars.

Is Now American Tire & Rubber.

What was formerly the Factory Auto Supply Co., of Chicago, Ill., is now the American Tire & Rubber Co., and with the change in name the company has increased its capitalization from $10,000 to $25,000. It handles motorcycle and automobile tires exclusively. The concern was organized in February, 1910, by C. W. Stephens.

A THRIVING MOTORCYCLE STORE IN DETROIT, MICH., WITH A DOORWAY NOVELTY.

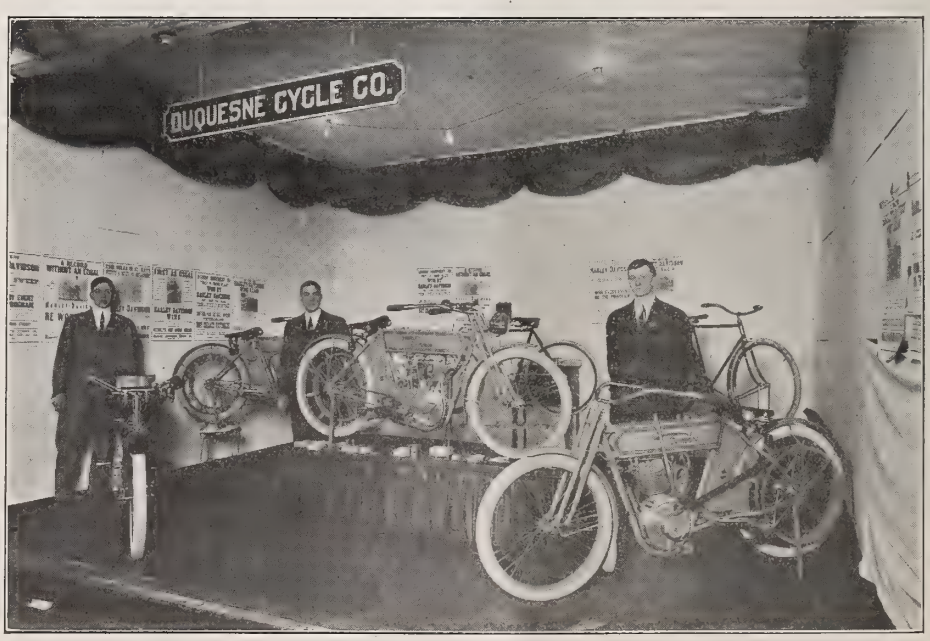
The views show the exterior and interior, respectively, of the establishment of Wm. E. Wandersee, 129 Gratiot avenue, who is the Michigan agent for Merkel motorcycles. As may be seen in the first illustration, Wandersee has cleverly utilized a blank wall space by his door, for a striking Merkel track racing scene.

Why One Dealer Now Discounts Advice.

"It's all very good to ask advice from your friends now and then, but seize it from me, it is a wise dealer who runs his business according to the dictates of his own mind," remarked a dealer one day this week, while in a reminiscent mood. "I know what I am talking about, too," he went on, "for I had an experience this past winter that has soured me completely on outsiders' advice as far as my business is concerned.

"Around show time I about had decided to take on a certain well known belt machine which is pretty popular hereabouts. I talked things over with the sales manager and practically had the deal closed, but decided to ask some friends who knew the machine what they thought of it before I signed up. One of those I asked was a dealer who had handled it in another state last year and had thrown it up.

"Of course he 'knocked' it. Said that it wouldn't climb hills, and that the concern did not treat dealers right. Then I asked another fellow, not a dealer but a rider, and he also said that the machine was no good on hills. Both admitted that it was a neat looking, quiet, easy riding machine, but they said when it came to any fairly stiff hills that the machine 'wasn't there,' and that it was a case of pedal, and often of get off and walk.



"Despite these unfavorable opinions my conscience told me to close for the machine, but I let myself be guided by what the other fellows said and told the people I was dealing with, next day, that I had decided not to take on their machine. They said, 'All right,' and promptly gave the agency to another fellow in town who was only too glad to get it.

"Well, that firm has brought out a twin now that will climb anything this side of creation, while the single is not so bad on hills as I was told, as I have observed. Here is where I am kicking myself. The fellow who took on the machine is selling them as fast as he can get them and he is putting them out in bunches, too, while poor me, I am selling the machine I am handling but can't get deliveries. No, sir! Never again will I throw down any machine no matter how bad it may be, on the word of somebody else, even if he is my best friend. I'll decide for myself hereafter, when it comes to running my business."

"Flexible Enamel" for All Weathers.

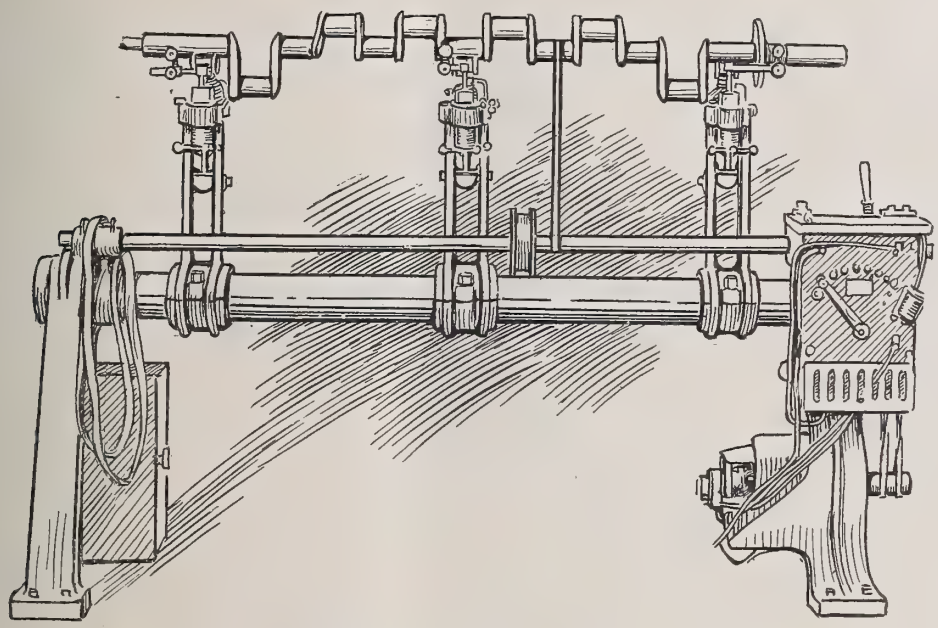
An English enameling expert has compounded what he calls "a flexible enamel" for all weather machines which enjoy some degree of popularity in that country. The preparation, it is claimed, is very elastic and impervious to the weather, and mud and dirt may be washed off it without leaving the usual scratches. It is said to cost no more than the ordinary enamel, and because of its non-chipping and its durable qualities, to be preferable in some respects.

MOTORCYCLES AS STAGED AT THE PITTSBURG SHOW.

The only motorcycle exhibit at the recent automobile show in Pittsburg, Pa., was that of the Duquesne Cycle Co., the Pittsburg agent for the Harley-Davidson. On the first day of the show, three single cylinder magneto model Harley-Davidson machines were sold, although on that day there was not a magneto model at the show. T. C. Donahue, the manager of the Duquesne Cycle Co., is shown as the center of the trio, with I. G. Natcher at the left of the picture and Charles Clements at the right. The display also contained bicycles as well as motorcycles.

BALANCING ROTATING PARTS

Factor that Causes Engines of Same Brand to Differ—Ingenious Machine that Overcomes One Difficulty.



Balancing of the rotating parts of motorcycles long has been recognized by designers and engineers as absolutely essential to the proper running of such high speed mechanism, and while closer attention now is being given to this operation than ever before, it nevertheless is a fact that the art of proper balancing a gasoline motor still is very much of a problem. The proof of this statement is to be had by taking two engines of the same make, supposedly identical in every respect and perfectly balanced when at rest, and running them at a speed slightly in excess of normal, when they will show surprisingly different degrees of vibration.

That the discrepancy is due to slight inequalities in the density of the metal forming crankshafts and flywheels, and particularly the latter, is the gist of an opinion which has for some time been growing in the minds of the foremost designers.

It may readily be understood that a flywheel which is out of balance—even if only slightly so—will have a decidedly bad influence on the operation of the motor. Formerly such inequalities were located by suspending the flywheel and removing a small portion of the metal from that part which came to rest at the lowest point after the wheel had been revolved and allowed to stop. By repeating this operation a number of times a point is reached where the wheel shows no tendency to come to rest at any particular point, but in spite of the fact that it palpably is balanced when at rest or revolving slowly it may be badly out of balance when revolving more rapidly, causing an objectionable vibration.

This is due in part to the inaccuracy of the method, as a result of which only the more serious faults can be discovered, and in part to the mechanical principle that a series of particles which are so arranged about a common center as to be in equilibrium when acted upon by the force of gravity alone, still may be unbalanced when under the influence of centrifugal force.

As the centrifugal force of revolving bodies increases in proportion to the square of the number of revolutions, it may readily be seen that even small heavy spots in the periphery of the flywheel will have comparatively great effects on the running of the engine at the speeds which are common in present day practice. Nothing could show more conclusively the importance of balancing flywheels and other rotating parts while they are revolving, and for this purpose an interesting machine has been perfected by the Norton Grinding Machine Co. which is designed to permit any rotating body to be tested for balance while in motion.

NORTON VIBRATION TESTER AND BALANCE FINDER

In principle the method employed is merely that of rotating the body to be tested at varying rates of speed while it is mounted in bearings which are so contrived as to permit it to vibrate according to its inclination and without restriction. The amount of eccentricity of its motion is determined by fixed pointers which are arranged to inscribe marks upon its surface at points of extreme "throw."

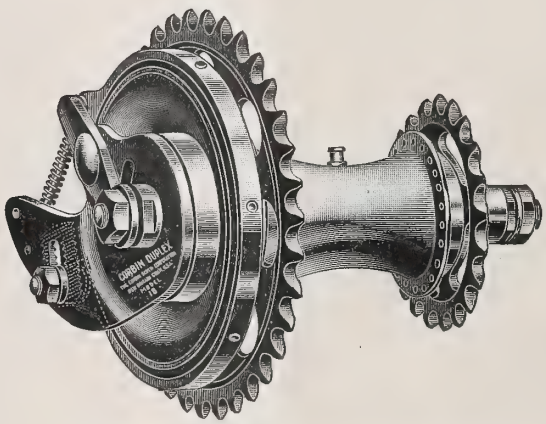
The machine as adapted for the testing of multi-cylinder engine crank shafts, which is shown by the accompanying illustration, is not unlike a large lathe and is provided with rests for crankshafts or flywheels, as the case may be, and a variable speed electric motor, by means of which the object under test is revolved. For the testing of long shafts, three rests are provided, one at each end and one in the center. The shaft rests at these three points on small rollers set in cradles and these in turn are mounted on upright steel rods. The rods are carried in rubber disks which permit them to vibrate to a certain extent and pointers or index fingers are mounted on the rods so as to vibrate with them and magnify the amount of vibration so that it is readily discernible. When the shaft is to be tested it is revolved at that speed where the greatest amount of vibration is indicated by the pointers. Also carried on the rods which carry the supporting rollers there are scribers or markers which are slowly advanced toward the shaft till they mark it. When a mark has been made with the shaft running in one direction, it is run in the opposite direction and marked, the inequality being somewhere between the two marks. Thus having located the inequality it is merely necessary to remove or add a little weight, as the case may be, until the shaft revolves without vibrating. Though the testing of flywheels necessitates slightly different apparatus, the principle is the same and may be applied to any of the other rotating parts.

Protecting the Valuable Accessories.

Now that motorcyclists are beginning to indulge themselves in expensive accessories such as speedometers, electric horns and lens mirror lamps, it seems rather poor policy to leave such devices open to theft by anyone who comes along with a screwdriver or wrench in his clothes and is on the lookout for easy picking of the sort. It safely may be predicted that before long the light fingered gentry who have made a specialty of purloining lamps, robes and other fittings from motor cars will turn their attention to motorcycles when they realize that it is worth while. When an accessory is stolen it may as well be given up for good, for rarely if ever has it any distinguishing marks by which it can be identified among others with certainty. One of the best ways to protect from theft those fittings that are intended to be left on a motorcycle for a long time, is to heat the ends of the attaching bolts, together with the nuts, after the latter have been screwed up, with a blow torch and then sweat the nuts and bolts with solder. This will prevent the nuts being removed without heating them to melt the solder. Another way is to head over the ends of the bolts so that the nuts cannot be backed off. This method entails the filing down of the head of the bolt when it is desired to remove the nuts.

Sleeve Straps of Rubber Bands.

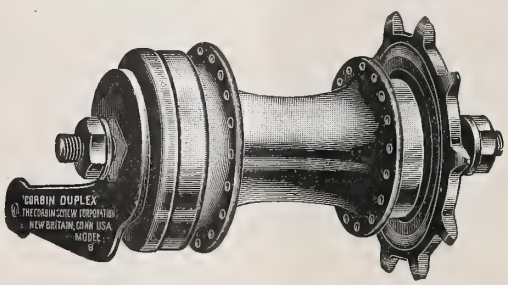
Rubber bands make a good substitute for wrist sleeve straps to draw the sleeve close around the wrist and prevent the cold air from shooting up the sleeve and chilling the arms in riding against the wind or in cold weather.



The demand for Corbin brakes is this season more than double what it ever was before. Corbin quality and satisfaction cause that demand.

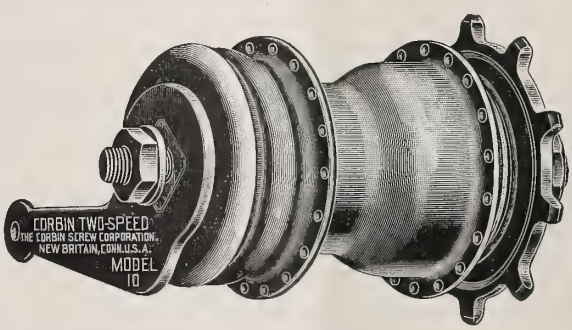
THE CORBIN SCREW CORP. CORBIN NEW BRITAIN, CONN. U.S.A.

CORBIN



Corbin V-Band Motorcycle Brake

Built on a scale commensurate with the duties of a high speed motorcycle brake.



Corbin Duplex Bicycle Coaster Brake

In every part and function a truly perfect coaster brake.

Corbin Two-Speed Coaster Brake

Giving the cyclist high or low gear at will, together with coasting free wheel and efficient brake.

Instruction as to "Free Engines."

Dealers selling motorcycles that are equipped with free engine clutches, or who fit these devices to direct drive machines, will find it to their advantage to teach the owners how to operate them properly, and not turn them loose to acquire the knowledge through experience. Numerous instances are observed where green riders are given no advice or lessons with these clutches, and they are racing their engines at terrific speeds and slamming the clutches in full tilt so that when the clutch "bites" the engine stalls or the machine jumps ahead as if shot out of a gun and the rider is snapped like a whip.

Even though a dealer may profit in the beginning, by letting his customers burn up their engines and run up big repair bills, there is likely to be ill-feeling caused when such expenses are incurred, if the dealer can be blamed for failing to teach his riders how to operate a clutch properly. Dissatisfied riders also will not be slow to "run down" clutches, if they find that they are burning up their engines, and this dissatisfaction is sure to have its effect on a number of riders who are using rigid drive machines and who are waiting to see how the free engine clutches turn out before having them fitted.

To have the word noised about that a certain machine is very expensive to maintain, and that repairs are high and frequent, is not to the advantage of the dealer handling a machine so referred to. Abuse of the free-engine clutch is a great booster of repair bills, and in this respect may gladden the heart of a dealer, but when riders begin to reckon the cost, this way of stimulating business is likely to prove a boomerang.

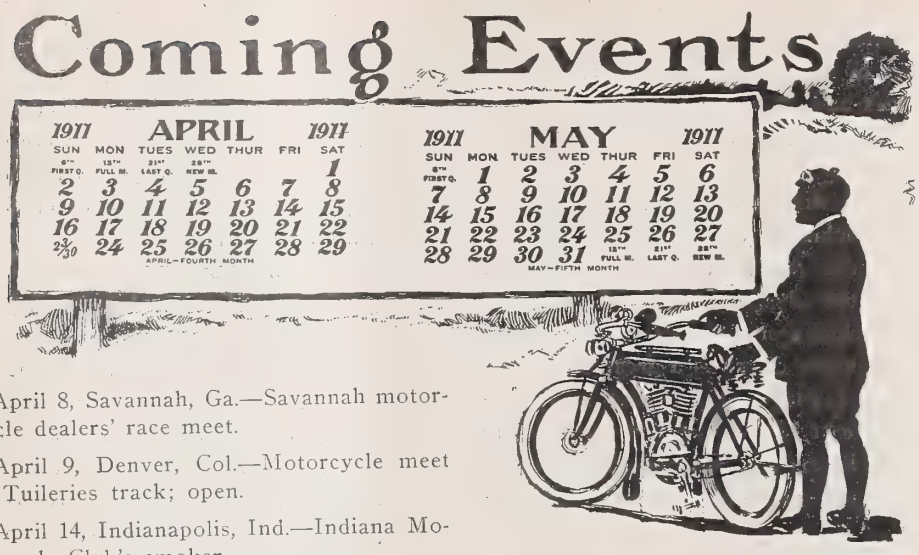
Demonstrations on Sunday Runs.

Progressive dealers are finding fertile fields for developing purchasers of their particular machines by participating in club runs and inducing old riders of other makes to change over and try the machine the dealer is riding on the run. Such demonstrations are quite convincing, because the rider who tries a machine of a different make than his own under such conditions is able to judge just what the machine will do in competition with other makes and the average rider always is seeking just this very information.

A long distance demonstration of this sort has many advantages over the average ride around the block which the veteran receives when he goes to the dealer's store to try out a machine. Not only is he able to inform himself of the speed and hill climbing abilities of the motorcycle under test, a prime essential with a great many riders, but he also is able to learn how the machine rides on rough roads, how the spring suspension acts, how the carbureter and the mechanical oiler work and whether they keep working well under all conditions. He learns more about a machine in general than he would in half a day's riding around the block.

As for the dealer, he is turning to account what otherwise would be time wasted, and he is on the spot with his prospect ready to inform him on any point or help him out of trouble. He also benefits by familiarizing himself with another make, and can, if he chooses, learn in what respect it is superior or inferior to the machine he is handling, all of which is valuable to him in talking to customers who make comparisons with other makes. Where a dealer either is trying to increase his sales of an already well known machine, or is introducing a new make and can spare the time to take in Sunday club runs, he will find it well worth while. Several instances may be cited where sales were due directly to this practice of persuading riders to try a make of machine other than their own on a club run.

Racing and Its Inevitable Perils.



As usual in the case when a contestant is injured in a motorcycle contest, be it on road, track or hill, there always are critics who rise up to remark that the accident will kill further events of the sort in the section where it occurred. It therefore is not surprising that such predictions should have been made concerning road racing, following the accident on the Motor Parkway on Long Island on Sunday.

In this case remarks were overheard to the effect that when such an experienced rider as Goerke is injured, it is time to stop road racing. Such critics seem to forget that accidents are part of the risk that riders take in any form of motorcycle speed competition, and the fact that a well known rider should have been injured is not sufficient reason for the abandonment of road races. Goerke has participated in road races before without injury, and that he should have come to grief on this occasion simply is part of the fortunes of racing.

The same accident might have happened to any rider in the race, and it simply was his misfortune to be the victim. The fact that the many instances where riders have been injured and killed in track racing has not put a damper on this branch of the sport is sufficient proof that road racing will continue to prosper despite accidents. The hue and cry against racing that is raised by unthinking persons whenever a rider is hurt is unwarranted, for all riders are well aware of the fact that if they persist in racing they will "get theirs" sooner or later, and when they are unwilling to risk injury they should quit racing.

"The noise of the motorcycle is evidence of spring," says the Hartford (Conn.) Courant. Either the open muffler fiend is abroad in the Nutmeg capital, or else the Courant bases its observation on the racket made by some old crock as it wheezed along. No longer are all motorcycles noisy, when they are operated properly, as anyone interested may learn by observation of the new machines that are appearing in increasing numbers every day.

Coming Events

April 8, Savannah, Ga.—Savannah motorcycle dealers' race meet.

April 9, Denver, Col.—Motorcycle meet at Tuileries track; open.

April 14, Indianapolis, Ind.—Indiana Motorcycle Club's smoker.

April 15, New York City—Annual reunion dinner of the Century Road Club of America, at Raub's, 8 Nevins street, Brooklyn, N. Y.

April 16, Newark, N. J.—Opening bicycle race meet at the new Newark Velodrome.

April 16, New York City—Century Road Club Association's ten mile handicap road race, Floral Park, L. I.; open. Rain date, April 23.

April 18, Buffalo N. Y.—Motorcycle Manufacturers' Association meeting at Hotel Statler, 10 a. m.

April 19, Boston, Mass.—Boston Motorcycle Club's fourth annual Patriots' Day run to Worcester; open.

April 19, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Providence, Boston and return; 136 miles. First section.

April 21, Redlands, Cal.—Mile high motorcycle climb.

April 23, New York City—Motorcycle Touring Club of New York's first cup trio-trial, Newburg and return, 150 miles; open.

April 30, New York City—Eastern Division C. R. C. A. spring century; open.

May 7, New York City—Harlem Motorcycle Club's club championship races at Brighton Beach track.

May 7, New York City—Empire City Wheelmen 15 mile handicap bicycle road race, open, starting from Floral Park, L. I.

May 7, Chicago, Ill.—Second annual reliability run of the Chicago Motorcycle Club to Waukegan, Libertyville, Elgin, Aurora and return.

May 7, New York City—New York Motorcycle Club's annual double spring century run to Southampton, L. I., and return.

May 14, Guttenberg, N. J.—Opening motorcycle race meet on Guttenberg track.

May 14, New York City—Century Road Club of America, New York State Division, spring bicycle century run.

May 21, Baltimore, Md.—Crescent Bicycle Club's spring 50 mile pleasure run.

May 21-22, Seattle, Wash.—Two day endurance contest of the Seattle Motorcycle Club to Vancouver, B. C., and return.

May 24, Toronto, Canada—Toronto Motorcycle Club's endurance run to London and return, 256 miles; open.

May 28 and 30, Chicago, Ill.—North Shore Motorcycling Club's two day race meet on Hawthorne track.

May 28, New York City—Century Road Club Association's 30 miles handicap road race, Floral Park, L. I.; open. Rain date, June 4.

May 28-29-30, Cleveland, O.—Three day endurance run of Cleveland Motorcycle Club

May 29-30, Newark, N. J.—Twenty-four hour endurance run of the New Jersey Motorcycle Club to Atlantic City and return.

May 30, Chicago, Ill.—North Shore Motorcycling Club's race meet at Hawthorne track; open.

May 30, Bridgeport, Conn.—Bridgeport Motorcycle Club's race meet.

May 30, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

May 30, Norwich, Conn.—Norwich Motorcycle Club's reliability run.

May 30, Springfield, Mass.—Motorcycle race meet of the Springfield Motorcycle Club, at the Springfield Stadium.

May 30, Elmira, N. Y.—Elmira Motorcycle Club's first summer race meet.

May 30, Newport News, Va.—Peninsula Motorcycle Club's endurance run to Richmond and return.

May 30, Long Branch, N. J.—Long Branch Cycle Club's second annual road race meet; open.

May 30, Asbury Park, N. J.—Twenty-five mile road race of the Monmouth Cycle Club.

May 30, Plainfield, N. J.—Third annual 25 mile handicap cycle race of the Plainfield Cycling Club.

May 30, Grand Rapids, Mich.—Bicycle and motorcycle races at Michigan State Field Day, under auspices of the Western Michigan Cycle Club.

June 4, New York City—Concourse Motorcycle Club's fourth annual run to Savin Rock, Conn., and return; open.

June 4, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Greenfield, Springfield and return; 175 miles. Second section.

June 18, Baltimore, Md.—Crescent Bicycle Club's annual spring road race.

June 18, Floral Park, L. I.—Century Road Club of America, New York State Division, 50 mile handicap bicycle road race; open.

July 3-9, Rockford, Ill.—Racing carnival of the Illinois-Iowa Motorcycle Association.

July 4, La Salle, Ill.—Third annual open motorcycle race meet of the Illinois Valley Motorcycle Club.

July 4, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

July 4, Savannah, Ga.—Savannah Motorcycle Club's race meet.

July 4, Asbury Park, N. J.—Opening motorcycle meet at the Asbury Park track.

July 4, Grand Rapids, Mich.—Annual open bicycle road race of the Western Michigan Cycle Club.

July 16, New York City—Motorcycle Touring Club of New York's second cup trio-trial, Newburg and return, 150 miles; open.

August 1-2-3-4, Atlantic City, N. J.—Summer meeting of the Cycle Parts and Accessories Association and the National Association of Cycle Jobbers.

August 6, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Rockport and return; 200 miles.

August 20, Grand Rapids, Mich.—Annual open, six hour, two man bicycle team race of the Western Michigan Cycle Club.

September 10, New York City—Century Road Club Association's 100 miles record run; open. Rain date, September 17.

September 17, New York City—Motorcycle Touring Club of New York's third cup trio-trial, Newburg and return, 150 miles; open.

September 24, New York City—Century Road Club of America 100 mile bicycle record run, open, from Floral Park, L. I.; rain date, October 1.

October 1, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Springfield, Boston and return; 200 miles.

THRILLING FINISH IN PARKWAY RACE

Constant Wins the 17 Mile Speed Battle on Long Island, with Brewer and Horn at His Heels—Goerke Crashes into the Fence, Breaking His Leg—Incidents and Sidelights.

Nailing the one remaining man in front of him 30 yards from home, and creeping past him inch by inch in a final struggle for supremacy that to the end was magnificent in its intensity, John U. Constant, of Brooklyn, riding a 5 horsepower Indian, won the 17 mile road race of the Motorcycle Touring Club of New York, Incorporated, on the Long Island Motor Parkway, on Sunday, 2d inst., in one of the most stirring race finishes ever witnessed in the East. Wilmot Brewer, of New York, who rode a 4 horsepower Indian, finished a length behind Constant, and Arthur Horn, Brooklyn, on a 5 horsepower Indian, was third, ten feet back of Brewer. The winner's net time was 17:06½, which averages approximately 1:00⅗ per mile. A blanket would have covered the first three men, who finished within three seconds of each other. Brewer's net time was 17:54 and Horn went the route in 17:09. As there were but three prizes the times of the other finishers were not taken.

J. Frederick, 6 horsepower Merkel, came in fourth, and Frank Hart, 6 horsepower Excelsior, followed Frederick across the line half a minute later. W. F. Stubner, 3 horsepower N. S. U., took sixth place; Charles Davis, riding a 4½ horsepower Marvel, came in seventh, and Marshall McAnerney, 5 horsepower Indian, was the last to finish. There were 14 starters, but the others either quit or else ran into trouble on the way.

The race was marked by one accident, in which Walter Goerke was the victim, through the failure of another competitor to observe the rules of the road. Goerke crashed into a low fence on the edge of the road while taking a right turn and sustained a triple fracture of the left leg below the knee. He was taken to the Nassau hospital at Mineola and later removed to the Bethany Deaconess hospital in Brooklyn, to be nearer his home. It will be several months before he will be able to walk without crutches, and he will not be able to ride until well toward the end of the season, if then.

In view of the large entry list, over 40 riders having filled out blanks, the large defection of starters was surprising. Although the start was set for 10 a. m., few of the officials or contestants were on hand at that hour, and it was half an hour later before the first man was sent away. A piercing wind, which always is on the job in April on the Hempstead plains, together with the cold which speedily numbed the fingers and toes and ears and noses of all who did not keep moving, made extra clothing particularly desirable. A log fire at the starting point finally was kindled by some who had a liking for creature comforts, and the spot quickly became popular with new arrivals who desired to toast themselves after their cold ride from the city. If some enterprising restaurateur had been on hand with coffee and sandwiches he would have done a land office business, but the commercial opportunity went begging. The handicaps and starting sheets were not made ready until the last minute, and there was general chaos at the start. At the finish, officials were more plentiful and things were a little better managed.

At 10:30 the first batch of riders, consisting of Frank Baker, 2¾ Indian, and E. Olsen, 2¾ Indian, were dispatched. They had the limit handicaps of 9:47. The next to go was W. F. Stubner, 3 N. S. U., who had a leeway of 6:57. There were no

GATHERING AT GREAT NECK LODGE, THE STARTING POINT

Previous to the start there was bustle and activity at Great Neck lodge, where the race started. Motors were tried out, carbureters adjusted, mufflers removed and a last general tuning up was done. There were about 100 machines at the starting point before the race commenced, but several of the non-contestants left for the finish before the race commenced, and at the latter point the largest crowd gathered.

That the race had gained some heralding among the general public was evidenced by the groups of pedestrians and automobile parties which gathered on the numerous bridges that span the parkway. No difficulty was experienced in keeping the course clear, as the non-contestants had been notified to keep off the road while the race was on.

Perhaps the point most open to criticism was the management of the contest. Several of the officials who had been appointed did not show up, and others arrived late. starters in the 3½ horsepower class, and the 4 horsepower division were the next to go. In this brigade there were Wilmot Brewer, 4 Indian; Joseph Buckinham, 4 Harley-Davidson, and Charles Davis, 4 Marvel, all of whom had 2:50 on the scratch men. Forty-seven seconds after this trio left the 5 horsepower class was released, with 2:03 handicap. It consisted of J. U. Constant, Arthur Horn and Marshall McAnerney, all on Indians. The starters in the 6 horsepower class, with 1:18 handicap, were Frank Hart, Excelsior; R. Steiner, Excelsior, and J. Frederick, Merkel. Then came the honor men, Goerke and Mills, on "7" Indians.

Because of the difficult nature of the course with its right and left "S" turns, its blind turns winding under bridges and its blind leaps over other bridges, there seemed to be a feeling among several that "something was going to happen," and some trailed along after the scratch men

left, on that very account, to give aid if necessary.

Owing to his not having fully recovered from a recent accident, some doubt was expressed as to Goerke's fitness for such a hard race. It was said that he had expressed his intention of riding for all that was in the machine, as the odds were against him, and he was cautioned against taking big chances.

Getting away like a streak, Goerke soon shook off Mills who started with him, and passed one or two others who had lagged after leaving. About five miles from the start Goerke came to grief on a right turn surmounting one of the bridges. There were no eye witnesses to the accident, but Arthur Klages who came along next saw the machine lying in the road, and looking around for the rider found Goerke lying at the bottom of the embankment 50 feet away from the parkway. Goerke was conscious and told Klages that he had a broken leg and to go to the nearest telephone and send a call for an ambulance.

Klages wanted to stay with Goerke, but the latter insisted that he go, so he went. In a short time Chairman Thornley came along, and upon learning the state of affairs went to a nearby house and procured a mattress and assistance and carried Goerke there. He also telephoned for an ambulance, but it was quite a while before one arrived. Goerke was conscious all the time but suffering great pain, of course. Dr. Thornley discovered a triple fracture. He fixed up a temporary splint for the injured member before the ambulance arrived and accompanied Goerke to the hospital.

Asked as to how the accident occurred, Goerke said that he overtook another contestant on the turn and that the latter pulled over to the left instead of keeping to the right. In so doing he crowded Goerke into the low fence which borders the roadway, and Goerke's left leg was smashed between the fence and his machine when the latter struck. Goerke then rolled down the embankment and his machine lay in the road until Klages came along. The other rider who was concerned is said to have stated later that some one tried to pass him and hit the fence. He heard a crash and looked back, and saw a machine in the road, but did not think that the accident was serious and kept on. He was considerably worked up when he learned that he had been the cause of Goerke's injury and was roundly berated by other riders for not keeping to the right side of the road. It was thought at first that Goerke's leg would have to be opened to wire the broken bones together, but, fortunately, this was not necessary. The bones were set on Wednesday. Motorcycle clubs and individual riders of New York and Brooklyn are arranging to keep his room supplied with flowers and reading matter during his convalescence.

A HIGH SPEED STRETCH ON THE PARKWAY

Advance "dope" on the race had picked Brewer as a likely winner, as his machine was known to be in prime form, and with some "go-fast" in the tank it had shown wonderful speed and staying powers. Constant was more of a "dark horse," and while he looked good for a place, few expected him to win. Brewer soon got into his stride and began to mow down the field in front in steady fashion. In the meantime Constant was doing the same thing, and by reason of a little extra power was slowly closing the gap of 47 seconds that separated him from Brewer.

With both men displaying good head work on the turns and bridges, Constant had to depend on his extra speed to close the gap. The pair flashed by slower and disabled riders, who in some cases shouted encouragement, but their voices were drowned by the roar of the engines. In the stretch past the grandstand Constant had Brewer in sight but still nearly half a mile away. At this point the race was three-quarters over, but Constant made the most of the good stretches for the next few miles and came up pretty close.

Occasionally Brewer looked back to get a line on the situation and this undoubtedly cost him several seconds in the aggregate. With a little more than a mile to go Constant had come up pretty close, but frequent turns prevented him passing Brewer, as the latter took the turns as fast as Constant. In the last mile Horn, who had been see-sawing with the other two for some time, was passed by both for the last time.

Brewer swung around the turn under the last bridge, about a quarter mile from home, only 5 yards ahead of Constant and Horn followed a second later. As he came into the straight Brewer took another squint back and sat up for an instant. Seeing Constant at his heels he ducked down and then commenced a grand battle royal between them, with Horn trailing close. When Constant pulled abreast of Brewer they fought it out neck and neck for perhaps 50 feet, and the former then began to go by. It was slow gaining, however, and Constant's margin of victory was only a length. The winner received a gold filled watch, a silver watch was the second award, and a gold medal went to the third man.

SOME ECHOES OF THE RACE.

Hillside avenue was lined with motorcyclists fixing tires or engines on the way home from the race. Several boys on bicycles gathered to watch one motorcyclist struggle with a punctured tube. They stacked their machines near the motorcycle and when one of them stepped back suddenly he knocked the machine over on top of the bicycles. They collapsed like a house of cards, and when the casualties were reckoned one bicycle frame was dented, another had a wheel wrecked, and another had a wheel buckled. It was with long faces that the youngsters pulled their machines away with them.

Motorcycle police in plain clothes were busy on Hillside avenue. Two well known riders who were towing two fellow motorcyclists who had broken down were "pinched." The officer said that he had followed them for four miles and that they had touched a 45 mile clip. One of the riders of the "live" machines said to the

arresting officer, protestingly: "Say, did you ever know a Blank machine that could do 45 miles with two men up?"

"That's what they all say," replied the officer as he took their names.

The riders on the disabled machines were not molested, but their Good Samaritan friends paid $5 each in court Monday morning. However, they felt that there was some consolation in the fact that motor car drivers were being assessed $25 and $50 for the same offense.

The lodge keepers on the Parkway did a rushing business in issuing permits to ride on the course at 50 cents per permit, the permits being good for one day only. One rider tried to slip by with an old permit on which he had changed the date, but the lodge keeper was wise.

A few well known motorcyclists sought to make an impression on their fellows by appearing with motor cars instead of their usual mounts. At least one of them had his troubles getting home. He almost rebuilt the car by the road side.

Most of the contestants in the race now are willing to testify that there is considerable difference between a track race and a road race. It requires nerve and skill to take "S" turns, blind turns and bridges where you can't see your way till you get there, at speed.

The more-or-less expected tire car did not materialize, but it was not greatly missed. There was very little tire trouble and none among the finishers, obviously. The first three machines were shod with G & J footwear and sparkled with Bosch ignition.

Frank Seery was the referee. He had no protests to worry about.

"Factory gasoline" was in not a few tanks, including the winners, so it must have "made good."

Despite all the advance worry about equipment, no machines were barred as not being stock.

Great was the surprise when it was learned that the lodges were not connected by telephone. It had been planned to use the line for timing the race.

Brooklyn's new swell club, the Invincibles, point with pride to the fact that Invincible members captured first and third places.

Denver to Have Live Track Racing.

Denver's opening motorcycle race meet, on April 9, at the Tuileries, has attracted a big field of entrants, including Glen Boyd, Earl Armstrong, Johnny Albright, Joe Wolters, Walter Goode and dozens of other old Denver favorites. W. R. Gilpatrick, owner of the Tuileries, intends to make motorcycle racing a big feature at that resort this year, and has left nothing undone to make the third-of-a-mile track one of the best dirt racing courses in the country. L. R. Miller, official referee for the Federation of American Motorcyclists, will be in charge of the events.

POLICE AT CONCOURSE BANQUET

Motorcycle "Cops" Were in the Friendly Role of Guests, However—Many Ladies Were Present.

Recognized since its institution as the banner social event of the year in New York motorcycle circles, the third annual banquet of the Concourse Motorcycle Club, which was held at the Hotel Gerard, 44th street, Wednesday evening, 5th inst., was marked by the largest attendance in its history, 83 members and guests being present despite the inclement weather. This year the representation from other local clubs also was noticeable, members of the New York and both of the touring clubs, as well as the C. R. C. A. and the C. R. C. of A., the two big cycling clubs, indicating a gratifying disposition of the metropolitan clubs to support each other's events in the social way.

It required four long tables to seat all of the guests, among whom were included many ladies, some of the latter being pioneers of their sex in taking up motorcycling. There also were present some of the well known motorcycle police who do duty in the Bronx, the stamping ground of the Concoursers. The blue coats have been a feature of all of the Concourse dinners, and tradition has it that a Concourse member never has been "pinched" for speeding in his home territory. It is said that the Bronx motor cops can spot a Concourse rider a mile away. Both the touring and racing branches of the sport as well as the trade were well represented.

An innovation introduced this year was table ping pong, which was played with toy balloons by the guests between bites. The waiters were kept stepping lively dodging the balloons and keeping plates of soup from colliding with waving arms. Some of the balloons exploded from too high compression, while others were punctured when some of the guests used forks as bats, instead of their hands.

Distributed among the printed promises of viands on the menu card, which ran the gamut of tempting dishes, were poetical satires on prominent members of the club. Following the coffee the oratorical exercises commenced. There was no set program, the toastmaster calling on whomsoever he thought would have something interesting to say. Most of those called on, however, were taken unawares, and while they made a brave effort to qualify their embarrassment was evident.

Not all of the speakers flunked, however. M. E. Toepel came well primed and related his experiences on a shopping tour in a department store in search of some calico which his better half had commissioned him to procure. The name of the color of the goods was turkey red, which was referred to frequently in his narration, leading one person to remark that the speaker was press-agenting a certain brand of cigarette. Toepel also gave a recitation which was well received.

A. G. Chapple told of some of his experiences in the South, and said that Northern roads were boulevards compared with those in the land of cotton. President Wise, of the affiliated touring club, spoke of the benefits of motorcycling and related some of his experiences. He hoped that machines suitable for ladies soon would be built.

Good natured "Jerry" Foley, the grand daddy of the Concourse club, was called on, but in acknowledging the invitation held up a big pitcher of brown "gasoline" nearly empty, and expressed himself as being "too full for utterance." He reminded the toastmaster that he might have been able to respond had he been called on earlier. Fred Horenburger, one of the pioneer riders in New York, pleaded guilty to being a backslider, having taken to motoring on the water.

Police Sergeant McNerny gave the Concoursers a clean bill of conduct this year. At the last banquet he advised them to ride a little slower once in a while. His advice apparently was accepted. Others who told how glad they were to be present and who hoped that they could come again were David Molin, Harry Mapp, Harry Gliesman, Frank Hart and George P. Jenkins.

President Sullivan of the Concourse club thanked the guests for their attendance and hoped that an even larger crowd would be present next year. He reminded his hearers of the Concourse run to Savin Rock, Conn., on June 4, and hoped that there would be a big turnout of riders. A heavy rain drenched those who attended last year's run, while on the way home, but they nevertheless managed to extract considerable fun from the wetting. Between talks there was music by an orchestra, the guests joining in the chorus occasionally. It was 1 a. m. when the merry party broke up after having spent a most enjoyable evening.

Topekans Are to Take a Club Room.

The Topeka Motorcycle Club, of Topeka, Kan., is making arrangements to secure a permanent club room. J. C. Hughes has been appointed captain of the club and Frank Stephens the rear guard. Applications for membership are being received by M. E. Harding, the secretary, 106 East Sixth street.

Riders in Napa, Cal., Organize.

Meeting at the rooms of the Eagle Cycling Club on the 31st ult., motorcyclists of Napa, Cal., organized the Napa Motorcycle Club, with the following officers: Albert Wilson, president; Emil Locarnini, vice-president; George Bernhard, Jr., secretary-treasurer; Otto Fisher, captain. The club held its first run on Sunday, 2d inst.

MATCH SPEED ON FLORIDA BEACH

Jacksonville Riders Burn the Pablo Sands in a Successful Club Race Meet—Fast Times Made.

Breaking even with two victories each to their credit, Felton Rawlings and Emanuel Wiesenfield, both riding Indians, were the stars of the Jacksonville (Fla.) Motorcycle Club's race meet on Pablo beach, on Saturday, 1st inst. Rawlings had a shade the best of the honors, however, as he captured the star events on the card, the ten and 20 mile races. Wiesenfeld accounted for the two and five mile events. In the two remaining races, Jonathan Yerkes, Thor, and A. L. Terry, Indian, were returned as winners. Terry also rode a fast exhibition mile.

Yerkes was the first to taste victory, showing the way on a Thor "4" in the five mile for private owners. Second berth went to Frank Powers, Merkel, and the third man home was Frank Thompson, Harley-Davidson. All of the four starters finished. With this preliminary, the speedfest got into its full stride and action began to come thick and fast.

Four lined up for the two miles for singles, trade rider class. Wiesenfield, on his "4" Indian had things his own way, and hammered out a victory easily. There was more of a scrap between Yerkes, Thor, and Stoddard, Merkel, for second pocket, the former slipping in ahead. Yeager, Indian, brought up the rear.

Wiesenfield repeated on the same machine in the five mile event for trade riders. Stoddard and Thompson, on Merkels, followed the winner in that order. This race brought out six starters.

One of the best races of the meet was the ten miles for singles, trade rider class. Here was where Rawlings on his Indian came into the spotlight by beating out Yerkes, Thor, in a driving finish. Havens, on another Thor, ran third.

Twin cylinders had the floor, or rather the beach, in the next event, at ten miles, open to trade riders. A. L. Terry, "7" Indian, blazed the trail all the way at a 59 second average, with the persevering Yerkes runner-up, followed by Yeager, Indian, and Stoddard, Merkel, in that order.

After riding as amateurs in the previous events, five men elected to forfeit their amateur status to compete in the stellar number on the card, the 20 mile professional for single cylinders. The $100 in cash was split $60, $30 and $10. Rawlings, Indian, collected the fat end of the purse, after a rattling good scrap with Warren, Harley-Davidson. Third money was gathered by Havens, Thor. With the regular card disposed of, by way of good measure, Terry on an Indian streaked an exhibition mile on the wave washed sands in 47.40.

The beach was in good condition, and while no records were broken, the time was fast for stock machines. All of the finishes were close and exciting, and provoked much enthusiasm among the good sized crowd which was present. The meet originally was scheduled for the preceding day, but was crowded out by the long motor car races. Summary:

Five miles, singles, private owners—Won by Jonathan Yerkes, Thor; second, Frank Powers, Merkel; third, Frank Thompson, Harley-Davidson. Time, 6:15⅔.

Two miles, singles, trade riders—Won by Emanuel Wiesenfield, Indian; second, Jonathan Yerkes, Thor; third, Albert Stoddard, Merkel. Time, 2:20⅗.

Five miles, singles, trade riders—Won by Emanuel Wiesenfeld, Indian; second, Albert Stoddard, Merkel; third, Frank Powers, Merkel. Time, 6:11⅗.

Ten miles, singles, trade riders—Won by Felton Rawlings, Indian; second, Jonathan Yerkes, Thor; third, Henry Havens, Thor. Time, 12:08.

Ten miles, twins, trade riders—Won by A. L. Terry, Indian; second, Jonathan Yerkes, Thor; third, M. Yeager, Indian. Time, 9:51⅘.

Twenty miles, singles, professional—Won by Felton Rawlings, Indian; second, D. Warren, Harley-Davidson; third, Henry Havens, Thor. Time, 22:56⅘.

One mile exhibition—A. L. Terry, Indian. Time, 47:40.

THE SMOOTH SANDS OF PABLO BEACH, WHERE THE JACKSONVILLE CLUB HELD ITS SPEEDFEST

Medhurst, R. I. Secretary, Injured.

An unfortunate accident occurred last week to Walter L. Medhurst, secretary of the Rhode Island Motorcycle Club. He was dangerously injured by a fall of 15 feet in the fire house where he is stationed. He fell on his head and at present lies in the Rhode Island hospital, Providence, unconscious. He revives at times and there is some hope for his recovery. H. E. Winslow, photographer for the Providence Journal and Bulletin, was appointed temporary secretary at a special meeting held April 2, so that the coming trial runs and smoker will have proper attention.

"TOURISTS" TOUR TO PEEKSKILL

Commence Competition for Widmayer Trophy—Teamster Accepts Thorpe's Trouble-Breeding Invitation.

Six of the eight starters in the first club run of the season of the Motorcycle Touring Club of New York, Affiliated, to Peekskill and return on Sunday, 2d inst., finished with perfect scores, and earned five points each, in the competition for the Widmayer trophy. The two other starters did not finish, but are credited with one point for starting. The perfect scorers were the following: Stanley Thorpe, Harley-Davidson; David Molin, N. S. U.; Otto Weinig, Merkel; John Siemsen, Merkel; A. Hoffman, Merkel; Harry Mapp, Merkel.

There were several unusual incidents connected with the run, some of them amusing and others serious. Thorpe was forced into a ditch on a hill by a team and a protruding rock took a small bite out of the upper portion of his crank case. However, the mishap did not affect the running of his engine and he continued in the contest. After the accident he was the butt of good natured bantering by his companions as the result of a certain inscription on his machine.

He has taken up the English fad of christening his machine with a pet name. It was only after considerable search that the chubby captain found a name to his liking, and then he had to invade the Japanese language to do it. The name he chose was "Mussmee," which he says means "Little Girl" in English. However, his mates insist that he was tempting Fate by extending an invitation to be "mussed" and that the teamster quickly accepted the challenge and "mussed him" into a heap by the road. The name still remains on the tank, and Thorpe says that it will stick.

Near Ossining, N. Y., the riders found that a motor truck had sunk through a bridge and rendered it impassable to four wheel vehicles, although it was possible for pedestrians and single track vehicles to cross. There were some police stationed there, however, to prevent anyone crossing, and while some of the riders got past them before they realized it, others were turned back and had to take a backwoods road around Croton, which proved very bad going. This was the worst stretch on the run, the main line roads being good.

One of the riders had quite a warm set-to with one of the bridge guards who threw his machine on the road and put him under arrest when he attempted to cross. The officer sent an assistant to telephone to a justice to hold court, but the messenger came back saying that he could not get telephone connection with a justice. After some further parley the officer released his prisoner with the warning that he would "get" him the next time he came that way, but the rider in question asserts that he will give that locality a wide berth for some time to come.

Harlemites Schedule Brighton Meet.

Raising the curtain on the 1911 season of track racing in New York City, the Harlem Motorcycle Club will hold a closed meet on the Brighton Beach mile track, Sunday, 9th inst. From the makeup of the card, which consists of eight events, there is promise of some good sport, especially in the match races, of which there will be two. L. H. Guterman and Ferd Mercier will go ten miles on a pair of fast Indians, and there is a prospect that this will be expanded to a three-cornered whirl, if the other rider in view can be secured. The other rouser will be between W. L. Coursen and W. P. Hubschmidt, who are warm rivals. They are slated for a five mile battle. The remainder of the card consists of mile time trials; five miles, 30.50 class; five miles, 50 class; five miles, 61 class, stripped; 25 mile handicap, 61 class; and ten mile handicap, 61 class, with full equipment. All machines in the latter event must be fully equipped including lamps, horns and regulation bars, tires and saddles.

Guttenberg Racing on New Basis.

Racing at the Guttenberg (N. J.) mile track will commence on Sunday, May 14, and will be held every Sunday and holiday throughout the season. The meets will be conducted by the Guttenberg Motordrome Association, and a more businesslike management than obtained last year is promised. Special events will be put on from time to time, and every effort made to draw the crowds and serve them good sport. The opening card is composed of five events, as follows: Three mile novice, five mile trade riders handicap, 61 class; five mile professional free-for-all; ten mile trade riders pursuit, 61 class, and a 20 mile professional handicap, 61 class.

A PURITAN ENTHUSIAST

SETS UP NEW AMATEUR FIGURES

Don Johns Betters World's Records for 20 Miles—Diminutive Speed Star Performs Wonders at Los Angeles.

Circling the mile-around board saucer a full 20 times in the short period of 14 minutes and 23⅗ seconds, or at the rate of 84 miles per hour, Don Johns, a diminutive lad of 16 years, mounted on an Indian, on Tuesday, April 4, established new world's amateur motorcycle records from one to 20 miles, inclusive, at the big motordrome at Playa del Rey, outside Los Angeles, Cal., provided his marks are accepted by the competition committee of the Federation of American Motorcyclists. His mile time was 41⅖ seconds. The speed trial was officially sanctioned by the F. A. M., and a referee was detailed by Chairman Thornley from San Francisco. An official squad of four timers held as many stop watches on the youngster as he sped around the huge bowl.

Johns, who is a Los Angeles product, was mounted on a 7 horsepower twin, and his performance is all the more remarkable when it is taken into consideration that it was apparently the first time that he had had opportunity to drive a high powered machine to anything like its limit of speed. In accordance with the announced policy of the Hendee Mfg. Co., Springfield, Mass., which makes the Indian, the motor used in the trial was sealed immediately at the conclusion of the trial and sent to the chairman of the F. A. M. competition committee, for his personal inspection and measurement.

The 20 mile amateur record which the time made by Johns has bettered was established on December 9, 1910, at the motordrome, by M. J. Graves, on a Merkel, the time being 14:38⅖. On December 31, 1910, three weeks later, Charles "Fearless" Balke, on an Indian, went after the record, and covered the distance in 14:11⅗. Owing to technicalities in connection with the measurement of his engine, however, the F. A. M. did not officially accept the record. Balke has since become a professional, so a new star was sought—and found—in Johns. The forwarding of the engine used by the latter to the chairman of the competition committee is expected to obviate any engine measurement doubts in connection with the times standing as records. The times made by Johns follow:

1 mile	00:41⅖	11 miles	07:52
2 miles	01:23⅘	12 miles	08:35⅖
3 miles	02:02	13 miles	09:19
4 miles	02:49⅖	14 miles	10:02⅖
5 miles	03:32⅗	15 miles	10:46⅕
6 miles	04:16	16 miles	11:30
7 miles	04:59⅕	17 miles	12:13⅗
8 miles	05:42⅕	18 miles	12:57
9 miles	06:25⅖	19 miles	13:40⅕
10 miles	07:08⅘	20 miles	14:23⅗

Big Gains for F. A. M. During March.

According to statistics compiled by Secretary Gibson, the F. A. M. gained 678 new members during March. In the individual gain by states New York heads the column, having contributed 122 new members. The returns from the other states and Canada in the order of their numerical showing follows: California, 75; Illinois, 68; Texas, 51, Indiana, 47; Ohio, 39; Pennsylvania, 26; Georgia, 25; Florida, 25; Missouri, 23; Maryland, 22, Michigan, 21; Nebraska, 18; Kansas, 17; British Columbia, 15; Massachusetts, 14; New Jersey, 12; Colorado, 8; Washington, 8; Rhode Island, 8; Connecticut, 6; District of Columbia, 6; West Virginia, 5; Iowa, 3; South Dakota, 2; Kentucky, 2; Alabama, 2; New Hampshire, Virginia, Arkansas, Wisconsin, Minnesota, Montana, Oregon, Idaho and Utah, 1 each. Ladies are commencing to figure prominently as rungs of the membership ladder in the upward climb. Membership card No. 5,000 was issued to Mrs. Gibson, and No. 7,000 to Miss Inez Patterson, Rexford, Kan. On September 1, 1910, the membership was 4,663. The 5,000 mark was reached on the last day of that month, and card No. 6,000 was dated February 3. April 1 is the date on card No. 7,000. Basing his prediction on this rate of increase, Secretary Gibson prophecies a total membership of 10,000 easily by the time of the next annual meet.

Mobile Has a Motorcycle Club.

Additional evidence of the growth of motorcycling in the South is to be had in the organization on the 31st ult., of the Mobile (Ala.) Motorcycle Club with 17 names on the roster. The officers are as follows: T. B. Willison, president; C. V. Johnson, vice-president; Z. E. Agee, secretary; I. Rubel, treasurer. A committee was appointed to draft a constitution and by-laws. The riders perfected their organization at Silsby's Bicycle Co., 461 Dauphin street, and the club will meet there until suitable quarters are selected. As there are between 50 and 75 motorcyclists in the city, the club expects to grow rapidly. After things get running smoothly the club plans to affiliate with the F. A. M. The charter members are as follows: T. E. Spottswood, S. Dahlgren, E. Scheuermann, A. P. Williams, F. S. Silsby, I .Rubel, G. P. Ward, O. Overton, L. Ward, W. J. Ryan, A. B. Martin, J. P. Evans, B. W. Martin, Z. E. Agee, T. B. Willison, C. Ayers and G. Seiple.

Cedar Rapids Riders Club Together.

Motorcyclists of Cedar Rapids, Ia., have organized the Cedar Rapids Motorcycle Club, with the following officers: J. Fred Currell, president; C. Sumerlin, vice-president; F. J. Dawley, secretary-treasurer. The executive committee consists of the officers, together with Murray A. Fawcett and Harry P. Yonkers. At the organization meeting, which was held in Federation hall, 22 riders signed the charter, and it was decided to hold it open for 30 days, at the end of which period it is expected to have a membership of 50. When the charter closes, the initiation fee will be raised from $1 to $2. A constitution and by-laws will be adopted at the next meeting. In addition to holding weekly runs the club plans to promote contests and also display activity in a social direction.

Providence to Give a "Herring Run."

The annual election of officers of the Providence (R. I.) Motorcycle Club will be held on Wednesday, 12th inst. Arrangements also will be perfected at the meeting for the annual "herring run," at which herring are the principal dish. So temptingly is this fish prepared for Providence epicures, that in their estimation it rivals diamond-back terrapin.

ISN'T IT A POLITE, PLEASANT, TACTFUL SIGN?

Classing motorcycles with dogs, the notice shown in the illustration is displayed on the front fence of a cemetery located about a mile below Poughkeepsie, N. Y., on the New York-Albany post road.

HOW MOTORCYCLES HAVE BROKEN—

—INTO THE POST CARDS

SEATTLEANS TO INVADE CANADA

Will Romp Over the Border on Big Endurance Run to Vancouver—Plan Fast Schedule.

From Seattle, Washington, to Vancouver, B. C., is the trip planned for the second annual endurance run of the Seattle Motorcycle Club, which is to take place on May 21 and 22, and which will be one of the big events of the year for the Seattle organization. The run will be held under a sanction from the Federation of American Motorcyclists, and valuable prizes will be awarded those making the highest score.

Vancouver is 172 miles distant from Seattle, so that the contestants will cover approximately 350 miles in the two days. The route embraces some very beautiful and interesting scenery. It will lead the riders through Bothel, Burlington, Bellingham and across the Canadian boundary at Alder Grove. From Alder Grove the route leads through Westminster into Vancouver. The schedule calls for seven hours of actual running. The start will be made at 6 o'clock on the morning of May 21, from Pioneer square, and, according to the schedule, the motorcyclists will reach Vancouver at 4 o'clock on the afternoon of the same day. A hill climbing contest will take place at New Westminster.

Each rider will be credited with 1,000 points when starting, and for each minute late at a control will be penalized one point; for each minute entering a control point; for each minute ahead of time at a control five points will be deducted, and for entering a control 30 minutes ahead of time a contestant will be disqualified. There will be five controls each day, one of which will be secret. The average speed is limited to 24 miles per hour. All necessary repairs may be made on the road, but a rider who changes any complete unit of his machine, other than a spark plug or minor accessory, will be disqualified. The committee in charge of the run is composed of S. T. Hamilton, Roy Cotterall and Harry Tousey, all of them experienced riders.

Jerseyites to Hold "Ladies Night."

Not to be outdone by the metropolitan clubs in the field of social activity, the New Jersey Motorcycle Club, of Newark, is going to have a "ladies' night" on the 11th inst., at which the fair sex will be tendered a reception and entertainment, and afforded an opportunity to meet the motorcyclists in their best bib and tucker. The affair will take place in Berkeley hall, 515 Clinton avenue. There will be music and dancing, and good things to eat, and all motorcyclists are invited.

South Side, St. Louis, Holds Banquet.

The South Side Motorcycle Club, St. Louis, Mo., held its first annual banquet on March 24 at the Van Horne Cafe, Jefferson avenue and Olive street. About 30 were present. The toastmaster was President William Hellman. Speeches pertaining to motorcycling were made by George Schmitt, Lou Daub, Frank Greenfield, Charles B. Cornwall and G. Palfrey. The first run of the season was held last Sunday. The South Side Motorcycle Club has a membership of 85 and is four years old. Its headquarters are at 1625 South Broadway.

New Track in Prospect for Wichitans.

The Wichita Motorcycle Club, of Wichita, Kan., is carrying forward a plan to convert the old fair ground racing track into a motorcycle track, by giving it suitable banking and resurfacing. The track has not been used for some time, following the destruction of the training stables by fire. If it is put in condition for motorcycle racing, the club intends to make it the theater for several big meets during the summer months.

To Consolidate Reading's Clubs.

A commendable effort is being made to organize a big motorcycle club of the riders of Reading, Pa. Hitherto there have been clubs composed of riders of various kinds of machines, respectively. The dealers in Reading, five in number ,all handle different makes, and an effort is now being made to have all combine and help to make one large club to hold runs during the summer. A meeting will be held shortly, looking toward consolidation.

WHERE LONG ISLAND'S GOOD ROADS END—THE "COMMERCIAL HOTEL" AT SOUTHAMPTON

THE INDIANA MOTORCYCLE CLUB, OF INDIANAPOLIS, IND., WHEN IT WAS SMALLER.

The picture was taken in front of the Club's home at the time of the F. A. M. national meet in Indianapolis two years ago.

RUSHVILLE PLANS 200 MILE RACE

Track Meet with Big Feature Grind for Singles—Handsome Trophy to Attract Prominent Speed Men.

Rushville, Ind., which in the past has attained some prominence in motorcycle racing circles, is going to write its name large and bold on the competition books on Saturday, 29th inst. A big meet is being arranged with a 200 mile track event for 4 horsepower singles as the top liner on the card. The meet originally was scheduled for Sunday, 9th inst., but a sanction could not be obtained for racing on this date.

At first it was intended to have only the double century race, but in order to comply with the definition of a race meet, two other events were added. They will consist of a mile time trials and a five mile county championship. For the big race a cup two feet high and valued at between $175 and $200 will be awarded to the winner. It is expected that this race will draw at least 20 entries, including such stars as Fred Huyck, J. A. Turner and John Merz, of Chicago; Harry Nixon and Irwin Howich, of Dayton, O.; Marshall Casebeer, of Terre Haute, Ind.; L. S. Taylor, of Columbus, O.; Charles Shepard, of Kokomo, Ind., and Fred Stuart, of Indianapolis. The meet will be held on the Rushville Fair Grounds, which has a well banked mile dirt track.

National F. A. M. Meet Decision Soon.

Competition for this year's F. A. M. meet appears to have narrowed down to two candidates, Buffalo and Indianapolis. Detroit, which also was mentioned as a possible bidder, had not filed its application up to Wednesday, 5th inst. The two first named cities already have filed their applications. Letters have been flowing in in swarms to President Willis, of the F. A. M., from members throughout the country indicating their choice of the city which should get the meet. Copies of these pleas in behalf of the cities in the race will be sent today, 8th inst., to the members of the board of directors of the F. A. M., who have the selection of the place for the meet, with a request that they mail their choice of cities as early as possible. It is unlikely that the result of the vote will be known before the latter part of next week.

Annual Banquet of Marylanders.

Members of the Maryland Motorcycle Club of Baltimore and their friends to the number of 35 sat down to the annual banquet of the organization at the New Howard hotel on Wednesday night, 5th inst. The menu card was arranged in a fitting manner, the courses being designated by motorcycle technical terms. President Rodgers Wolkins told of the club's progress and Captain Congdon reminisced on past runs and told of some of the club's plans for the future. Following the oratory exercises a pleasing entertainment was given.

Detroit "Cops" Back on Motorcycles.

Spring having arrived, Detroit's "flying squadron" of police is once more using its motorcycles. During the winter months, when heavy snow and ice were on the streets, the motorcycle "cops" used an automobile, but with the return of weather suitable for the two wheelers, they were exceedingly glad to resume their gasoline saddle horses.

Ovington Ready to Caper in the Air.

Earle L. Ovington, formerly president of the F. A. M., arrived in New York this week from France, where he has been for the past six months studying aviation at the Bleriot school. He recently received a pilot's license and brought with him a 70 horsepower Bleriot monoplane in which he plans to gambol o'er the skyscrapers of Manhattan.

Baker to Try Non-Stopping Again.

Erwin G. Baker, Indianapolis, Ind., the motorcycle non-stop artist, has applied for a sanction for a trial at the world's long distance non-stop record. Weather permitting, he will make the attempt on Monday or Tuesday, 10th or 11th inst. In his last attempt Baker was halted at 75 miles by tire trouble.

Two Indiana Counties Organize.

Motorcyclists of Vincennes and Knox counties, Ind., have organized an F. A. M. motorcycle club with the following officers: Chester McIlvain, president; Volan Salyards, vice-president; Chester Adams, secretary; Finney Moore, treasurer. The club has 14 charter members.

VERY MUCH ALIVE IN SPOKANE

Board Track, Woman's Auxiliary and Sleuthing to be Part of Club's Program —The Saucer Project.

The Spokane Motorcycle Club is manifesting activity in several directions. A woman's auxiliary was organized last week at a good old-time camp meeting held at Medical lake. The club has decided to cooperate with the police in an attempt to eliminate as much as possible the constantly increasing theft of bicycles. The president has also announced that the club is "with" the police in the enforcement of the law against those violators who leave their mufflers open and cause an unnecessary disturbance.

Upon the advice of some of the leading motorcycle men of the United States, the club has practically decided to erect a board track in place of the dirt track originally planned. Although no definite action was taken at the meeting of the club several weeks ago, the concensus of opinion was for the board track.

"The club hopes to have the track finished this summer," said President C. H. Miller, "and expects to bring such racers here as Whittler, DeRosier and Graves." It is estimated that the track will cost $10,000 and the controlling interest will be held by the members of the club, who have already subscribed to the amount of $2,500. It will be a three-lap-to-the-mile track with steep banking.

Each Has a Fifth Interest.

By paying $30 apiece, five intending motorcyclists in Augusta, Ga., are to become the possessors of a motorcycle on the club basis. The five members of the club will use the machine in turn during the season.

"WHEN GREEK MEETS GREEK"

AFFILIATIONS STILL INCREASING

Seventeen Clubs Enter the F. A. M. Fold in March—Many New Clubs are Being Hatched.

A new club affiliated every 43 hours during the month of March is the record to which Chairman Estabrook, of the F. A. M. membership committee points with pride. Seventeen clubs "took out their papers" during the windy month, and boosted the membership 321 names nearer the 10,000 goal. When the work of affiliation began, reckoning of results was calculated on so many clubs per week; then as more hustling was done the accounting system was changed to a daily tabulation of accomplishment, and now the intervals between affiliation are figured in hours.

Since the century mark was passed last week, four more clubs have affiliated as follows: No. 101, Austin Motorcycle Club, 21 men, M. E. Horner, secretary, 515 Congress avenue, Austin, Tex.; No. 102, Broome Motorcycle Club, 16 men, W. J. Lyon, secretary, 1 Park terrace, Binghamton, N. Y.; No. 103, Miami Motorcycle Club, 25 men, L. Fornell, secretary, Miami, Fla.; No. 104, Motorcycle Touring Club of Chicago, 18 men, C. R. Schwarz, secretary, 447 W. North avenue.

Following the lead of New York, Chicago now has a "Motorcycle Touring Club." Its officers are Max Stahlfant, president; Norman Bock, vice-president; C. R. Schwarz, secretary; Alf. Born, captain; Ernst Born, first lieutenant; B. Stechbart, second lieutenant. The club is 100 per cent. F. A. M. and has adopted the standard constitution and by-laws. It will be interesting to observe if history repeats itself and a rival organization springs up to try and put it out of business as happened in New York. Apparently the Chicago "Tourists" are willing to take a chance on this, as they have not incorporated yet.

Still another new Chicago club is on the "stand." James B. Mercer, 2323 Michigan avenue, is the designer, and expects to throw in the clutch soon and get under way. Edward Tweitmeyer, 20 Main street, Evansville, Ind., has taken it upon himself to give that city an F. A. M. club. He thinks that such an organization would add to the city's prestige. For several months S. Braun, of Waterloo, Ia., has had a club in the incubator. It now is ready for hatching, he reports, and probably will break through its shell around Easter.

Cleaning Magneto Points Correctly.

In cleaning magneto circuit breaker contacts with emery cloth there is a right and wrong way to do it, like in most other things, and the wrong way is that which most riders use. Before inserting the emery cloth between the points it should be bent double with the business side out, so that when it is slipped between the contacts it will clean both of them at the same time. If the cloth is inserted with only one side working at a time the fuzz on the smooth side of the sheet will cling to the point with which it comes in contact, and act as an insulator, and there will be no spark at the plug. If this should occur, and more cleaning is attempted in a haphazard effort to remedy the trouble, it is very probable that both contacts will get fuzzed up and make matters worse. It is safe to say that a case of this sort would stump nine out of ten riders.

SPEED MONSTER WHOSE SPEED WAS IN VAIN.

When the F. A. M. enforced engine size limitations, this four cylinder, 16 horsepower M. M. racer was oversize and ineligible for record breaking or competition.

North Shore Cash for Its Race Meet.

Money to back the big motorcycle race meet that the North Shore Motorcycling Club, of Chicago, Ill., is to give on Memorial Day at the Hawthorne track, is more than assured, as the result of a ten minute session in which the club members subscribed $2,000 for the purpose. It was found that in order to swing the event on the scale planned, about $2,000 would be necessary, and the president of the club L. J. Leonard, seeing the members enthusiastic over the prospects of the meet, devised a plan by which shares in the enterprise could be sold to the North Shore members. It was decided to sell about 80 shares at $25 apiece. At the last meeting of the club, with about 30 members present, Leonard himself started the ball rolling by subscribing for 40 shares, amounting to $1,000, after which the balance of the $2,000 was quickly raised by the following subscriptions: Wilmer Reichert, $100; Carl A. Leander, $100; B. M. Blankenheim, $50; J. E. Stenquist, $100; J. Blankenheim, $25; North Shore Motorcycling Club Orchestra, $50; J. Creamer, $100; J. T. Paisley, $500; Charles McCabe, $200; F. E. Badgeley, $200; C. B. Blankenheim, $200; F. Bond, $100. Furthermore, according to one of the members, the club "can lay hands on $2,000 more any minute, without going outside of the club house."

Claims Gimlet Better than a Punch.

After trying practically all of the belt punches and drills now offered, a veteran rider gives it as his opinion that an ordinary gimlet is better than any of the new fangled devices for drilling holes in belts. Among the advantages claimed for it are that it cuts a clean and straight hole, and does not gouge or chew the belt like some of the drills. Cheapness also is an item in its favor, a good gimlet selling for a dime or sometimes less.

LAWDY! WASN'T RASTUS GLAD!

What Would Have Been a Calamity for Another Was Joy to Him—Mounts Were Confounded.

The clock struck the hour. A tired business man, says Chauncey W. Beasley in the Newark Call, looked up from his desk, pressed a button and said to a clerk who appeared: "Send for Rastus." In a few minutes a middle-aged darky appeared. "Rastus," said his employer, "can you ride a wheel?" "Yes, sir; yes, sirree! I kin do most anything," was the reply.

"You are sure you are not afraid," said his master. "Afraid? Why, Mr. Brown, I'se not afraid of anything except my wife."

"Well, Rastus, go around to the Reed garage. I'll telephone to have a wheel ready for you. Take this package out to the house—in a hurry, mind you!" The negro departed. Mr. Brown phoned and went on with his work.

Now it so happened that at about the same time the request by Mr. Brown for a bicycle was made, one Jacob Einstein had telephoned the Reed concern to deliver a motorcycle, which he had purchased the day before, to a messenger who would call for it.

The bicycle and the motor vehicle were prepared. Rastus, eager to do his master's bidding came running up to the garage and said: "Got my wheel ready?" An absent-minded clerk, thinking nothing except for his good looks and his cigarette, brought out the motorcycle and turned it over to Rastus.

The colored personage had heard of and seen machines of this nature, but had never ridden one. He did not, however, like to display his ignorance, so he proceeded to mount. The clerk, no doubt, seeing by his awkward movements that our friend was a tyro and having some fun in his nature went to his assistance, and as soon as Rastus had scrambled into his seat he gave the wheel a shove, which ignited the spark. The steed leaped into the air and they were off!

Anyone who has ever ridden one of these animals knows that they are easy to control—if you know how. Rastus, unfortunately, did not possess this knowledge. So down the street the ill-mated pair went, turning from Mulberry street into Market and going at terrific speed. Coming to the Four Corners, the cycle and its crew struck a small boy and threw him about ten feet to the sidewalk.

The crowds scattered right and left. Policemen! Inspectors of the trolley company set up a yell. Rastus holding grimly to his handle bars rushed up Market street. A mounted policeman saw what was happening and set spurs to his horse.

The flying machine, going at a rate of 50 miles an hour, soon distanced his pursuers.

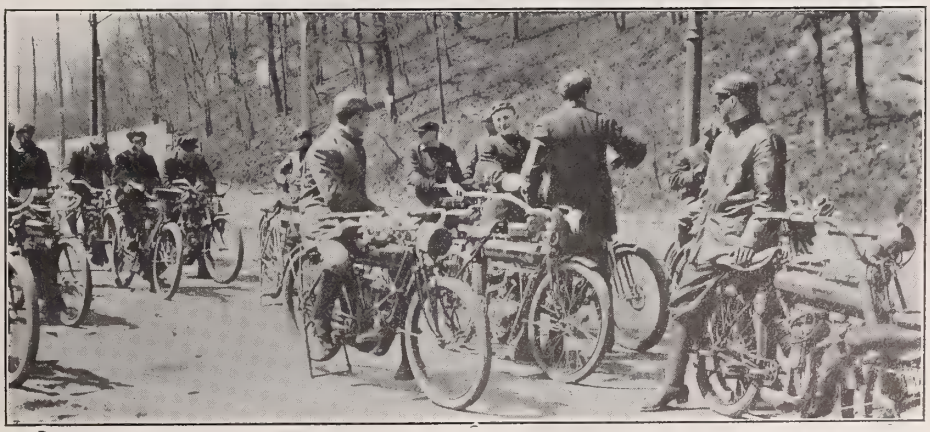
Can you imagine Rastus's feelings at this time?

Shivering with fright, the poor man held the steering handles with what Polonius calls "hooks of steel."

Thoughts of a prison cell kept coming through his brain. Slowly his mind was working and then he commenced to reason as to how to stop the accursed monster. He dared not look around for fear of hitting something ahead of him. He eyed the pedals. He looked for a brake; he could find none.

Before he knew it he was in Morristown. The tears were streaming down his face. He cried out in his agony. He shouted for help. As he passed the hotel the dust he kicked up made the bystanders gaze at him in amazement.

Over hill and down dale he thundered (John Gilpin was not in it). Soon he saw before him the Hackensack bridge. His hair stood on end—the bridge was open!



A man shouted to him, all in vain. He plunged into the deep and muddy waters of the Hackensack. When the bridge tender had fished out our half-drowned hero, Rastus sat himself down and faintly but thankfully said: "Gee, I'm glad that draw was open!"

IN A "TONNEAU," TOURING WITH PAPA.

Most riders would hestitate, however, to expose a child to the dangers that must exist for it in the mode of travel shown.

WAITING—BUT NOT FOR SPRING FLOWERS.

The snapshot was taken as a group of riders of the Concourse Motorcycle Club, New York City, were about to start on an early spring run.

CRESCENT CYCLISTS ON THE ROAD

Active Riding Has Commenced for Baltimore Club—Rivalry in Piling Up Centuries and Mileage.

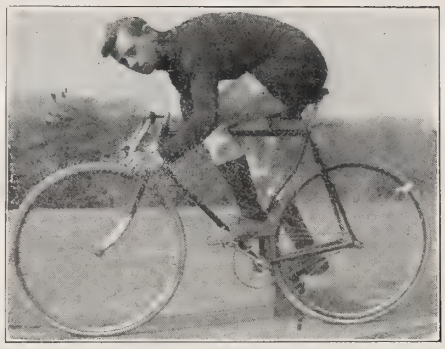
In connection with its Sunday run at Chase's Station, on the 26th ult., the Crescent Bicycle Club, of Baltimore, Md., held two Class E club races, each of which furnished an interesting contest. The first race was at one mile, and William Leimbach, Fred M. Sanborn, Langdon M. Sanborn, August Leimbach, Charles H. Thoms, Alfred J. Baker and John W. Trost lined up for the start. The race was started at Chase's and finished one mile up the road toward the city. Alfred J. Baker won the event and is the first club member to pass into Class D for the present season. Fred M. Sanborn finished second, with Charles H. Thoms third and John W. Trost fourth. Time, 3:45.

The second race was at two miles, and started at the finishing point of the first event. The contestants were the same as in the first race, with the exception that Alfred J. Baker did not compete, and that there were two more starters, Thomas W. Baker and Ferd S. Plitt. Fred M. Sanborn won in a close finish with Charles H. Thoms.

Both the century mileage and the run attendance contest of the club are receiving more than the usual interest among the members, and the mileage returns to date are far ahead of all past figures. Three medals are offered in each contest, and the race for these awards is becoming more interesting each week. A large number of centuries have been ridden, and some double and triple centuries will be made before the warm weather sets in.

The first big event planned by the Crescents is their annual spring half-century or 50 mile pleasure run, which will be held this year on Sunday, May 21. The run will be over some of the best roads around the city, and handsome medals will be awarded all who complete the distance. Printed details will be distributed shortly, and a record crowd is expected to turn out. The Crescents' annual spring road race has been set for Sunday, June 18, and the usual complete list of prizes will be offered for the local speed cracks.

Another Bicycle Club in Baltimore.



Baltimore, Md., now has another new bicycle club, which was formed Wednesday night, 5th inst., at a meeting held at the bicycle store of Bernard Logue, Broadway and Barnes street. The new organization styles itself the Baltimore Bicycle Club, and elected the following officers: Harry Lindeman, president; Nicholas Heilman, vice-president; John Andrae, secretary; Fred Welsh, treasurer; Fred Welsh, captain; Richard Lindeman, color bearer; Frank Nelson, first lieutenant; William Bush, second lieutenant. The club colors are green and white. The club will meet on Wednesdays and will hold regular Sunday runs. It was decided to enter all of its fast riders in the Lafayette Wheelmen's road race.

Hawkins Still Holds Gilded Cork.

This early in the season, and despite the increasing fields pitted against him on each turnout, J. B. Hawkins seems to have discovered the secret of winning cork races as often as he pleases, for on Sunday, 2d inst., for the third successive time, he captured the weekly six mile chase of the New England Wheelmen of New York City over Bronx roads. Joseph Kopsky was close on Hawkins's rear wheel at the finish, and J. P. Berlenbach and John Roedig registered in that order. Fifty riders started from the club house, and 32 pursued the elusive cork.

Second Run of C. R. C. A. Hikers.

Twenty-four members of the Century Road Club Association, New York City, turned out for the second club run of the season on Sunday, 2d inst. The course was from Central Bridge to Pelham Parkway. At the latter place a three mile sprint race was held, in which Harry G. Lilienthal was returned the winner. Second place was taken by Edward Schuber, and the remaining order of finish was Fred W. Lilienthal, Max Merker and J. B. Hawkins.

HARRY G. LILIENTHAL

To Try for Milwaukee-Chicago Record.

Louis Helms, the former "messenger boy bicyclist," will ride from Milwaukee to Chicago on April 16 in an effort to lower the bicycle record between the two cities. His last run over the same route established the record of 9 hours and 45 minuates, but he expects to lower this considerably.

Fast British Amateur Coming Over.

If a rider named J. D. Nathaniel should enter an amateur bicycle race next May or June, the other riders had best to look to their laurels. He is one of Scotland's crack amateurs, and he leaves for the United States on April 15, for a visit.

ALL READY FOR EASTER HANDICAP

C. R. C. A. Has Over 100 Entries for Big Event at Floral Park—Thirty Prizes on the List.

Over 100 entries already have been received for the ten mile handicap bicycle road race of the Eastern Division of the Century Road Club Association, New York City, which is booked for Easter Sunday, 16th inst., at Floral Park, L. I. The last call for entries has been extended one day, to the 11th inst., giving those who mail their entries on Sunday an opportunity to get in. All entries received after the closing date will be assessed 25 per cent. extra, in accordance with the N. C. A. rules.

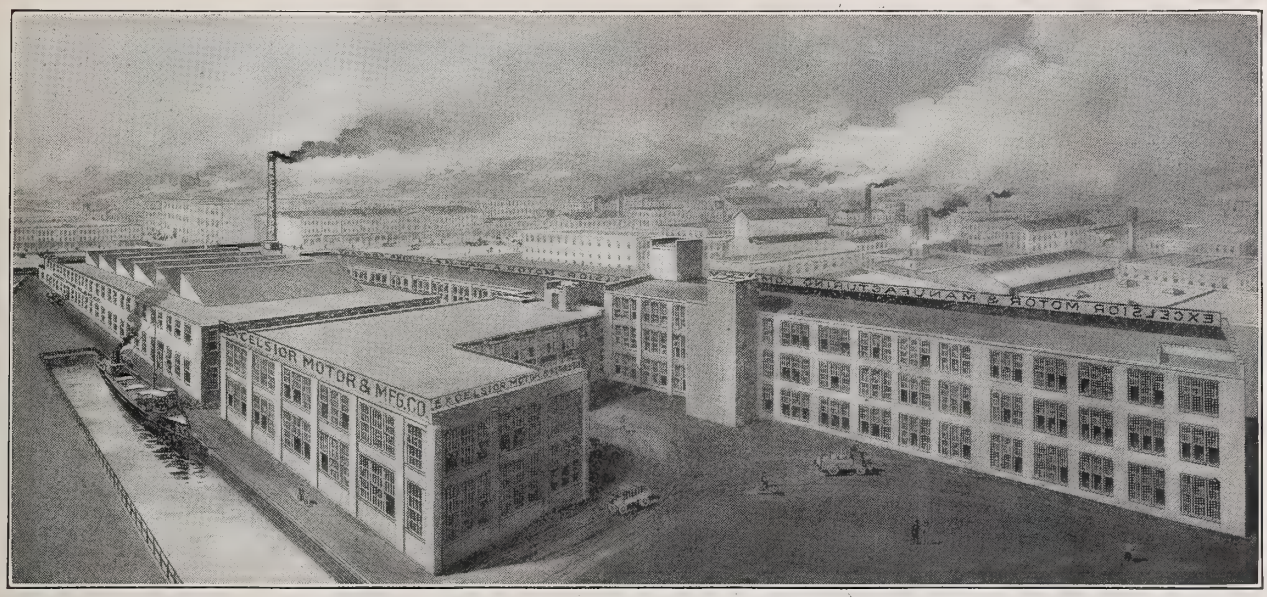
More than 15 clubs already are represented in the entry list, and there promises to be a hot scramble for the alluring first prize, a 1911 Columbia racer. There also are five time prizes that are expected to produce a whirlwind windup for ownership between such cracks as Joseph Berlenbach, Joseph Kopsky, Edward Schuber, Richard Jones, Jesse Seaman and A. R. Cooley. There are 30 prizes to be distributed, including tires, chains, lamps and all sorts of sundries.

The race will start at 10 a. m. sharp, as it is the desire of the committee to have it over with before the heavy motor car Sunday traffic on Long Island commences. There also is a prize for breaking the course record, and this is expected to prove the big feature of the race.

Grand Rapids Card Announced.

Four events, consisting of one and five mile handicaps, one mile novice and a miss-and-out race, constitute the program for the bicycle meet which the Western Michigan Cycle Club of Grand Rapids, Mich., will conduct jointly with the local Y. M. C. A. at Comstock Park on May 30. All of the events are open, but amateurs only are eligible to compete. Entries close on May 22, with the Western Michigan Cycle Club, 83-85 Houseman building, Grand Rapids, Mich.

Schwab Getting Ready for Newark.



Oscar Schwab, the professional bicycle rider who has been riding in Europe for some time, has returned to this country. He is working out with the New England Wheelmen of New York in their Sunday cork races in preparation for the opening of the new Newark velodrome.

New England Wheelmen Growing.

Twelve new applications for membership filed since the last meeting two weeks ago, indicates the healthy rate at which the New England Wheelmen of New York City are growing. Hardly a meeting is held that a batch of new members is not put through

The Factory Behind the Product

A strong plant is never grown in barren soil and the quality of any product is dependent upon the facilities for its manufacture.

The factory producing the

EXCELSIOR AUTO-CYCLE

is beyond question the most thoroughly equipped and complete motorcycle factory in the world.

With the buildings just finished, the total floor space is slightly over 190,000 square feet and the machinery and equipment is the best obtainable.

A comparison of these facilities with those of factories with a limited product or building only a part of the machine will clearly indicate one of the reasons for

EXCELSIOR SUPERIORITY

Eastern Representative—STANLEY T. KELLOGG, 169 Beechwood Ave., Bridgeport, Conn.

Beware of the German Cloak Room.

They have a very autocratic way of doing things in Germany. A racing man left his new road racer bicycle at the Central railway station at Hamburg and called for it six weeks afterwards. He found that it had been sold at auction for the highest bid, which was about $1.60. The auctioneer's fees came to $1.35, and as a result he got 25 cents for his new machine. On applying to headquarters as to whether the cloak room officials had the right to auction the machine, he was informed that they were unable to furnish him any information.

He Employs More than 11,400 Bicycles.

It is believed that the largest employer in the world of the bicycle, according to the Youths' Companion, is the British postmaster-general. He has in his department at present 11,400 of them, about one-half of which are used by the rural delivery carriers. Each bicycle averages 10,000 miles of travel a year, making more than 114,000,000 miles in the aggregate, or 21,000,000 miles further than the distance from the earth to the sun. The life of the postoffice bicycle averages four and a half years, and that of a tire about nine months.

Edlin Had the First Pneumatic Tires.

Robert Edlin, who is credited with having built, in 1888, the first velocipede fitted with pneumatic tires, died recently at Leicester, England. When a young man, he made a hobby of velocipede construction and acquired a reputation for success in this field. When, in 1887, J. B. Dunlop devised the first pneumatic tire, Edlin was suggested as the man who could supply the machine on which to fit it, and the result was the first pneumatic-tired bicycle.

Great Barrington Club to Reorganize.

The Great Barrington Bicycle Club, of Great Barrington, Mass., which was incorporated 12 years ago, is to disband. When organized in 1899, the club was composed principally of young men interested in cycling. The club has continued and prospered in the intervening years, but the members have become obese, lazy and plutocratic, and plan to reorganize the club under another name, retaining the purely social features.

Burning Water and Stones in the Lamp.

A clergyman has been palming on his friends in Manchester, England, a story which had its origin years ago in a cycle dealer's visit to a Lancashire agricultural village. This agent had carbide with him, but no water; and when he asked an uninitiated farmer's wife for some aqua pura to light up, she called on her husband to come out and see a lamp that would burn water.

The parson tells how he was at a farmhouse in the wilds one night. The lamp was acting badly, so he took it indoors to inspect the waterchamber and tap, the carbide well, gas-burner and what not. The "missus"—as they call the lady of the house in Lancashire—was invited by her better half, pitifully, to look at a lamp with water in it, and stones off the road.

"Poor gentleman," said she; "what a pity! And such a nice gentleman, too."

The old farmer in kindly tones tried to persuade the feeble-mined (?) parson that he wouldn't get those stones to burn.

"And you should put oil in a lamp—not water," he added.

Eventually a brilliant light was obtained, and the farmer was convinced it was electricity.

Road Racing is Popular in France.

The popularity of the bicycle in France may be more fully realized by the fact that 400 entries were received for the great "cycling steeplechase," held on Sunday afternoon, January 22. The race was open to youths under 18 years of age, and consisted of a cross-country race in stages, with the points to be called at not announced until the commencement of the run.

Carrying a Map for Cycle Tours.

Last month a cyclist was seen on a suburban road near Dublin, who carried, slung across his shouder by means of clips and a leather belt, in the same way that field glasses are carried, a small glazed and framed map of the city of Dublin and its environs. For a stranger who would require to make frequent references to a map, the idea is not a bad one, especially in wet and windy weather, where rain would spoil an unprotected map.

Octogenarian Likes His Bicycle.

John Courtright, a well known and familiar figure about the town of Ottawa, O., at the age of 88 years rides a bicycle practically every day. Failing sight prevents him from reading and doing many things to which he has been accustomed, so he finds health and recreation in making little trips about the neighboring country on his bicycle.

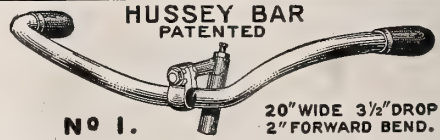
Londoners Losing Their Mounts.

Cycle thievery apparently is a flourishing vocation in London just now. During the trial of a case of bicycle stealing recently, a police officer told the magistrate that 1,200 bicycles had been stolen in that city during the last 18 months, despite a special police campaign against the thieves.

Suggests "All Black" as Mourning.

An English writer advances the suggestion that the "all weather" or all black finish bicycles that now are in vogue over there would be most appropriate conveyances for the mourners at the obsequies of a prominent cyclist.

Ascribes His Longevity to Cycling.



Despite the fact that his mother predicted that he would not make "old bones," Isaac C. Johnson, of London, England, sometimes called the inventor of Portland years, and in an interview on his 80th birthday he explains that when he was 67 years old he took up cycling for the first time, a sport to which a partly attributes his longevity. He is still a cyclist.

Beats Father Time Around the Clock.

In chronicling the doings of a local cyclist the Blackburn Weekly Telegraph really lets itself go. After some preparatory remarks, the journal says, "Last year he entered the Bath-to-Brighton 24 hour race and finished the course in 22 hours." "Is there another cyclist breathing who has managed to compress a 24 hour race into 22 hours?," asks an English cycling contemporary.

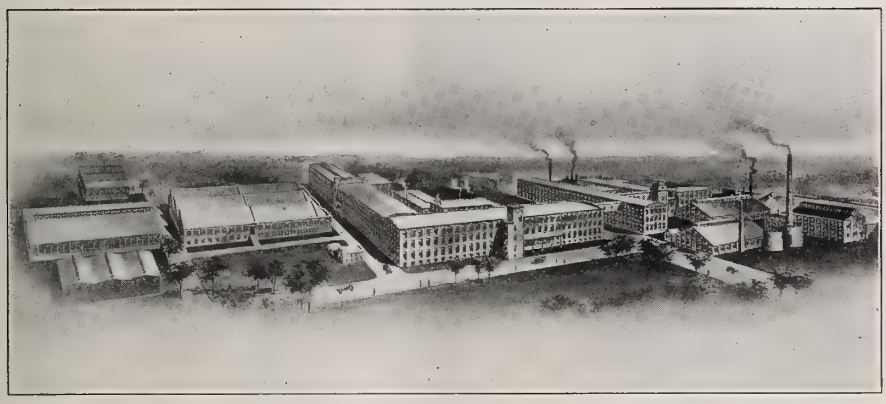
HYDRAULIC PRESSED STEEL CO.
CLEVELAND, OHIO

ARE YOU READY

for the opening of the Spring Season with your shelves stocked with

New Departure Coaster Brakes



New Departure Bells

New Departure Cyclometers

and your counters, walls and windows showing

New Departure Signs, Booklets

FOLDERS, ETC., ETC.

The demand for New Departures was never so extensive as now. Our big factory has been running twenty-three hours a day, six days a week for months, filling orders. We have been busy before, but never like this.

WHY? Because the New Departure coaster brake is better made than ever before. Progress in the art of treatment of the steel has resulted in important improvements that make all the wearing and working parts practically and actually tool steel—indestructible.

The design remains the same so that all parts of the present model are interchangeable with parts of models for several years back.

One dealer writes, "The 1911 refinements have given us a faultless brake." Another writes, "It is 100 per cent better," etc., etc.

The dealer who stocks New Departures offers his customers the best. The dealer who does not stock New Departures is surely driving trade to his competitors.

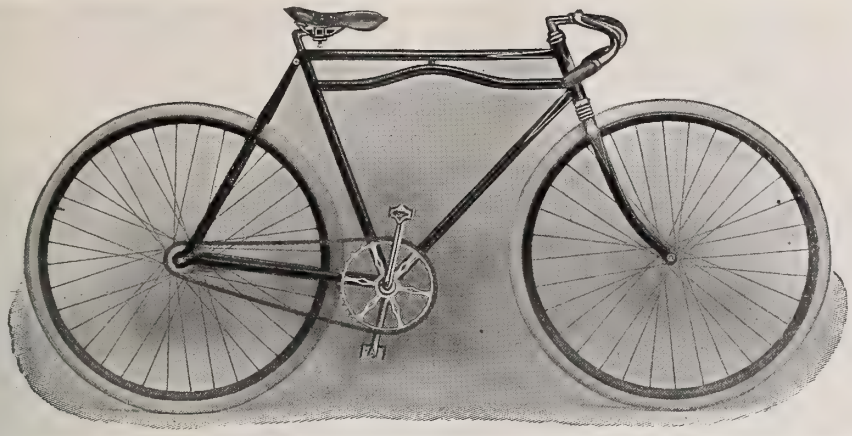
MOTORCYCLE TIRES AT HALF PRICE



Don't be skeptical in buying these tires because the price is low. They are of standard construction (moulded type) and were made to sell at regular prices.

You take no chances in buying as we guarantee these tires to be satisfactory and to be the biggest snap ever offered in motorcycle tires. If you don't think so when you receive the tires return to us and we will refund your money. This snap won't last long, so send in your order quick if you want to save 50 per cent. on your tires.

PRICES—Single or Double Clincher

HEITGER

Model G, 1911, Motorcycle Carbureters

Either double adjustment type, raised needle valve, or the single adjustment type, as desired. Made of special aluminum alloy, nickel-plated, float bowl either stamped brass, nickeled and polished, or heavy glass. Either type gives maximum power and speed to machine, also minimum speed and gasoline consumption; runs machine from 3 to 75 miles per hour, depending upon size motor, 80 to 100 miles per gallon fuel consumption. Built in such manner as to eliminate ALL troubles common to carbureters, such as flooding, choking, leaking and binding float valves, air valves, etc. ALL overcome. Weighs 20 ounces complete.

DOUBLE ADJUSTMENT TYPE
Glass or Brass Bowl

We can make prompt deliveries.

INDIANAPOLIS, IND.

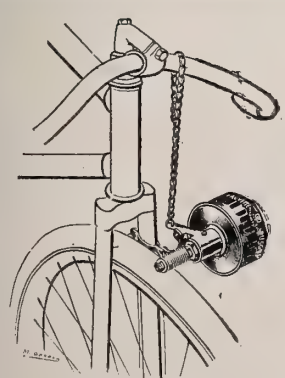
The New England Racer Price $55

A WINNER

Fast Strong
Light Snappy

The Only Bicycle in the World Built for Sprint RACING on Small Board Tracks.

Three Reasons Why



First. It brings the rear wheel four inches closer to the hanger, bringing more weight on the rear wheel, and relieves the strain from the front wheel and forks. This will be appreciated by all track riders, as it is a well established fact that in order to acquire any great amount of speed on tracks with sharp turns, it is essential to have all possible weight of the rider on the rear wheel.

Second. The **New England Racer** uses from 14 to 19 inches less chain than the average racing models. This is a big factor in racing, as a long chain is bound to swerve, and if not kept tight will jump the sprockets or catch on the top of a tooth and break. This is a frequent occurrence on board tracks. On the **New England Racer** the chain can be adjusted as loose as the rider desires without the least danger of jumping the sprockets or breaking.

Third. The rear stays being much shorter, are stronger, and will prevent the sprockets from pulling out of alignment with each other under great strain.

Touring Season Is Here Again

Start right by fitting your mount with

SPLITDORF MOTORCYCLE PLUGS

You will thereby be sure of more pleasure and less vexation.

Being made especially for the motorcycle, they will give you better ignition right through the season than any other. For eight years they have been used by the leading motorcycle makers, and are always found among the winners in the big races and contests.

We have positive record of these Plugs which have been in constant use for seven years, and will give proof of same to any one interested.

Insist on SPLITDORF Plugs and have Perfect Ignition.

KELLY HANDLE BAR CO., Cleveland, O.

RENOLD CYCLE CHAINS

1-2 in. pitch Roller Chain

1-8 in., 3-16 in., and 1-4 in. wide

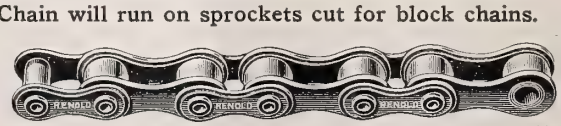
(615)

The SWEETEST RUNNING and MOST DURABLE CYCLE CHAIN is the RENOLD ½ in. pitch Roller Chain, because:—

On a given diameter of sprocket there are twice as many teeth as for a Block chain.

The use of Rollers greatly reduces the friction between the chain and wheel teeth.

The Roller Chain permits of a better tooth form than the block.



The Roller Chain, width for width, is stronger than the block.

The Roller Chain does not tighten up in mud so readily as the Block type, and adjustment for slack is not so important.

Records show that Renold Roller Chains last nearly twice as long as Block Chains.

The RENOLD TWIN ROLLER CHAIN has many of the advantages of the ½ in. pitch, and any rider can learn what these are without the expense of fitting new sprockets, because the Twin Roller Chain will run on sprockets cut for block chains.

1 in. pitch Twin Roller Chain

1-8 in., 3-16 in., and 1-4 in. wide

No. 5—MOTORCYCLE PEDAL. RIGID FRAME, RAT TRAP.
Well made, durable and sold at attractive prices.

Here is a quartet of

KOKOMO Bicycle Tires

that fully meet the spring situation.

Kokomo Defender Special

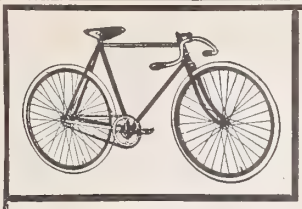
This popular guaranteed tire is specially designed and constructed for road use. It is made from the best materials obtainable, being carefully built up by hand with pure para inner tube, and, owing to the very high quality of the inner tube used, a puncture is very easily repaired.

Kokomo "New Oxford"

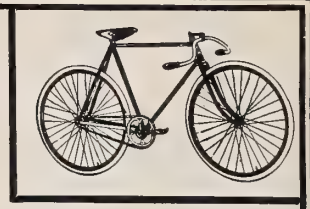
A medium price tire, yet so good in quality that it does not do it justice to call it a medium grade tire. We have built these tires so that in case of puncture they will not be worthless but can be repaired. Also furnished in smooth tread.

Kokomo Dotted Tread

A tire that prevents skidding and is safe and reliable on wet, slippery roads and city streets. Of high quality and careful construction. Furnished in road weight or in thick tread.



Kokomo Guaranteed Red Thorn



Made of red rubber, is extra heavy and is built especially for long service.

Are you profiting by what we offer you in Kokomo Tires?

KOKOMO RUBBER CO., Kokomo, Ind., U.S.A.

How to Satisfy Your Customers and Make Money

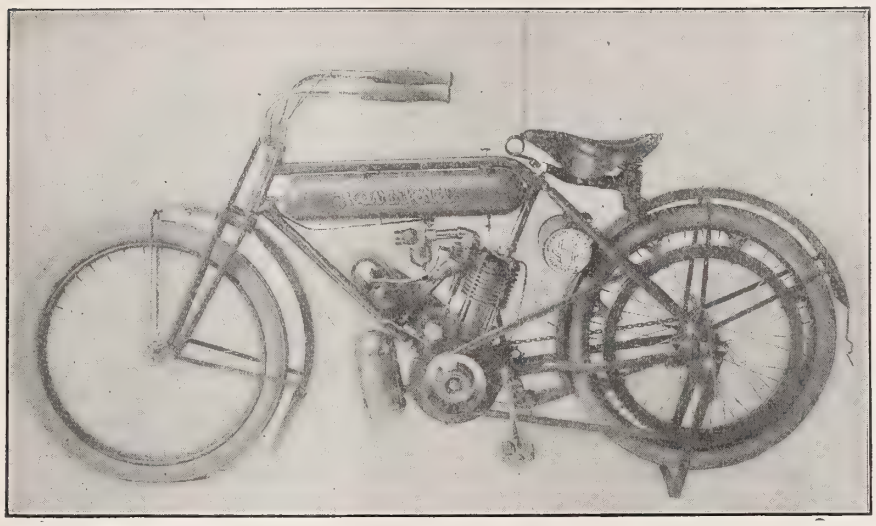
"WHITNEY" High Grade Driving Chains

ROLLER CHAINS — BLOCK CHAINS — QUIET CHAINS — CHAIN BELTS

Send for our new 1911 catalogue. It contains valuable hints and tables as to correct sprockets, for best service, also the care and lubrication of chains, etc.

Wherever chains are used, "Whitney" chains are recognized as LEADERS because they have been tried and proved. Our chains are made right and they are made from the right kind of material, thus giving the highest efficiency. Driving chains must be accurate and durable. "Whitney" chains are both and that is why our chains give such excellent results.

Woodruff Patent System of Keying



Requires no skilled labor.

Is simple and rapid.

It is impossible for a Woodruff Key to roll over in its seat. The possibility of destroying both pulley and shaft in case of accident is thus eliminated.

PIERCE

Racing Triumph

Single and Four Cylinder Models

Pierce motorcycles are fast— very fast. The 1911 Pierce single is the fastest stock single on the market, furthermore it is the best hill-climber, the smoothest running and the most solidly constructed. It has every attribute possible to a one cylinder motorcycle.

The four cylinder travels at a mile a minute plenty fast enough.

Defeats Aeroplane and Automobile

On March 26th, J. W. Hoag, Pierce agent in Hanford, Cal., engaged in a four mile relay race with the celebrated Ely in his aeroplane, and an automobile. The course was a half mile dirt track, in poor condition.

Aeroplane, four miles, flying start. Time, ...	5.59½
Automobile, flying start, two miles. Time, ...	3.30
Pierce 1909 four cylinder, standing start, two miles. Time, . .	2.30

TIME PER MILE:

Aeroplane, 1.30 Automobile, 1.45 Pierce, 1.15

Pierce motorcycles win road victories wherever they go—they satisfy their riders.

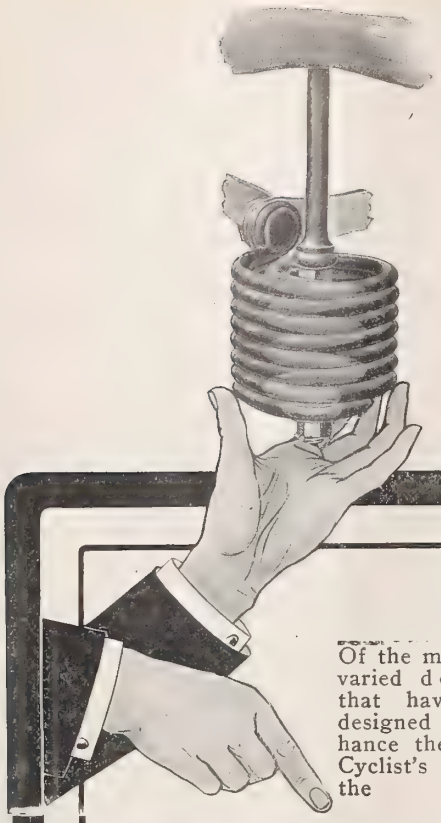
Diamond MOTORCYCLE TIRES

¶Tangible benefits in the way of careful attention to every need of the motorcyclist is what we mean by Service as distinct from Tires and Tire Mileage.

¶Diamond Direct Distributing Points have been located in 54 cities of all sections. Your dealer can always get from any of them your size and style of Diamond tire.

¶But Diamond SERVICE means more than this.



¶We have placed our own offices and our own trained men at your convenience to help you in ALL matters concerning tires. Your inquires will receive prompt and efficient attention at first hand.

¶Not only does this service go with Diamond tires—but whatever the make of tires you use we are on the ground to be of use to you.

THE DIAMOND RUBBER COMPANY, Akron, Ohio

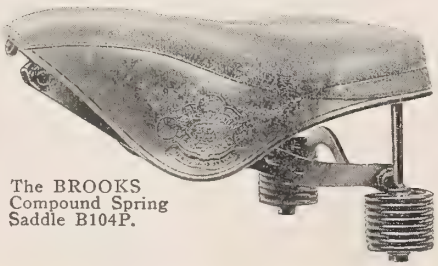
Of the many and varied devices that have been designed to enhance the Motor Cyclist's comfort, the

BROOKS

Compound-spring

stands supreme—

This is an exclusive feature of the BROOKS COMPOUND-SPRING SADDLE, and only in such saddle can that spring, as we make it, be embodied—



It is a feature that has done more to vanquish vibration than any other fitment, or component part thereof.

Other springs there are, but although they may have some virtues, they fail utterly in the matter of that compensating action which is essential to the rider's ease and comfort, and the dominating feature of the BROOKS.

Hence, include the BROOKS in the specification of every bicycle you sell, and thus ensure the complete satisfaction of your customer.

Sole Agents for Cycle Saddles—Brown Bros., Ltd., 22-34 Gt. Eastern St., London, E. C.

The BROOKS Compound Spring Saddle B104P.

Steering is not the only function of the handle bar!

¶ Cyclists require a proper position of the bar for the hand tension that makes the pedaling most efficient. The position must be different for different conditions, and conditions change according to changes in wind and road.

The KELLY Adjustable Handle Bar

provides that final touch to the best bicycles that makes them yield the maximum satisfaction and comfort to the rider. Man, woman or child will find the Kelly adjustable handle bar an aid to pleasant cycling.

¶ Cycle manufacturers and purchasers of bicycles in large quantities find the Kelly handle bar well worth including in their specifications.

Columbia BICYCLES

Wheels That Are Made Right

HAVE you ever considered the difference between the **High-Grade Two-Piece Columbia Crank Hanger** and the ordinary one-piece crank hanger found on bicycles of an inferior grade? If not, it will pay you as a progressive dealer to look into this matter, for, as you undoubtedly know, the crank hanger construction is one of the surest ways of distinguishing high-grade bicycles from low-grade machines and upon the excellence of this mechanism largely depends the easy running qualities of a wheel. The Columbia Crank Hanger has now been in use sixteen years and during that time only one slight change has been made in its construction. There is no other crank shaft so mechanically perfect because none other is so simple, so perfectly adjusted, so accessible or so easy running. It will be noted that the cranks and axles are in effect one piece yet they can be separated almost instantly and removed without disturbing the bearing adjustments. It will also be noted that the chain pull on the Columbia Hanger comes directly over the crank shaft bearing.

Columbia Bicycles Will Build Up Your High-Grade Business.

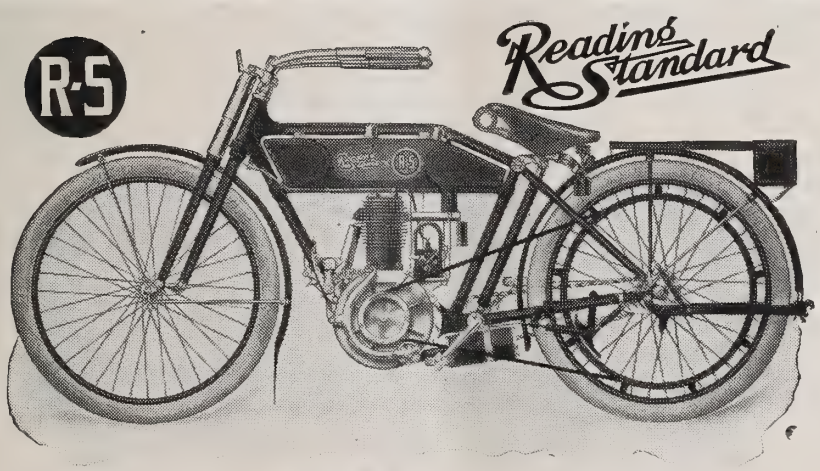
World's Record Just Smashed

on famous Goodyear Blue Streak Motorcycle Tires. On February 7, 1911, every world's record was smashed by a motorcycle fitted with Blue Streak Tires. Read that telegram, Mr. Motorcyclist. It proves just one thing: That the strongest and the speediest tires made are

GOODYEAR Blue Streak Motorcycle Tires

The Blue Streak Racing Tire is just one of five different types. We make a type to suit every need—a tire for every road condition.



A Block Tread Tire for wet, slippery pavements; Studded Tread for muddy roads, business and general endurance; Corrugated Tread for recreation and longest possible mileage; Blue Streak Plain Tread for board and cement tracks, and a Combination Tread Blue Streak for dirt tracks. We have worked out our tires to give the greatest possible efficiency and service combined. Goodyear tires are scientifically built to give long mileage and they do it. They give comfort and entire satisfaction.

A very high quality of rubber is used in Goodyear Motorcycle Tires. They are hardest to puncture and easiest to repair. Write any branch or agency for full details.

Vol. LXIII. New York, U. S. A., Saturday, April 15, 1911. No. 4

M. M. A. GETS $3,000 DIVIDEND

Its Share of Garden Profits Larger than Last Year—Dates Already Set for 1912 Show.

The two weeks' show in Madison Square Garden, New York, in January last, netted the promoters, the Licensed Association of Automobile Manufacturers, a profit of $119,000, of which 50 per cent. has been returned to the exhibitors in the form of dividends. As its share the Motorcycle Manufacturers' Association will receive $3,065. Last year its dividend amounted to $2,400.

Although there are persistent rumors that the Garden has been sold, its sale will not affect the 1912 show, as all leases at present in force must be carried out by any purchaser. As usual, the show will occupy the first and second weeks of January. The opening has already been set for the 6th of that month.

Bohsens Open Two Stores in Oranges.

Known among their intimate fellows as the "Gold Dust Twins," because of their fair hair and skin, Andrew and Peter Bohsen, two well known motorcycle riders of West Orange, N. J., have gone into the trade, and have secured the Reliance agency. Under the style of Bohsen Bros. they have opened two establishments, the headquarters being located at 75 Washington street, West Orange, and a branch at 508 Main street, Orange.

Where the Demand is for Twins.

According to John R. Ball, secretary-treasurer of the Merkel-Light Motor Co., who was in New York on Monday last, the chief trouble they are encountering at the Pottstown (Pa.) factory is lack of room. Despite the fact that the offices now occupy a separate building, the five stories of the factory proper have proved inadequate, so generous has been the Merkel share of the demand. Mr. Ball stated that though they fought against it as long as possible, the Merkel people finally have been compelled to employ separate night and day shifts. The demand, he added, is running more than two to one in favor of twins

Big Clothing House Takes on Cycles.

Marking a distinct innovation for a firm of such national prominence, and indicating a noteworthy recognition of the increasing popularity of the motorcycle and the renewed favor which the bicycle is enjoying among the well to do classes, Rogers Peet and Co., New York City, just have established at their Broadway and 31st street store a department devoted to outdoor sports, which is handling a complete line of sporting goods including motorcycles and bicycles. In the former they offer the complete N. S. U. line, while in bicycles the Columbia, Hartford and Ideal brands are carried. Anthony Fiala, the well known explorer, is in charge of the department.

Dunn Returns from Pacific Coast.

H. T. Dunn, president of the Fisk Rubber Co., Chicopee Falls, Mass., has returned from his trip to the Pacific Coast. He made a tour of the Company's branches, his route taking him as far south as Atlanta and New Orleans. A new Fisk branch has recently been established in the latter city.

Diamond Opens Two More Branches.

The Diamond Rubber Co., of Akron, O., has opened branches in Saginaw, Mich. and Toledo, O., for the distribution of its tires. In the latter city the branch is located at 740 Madison avenue, with C. W. Greene in charge.

"CLEANED OUT" THE RUBBER SHOP

Big Purchases of Tires that Moved Quickly —Receiver in Charge and Hare is on the Run.

Neither Harold H. Hare nor Charles H. Seifert are any longer in charge of either The Rubber Shop at 6 Bradford place, Newark, N. J., or the Auto Tire and Repair Shop, on Halsey street, in the same city. A receiver, Francis Child, Jr., is in possession. Hare is said to have lived up to his name and "streaked it" for parts unknown, and though Seifert is in Newark he is very anxious for folks to believe that he retired from The Rubber Shop several weeks ago.

Behind the receivership is a tale of unusual rascality. Seifert implies that Hare is the "goat," but it is certain, at any rate, that before the receiver took control of it The Rubber Shop had been pretty well "cleaned out." In preparation for the "cleaning," the Shop ordered large shipments of tires from New York branches of practically all the well known American tire manufacturers; the orders were placed late in March and were to be paid for, subject to cash discount, in 10 days. As one of the partners in the Shop once had served as credit man for a big tire factory, the account was considered a safe risk. When suspicion was aroused, however, it was found that there were no tires in The Rubber Shop; further investigation disclosed that three negro truckmen had been engaged to "move everything in the place to New York;" the work was performed on Friday night last and the negroes were unusually well paid for it.

They carted the tires, $15,000 worth, to the store of the Braunwarth-Weiss Co., 981 Eighth avenue, New York, and when it was

located, the tire makers, who had engaged counsel and applied for a receivership, quickly secured an order restraining the New York house from disposing of the goods, and summoning the partners to court. They claimed to have purchased the tires, but differed as to amounts paid for them; one placed the figure at $12,000; the other at $5,000. In order better to serve the creditors' interests, the United States court in New York appointed as anciliary receiver the same man selected in New Jersey.

The missing Hare is said to have made his departure in a fine new automobile for which he paid $50 on deposit.

New Comers in Motorcycle Business.

H. M. Howe has opened a motorcycle store in Palmer, Mass. It is located on Main street.

L. S. Marchand, of Larwill, Ind., is handling the Marvel motorcycle. He has taken four counties in northeastern Indiana.

The Marvel Motorcycle Agency, 105 S. Warren street, Trenton, N. J., has closed for the Marvel again, for 1911. J. H. Hearnen and H. F. Erb are the proprietors.

R. N. Willer, 408 South Sixth street, Springfield, Ill., has taken the agency for the motorcycle made in Springfield, Mass. He will handle the Indian as a separate department from his plumbing business.

Shirley Carrell, of Hartford City, Ind., has taken a location on West Washington street, west of the old Hartford hotel, for a bicycle repair shop. He will open the place for business about the first of May.

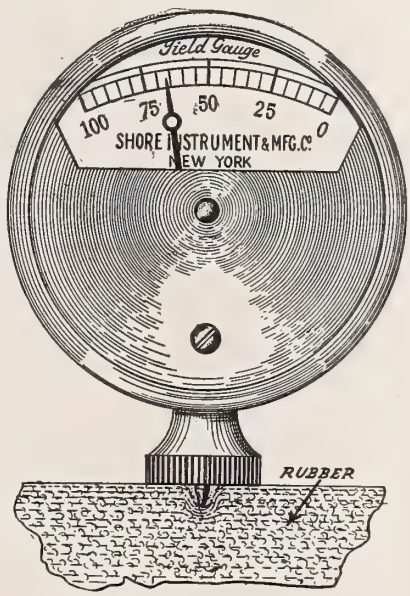
Malvern Homan, of Reading, Pa., is acting as sub-agent for the Merkel line of motorcycles. He is located at 27 South Tenth street, and has taken a window display for the Merkel at A. S. Weber's cigar store, 29 South Fifth street.

Ide Joins New Departure Staff.

John R. Ide, of Detroit, Mich., has joined the sales organization of the New Departure Mfg. Co., of Bristol, Conn. He will continue to reside in Detroit, where he has been with the sales department of the Hyatt Roller Bearing Co., and will be connected with the New Departure Western branch, which is shortly to be opened.

Hendee in Larger Quarters in London.

The London office of the Hendee Mfg. Co., Springfield, Mass., has moved a couple of doors further down street. From its former address of 184, Great Portland street, W., it has changed to larger quarters at 178, Great Portland street, W.



Pearne Becomes a Sales Manager.

William S. Pearne has been appointed sales manager of the Briggs & Stratton Co., Milwaukee, Wis., makers of ignition apparatus. He formerly was connected with Julius Andrae & Sons Co., of that city.

FOR TESTING QUALITY OF RUBBER

Ingenious Instrument Designed to Improve on Biting and Pinching Methods—How It Indicates Elasticity.

While it generally is known that the testing of the materials of which automobiles are built constitutes one of the most important operations incident to their manufacture, the extent to which testing apparatus recently has been developed is, perhaps, not so well known. Up to the present time numerous methods have been devised for measuring the hardness of metals or other comparatively hard materials,

SHORE YIELD GAUGE

but until recently no way had been found to measure the comparative hardness or flexibility of such soft substances as rubber or leather or compositions.

Owing to the peculiar characteristics of rubber the accurate determination of its degree of hardness or flexibility is difficult, this being due in part to the fact that in the elastic form in which it is used most commonly for commercial purposes, it can be neither scratched nor permanently deformed as is done when other substances are tested. Recently, however, a device which is styled a "Yield Gauge" and which is designed for the testing of such soft substances, has been brought out by the Shore Instrument & Mfg. Co., 555-557 West 22d street, New York City.

The device is the invention of William F. Shore, the originator of the Scleroscope, an instrument for the testing of metals by a not wholly dissimilar principle. The instrument, which is shown in the accompanying illustration, operates by being pressed on the material to be tested, the indicating hand which normally rests at 100 indicating no yield, moving in direct proportion to the amount which the lower jection sinks into the substance. If, in testing a substance the indicator hand shows a deflection of five degrees there has been a yield of 95 per cent. and a resistance to yield of 5 per cent., which latter figure may be taken as the relative hardness of that material. If, on the other hand, a very hard substance having practically no yield is tested the indicator hand will swing back to the zero mark, indicating no yield.

The gauge is intended to take the place of the old and inaccurate methods of testing rubber by biting it or by indenting it with the finger nail and relying on the sense of touch to indicate the flexibility. As the indications show the same relative qualities in all materials, it is evident that two good tires, for instance, would show approximately the same degree of flexibility and that a poor or slightly hardened tire would show a relatively higher degree of hardness, though this must necessarily vary with the make of tire and in solids and pneumatics. According to the scale of limitations which has been worked out by means of the gauge, a good tire should show a yield of between 55 and 60 per cent., while a poor one shows a yield of only 35 to 40 per cent.

Glanz's Plug for Motorcycle Tires.

Neglected small cuts in motorcycle casings are responsible for a large proportion of the short lived tires that motorcyclists are constantly kicking about, and wondering why such is the case. One of the most potent reasons for this neglect of small cuts, aside from the general disposition of riders to postpone as long as possible any needed attention to their tires because the work generally ties up their machines, is that the cost of vulcanizing a quarter inch hole in a casing, and an aperture three times as large, practically is the same, and the average rider cannot see the wisdom of paying the rather high cost of vulcanizing for small holes in the casing. With the idea of providing an easy and quick method of repairing at small cost small holes in moorcycle casings, Joseph Glanz, 379 Capital avenue, Hartford, Conn., has brought out a motorcycle size of his well known "collar button" type of bicycle tire plug. The plugs are made in a variety of sizes up to one-fourth inch stems with one inch bottoms. One of the advantages claimed for the plug is that it necessitates no cutting, burning or otherwise enlarging the hole in the tire, and easily may be inserted with a special tool which is provided with the box of plugs and cement.

Frenchmen Find New Rubber Supply.

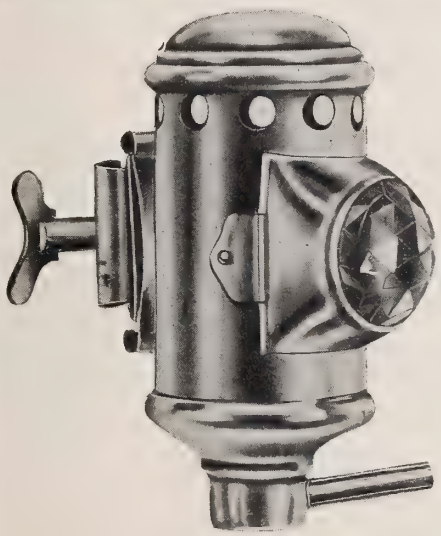
According to the French Academy of Sciences a new source of rubber supply has been found in the Malay peninsula and archipelago. The substance is a gum containing from 10 to 20 per cent. of pure rubber, and is found in abundance in the forests of southeastern Asia.

TIRES CONCEIVED 60 YEARS AGO

Present Day Innovations that Are Not Originations at All—Thomson Foresaw Even Spring Tires.

Although J. B. Dunlop generally is acclaimed the inventor of the pneumatic tire, and though he undoubtedly is responsible for its adoption, that he was not the first inventor is fairly well known. That honor belongs to one R. W. Thomson, of Adelphia, Middlesex county, England, to whom, in 1847, a patent was issued, of the existence of which, however, Dunlop was unaware when, some 40 years later, he devised an inflated tube for his son's tricycle.

Dunlop was a veterinary surgeon who long had lived in Ireland, where he still resides. He was born in Scotland, however, and only last year it was proposed to erect a statue of him in the city of Edinburgh. A committee was formed and a considerable fund pledged when Thomson's son filed a protest, and as a result the Edinburgh authorities refused to recognize Dunlop as the first inventor and declined to permit the erection of the statue.



While these facts are of comparatively recent record, it is not so well known that Thomson not only patented the idea of an inflated tube, but that his descriptive claims cover practically all of the many adaptations of the pneumatic principle which were "originated" 50 years later, after the tire had come into practical and extended use, and which in fact are still being "originated." These include such things as a leather casing, Thomson's patent describing "a leather belt including an inner casing of canvas saturated with rubber and sulphurized, and a strong outer casing," the tire being "distended with air, preferably by a small pipe fitted with an airtight screw cap," instead of the valve in use today.

The leather tire, however, is, as stated, but one of the innumerable family of "innovations" which since have seen the light, Thomson's patent mentioning even that will o' the wisp which still is being pursued so indefatiguably—the spring tire. He not only suggested that his belt or tire might be "distended with a metal spring," but that it might be distended by "sulphurized pieces of rubber, horsehair or sponge," thus foreseeing most of the various forms of the non-puncturable tire. He also described a wheel having "a series or cluster of small or circumferential tubes enclosed in an outer casing," while as another modification he described a pet idea which has taxed the brains of many latter-day inventors—the tube which is divided transversely into a number of separate air-tight compartments, each having its filling tube.

Although Thomson's tire was designed for use on horse-drawn vehicles, and though it was completely lost to sight until Dunlop had achieved world-wide success, Thomson, nevertheless, had well defined ideas of the benefits which accrue from the use of air tires, as he refers to "the small amount of power requisite to propell a vehicle equipped with pneumatic tires, the absence of jolting and noise, the high speed attainable and the gentle motion resulting from the use of the new construction."

Baker Brings Over a Tail Lamp.

Tail lamps, which are one of the many things that motor car drivers have to worry about, cause the motorcyclist little or no concern, because he is not required to carry one. However, some careful few, who feel that in displaying a tail lamp on

their machines they are giving themselves added protection from rear-end collisions, as well as warning other road users of their presence, have fitted rear red signals to their machines. Heretofore there has been no real lamp for motorcycles on the market, probably because of the lack of a reasonable demand for such, and the only devices of the sort available were a red reflecting bulls eye that required the rays of another light to render it of any value, and a bicycle lamp with a tiny red rear bullseye. It has remained for F. A. Baker & Co., 10 Warren street, New York City, to offer the first real tail lamp for motorcycles. As the accompanying illustration shows, the lamp is of neat design, small and light in weight, all desirable features for such purpose as it is intended for. It is an imported article and burns acetylene gas, which may be taken either from a generator or gas tank.

Making a Magnet of a File.

Small nuts and washers or other small parts which have fallen into the crankcase may often be removed without the necessity of dismantling the engine by means of a magnet. By taking about a dozen turns of one strand of the cord to which a lighted electric lamp is attached around a file it will be magnetized quite strongly enough for the purpose.

TO KEEP CUSTOMERS SATISFIED

Part that Full Stock of Parts Plays in Attaining that End—Spring Leaves as an Example.

Dealers who handle machines fitted with spring forks of the leaf type will find it advantageous to carry in stock, to meet calls for replacements, several of these leaves in various colors to match the standard finishes in which the motorcycles of that particular make are sent out. It is no reflection on any leaf spring fork to say that spares should be carried by the dealer, for the leaves do break just as on the finest motor cars, where thousands of dollars have been spent in an endeavor to obtain springs that would be easy riding and stand the punishment that roads inflict.

On leaf spring forks it usually is the long leaf with the curled under end that breaks, as this member carries the greater part of the load that is imposed on the front wheel. Therefore this leaf should be carried in greater quantity and variety of finish than the smaller leaves. When a motorcyclist comes in with a broken spring leaf, it is a wise dealer that will see that he goes out with a good one even if a machine on the floor or in the shop has to be stripped to accomplish the repair.

It should be borne in mind that a satisfied rider is the best advertisement a dealer can have, and a rider is not apt to be in a pleasant state of mind if he comes in for a part and finds that he cannot obtain it inside of several days. Let a motorcyclist stop riding and it will not be long before someone will notice it and inquire the reason. There are few riders who if unable to ride because of delay in replacements will not blurt out the cause without hesitation, and as bad news travel fast it soon reaches the ears of rival dealers. Then the dealer who did not strain a point to keep his customer in good humor by making a replacement promptly begins to hear that "the ——— fork springs break often and that riders cannot get parts for several days." However unjustified such statements may be, they nevertheless make an impression on prospective customers, and furnish a vital reason why dealers should make a special effort to make prompt replacements on damaged parts.

Baseball Sent with Every Bicycle.

Taking a leaf from the soap makers, breakfast food people and other concerns who give premiums to stimulate the sale of their goods, the G. H. Westing Co., 229 Massachusetts avenue, Indianapolis, Ind., motorcycle and bicycle dealers, are this week giving away baseball suits to all youngsters who purchase bicycles. The plan is working well, and Westing expects a new sales record when the week is up.

"Speechmaking" at Club Banquets.

Enjoyable though they may be in many respects, motorcycle and bicycle club dinners and banquets are as a rule a period of extreme uneasiness and embarrassment for a majority of those present from the moment that the toastmaster begins his introductory remarks. The reason for this embarrassment is that few riders of either motorcycles or bicycles, who of course form a majority of those present at such affairs, have the ability to stand up at a formal gathering, where usually there are many ladies, and talk smoothly and intelligently on any subject.

The average man at a banquet may be quite an "orator" at a club meeting or quite an entertainer among his fellows, but when called on to speak at a formal gathering he usually becomes possessed of "stage fright," and either becomes tongue-tied or "rambles" in a fashion not usually agreeable to behold nor to listen to. This sort of thing could be avoided and such occasions be made plesant for all if the entertainment committee would but provide a set program and adhere to it instead of leaving it to the toastmaster to call at random on members and guests who cannot acquit themselves creditably.

It would be better to have a fixed program of speakers, with subjects previously assigned, so that they would have time to prepare remarks that could be delivered in an interesting manner and without the halting and stumbling that too often characterizes the post prandial exercises at the average function. In addition it would set everyone at ease if the toastmaster announced that only those would be called on to whom subjects previously had been assigned.

The gift of public speech is rare and not easily acquired.

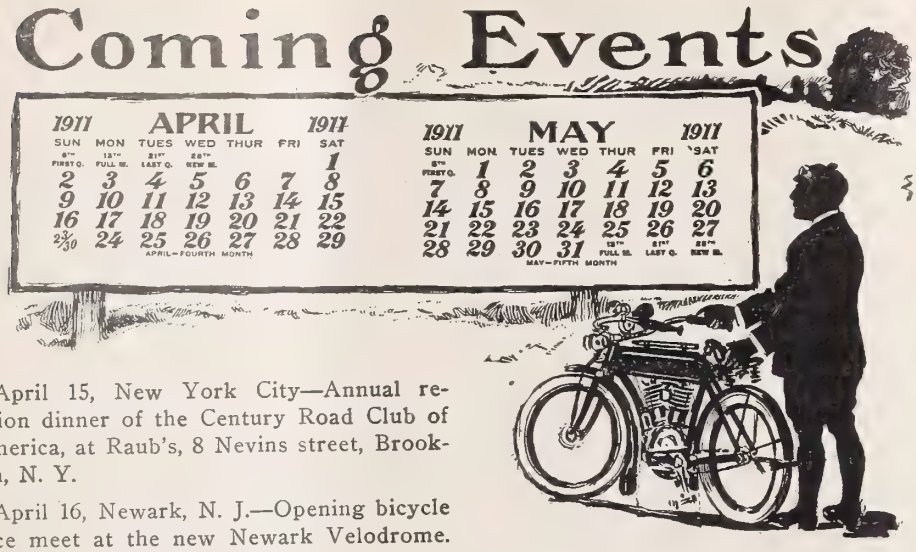
Word that it is Well to Avoid.

In its place the word "game" is fitting and proper; out of place it usually conveys unpleasant suggestion. Applied as a descriptive of a serious industry, or an industrial movement, it is not merely undignified, but belittling; it suggests that the industry is unstable, that it is full of gambling risks and unwholesome chances. Despite the fact, reference to the "bicycle game" and the "motorcycle game" is by no means unfamiliar. They are "sporty" terms which fall readily from the tongue of the unthinking and the sportively inclined. Some of those who employ the characterization appear to fancy that it betokens either or both intimate acquaintance with the business and smartness of intellect or expression.

It would seem time, however, that effort were made to check the use of the word. Of course its employment has not been restricted to either the bicycle or the motorcycle business. The automobile industry likewise has suffered its effects. In the latter trade, however a determined effort to eliminate the belittling and unpleasantly suggestive term is in progress. Several of the better known manufacturers have forbidden its use by their employes. In fact, the president of one of the biggest concerns in the entire automobile industry has gone so far as to issue printed and signed instructions that the word "game," as a descriptive or characterization of the automobile business, shall not be used in conversation or in correspondence by any of the company's thousands of employes.

The Bicycling World and Motorcycle Review is no purist, but the offensiveness of the word "game," when so improperly implied, is such that it cannot but hope that there are those in the bicycle business who will emulate the example of the automobile manufacturer who has resorted to the use of such a determined and wholesome measure to prevent the belittlement of the industry in which he is engaged, however unthinking or unconscious the belittlement may be in individual instances.

The Endurance Run and the Meet.



The proposal to eliminate the national endurance contest as a feature of the F. A. M. meet is one that should be given uncommonly thoughtful consideration.

While there is no doubt that the touring side of motorcycling requires and deserves encouragement, and that its development is very much to be desired, and that ultimately it will serve the best purposes of the trade and pastime, the promotion of an organized tour or tours as a substitute for the endurance run necessarily must be so much in the nature of an experiment that none can foresee its result or measure its probable success. The endurance contest, on the other hand, is a known quantity and its success is foreordained. The competitive spirit runs high and is difficult to check. For that reason it appears reasonably certain that if the endurance contest is eliminated from the national meet, it promptly will be taken up elsewhere. It always has served to give publicity and it also has brought to the meet a sufficient number of visitors from a distance to assure it a truly national complexion; and all who ever have had to do with the annual function are only too well aware that the number of such visitors is none too numerous.

The idea of national and converging tours possessed the leaders of the F. A. M. as early as 1906. In that year both an endurance run and a tour were a part of the national program. When first announced it seemed that the tour would be a rousing big affair, but as the date of the meet approached, the "prospects" dwindled in number until only a corporal's guard actually put in an appearance.

In view of the present agitation that experience points to a moral. With much larger numbers to draw from, a tour has more chances of success, but it certainly appears that the safe way is to provide for both a contest and a tour. When the touring "spirit" mounts higher the contest then might be eliminated without imperiling the success of the meet.

Coming Events

April 15, New York City—Annual reunion dinner of the Century Road Club of America, at Raub's, 8 Nevins street, Brooklyn, N. Y.

April 16, Newark, N. J.—Opening bicycle race meet at the new Newark Velodrome.

April 16, New York City—Harlem Motorcycle Club's closed club meet at Brighton Beach track.

April 16, New York City—Century Road Club Association's ten mile handicap road race, Floral Park, L. I.; open. Rain date, April 23.

April 18, Buffalo N. Y.—Motorcycle Manufacturers' Association meeting at Hotel Statler, 10 a. m.

April 19, Boston, Mass.—Boston Motorcycle Club's fourth annual Patriots' Day run to Worcester; open.

April 19, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Providence, Boston and return; 136 miles. First section.

April 21, Redlands, Cal.—Mile high motorcycle climb.

April 23, New York City—Motorcycle Touring Club of New York's first cup trio-trial, Newburg and return, 150 miles; open.

April 30, New York City—Eastern Division C. R. C. A. spring century; open.

May 7, New York City—Harlem Motorcycle Club's club championship races at Brighton Beach track.

May 7, New York City—Empire City Wheelmen 15 mile handicap bicycle road race, open, starting from Floral Park, L. I.

May 7, Chicago, Ill.—Second annual reliability run of the Chicago Motorcycle Club to Waukegan, Libertyville, Elgin, Aurora and return.

May 7, New York City—New York Motorcycle Club's annual double spring century run to Southampton, L. I., and return.

May 14, Guttenberg, N. J.—Opening motorcycle race meet on Guttenberg track.

May 14, New York City—Century Road Club of America, New York State Division, spring bicycle century run.

May 21, Baltimore, Md.—Crescent Bicycle Club's spring 50 mile pleasure run.

May 21-22, Seattle, Wash.—Two day endurance contest of the Seattle Motorcycle Club to Vancouver, B. C., and return.

May 24, Toronto, Canada—Toronto Motorcycle Club's endurance run to London and return, 256 miles; open.

May 28 and 30, Chicago, Ill.—North Shore Motorcycling Club's two day race meet on Hawthorne track.

May 28, New York City—Century Road Club Association's 30 miles handicap road race, Floral Park, L. I.; open. Rain date, June 4.

May 28-29-30, Cleveland, O.—Three day endurance run of Cleveland Motorcycle Club

May 29-30, Newark, N. J.—Twenty-four hour endurance run of the New Jersey Motorcycle Club to Atlantic City and return.

May 30, Chicago, Ill.—North Shore Motorcycling Club's race meet at Hawthorne track; open.

May 30, Bridgeport, Conn.—Bridgeport Motorcycle Club's race meet.

May 30, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

May 30, Norwich, Conn.—Norwich Motorcycle Club's reliability run.

May 30, Detroit, Mich.—Racemeet of the Motorcycle Club of Detroit Wheelmen at State Fair track.

May 30, Springfield, Mass.—Motorcycle race meet of the Springfield Motorcycle Club, at the Springfield Stadium.

May 30, Elmira, N. Y.—Elmira Motorcycle Club's first summer race meet.

May 30, Newport News, Va.—Peninsula Motorcycle Club's endurance run to Richmond and return.

May 30, Long Branch, N. J.—Long Branch Cycle Club's second annual road race meet; open.

May 30, Asbury Park, N. J.—Twenty-five mile road race of the Monmouth Cycle Club.

May 30, Plainfield, N. J.—Third annual 25 mile handicap cycle race of the Plainfield Cycling Club.

May 30, Grand Rapids, Mich.—Bicycle and motorcycle races at Michigan State Field Day, under auspices of the Western Michigan Cycle Club.

June 4, New York City—Concourse Motorcycle Club's fourth annual run to Savin Rock, Conn., and return; open.

June 4, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Greenfield, Springfield and return; 175 miles. Second section.

June 18, Baltimore, Md.—Crescent Bicycle Club's annual spring road race.

June 18, Floral Park, L. I.—Century Road Club of America, New York State Division, 50 mile handicap bicycle road race; open.

July 3-9, Rockford, Ill.—Racing carnival of the Illinois-Iowa Motorcycle Association.

July 4, La Salle, Ill.—Third annual open motorcycle race meet of the Illinois Valley Motorcycle Club.

July 4, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

July 4, Savannah, Ga.—Savannah Motorcycle Club's race meet.

July 4, Asbury Park, N. J.—Opening motorcycle meet at the Asbury Park track.

July 4, Grand Rapids, Mich.—Annual open bicycle road race of the Western Michigan Cycle Club.

July 16, New York City—Motorcycle Touring Club of New York's second cup trio-trial, Newburg and return, 150 miles; open.

August 1-2-3-4, Atlantic City, N. J.—Summer meeting of the Cycle Parts and Accessories Association and the National Association of Cycle Jobbers.

August 6, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Rockport and return; 200 miles.

August 20, Grand Rapids, Mich.—Annual open, six hour, two man bicycle team race of the Western Michigan Cycle Club.

September 10, New York City—Century Road Club Association's 100 miles record run; open. Rain date, September 17.

September 17, New York City—Motorcycle Touring Club of New York's third cup trio-trial, Newburg and return, 150 miles; open.

September 24, New York City—Century Road Club of America 100 mile bicycle record run, open, from Floral Park, L. I.; rain date, October 1.

October 1, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Springfield, Boston and return; 200 miles.

DE ROSIER'S ENGINE PROVED TRUE

Shipped from California and Officiaally Measured in New York—Examination that Ended Doubts and Wrangles.

Once and for all, and surrounded by an insurmountable wall of proof of the accuracy of the measurements taken, the much mooted question as to whether Jake DeRosier's famous 7 horsepower Indian, "No. 21," was or was not oversize, was settled on Thursday afternoon, 13th inst., at the store of F. A. Baker & Co., 2142 Broadway, New York City, when Chairman Thornley, of the F. A. M. competition committee, in the presence of several reputable witnesses, officially measured the engine and found it well undersize. Its exact displacement is 60.85 cubic inches, which leaves a considerable margin of safety inside the 61 inch limit.

DON JOHNS ON "NO. 21" WHICH WAS TESTED AND FOUND TRUE

Unusual interest attached to the proceedings by reason of the numerous bitter wrangles which have ensued among the rival racing factions in Los Angeles as to the size of the engine, and also because it was the first machine to be shipped across the continent, or from anywhere else for that matter, to be measured by the chairman of the competition in accordance with his suggestion to that effect made some time ago, with a view to putting a stop to the questioning of the authenticity of measurements.

Among those present in addition to the chairman were Oscar Hedstrom, designer of the Indian; A. G. Chapple, of the Merkel-Light Motor Co.; H. F. Bidwell and Ferdinand Mercier, of the Baker establishment, representatives of the New York motorcycle publications, and several local riders.

The first part of the program consisted in several of the witnesses inspecting the lead seal placed on the lock of the trunk in which the machine was shipped, to see that it had not been tampered with. It should be understod that the entire machine and not the motor alone was sent on. Immediately after Don Johns, DeRosier's protege, broke the amateur records with the machine on the 4th inst., when he did 20 miles in 14:23⅗, Referee Payton, of San Francisco, who officiated, sealed the machine with copper wire and red sealing wax, placed it in a special motor trunk, such as is used in sending racing machines from one point to another, placed the trunk on a truck and trailed it on another motorcycle all the way from the track at Playa del Rey to the Wells Fargo office in Los Angeles, and never let the trunk out of his sight until the express company officials had sealed the lock. He then mailed the keys of the trunk together with the bill of lading to Chairman Thornley.

After the trunk seal had been broken the trunk was unlocked by the chairman and the machine drawn out, preceded by a rigid fork, a racing helmet and several minor articles. When the machine was exposed to view much surprise was expressed when it was seen that it was fitted with the regular Indian cradle spring fork. Hedstrom explained this by stating that Johns had used the spring fork in his record ride, because the track was so rough that he had found in practice that he could not hold it at high speed with a rigid fork. This was the first time that the machine ever had been sent against records with a spring fork, and is a notable innovation in racing practice.

Because of the wide reputation which it has gained through DeRosier's wonderful work on it, together with the fact that it now holds all American professional and amateur records from one to 100 miles, and practically all world's records as well—for there are none that equal the American figures—"No. 21" was the object of great attention. Many of those present were taking their first look at it, and they looked long and close, especially when the motor was dismantled, apparently to see if they could fathom the secret of its wonderful power.

When the machine was unpacked it was rolled out on the sidewalk and photographed, and then returned to the store and the preliminaries leading up to the working of the "third degree" began. In sealing the machine the Westerners had done their work well, and the engine was enclosed in a veritable veil of copper wire, the ends of which were sealed with red sealing wax, as also were the cylinder studs and nuts, and the intake pipes, and domes. The auxiliary ports were concealed by rags wrapped around the lower sections of the cylinders. The two-inch Goodyear "Bluestreak" racing tires also were objects of interest, because of their narrow contact surface, having a raised tread scarcely an inch in width that gave traction. It also was noticed that the tires were not worn at all on the sides, indicating that on the Los Angeles motordrome the riders do not lie horizontally when at speed, as is the case on smaller board tracks. It undoubtedly will surprise many to learn the high cost of shipping the machine by express, the charges being over $44, which figure probably will act as a wholesome deterrent on shipping many racing machines from the Pacific Coast to New York for measurement. However, the heavy trunk in which the machine was shipped was quite an item in the bill.

Once the dismantlement of the engine commenced, it progressed rapidly and the cylinders and heads were off in short order. The measuring processes were the severest ever applied to any machine in this country, or any other for that matter. They were extraordinarily close and exacting compared to the English methods, where the officials take an ordinary steel scale graduated no finer than sixty-fourths of an inch, and lay the rule across the bore and down the stroke of an engine undergoing measurement. Such measurement is accepted if no appreciable discrepancy between the bore at the end of a cylinder and part way down the stroke is discernable to the naked eye.

Inasmuch as cylinders are bored slightly taper with the smallest end at the top to allow for expansion under heat, the measurements of the bore were taken at the lower ends of the cylinders just outside the slight "bell mouth" that is provided to

allow easy starting of the rings when the cylinder is being slipped on the piston. The front cylinder first was tackled. The maximum diameter was sought and found to be 3.253 inches. Then the minimum diameter was located and the micrometer reading was 3.248 inches. The total of these figures was halved to give the average, which was 3.250 inches, and this was officially recorded as the bore of the front cylinder. The bore of the rear cylinder was taken in the same manner, the maximum diameter being 3.253 inches, the minimum 3.250 inches, giving an average of 3.251 inches, all fractions below one one-thousandth of an inch being disregarded. The measurements were checked by four persons.

The measuring of the stroke proved more complicated, for the method used was more rigorous than ever was used heretofore. The crankcase of the motor was opened, the flywheels and pistons taken out, the flywheels separated and the connecting rods and pistons detached. Then the left flywheel, on which remained the left end of the main shaft together with the crank pin, was mounted on lathe centers, which previously had been tested for trueness.

Micrometer measurements then were taken from the main shaft to the crank pin, and the necessary calculations made, which gave the stroke as 3.667 inches. After this measurement had been proven and found correct, the displacement of the cylinders was calculated. So carefully and painstakingly were the measurements taken, to secure an extreme degree of accuracy, that the work occupied the better part of four hours. When the displacement was figured with the above measurements, the capacity of the front cylinder was found to be 30.417 cubic inches, and that of the rear cylinder 30.436 cubic inches, giving a total of 60.85 cubic inches. The final calculations were made by formula and logarithms, and agreed within one one-hundredth of a cubic inch, the variation being due to a further carrying out of the decimal in the calculation which was worked out by logarithms.

During the process of measurement the cylinders were exposed to a warm afternoon sun, which brought up the subject of heat expansion, and Hedstrom jokingly remarked that if the cylinders were again measured after being warmed by the sun that they probably would be found larger. Talking more seriously, he spoke of the effect of the heat of the body transmitted in handling metals, and said it is well known that if a cylinder be handled until it absorbs some heat from the hands that the metal will expand ever so slightly. As a result of the measurement, the amateur records from one to 20 miles, inclusive, established by Don Johns, now are recognized and accepted, this being an important factor in the decision to ship the machine. Exhibiting energy quite in contrast with the tardiness in such matters which has resulted in former record trials, Referee Payton got his officials together, secured the necessary affidavits and sent them to New York immediately after the trial, so that they were in the chairman's hands before the machine arrived. As they were found correct, nothing else was lacking to make the records authentic save the measurement of the machine.

With regard to the instruments used in measuring, they were received by the chairman from the makers, L. S. Starrett & Co., together with a certificate of accuracy, on the day before DeRosier's machine was measured, and they had been used on nothing else in the interval.

After the measurements were completed, the engine was re-assembled and put back in the machine. The latter will remain on exhibition in Baker's up-town store, where the elaborate "ceremonies" occurred, until next week, when it will be shipped to the factory to be made ready for DeRosier's trip abroad.

Hedstrom to Go Abroad in June.

Oscar Hedstrom will sail for England the first week in June to look after the Indian riders in the Tourist Trophy race. It is possible that DeRosier will accompany him, for although the latter was expected to leave this month, there are reasons which may cause him to postpone his departure. It is said that Charles Spencer and Charles Gustafson, the crack factory team who created the 24 hours record two years ago, are itching to meet DeRosier at the Decoration Day meet at Springfield, and arrangements may be made so that they will be accommodated. On the track nearly every day, these two know every splinter in it, and think that they could make even the peerless DeRosier "hump some" to beat them. If such a meeting should be arranged it would be a battle royal worth going miles to see.

Rome Programs 250 Mile Reliability Run.

If present plans do not go awry, Rome, Italy, will have nothing on its namesake, Rome, N. Y., in the way of a big time on Decoration Day. The New York Romans who ride motorcycles are preparing to make the staid and patriarchial publicans of their city howl loud and long with joy by putting on a 250 mile reliability run. A. S. Noonan, who is the pioneer motorcyclist of that city, and who helped make it famous by his indestructible tools, is arranging the contest and already has tentative entries from 40 riders in Rome, Utica and vicinity. The course will be a 50 mile circuit between Rome and Utica, and will be covered five times.

Detroit's Club Within a Club.

Motorcyclists have added so much new life to the Detroit Wheelmen, which, organizing with age, had become largely of a social nature, that within the ranks "The Motorcycle Club of the Detroit Wheelmen" has been formed, with 20 charter members. Whether the tail will in this case wag the dog is as yet uncertain, but it would seem logical if such proved to be the case. The officers of the new club follow: Jake Groll, president; Malcomb Eddy, vice-president; Fred Rath, secretary-treasurer; Walter Fanger, captain. Affiliation with the F. A. M. was decided on. The club will hold its first race meet on Decoration Day at the State Fair track, and expects to have a big entry list, including several star riders.

Wray Will Undertake to "Come Back."

William H. Wray, of New York City, who was prominent in motorcycle racing a few years ago, but who has been out of the sport of late, is going to emulate Jeffries and others who have hit the toboggan and try to "come back." It is reported that Wray has been dickering with A. G. Chapple, of the Merkel racing squad, and will ride a Merkel in trade rider events. Wray, who made his motorcycle reputation as a daredevil on Peugeots and Indians, is booked to appear at the opening Guttenberg meet May 14.

Frank Hart Joins the Indian Tribe.

Frank Hart, of New York City, the well known trade rider racing man, has been signed by the Hendee Mfg. Co., to ride an Indian this year. He naturally will take the place of Walter Goerke, whose injury practically will keep him out of racing for the season. Hart has been riding for three years, and has developed into one of the best riders around New York. Heretofore he has ridden R-S and Excelsior machines, and will make his debut on an Indian at the opening Guttenberg meet on May 14.

Teubner Recovering from a "Puncture."

W. J. Teubner, of Pottstown, Pa., one of the Merkel racing men, is convalescing from an attack of appendicitis which put him in the hospital for a month. However, the "puncture" has been closed, so that Teubner again is in the stock class, and he expects to be fit to get into action on Decoration Day, the grand opening of the season.

Snow Stops Harlem Club's Race Meet.

Heavy rain and snow during the preceding night which rendered the track unfit, caused a postponement of the closed club meet which the Harlem Motorcycle Club of New York City had scheduled at Brighton Beach track, Sunday, 9th inst. Weather permitting the meet will be held Sunday, 16th inst.

Robinson to Fly the Merkel Colors.

W. H. Robinson, of New York City, who turned professional last year, is going to ride a Merkel this season, according to report. He will make his first appearance on this machine at the Guttenberg opening, May 14.

DE ROSIER TALKS AND STARTS EAST

Leaves Los Angeles After Delivering Opinions of Motorcycle Tracks—Preparing for His English Invasion.

Los Angeles, April 7.—Jake DeRosier took his little hammer in hand the other day, just prior to his departure for the East and England, where he will compete on the famous Brooklands concrete track, and flayed the tracks on the Pacific Coast in particular, and those of the country at large generally. In view of Jake's position in the motorcycling world, what he has to say in that regard is of some value—certainly it is worth listening to.

"I have a record that I am not at all proud of," he began, sitting in the office of the Indian machine the other day. "I have had more falls and more broken bones than any other rider of my length of service in the racing business; and of all my falls there are very few that I can attribute to carelessness of my own or some other rider. Most of them are due solely to one thing—an improperly constructed track. Knocking? Sure I am knocking. If some of the other riders would knock more and the public officials of the country at large pay attention to the knocks, there would be fewer deaths on the track.

"The vast majority of the tracks in this country are not fit for a 7 horsepower or more powerful machine to race on. Hardly any of them are banked properly. Either they are not banked sufficiently, or the banking is not placed correctly. I remember on one occasion I was trying out a new and exceptionally powerful machine on the Coliseum track here in Los Angeles, and in making the turn the wheels just skidded from under me and I went on about my business to land flat on the tip of my nose, plow up several yards of the track with the bridge of my nose and eyebrows and otherwise do the air ship stunt without an airship The machine was wrecked beyond repair. They tried to tell me that I had turned weak, me!" The sniff he gave can't be reproduced in cold print.

"No, sir," he proceeded, "the Los Angeles motordrome, the new track in Oakland, the track in Indianapolis and the one they have at Springfield, Mass., are about the only tracks in the country that I call perfectly safe for a high powered motorcycle.

"Oh, yes," he said with laugh, in answer to a question, "I am going to keep on, but it has come to just this in the racing game nowadays: It is the craziest man who wins—it is the man who cares least about his neck, and the necks of those he may be riding against. On the smaller tracks in this country a fellow can't let out his machine to the full. Every time we come to a curve we have to shut off and then open up again as soon as we reach the straight. That makes it impossible to show what there is in the machine. Suppose you are doing a round of a mile track in 50? Well, but for that shut off we could cut it down to say 45. No, I believe that 7 horsepower machines should be barred from most of the mile tracks in the country; they are all right for the stock motors."

By the time this is in print, Jake will have started for New York and London, via Salt Lake City, Denver, Chicago, Akron, O., and possibly other cities. He will stop at Oakland on a little private business, and then drop off at Salt Lake, where he hopes to make arrangements for a race meet when he returns from England. He will do the same at Denver, and possibly at Chicago. In Akron he will see the Goodyear tire people. He has had them making a special trunk in which he will carry his supply of their "Blue Streak" motorcycle tires to England, for he expects to use the "Blue Streak" exclusively in his racing in England.

After attending to his business in New York, when, by the way, he hopes to renew many old acquaintances, he is going to Springfield, Mass., where his machine will be given a thorough overhauling at the Indian factory. From there he will go direct to England, reaching London, he hopes, about the first of June, just in time for the coronation festivities.

C. R. Collyer, with whom Jake is to race at Brooklands, is viewed with respect by the American rider. The race between them will be one of the sport features of coronation week. It probably will be run in ten mile heats, best two out of three, DeRosier says, but he added that the details have not been definitely decided.

Rushville 200 Miles Race Declared Off.

Disinclination of local horsemen who are training their nags on the Fair Grounds track to relinquish it for motorcycle racing, is responsible for the indefinite postponement of the scheduled meet at Rushville, Ind., on Sunday, 29th inst., when a 200 miles race was to have been a feature. Difficulty in obtaining a sanction also caused the promoters not a little worry. It is planned to hold the meet at Rushville some time durin the summer, or, if conditions prevent, in some other place in the Hoosier State.

Another Club in Cincinnati.

Cincinnati, O., has another motorcycle club now. It styles itself the Cincinnati Motorcycle Club, and was organized at a meeting held in the automobile club quarters. The officers are as follows: A. K. Sanders, president; G. M. Stearns, vice-president; R. W. Lewis, secretary; M. F. Platt, treasurer. Favorable action regarding affiliation with the F. A. M. was taken. The new club indicates its intention of being active in the promotion of reliability runs and races.

SPRINGFIELD BIDS FOR F. A. M. MEET

Massachusetts City Unexpectedly Files Application at Eleventh Hour—Three Candidates Now in the Field.

Almost at the eleventh hour and fifty-ninth minute, virtually, the Springfield (Mass.) Motorcycle Club came into the open as a candidate for the F. A. M. meet, when on Sunday last, 9th inst, its application was received by the president of the national organization. When the bid was received great surprise was occasioned, for there had been no hint that Springfield desired the meet this year.

The time limit for filing applications expired on Monday, 10th, having been extended from the 8th to give possible last last minute applicants a chance to get in. The wisdom of the extension appears to have been justified.

There now are three candidates for the meet, Indianapolis, Buffalo and Springfield. Detroit, which had been expected to file an application for the meet, in view of its preliminary canvassing, but at the last minute the Detroit Motorcycle Club sent word that it had abandoned its efforts until next year.

In filing its application for the meet the Springfield club did not state when it desired to hold the meet or say anything regarding the F. A. M. endurance run, which is one of the privileges accorded to the club holding the annual meet. However, the Bay Staters let it be known that they had an entertainment fund of $2,500, and guaranteed all visitors a good time if the meet is awarded to their city.

As a further argument as to why they should get the honor, the Springfield club stated that it had the best track in the East, and that it was one of the fastest in the country, neither of which statements are open to question. The track is a three lap board structure and has a speed record of nearly 91 miles an hour.

Springfield applied for the 1910 meet, but withdrew at the eleventh hour.

Commissioners for Two Western States.

G. Howard Toncray, 1536 Stout street, Denver, has been appointed F. A. M. Commissioner for Colorado. E. H. Hammer, 512 Second avenue, Minneapolis, has been given the similar office for the state of Minnesota. Toncray is a private owner; Hammer is one of the most energetic dealers in his territory.

Danish Government Taxes Race Meets.

Bicycle race meetings are to be included in the various entertainments on the receipts from which the Danish government proposes to levy a tax of 15 per cent. This is a bad lookout for sport promoters in the land of butter and eggs.

Benzol as a Substitute for Gasoline

Periodically far-seeing individuals point out a source of possible concern to the motorcyclist in the threatened scarcity of gasoline and the impending need of developing other forms of fuel and of perfecting carbureters to make use of them. Among such proposed substitutes, benzol, one of the many derivatives of coal tar, not infrequently is mentioned, and tests, some of which have been reported in these columns, have shown conclusively that it has many properties that would render it readily available in case of a genuine shortage of gasoline. At the same time it is probably not generally understood that benzol is neither a particularly rare compound nor one that is difficult to obtain, but on the contrary, that it is to some extent being wasted at the present time for very lack of a sufficient market to render its production profitable.

In urging the advantages to follow the development of benzol as a gasoline substitute, Henry Hess, the well-known Philadelphia manufacturer and engineer, is concerned not so much with the possibility of alleviating the motorcyclists' distress in the event of a fuel famine as in urging the advantages that may reward the carbureter designer who is early in the field with a device which is qualified to take care of the special fuel. Gasoline may be as "extinct as the Dodo" someday, he says in effect, but "sometime before that we shall be asked to pay prices that will not be pleasant to contemplate, but that will stimulate the carbureter designer and be productive of a golden harvest for every inventor of carbureters who is possessed of a good advertising instinct also.

"Are we, however, really altogether at the mercy of this limited supply and of those in control of it?" he continues. "It would seem not.

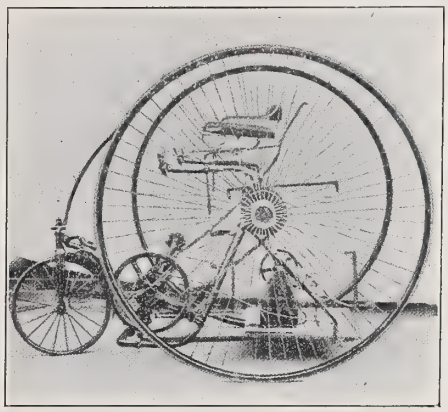
"Enormous quantities of coal are daily being converted into coke, and of coal suitable for coking there is a supply in sight for a century or two, even at the progressive rate at which we are using (and largely wasting) our store. Only a small fraction of this coke is being produced in byproduct ovens; yet the byproducts are more valuable than the coke itself.

"The chief byproduct is coal tar. The modern chemist has found in this evil smelling and foul coal tar a mine of the most wonderful materials. The first were the aniline dyes, then followed a host of marvelous medicinal products. Only a short time ago Ehrlich was able to announce that his specific '606' was definitely proven to be a cure for one of the world's worst scourges, ... and that similar derivatives bid fair to rid the world of sleeping sickness, possibly even of cancer.

"And now this coal tar again bids fair to rescue us from the 'Octopus' by presenting us with 'Benzol.'

"One hundred pounds of dry coal coked in a byproduct oven will yield about 68 pounds coke, 15 of gases, 10 of ammonia water and 7 of tar. We are most interested in the tar, which contains some 4o per cent. of light oils, of which again some 65 per cent. falls into the benzol class.

"'Clean benzol' has been offered and used for automobile motors in Germany; its use has, however, not been attended with general success, because it was assumed that it could be used with motors and carbureters suitable for gasoline. Tests made with 'raw benzols I, II and III' have given better results, quite satisfactory in fact; but these are not generally offered, as the manufacturers (the German Benzol Union is practically in control) prefer to market their 'clean benzol,' great quantities of which are absorbed by the chemical industries. Benzols I, II, III range in specific gravity from 0.885 to 0.883, 0.877 to 0.875 and 0.872 to 0.870, a maximum range in any one grade not exceeding 0.003 and in all three of only 0.013.



"Not only these three grades but others, known as Toluol and Xylol, are eminently suitable for use. One hundred pounds of coal yield 1.38 pounds of benzol, of which about one pound is a suitable fuel for internal combustion engines, such as are used in automobiles, motorcycles, motor boats and aeroplanes, as well as in stationary engine work.

"Already there are being installed in the United States many byproduct coke ovens. The day is not far distant when the old, wasteful type of coke oven will be a relic of the past.

"We convert at present many thousands of tons of coal into coke each year. That would yield 1 per cent., or many hundreds of tons of suitable fuel benzols, and make the automobile owner and motorcyclist independent of the present petroleum products."

Early Tricycle with Electric Power.

Gasoline and steam were not by any means the only aspirants for favor as motive powers with the early builders of motorcycles. One of the first motorcycles to be built in this country was electrically propelled, and was constructed on the lines

of the tricycle, as the accompanying illustration shows. This machine was built for P. W. Pratt, of Boston, Mass., in 1889. The motor, which was operated by six cells of storage battery, transmitted power to the rear wheels by chains and sprockets with gear reduction. Steering was through a tiller controlling the front wheel. The machine had a speed of six miles an hour on the level, and was fitted with a hand operated brake. Its weight was 300 pounds and it was used on Boston streets for several weeks.

To Assist Understanding of Ignition.

To the novice and often to the more experienced motorcyclist ignition systems frequently constitute more or less of a mystery, when information enabling clearer understanding would stand them in good stead and demonstrate that the mystery is no mystery at all. In imparting such understanding "Ignition and Spark Plug Talk," a vest pocket compendium being circulated gratuitously by the Jeffery-Dewitt Mfg. Co., Detroit, Mich., makers of the well-known Reliance spark plugs, will prove of material assistance. As a certain amount of elementary electrical knowledge is necessary for a comprehension of the field embraced by ignition, a considerable portion of the 44-page booklet is devoted to this subject, which is treated in a non-technical way and incorporates definitions of the principal electrical units and standards. The theory of induction and of magnetos and dynamos is explained concisely; there are chapters devoted to induction coils, and there also are many useful hints concerning care and maintenance.

To Keep Snow Off of Terminals.

According to a motorcyclist who rides all year 'round, if snow gets on the magneto secondary terminal and causes skipping, wrapping the terminal with tire tape will remedy the trouble. Should tape be unavailable, a piece of patching rubber from the tire repair kit will prove equally useful in insulating the exposed end of the terminal.

ILLINOIS NATIONAL GUARD ENLISTS THE AID OF MOTORCYCLES.

MOTORCYCLE SCOUTS OF COMPANY E, SEVENTH INFANTRY, I. N. G., IN MARCHING ORDER

After working hard for some time, Second Lieutenant Robert L. Carlson, Company E, Seventh Infantry, Illinois National Guard, has succeeded in organizing a squad of motorcycle scouts. Twenty members will be allowed for each regimental squad; Carlson's already practically is filled. The first "mobilization" took place in Chicago last Sunday, April 9. The scouts all lined up with their machines to have their pictures taken in front of the armory, with their uniforms on and their blanket rolls and "heavy marching order" paraphernalia. Monday was inspection night. When the captain came to look them over, there were 14 machines in the ranks, with their owners, besides a few who had not brought their mounts along for various reasons. The large majority of the machines were 4 horsepower singles. Before disbanding arrangements were made for the run on the following Sunday morning to Fort Sheridan, 40 miles distant, where rifle practice will be held.

Concourse Prepares for Savin Rock Annual.

A tip top shore dinner, chances to share in the distribution of four prizes and the company of a jolly crowd for a day all for the small sum of $2 is the unusual "bargain offer" which the Concourse Motorcycle Club of New York City makes to motorcyclists who care to participate in its fourth annual run to Savin Rock, Conn., on Sunday, June 4. Savin Rock, be it known for the benefit of those who are not wise, is situated about five miles outside of New Haven and is about 75 miles from New York. It is one of the most popular resorts in Connecticut, and attracts large week-end crowds throughout the season. The run will start at 7 a. m. from the club quarters, Jerome avenue and 165th street, where the riders will be checked on starting and at the finish. There will be three individual prizes for the riders making the highest score, and a silver trophy for the club other than the promoting organization having the most members on the run. Entry blanks can be obtained from Archibald M. Smith, captain, 1071 Franklin avenue, New York.

Newark Motorcyclists Entertain Ladies.

Making its first venture into the social whirl, the New Jersey Motorcycle Club of Newark gave a very successful "ladies night" at Berkeley hall, Clinton avenue, on Tuesday, 11th inst., about 125 people being present. It was an invitation affair, but nevertheless the club cleared expenses and a little besides on the sale of refreshments and coat room checks. Between the dance numbers there were introduced recitations and vocal and piano selections. One of the features of the evening's entertainment was a "motorcycle duet," which, it was claimed, was the first musical number dedicated to motorcycles in this country. The entertainment committee consisted of President P. W. Stevens, George E. Post, Henry N. Davis, Oscar Smith and Howard Hill.

New York Elects Officers; Reduces Dues.

No opposition ticket being presented, the regular slate of candidates was selected to office at a meeting of the New York Motorcycle Club on the 12th inst. The new officers are as follows: William Wood, president; Frank Seery, vice-president; M. E. Toepel, secretary-treasurer; Albert Kreuder, captain; A. C. Klages, first lieutenant; J. F. McLaughlin, second lieutenant; directors, George P. Jenkins, E. C. Kicherer, Edward Malloy and T. J. Sixsmith. The initiation fee and monthly dues were reduced to $1 and 25 cents per month, respectively. A form of entry blank for the tenth annual spring run to Southampton, L. I., on May 7, was drawn up, approved and ordered printed. The club probably will affiliate with the F. A. M. shortly.

Chicken for the Kansas City Indians.

A chicken dinner was the piece de resistance set before the Indian Motorcycle Club of Kansas City, Mo., when it reached Oak Grove, 40 strong, on a club run, Sunday, 2d inst. The outward run of 36 miles had whetted the riders' appetites to a keen point, and they left nothing but clean picked bones when the feast was over.

Touring Club Schedules an Open Race.

In accordance with the action taken at a regular meeting of the Motorcycle Touring Club of New York, Affiliated, on Monday night, 10th inst., there will be a professional class in the "trio cup" trials, provided at least five entries are obtained for this class. If professionals participate they will be eligible to compete only for a major trophy and will not share in the individual medal awards which will be given to amateurs who qualify in each trial. The same rules will govern in the professional class as in the amateur. It also was voted to give all club members taking part in the trials double points in the contest for the Widmayer trophy. This action was taken with the object of inducing the club members to turn out strong for the trials. Entries for the trials close on Tuesday, 18th inst., and after that date all further entries will be charged double fee. One new member was elected, and a new application posted. The club occupied for the first time its new rooms, which are in the same building as the old quarters and which are more comfortable.

Providence's Election and Plans.

C. S. Williams was elected president of the Providence (R. I.) Motorcycle Club for the ensuing year at a well attended meeting held in Verdandi hall on Wednesday night, 12th inst. The other officers chosen were the following: Elmer L. Stewart, vice-president; J. G. Edwards, secretary; B. A. Swenson, treasurer; Sydney Williams, captain; Lyman P. Witcher, first lieutenant;

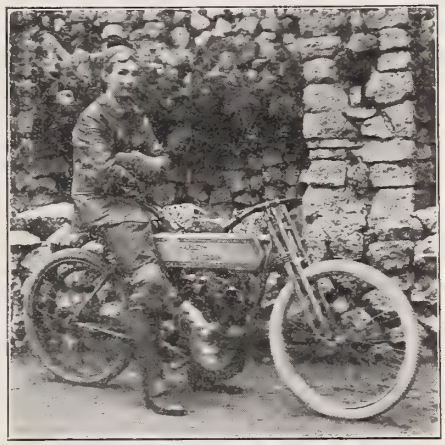
W. D. Burt, second lieutenant. Six new members were elected. It was voted to enter a club team to represent Providence in the inter-city team race at the Decoration day meet at the Springfield stadium. The club's activities in a contest way will begin with the annual "herring run" to Taunton, the date of which will be announced later. A program of club runs also was arranged. B. A. Swenson presented to the club a handsome trophy to be competed for during the season. The nature of the competition was left to the club to decide, and a committee consisting of E. L. Buffington, C. S. Williams and C. H. Westcott was appointed to arrange a contest for the trophy. Other prizes will be offered by the club for the same event. With the already large number of motorcyclists in the city, and the rapidly increasing quota of new riders a very active season is looked for. The forthcoming Providence-Niagara Falls tour is being looked forward to with great interest by a great number of local riders, who have signified their intention of participating and are arranging their vacations so as to be able to "join the procession."

Motorcyclist Hired to Close Mufflers.

Motorcycles are being used by the Automobile Club of Syracuse, N. Y., to discourage speeding and running with mufflers open among automobile owners in that city. The club has employed a motorcyclist to patrol the principal streets, and when he observes a motor car driver violating the law he is commissioned to overtake the offender and present him with a club card on which is printed a request that motorists refrain from speeding or running with mufflers open. It is believed that this polite method of calling motorists' attention to infractions of the law will be more effectual than if they were pursued relentlessly for every violation.

Banquets as Membership Boosters.

Banquets are fine membership boosters, thinks the Kansas City (Mo.) Motorcycle Club, which gained several new members at its "affair" on the 3d inst. It has been decided to hold one of these "feeds" once a month, as it has been shown that not only do they bring in new members but they also cause the old members to come out in large numbers, giving the secretary an opportunity to round up delinquents on dues. The club will hold Sunday runs throughout the season.



Rome Motorcyclists Complete Organization.

Permanent organization of the Rome (N. Y.) Motorcycle Club was completed at a meeting held at Arthur Strowbridge's bicycle store last week, when a constitution and by-laws were adopted and the following board of directors were elected: Frank S. Baker, Arthur Strowbridge, Robert Suits, I. B. Haynes, W. Simmons, Richard Wolzmuth. The club voted to join the F. A. M.

BERRETH ROMPS UP PORTLAND HILL

He Leads Good Field up Long Grade in Fast Time—Single Takes Honors From the Twins.

It was a "single cylinder day" at the season's first motorcycle hill climb, which occurred at Portland, Ore., on March 26th, under the auspices of the Portland Motorcycle Club. Edward Berreth, riding a 4 horsepower Harley-Davidson, made the fastest time of the day, and easily led his class. In fact, Berreth's performance was in the nature of an eye opener, for not only did he capture the "single" class with more than a minute to spare, but he also

EDWARD BERRETH

outran the twins by seven seconds. His time for the 3 3-10 miles course was 5:18. Second place went to W. L. Hughes, Indian, who was clocked in 6:20, and J. J. Carlson, Thor, was third in 6:44.

In the 5 horsepower class, in which the twins had their innings, Otto Muessig, Indian, was the swiftest, topping the hill in 5:25. Arthur Beck, Thor, was the only other starters in this class to finish.

Strange to say, neither of the two starters in the 7 horsepower division finished, and four of those in the single class failed to conquer the hill. The summary:

Four Horsepower Singles.

	Rider and Machine.	Time.
1	Edward Berreth, Harley-Davidson	5:18
2	W. L. Hughes, Indian	6:20
3	J. J. Carlson, Thor	6:44
4	E. Beletski, Minneapolis	6:45
5	H. Kildow, Harley-Davidson	6:56
6	James Wall, Indian	6:57

Failed: H. E. Meade, Excelsior; C. Thompson, Yale; W. Conley, Thor; A. Torphy, Reliance.

Five Horsepower Twins.

1	Otto Muessig, Indian	5:25
2	Arthur Beck, Thor	5:27

Buffalo's Smoker a Big Affair.

That the Buffalo (N. Y.) motorcyclists know how to "do things" was proven on Wednesday evening, 5th inst., when about 500 of them and their friends turned out at the second annual smoker of the Buffalo Motorcycle Club, which was held in German-American hall. It was the largest gathering of motorcycle riders ever held in the city, and the stag was a big success. It also was the largest undertaking ever attempted by the club, and the manner in which it was carried out argues well for the success of the F. A. M. meet if the latter goes to the Bison City.

For the occasion, the large dance hall was converted into an impromptu music hall, and the squared ring on the stage in full view of everyone indicated the nature of the evening's entertainment. Smokables of all varieties were to be had in abundance, as well as plenty of "gasoline" and the other accessories that go with a "Dutch supper." At each plate was a program containing several of the popular songs of the day, and a three piece orchestra furnished music.

Several exciting bouts between local artists were put on, one of which produced a double knockout. The feature of the evening was a five handed mix-up in which three men were put to sleep and the two remaining scrappers used up all their steam. Between the exhibitions of the manly art there were banjo and mandolin selections.

Poughkeepsie Gets Chicken at Blue Stores.

Lured by the prospect of a tempting dinner, 15 members of the Poughkeepsie (N. Y.) Motorcycle Club turned out on Sunday, 2d inst., for the club run to Blue Stores, 35 miles distant. Blue Stores is a small hamlet on the post road to Albany, and when the motorcyclists got there they practically owned the place during their stay. Incidentally, they voted that the Blue Stores brand of chicken was the real article, and they are going to ask for a second helping soon.

Erie Club Acquires Larger Home.

New quarters, located at the corner of 16th and Peach streets, have been taken by the Erie (Pa.) Motorcycle Club, which has outgrown its old rooms. In its new home the club has all the conveniences and appointments of a modern club house, including card, pool, meeting and locker rooms, parlor, kitchen and shower baths. The club will hold Saturday runs throughout the season, and is waging a campaign among its members to discourage speeding.

When Jolly Ceased to be Merry.

Five dollars and costs for riding with an open muffler were added to the $25 that Leroy Jolly, a motorcyclist of Indianapolis, Ind., was obliged to pay for riding his machine at more than the legal speed in the Indiana capital. He was charged by the motorcycle policeman who arrested him with going over 30 miles an hour. Lee Bourne, charged with riding his motorcycle on the sidewalk, was fined $10 in the same police court the same day.

What Causes the "Mixture" to Go Wrong

Not many motorcyclists are wont to consider the why and wherefore of carbureter adjustment—the necessity for varying the quantity of gasoline or air. If the engine misses, the tension on the air valve is increased or decreased or the needle valve is regulated until the requisite regularity is obtained. Why the adjustment is necessary is easy of solution—the mixture is wrong. But why the mixture should be right at one time and wrong the next, even though practically the same roads are traversed and the gasoline used is from the same tank, is not so easy of solution. Various theories for the cause of the phenomenon have been advanced, the most generally accepted being that the variations are caused by humidity in the air.

Various forms of compensating carbureters which automatically vary the quantity of gasoline or air, or both, according to the piston speed and the suction in the inlet pipe, have been placed on the market, though comparatively few of them have proven as efficacious as has been expected. In commenting on this condition and advancing a theory of his own, J. C. Coulombe, M.S., says in the Motor World:

"The automatic air valve is not to be condemned because it has not brought about perfect carburation; it accomplishes what it was designed for—to compensate for the variations in engine speeds. There are further conditions which exist and must be overcome. I am of the opinion that when a carbureter has been designed to automatically adjust itself to the constantly changing atmospheric conditions, we shall have practically perfect carburation. . . . .

"We know that temperature varies and that high temperatures have a tendency to make liquid fuel more volatile, but, on the other hand, the air becomes more rarified and thereby gives less oxygen for equal volumes.

"Humidity affects the mixture to some extent, to what degree is not known. If it seriously affects the mixture, appliances to dry the air before entering the carbureter might be devised.

"Atmospheric pressure has never been considered seriously, but I shall attempt to prove here that variation in air pressure is as big a factor to consider as the varying engine speed.

"The piston displacement of a motor remains constant at all air pressures, and the suction produced in the inlet passage must vary, not only according to the speed of this displacement, but also according to the atmospheric pressure. The greater the air pressure he greater will be the rush of air past the spray nozzle, and, therefore, the more gasoline drawn into the cylinder, that is, it would be so if no compensating air valve was used, but such device compensates for this increase as well as for increased engine speed. We must not forget, however, that air pressure does affect the float chamber and the greater the air pressure the more gasoline will be forced out at the spray nozzle; in other words, it is equivalent to raising the level in the float chamber."

Continuing, the author quotes Waldo's Meteorology as authority for the statement that periodic variations of air pressure take place and that "the annual change of air pressure, that is, the change in the average pressure from month to month, presents a variety of characteristics for different regions of the earth." . . . . Still quoting Waldo, he says: "The greatest and most regularly occurring variations in the mean air pressure take place on the continents, and the least on the oceans and their coasts. There are, however, many local deviation from this law. . . . . These periodic changes are, however, marked by the far greater accidental changes which must be eliminated before the periodic changes are visible. . . . . Accidental or non-periodic oscillations in the air pressure are those changes which occur more or less gradually from time to time, and which do not belong to the regular diurnal or annual periodic changes. They are due to the movement, over the earth's surface, of areas of abnormally high or barometric pressures."

In resuming his dicussion, Mr. Coulombe says: "I will not attempt here to give tables showing the average or mean variations for these accidental changes, for it is the extremes that affect carburation and the frequency of their occurrence. I have here at hand eight daily weather maps, covering a period of 12 consecutive days. I have not purposely chosen these; I have merely taken the last eight maps received from the weather bureau. I have picked four large cities; these figures remain very nearly the same for their surrounding territory:

Date.	Boston.	Chicago.	Seattle.	New Orleans.
March 30, '11....	29.1	29.5	30.2	29.9
" 29, "	29.7	29.45	30.4	29.85
" 28, "	29.45	30.	30.4	30.15
" 27, "	30.05	29.45	30.2	30.1
" 25, "	30.55	30.2	30.2	30.1
" 23, "	29.65	30.45	29.9	30.
" 22, "	29.9	29.8	30.1	30.
" 20, "	29.65	29.9	29.9	30.15
" 18, "	30.	30.25	30.2	30.1
Total	268.05	269.	271.5	270.35
Average	29.78	29.89	30.16	30.04

"These readings are in inches on a mercurial barometer, and, as a 30 inch column of mercury is equal to a column of water of 35 feet or a column of gasoline 38 feet high, every variation of an inch of mercury means a variation of 15 inches of gasoline—mercury being 15 times as heavy as gasoline.

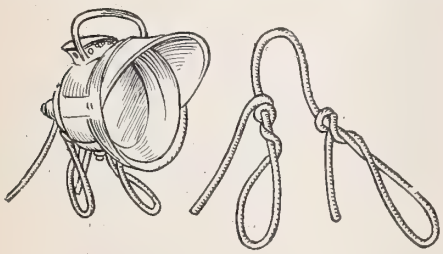
"Referring to the table of daily pressures, it will be noticed at New Orleans there was a difference in 12 days between maximum and minimum pressures of but .3 of an inch—equivalent to 4½ inches of gasoline. Seattle .5 of an inch or 7½ inches of gasoline. Chicago 1 inch or 15 inches of gasoline. Boston 1.45 inches or 21¾ inches of gasoline.

"A person may appreciate what effect this variation has on carburation by operating a small motor boat using an ordinary simple mixing valve, having no float feed or other means of maintaining constant level. As the gasoline is utilized, the level of course changes, necessitating the readjustment of the gasoline needle at intervals, as the engine commences to choke, miss-fire and finally stop.

"In the case of Boston, for instance, the effect of the daily variations would be the same as starting a motor on March 18 with a carbureter having no float feed. On the 18th the tank is filled to a depth of 13½ inches of gasoline and the motor run until the level of the gasoline in the supply tank is reduced to 8¼ inches (March 20th). On the 22d, the tank is replenished until the level is brought up to 12 inches, when the motor again runs until the level is brought down to 8¼ inches. On the 25th, the tank is filled to a depth of 21¾ inches and the motor run until the level is reduced to 12¾ inches on the 27th, and further run until reduced to 5¼ inches on the 28th. On the 29th, the tank is filled to a depth of 9 inches and the motor run until the tank is dry—the following day.

"Of course one must consider the fact that the variations are liable to be greater in the spring and fall and that Boston was in the storm center during some of these 12 days. Even then there were some fine days, such as the 18th, 22d and 27th, and fairly good days on the 20th, 23d and 29th.

"On the other hand, New Orleans must have had very fine weather, as the pressure varied but .15 inches from normal. On the 29th the barometer dropped to 29.85 inches and rose to 30.15 inches on the 20th and 28th. But even this small variation, showing but .3 of an inch between maximum and minimum, means 4½ inches reduced to a gasoline column.



"Even this difference is likely to cause considerable trouble, when we note the fact that manufacturers are placing the float

chamber as close as possible to the spray nozzle in order that the comparative level between the two shall vary less than one inch on grades.

"As to altitude, it is not an uncommon thing in cross country touring to have a change of 1,800 feet, and a variation of 200 feet is a daily and sometimes hourly occurrence. A difference of 200 feet in altitude is equivalent to changing the level in the float chamber approximately three inches."

Lamp Tripod for Roadside Repairs.

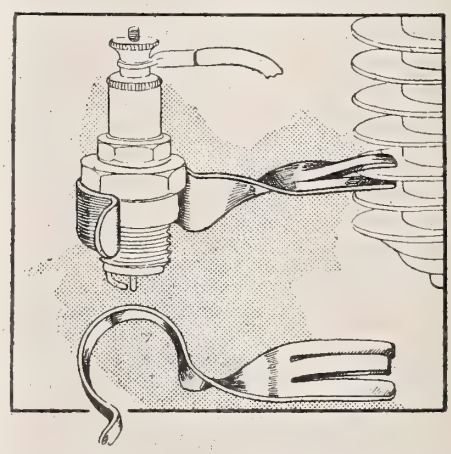
Not the least important factor in the easy and successful repair of a puncture on the road at night is proper light. It is nothing short of a calamity to be caught

without a light on such an occasion, but even with a good lamp it is no simple matter to so arrange it so that the light strikes strongly on the tire. Either the ground is uneven so that the lamp will not stand upright, or in many cases it is so constructed that it will not stand alone. A clever English rider has originated a remarkably simple contrivance for holding the lamp in a convenient position on the ground while repairing a puncture in the dark. As the accompanying illustration shows, it consists of a piece of stiff wire twisted to form a sort of tripod or easel for the lamp to set into. While sufficiently strong to support the lamp, the flexible property of the wire permits of it being bent to set the lamp at any desired angle. Other points in its favor are its light weight and compactness, permitting it to be folded and carried in the tool box, requiring a very small amount of space. The limited length of the usual rubber gas tube leading from the generator to the lamp, of course, necessitates the dismounting of the generator and the placing of it on the ground close to the lamp when the latter was used to facilitate tire repairs, but such extra labor could be obviated by using an extra long tube and coiling the surplus portion around the frame.

Effects of Spark Plug Lengths.

While spark plugs may fit as regards the diameter of the hole in the cylinder and the number of threads to the inch they may not fit as regards the length of the plug itself. It is as equally important, however, that the points are not situated too far back in the cylinder as it is that they do not project too far out into the valve pocket. The effect in the former case is to cause slower combustion of the charge and consequently less power. When they extend too far the tendency is for them to become hot enough to cause pre-ignition and its attendant evils. Experiments have shown that the best results are obtained when the actual working parts extend just clear of the inner cylinder wall.

Trouser Guard with Puttee Effect.



From the ordinary bicycle trouser guard to the motorcycle legging is rather a long

jump and leaves a gap that until quite recently has not been bridged. To meet the needs of cyclists or motorcyclists, who, desiring to retain their dressy appearance when in the saddle, do not care to don the leggins or puttee, but still seek something that will afford a greater degree of protection to the trousers than the ordinary guard and yet be of neat appearance and compact make-up, C. W. Bluemel & Bros., Wolston, Coventry, England, have brought out a combined trouser clip and puttee strap. As the accompanying illustration shows, the accessory consists of a clip and straps which are wrapped around the trousers, bringing them snugly around the calf of the leg and converting the trousers into a sort of temporary puttee. In attaching the device the clip is fastened to the front of the trousers at the bottom, which then are folded neatly, and the strap then wound upward in spiral fashion and hooked to the second strap just below the knee. When not in use the straps can be carried in the pocket, occupying but minimum space. The device is claimed to prevent unsightly bulging of the trousers below the knees, and to convert the trousers into "knickers" in one minute.

To Test Plugs Without Shock.

Testing the heat in a flatiron by the feminine method of applying a wet finger to its under side is nothing, to the average motorcyclist's way of thinking, as compared with the tortures that result from an endeavor to test out a doubtful spark plug on the outside of the average engine cylinder. There would be no difficulty about it if the pattern maker who is directly responsible for the exact shape of the cylinder exterior, only could be persuaded to leave a little projecting shelf or lug big enough to hold the plug in place when connected to the ignition wire. There are reasons why the pattern maker does not exhibit that evidence of kindly forethought, however, so that the average motorcyclist is constrained to go on trying to balance the plug on the sloping cylinder

head with one hand while he switches on the spark with the other.

That he need not run the risk of frequent high-tension shocks which this involves the accompanying picture indicates. Any rider who is skilful enough to use a hacksaw and a file, readily may fashion for himself a little clip, after the manner of the one shown. By using fairly heavy sheet iron for the purpose the flat end may be made strong enough to secure a good grip on one of the cooling flanges and the plug thus held securely while its own condition or that of the ignition system is investigated without risking a shock.

For Clean Plugs in a "Dirty" Engine.

Generally speaking, the remedy for a smoky and sooty engine is to reduce the amount of lubricant in the crank case, but in some engines this cannot be done without risk of starving the bearings. Where the difficulty is so pronounced as to cause chronic fouling of the spark plugs that portion of the evil may be cured by raising the plugs slightly in their regular mounting. This may be effected by inserting a thin collar or several standard washers under the flange of each plug, care being taken to see that sufficient length of thread is left to afford a secure hold for the plug. Some authorities even contend that it is expedient to enlarge the spark plug hole and get short length of iron pipe in the end of which the plug may be screwed. This seldom is necessary, however, and has the disadvantage of reducing compression to some extent.

THE "PRO" VS. THE TRADE RIDER

Racing for Cash Unprofitable and Trade Rider Gets It Just the Same—Opinions of One of Them.

"Turn professional? No, sirree; not at the present stage of the sport, with the chicken-feed purses the rule," remarked a well known trade rider the other day when the proposition was suggested to him. "If I wanted to make a living as a 'pro,' I would take up automobile or bicycle racing or aviation or something in which big money is offered, but the penny prizes that are offered at present to 'pros' in the motorcycle game don't tempt me for an instant," he went on.

"I've looked at it from a cash standpoint and I can't see any money in being a 'pro' at present. Why, $20 or $30 or even $50, which sometimes is hung up, is nothing to a 'pro' when you consider the expense he is under and the time between races that he is idle. Of course there are a few of the high-class professionals who get a salary from a manufacturers, but they are mighty few. The most that the average 'pro' gets from a manufacturer is the loan of a racing machine.

"The rider has to pay the transportation on the machine, as well as for himself, his hotel expenses, buy any parts that he may need, and everything else as well, except perhaps a pair of tires which may be given to him now and then, but the tire makers are not as generous as they used to be, either. Even though he may be successful and win several races the prizes are so small that they are swallowed immediately by expenses.

"Good prizes offered at the coming Springfield meet, you say? Yes, they are higher than anything heretofore offered, I will admit; but I think one reason for this is that the club up there is so anxious to run a meet that it was willing to put up big money if necessary to help the thing along. I don't think that the purses that the Springfielders are offering will become general or popular with other promoters for some time to come.

"The way I figure it at the present time a 'pro' gets about 75 per cent. glory and 25 per cent. cash for his work, and, to my way of thinking, this ratio is all out of proper proportions. Undoubtedly the present class of 'pros,' even though they are not numerous, are capable of putting up the best riding to be had in the country, but I can't see the advantage of being a 'pro.' In fact, a trade rider is better off at present, for while he may not take cash directly, he gets it indirectly in the way of expenses; he gets a machine from the manufacturer and has nothing to worry about except when actually racing.

"In a nutshell, the whole situation is this: When a trade rider makes good and is willing to stay in that class, the manufacturer keeps him under his wing; sort of nurses him, so to speak. But let him turn 'pro' and the manufacturer changes his base immediately. He lets the new 'pro' have a machine, and then says: 'Now you are a "pro" and must get out and hustle for yourself, for I am not going to put up for you any longer. You are going to get money for riding now, and it is only fair that you should pay your expenses yourself, just the same as you would have to do in any other occupation that you followed. I will let you have the use of a machine, but in all other things you will have to pay the freight yourself.'

"Now I don't mean that all of the 'pros' are treated like this, because I know there are a favored few who are well taken care of and who receive salaries, but the majority of them have their own row to hoe, and it is no easy hoeing, let me tell you, unless a fellow has some other means to fall back on. Some of those who have turned 'pro' had a great awakening when they found that the manufacturers who had taken care of them before were not going to play 'angel' any longer. Do you wonder that those of us who know what is on both sides of the fence are willing to stay in the trade rider class for a while longer?"

Friends Forever to Test Boys' Endurance.

The Friends Forever Society, which is a Morristown (Pa.) organization which fosters athletics for young folks, will on June 3 next hold what is styled a bicycle endurance run. Despite this impressive title, the contest will cover a distance of only 19 miles, which, according to the rules, must be completed within 90 minutes. The contest will be run on the lines of automobile endurance contests. There will be observers, checking stations, controls, etc., and a committee will examine the condition of the bicycles after the "strenuous" undertaking is completed. The prizes will be awarded on the point system.

Coney Island Track Scheme Up Again.

For the 'steenth time within the last 20 years the suggestion of a track at Coney Island is afloat. H. F. Bidwell, manager of F. A. Baker & Co.'s New York branch, is the father of this 1911 suggestion, which has not yet acquired the force of a movement. Bidwell, however, is quite enthusiastic that the amusement promoters at the island can be sufficiently interested to contribute the necessary funds for the construction of a track. In earlier years many other enthusiasts held the same opinion until they approached the owners of the amusement enterprises.

Members of the Elkhart Motorcycle Club, Elkhart, Ind., have agreed to co-operate with Chief of Police Rinehart in maintaining a strict compliance with the city's speed laws.

BOYD AND CASSIDY BREAK EVEN

Each Take Two Races at Denver's Opening Motorcycle Meet—Harry Good Takes What's Left.

Gobbling two races each, from a total of five, Glen Boyd and Dan Cassidy were the stars of the season's opening meet on the Tuileries track, Denver Col., Sunday, 9th inst. Boyd defeated Joe Wolters in a thrilling five miles match, and repeated in another race at the same distance. He also captured second in the remaining race, which went to Harry Good. Cassidy's portion of the glory was two three miles amateur events.

Boyd and Wolters put up the only thrilling race of the day in their match. Boyd rode an Indian while Wolters steered an Excelsior. From the crack of the gun they fought tooth and nail and see-sawed for the lead all the way. On account of the holes in the track, which has been rebanked and is not yet entirely smoothed out, no fast time was made, but the men up in daring what was lacking in speed. Once Wolters ran up a big lead, but Boyd pulled him down again and went to the front for good in the last mile, opening a gap which he increased to half a lap at the finish.

In another five miles event Boyd defeated Flickenstein, who in turn arrived ahead of Wolters. This trio together with Harry Good were the starters in the opening event, a five miles professional. Good lived up to his name and won in a hot drive, with Boyd second and Flickenstein third, with Wolters bringing up the rear.

Dan Cassidy gave promise of repeating his cleanup of last year in the amateur class. He walked off with both amateur events without extending himself greatly. Five thousand people turned out for the meet. Summary:

Five miles professional—Won by Harry Good; second, Glen Boyd, Indian; third, Lawrence Flickenstein; fourth, Joe Wolters, Excelsior. Time, 6:22⅖.

Three miles, amateur—Won by Dan Cassidy, Indian; second, Fred Saul; third, George Keyes. Time, 4:40⅗.

Five miles, professional, singles—Won by Glen Boyd, Indian; second, Joseph Wolters, Excelsior. Time, 5:43⅖.

Three miles, amateur—Won by Dan Cassidy, Indian; second, E. Schwartz. Time, 3:53.

Five miles, professional, twins—Won by Glen Boyd, Indian; second, Lawrence Flickenstein; third ,Joe Wolters, Excelsior. Time, 5:04.

The Germania Cycle Club, Hartford, Conn., has taken new quarters at 21 Central row. A five years lease of the second floor of the premises has been taken.

RUTT-STOL WON DESPITE BANANA

Pretty Story of Berlin's Big Six Day Race —Macfarland and Moran Outwitted by Clever Ruse.

According to the mail advices received from Berlin, the third annual six day race in that city was marked by some "pretty doings" during the 144 hours, and both Macfarland and Moran are kicking themselves blue and green for failing to grasp the opportunity presented during the last three hours of the long grind to regain their lost three laps and to humble the favorite team, Rutt-Stol, as they never had been humbled before. The story, which is vouched for by the Rad Welt, the great German daily cycling paper, goes to show what influence the reputation of a rider—to be able to keep any pace set and to be among the foremost sprinters of the time—has upon the other teams in a six day race. It shows also what great influence diplomacy and shrewdness play in the long grinds.

When the 28 pedal pushers lined up for the start on March 24 the German-Dutch team of Walter Rutt and Johann Stol loomed up as a three-to-one choice. The American team, Floyd Macfarland and Jimmy Moran, was second choice, while the Berlin combination, Saldow-Lorenz, the French-Dutch team, Brocco-Schilling, and the old team Stabe-Pawke which beat the veteran team, Root-Fogler, in last year's Berlin race for fourth money, were hot contenders for third place. The finish of the long grind showed that these guesses were fairly accurate, for Rutt and Stol won, with 3,406 kilometers; Macfarland-Moran second, three laps behind, and Brocco-Schilling third, five laps to the bad.

Through a mistake on the part of the builders of the track, some boards had been laid cross-wise, instead of lengthwise, and for the first five hours no less than 86 punctures were officially recorded as having occurred. The boards gradually grew smoother, and the riders used heavier tires, so that by the end of the first day punctures were no more frequent than in other long races. As is but natural with such track conditions, accidents and falls were numerous, and a rapid weeding out took place. At the end of the third day only nine teams were left in the race, with Rutt-Stol and Saldow-Lorenz tied for first place; Moran-Macfarland, DeMara-Stellbrink and Schilling-Brocco tied for third, one lap in the rear. The 74th hour brought the big fight, which sent the enormous crowd into a frenzy of excitement. In a wild sprint of over 20 minutes Rutt and Stol managed to shake off the whole field and gain a lap, although the Saldow-Lorenz combination made such a fight that even the doughty Rutt was totally exhausted after the spurt. During the melee incident to the wild sprinting, Macfarland and Moran managed to gain a lap over Brocco-Schilling and DeMara-Stellbrink.

Few changes occurred during the next two days, save that Rutt and Stol gained two more laps on the field, and it was not until the last few hours of the last day that the unexpected happened, threatening for a time to create several kinds of trouble for the favorites. At eight o'clock on Friday night, the 140th hour, someone connected with Rutt's camp handed the latter a large, luscious banana, and the big German swallowed it in a few bites. A few minutes later things began to happen. Rutt became unconscious from stomach cramps, almost delirious with pain a little later, and finally had to undergo the extremely inconvenient operation of having his stomach pumped out. Three doctors were working over him, and not a single person, except the attending nurse, was admitted to the room in which he lay. It looked all over with his chances to win.

In the meantime Moran had become a little curious about the long-continued absence of Rutt from the track, and started to ask questions of Stol; the latter was clever enough to jolly Moran and to tell him Rutt was saving himself for a final sprint in case Jimmy had any aspirations of starting one. This seemed to allay suspicions and while Rutt was lying unconscious on the operating table below, the other riders were slowly circling the track anxious to start something, but afraid of the "rested" Rutt, whom they thought lying in wait for such a chance.

Finally, after more than three hours absence from the track, Rutt came back, looking hale and hearty, with a bright red flush to his cheeks. Not one person in the tens of thousands who saw him knew that he barely could hold himself upright, and that the red was nothing but ten cents worth of rouge bought at a neighboring druggist's. He made a few rounds on his wheel, slowly and carefully, trying to smile at the reception accorded him. The minutes dragged towards the close of the race, and Moran and Macfarland began to see that not everything was as it ought to have been. They did not know, however, what it was, and were afraid to start a sprint which possibly might serve to crowd them out of their sure second place. Had anyone suspected that the robust-looking Rutt was barely able to hold himself on his bicycle, and could not have taken part in any sprint, there is no doubt but that those last 20 minutes of the race would have seen some frenzied excitement. Stol admitted after the race that in such a case he could not have held his own for five minutes, and that he probably would have been lapped a dozen times. Luckily for him and his partner, no Judas Iscariot arose, and Rutt and Stol were declared the winners amid the plaudits and enthusiasm of a crowd of 15,000 men and women.

Great excitement was caused on the second day of the race by F. Knorr, president of the Verband Deutscher Radrennbahnen (Association of German Racing Tracks), who openly charged Walter Rutt and Johann Stol with having entered into an agreement with Macfarland and Moran, according to which the German-Dutch team was to be allowed to land first place, while Macfarland and Moran were to be assured of second position. The outcome of the race would almost seem to bear out the charges, but a number of absolutely impartial witnesses who were present at the hearing of the charges and who later on watched the frantic efforts of Rutt and Stol to lap the Americans, the wild riding of the latter to keep from being lapped, and the many serious accidents occurring during these sprints, decried any possibility of such an agreement. Rigid inquiry was made into the charges, but no evidence to support them could be obtained. Due to the wild rumors of a fixed race and the unexpected arrival of the prefect of police with his staff at the track during the third day, the story gained ground that no further six day affairs were to be run in the German capital. So far, however, no action to this effect has been taken; on the contrary, arrangements are already being made to stage a similar race late this fall in the Exhibition Hall of the big Zoological Gardens.

Newark's New Track Opens Tomorrow.

Not only because it rained, but because work on the grandstand and track of the new velodrome at Newark, N. J., had not been completed, the inaugural meet did not occur on Sunday last as scheduled. Weather permitting, the first meet will be held tomorrow (Sunday), when an attractive program, consisting of two professional and three amateur events, will be decided; among them will be the Kramer Stakes at five miles and the Eastern Handicap at one mile.

Four More Australians Coming This Way.

Four more Australian cracks are coming over to try their fortunes in America. They are H. Grenda and H. Scott, who will go to Salt Lake City, and A. Lloyd and A. J. Davies, who will come East and follow the Chapman circuit. It is expected that the quartet will arrive by May 30th. They all are men with reputations and cannot well fail to add interest to the sport in this country.

Midnight Fire Damages the Clifton Track.

Fire, Tuesday night last, 11th inst., partially destroyed the Clifton (N. J.) three-lap board track. A portion of the grandstand was entirely burned and several hundred feet of the track itself was badly damaged. The fire is believed to have been of incendiary origin, as it was found that a barrel of gasolene had been placed under the grandstand.

At the Portland Hill Climb, March 26

A Stock Single Cylinder

Harley-Davidson

Made the Fastest Time Regardless of Class

THERE WERE 16 ENTRIES, 5 TWINS AND 11 SINGLES

In the 4 H. P. class the Harley-Davidson covered the 2 3-10 mile climb in 5 minutes, 18 seconds—just 1 minute, 2 seconds ahead of the second finisher.

Out of the two double cylinder classes of 5 H. P. and 7 H. P. machines the fastest machine was 7 seconds slower than the time of the single cylinder Harley-Davidson.

Figured out comparatively, the winning Harley-Davidson showed just 26½ per cent. more efficiency than the average of the other six makes represented in the single cylinder class, and exactly 19½ per cent. more efficiency than the machine which finished second.

Big Spill in Brooklyn Indoor Race.

One of the worst spills which has attended indoor flat floor bicycle racing this season, marked the 14th Regiment games at the armory in Brooklyn, N. Y., Saturday night, 8th inst. It brought down four men hard against an iron rail, but through good fortune only one was seriously hurt. Henry Murphy, of the Century Road Club of America, sustained a fractured collar-bone and a split thumb. He was removed to a hospital and later taken home, and will be laid up for about a month. The other riders in the mixup, Walter Raleigh, William Van den Dries and E. H. Goodwin, escaped with minor bruises, although Van den Dries's wheel was wrecked. Accounts of the cause of the mixup differ, although several blame Goodwin for it in attempting to block Van den Dries from passing him in the fifth lap of the five miles final. Goodwin, however, claims that his wheel slipped. C. A. Mohrman, of the Irish-American A. C., won the race in 13:14⅘, and Goodwin, who scrambled from the wreck and remounted, finished second. Goodwin captured the two miles handicap from scratch in 4:51, clipping four-fifths of a second off the old record. J. T. Townsend, Irish-American A. C. (20)) was second, and C. Hausenbauer (85), third. The officials did not cover themselves with glory, several of the heats being run at wrong distances and having to be run over.

Mining Stock for Club Championships.

Rare indeed are the articles which at some time or another have not been offered as prizes in bicycle races, for the awards have run the whole gamut practically from medals to mince pie. It has remained for the ambitious New England Wheelmen, of New York City, to depart from the beaten paths and offer something entirely original in the prize line, i. e., mining stock. Don't laugh, for despite the unsavory reputation borne by the average collateral of this sort, in this case it is claimed to be real tangible goods and to be listed on the New York "curb" at 65 cents per share.

William Heineman, a member of the club, at the last meeting offered to donate 300 shares of the stock of the Branch Mint Mining & Milling Co., of Deadwood, S. D., in three certificates of 100 shares each as prizes for the club championships. Of course this offer was accepted before it was cold, and someone surely will become possessed of the handsomely engraved certificates attesting his right to the title of "stockholder" and the delightful diversion of clipping coupons. And even if there are no coupons to clip, the exquisite examples of the engravers are usually make nice wall decorations.

The club championships are to be run in three heats, and a certificate of 100 shares of stock will be given to the first man in the fast, medium and slow divisions, respectively. The total value of the stock at the quoted price is $195. Nor is this all of the prizes that the fortunate New Englanders will have set before them, for there also are three handsome gold medals and two loving cups, which are the gifts of the club and members, and will be offered in closed club races during the year.

Irish Jokes that Led to Court.

A cyclist of County Kildare, Ireland, who had left his bicycle standing in a hallway at Newbridge one evening recently, returned to find the lamp missing, and was compelled to ride home without a light. On the way he was stopped by a policeman, who told him he would be summoned to court. Next morning the cyclist received by mail a pawn ticket for the lamp, and on investigation he found that he had been the victim of a practical joke. Two friends who had recognized the bicycle had taken the lamp off and pawned it. The cyclist said nothing, but in the evening rode to Newbridge and saw his two friends who were engaged in a boxing match. Quietly taking their coats the cyclist sent them to the pawn shop, and handing the two practical jokers the tickets, while they were still unaware of the loss of their garments, he immediately started homewards. The discomfiture of the two friends when they discovered that they had been paid back in their own coin easily may be imagined. This story, when related by the cyclist in court, caused a great deal of merriment. The magistrate, however, did not think it funny enough to let the cyclist go free. He fined him just the same.

Rain Helps Hawkins to Hold the Cork.

On account of the rain last Sunday, 9th inst., the regular weekly "cork race" of the New England Wheelmen of New York City was not held, so that while J. B. Hawkins did not win the cork for another week he holds it just the same, thanks to the weather man. The cork races are proving great attractions to the riders in the Bronx, and each Sunday event brings large numbers of riders to the race. Incidentally, the contests are fine stimulants for new members and there are several new applications handed in every Sunday, some of them at the very starting line.

Team Race to Follow Acme's Handicap.

Starting from the 30 yards mark, Edward Rick beat out the scratch men by a close margin in the one mile handicap point race of the Acme Wheelmen of New York City on Sunday, 2d inst. Irving Higgins, scratch, nosed out John DeBruyn, also an honor marker, for second place by a wheel. The event was the first of a series for the club championship. Previous to the race, which was held on the roads near Guttenberg, N. J., the club held a run to the Guttenberg track, intending to run its speed event there, but the track was found in miserable condition and the cyclists were forced to the road for a course.

As the result of an impromptu speed brush between members of both organizations, the Acmes have been challenged by Captain Joseph Kopsky, of the New England Wheelmen, for a team race, the teams to be composed of members of the respective clubs. The challenge has been accepted and the distance named as 10 miles. The match will take place on the first joint open date of both clubs. The Acmes are desirous of receiving entry blanks from other promoting clubs. The blanks should be sent to John DeBruyn, captain, 602 W. 146th street, New York City.

Jockey Glass Secures a New Mount.

Jockey Glass, of the Emeryville (Cal.) track, has a new mount, and it is not a flesh and blood kind either, but an Indian motorcycle. This does not mean that Glass has forsaken the ponies and the turf, but that he sometimes likes to go faster than a quadruped can hike, so, being an old bicycle rider, he naturally turned to the gasoline steed, where spark and throttle have the whip and spurs beaten seven furlongs.

Kansas "Scouts" Who Use Bicycles.

The Boy Scouts, of Wichita, Kan., apparently realize that the bicycle is a pretty useful instrument for scouting purposes as well as for other things. At any rate some 40 of the "Scouts" last week made a two days' bicycle trip, in the course of which they selected and prepared the site for the Y. M. C. A. boys' summer camp.

WAITING FOR THE LAGGARDS

Kelly-Racine Tires

For Motorcycles and Bicycles

are now being made in our new factory, which commences as the only tire factory in the world completely equipped at the outset with the most modern and advanced tire making facilities known to the art.

We shall produce 1,500 motorcycle tires and 3,000 bicycle tires per day, together with 1,200 inner tubes, a full line of tire sundries and a line of automobile, motor truck and carriage tires. Each tire, too, will have years of "know how" in it. Get acquainted with us promptly, as our earliest customers will have reason to rejoice.

KELLY-RACINE RUBBER CO.

Racine, Wisconsin

PATENTS.

974,839. Motorcycle Friction Clutch. Jacob R. Spangler, New York, N. Y., assignor to S. D. Manufacturing Co., Brooklyn, N. Y. Filed Sept. 9, 1909. Serial No. 516,85.

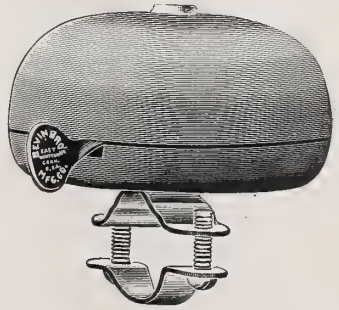
1. The combination of an explosive engine crank-case, a driving shaft journaled in the crank-case, a driven shaft operatively connected to the driving shaft, and a friction clutch arranged in the crank-case in the length of the driving shaft between the crank thereof and the driving shaft to permit of the crank slipping relatively to the driving portion of the driving shaft at the instant of explosion when the engine is first started, or when the load is increased beyond certain limits.

974,967. Magneto Electric Generator. Gottlob Honold, Stuttgart, Germany. Filed Aug. 28, 1906. Serial No. 332,326.

1. The combination with a dynamo electric generator having means for producing a plurality of substantially equal maximum rates of change of flux at alternately longer and shorter intervals, of ignition circuits arranged to be energized by said changes of flux, and two explosive engines having igniters within the ignition circuits and arranged in intersecting planes.

976,596. Speed Regulating Pulley for Motorcycles. Georges Henri Pertuiset, Geneva, Switzerland. Filed Feb. 16, 1910. Serial No. 554,168.

1. In an apparatus for regulating the speed of motorcycles, a motor provided with a shaft, pulley composed of two parts, one of which is provided with a hub keyed to the shaft of the motor and having a sleeve, the other part of said pulley being provided with a sleeve movable longitudinally on the sleeve of the hub of the part which is keyed to the shaft of the motor, said sleeves being provided with annular caps which are rotatable thereon, a vertically arranged rotatable shaft, arms connected with said shaft and movable toward and from each other according to the direction in which said shaft is turned and wedge-shaped devices connected with said arms and movable radially in said annular space when said arms are moved in opposite directions by the turning of said shaft.



976,797. Sparking Plug for Internal Combustion Engines. Robert Frederick Hall, Moseley, Birmingham, England. Filed Oct. 30, 1908. Serial No. 460,320.

1. A spark plug for explosive engines comprising an insulator body tapered externally so as to diminish in diameter toward the outer end of the plug and also having a tapered bore which diminishes in diameter toward the outer end of the plug, a metal attaching shell adapted to serve as one of the electrodes of the plug, a metallic sleeve having an internal taper corresponding to and co-operative with the external taper upon the insulator body, said sleeve having a rigid gas-tight connection with said shell, and a conductor extending through the bore of the insulator body and having a tapered part which corresponds to and co-operates with the wall of the tapered bore of the insulator body, the tapers upon the exterior of the insulator body and the co-operating sleeve, and also the taper of the bore of such insulator body and tapered portion of the conductor being such that the pressure of the gas acting upon the inner end of the plug will tend to tighten such parts.

Bevin Bells

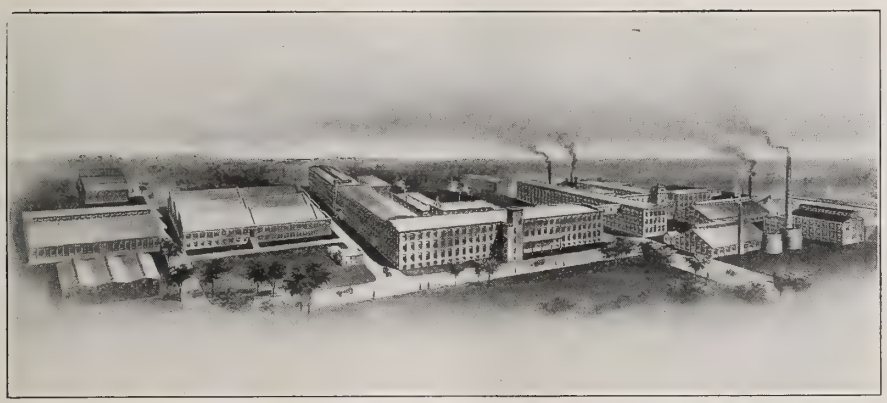
A full stock of all styles of Wood Rims will be placed in storage at 48 Warren Street, New York, for general distribution. Write to the American Wood Rim Company, Onaway, Mich., or D. P. Harris Hardware Company, 48 Warren Street, New York, General Agents for the United States.

MAIN OFFICE—ONAWAY, MICH.

ARE YOU READY

for the opening of the Spring Season with your shelves stocked with

New Departure Coaster Brakes



New Departure Bells

New Departure Cyclometers

and your counters, walls and windows showing

New Departure Signs, Booklets

FOLDERS, ETC., ETC.

The demand for New Departures was never so extensive as now. Our big factory has been running twenty-three hours a day, six days a week for months, filling orders. We have been busy before, but never like this.

WHY? Because the New Departure coaster brake is better made than ever before. Progress in the art of treatment of the steel has resulted in important improvements that make all the wearing and working parts practically and actually tool steel—indestructible.

The design remains the same so that all parts of the present model are interchangeable with parts of models for several years back.

One dealer writes, "The 1911 refinements have given us a faultless brake." Another writes, "It is 100 per cent better," etc., etc.

The dealer who stocks New Departures offers his customers the best. The dealer who does not stock New Departures is surely driving trade to his competitors.

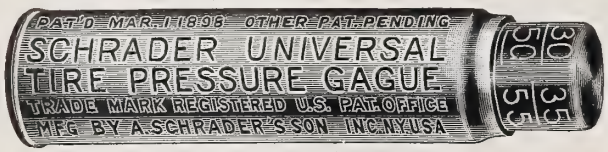
THE NEW DEPARTURE MFG. CO., Bristol, Conn.

Coaster Brake Licensors



Motorcyclists and bicyclists should consider the importance of having their tires inflated to the right pressure.

IT IS TIRE ECONOMY AND IT SAVES MONEY

To know what pressure you have in your tires, use a

SCHRADER
Universal Tire
Pressure Gauge

(Trade Mark Registered in U. S. Patent Office)

(Patented March, 1898—Other Patents Pending)

It will tell the exact pressure in your tires at any time, day or night, by simply holding this Gauge to your Valve for a second. Its recording sleeve remains in place, showing the exact pressure in the tire so that the Gauge can be taken anywhere and read, at night to the front of machine into the light of the lamps. After the pressure has been ascertained the Indicating Sleeve can be pushed back into the Gauge with your finger. No catches or snaps to operate or get out of order. This Gauge is 2½ inches long over all, short enough to apply easily to the smallest diameter of wheel and can easily be carried in the vest pocket or the change pocket of your trousers.

THE PERSONS MFG. CO., Worcester, Mass.

The New England Racer Price $55

A WINNER

Fast Strong
Light Snappy

The Only Bicycle in the World Built for Sprint RACING on Small Board Tracks.

Three Reasons Why

First. It brings the rear wheel four inches closer to the hanger, bringing more weight on the rear wheel, and relieves the strain from the front wheel and forks. This will be appreciated by all track riders, as it is a well established fact that in order to acquire any great amount of speed on tracks with sharp turns, it is essential to have all possible weight of the rider on the rear wheel.

Second. The **New England Racer** uses from 14 to 19 inches less chain than the average racing models. This is a big factor in racing, as a long chain is bound to swerve, and if not kept tight will jump the sprockets or catch on the top of a tooth and break. This is a frequent occurrence on board tracks. On the **New England Racer** the chain can be adjusted as loose as the rider desires without the least danger of jumping the sprockets or breaking.

Third. The rear stays being much shorter, are stronger, and will prevent the sprockets from pulling out of alignment with each other under great strain.

Bicycle Repairmen Joyous Over the "TIP-TOP" Offer

It's a real live WINNER. That's why bicycle repairmen everywhere are shouting for it. The "TIP-TOP" offer on NEVERLEAK Tire Fluid means a lower price to you, and twice the usual number of certificates.

These same Neverleak certificates bring you many premiums that are really worth having. Not a trashy one on the list.

It will pay you every way to handle the "TIP-TOP" proposition. Just ask your jobber about it and learn what a big WINNER it really is.

MEAD CYCLE COMPANY
Chicago, U. S. A.

THE ADVANTAGES OF LARGE OUTPUT AND OF SPECIALIZING IN ONE QUALITY ARE REALIZED IN THE

RENOLD CHAIN

A **thoroughly efficient** Chain can only be produced by concentration on **one Standard of manufacture**—the low grade and high grade cannot be made in the same factory except to the detriment of the "high grade."

Economy without efficiency is impossible—that is the principal reason why the Renold Chain is the most **economical.** The continuously increasing demand, and consequent growth of output which enables the "RENOLD" to be offered at its present price is a **further reason.**

Well made, durable and sold at attractive prices.

Here is a quartet of

KOKOMO Bicycle Tires

that fully meet the spring situation.

Kokomo Defender Special

This popular guaranteed tire is specially designed and constructed for road use. It is made from the best materials obtainable, being carefully built up by hand with pure para inner tube, and, owing to the very high quality of the inner tube used, a puncture is very easily repaired.

Kokomo "New Oxford"

A medium price tire, yet so good in quality that it does not do it justice to call it a medium grade tire. We have built these tires so that in case of puncture they will not be worthless but can be repaired. Also furnished in smooth tread.

Kokomo Dotted Tread

A tire that prevents skidding and is safe and reliable on wet, slippery roads and city streets. Of high quality and careful construction. Furnished in road weight or in thick tread.

Kokomo Guaranteed Red Thorn

Made of red rubber, is extra heavy and is built especially for long service.

Are you profiting by what we offer you in Kokomo Tires?

KOKOMO RUBBER CO., Kokomo, Ind., U.S.A.

How to Satisfy Your Customers and Make Money

MINNEAPOLIS MOTORCYCLE COMPANY, 517 South 7th Street, Minneapolis, Minn.

Five Great Motorcycle Tires
A Tire for Every Road Condition

You can never hope to get **the last atom** of service out of a motorcycle tire until it is built on purpose to meet the requirements of the road conditions encountered **most frequently.** Such tires stand for the very maximum of **mileage, endurance and speed.** And such tires, built with discriminating care by **master tire builders,** are

Goodyear Motorcycle Tires

The most complete line of motorcycle tires ever exploited—a tire for every road condition—a tire that means a saving over all other tires because most serviceable for its purpose.

The world's greatest tire experts build Goodyear Motorcycle Tires. And they do it by an exclusive process of our own that eliminates all the faults common to other tires.

Nothing but the finest grade NEW Para rubber, properly compounded, and fabric—the toughest in existence—is used in Goodyear Motorcycle Tires. And they are made larger and with thicker treads than any other tires for same size rims. Hence with a bigger air cushion, better rubber and thicker tread they are the easiest running, most durable and most economical tires you can buy.

Goodyear Motorcycle Tires are bound to the rim by beads molded, shaped and cured on exact duplicates of your own rims. So they **can't help fitting.** They can't creep nor rim-cut as the clinch of the rim holds the tire as in a vise until you remove it yourself.

Goodyear Motorcycle Tires have out-classed and out-distanced all others in exacting tests of endurance.

GOODYEAR
Motorcycle Tires

Use One of These Types

Goodyear Corrugated Tires—The tire for the average give-and-take road.

Goodyear Studded Tread Tires—For mud, sand, snow and ice travel. Studs well separated, tapering from base, insures clean tread always.

Goodyear Non-Skid Block Tread Tires—For city use where pavements are often slippery and dangerous. Vacuum prevents skidding. Used on motorcycles of Chicago police.

Goodyear Blue Streak Racing Tires—Two kinds: one for board tracks; another for dirt tracks. The speediest, most reliable racing tires made. World's record, from ½ to 92 miles, broken by De Rosier on **Blue Streak Tires.**

Greatest mileage—greatest endurance—**perfect** adaptability—these qualities combined with utmost comfort and economy are what you buy in the Goodyear Quintette of Motorcycle Tires. And all progressive dealers sell them because they **hold** old customers and **get** new ones. Write today for our illustrated booklet on motorcycle tires.

The Goodyear Tire & Rubber Co., Moal Street, Akron, Ohio

Branches and Agencies in 103 Principal Cities

(299)

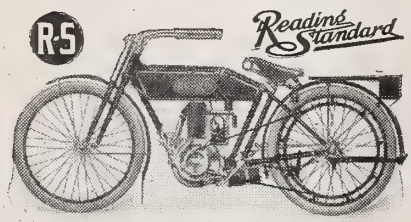
The entire motorcycling industry has been benefited by

Diamond MOTORCYCLE TIRES

Because:

We were the first tire makers to appreciate that the motorcycle is a small automobile rather than a large bicycle.

The first motorcycle tire built of automobile tire fabric and by automobile tire methods was the Diamond tire.



Diamond tires—these tires built on automobile tire lines—enable motorcycle manufacturers to develop their machines to a point that was impossible with the old-fashioned tires of bicycle tire fabric.

You, Mr. Rider, are reaping the benefit today in better, stronger, more reliable machines.

And you are getting better tire service—stauncher tires, longer wearing, more economical tires in Diamond tires. Send for our illustrated catalogue today.

The FINEST MOTORCYCLE *in the* WORLD

Reading Standard
Reliable Silent

One of the greatest objections to motorcycles in the past has been their noise.

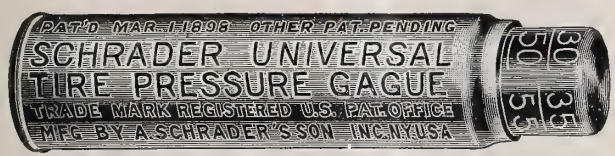
A marked feature of the 1911 READING STANDARD is its smooth and absolutely silent running. This is attained through its perfect balance and accurate workmanship of its motor, and the elimination of noisy chains and loose, rattling controlling mechanism.

The same conditions assure absolute reliability and lasting service.

Our 1911 catalog tells you how and why. Write for it today.

Some valuable agencies open to established dealers only. No curbstone brokers or rider agents.

READING STANDARD COMPANY, 310 Water St., Reading, Pa.



Motorcyclists and bicyclists should consider the importance of having their tires inflated to the right pressure.

IT IS TIRE ECONOMY AND IT SAVES MONEY

To know what pressure you have in your tires, use a

SCHRADER
Universal Tire Pressure Gauge

(Trade Mark Registered in U. S. Patent Office)

(Patented March, 1898—Other Patents Pending)

It will tell the exact pressure in your tires at any time, day or night, by simply holding this Gauge to your Valve for a second. Its recording sleeve remains in place, showing the exact pressure in the tire so that the Gauge can be taken anywhere and read, at night to the front of machine into the light of the lamps. After the pressure has been ascertained the Indicating Sleeve can be pushed back into the Gauge with your finger. No catches or snaps to operate or get out of order. This Gauge is 2½ inches long over all, short enough to apply easily to the smallest diameter of wheel and can easily be carried in the vest pocket or the change pocket of your trousers.

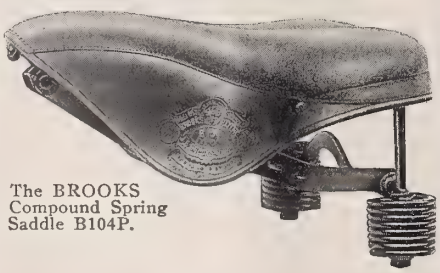
Of the many and varied devices that have been designed to enhance the Motor Cyclist's comfort, the

BROOKS

Compound-spring

stands supreme—

This is an exclusive feature of the BROOKS COMPOUND-SPRING SADDLE, and only in such saddle can that spring, as we make it, be embodied—



It is a feature that has done more to vanquish vibration than any other fitment, or component part thereof.

Other springs there are, but although they may have some virtues, they fail utterly in the matter of that compensating action which is essential to the rider's ease and comfort, and the dominating feature of the BROOKS.

Hence, include the BROOKS in the specification of every bicycle you sell, and thus ensure the complete satisfaction of your customer.

FISK
BICYCLE
TIRES

Standard Equipment on These Bicycles

Iver Johnson	**Pope**
Pierce	**Yale**
Snell	**Emblem**

MANUFACTURERS of high-priced bicycles choose their tire equipment carefully.

THEY know that to select a tire which would not wear would be to invite trouble for themselves.

THEY know that the wheel maker would have to be a buffer between rider and tire maker in case of dissatisfaction.

THEY take no chances—neither should you.

FISK Bicycle Tires are made in many styles and each represents the highest quality in its grade. Write for illustrated tire booklet.

DEALERS TAKE NOTICE

75 per cent. of the high-grade bicycles to be built in 1911 will be equipped with Fisk Bicycle Tires. Write for complete information now as the renewals next year will mean increased demand.

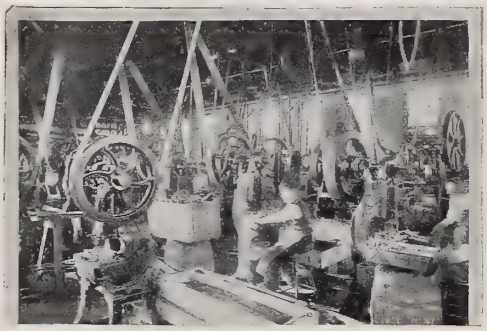
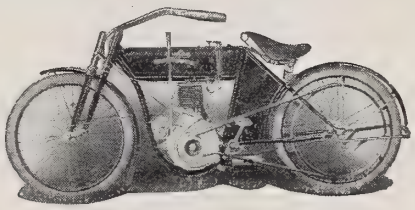
Pope Flush Joint Reinforcements



POPE NAMEPLATE BICYCLES

Why Not Sell Wheels That Are Made Right?

DO you know that there is only one scientifically correct way of reinforcing and brazing the frame tubing to the steering head so as to form a perfect joint?



The illustration shows how the frame tubing of all Pope Nameplate Bicycles is internally reinforced and inseparably joined to the steering head. At the top are seen the branch and thimble, which when telescoped one within the other and inserted into sockets in the steering head, are spun out by a special mechanical process so as to force the steel all around the inside of the steering head in a tight layer. The superiority of the Pope method lies in the fact that the reinforcement extends ALL AROUND THE INSIDE OF THE STEERING HEAD, whereas in the general run of wheels, the reinforcement consists merely of prongs forced into the steering head and bent back.

Some of the special machinery used in the making of Pope bicycle frames is seen in the accompanying picture which shows a corner of a room in our great bicycle factory at Westfield, Massachusetts—a plant whose facilities and equipment for just such special processes as are entailed in making reinforced flush joints and brazing by the "dip" method cannot be duplicated.

RENOLD CYCLE CHAINS

1-2 in. pitch Roller Chain

1-8 in., 3-16 in., and 1-4 in. wide

(615)

The SWEETEST RUNNING and MOST DURABLE CYCLE CHAIN is the RENOLD ½ in. pitch Roller Chain, because:—

On a given diameter of sprocket there are twice as many teeth as for a Block chain.

The use of Rollers greatly reduces the friction between the chain and wheel teeth.

The Roller Chain permits of a better tooth form than the block.

The Roller Chain, width for width, is stronger than the block.

The Roller Chain does not tighten up in mud so readily as the Block type, and adjustment for slack is not so important.

Records show that Renold Roller Chains last nearly twice as long as Block Chains.

The RENOLD TWIN ROLLER CHAIN has many of the advantages of the ½ in. pitch, and any rider can learn what these are without the expense of fitting new sprockets, because the Twin Roller Chain will run on sprockets cut for block chains.

1 in. pitch Twin Roller Chain

1-8 in., 3-16 in., and 1-4 in. wide

Vol. LXIII. New York, U. S. A., Saturday, April 22, 1911. No. 5

MAY GET FIRST WEEK AT CHICAGO

Motorcycle Makers Hear Good News at Buffalo Meeting—Will Gather Next August in Atlantic City.

What was the first meeting of the Motorcycle Manufacturers' Association since the Chicago show in February took place in Buffalo, N. Y., at the Statler Hotel, on Wednesday, 19th inst. Show matters took up a good part of the session, and the chairman of the show committee, George M. Hendee, turned over to the association $3,060 received from the proceeds of the New York show in January, and $245 rebate from the Chicago show. The 1912 show situation was taken up to some extent, but no definite recommendations were made. The management of the Chicago show has half promised that the motorcycle section next February can be included in the first week instead of the second week of the show. Hendee was reappointed chairman of the show committee.

The 1911 F. A. M. national meet having been awarded to Buffalo, the motorcycle manufacturers adopted a resolution favoring the plan of a double tour to the meet—one to start from the East and the other from the West. It is the idea that the tours should be non-competitive and that the motorcycle clubs of the various towns should join the tour as it passes through their respective cities, with a tourmaster in charge of each tour.

Recognition was taken of the untimely and sudden death of W. S. Gorton, of the Standard Welding Co., and resolutions of sympathy were drawn and forwarded to the family. It was the sentiment of the meeting that in the death of Mr. Gorton the trade had lost one of its brightest minds.

The matter of a uniform basis of horsepower rating again was taken up, but after a period of discussion the matter once more was laid over, to be brought up at the next meeting. The reports of the various committees were read and approved.

The next meeting of the association, which is the annual meeting, will take place at Atlantic City, N. J., during the first week in August, the exact date to be named later by the president. The motorcycle manufacturers plan to be in Atlantic City at the time of the midsummer trade meet of the Cycle Parts and Accessories Association and the National Association of Cycle Jobbers.

E. S. Fretz, the president of the organization, presided at the meeting, and the roll call showed the following members present: H. T. Roberts, of the Aurora Automatic Machinery Co.; A. B. Coffman, Consolidated Mfg. Co.; W. G. Schack, Emblem Mfg. Co.; George M. Hendee, Hendee Mfg. Co.; C. L. Waters, Marvel Motorcycle Co.; E. S. Fretz, Merkel-Light Motor Co.; W. A. Johnson and W. B. Colburn, Pierce Cycle Co ; George W. Sherman, Flanders Mfg. Co., and W. F. Remppis, Reading Standard Co . Following the meeting, W. G. Schack, of the Emblem company, entertained the members at lunch, and at dinner they were the guests of W. B. Colburn, acting for the Pierce Cycle Co. The dinner was at the Buffalo Club and was followed by a bowling tournament.

Clausen Brothers Add the Marvel.

Clausen Brothers, 1517 Michigan avenue, Chicago, Ill., distributors of the Yale motorcycle, have added a second machine to their offerings. They will handle the Marvel in addition to the Yale.

WANTS RIMS TO BE STANDARDIZED

Falor Urging Uniformity in Style as a Needed Reform—Takes It up with Motorcycle Manufacturers.

Standardized rims for motorcycles, instead of the different types now offered, are one of the important needs of the motorcycle industry, according to S. A. Falor, manager of the motorcycle tire department of the Goodyear Tire & Rubber Co., Akron, O., and he has started a trade movement looking to the necessary standardization. In pursuance of his campaign, Falor visited Buffalo this week and brought the matter up informally with the motorcycle manufacturers who had gathered in that city for the meeting of the Motorcycle Manufacturers' Association.

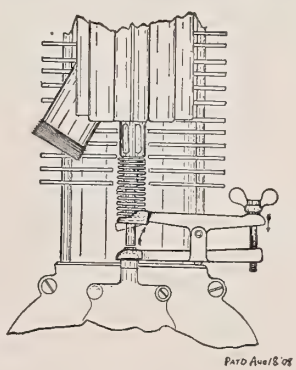
At present there are two chief styles of rim, viz., the single clinch and the double clinch. In addition to these, the so-called Dunlop style of rim is found on some of the imported machines, but Falor's reform does not contemplate any effect on what the foreign manufacturers choose to do. Without championing either the single clinch or the double clinch as against the other, Falor believes that the motorcycle manufacturers should agree on one or the other and make it standard, so that there will be an elimination of the confusion that exists in regard to them.

A single clinch tire cannot very well be put on a double clinch rim, and while it is possible to put a double clinch tire on a single clinch rim, the fit is likely to be very unsatisfactory if not dangerous. The purpose of the reform is to have the makers decide on one or the other, so that all tires of a given size will be interchangeable.

HOW THE NEW HARLEY-DAVIDSON PLANT LOOKS AS COMPLETED.

The last addition to the new factory of the Harley-Davidson Motor Co., Milwaukee, Wis., was started December 15 and finished March 22, and the picture shows the complete plant, which soon will be in full operation.

Caps for Spark Plugs and Other Things.



Plug hats are one of the last things on earth that would be expected to have a place in the motorcycle accessory field, but these are but one of several novelties to be found in the complete catalog of motorcycle supplies which just has been issued by the Motor Car Equipment Co., 55 Warren street, New York City. In this case, however, the "hat" is not of the Kelly variety, but is a small fiber cup or cap designed to fit over the exposed end of a spark plug to prevent short circuiting troubles due to moisture, and also to protect the rider from unpleasant shocks by accidentally coming in contact with the terminal when the "line is busy." In addition to the standard accessories there also are listed such advanced articles as tire pressure gauges, polishing chamois, new style convex inner tube patches and combination gas tank and Anheuser Busch keys.

Thiem to Market Through Own Agents.

Being well settled in its new factory in St. Paul, Minn., the Thiem Mfg. Co., announces that for the 1911 season it is producing a 4-5 horsepower machine in four models, representing the product of 12 years' experience in motorcycle manufacturing. It is the company's intention to change its selling plan so that ultimately its entire output will be marketed through its own agents. In the past it has been building motors and complete motorcycles for the jobbing trade and large dealers who have been advertising and selling the machines under their own nameplate and as their own make. All new agencies are being appointed in the various districts. E. W. Keller, who has written several text books on motorcycles and who has been responsible for various improvements and accessories, is now associated with the Thiem company.

Valve Lifter that Serves Morality.

Like Artemus Ward's "strictly moral show," a new valve lifter evolved by B. A. Swenson, 298 Blackstone street, Providence, R. I., has the effect of catering to and conserving the proprieties while at the same time serving a valuable function in human service. At any rate, Swenson claims for the device that it "will prevent burnt fingers, cuss words and broken cylin-

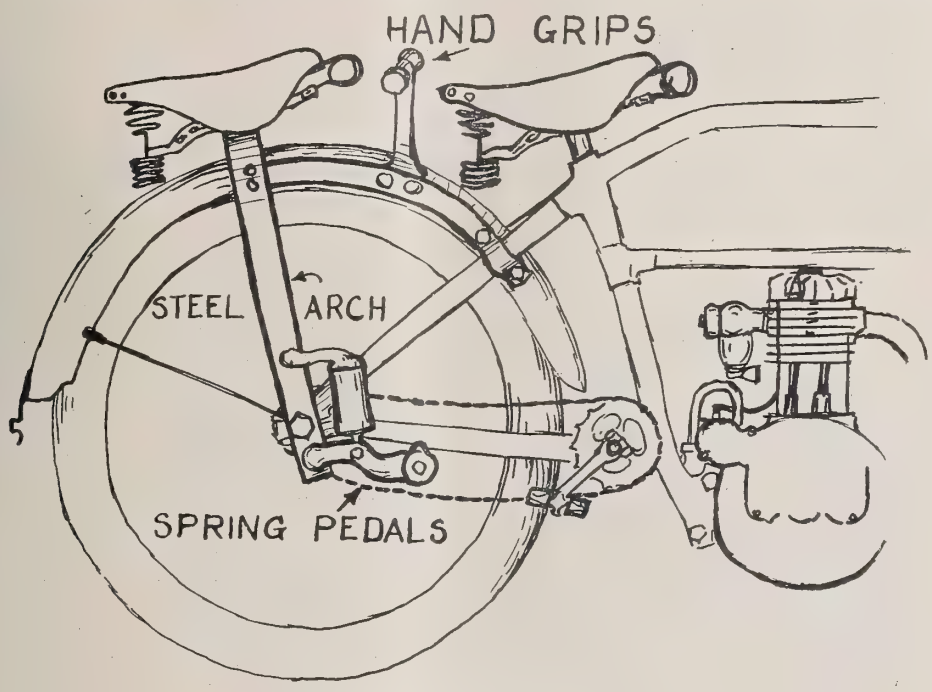
der flanges," and as a motorcycle rider and dealer of unusual length and ardor of experience he is familiar with all three of these evils. The lifter, which is shown in the accompanying illustration, is small enough to be carried in the tool bag and yet sufficiently stout and efficacious to be a satisfactory shop tool. Swenson has been making the lifters in small lots from time to time, and they have proved in such demand that he now is manufacturing them in big quantities that permit of an immediate filling of orders.

New Model from Chicago Handle Bar.

The Chicago Handle Bar Co., of Shelby, O., is shortly to produce a new handle bar of the Kelly Hussey type, which will be available to the trade in the near future. The company not long ago applied for a patent on a new adjustable handle bar stem, and has received notice that a number of the principal claims have been allowed. The invention involved in this patent is to be incorporated in the new handle bar. The company is to establish a branch shop in the East, which will be located either in Reading, Pa., or in New York City, where the bar will be manufactured, as well as that portion of the standard product which is now distributed to the East from the main offices of the company at Shelby.

Helps Accessory Buying at Long Range.

Having for several years specialized on accessories and equipment for motorcycles, the Motorcycle Equipment Co., of Hammondsport, N. Y., this year has brought out a 24-page catalog representing the fruits of its experience as to what the motorcyclist requires. The catalog is rich in illustrations and detailed descriptions, and contains all manner of motorcycle goods from carbureters to clothing. It is intended to be of assistance to the motorcyclist who by reason of his location is compelled to buy by mail.



Allentown Has a New Repair Shop.

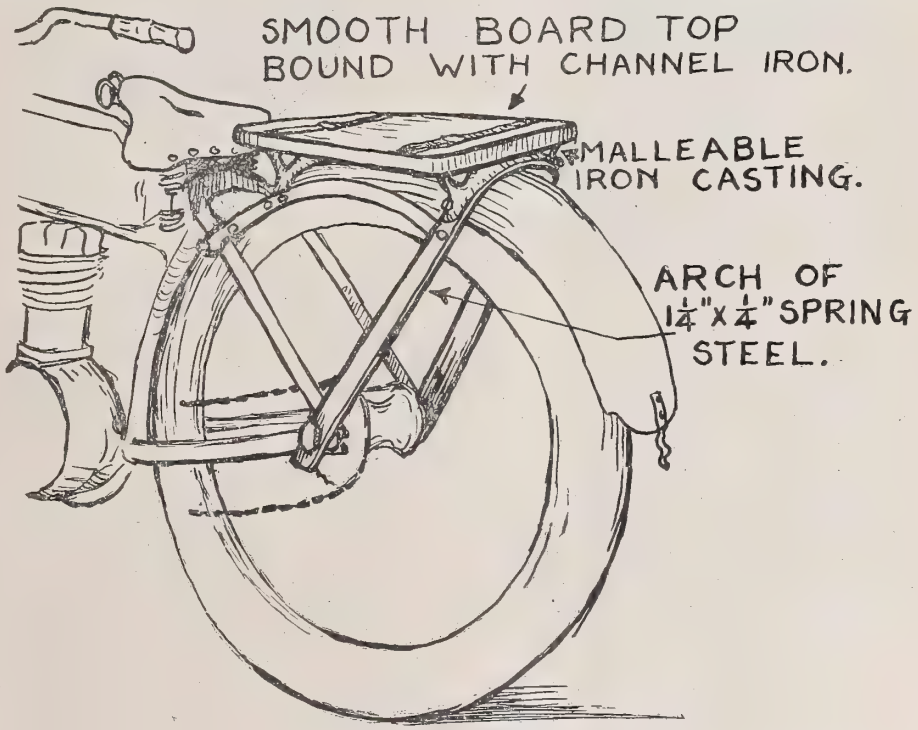
Wentz & Dugan, Allentown, Pa., have opened an establishment for the storage and repair of motorcycles and bicycles on Bridge street near Front. The new firm is composed of Charles Wentz and Nicholas Dugan.

DISCLOSES TWO NEW ACCESSORIES

Chicago Concern Has Tandem Attachment and Luggage Carrier of Novel Design —Spankers to Follow.

Backed by men of long practical experience in the motorcycle field, a new motorcycle accessory manufacturing company has been formed in Chicago, Ill., to be known as the Ero Mfg. Co. The company will deal in motorcycle accessories exclusively, and F. L. Eiler is in charge of the plant, which is located at Jackson boulevard and Clinton street. Two of the specialties manufactured by the concern are a luggage carrier and a tandem attachment. Both are designed to be especially strong and to stand up under heavy loads and hard work.

ERO TANDEM ATTACHMENT



The seat on the tandem attachment is given a very low position by clamping it on a short stud which is brazed to a spring steel arch that forms the main support, running from the axle on one side up over the mudguard and down to the axle on the other side. This arch is one continuous piece of 1¼ x ¼-inch spring steel and will support a greater load than the rear axle is capable of sustaining. The pedals are spring suspended, operating on the barrel and plunger principle. The springs are six inches in length, with three-fourths inch coils and are carried on strong eye-bolts, the whole being entirely enclosed in barrels so that the springs are exposed only momentarily when they are distended. The pedals or foot rests are round instead of the customary flat rubber block, the circular spool rest being considered more restful for the foot. Should a foot rest be broken off by a fall or other accident, an emergency pedal pin can be inserted.

When passing over rough spots the rider naturally stands on the pedals, and the spring suspension relieves the shock. The handle bars are very short and close in front of the saddle, making it easy to vault into the saddle after pushing the machine off. The attachment will fit any machine, without the necessity of alterations.

The luggage carrier has features in common with tandem attachment, in that the design embodies a continuous spring steel arch and the device will fit any make of motorcycle. The top, instead of having the customary tubing and cross bars, which leave their mark on a suit case after even a short run, is made of hard wood bound with channel iron and is perfectly smooth on top. The sides of the channels are set in the wood, coming flush with the surface. Two slots on each side are cut for the two 40-inch heavy linen straps to pass through. The buckles on these straps hold at any point instead of using holes at fixed intervals. The top rests on a casting of tough malleable iron, which is bolted to the top of the spring steel arch. All strain is thus brought directly on the arch instead of on the rivets, differing in this respect from the ordinary carrier. From a luggage carrier the device may be converted to a very satisfactory tandem attachment by putting on the spring pedals, which is quickly accomplished, and by strapping on a cushioned seat that the Ero company makes.

A special form of axle nut is provided with the attachments, to facilitate their being put on or taken off. The nut is considerably longer than the standard, and has one end drilled and threaded to go on the axle as usual, while in the other end is a threaded hole into which goes a large hexagon-headed screw which holds the carrier or tandem. The outer screw can be taken out and the attachment removed without disturbing the axle nut proper. The tandem equipment includes a high grade saddle and khaki dust guard cover for the rear wheel.

A spanker spring seat attachment to replace the ordinary rigid seat post of a motorcycle is being developed by the company, and in all probability will soon be placed on the market. In addition to the products of its own manufacture, the company sells motorcycle supplies of every description, including parts for any make of machine, Duxbak belts, leather and rubber

SMOOTH TOP ERO LUGGAGE CARRIER

V belts, chains, saddles, tires and the like. Various other new accessories, of the company's own manufacture, are in the works and will be offered in due course.

Pierce Mounts Salesmen on Motorcycles.

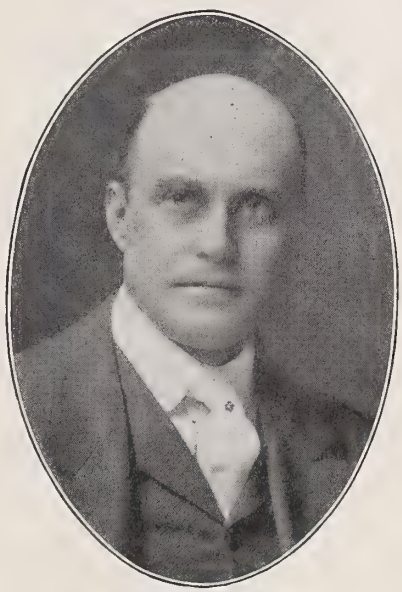
Backing its selling arguments by practical example, the Pierce Cycle Co., of Buffalo, N. Y., has put in effect a plan whereby all but one or two of its traveling salesmen use Pierce motorcycles instead of railroad trains for their travels in quest of bicycle and motorcycle orders. The company declares that the motorcycles are great time savers as against the railways, as the salesmen using trains seldom cover more than two towns a day, while the motorcycle travelers sometimes make as many as a dozen towns in the same time. Furthermore, the salesmen with the motorcycles have samples of their offerings right with them when they ride the machines. "exit trains; enter motorcycles" is their slogan. The movement at present affects the Eastern and Central Western states and the Pacific Coast territory, while ultimately these "knights of the gasoline" are to be put in every state, canvassing, demonstrating and selling.

Almost a Motorcycle Encyclopedia.

Testifying to its completeness by its 48 pages of strictly motorcycle accessories, of which 92 distinct kinds are thoroughly described by 221 illustrations and ample text matter, the 1911 catalog of F. A. Baker & Co., 10 Warren street, New York City, well might be classed as a motorcycle accessory encyclopedia. Some of the articles listed that usually are not found in the average catalog are, for example, acetylene gas tail lamps, paper drinking cups, automatic pistols, handlebar muffs and Indian motors. Baker is the only jobber listing these engines and is prepared to supply them in any of the standard sizes complete with carbureter and with or without magneto.

Burglars Visit Jacksonville Dealer.

The costly honor of being the first man in Jacksonville, Fla., to have a motorcycle stolen belongs to Albert A. Stoddard, who handles the Merkel and M. M. motorcycles at 2015 Main street. His establishment was entered by a thief who broke in through a rear window and selected a Merkel 7 horsepower twin, No. 2930. A reward of $25 is offered for the recovery of the machine.



Griffith Joins New Departure Staff.

A. E. Griffith, of New York City, has joined the sales force of the New Departure Mfg. Co., Bristol, Conn., maker of New Departure coaster brakes, bells and cycle sundries. The company also has strengthened its engineering corps by adding Victor W. Page, of Pawtucket, R. I., who has been the editor of the New England Automobile Journal.

W. S. GORTON KILLED AT CROSSING

General Manager of Standard Welding Co. Struck by Train in Sight of Factory—His Conspicuous Career.

William S. Gorton, secretary and general manager of the Standard Welding Co., Cleveland, O., was instantly killed in an automobile accident on Monday afternoon, 17th inst., at a railroad crossing near the Standard company's plant. His machine was struck by a Lake Shore train at West 76th street, and Mr. Gorton's skull was fractured, and his back, both legs and one arm broken. His negro chauffeur, the only other occupant of the automobile, was

WILLIAM S. GORTON

killed at the same instant, the body being frightfully mutilated.

Mr. Gorton was returning from a luncheon, at which the other participants were J. C. Cole, second vice-president of the Fisk Rubber Co.; L. F. McClernan, the Standard Welding Co.'s Chicago representative, and E. J. Henisohn and J. C. Manternach, officers of the welding company. They were following Mr. Gorton's car, and were witnesses of the tragedy. The railroad crossing at the point where the accident occurred is approached by a steep incline and the view is partially obscured by trees and a high fence. The flagman stationed at that point claimed that he flagged the Gorton car, but that after it slackened speed it suddenly jumped forward again and had almost cleared the tracks when the locomotive struck the rear wheel of the automobile.

Few men were better known to the bicycle and motorcycle trade than Mr. Gorton. In the interests of the Standard Welding Co. he had been identified with the bicycle business for over 20 years, and when the motorcycle business developed he became equally well in touch with that. His dealings were principally with the manufacturers of machines, in the supplying of tubing, rims and electrically welded parts. At all times he worked for the large general interests of the trade.

He did valuable work at one period as chairman of the joint publicity committee of the bicycle manufacturers, the cycle jobbers and the cycle parts and accessories association. He was the toastmaster at the joint banquet of the associations at the last midsummer meet at Atlantic City, and also was the toastmaster of the joint trade luncheon at the Hotel Astor last January. In connection with the various reorganizations of companies in the trade, Mr. Gorton took an active part, and his policy always was for reconstruction and the placing of the companies again on their feet in a business way. His attitude in this respect was broad and liberal, and not a few men in the trade have reason to feel grateful to his memory for his efforts on their behalf. He always believed firmly in the bicycle and motorcycle industry, his acts giving evidence of his confidence and belief in the soundness of the business. At few prominent gatherings of bicycle and motorcycle tradesmen was he absent. He also was a conspicuous figure in the automobile trade, and served as treasurer of the Motor and Accessory Manufacturers from the time that organization was first formed. The Cleveland Chamber of Commerce numbered him among its members, and he also belonged to the Union Club and the Clinton Park Club of Cleveland.

Mr. Gorton was born in Waterford, Conn., in 1859, and after serving his machinist's apprenticeship in New London entered the United States Coast Survey, in which he remained for four years. At one time he was mechanical and electrical expert of the Thompson Electric Welding Co., of Lynn, Mass., and traveled around the world in the interests of that concern. In 1897 he became general manager of the Standard Tool Co., of Cleveland, and two years later assisted in organizing the Standard Welding Co., of which he became secretary and general manager. Electric welding products, particularly electric welded tubing, was not then in high repute and the progress of the new company was not rapid. It was due largely to Mr. Gorton's knowledge and intense energies that the difficulties encountered were overcome and that the modest plant attained its present huge proportions. He leaves a wife and four children, the youngest of whom is 12 years of age.

Improving Pope's Plant at Westfield.

The Pope Mfg. Co. is making extensive improvements on its big bicycle plant at Westfield, Mass. The main building is being thoroughly repaired and reinforced, and over $10,000 is being spent in improvement work.

STOCKS AGAINST CYCLE SHORTAGE

Grady Has Ideas About a Jobber's Duty to His Trade—Represents Many Lines in New England.

Believing that it is one of the functions of a jobber to carry sufficient reserve stock to insure steady delivery to customers, irrespective of unusual demand, J. W. Grady & Co., 68 High street, Worcester, Mass., is making arrangements to enlarge still further the big building, which is the home of its wholesale business and which is shown in the accompanying illustration. It is the company's boast that during the shortage of bicycles last year it took care of all its customers so that none of them suffered. While other concerns were of-

fering the Grady company bonuses, that concern refused all such offers and supplied the retailers on its own list. At no time during the season was it without bicycles and this was in no small part due to the ample storage space in its buildings, which had been well filled before the season commenced.

The addition now planned is to enable the company to carry enough stock so that customers dependent upon it for bicycles will at no time be obliged to lose sales on account of non-delivery. The Grady building is a five-story structure in two wings. One wing is 160 feet long and 40 feet wide, and the other is 120 feet wide and 40 feet long. The brick fireproof storehouse is in the rear, its dimensions being 40 feet by 80 feet. This will shortly be made two stories higher and will have a 40-foot extension to it.

The company has its own power and lighting plant installed in the building and has renovated the structure all the way through since purchasing it. A sprinkler system has been put in, which has lowered the insurance 75 per cent. The saving in insurance is estimated to pay for the system in two and a half years.

In addition to marketing its own New England racing bicycles, which now have a sale all over the United States, Mexico and Canada, the Grady company represents the Miami Cycle & Mfg. Co., of Middletown, O., on the Hudson and jobbing lines in New York State and the whole of New England. It also represents the Davis Sewing Machine Co., of Dayton, O., in the latter's Dayton and Davis jobbing lines. In the motorcycle field, the Grady company has the New England agency for the Harley-Davidson. The stock of bicycles on hand at all times seldom, if ever, falls below 1,500 machines.

Coffman to be Married in Dallas.

A. B. Coffman, sales manager of the Consolidated Mfg. Co., Toledo, O., is to be married on April 26, in Dallas, Tex. His bride-to-be is Miss Lucy Hosmer Edgell, of Dallas. Following the honeymoon, Mr. and Mrs. Coffman will be "at home" to their friends after May 15, in Toledo.

Will Make Acetylene Gas Tanks.

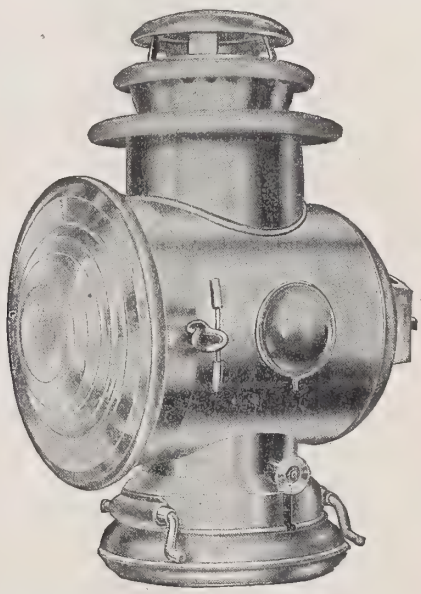
For the night riding motorcyclist a new gas tank is to be brought out by the Searchlight Gas Co., 1124 Michigan avenue, Chicago, Ill. The most marked feature of the new tank is its compactness, which is to make it handy to attach to the machine. The standard size is to be 2½ inches in diameter and 12 inches long, with a capacity of eight cubic feet of gas. The new tank is to be placed on the market in June.

Arnold Opens Store of His Own.

J. L. Arnold, of Dallas, Tex., who has been the district sales manager for Wagner motorcycles, has opened a store at 511 South Ervey street for the sale of the Wagner. He also will carry a full stock of Wagner parts. Arnold used to have his headquarters at the store of the Texas Motorcycle Co., but because of the growth in the business thought it best to open a store of his own.

Meiselbach Increases Capital.

The A. D. Meiselbach Bicycle Co., Milwaukee, Wis., has increased its capital from $20,000 to $30,000. The concern recently was organized to undertake the manufacture of bicycles.



Texas Cycle Shop Burns Out.

Fire wiped our Burk's bicycle and repair shop in Tyler, Tex., on the 9th inst. The establishment carried no insurance.

NEW HEADLIGHT FOR MOTORCYCLE

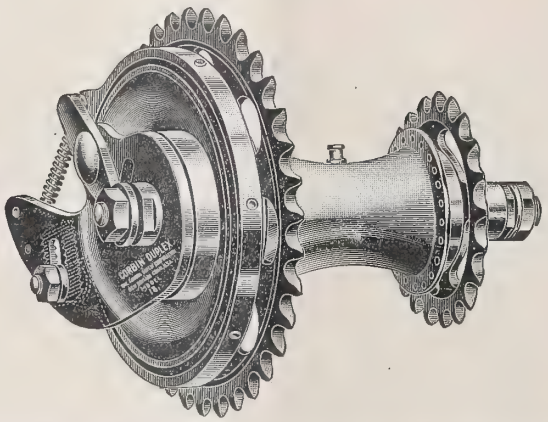
Ham's Latest Offering a Powerful Lamp that Burns Oil—Its Stout Construction and Special Features.

Avoiding the use of acetylene generators or compressed gas tanks, a powerful oil burning motorcycle lamp has been put on the market by the C. T. Ham Mfg. Co., of Rochester, N. Y. The lamp is styled Ham's "Derby" cold blast motorcycle lamp, and its general appearance is indicated in the accompanying illustration. It is presented as a real motorcycle lamp and not a mere enlargement of the type used

for bicycles. In addition to its large flame, its silver plated reflectors and its magnifying optical lens, the lamp has substantial construction throughout, being strongly built of heavy gauge brass, with all parts riveted and not soldered. The back is reinforced with a steel plate on the inside to take the strain and jar of the socket. A combination socket, to fit over either a round or flat bracket, is placed on the back of the lamp, so that the light may be centered on the front of the machine. The oil cannot slop out to collect dust. The burner is locked to the fount, and the fount, which holds sufficient oil to burn 16 or 18 hours, is securely fastened to the lamp by lock levers, which cannot work loose, but which make it easy to remove the fount for cleaning or filling. Red and green projecting jewels are arranged as side signals, so placed that they can be seen from the front and rear as well as from the sides.

Huyck Places a Merkel Agency.

Fred Huyck, the agent in Chicago, Ill., for the Merkel motorcycle, has appointed another sub-agent in his territory. He has given an allotment of Merkels to Goranson & Peterson, whose territory will embrace Roseland, Harvey and Blue Island.



The demand for Corbin brakes is this season more than double what it ever was before. Corbin quality and satisfaction cause that demand.

NEW YORK, APRIL 22, 1911.

Prospects of the National Tour.

It would appear that the national endurance run, which has been a feature of national meets of the Federation of American Motorcyclists in the past, is doomed. In its stead is to come a national tour or tours, where pleasure rather than competition is to prevail.

Not everyone is satisfied to see the endurance run so shelved. It is pointed out that the keen competition of the riders in the national endurance runs has served to stimulate the interest in the national meets, and that some of the latter would have been sadly lacking in attendance had the endurance run feature been lacking. Nevertheless the touring movement has become so strong, and the interest of the manufacturers in the endurance run has so declined, that the fate of the national endurance run seems to be sealed.

Manufacturers no longer are enthusiastic about trying out new models in a national endurance run. New models make their appearance more leisurely and with greater deliberation than was the case a few years ago, as the makers now have time to develop and test new models at their own convenience while carrying on the work of regular production. Long private tests are made before a new offering is placed on the market and the makers have no curiosity as to how the machines will stand up, because they themselves already know, before the machines are offered.

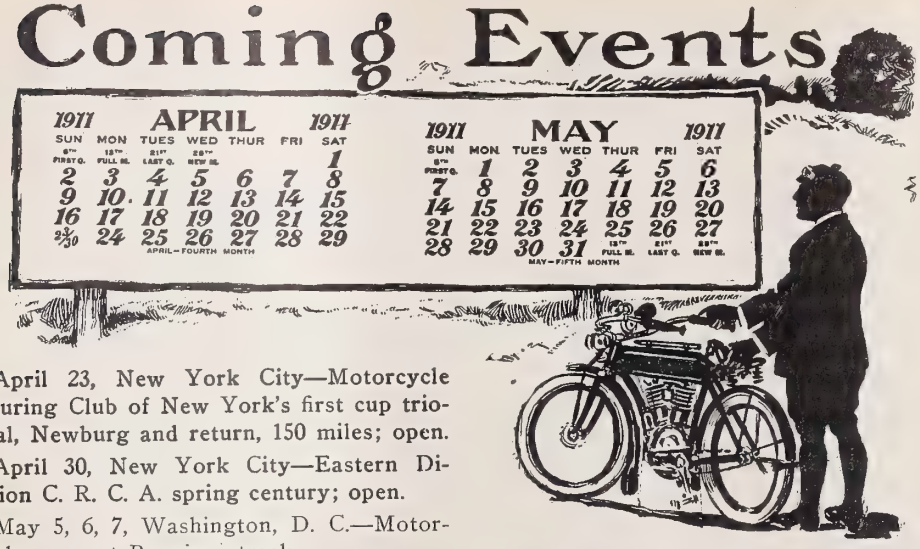
Undoubtedly the greatest value that the endurance contest has had for the motorcycle manufacturers in general has been its advertising value, not alone for the machines with the highest scores, but also for the motorcycle movement as a whole. Despite the woeful neglect that has marked the endurance contests in the past in respect to the publicity work, the newspapers have given the competing motorcyclists a generous share of space, so that motorcycling has received a great benefit.

To conserve the benefits of this character that are to be obtained, it might not be a bad idea to give the proposed national tour a mild aspect of competition, to the extent of having teams from different cities or localities, who could be awarded suitable souvenirs for having a high percentage of their starters finish the tour in good order. This would eliminate the direct competition between the manufacturers of motorcycles and would direct the competition idea purely along the idea of geography and local pride.

There's Legislative Work to Do.

In seeking to perform some large service for motorcyclists in general, the Federation of American Motorcyclists had best look to its legal action committee as its trump card. This committee has been exceedingly quiescent for some time, but so far as the average motorcyclist is concerned it could be made the most important of all the Federation committees. Its duties, indeed, exceed in popular importance those of the competition committee, or of the committees having to do with highways, tours, facilities or publicity.

"Eternal vigilance is the price of liberty" in the case of the motorcyclists as well as with post-Revolution patriots, and the legal action committee has plenty of cause for vigilance. All over the country there is the gradual cropping up again of the idea that motorcycles should be classed as automobiles and should be made to undergo the same restrictions and conform with the same requirements. Where a state assembly does not molest the motorcycle, the cities in the state are apt to devise their own measures requiring local registration, number plates, license fees and all the rest of the objectionable legal junk.



New York state, where the F. A. M. in 1904 achieved one of its most notable victories in preventing the motorcyclists of the state from being loaded down with tags, license fees, registration and the like, is now considering a bill which would amend the automobile law to include motorcycles, and tack on a $5 annual fee, compel the carrying of registration numbers, etc. Maine is considering a similar law; Connecticut is dallying with some such measure, and other state legislatures are having their attention directed to suggestions of the kind at frequent intervals. Even if the legal action committee could not undertake to fight every municipal or town ordinance that helps make the motorcyclist's lot more difficult, it should be aggressive in the case of proposed state measures.

Rushing the season in the matter of promoting road competitions before the highways in the country districts are fit is the error that many clubs, particularly the new ones, are making. Club contest committees apparently think nothing of laying out runs of 100 or 150 miles over roads which for the most part are so bad in the early spring that automobilists fight shy of them.

While termed club runs, these strenuous affairs are in many cases nothing short of stiff endurance runs, and not only prove difficult for seasoned riders but "do up" the average beginner altogether, so that he forswears all future events of the sort. As a rule country roads do not get sufficiently dried out and packed after the winter's frosts until May 1, and often a month later, and to attempt to negotiate them in April is hard work for riders, that well could be postponed until conditions are more propitious without proving detrimental to the success of the contest.

Not only are spring road breaking and mud plugging contests discouraging to the beginner, but they also may cause serious physical disability to the rider, either novice or veteran, who is too proud to quit when conditions become severe, and he resolves to stick it out to the finish. Furthermore, such needless hardships create a bad impression among the non-motorcycling public.

Coming Events

April 23, New York City—Motorcycle Touring Club of New York's first cup trio trial, Newburg and return, 150 miles; open.

April 30, New York City—Eastern Division C. R. C. A. spring century; open.

May 5, 6, 7, Washington, D. C.—Motorcycle races at Bennings track.

May 6, Tampa, Fla.—Tampa Motorcycle Club's race meet.

May 7, Baltimore, Md.—Lafayette Wheelmen's spring handicap road race; 12 miles.

May 7, New York City—Harlem Motorcycle Club's club championship races at Brighton Beach track.

May 7, New York City—Empire City Wheelmen 15 mile handicap bicycle road race, open, starting from Floral Park, L. I.

May 7, Chicago, Ill.—Second annual reliability run of the Chicago Motorcycle Club to Waukegan, Libertyville, Elgin, Aurora and return.

May 7, New York City—New York Motorcycle Club's annual double spring century run to Southampton, L. I., and return.

May 14, Guttenberg, N. J.—Opening motorcycle race meet on Guttenberg track.

May 14, New York City—Century Road Club of America, New York State Division, spring bicycle century run.

May 21, Baltimore, Md.—Crescent Bicycle Club's spring 50 mile pleasure run.

May 21, Brooklyn, N. Y.—Invincible Motorcycle Club's 150 miles spring run on Long Island, north shore.

May 21, Baltimore, Md.—Century Bicycle Club's 50 mile run to Reisterstown.

May 21-22, Seattle, Wash.—Two day endurance contest of the Seattle Motorcycle Club to Vancouver, B. C., and return.

May 24, Toronto, Canada—Toronto Motorcycle Club's endurance run to London and return, 256 miles; open.

May 25, Zanesville, O.—Motorcycle races at fair grounds.

May 27, Akron, O.—Motorcycle races; open.

May 28, New York City—Century Road Club Association's 30 miles handicap road race, Floral Park, L. I.; open. Rain date, June 4.

May 28 and 30, Chicago, Ill.—North Shore Motorcycling Club's two day race meet on Hawthorne track.

May 28-29-30, Cleveland, O.—Three day endurance run of Cleveland Motorcycle Club

May 28 and 30, Terre Haute, Ind.—Terre Haute Motorcycle Club's race meet; open.

May 29-30, Newark, N. J.—Twenty-four hour endurance run of the New Jersey Motorcycle Club to Atlantic City and return.

May 30, Chicago, Ill.—North Shore Motorcycling Club's race meet at Hawthorne track; open.

May 30, Bridgeport, Conn.—Bridgeport Motorcycle Club's race meet.

May 30, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

May 30, Norwich, Conn.—Norwich Motorcycle Club's reliability run.

May 30, Detroit, Mich.—Racemeet of the Motorcycle Club of Detroit Wheelmen at State Fair track.

May 30, Springfield, Mass.—Motorcycle race meet of the Springfield Motorcycle Club, at the Springfield Stadium.

May 30, Elmira, N. Y.—Elmira Motorcycle Club's first summer race meet.

May 30, Newport News, Va.—Peninsula Motorcycle Club's endurance run to Richmond and return.

May 30, Long Branch, N. J.—Long Branch Cycle Club's second annual road race meet; open.

May 30, Asbury Park, N. J.—Twenty-five mile road race of the Monmouth Cycle Club.

May 30, Plainfield, N. J.—Third annual 25 mile handicap cycle race of the Plainfield Cycling Club.

May 30, Grand Rapids, Mich.—Bicycle and motorcycle races at Michigan State Field Day, under auspices of the Western Michigan Cycle Club.

May 30, Rome, N. Y.—Rome Motorcycle Club's 250 mile endurance run.

May 30, Detroit, Mich.—The Motorcycle Club of the Detroit Wheelmen race meet at fair grounds.

May 30, Wheeling, W. Va.—Ten mile bicycle road race; open.

May 30, Boise, Ida.—Boise Motorcycle Club's road races.

May 30, Salt Lake City, Utah—Eighteen mile bicycle road race.

June 4, New York City—Concourse Motorcycle Club's fourth annual run to Savin Rock, Conn., and return; open.

June 4, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Greenfield, Springfield and return; 175 miles. Second section.

June 18, Baltimore, Md.—Crescent Bicycle Club's annual spring road race.

June 18, Floral Park, L. I.—Century Road Club of America, New York State Division, 50 mile handicap bicycle road race; open.

July 1, Waterloo, Ont.—Dominion cycle race championships.

July 3-9, Rockford, Ill.—Racing carnival of the Illinois-Iowa Motorcycle Association.

July 4, La Salle, Ill.—Third annual open motorcycle race meet of the Illinois Valley Motorcycle Club.

July 4, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

July 4, Savannah, Ga.—Savannah Motorcycle Club's race meet.

Correspondence

Mitchel Speaks Up for Professionals.

Editor of the Bicycling World and Motorcycle Review:

I noticed an article recently in the Bicycling World and Motorcycle Review in regard to professional riders and the championships. Now it seems to me that wherever professionals are advertised to compete that they constitute a big drawing card in every line of sport, be it foot, bicycle, motorcycle or automobile races.

For instance, in the professional Marathon that was run in Madison Square Garden there was an enormous crowd, and the difference was noticeable when they ran an amateur race in the same place. There did not seem to be as much interest in the amateur event as there was in the professional race, and it is likewise in automobile racing. What would a bicycle race look like with a lot of simon pures riding?

I will admit that there are some amateurs just as good if not better than some professionals, but the word professional, and the professional riders are the drawing cards that get the money, and I see no reason why the professional men in the motorcycle game should not be recognized the same as in any other sporting line.

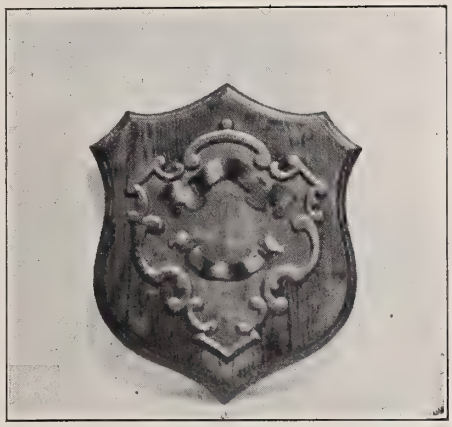
ARTHUR MITCHEL, Dallas, Tex.

BUFFALO LANDS THE F. A. M. MEET

Directors Vote for the City by the Lake—Tours Will Probably Replace Endurance Contest.

Buffalo is to be the scene of the 1911 national meet of the Federation of American Motorcyclists. On Tuesday of this week President F. I. Willis, of the F. A. M., had enough votes in hand from the directors to be able to say with certainty that Buffalo had the winning majority. On Monday President Willis sent each director a telegram asking him to send his vote at once by night letter, and in consequence he had his answers on hand Tuesday morning. President Willis did not vote for either Indianapolis, Springfield or Buffalo. The Indianapolis motorcyclists took their defeat mildly, and to show their spirit stated that they would go after the F. A. M. meet in 1912 and that they would plan such a campaign as would assure their victory.

For weeks the contest between Buffalo and Indianapolis has been a warm one, the Indianapolis boosters pinning their faith on the speedway and the city's admirable location geographically. It was claimed that Indianapolis was most nearly in the center of motorcycling activity. Springfield, Mass., entered the contest only at the eleventh hour.



Buffalo went after the convention systematically and pushed its claims with vigor. The Buffalo motorcyclists announced when they extended their invitation that should they be successful, they would want the meet during the week of July 4. It is probable that the meet will be staged during the week beginning Sunday, July 2. The Fourth of July falls on Tuesday and it was the idea of the Buffalo crowd to have a double endurance run, starting simultaneously from New York and Chicago, the riders to reach Buffalo on the Fourth of July. This, added to the other events and the patriotic celebration, would make Buffalo hum for one day at least.

President Willis is still troubled with the question of holding tours instead of a national endurance run this year. He states that he hopes both will be held, as the endurance runs in the past have proved one of the biggest features in drawing attendance to the national F. A. M. meets. A conference of the F. A. M. directors will probably be called soon to decide the question definitely. The constitution of the F. A. M. does not specifically direct that an endurance run shall be held. Consequently, the matter remains for the directors to decide.

Buffalo is preparing to show the motorcyclists the "time of their lives." The city is easy of access and its location on Lake Erie and its nearness to Niagara Falls makes it a splendid meeting place for midsummer. There is a project for a new board track in Buffalo with Jack Prince as the builder. The national meet will bring together some of the fastest riders in the country and it is thought that a board track will be provided for them. The best available dirt track in the neighborhood of Buffalo is the one mile track at Fort Erie, Ont.

New York-Southampton Blanks Ready.

"Going East!" is the train crier's announcement which heads the entry blank for the New York Motorcycle Club's tenth annual spring double century run, to Southampton, L. I., on Sunday, May 7. This is the biggest event of the year in Metro-

SOUTHAMPTON RUN CLUB SHIELD

politan motorcycle circles, drawing over 150 entries, and is the oldest affair of its kind in the United States. The entry fee is $2 and post entry costs $3, the last call being May 6 at 9 p. m. The run will start from Columbus Circle at 6 a. m. and riders are due at Southampton at 11 a. m. where a two hour stop is allowed for dinner. The return journey commences at 1 p. m. and riders are due at the finish, Columbus Circle, at 6 p. m. The riders will be checked at Patchogue going and coming. Survivors will receive silver watch fob souvenirs and the club having the largest number of bona fide members on the run will be awarded a bronze shield. Disqualification is the penalty for checking in ahead of time. Entry blanks can be obtained from any dealer in New York or Brooklyn, or from the New York Motorcycle Club, 10 West 60th street, New York City.

Savannah Motorcyclists Refreshed.

Some 200 motorcycle owners of Savannah, Ga., gathered for a "blow out" on the evening of the 4th inst., the affair being given by Morgan and Keen, the only motorcycle repair men in Savannah. One of the features of the entertainment was the dispensing in bottles of an amber liquid that was grateful to the palates of those who have reason to know that Georgia has been dry for the past four years.

HURL CHALLENGES AT DE ROSIER

Chapple Among Those Who Want to Meet Him on the Track—Prospects of a Match.

Coincident with DeRosier's homecoming from his successful season in California, ambitious aspirants for his title are firing challenges at him. The first defi was hurled this week when A. G. Chapple issued a challenge to DeRosier for a five mile match to be run in three heats at the opening meet at Guttenberg, N. J., on May 14. In case of a tie, Chapple stipulates that the length of the deciding heat be determined by tossing a coin. As evidence of good faith he offers to post any amount up to $500 to bind the match.

There is no doubt but that such a match would prove a star drawing card, but it is doubtful whether it can be arranged at Guttenberg. It is a long, long time since DeRosier has done any riding on dirt tracks, and some doubt has been expressed as to whether he would consent to risk defeat on a dirt course with which he is entirely unfamiliar, while Chapple is entirely at home on Guttenberg. It has been suggested that DeRosier might accept the challenge provided Chapple would agree to meet him on the Springfield Stadium. Both men have ridden on this track, but, of course, Jake would have considerable advantage on any board track, as he has specialized on these "dishes" for several years. If Jake refuses to ride at Guttenberg, it is quite probable in the opinion of those close to Chapple that he could be persuaded to ride at the Springfield stadium if given time to get more familiar with the track.

Goerke's Leg in Serious Shape.

Unpleasnt news came this week from the bedside of Walter Goerke, the well-known racing man who is lying in the Bethany Hospital, Brooklyn, with a triple fracture of the left leg. Finding that the bones were not knitting properly, the surgeons decided to open the leg and found that the ends of the broken bones were so shattered that it would be necessary to cut off sections in order to have a clean joint that would knit properly. Over an inch in all was severed from the crushed ends of the bones, which then were wired and clamped with silver plates. It now is expected that the bones will knit without further surgical attention, but at best Goerke's leg will be shorter than it was. Should the bones not knit, it is feared that amputation is the only alternative, but such heroic measures will be avoided if possible. At present Goerke is resting comfortably, barring occasional pain, of course. His friends and club mates are visiting him frequently and keeping his room well supplied with flowers.

SCOTCH RACER FOR SPRINGFIELD

With Fast Rex Will Give Battle to American Professionals—DeRosier-Gustafson-Spencer Match.

Through the booking of James Baxter, one of the crack professional motorcyclists of Scotland, who now is in this country, the big race meet of the Springfield (Mass.) Motorcycle Club, Inc., on May 30, Memorial Day, will have an international flavor. Baxter brought over with him a fast Rex and, on the strength of his work abroad, is looked to give the American riders a run for the money.

In addition to the DeRosier-Spencer-Gustafson match, which practically is assured and will be the headliner on the card, the club has arranged a fine program embracing all three classes of riders and the prizes are of the really worth while sort. In fact the purses in the professional events are the most liberal ever offered in this country.

The curtain raiser will be a three mile novice, limited to 50 cubic inches machines, and the awards will be gold, silver and bronze medals. The inter-city team race for private owners should fill well and provide good sport. Each team will consist of three riders all from the same city, and machines up to the 61-inch limit are eligible. but they must be stock and carry factory equipment. Teams will be allowed to enter substitutes if desired. The race will be run in semi-final three-mile heats, the winner of each team in the trial heats to ride in the final. The trophies are valued at $25, $15 and $5.

Trade riders will have an inning next, when a 25-mile handicap is scheduled. The handicapping will be on a time basis, and all machines under 61 inches are eligible. The winner will receive a silver trophy valued at $25, a $15 stop watch goes to the second man and a $5 silver cup is the third award.

By this time the appetites of the spectators should be well whetted for the professional events, the "chile con carne" of the speed menu. In the 10-mile professional—61 class, of course—the winner will receive $50; second $25 and third $10. Two hundred and fifty dollars will be divided among the first three men in the 50-mile "pro" race, on a basis of $150, $75 and $25, all in gold, and, in addition, all starters in the professional events will receive $25 appearance money. There is no entry fee required in any event, but entries close at midnight on May 20 with W. A. Kothe, 33 Dwight street, Springfield, Mass.

No effort is being spared by the club to secure the best riders for the meet, which will be the star attraction in the Eastern motorcycle world on that day. Arthur Mitchel, the Dallas (Tex.) crack is thinking about coming North and overtures also are being made to Henri St. Yves, the Clifton professional, who has a fast Peugeot. New York undoubtedly will send a good delegation of all classes of riders and New England, of course, will send her best riders. Altogether the meet promises to be of national racing importance.

Baker Bests Stewart in a Match.

Victory rested with Erwin G. Baker as a result of a match race with Fred Stewart, which was held at Cambridge City on Sunday, 10th inst. The race was the best two in three heats of 10 miles each. Baker used a 4 horsepower Indian, while Stewart was mounted on an old 4 horsepower Merkel that was not in the best of condition, owing to excessive use. Baker took the first heat in 13:20. In the second heat Stewart had trouble with his machine and changed to a 6 horsepower mount, allowing Baker a handicap. Stewart was to ride 10 miles while Baker rode nine. Stewart made up three-quarters of the handicap distance before Baker finished. The race was run on John Lackey's mile track, which was in pretty fair condition. Motorcyclists from Indianapolis, Richmond and Connorsville, Ind., were present at the race.

Savannah Dealers' Race Missed Fire.

Savannah, Ga., was to have a dealers' motorcycle race on Saturday, 15th inst., but the dealers did not get together on time, and as the Savannah Motorcycle Club would not take the affair in hand, it has been postponed. The Savannah Club is completing the detail arangements for the big race it is to hold on the Fourth of July.

DE ROSIER HAS A NEW SWEATER.

Guess who gave it to him?

TRIO TRIAL TO BE TOUGH TRIP

Motorcycle Touring Club of New York to Take Journey Rain or Shine—An Advance Run.

Despite the fact that the course is in bad shape and that there are likely to be no perfect scores, good support has been given the first trio cup trial of the Motorcycle Touring Club of New York, (Affiliated) which takes place Sunday, 23d inst. Twenty-four entries had been received up to the closing time on the 18th, and it is probable that a few late comers will come in before the start. The rain of the past week has not improved the course, but the contest is scheduled to take place rain or shine, so that the contestants have a merry time in store for themselves and one that they will not soon forget.

The entrants are as follows: Class A, singles—Joseph Buckingham, Fred Wise, Stanley Thorpe, Otto Krause, Ludwig Arnson, Stephen Winhold, Charles Frolke, all Harley-Davidson; David Molin, William Wood, H. Krackowitzer, all N. S. U.; Class B, twins—John Siemsen, George Ashley, A. Hoffman, Otto Weinig, L. Wagonblast, J. B. Meinell, C. A. Beuchard, L. Schultheis, all Merkel; F. J. Wreier, Samuel Levin, M. E. Toepel, A. J. McIntyre, all Indian; M. P. Sullivan, Thor with tri-car, William Housner, Pierce four.

In addition to competing for the individual medal awards, 18 of the entrants are riding on teams which are trying for both the club team and trade team prizes, which are silver cups. The trade teams are such only in the sense that the men composing them all ride the same make of machine, but there are no factory riders or professionals entered. The professional class was abondoned for lack of entries, as the cash chasers were not attracted.

Several of the entrants went over the course on Sunday, 16th inst., and found the going very bad. The worst stretch was encountered five miles from Peekskill where several miles of deep soupy mud took all the steam out of the prospectors after they had pushed their machines for a while. Riding was impossible in some places. Several snow flurries helped to make things more disagreeable and on top of all this mechanical troubles were frequent. Free engine clutches were a boon to those who had them and those who did not often wished that they did. Several of the riders got off the course often; another who had been riding recklessly finally struck a pig and came to grief for good; still another tore off his stand and broke his belt fastener by catching the stand on a projecting rock and the muffler of one machine caught fire. It was long after dark when the last man reached New York, thoroughly tired and chilled.

POLICE STOP HARLEM'S RACEMEET

Unauthorized Use of Track Causes Blue-Coats to Step in—But Three Events Already Had Been Run.

Police interference rang down the curtain suddenly on the Harlem Motorcycle Club's closed club meet at the Brighton Beach mile track, Sunday, 16th inst., in the fifth mile of the 25-mile handicap. The trouble appeared to be due to a misunderstanding between the club and the track superintendent regarding permission to use the track. Negotiations were carried on over the 'phone, and the member representing the club claimed that he understood that the club could use the track. On the other hand, the superintendent maintained that he did not give permission to use the track.

"BLUFFING OUT" THE MOUNTED BLUECOAT

When the riders arrived at the track the superintendent, who lives on the grounds, was not at home and they were not molested after assuring a mounted policeman that they had permission to use the grounds. When the fourth race was on, the superintendent came tearing in accompanied by two mounted officers and threatened to have the whole crowd "jugged" for trespassing. He cooled down after the riders told him that they understood that he had said "yes," but nevertheless ordered the police to clear the track.

The track was in miserable condition and there were some very bad ruts and holes on the far side and turn. The blustery wind made it very uncomfortable for the small crowd present, but the racing was good—what there was of it.

Ferdinand Mercier on a "T. T." Indian registered first in two events and J. Fredericks, 6 Merkel, won the other. The curtain raiser was a five-mile open between Mercier and Constant on Indians and Frank Hart, RS. Hart stopped in the second mile with carbureter trouble, but got going again and had some exciting brushes with Constant who was just a mile ahead of him. Mercier led all the way and won by half a mile, Constant taking second.

Six started in the 10-mile handicap, the limit men having 3½ minutes. Hart rode a 7 Merkel with racing bars in this race and had one minute handicap. Mercier started from scratch. Hart quit in the second mile, his bars having loosened. The handicapping was good and the limit men had nearly three miles piled up before Mercier got away.

The time trials furnished the best sport of the day and marked the debut of Frank Hart on an Indian. He was the first to go after the old gentleman with the scythe, and whooped around in 1:01⅘. Mercier then shaved a second off Hart's figures, clocking 1:00⅘ and Constant registered 1:01⅕. All of these times were remarkable considering the bad condition of the track and the stiff wind which swept over it. In the trials all three men rode the "T. T." Indian. L. H. Guterman acted as handicapper, starter, timer, judge and almost everything else in the official line. Summary:

Five mile open—Won by Ferd Mercier, Indian; second, John Constant, Indian; third, Frank Hart, R-S. Time, 6:01.

Ten mile handicap—Won by J. Frederick, Merkel (3:00); second, Ferd Mercier, Indian (scratch); third, John Constant, Indian (1:00). Time, 13:30.

Mile time trials—Won by Ferd Mercier, Indian, time, 1:00⅘; John Constant, Indian, 1:01⅕; Frank Hart, Indian, 1:01⅘.

POPULAR PRICES AT RICHMOND

Effect of Ten Cents Admission Fee Curtailed by Weather—Varied Program Included Three "Comic Races."

Ten cents was all it cost to see some good motorcycle racing in Richmond, Va., on Monday, 17 inst., when the comparatively young and growing Old Dominion Motorcycle Club held its first meet at the state fair grounds. Threatening weather scared a good many people away, but a thousand braved the enmity of the weather man and got their money's worth and more.

The card was a varied one and provided for all kinds of riders and races, and included novelty, comic, handicap, novice, class and free-for-all events. The races filled well and some exciting sport was on tap. Greenhow Johnson, the "state champeen," took a bad tumble in practice and did not cut such a figure as he had expected, but nevertheless entered two events and bagged the star number, a 20 mile free-for-all handicap. In the comic races, the pie eating requirements furnished considerable amusement for the spectators. Summary:

Ten miles, four horsepower singles—Won by L. L. Walton, Merkel; second, A. P. Gentry, Indian. Time, 15:55.

Two miles comic—Won by L. W. Hines, Thor; second, L. L. Walton, Merkel. Time, 3:45.

Five miles, 3½ horsepower singles—Won by B. B. Bivins, Indian; second, E. V. Philpotts, R-S. Time, 8:10.

Two miles comic—Won by A. P. Gentry, Indian; second, B. B. Bivins, Merkel. Time, 3:15.

Five miles novice—Won by E. G. Gunn, Merkel; second, W. C. Wayland, Pierce. Time, 8:14.

Two miles comic—J. Ferraro, Indian; second, E. G. Gunn, Merkel. Time, 3:15.

Twenty miles free-for-all—Won by Greenhow Johnson, Indian; second, L. W. Hines, Merkel. Time, 28:57.

Miss-and-out, singles—Won by A. P. Gentry, Indian; second, L. W. Hines, Thor. Distance, 10 miles. Time, 14:35.

Ten miles for twins—Won by B. B. Bivins, Merkel; second, E. G. Gunn, Merkel. Time, 13:57.

Free Cases for Membership Cards.

Members of the F. A. M. no longer will have any excuse for carrying broken or dirty membership cards, or losing them, either, as the Hendee Mfg. Co., Springfield, Mass., has offered to provide all members with neat leather card cases. The offer has been accepted and Secretary G. B. Gibson is sending the cases out to all new members, while old members can get one by dropping Gibson a postal at Westboro, Mass.

ICAGO CLUBS OPEN THE SEASON

They Scatter in All Directions and Find Varied Road Conditions—One Gets Chicken and Cigars.

Sunday, 9th inst., marked the real opening of the motorcycle riding season in Chicago. All the clubs turned out in force to attend the first road runs of the year. The North Shore Motorcycle Club went to Libertyville, about 40 miles, where they disposed of a big chicken dinner before returning. The Chicago Motorcycle Club, which has its home on the south side, rode over to Valparaiso, Ind., 52 miles from Chicago, where they also had something for the inner man. The riders of the Chicago Club reported the roads over which they passed as being in good shape, while the North Shore contingent said that the Libertyville road was in fearful condition. There were 35 men in the North Shore bunch and the Chicago crew mustered 20 men. The smaller and newer clubs also turned out to enjoy a spin in the fine weather. The Oak Park Motorcycle Club, the Calumet Pleasure Club, the Englewood Motorcycle Club, the Motorcycle Club of Chicago and the South Chicago Motorcycle Club, all gave their machines the first limbering up of the year.

On its Libertyville run. the North Shore Club had some pleasant experience that in a large measure served to compensate for the unpleasantness of the road conditions. The riders were entertained at Highland Park, Ill., by the Pfanstiehl Coil Co., of North Chicago, cigars being passed around. The good old-fashioned chicken dinner at the Newcastle Hotel was a treat, indeed. On the homeward run the motorcyclists were accompanied almost all of the way by a man in a six cylinder touring car. He took an interest in the crowd and invited everybody to his home, where the guests had everything their own way. It was afterward learned that the automobilist is one of the best bicycle riders in the region and is the holder of many century bars. His interest in the motorcyclists was due to a combination of his liking for gasoline touring and his old love for the healthy sport of cycling.

Westing Again to Entertain Indians.

Once a year the riders of Indian motorcycles in Indianapolis, Ind., are given a celebration by G. H. Westing, the Indian agent in Indianapolis, and Westing now has announced that the sixth annual affair, which takes the form of a run from Indianapolis to Martinsville, will be held on Sunday, May 7. One hundred riders are expected to take the trip, and they will be the guests of Westing at dinner at Martinsville. Many of the riders will be taking the run for the sixth time. The event each year has been held on the first Sunday in May, and the prospective motorcycle guests have looked forward to it with pleasurable anticipation. The scenery is very beautiful along the road to Martinsville, especially along the Blue Bluffs, which is one of the garden spot localities of Indiana and one of the prettiest in the whole Middle West.

Two Days' Meet for Terre Haute.

Two days of racing are planned by the Terre Haute Motorcycle Club, of Terre Haute, Ind., for May 28 and 30, respectively. There will be 16 events and a special prize of a gold medal for the fastest mile of the meet. The prizes to be given are expected to draw a large crowd from the surrounding territory. The races will be run on a good half-mile dirt track, which is well banked. Forrest R. Casebeer is the secretary of the club, which has its home at 525½ Ohio street.

DINNER OF THE MARSH-METZ CLUB, BROOKLYN, N. Y.

From the left the guests are H. Senior, W. Ready, C. Hurley, N. Halsey, H. Muller, J. A. Farrell, F. Ward, C. L. Simms, H. Heyer, E. Whyatt, W. Siegele, H. Woodcock, J. F. Phillips, P. Ackerman, L Halsey and Prof French.

NORTH SHORE ADOPTS REGULATIONS

Windy City Organization "Lays Down the Law" Governing Its Club House—Also Votes for Closed Mufflers.

Getting right down to "brass tacks" in the administration of its affairs, the North Shore Motorcycling Club, of Chicago, Ill., held a very important meeting on the 11th inst., at which it decided many points that are involved in the proper conduct of a motorcycle club. The meeting was held in the new club house. A set of house rules was adopted prohibiting gambling and intoxicating liquors about the premises; excluding women except on special occasions; holding members responsible for damage to club property; closing the club house at 11:45 p. m.; making the club not responsible for loss of property left on the premises; prohibiting the use of open mufflers on the boulevards, in front of the club house or on club runs when inside the city, and prohibiting any open flame in the basement where the machines are stored, on account of the lack of air currents, which allows gas to collect.

New constitution and by-laws will be ready for the next meeting night. A relief fund for unfortunate members was suggested, but it was decided that the club is not yet strong enough to support such a plan. The topic of accident insurance came up as a result, however, and a committee was appointed to find out what rates the insurance companies will make the club.

A suggestion that met with enthusiastic approval was for the club, when on runs, to purchase at each town passed through, a pennant as a remembrance of its visit. One of the most important items of the meeting was the bringing in of six applications for membership by Richert, who is one of the leaders in this year's membership race.

Card for Guttenberg's Opening Meet.

Entry blanks are out for the opening meet of the season on the Guttenberg (N. J.) mile dirt track, which is scheduled for Sunday, May 14. The card is as follows: Three mile novice, 61 class; five mile trade riders handicap, 61 class; five mile professional free-for-all; 10 mile trade riders pursuit, 61 class; 20 mile professional handicap. In the five mile professional the purses are $15, $10 and $5; and in the big pro event, $20, $15 and $10, respectively. The total prizes for the meet are valued at $125. It is the intention of the management to give larger prizes if the opening meets warrants them. Efforts also will be made to put on automobile exhibitions by prominent drivers and to arrange matches among the top-notch trade riders and professionals.

FIFTEEN NEGOTIATE TRIANGLE

Only Two Starters Fail to Complete Worcester Club's Endurance Run—Rhode Finishes with Broken Frame.

In spite of numerous mechanical troubles to several of the contestants, 15 of the 17 riders who started on Wednesday, 19th inst., in the first instalment of the Worcester (Mass.) Motorcycle Club's series of four endurance runs, finished the 136 miles run over the Boston-Providence-Worcester triangle course. Carbureter trouble was responsible for the elimination of the two who withdrew, although some of those who finished had good reason to quit and deserve credit for sticking to their difficult task.

While such a contest may seem unusual in mid-week, it is explained by the fact that the 19th was Patriot's Day, the anniversary of the first battle of the American Revolution, and a legal holiday in Massachusetts, where a great "to-do" is made over its observance, particularly in "Bawston." The riders checked out from Franklin Square, Worcester, in squads at minute intervals after 7 a. m., bound for Providence, the first control. The first mishap occurred two miles outside the city when L. Johnson collided with Charles Adams and put the carbureter of the former's machine out of business, whereupon Johnson withdrew.

Passing under a railroad bridge in Uxbridge, Herbert Hawes fell and Frank Sullivan ran into him. Hawes was slightly hurt on the left wrist and the pedals were stripped from his machine in the crash. He continued and new pedals were fitted at Providence. Hardly had Hawes got going after his fall when a puncture delayed him for another spell.

At Providence, members of the Rhode Island Motorcycle Club acted as checkers and also "treated" the Bay State s to lunch. At 10 a. m. the riders left Providence on the second leg of the run to Boston. While riding over cobble pavement in Providence the top frame tube on Paul Rhode's machine pulled out. Rhode did not have time to stop to attempt any sort of temporary repair, so he took a chance and continued on. Luck was with him and he reached Boston in good shape, where he lashed the broken tube with rope and it held to the end of the run. The riders expressed the opinion that the run from Providence to Boston was the hardest part of the trip on account of the bad roads.

Leaving Boston at 2 p. m. the contestants had trouble sifting through the crowds who were out to witness a big marathon race. In Weston, Adam's carbureter began to cut up capers and finally "lay down" for good at Northboro, where he left the machine and took the trolley for home. Christy also had his troubles on the last leg of the run when his handle bar stem snapped suddenly while he was burning the road. He had a narrow escape from a bad spill, but managed to keep the machine straight until he regained control. He got home with the damaged part only by careful riding and frequent stops for adjustment. All together, the contest was very much of a trouble run, as was the rule in the early days of the sport.

Those who finished were Ernest Gauthier, L. J. Vandreuil. F. L. Kidder, E. Jerome, Russell R. Coes, A. M. Bennett, Frank Sullivan, Herbert Hawes, Paul Rhode, R. H. Cristy, W. W. Wright, Howard Clark, A. E. Gowing, Claude Ziekell and Everitt Mills.

Brooklyn's Invincibles on the Road.

Members of the Invincible Motorcycle Club of Brooklyn, N. Y., were out scouting on the north shore of Long Island, Sunday, 16th inst., laying out a course for the club's spring run on Sunday, May 21. This event is to mark the debut of the Invincibles into the sporting arena. While the route definitely has not been decided on yet, it is quite certain that it will embrace the north shore of the island where there is some sand and hills to relieve the monotony of the good roads that abound. Experienced riders who took in Sunday's trip tumbled over with hilarity as they stopped at the end of a sand stretch and watched some of the beginners try to negotiate it. The novices flopped and floundered like ships in a storm, and in many cases the free engine clutches were their salvation. The outing was not uneventful in other ways too, for some of the riders had tire trouble and did not get home until nearly midnight.

BOSTONIANS VISIT WORCESTER

But Not in Such Numbers as Had Been Anticipated—Two Ladies Among the Forty Participants.

Although the expected 200 or more starters dwindled to 40 actual when the signal was given, the annual Patriot's Day run of the Boston (Mass.) Motorcycle Club to Worcester and return on Wednesday, 19th inst., was a success in all other respects, being favored by excellent weather and roads. It had competition in the form of the Worcester Motorcycle Club's endurance run, but nevertheless some of the latter riders were on hand to welcome the Beaneaters and act as hosts during their stay in the Wire City.

Under command of Captain A. P. Howe, the Boston riders left Copley Square at 9:15 a. m. and made the run to Worcester in two hours with only one stop. Among those who were on the run were two ladies, Misses Clara Woods and Winnie Campbell, who rode tandem with their best fellows. The beaux' names are withheld lest some one try to steal them away from their sweethearts. The slippery pavements in Worcester made a "hit" with a few of the riders, but not the sort that will be remembered with pleasure. Another rider bumped a trolley car during his stay in town but escaped with scratches.

After checking at Worcester the Bostonians et al. were the guests of the Worcester motorcyclists at dinner and then the visitors split into three squads. One bunch headed back home, another went out to try the famous Leicester hill and the third party remained to greet the Worcester riders who were taking part in the local club's endurance run around the "triangle."

Vaudeville and Wrestling at Rochester.

Wrestling, vaudeville and boxing furnished the chief entertainment at the smoker of the Rochester (N. Y.) Motorcycle Club held in Maennerchor Hall on the 8th inst. A large crowd was present and enjoyed itself hugely. The entertainment committee consisted of George Hammond, Jr., George Ellsworth, Joseph Ochs, Edward Stauder and George Wagner.

THE BOSTON AND THE COMMONWEALTH MOTORCYCLE CLUBS ON A PATRIOT'S DAY RUN.

The "panoram" was posed in front of the Boston Public Library at the start of the 1909 trip to Worcester.

MUCH MIXED RACE MEET AT DENVER

Between Baseball and Fireworks, Boyd and Cassidy Take More Motorcycle Honors —Near-Accident Causes a Flutter.

Motorcycle racing, baseball, fireworks and Wild West sham battle were the mixed offering at Tuileries Park, Denver, Col., Sunday, 16th inst. Seven thousand persons were present and got their money's worth in the racing end of the bill alone. Honors in the professional events were more evenly distributed than at the opening meet and Boyd, Flickenstein, Albright and Good all cashed in. In the amateur class Cassidy was the whole show, as usual.

Glen Boyd on his Indian was the chief executor of thrills and so forth. He tore off a 10 mile time trial in 9:31⅗ and his interspersions of daring seemed to take with the crowd. His other achievement during the meet was an easy victory over Sam Fleckenstein in a five miles professional match.

The curtain raiser was a five miles professional in which Joseph Good "made good" and trimmed Fleckenstein and Boyd, who trailed in that order. Then Dan Cassidy cantered off with the three mile amateur and topped this with a 2 miles novelty later.

There were some thrills in the five miles open between Albright, Fleckenstein and Bowen. The latter lost his hold on the bars, but managed to regain it before anything more than a scare occurred. Albright won. Fleckenstein finally managed to capture a first in the mile novelty, professional. The track was in better shape than on the opening day. Summary:

Five miles professional—Won by Joseph Good, Indian; second, Glen Boyd, Indian; third, Fleckenstein, Indian. Time, 6:14⅕.

Three miles amateur—Won by Dan Cassidy, Indian. Time, 4:00⅕.

Ten miles against time—Glen Boyd, Indian. Time, 9:31⅗.

Five miles professional—Won by John Albright; second, Sam Fleckenstein, Indian. Time, 5:28.

One mile novelty, professional—Won by Sam Fleckenstein, Indian. Time, 1:18.

Two miles novelty, amateur—Won by Dan Cassidy, Indian. Time, 3:24.

Five miles professional—Won by Glen Boyd, Indian; second, Sam Fleckenstein Indian. Time, 5:37.

Utica Opposes Rome's Endurance Run.

Endurance runs apparently do not appeal to the Utica (N. Y.) Motorcycle Club, for it has voted not to support the 250 mile contest of that sort which is scheduled by the Rome Motorcycle Club between Rome and Utica on Memorial Day. The Uticans have decided to hold a club run to Auburn on that day. Crimson and white were chosen as the club colors and a pennant design also was selected. Sunday runs are being held regularly when the weather permits, the start being made from Oneida square at 9 a. m.

TWO KANSAS CARRIERS WHO LIKE MOTORCYCLES

They are on an R. F. D. route from Kiowa, Kan., and ride Harley-Davidson machines. "These are just average loads," says F. J. Overstreet, the man at the left.

BOY WONDER BOBS UP AT STOCKTON

Twice Takes Collins's Measure—Graves Subdues the "Parisian Daredevil"—Local Talent Wholly Outclassed.

Professional riders from San Francisco were the whole show at the motorcycle races at Agricultural Park, Stockton, on the 9th inst., and the local riders did not have a look-in, the only one entered taking fifth place. Originally the meet was intended to be a relay affair between the Stockton and Sacramento Motorcycle clubs, but when the pro's swooped down, the local boys stayed out. The friends of the local riders were much peeved over the visitors coming and taking all the glory and cash, and claim that it has put a damper on the sport locally, although the spectators got their money's worth in thrills and excitement.

Further exemplifying the modern adage that "youth shall be served" the honors of the day went to Ben Broadwick, a 17 year youngster of San Francisco, who won the 50 mile race on an Indian. W. G. Collins, Indian, was second and Fred Cosgrove, Indian, third. Time, 59:02. Broadwick trounced Collins again in a five mile race, registering 5:25⅕.

M. J. Graves, the Merkel star, also obtained some publicity by establishing a track record for a mile. He skimmed around the gravel oval in 58⅗ seconds. Graves also defeated George Renal, the Parisian daredevil, who rides a monster Anzani, in a three mile handicap. Renal was given a quarter mile start, but Graves soon pulled him down. Three thousand people were present. Summary:

Fifty mile free-for-all—Won by Ben Broadwick, Indian; second, W. G. Collins, Indian; third, Fred Cosgrove, Indian. Time, 59:02.

Five mile open—Won by Ben Broadwick, Indian; second, W. G. Collins, Indian. Time, 5:25⅕.

Three mile handicap—Won by M. J. Graves, Merkel (scratch); second, George Renal, Anzani (¼ mile). Time, 3:05⅕.

One mile against time—M. J. Graves, Merkel. Time, 0:58⅗. Track record.

May Change Registration in Indiana.

Motorcycle registrations in Indiana are so badly muddled that H. L. Conter, deputy secretary of state, intends to ask the next general assembly to provide for the annual registration of motor vehicles. Under the present system, which provides for no change in the registration except in the event of the transfer of the machine, the records of the machines have become seriously mixed because the owners of the machins in various parts of the state transfer their motors without reporting the change to the secretary of state's office at Indianapolis.

SAN FRANCISCO MOTORCYCLE CLUB GATHERED FOR A SOCIAL SPRING RUN.

Not the least interesting feature of the motorcycle clubs in California is the extensive participation by women in their affairs. The picture indicates how strongly they figure in the San Francisco club.

Central Jerseymen Celebrate Easter.

With blue and white pennants, the club colors, fluttering from many machines, the new Central Jersey Motorcycle Club, of Trenton, held its first run on Easter Sunday, 16th inst. On account of the high wind and general rawness the original 60 miles course was cut in half and the riders visited Edinburg, Dutch Neck and Princeton. Upon returning to Trenton they paraded the principal streets and attracted considerable notice. A vigorous membership campaign is being waged with a view to having a large attendance at the first annual dinner which will be held shortly. It is the intention to lease commodious club quarters in the center of the city and make the rooms a general rendezvous for tourists.

Prince Now Flirting with Chicago.

Negotiations for the building of a one-third-mile board track at Riverview, Chicago, Ill., are being entered into with Jack Prince by the Chicago Motorcycle Club. At the last meeting Captain Walsh, of the club, indicated that the track is now assured and construction is expected to commence soon. At the same meeting the club's endurance run, to be held on May 7, was discussed and plans were made for the location of the various controls. Prizes aggregating $100 in value have already been donated for the run.

Chicagoans "Tryout" on Hawthorne.

Easter Sunday was an opportunity for the Chicago Motorcycle Club and the North Shore Motorcycle Club, of Chicago, Ill., to do some speed work at the Hawthorne track. The Chicago Motorcycle Club took a morning ride over into Indiana, but the North Shore crew went direct to the track, starting in the afternoon. Two informal races were pulled off, showing that the course will be very speedy when the conditioning work is finished. The turns were still soft, but the riding was fast nevertheless. An exhibition mile on a ported Thor was clocked in 1:07.

San Jose Motorcyclists Organizing.

San Jose, Cal., is going to have a motorcycle club soon and it is going to be an F. A. M. affiliated one, too. A preliminary meeting of interested riders was held in the Chamber of Commerce hall in that city on the 13th inst., at which Charles D. Reed presided as temporary chairman, and Herbert Bean kept the minutes. Organization was decided on and a committee consisting of W. N. Lee, A. C. Banta, C. H. Northrup, Jr., and Charles Reed was appointed to draft a constitution and by-laws to be submitted at the next meeting, when the full board of officers will be elected.

San Diego Plans $3,000 Club House.

The Motorcycle Club of San Diego, Cal., has prepared plans for a $3,000 club house. It will be built with special regard to the peculiar needs of motorcyclists and will be fitted with all conveniences calculated to contribute to their comfort and well being.

First Touch of Spring Causes Club Sap to Stir

O. L. Holmes, a Trenton, N. J. dealer, is the father of the Central Jersey Motorcycle Club, which has been organized in that city. It is a 100 per cent. F. A. M. club and has 27 members composed of the best class of motorcyclists in the 'skeeter capital. The officers are C. R. Crist, president; G. B. Yard, Jr., secretary; J. P. Hooler, treasurer; Charles Neuls, captain; Earle Chamberlain, lieutenant; directors, C. R. Crist, E. T. Heals and O. L. Holmes. Its F. A. M. number is 107. "Papa" Holmes called the first meeting, to which 35 riders responded and 31 signified their intention of becoming members of the new club. At the next meeting, however, this number shrunk to 27 who paid the initiation fee and the club "checked out." When the work of organization was completed, its sponsor turned the club over to the officers to shape its own career.

Instead of making the captaincy appointive or elective as is the general rule, the Trentonians have introduced an innovation which "listens" well, and that is in making the office competitive. This is to say, that every quarter, the rider scoring the highest number of points in regular tours and runs for that period becomes captain for the following quarter or longer if he continues to top the point column. This competition has the advantageous feature that it insures the captain keeping on the job all the time and arranging plenty of runs and tours and going along on them. Another bit of radicalism, but of the tempered sort, however, is found in the by-laws, which contain a clause providing for a board of governors consisting of one officer and two private owner club members. No trade rider shall be a member of this board, obviating any cause for trade jealousy.

Jacksonville, Ill., has enrolled itself in the F. A. M. club directory. It is represented by the Jacksonville Motorcycle Club which is F. A. M. 108. The secretary is A. R. Myrick, 300 E. State street.

C. A. Hunt, an Aberdeen, S. D., dealer is devoting himself to the organization of a long overdue motorcycle club in that place. Its affiliation papers are waiting to be filled in whenever it is ready.

E. H. Swarz, Elwood City, Pa., an active rider of that place is doing club missionary work for the F. A. M.

The question of F. A. M. affiliation is to be voted on shortly by the Lancaster, (Pa.) Motorcycle Club. The new by-laws which have been drafted also will come up for adoption at the same meeting.

L. J. Spingler, 16 N. Fifty-second street, Philadelphia, Pa., a dealer, has taken it upon himself to try and give the Quaker City another motorcycle club. He already has sent in nine applications, accompanied by the necessary lucre, to Chairman Estabrook who is acting as stakeholder until Spingler gathers some more recruits. When the club is born it will be straight F. A. M.

R. W. Jackson, 742 E. 18th street, Minneapolis, Minn., has a live club already launched and plowing through the club sea at a good clip. It will fly the F. A. M. affiliation pennant from the peak soon.

E. A. Thiem, Minneapolis, Minn., the manufacturer of Thiem motorcycles, is taking an active interest in the Minneapolis Motorcycle Club and lining it up in the F. A. M. A committee has been appointed to revise the by-laws to conform with the standard F. A. M. form of club by-laws, and it was voted to affiliate and require all members to join the F. A. M. A committee was appointed to arrange for three hill climbs during the season, and another committee was entrusted with laying out two endurance runs. The sentiment of the club was that one of the runs should be to Chicago and return and the other to Duluth and return. To a third committee was given the task of arranging for motorcycle races at the next state fair of the Minnesota State Agricultural Society, and also to stage a meet at the Hamline track across the river in St. Paul during the season. The question of uniforms was touched on and as a result of the discussion which was favorable, the club probably will order new riding togs soon. Captain E. H. Hammer promised plenty of club runs during the season. The club also is thinking of joining one of the several tours which very likely will be organized to take in the F. A. M. meet.

Chairman Estabrook of the membership committee offers the suggestion that the tour committee of the F. A. M. provide tour pennants bearing the words: "F. A. M. National Meet" for the tours which will be organized in various sections to joy-ride to the meet. Amplifying his suggestions he proposes that the pennants be of a different color for each tour, so that the color of a pennant readily will denote the section a rider belongs to.

The Norwalk (O.) Motorcycle Club has "checked in" as F. A. M. club 109 with 17 men. W. C. Pressing, 192 W. Main street, is the secretary.

A. G. Savage & Bro., Gary, Ind., have reciprocated their appointment as an official F. A. M. repair shop by organizing an F. A. M. club. It is called the Gary Motorcycle Club and is affiliated as No. 106. J. E. Murray, 614 Broadway, is the secretary.

The Toledo (O.) Motorcycle Club will have to worry no more regarding sanctions for closed club meets, for it now is affiliated as No. 105. H. H. Giese, 713 S. Platt street, is the secretary.

B. S. Morgan, Jr., Lynn, Mass., manager of the motorcycle department of the Lynn Sporting Goods Co., 176 Oxford street, has a club in the "mill." It is expected to emerge from the hopper soon.

More evidence of the growth of the club movement in Canada is to be had in the application of F. W. Sanquine, 1219 Seventh avenue, East Calgary, Canada, for club literature.

At present there is a tie vote in the Winnipeg, Manitoba, Motorcycle club as to whether or not it shall affiliate. The reason for the hesitation is a discussion as to how much affiliation is worth to it under present conditions where there are no districts or working representatives of the organization that seeks to control them.

W. D. Gresham, Birmingham, Ala., an F. A. M. state referee, is going to try and organize a new club in that city. He reports many new riders in that section and aims to lay the foundations for a live affiliated club.

By-laws adoption and F. A. M. affiliation will come before the new Cedar Rapids (Ia.) Motorcycle Club for decision soon.

Joseph C. Smith, 805 Perry street, LaPorte, Ind., an F. A. M. member, is scouting for riders in his district who are infected with the F. A. M. club fever. He already has discovered several and plans to bottle them into an organized club soon.

Mobile, Ala., has a new club on the block and the details will be completed shortly. It promises to "do things" when the clutch is thrown in.

In Hamilton, O., W. S. Thompson, L. Whitehall and Fred Schnitcker, constitute a committee of three who are beating the bush for recruits for a club. The final round-up is booked to take place shortly.

Spokane Forms Track Association.

Spokane, Wash., is to have a specially-built motorcycle track soon, and the Spokane Motorcycle Track Association has been formed to superintend its construction. It will be a half mile dirt saucer and will be built near the Minnehaha park grounds. In view of the increasing popularity of board tracks, which are conceded to be faster than any other kind, it appears somewhat in the nature of a retrograde step on the part of the Spokaners to decide on a dirt oval instead. The directors of the association state that it was their original intention to build a board track, but that upon investigation they found that experience has shown a dirt track to be more satisfactory and that is the kind that will be built. Therefore while Spokane may look forward to some good racing it hardly can expect to see any records broken on its new speed bowl. The track will be banked 30 degrees and will be circular. In the infield a base ball field will be laid out. Plans are nearly ready and work on the track is expected to begin next month.

KENTUCKIANS DISCOVER A CREEK

What Came of Exploring an Unfrequented Road — "Discovery" Proved Snakeline and Caused Motorcyclists to Retreat.

Odd kinks in the topography of the State of Kentucky were discovered by two members of the Louisville Motorcycle Club, Louisville, Ky., on an excursion which they took on Sunday the 9th inst. L. W. Thompson and Glen White were traveling a rather unfrequented road and one on which they never before had been, when they encountered a point where the road ran through a stream about 20 feet wide. There appeared to be a rather stiff incline just beyond. Thompson opened up a little and splashed through the water, landing safely on the other side and climbing the hill which he found there. White did not like the idea of riding through water, so he bravely waded in like Balboa christening the Pacific and crossed also. Thompson proceeded about 100 yards further on when he discovered that the road made another turn and went through the creek again. Not to be daunted he took another splash and emerged successfully on the other side. After proceeding about 100 yards more he discovered that the road again went through the creek. He stopped, swore a little, sized up the situation and then decided that having come thus far he might as well see the thing through, as this was probably the last crossing. He opened up and plunged through. About half a mile further on he came to the crest of a small hill where he could get a good view of the surrounding country and what was his chagrin to find the road made another sharp curve and once more went through the creek. This was the last straw so far as Thompson was concerned and he turned his machine about and retreated in haste, slamming through the creek the numerous times necessary to get back to the point of his first encounter with it.

When he reached the third crossing on the way back, White stood on the opposite bank and calmly pulling away at a pipe. He "kidded" Thompson on the latter's retreat and commended his own judgment in not undertaking a swimming expedition with his motorcycle simply because Thompson led the way. Needless to say both Thompson and White have that road spotted and claim they never will tackle it again.

Motorcycles Gain; Motor Cars Lose.

Motorcycles have taken the Secretary of State of Indiana somewhat by surprise, and in his annual report he tells about the great increase in registrations that they show. The report, in referring to motorcycles, says:

"Registrations show a marked increase in the number of motorcycles registered, while the automobile registrations show something of a decline. The adoption of the motorcycle as a means of transportation by traveling salesmen who call on trade in small cities and towns and by such salesmen handling city orders is held to account for the increase in this class of motor vehicles. Reports to the Secretary of State indicate that the motorcycle from a thing of pastime has been made a utility machine."

Dallas Thinks Motorcycles Good.

Appreciation of the utility advantages of the motorcycle is not lacking in Dallas, Tex., where nearly all the principal drug stores now employ motorcycles in making deliveries in the residential district. The police department, too, is a great user of motorcycles and has placed an order for two Merkel machines to supplement the two Indians and two Thors which now constitute part of its transportation equipment.

KENTUCKIANS WHO TACKLED COUNTRY ROADS EARLY.

Members of the Louisville Motorcycle Club, Louisville, Ky., taken as they were about to start on a recent Sunday run to Shelbyville.

WHAT HAPPENED TO MR. MOORMANN

"Happenings" Began in Moorsville and the Young Man is Glad He's Alive—His Motorcycle "Fatally Injured."

If only a moving picture man had been present to see it all on April 17, at Moorsville, Ind., he would have had a film that would have taken rank with the "six best renters," for what happened to Bert Moormann, an amateur motorcycle rider, and his new motorcycle on that day in that town was little short of a miracle. The whirl started with a puncture. Moormann laughed. 'Twas nothing!

A boy threw a rock at him. Moormann spoke to the boy's father, who chased Moormann with a knife.

"B-r-r-r-r" from the new motorcycle, and Moormann was out of reach. He laughed. Then things really began to happen.

Moormann bumped a traction car. Later he was forced to jump from his machine to avoid death under a C. H. & D. train. The motorcycle was struck. Moormann was bruised, but he just laughed.

Moormann then continued on his explosive way, until he hit Prosecutor Dennis O'Neil. Both hit the street. Moormann did not dare laugh, because O'Neil did not see the humor in the situation.

"Me for the country and the open road," said Moormann.

The new motorcycle sputtered gayly forth and was "going good," much to Moormann's exhilaration, when it struck an automobile. The collision was mutual, with the motorcycle underneath. Moormann was thrown many feet, but escaped with only a bruise or two. The new motorcycle was damaged beyond using and Moormann's headlong career was ended for the day.

Texans Oppose National Circuit.

The Lone Star Motorcycle Club, of Dallas, Tex., held its regular meeting on the 18th inst., at which time a smoker was given, together with liquid refreshments for the members and visitors. The club voted unanimously against the so-called national racing circuit proposition, believing that such a scheme would militate against the club in case the latter should want to give race meets of its own in the future. The outlook for racing in Dallas is not over bright for the present, however, as the only track in the city is owned by horse racing men, and, furthermore, on account of several accidents last year during the State Fair races, the city passed an ordinance forbidding motorcycle and automobile racing on the State Fair track. The local automobile club, nevertheless, is figuring on building a steeply banked automobile race track, and if the project is consummated, the motorcyclists doubtless will get a change to use the track.

THREATENING BILL AT ALBANY

Motorcyclists in New York State May Have to Pay $5 Per Year—Numbers to be Carried, Too.

After enjoying a happy exemption since 1904 from licenses, registrations and the carrying of number plates, motorcyclists in New York state again are in peril of legislative action which may result not only in their having to carry numbers but in their having to pay an annual fee of $5 for the privilege of operating their machines in the state. When, seven years ago, the New York legislature seriously proposed classifying motorcycles with automobiles and requiring them to meet the same onerous conditions as the four-wheelers, vigilant F. A. M. workers presented the motorcyclists' case so pointedly and forcibly that they won the exemption asked for, so that the riders in New York since have been free from the exactions imposed on their fellows in New Jersey and other states. This situation now is threatened by a bill introduced at Albany on the 17th inst., taking the form of an amendment to the so-called Callan automobile law and bringing motorcycles under the provisions of the motor vehicle act.

The bill was introduced by Senator White, chairman of the committee on internal affairs, and has the approval of Secretary of State Lazansky. In relation to motorcycles it provides that owners will be required to pay the registration fee of $5 imposed on automobile owners. It also carries the provision that within 20 days after it has become a law there shall be displayed conspicuously on all motorcycles a sign with the number assigned by the secretary of state.

Whitney Dislikes a Label Error.

Upon looking at the picture of the Indiana Motorcycle Club that appeared in a recent issue of the Bicycling World and Motorcycle Review, Vice-President Perrin B. Whitney, of the Western F. A. M. district, discovered that there was an error in the labeling, in that the caption indicated that the picture was taken at the national F. A. M. meet two years ago, when as a matter of fact it was taken at the time of the Western District endurance last fall. Whitney suggests that the Western District should have the credit for the photograph, in order to do justice to the well known riders who appear in it.

Philadelphians Are Affiliated.

April 19 was the affiliation birthday of the Philadelphia (Pa.) Motorcycle Club and its certificate bears number 110. It is a 100 per cent. F. A. M. club, all of its 15 members belonging to the national organization. C. G. Mueller, 29 N. St. Bernard street, holds down the secretarial job.

JUST OUT OF THE CRATE FROM LOS ANGELES.

Immediately following the record breaking ride of Don Johns on the "No. 21" Indian, the machine was shipped to Chairman Thornley to be officially measured as to piston displacement. The picture shows the group who saw it unpacked. Chairman Thornley is third from the right.

'TWAS TRULY A ROMAN HOLIDAY

Folks in the York State Town Shut up Shop to See Two Motorcyclists Race—Noonan Wins.

Because of the interest in a motorcycle match road race between two local riders, business was practically suspended in Rome, N. Y., on the 8th inst. Many stores and a number of factories shut down during the race and lots of people came from many places within a radius of 50 miles. The trolley lines ran special cars and bulletin boards were posted in front of the newspaper offices not only in Rome, but in Utica, Syracuse and other places in the vicinity. For two hours in the afternoon the long distance telephone lines along the course were closed to business and the company had operators at different points to send in reports of the progress of the race. The manager of the local telephone company acted as starter, the contestants being George Stockbridge on a 4 horsepower Harley-Davidson and A. S. Noonan on a 4 horsepower Indian. Stockbridge was given a start of 100 yards for the 14 miles, but half a mile down the road was caught by Noonan. After that it was a hammer and tongs battle between the two with Noonan finishing in front, having covered the distance in 18 minutes, 35 seconds. The event did much to stimulate motorcycling interest in and about Rome.

Canadians Project Own Federation.

For the control of motorcycle sport in Canada, the Toronto Motorcycle Club, at an important meeting held on the 5th inst., decided to go ahead with arrangements for the formation of an organization to be known as the "Canadian Federation of Motorcyclists," similar to the controlling body in the United States.

Affiliation with the Federation of American Motorcyclists has been thought of for some time by the Toronto club, and the awarding of the national F. A. M. meet to Buffalo has given a further reason why the club should affiliate, as it is probable that the motorcycle races in connection with the meet will be held on Canadian soil, at Fort Erie, Ont., with many Toronto riders participating. Some of the Canadians, however, do not like the idea of having the club affiliate with an American organization, and the idea of a Canadian association to govern Canadian affairs arose.

It is predicted that the outcome will be that a Canadian federation, entirely self-governing, but with a close working agreement with the American body, will be created. Meanwhile the Vancouver (British Columbia) Motorcycle Club has affiliated with the F. A. M., and the club at Winnipeg, Manitoba, has decided to enter the F. A. M. fold.

MALLOY WINS C. R. C. A. HANDICAP

Townsend Captures Time Honors in Big Cycle Race at Floral Park—Acme Wheelmen Strong.

Exploding once more in decisive fashion the popular fallacy that bicycling practically is "down and out," and doing it in the face of most unfavorable weather, one of the laregst bicycle races that has been held in the East in the past 10 years occurred at Floral Park, L. I., Sunday, 16th inst., when the Eastern Division of the Century Road Club Association staged its spring 10 miles handicap road race. It was won by John Malloy, of the Empire City Wheelmen of Brooklyn, a 2:30 man, who covered the course in 31:06 and crossed the line first by the fine margin of one-fifth of a second.

At Malloy's elbow was J. Sellner, of the Tourist Road Club, who started from the same mark, and he beat out A. R. Cooley, an Association man, by the same fractional fifth of a second that cost him victory. Cooley had three minutes handicap. The first scratch man to finish was John Townsend, of the Irish-American A. A., who came in fourth, and also captured first time prize. Townsend jumped 250 feet from the finish and beat out Joseph Kopsky of the New England Wheelmen for first time prize by two seconds in a slashing windup. This pair were the only scratch men to get in on the 25 place prizes. Townsend's time was 28:36⅗. E. Rick, Acme Wheelmen, with 1:30 handicap finished fifth in 30:06⅘. From an entry field of 150, there were 86 starters and 45 finished.

Third time prize was captured by Franklin Fisher of the Empire City Wheelmen, a scratch man, who went the route in 29:31⅕. Fisher beat J. Schuster, also on the back mark, by 1⅕ seconds and John DeBruyn, Acme Wheelmen, gathered fifth time prize from the minute mark. Club honors went to the comparatively young Acme Wheelmen, which made good its claims of good riders in its ranks by taking seven of the first 25 place prizes. The Association took second club honors.

It was the rawest Easter Sunday in many years and in the morning there were several flurries of snow and rain which did not help the course any. In addition there was a cold and piercing west wind blowing which chilled to the bone all who did not resort to violent exercise. In spite of the disagreeable conditions there was a large crowd present, for the race had been well advertised. On account of the unfavorable weather the race was late in starting and it was twelve o'clock when the long markers were dispatched from in front of the Oriental Hotel with 3½ minutes' handicap. Other batches were sent off at 3, 2½, 2, 1½ and 1 minute intervals, respectively, and then came the honor men.

On the outward leg to the Westbury

SUMMARY TABLE OF RESULTS OF THE FLORAL PARK RACE.

Place Prizes.

	Rider and Club.	Handicap	Time
1	John Malloy, Empire City Wheelmen	2:30	31:06
2	J. Sellner, Tourist Road Club	2:30	31:06⅕

Time Prizes.

1	Jack Townsend, Irish-American A. C	Scratch	28:36⅗
2	J. G. Kopsky, New England Wheelmen	Scratch	28:38⅗
3	Franklin Fisher, Irish-American A. C	Scratch	29:31⅕
4	J. Schuster, Empire City Wheelmen	Scratch	29:32⅖
5	J. DeBruyn, Acme Wheelmen	1:00	29:38

THE STARTING AND FINISHING POINTS, RESPECTIVELY, OF THE C. R. C. A. HANDICAP

turn the men had the wind at their backs and remained well bunched, so much so that where the road narrowed they choked it completely. At the turn the first spill occurred and brought down four men. It took them considerable time to disengage their feet, which were strapped to the pedals, of course, and although they remounted and continued, the loss of time put them out of the running for prizes. A. R. Cooley was the first man around the turn, closely followed by Henry Kest and John Malloy, the latter the ultimate winner, in that order.

On the homeward run the going against the wind soon told on the weaker men and the field thinned out rapidly. Four miles from the finish another spill occurred and seven men bit the dust. Two machines were badly smashed and three others not so much and most of the fallen ones were scraped in sundry places. Two of the fallen ones remounted and finished outside the prizes. The last and worst spill occurred 1½ miles from the finish. At this point the scratch bunch caught up with the long markers and there were about 25 men closely packed. Coming to a narrow point in the road some of the men on the edge were forced into the ditch. The crash came when A. J. Eberhart, an Acme man, skidded and fell. The others piled on top of him pell mell to the number of a dozen. P. E. Wilkie, of the Acme Wheelmen, suffered most, sustaining a fracture of the bones in his hand, but he pluckily re mounted and finished fifteenth.

The field bunched again and remained close together to the finish, which was close and exciting enough to make the fans forget the biting wind for the moment. The handicapping was good and the places were earned by fractions of seconds.

Salt Lake to Have the Stars, Too.

Frank Kramer, Jackie Clarke and Iver Lawson are to appear in Salt Lake City this summer as well as in Newark, N. J. It has been arranged between Manager Chapman of the Newark Velodrome and Manager Ernest Pye of the Salt Palace that Clarke is to go out to Salt Lake City some time during the season and ride a series of match races with Lawson. When the winner of this series has been decided, Kramer will go out to Salt Lake and try conclusions with him. New racing stars that may develop at Salt Lake may also be brought East if they are fast enough.

Lafayette's Will Hold a Handicap.

Bicycle activity in Baltimore, Md., for the coming season will start on Sunday, May 7, when the Lafayette Wheelmen stage their annual 12 mile spring handicap road race over the Shell Road. The course will be covered twice. The limit men will have eight minutes. Thirty prizes will be offered and all amateur riders are eligible. Entries are being received by E. R. Boehm, 1014 E. North avenue, Baltimore, Md.

NEWARK RACING SEASON OPENS

Bardgett, the New Referee, Disqualifies Fogler Under "No Teaming"Rule—Clarke and Kramer Don't Finish.

With a brand new track capable of accommodating 9,000 people and with a great big resolution on the part of the National Cycling Association and the track managers to suppress teaming, the cycle race season at Newark, N. J. opened on Sunday, 16th inst. Practically all the stars in the cycle race firmament were present except Floyd McFarland. Champion Frank Kramer, A. J. "Rocket" Clarke, Joseph Fogler, Alfred Goullet, Patrick O'Sullivan Hehir and a representative contingent of the "comers" were on hand. Iver Lawson and Edward Root were present but did not ride. Not the least interesting feature of the occasion was the appearance of Walter Bardgett as the official referee.

A cold and blustering wind made things rather uncomfortable for the 5,000 fans who gathered for the opening meet, but the racing itself was spirited, and if it holds up to sample for the balance of the season, the enthusiasts in Newark and vicinity will get their money's worth. It was almost too much to hope for that Clarke and Kramer should give each other a hard tussle in the opening meet, and as things turned out neither of these shining lights finished in the big race of the day.

Joe Fogler was the big noise in both professional events, taking the one mile Easter handicap and the five mile open Kramer Stakes. Unfortunately for the big blond Brooklynite, however, Referee Bardgett subsequently disqualified Fogler as the winner of the five mile handicap on the ground that Fogler was teamed up with Goullet and Peter Drobach. Not only did Bardgett lift the $100 first prize out of Fogler's reach, but he also tacked on a $25 fine. Needless to say, Fogler immediately went up in the air to an extent that imperils all aviation records and the roar that he let out made the windows rattle as far away as Atlantic City. Bardgett appears to make the slogan "No Teaming" have a meaning closely resembling what it says.

Frank Blatz, of Jersey City, won both the amateur events, these being a half mile handicap, in which he started from scratch, and a three mile open. James Gunning was the graduate in the one mile novice.

Kramer and Clarke were the scratch men in their respective heats in the one mile Easter handicap, but neither man qualified in his heat. Iver Lawson was scheduled to start with Hehir in the third heat from 20 yards, but did not appear. In the final Pedlar Palmer from 130 yards took the lead in a driving ride, with Werner Beck at his heels, but they were gradually overtaken by Goullet and Fogler. In the sprint Fogler waltzed to the front with Goullet second and Palmer third.

The amateurs had their usual spills, in the fifth and sixth heats of the half mile handicap, but there were no serious injuries. In the final heat Frank Blatz soon gobbled up the distance men and went to the front, winning in 59⅕, with Herman Kjeldsen second and Seibert third.

In the three mile amateur open Adam Beyerman was the only one to give Blatz a fight and the two headed the procession most of the way, the finish being Blatz, Beyerman and Earl Adams in that order.

Things looked good for a finish struggle between Clarke and Kramer in the five mile pro event, as both men were going strong in the third mile. Soon after that, however, Clarke dropped out and Kramer did likewise after a few more laps, the withdrawals being due to punctures and broken spokes, respectively. Fogler lay in a good position until the approach of the final whirl, when he plowed through and went to the front, leading all the way around the last turn and up the stretch.

The summaries:

One mile novice—Won by J. Gunning, Newark, N. J.; second, Gus Wohlrab, Jersey City. (No third prize.) Time, 2:51.

Half mile handicap, amateur—Won by Frank Blatz, Jersey City (scratch); second, Herman Kjeldsen, Denmark (20); third, Charles Seibert, East Orange (60). Time, 0:59⅕.

One mile Easter handicap, professional—Won by Joseph A. Fogler, Brooklyn (20); second, Alfred Goullet, Australia (50); third, William (Pedlar) Palmer (130); fourth, Al Halstead, London (65); fifth, Ernest Jokus (Newark (130). Time, 2:00⅕.

Three mile open, amateur—Won by Frank Blatz, Jersey City; second, Adam Byerman, Mohawk A. C., Brooklyn; third, Earl L .Adams, Montclair, N. J. Time, 7:59⅗.

Kramer Stakes, five mile open, professional—Won by Joseph A. Fogler, Brooklyn; second, Paddy O'Sullivan Hehir, Australia; third, Alfred Goullet, Australia; fourth, Fred Hill, Boston; fifth, Fred McCarthy, Toronto, Can. Time, 11:49.

Big Cycle Road Race for Wheeling.

In common with many other cities throughout the country on that occasion, Wheeling, W. Va., is to have a big bicycle road race on May 30, Memorial Day. Herman Friedrichs, bicycle dealer, is promoting the race, which will be a ten miles affair with a high grade bicycle as first prize and a string of attractive awards to those who come after the winner. The course will be over the National Road to Wheeling Park and return, and will be open to all riders of 18 years or under. A big colony of local youngsters already are training assiduously for the event, for they have their eyes on the choice prize that heads the list.

Garden City Team Proves the Victor.

Riding from flag to flag as if his Satanic Majesty were at their heels and prodding them with the tangs of his pitchfork, the six men, representing the Garden City Wheelmen, of San Jose, Cal., as a team swept everything before them at the opening meet of the season on the Pacific Coast, which was held on the stadium in Golden Gate Park, San Francisco, on the 2d inst.

The visitors easily captured every heat of the 30 mile relay team race and did it so decisively that the home riders never had a look-in. Second place went to the New Century Wheelmen's team of San Francisco, who finished a lap to the bad. No other teams finished, the Bay City and Acme Cyclers teams withdrawing at the end of the fifth lap. The laps were of five miles each and the fastest lap was covered by E. Trulson, a San Jose rider, who peeled off the fourth heat in 14 minutes flat.

The winning team consisted of Ezra Erick, Al. Mahoney, Leo Dossee, E. Trulson, L. L. Gerken and Nick Eisentraut. Erick started the battle for his team, and in the fourth mile unwound a jump that carried him away from the bunch as if they were anchored. When they woke up a wild pursuit of the runaway commenced, but despite teaming on the part of the pursuers Erick gained steadily and turned over a good lead over the others to his relief, Mahoney.

Mahoney also started out to burn things up and lapped the field before he retired. His successors all did the same thing and seemed not satisfied to win, but piled on the agony by lapping their rivals as often as possible. The only mishap occurred when J. Pellitere, of the Bay City team, fell. He was not injured. Five thousand people witnessed the race, which was run under the rules of the California Associated Cyclists.

The summary:

First heat—Won by E. Erick, Garden City Wheelmen; second, G. Delker, New Century Wheelmen; third, C. Silver, Acme Cyclers; fourth, J. Pelletier, Bay City Wheelmen. Time, 14:40⅗.

Second heat—Won by G. Mahoney, G. C. W.; second, H. Folger, N. C. W.; third, A. Ortege, B. C. W.; fourth, J. Chick, A. C. Time, 14:45⅖.

Third heat—Won by L. Dossee, G. C. W.; second, L. Trickler, N. C. W.; third, J. Fitzgerald, B. C. W.; fourth, E. Johnson, A. C. Time, 14:08.

Fourth heat—Won by E. Trulson, G. C. W.; second, B. Brush, N. C. W.; third, R. Rowland, B. C. W.; fourth, J. Brown, A. C. Time, 14:00.

Fifth heat—Won by L. Gerkin, G. C. W.; second, E. DeLong, N. C. W.; third, C. Christenson, B. C. W.; fourth, M. Barry, A. C. Time, 14:22.

Final—Won by N. Eisentraut, G. C. W.; second, A. Born, N. C. W. Time, 14:11. Total time, 1:26.06.

San Jose Cyclists Visit Gilroy.

Over 100 cyclists, a majority of them members of the Garden City Wheelmen, of San Jose, Cal., participated in a run to Gilroy on the 9th. Upon arrival the visitors removed some of the stains of travel, rested a bit and then attacked a fine "feed." When the gastronomical battle was over, the victuals had been annihilated. The return was made leisurely late in the afternoon after an enjoyable outing.

Lightfire Wins at 22d Regiment.

Duplicating the performance of three honor markers in other events, H. Lightfire, a scratch man, won the two mile bicycle handicap at the final regimental games of the season at the Twenty-second Regiment Armory, New York City, Sunday, 16th inst. J. Donovan, a 100 yard man, took second and W. Buckingham, scratch, was third. Time, 5:23⅗.

Clement the Victim of a Collision.

J. W. Clement, a prominent member of the New England Wheelmen, New York City, is nursing a fractured collar bone as the result of a collision while out riding recently. Another bicyclist shot out of a side street unawares, and struck Clement broadside. He probably will do no more riding for six weeks at least.

Acme Cyclers Issue a Challenge.

Smarting under their severe trouncing at the hands of the Garden City Wheelmen, of San Jose, Cal., in the 30 mile team relay on the 2d inst., the Acme Cyclers of San Francisco have challenged the San Joseans to a five man team relay match. The challenge has been accepted and the date will be selected later.

Kelly-Racine Tires

For Motorcycles and Bicycles

are now being made in our new factory, which commences as the only tire factory in the world completely equipped at the outset with the most modern and advanced tire making facilities known to the art.

We shall produce 1,500 motorcycle tires and 3,000 bicycle tires per day, together with 1,200 inner tubes, a full line of tire sundries and a line of automobile, motor truck and carriage tires. Each tire, too, will have years of "know how" in it. Get acquainted with us promptly, as our earliest customers will have reason to rejoice.

Canada Cyclists in Annual Session.

Canada's cycling organization, the Canadian Wheelmen's Association, held its annual meeting at Toronto, Ont., on Saturday, 15th inst., with President Louis Rubenstein, of Montreal, in the chair. The election of officers resulted in a bloodless but complete victory for the Toronto interests, Robert Falconer, of Toronto, being elected president for the ensuing year. Rubenstein, the retiring president, was made honorary president. The other officers were chosen as follows: J. W. Gibson, vice-president; H. E. Richards, of Toronto, secretary; J. Smith, of Toronto, treasurer.

As chairman of the racing board, G. L. Mackay, of Toronto, was re-elected, and William M. Gladish, of Toronto, was made chairman of the membership committee. The other committee chairmanships include Ford S. Kumpf, of Waterloo, Ont., chairman of the committee on rights and privileges; W. G. Ayling, of Montreal, chairman of the committee on rules and regulations, and J. H. Rous, of Waterloo, chairman of the roads committee.

The changes in the list of officers mark the passing from active participation in cycle matters of such enthusiasts as L. Rubenstein, G. S. Pearcy, J. Posle and W. G. McClelland. A set of younger officers is now in control. One of the most promising signs of the times was the large number of delegates present, over 50 being on hand. At the annual convention a year ago a scant half dozen attended.

Affiliation with the Amateur Athletic Union is as far off as ever, the matter being left unsettled at the meeting. The Dominion championships will be held at Waterloo, Ont., on July 1, where there is a fine quarter-mile track. Five gold medals have been donated by prominent members of the C. W. A. for the Ontario meet at Toronto. Some criticism has been caused by amateur riders appearing on the burlesque stage in cycle roller race acts, and the matter will be investigated. G. L. Mackay, chairman of the racing board, reported that 98 riders had taken out registrations during 1910. In order to encourage novices, the youngsters will be charged no fees for riding in novice races.

Minister's Example Proves Bad.

A young fellow summoned to the Chelmsford (England) police court the other day for cycling on the sidewalk, stated as an excuse that he had seen the minister doing so and therefore thought it could not be wrong. He evidently doesn't know much about ministers.

Amateur Racing Strong in England.

Amateur bicycle racing in England is very popular. At present over 1,200 riders are competing under the rules of the Amateur Athletic Association.

Spring Century Run Plans of C. R. C. A.

All arrangements have been completed for the spring century run of the Century Road Club Association, Eastern Division, which is to take place on Sunday, April 30, but which will be postponed until May 7 in case of rain. It is the 14th annual spring century of the association and is to be run over an entirely new course, which will insure the best roads and the easiest century of the year. The start will be made at Columbus Circle, 59th street and 8th avenue, Manhattan, from which place the cyclists will go via Jamaica, Floral Park, Hicksville, Amityville and back to Hicksville for the noon stop. Dinner is scheduled at Wolgast's in Hicksville. From Hicksville the return trip is via Freeport, Far Rockaway, Valley Stream and Jamaica back to Columbus Circle. The first division, which will be led by A. R. Cooley, will average 16 miles per hour, while the slow division, of which George Bieregel will be the chief pacemaker, will average 12 miles per hour. J. P. Berlenbach is the captain. The entrance fee is 50 cents and entries are to be filed with Howard Zarr, 2202 Seventh avenue, New York City. A handsome silver medal will be awarded to each rider who finishes, upon payment of $1.00 at the finish of the run. The medals are on exhibition in the windows of a number of bicycle establishments in Manhattan and Brooklyn.

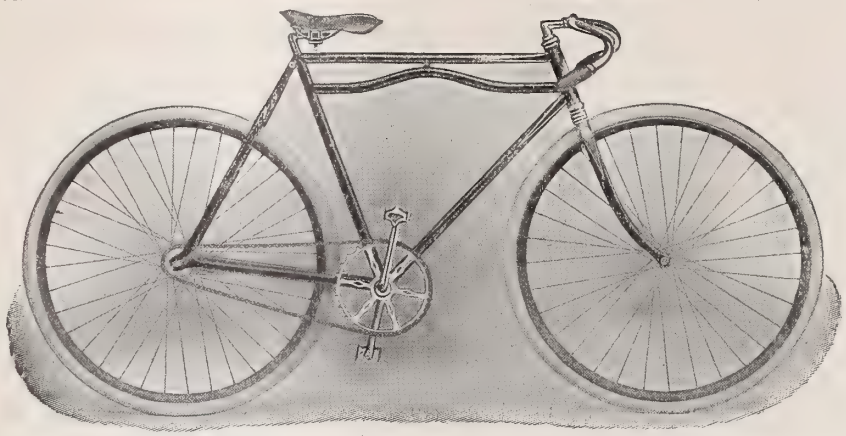
The
New England Racer
Price $55

A WINNER

Fast Strong
Light Snappy

The Only Bicycle in the World Built for Sprint RACING on Small Board Tracks.



Three Reasons Why

First. It brings the rear wheel four inches closer to the hanger, bringing more weight on the rear wheel, and relieves the strain from the front wheel and forks. This will be appreciated by all track riders, as it is a well established fact that in order to acquire any great amount of speed on tracks with sharp turns, it is essential to have all possible weight of the rider on the rear wheel.

Second. The New England Racer uses from 14 to 19 inches less chain than the average racing models. This is a big factor in racing, as a long chain is bound to swerve, and if not kept tight will jump the sprockets or catch on the top of a tooth and break. This is a frequent occurrence on board tracks. On the New England Racer the chain can be adjusted as loose as the rider desires without the least danger of jumping the sprockets or breaking.

Third. The rear stays being much shorter, are stronger, and will prevent the sprockets from pulling out of alignment with each other under great strain.

BICYCLING WORLD COMPANY
154 NASSAU STREET, NEW YORK

ARE YOU READY

for the opening of the Spring Season with your shelves stocked with

New Departure Coaster Brakes

New Departure Bells

New Departure Cyclometers

and your counters, walls and windows showing

New Departure Signs, Booklets

FOLDERS, ETC., ETC.

The demand for New Departures was never so extensive as now. Our big factory has been running twenty-three hours a day, six days a week for months, filling orders. We have been busy before, but never like this.

WHY? Because the New Departure coaster brake is better made than ever before. Progress in the art of treatment of the steel has resulted in important improvements that make all the wearing and working parts practically and actually tool steel—indestructible.

The design remains the same so that all parts of the present model are interchangeable with parts of models for several years back.

One dealer writes, "The 1911 refinements have given us a faultless brake." Another writes, "It is 100 per cent better," etc., etc.

The dealer who stocks New Departures offers his customers the best. The dealer who does not stock New Departures is surely driving trade to his competitors.

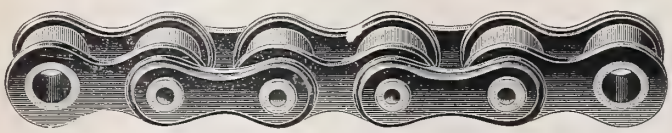
Bicycle Repairmen Joyous Over the "TIP-TOP" Offer

It's a real live WINNER. That's why bicycle repairmen everywhere are shouting for it. The "TIP-TOP" offer on NEVERLEAK Tire Fluid means a lower price to you, and twice the usual number of certificates.

These same Neverleak certificates bring you many premiums that are really worth having. Not a trashy one on the list.



It will pay you every way to handle the "TIP-TOP" proposition. Just ask your jobber about it and learn what a big WINNER it really is.

SUNDRIES AND ACCESSORIES
BICYCLE AND MOTORCYCLE

We carry everything for the bicycle and motorcycle. Our stock is a carefully selected one and our capital, resources and standing enable us to secure, at all times, all the latest novelties and to anticipate and be in a position to care for the dealers' every need.

"Bi-Motor carries it" is the New England dealers' first thought. Prices are always right.

We issue separate catalogs of bicycle and motorcycle sundries and accessories. Send for them.

We carry in stock a complete line of all coaster brake parts (old and new) and can promptly fill orders for same.

We are also New England distributers for Emblem bicycles.

BI-MOTOR EQUIPMENT COMPANY 177-179 Portland St. BOSTON, MASS

Here is a quartet of

KOKOMO Bicycle Tires

that fully meet the spring situation.

Kokomo Defender Special

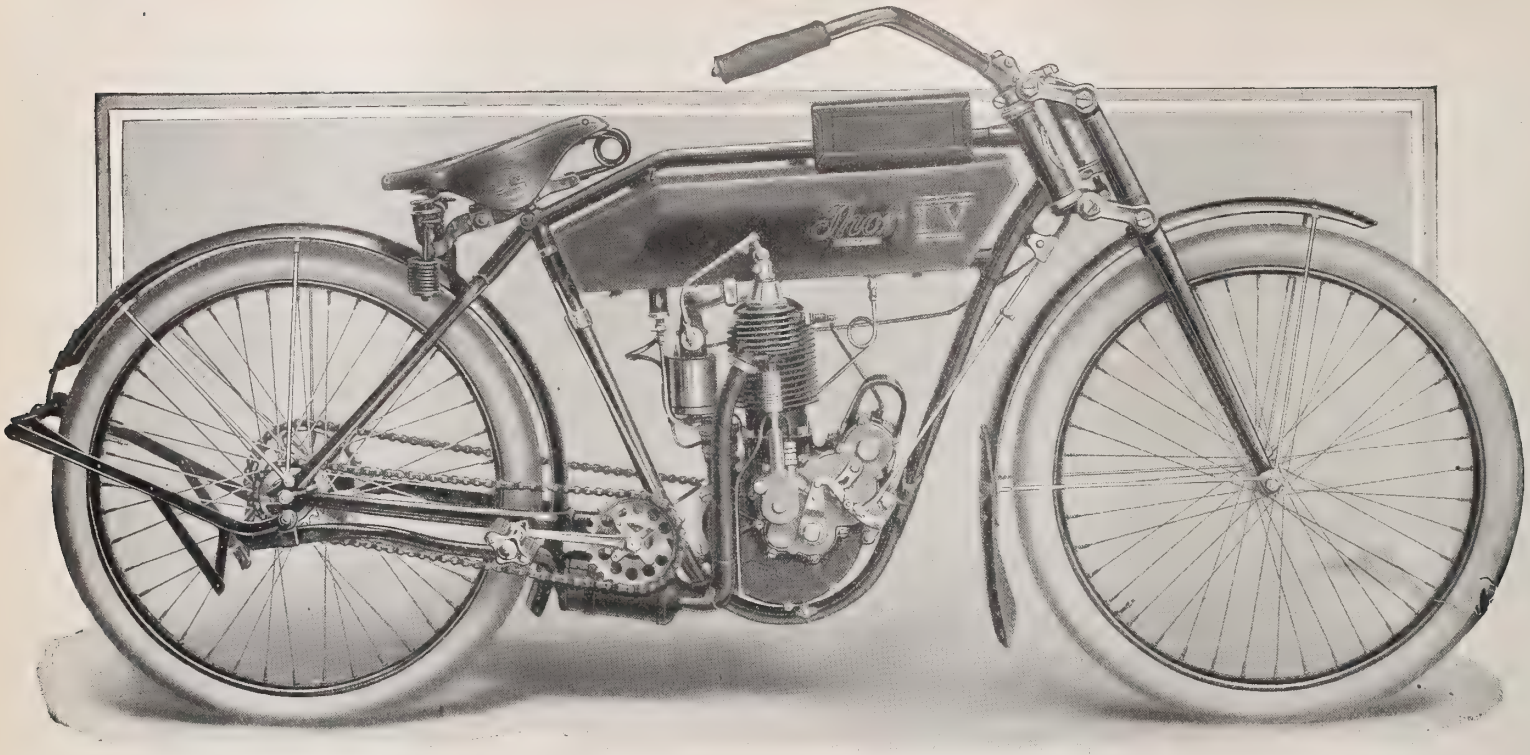
This popular guaranteed tire is specially designed and constructed for road use. It is made from the best materials obtainable, being carefully built up by hand with pure para inner tube, and, owing to the very high quality of the inner tube used, a puncture is very easily repaired.

Kokomo "New Oxford"

A medium price tire, yet so good in quality that it does not do it justice to call it a medium grade tire. We have built these tires so that in case of puncture they will not be worthless but can be repaired. Also furnished in smooth tread.

Kokomo Dotted Tread

A tire that prevents skidding and is safe and reliable on wet, slippery roads and city streets. Of high quality and careful construction. Furnished in road weight or in thick tread.

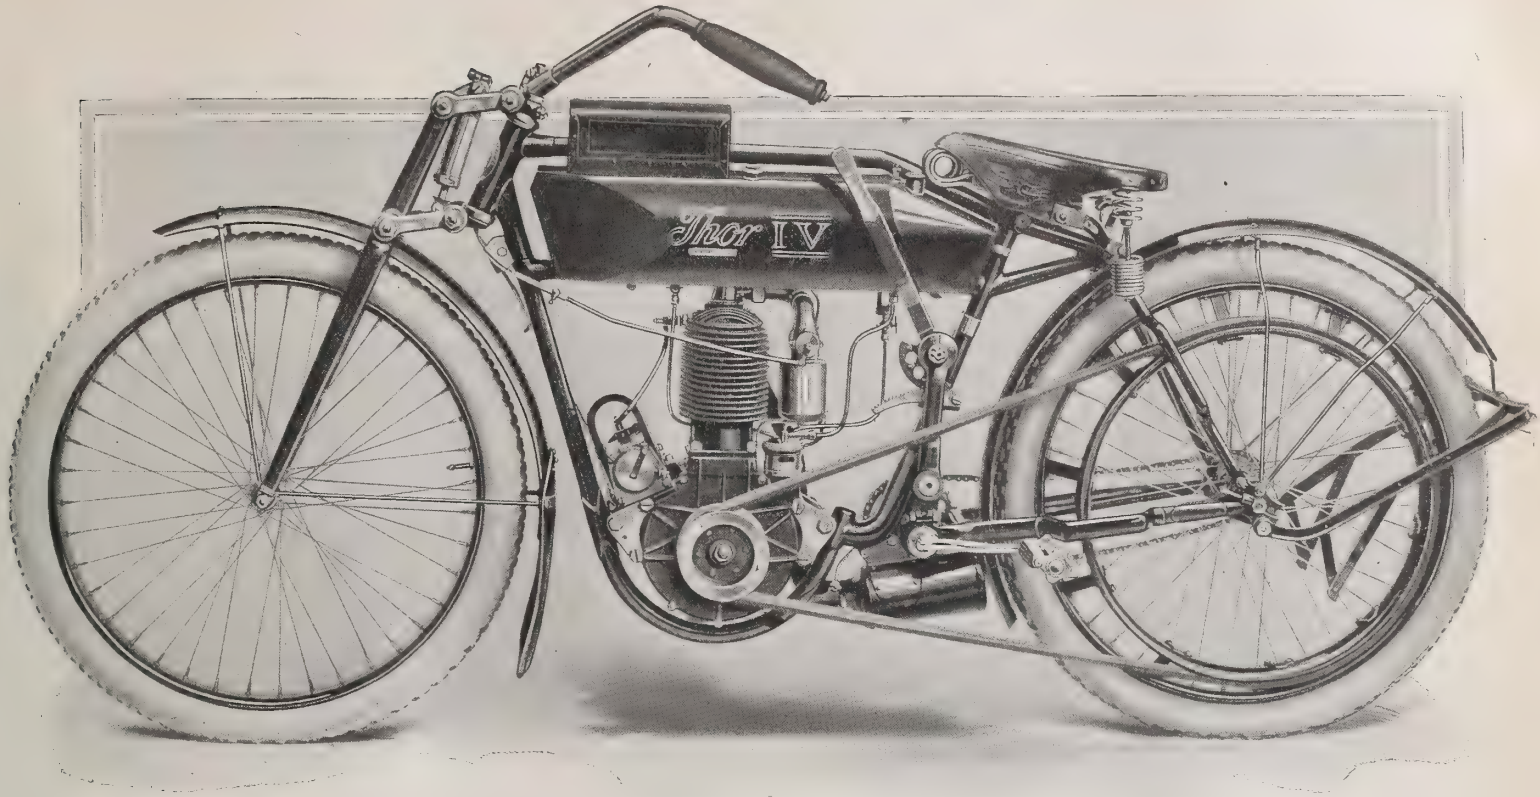


Kokomo Guaranteed Red Thorn

Made of red rubber, is extra heavy and is built especially for long service.

Are you profiting by what we offer you in Kokomo Tires?

KOKOMO RUBBER CO., Kokomo, Ind., U.S.A.



Chain Drive *Thor* IV

HERE is a motorcycle that is built with but one thought in mind. How good can it be made.

From past records of this chain drive motorcycle it is plain to be seen that we have succeeded in producing a motorcycle far above the standard. Because no other motorcycle has a chance with the chain drive *Thor*, when it comes to real tests of endurance. The *Thor* will give you the service the other fellow promises; you do not take a chance, you are playing a sure thing.

The *Thor* is the greatest motorcycle of endurance in the world. Past records prove it so.

AURORA AUTOMATIC MACHINERY CO., Thor Bldg., Chicago, Ill.

Belt Drive *Thor* IV

A BELT DRIVE motorcycle designed on entirely new lines. It embodies all of the advantages of other types but has none of the disadvantages.

No shaky and noisy idlers to contend with. The belt tension is applied in the right way without ruining the belt by giving it a double twist. *Thor* belts are 2 inches wide and the finest belting obtainable. They will last longer than other belts because they are husky enough to do the work required.

If you would know more about the *Thor* write to us for a catalog.

Licensed Price, $1.50

ANDERSON GLASS-AND-STEEL SPARK PLUGS now are offered in a new model with small diameter shell and a mica stem, for motorcycles where the larger shell of the Model A is not suitable. In presenting the Model B we do not withdraw the Model A, which has made good all the claims as to the glass insulation for spark plugs. The improvement exemplified in the Model B does not involve any essential point in the operation of the plug, but goes mainly to the form of the outer insulation of the central electrode or stem, to avoid the use of the larger shell necessary in the Model A.

The basic principle of glass insulation welded to the steel shell and central electrode into one integral mass still prevails, and the important function performed by the ANDERSON GLASS-AND-STEEL plug, in providing a window to the engine, is still maintained in the Model B, as the flash of the explosions is shown through the glass insulation, as in the Model A.

You may have heard of what wonderful service ANDERSON plugs performed for owners of twins, last year and the year before. There were many, many cases where no spark plug on the market except the ANDERSON would work for more than a few miles in the rear cylinder, while all ignition trouble from heat and carbon disappeared forever when the ANDERSON was fitted. We shall soon make special provision for riders whose engines require especially short plugs, both in the engine and at the stem. Dealers and jobbers in all parts of the country are now carrying ANDERSON GLASS-AND-STEEL spark plugs in stock, in all engine sizes.

You'll Lose Your Eyesight Looking for a Tire to Beat Our New

"WORLD BEATER"

Puncture Proof Self Healing

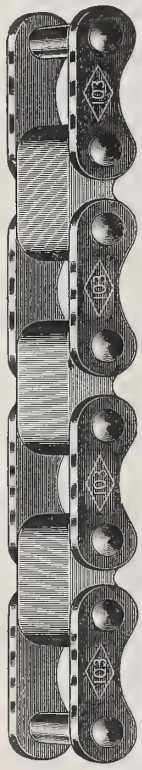
A HEAVYWEIGHT, splendid road tire, with new studded or button tread, that will satisfy 95 per cent. of the average riders. Every tire treated by a patented process with Genuine Neverleak Tire Fluid. Neverleak Tire Fluid has been on the market for a good many years and has made hosts of friends amongst users and repairers of single tube bicycle tires. It is purely a vegetable compound, and is guaranteed not to be harmful to rubber, but on the contrary, as a preservative, and for closing up small leaks and punctures, has no equal. Small punctures from tacks, pins, nails, glass, stones, etc., close up automatically without even the rider's knowledge. Every experienced tire user knows that these small punctures have always caused endless worry and annoyance to riders. Don't compare the "World Beater" Tires with some of the cheap, trashy tires filled with gum arabic, glue size, paste, etc., that are offered by some of the mail order houses. Some of these look beautiful on paper, but when the tires are put in service, they wear and ride more like a common piece of garden hose. "World Beater" Tires are strictly a quality proposition, and are fully guaranteed in every way that is fair and reasonable.

We want a good, live, hustling dealer in your locality.

Our list price is $8.00 per pair, subject to our usual discount, but we have an inside proposition where a dealer will agree to push them.

Here is a good one. Get in line at once. Let us send you sample pair at our lowest inside price.

Don't fail to ask for our 1911 Bargain Bulletin, also Catalogues 36-7-8.



JOSEPH STRAUSS & SON, Buffalo, N. Y.

DIAMOND CHAINS

FOR BICYCLES AND MOTORCYCLES

Diamond Bicycle Chains are too well known to need much mention. Their superiority has long been acknowledged by general use and as standard on prominent machines in this and other countries. Our types and sizes meet every service condition. With a good service record extending over twenty-one years and with the most practical connecting link ever offered, Diamond Chain is the logical equipment for any bicycle.

Diamond Motorcycle Chains are equally dependable, do their work right in bad weather as well as good, and are in every way a mighty good investment in a place where it pays to be careful. A driving chain especially, is subjected to jerking strain from the engine blows, and this with the dirt that gets on the bearing surfaces would wear inferior chain metal in short time.

We recommend the following for motorcycle work:

For main drive, Diamond No. 150 Roller Chain.

For starting, Diamond No. 29 Block Chain.

These chains will be found highly satisfactory. Of course, we make other sizes for special conditions. Better start with Diamond Chains than come to them later. Ask your dealer.

WANTED TO HANDLE THE ERO LINE OF MOTORCYCLE EQUIPMENT

We want every Motorcycle Dealer and Rider to have one of our catalogs; it is necessary for you to have it to keep abreast with the times, because we only handle the real up-to-the-minute supplies that you are looking for.

Ero Passenger Attachment will fit any motorcycle; made of 1¼″ x ¼″ high quality spring steel, highly nickel-plated. Complete equipment includes Troxel motor saddle, spring foot rests, handle bar, dust guard and set of axle nuts. Has low, comfortable saddle position and looks well on any motorcycle.

These attachments will fit any motorcycle built that has round wheels!

Ero Luggage Carrier will fit any motorcycle; made of 1¼″ x ¼″ high quality spring steel, highly nickel-plated. Top is of ¾″ channel iron, fitted with stained oak; equipped with two 40″ straps with patent catch buckles, and two Ero axle nuts. Guaranteed to carry any weight and not damage baggage, as top is smooth, flat surface.

We also have passenger attachments that are used with our luggage carrier, which we will furnish at a small extra charge, either front or side riding position.

Dealers! Get busy with us; we are on the job to fill your wants and orders. Remember, EVERYTHING for the motorcyclist! Passenger attachments, luggage carriers, belts, either flat or V type, waterproof belt dressing, pulley laggings, pedals and pedal rubbers, magneto cut out, spark plugs, watch holders, pedal pins, motorcycle stands, frame pumps, rear wheel dust guards—in fact, anything and everything you need.

We guarantee our prices to be the lowest and the goods supplied of HIGHEST QUALITY. You'll save money buying your supplies of us—other dealers do.

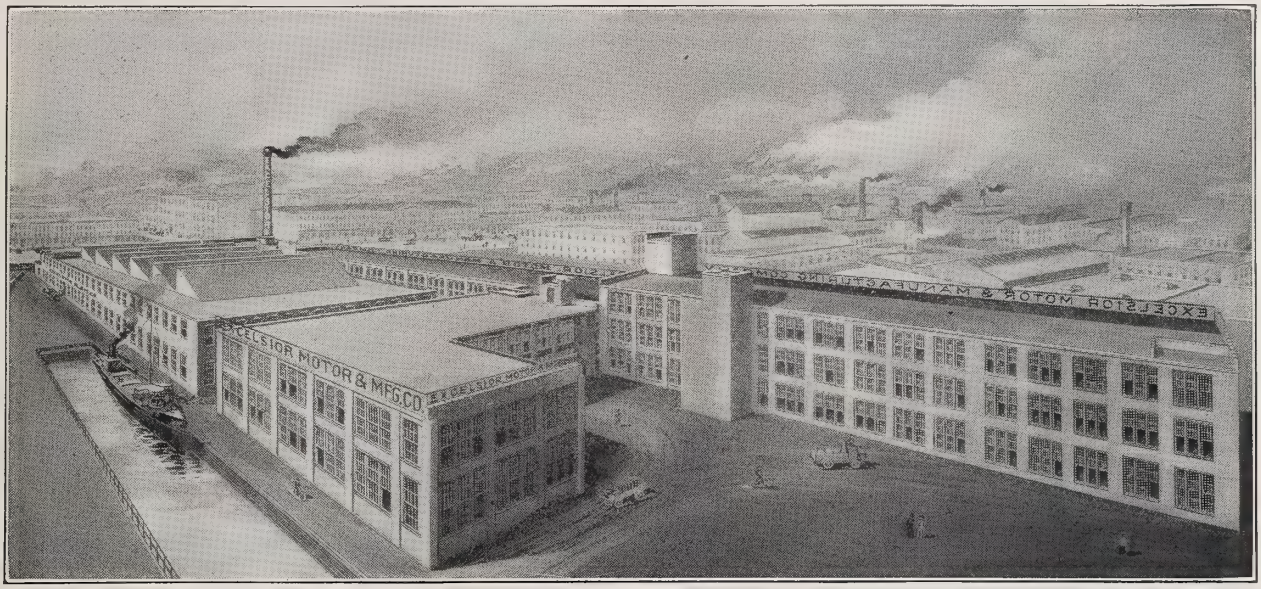
KELLY-RACINE BICYCLE TIRES

are sold to dealers, by jobbers and bicycle manufacturers only. They are winners.

THE product of the Kelly-Racine Rubber Co. is made in the most modern tire factory in the world, designed, built and just completed for the express purpose for which it is employed; and Kelly-Racine tires are made under the supervision of men who have made the making and selling of tires a life-work, and who take pride in their product.

The leading jobbers and bicycle manufacturers have already demonstrated their faith in us by the placing of orders, and we pledge our word that faith will be justified.

Kelly-Racine tires will cut considerable figure in the tire world, and now is the time to make connections that are bound to be profitable.



Kelly-Racine Rubber Company
RACINE, WIS.

KELLY-RACINE MOTORCYCLE TIRES

are not over-grown bicycle tires but are made with the same care and by the same processes as the best of motor car tires. They have life, are long-lived and will prove thoroughly satisfactory in service.

The Factory Behind the Product

A strong plant is never grown in barren soil and the quality of any product is dependent upon the facilities for its manufacture.

The factory producing the

EXCELSIOR AUTO-CYCLE

is beyond question the most thoroughly equipped and complete motorcycle factory in the world.

With the buildings just finished, the total floor space is slightly over 190,000 square feet and the machinery and equipment is the best obtainable.

A comparison of these facilities with those of factories with a limited product or building only a part of the machine will clearly indicate one of the reasons for

EXCELSIOR SUPERIORITY

Three models for 1911—two Singles and a Twin. All described in Catalog C-11. Write for it today.

You want this book and need it a thousand times more than you need the 25 cents it costs!

It's the treasure book of the motorcyclist and you don't have to go far to find someone who will tell you how good previous editions

have been. But now there is a new, 1911 edition, revised and enlarged so that it includes free engine clutches, two-speed gears, mechanical lubricators and magnetos, together with special matter on motors, valves, carbureters, fuel and important general subjects, all plentifully illustrated.

Dealers and jobbers in all parts of the country are selling "Care and Repair of Motorcycles" to new riders and to veterans as the best aid in correcting and avoiding motorcycle trouble. Ask your dealer about it, or send a quarter to us for a copy to be sent you postage prepaid. It is brimful of practical advice and suggestions relating to every type of motorcycle.

Dealers' and jobbers' quantity orders filled in the order of their receipt. Electrotypes for catalogs supplied on request.

THE BICYCLING WORLD CO.
914 TRIBUNE BUILDING
NEW YORK CITY

Indian

SPRINGFIELD, MASS., home of the Indian motocycle, may properly be called the cradle of the motocycle industry—now grown to giant proportions—with a future looming large before it. There it was that the Indian motocycle was born, nurtured, tenderly watched over and cared for and there it is today that the Indian, grown to fullest stature, proudly yet gratefully receives the homage and tribute of the civilized world.

¶ The Indian is the pioneer; its makers, The Hendee Manufacturing Company, are now the largest makers of motocycles in the world.

¶ **The Indian Free Engine Clutch,** "the clutch with a thousand speeds," which enables the operator to handle a motocycle as he would an automobile, is one of the most important contributions to the perfection of the machine.

¶ The story of the Indian is practically the history of the American motocycle. Every important record, amateur and professional, has been made and broken by the Indian; every hill-climb, every endurance contest, every big event—on track and road—bears witness to the matchless prowess of the peerless Indian.

¶ The recent record of more than 83 miles in one hour is a crowning triumph and speaks volumes for the speed, durability and absolute dependability of the marvelous Indian. How it is intrenched in the hearts of the public, the demand overwhelming our utmost resources and swelling with each day, amply testifies.

¶ In the following pages are shown some interior views of the Indian factory, which will convey some idea of the scale of our operations, and of the uniform and scientific accuracy with which the Indian is built.

¶ **Every Indian is exactly like every other Indian of the same model.**

¶ Herein is the secret of the consistent performances of the Indian. Every operation is mathematically exact, every part interchangeable and the whole assembled, tested and inspected under the most careful scrutiny.

¶ In the opinion of those best able to judge, the Indian motocycle is the most marvelous machine yet made for the transportation of man.

The Hendee Manufacturing Company

SPRINGFIELD, MASS.

LATHE DEPARTMENT

AUTOMATIC SCREW MACHINES

FLAT HEAD TURRET LATHES

THE plant of The Hendee Mfg. Co., at Springfield, Mass., has been practically doubled since last year. The enlarged factory has over three acres of floor space and can produce 20,000 Indian motocycles a year if pushed to night and day production, while the normal production is 10,000 machines per year, the number planned for 1911.

¶The building is in the shape of a letter "V." The new portion that has been added is 264 feet long and five stories high, with a concrete cellar for storage. The central portion of the building consists of joined ends of the two wings where they come together in the V. In addition to giving more room and increased facilities to every department, the added structure has made possible a greatly enlarged experimental department, a feature which has held a prominent

place in the Indian factory since its establishment. All the new and original features of the Indian are built and thoroughly tested in the experimental department before being offered on the market.

¶The company has over 1,000 agents, and maintains distributing branches in Chicago, San Francisco and London.

¶There are over 20,000 Indian motocycles in the hands of private owners today, many of the machines seven or eight years old. Since 1902 the Indian motocycle has from year to year developed steadily with new improvements and refinements, and the year 1911 is marked by the production of the Indian motocycle with the free engine clutch, an improvement of so radical and important a nature as to revolutionize the motocycle as a vehicle of sport and for utility.

United States Bicycle Tires

HARTFORD—G & J and MORGAN & WRIGHT Brands

Are the Bicyclist's Favorite Tires

There never has been a time when these tires did not hold first place among the bicycle tires of the world.

Last year's sales exceeded the sales of any year since the bicycle was introduced.

Our contracts today show conclusively that the sales this year will be even greater.

No other tires have ever approached the popularity of these three brands.

The rider can buy these famous tires at the same price he is asked to pay for other brands.

Every dealer in Bicycle Tires throughout the country will share in the increased sale.

THE CYCLEPHONE

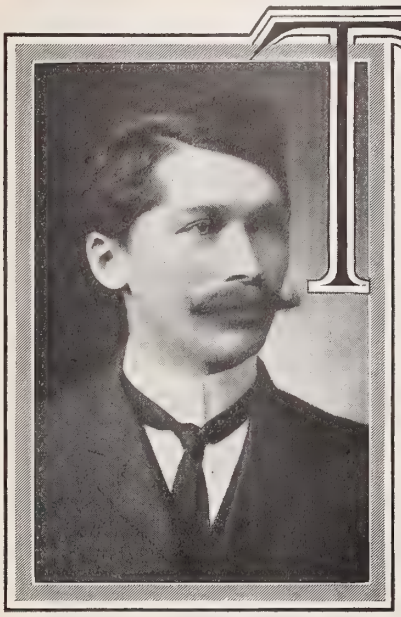
A Siren of Automobile-horn Power Designed for Motorcycle Use

The CYCLEPHONE is to motorcycles what the well-known SIRENO is to automobiles—a powerful long range signal, which reaches the dozing teamster or careless buggy driver hundreds of yards ahead, and is instantly effective to gain its user a clear way.

The siren's rising and falling tone is never mistaken for any other sound; it means only one thing—"Room to pass, please!" The CYCLEPHONE'S high note is a piercing scream, surpassing in volume that of most automobile horns.

The CYCLEPHONE has an air turbine driven by friction from the front tire. It is solidly built, with substantial cast bracket and base, good ball bearings, and carefully-worked-out Bowden wire control. Being specially designed for motorcycles, it enhances the appearance of the machine.

Sold by all good dealers.



Price $12.00.

State make and model of motorcycle when ordering.

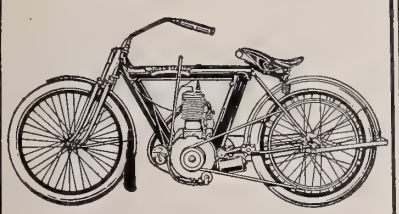
PIERCE

MOTORCYCLES

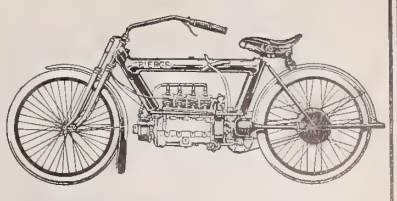
Every Season The Lightning of Success Strikes Somewhere. This Year It Has Struck THE PIERCE



YOU ask why and the answer is simple. Every 1911 Pierce agent and every rider is more than satisfied with his mount. This over-plus of satisfaction is due to the superiority of the Pierce over every other motorcycle on the market. We do not claim equality with the best but insist that Pierce motorcycles are actually superior to all other motorcycles. Strong claims, to be sure, but we can back them up on the road—over hills, rough or smooth country, anything, anywhere. We challenge all competition. The Discriminating 1911 rider will insist upon riding either a single cylinder or a four cylinder Pierce.

¶ The merits of our product are thoroughly exploited in catalog "A" copy of which will be gladly sent on request.

¶ There is no agency so valuable as the Pierce. If you are a dealer in unoccupied territory, ask for our proposition "The Agency That Pays."



THE SINGLE CYLINDER

The Pierce Single is the best single cylinder motorcycle on the market. In speed, in hill climbing, in smooth easy riding, in longevity, in everything, the Pierce runs away from all competition. (Now we know all this for an absolute surety, as we have just completed tests with the Pierce single in Pittsburg against every prominent 1911 single, and the Pierce took all the laurels.) Riders of the Pierce Single are "knee deep in clover" when it comes to testing the other fellow!

THE FOUR CYLINDER

The acknowledged superiority of this model is such that we need to say nothing concerning its wonderful attributes. Suffice to remark that no where is there built a motorcycle which even assumes to do what can be done by the four cylinder Pierce. At its price it offers more value for one's investment than any other motorcycle on the market.

A STATEMENT OF FACTS

The world wide publicity given YALE Motorcycles through such mediums as the Saturday Evening Post, Associated Sunday Magazine, Collier's and 22 standard monthly magazines has educated the public at large to the use of motorcycles in general and the YALE Motorcycle in particular.

Yale advertising is steady—continuous, appearing each succeeding year since 1905—not spasmodic or by jerks, but regular, month after month, year after year.

We are pioneers in using the national weeklies and standard magazines for advertising motorcycles. By these high class mediums with immense circulation, the name "YALE" has become a household word the country over.

Good advertising pays. We have proved this to be a fact and will continue to advertise along these same lines. National advertising is an old story with this Company and its agents. The great assistance from this steady, straight from the shoulder advertising is fully realized by Yale Motorcycle Agents the country over.

WHAT YOU GET FOR YOUR MONEY IS THE AMOUNT OF SERVICE YOU GET FROM THE ARTICLE YOU BUY

They are cashing the many inquiries from their respective territories referred to them by us. We find the people in your city who expect to buy a motorcycle and send you their name. That helps some. This assistance to our agents and the extreme value offered in the YALE Motorcycle stamps it at once the best selling proposition on the market and then WE SHIP QUICK.

A LIMITED AMOUNT OF TERRITORY UNOCCUPIED

ARNOLD, SCHWINN & COMPANY

1718 to 1732 North 43d Ave. CHICAGO, ILL.

Send for 1911 Catalogue of Bicycle and Motorcycle Goods

You can make money selling Bicycles and Motorcycles. You can make more money selling Bicycle and Motorcycle Supplies, and we stand ready to help you. We have just issued our 1911 catalogue and, as usual, it is the encyclopedia of the trade. Its size (5x7 inches) is handy, the illustrations and descriptions are complete and the printed prices are "list." Our net prices will be sent to all regular dealers upon request, but please write on your letter-head or enclose your business card. Under no circumstances will trade prices be quoted to other than legitimate dealers.

"EXCELSIOR" Bicycle Supplies at Bargain Prices

The Excelsior Supply Co. of Chicago were the largest distributors of Bicycle Supplies in the West and when they decided to close out the Sundry Department they naturally turned to the largest Jobbers in the East. This enormous stock is now on sale and we want every dealer to send for our "Excelsior" bargain book.

Bicycle Agents Wanted—Everywhere

We want active dealers to sell our wheels: one in every town in America, and in all foreign countries. We have a line that looks well, sells well, and stays sold. We will send samples to dealers rated in Bradstreet, with the understanding that we will pay freight back to New York if they don't come up to your expectations. Will you write us?

"EXPERT" $20.00
Others list a wheel of this grade at $25, but you can sell it for $20. Our net price is many dollars less, and the wheel is right, too. One-inch tubing, enameled rims, square crown, one-piece hanger and good quality unguaranteed tires. We will sell it to you stripped, if you prefer, and with good equipment it will equal in service and lasting qualities any wheel manufactured.

"VICTOR" $25.00
This is our popular road model, built on attractive lines, well equipped and fully guaranteed. The net price is less than wheels of equal grade are sold. One-piece hanger and fancy finish. A sample in your window now will sell itself without talk. It is the wheel you ought to sell at the price you ought to pay. Write us for catalogue "B" and our agency proposition.

"NASSAU" $30.00
We have marketed this bicycle for twelve years and it is favorably known, both at home and in foreign lands. It is a substantial, high-grade machine, with the earmarks of quality. It retails at $30 and looks its price. Furnished in black with orange head or orange with black head. Two-piece "straight-line" hanger, special design sprocket and fine equipment throughout.

"REINDEER" $35.00
A brand-new model. Frame of 7/8-inch seamless tubing with outside tapered reinforced joints. Two-bar frame construction, adding strength where most needed, yet light enough for road racing. Two-piece hanger with perfect alignment of bearings. "Diamond E" spokes, Thor hubs, and beautifully finished in a rich red with nickel-plated forks.

Motorcycle Casings at Less Than Half

You can offer your customers a real bargain if you stock this special job of Motorcycle Casings. The maker's name, Morgan & Wright, is on every one, and the quality is excellent. Let us tell you more of this and other bargains.

NEW YORK SPORTING GOODS Co.

12,000 Miles

WITH ONE SET OF

WHITNEY

MOTORCYCLE CHAINS

Read the following letter by A. H. Helgeson who has made a remarkable record with one set of "Whitney" Chains on a Minneapolis Motorcycle. These chains have been driven from the Pacific to the Atlantic, from Canada to Mexico, and all over California, through rain, mud, dust, and sand and are still good.

Can any service be more strenuous and severe than this?

What test could show more clearly the true strength and wearing qualities of "Whitney" Chains?

THE WHITNEY MFG. CO., Hartford, Conn.

Dear Sirs:—Yours of February 28th at hand. In regard to old chains, I have now covered over 12,000 miles on one set of your chains and have not even exchanged drive chain for pedal chain. Not one link or roller broken. Have carried tandem lately, which is a strain on chains. Just think of what these chains have gone through! From Los Angeles to New York, beside myself pulling 150 lbs. of extra luggage, and then from Canada to Mexico, and all over California, and still stick together. It sounds impossible, but this being the fact.

I will send old chains by express next week, as I intend to put on a new set. The old chains have done their duty, and then some. I think they are still good for a few thousand miles.

Put me down as a booster for "Whitney" Chains, as I will have no other.

Respectfully yours,

733 Ottawa St., Los Angeles, Cal. A. H. HELGESON.

"Whitney" Chains are made by specialists, in a factory especially equipped for the making, with years of experience to back them; made from material chosen for quality regardless of cost.

THE WHITNEY MFG. COMPANY, Hartford, Conn.

"One of the fundamental principles on which all mechanical devices depend is the reducing or minimizing of friction where it is not needed."

—E. J. Gould.

F & S ANNULAR BALL BEARINGS

are made in standard ball bearing sizes, interchangeable with other makes. They differ from others, in having a higher load carrying capacity and greater endurance, due to the larger number of balls contained in the bearing.

¶ F & S bearings are made with diagonal side entering slots slightly smaller than the sizes of the balls themselves. The balls are therefore sprung in under greater pressure than they ever receive in service, the races yielding sufficiently to let them enter.

¶ Once in, the balls never again touch the side slots, which virtually then no longer exist.

¶ In the latest type of bearing with the frictionless ball pocket metal split ring separator, the entire race is filled with balls, less only one ball for the aggregate thickness of the separator walls. This admits a far greater number of balls, and balls of a bigger diameter. The bearing fitted with the divided hole ring separator withstand therefore a higher radial load, and in consequence also a higher thrust load. Where other makes of bearings have proved inadequate to the service imposed, F & S bearings have frequently been substituted with satisfactory results.

¶ We represent the ball bearing factories of Schweinfurt, Germany, which employ over 3,500 hands, they leading the world in capacity, quality and output, 14,500 F & S bearings of various types being the daily output, besides millions of separate balls. Let us know your ball bearing needs and wants, and we will be glad to forward drawings and tables showing best application. Meanwhile we would like to send you upon request a little booklet, entitled "Ball Bearings: Their Origin, Manufacture, Design and Application," and address before the Polytechnischer Verein of Germany, by Ernst Sachs, of Fichtel & Sachs, Manufacturers of F & S Ball Bearings, Schweinfurt, a/M., Germany.

Solarclipse Gas Lamp Shades.

What it is.—The Bowden Wire Mechanism consists of but two parts—a closely coiled and practically incompressible spiral wire, constituting what is termed "the outer member," and a wire cable, practically inextensible threaded through the above, and termed "the inner member."
What it does.—Previous to the introduction of the Bowden Mechanism the usual mechanical method of transmitting power in other than a straight line was by means of single levers and rods, cables and pulleys, and other such devices, all of which necessarily involve considerable complications, besides increased labor and expense in adapting them satisfactorily to the user's requirements. The Bowden Wire Mechanism dispenses with all these difficulties, while enabling power to be transmitted by the most tortuous route. The mechanism is complete in itself, and requires only that one member shall be anchored to a stop at each end, and that the other member shall be attached to an operating lever at one end and to the object to be moved at the other.

¶ The opportunities for the use of the Bowden Wire Mechanism are practically unlimited, and in every case its employment is accompanied by decreased cost of actuating mechanism, simplicity, instantaneous operation of actuated parts (due to absolute lack of lost motion) and reliability.

¶ The Bowden Wire Mechanism may be adapted to impart either a PULLING or PUSHING movement.

Over Three Million Feet Sold Annually.
All Foreign Motor Cycles Use It.

The Master Magneto!

***MASTER*—"One who has attained eminence in his art."**

HERR UNTERBERG for years designed and constructed the best known Magnetos of the day, but sold under other names. What more natural than that he should place in the Magneto now sold under his own name the result of all his previous experience? RESULT:—in the dual type—The MASTER INTERRUPTER, non-adjustable, indestructible and fool-proof —40,000 miles of use show no wear. The location of the MASTER BATTERY TIMER in the MAGNETO—and THE MASTER DISTRIBUTOR, the insulation of which cannot be burned by high-tension sparks when the motor is started on the battery switch. The self starting type is unique. Motor cycle types are perfect.

¶ THE NEW U. & H. MASTER MAGNETO catalogue illustrates and describes in detail these most important up-to-date magneto improvements. All sizes for Single, Double and Dual Ignition—1, 2, 4, 6 and 8 cylinders—every one a true high-tension arc flame magneto generating the secondary current in the armature independently of any outside coil.

THE BIGGEST PROPOSITION EVER OFFERED

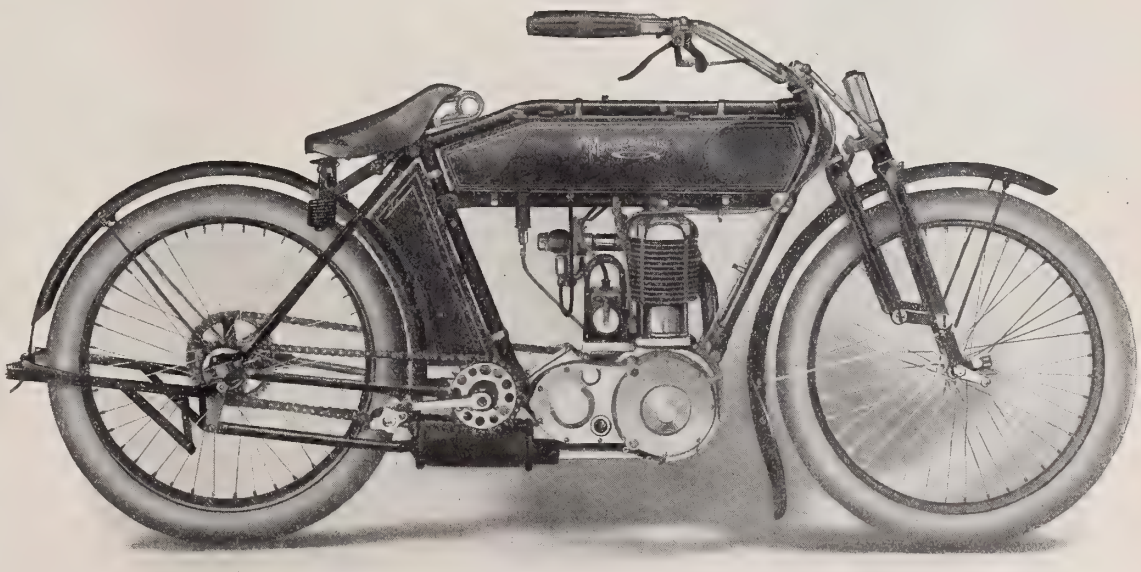
The Two Minneapolis Big 5's

A $400 Two-Speed Machine for $300
A $350 Free-Engine Machine for $265
} BOSCH MAGNETO Regular Equipment.

Model "N" Big 5 Two-Speed

MODEL "N"

In this advanced model may be had everything that can be desired in a motorcycle and a whole lot more than most riders can appreciate without trying the machine. Great power, without vibration — clutch which runs in oil and needs no adjusting, TWO-SPEED GEAR, the most desirable of all, and with clutch control on the handlebar, which is necessary for perfect control of the machine. Low saddle position with a perfect spring fork and an exceedingly attractive and beautiful appearing machine, of which every rider will feel justly proud.



The power plant is built by one of the largest and best equipped motor factories in the United States. Cylinder, piston, piston rings, and all other working parts are accurately ground to size. All corresponding parts are interchangeable to provide for future replacements. Every motor is tested before leaving the factory. It must develop more than the rated horsepower before sent out and is sent out with a guarantee.

MODEL "NB"

This model "NB" is not a Two-Speed, but it has the same substantial free engine clutch that is used on model "N," a multiple disc clutch giving a great friction area and with a control lever on the handlebar, constantly in touch with the fingers of the rider's right hand. The entire clutch and drive gears are enclosed and running in oil, which assures long life. The entire machine is exactly the same as model "N" with the exception that the Two-Speed gear is left out.

Every rider of one of these machines has the privilege of installing the Two-Speed gear and control complete at any time for $35.00.

Even though there is no Two-Speed gear on this machine, the rider, by using the clutch, can stop while the motor is running. He can start his motor on the middle of a hill or on the worst of roads and by careful manipulation of the clutch, can start out without pushing the machine. It is not to be expected, however, that a simple clutch machine will develop the power for climbing that the Two-Speed machine will, for that would be impossible.

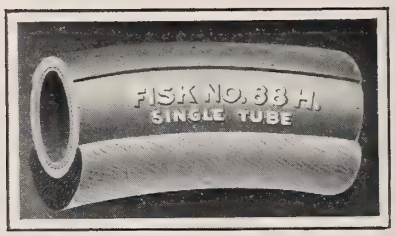
FISK BICYCLE TIRES

New Fisk Bicycle Clincher Tire

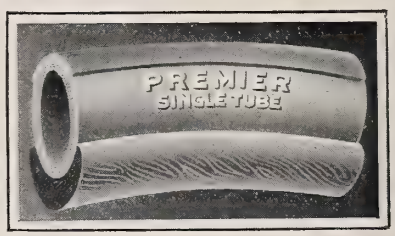
SECTIONAL VIEW

The new Clincher Tire has a very effective corrugated tread and with each casing is supplied our Para Gum Bicycle Tube.

No. 88-H Road Tire, thread fabric, has thickened tread for road work, but is also fast and resilient.



No. 66 Extra Heavy Export Tire has heavy corrugated tread and is the best made for heavy road work.



No. 66, a road tire similar to the Extra Heavy Export, but lighter. A popular type for high-grade wheels.

Premier Tough Tread, a medium-priced road tire with three layers of close-woven fabric on the tread to prevent punctures.

New Departure and Premier Road Tires are used as regular equipment on the best-known wheels and are identical except in the tread.

Massasoit and Victor were formerly made without our name, but now we guarantee them under our own brand as the best tires for the price. Both are identical except for the tread.

The most complete line of Bicycle Tires on the market

INDIVIDUALLY, each type of Fisk Bicycle Tire that has been placed on the market has always met with instant approval and established a higher standard in its field.

COLLECTIVELY, the Fisk Line offers wheelmen a wide choice of types to meet particular demands and at the best prices, quality considered.

The makers of Iver Johnson, Pierce, Snell, Pope, Yale and Emblem wheels furnish Fisk Tires as standard equipment. Why not let the men who know advise your tire equipment?

Write for Illustrated Booklet on the tire you need.

DEALERS should prepare for brisk trade in Fisk Tires this season.

As a reminder tear off this coupon NOW

Coupon

Atlas Auto Supply Co.
87 East Adams St., Chicago

For the enclosed 75 cents, stamps, money order, (cross out one) send me a Motorcycle Tire-Doh Outfit, express prepaid, upon condition that you will refund my money upon request.

NAME.....

ADDRESS.....

HOW IT WORKS

Tire-Doh is not like any other product you ever heard of. The outfit consists of a can of Tire-Doh, made under a secret process, and a can of Tire-Doh Cement. After cleaning around the hole to be repaired, apply Tire-Doh Cement allowing it to dry a few minutes, then knead in enough Tire-Doh to make a neat patch. That's all there is to it. No tools, no vulcanizing required. Time 15 minutes.

Tire-Doh repairs ***every injury*** that can happen to a ***tube or casing***—puncture, blowout, sandpocket, anything. It is easier, quicker, and ***better than vulcanizing*** and makes a ***permanent*** repair ***as tough and elastic as the tire itself.*** Over 20,000 outfits sold to date to automobile owners, every one on a guaranty of money back. Now the motorcycle outfit is ready. Try one ***at our risk*** or at least let us send you the free patch.

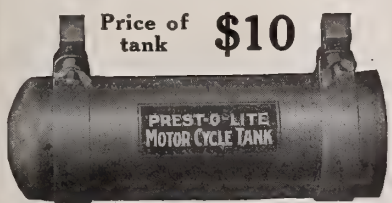
To Motorcycle Supply Dealers

The Tire-Doh Outfit for automobiles has been on the market just a year. Over 20,000 sold on our money-back guaranty ***proves*** that Tire-Doh is ***all*** we claim it to be and then some. We have had ***nearly 1000 requests*** for a motorcycle outfit, several hundred from ***dealers*** handling Tire-Doh. It is sure to be a rapid seller from the start. If you will stock a dozen we will refer to you all inquiries received from your vicinity. Write us to-day.

Makes Night Riding Safe

Motorcycle policemen all over the country are having their mounts equipped with **Prest-O-Lite.** They must be prepared for fast flights over rough streets, and cannot take chances on light that flares up or dies out.

Your need is precisely the same. Without this perfect lighting system, your machine, yourself and possibly a passenger are in constant risk of dangerous and costly accident.



PREST-O-LITE Gas Tank

Floods the road far ahead with strong, steady, dependable light, turned on and off like a gas jet. Each tank gives 40 hours of light (using a ¼ ft. burner). When empty exchange the tank for a full one, at a small fee.

FREE
Our Handy Ruler

Light, flexible, folding foot rule. Half of it is specially made for finding depth of gasoline in tank. Inches and centimeters. Measures tires, etc. Handy in a hundred ways. Sent free on request. Give name and address, and make of motorcycle.

Price of tank **$10**

Dimensions: Length, 12 inches; diameter, 4 inches; weight, 7 lbs.

This clean convenient service costs, as a rule, **less** than the carbide which a generator consumes.

Remember, too, that the genuine **Prest-O-Lite** tank has its permanent **cash value,** because it is in universal use and demand. When empty, it can be promptly exchanged, **anywhere and always.** These things are not true of any imitation.

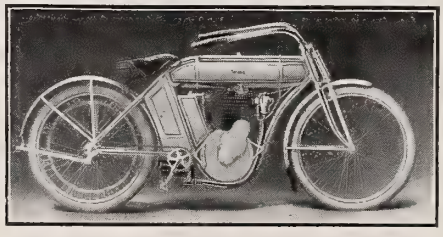
RELIANCE MOTORCYCLE MODEL G-11

WHERE do you want to go? Your Reliance Motorcycle is ready —and **dependable.**



A hundred miles and more each way in a day's run is nothing to the Reliance Motorcycle.

You can do 55 miles an hour on every stretch of free road—and slow down to 5 miles where speed regulations get in the way.

There never has been such a responsive engine in the history of the Motorcycle trade. It runs steadily at slower speeds than any other motorcycle engine ever invented. Heavy fly-wheels—accurately balanced. Extra large valves mechanically operated in perfect time. **All working parts ground to exact sizes.**

The Reliance G-11 is started from the stand—**no pedalling or running beside the cycle.**

In design, in construction, in testing—the Reliance Model G-11 represents an entirely new thought in motorcycle practice — **Automobile standards applied to a motorcycle.**

Send a post-card for our catalogue "C," fully illustrated. Presents all the facts about this dependable motorcycle, with live information as to motorcycle values in general. The handsomest and most useful motorcycle catalogue ever published.

BICYCLES-MOTORCYCLES TIRES-ACCESSORIES

Our Wright Spark Plug is made in either the open or closed end type, the open end type being especially adapted for hot engine conditions while the closed end type works successfully under foul engine conditions.

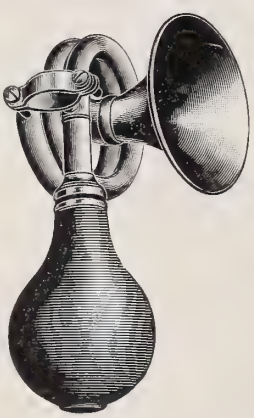
These spark plugs are made in all sizes, the ½" standard, the ⅞"-18 A. L. A. M. and the metric threads.

Absolutely Guaranteed. **Price $1.00**

A Trial Order Will Convince You. We Solicit Your Orders.

Our Auburn Motorcycle Spark Plug is especially recommended for motorcycles where small space is provided for the regular spark plug. The construction of this plug is shorter than the regular metric plug which makes this particularly desirable.

Fully Guaranteed. **Price $1.00**



Write for our Agency proposition and we will increase your sales.

Small Horns With Big Noises

The object of a horn is to make a noise and the bigger the horn the bigger the noise, but we offer horns for bicycles and motorcycles which are small and compact, yet give the same deep, dull, penetrating roar as the big automobile horn. They are spun from the best grade musical instrument metal and made in many different shapes and designs, such as the "Right Angle Horn," the "Parallel Horn" and the popular "Bull Frog Horn."

Furnished in either brass or nickel finish.

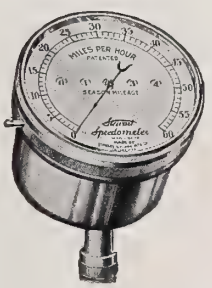
THE PERSONS MANUFACTURING COMPANY, - - WORCESTER, MASS.

The Oldest Saddle Manufacturer in the U. S. A. Established 1892.

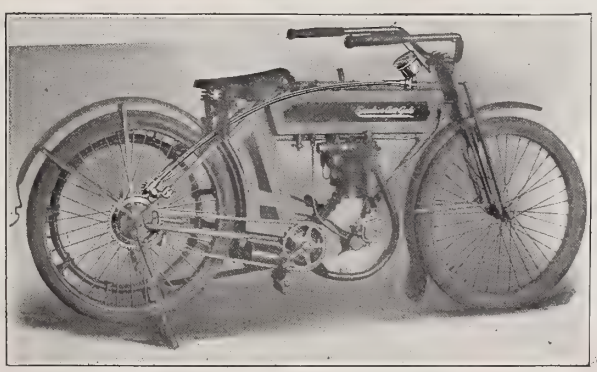
1911 STEWART
Motorcycle Speedometer
FOR ALL MOTORCYCLES



Model 42. Three-inch dial, 60-mile speedometer, 10,000-mile season odometer and 100-mile automatic resetting trip register. Price **$20**

Built Right—Priced Right

Made of costly materials, in the largest and best equipped speedometer factory in the world, by skilled speedometer makers. Not a cheaply built speedometer for motorcycle trade costing less than an automobile speedometer to manufacture, but the same speedometer in every feature. The same head, the same strong flexible shaft that has given such general satisfaction among car owners.



Stewart Speedometers are Guaranteed for Five Years

Model 43. Three-inch dial, 60-mile speedometer, enclosed 10,000-mile season odometer, no trip register. Price **$15**

Magnetic Principle. It is conceded by the best mechanics that the magnetic principle is the only one really adapted to speed indicator use. **Superiority of the Magnetic Type** is unquestioned. Compensated for temperature changes, slow moving parts, no contact between magnet and indicating means. Shaft carrying pointer mounted on stones, no possibility of wear or friction. Once calibrated, the instrument stays accurate. All parts ground to size, hardened and polished. Parts are assembled on a frame with integral bosses, sockets, etc. No soldered or brazed parts. The whole enclosed in a handsome case, one-piece drawn brass, beautifully finished. **Easily Read.** The large, open dial with long scale, treble the length of any other, makes it possible to read a Stewart Speedometer at any speed on even the roughest roads. The pointer is steady at all speeds, a most important feature for motorcycle use.

Installation. Stewart Speedometers are provided with means of installing on the frame, an ideal location away from the jar of the forks, out of harm's way in case of a fall, placed where it can be most easily read and installed. The drive is by means of a flexible shaft from the rear wheel. We can furnish front wheel drive by belt and pulley, if preferred.

The Trade has long waited for a high grade, reasonably priced motorcycle speedometer

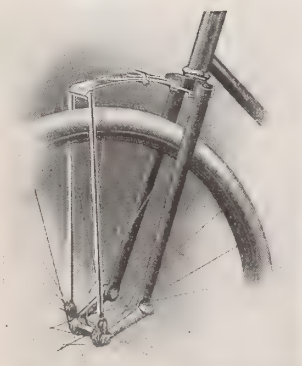
POPE BICYCLES

Cleveland Tribune

Let Our Bicycles Boom Your Business

They Are the Logical Wheels for Your Customers to Buy

Here are several lines of high grade bicycles, any one of which will open up new avenues of trade and develop the high-grade end of your business on a basis of permanent prosperity. Pope Bicycles have demonstrated again and again that they have remarkable trade-winning qualities. There is every reason in the world why your customers should buy our wheels in preference to any other make, and there are equally good reasons why you should sell them. Pope Bicycles are made RIGHT by America's oldest and best bicycle manufacturer. This means that every Pope Bicycle is backed by the accumulative manufacturing experience and progress of over 30 years. Isn't it natural under the circumstances that there should be NO BETTER MADE NOR BETTER KNOWN BICYCLES on the market today than those which bear the Pope Trademark?



Columbia Racer

The Pope Trademark Stands for Quality and a Square Deal

It is found only on bicycles that measure up to the highest standard of excellence and efficiency. The Pope Trademark also stands for original mechanical and structural features of great merit found only in Pope wheels. These are effective selling points, for it can be readily demonstrated that they increase the efficiency of a wheel and add to the comfort of the rider.

Pope Spring Fork Stimulates Sales

THE POPE SPRING FORK gives the Pope Dealer a big advantage over all other dealers in selling high-grade bicycles, for it is in great demand and can be had *only on Pope Nameplate Bicycles.* Bumps and inequalities of the road are seldom felt by riders whose bicycles are equipped with Pope Spring Forks. There is no other spring fork which will make a wheel run easier or smoother. It is the most successful device of its kind on the market.

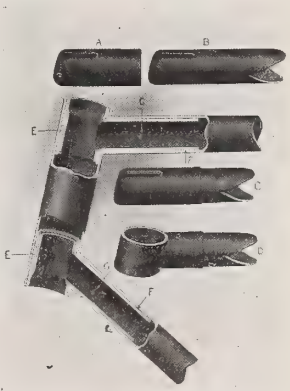
Try the Selling Force of the Pope Trademark

It Stands for Quality and a Square Deal

All Pope Bicycles are made piece by piece and assembled part by part in our GREAT BICYCLE FACTORY AT WESTFIELD, MASS., a plant whose facilities and equipment for making the best bicycles ever produced are unequalled. Judged by its size, resources and equipment, as well as by the quality and reputation of its products, the Pope Bicycle Factory is pre-eminent. Wheels of Pope Quality could not be produced in an "assembling room," as many of the "nameplate specials" are. It requires all the resources of the largest and best equipped bicycle plant in the world to produce Pope Bicycles. Such a factory with its splendid organization insures prompt deliveries and careful attention to all orders.



The Pope Manufacturing Company's Bicycle Factory at Westfield, Mass.

Cones and Cases

Special Pope Features Help Sales

Pope Bicycles abound in STRONG SELLING FEATURES, which are a big help in getting business. Among these are the POPE CONES AND CASES, cut from solid bars of steel and tempered like armor plates by our special process, so that the bearing surface is hardened while the inner core retains its softness and flexibility. The FLUSH JOINTS OF THE STEERING HEAD on all Pope Bicycles are INTERNALLY REINFORCED by a method of our own, so that the BRAZING SURFACE EXTENDS ALL AROUND THE INSIDE OF THE STEERING HEAD, whereas in the general run of wheels the reinforcement consists merely of prongs forced into the steering head and bent back. Note also that all Pope Bicycles listed at $30 or over have the TWO-PIECE CRANK HANGER construction which distinguishes the HIGH-GRADE machine from the low-grade machines with one-piece crank hangers.

Steering Head and Flush Joints Reinforcements

Advertising and Other Aids to Dealers

The inquiries and returns from our CAMPAIGN OF NATIONAL ADVERTISING, now appearing in such mediums as The Saturday Evening Post, Everybody's Magazine, The Youth's Companion, Popular Mechanics, etc., indicate that there is a large and rapidly growing popular demand for our high-grade machines. All inquiries concerning our wheels are referred to the nearest Pope Dealer. This is one of the many ways in which we aid our dealers to make sales. The handsome bicycle catalogs, and the attractive printed matter, which we furnish to the trade also help. Our Terms and Selling Arrangements are Liberal. Let Us Tell You About Them.

The Twin Single

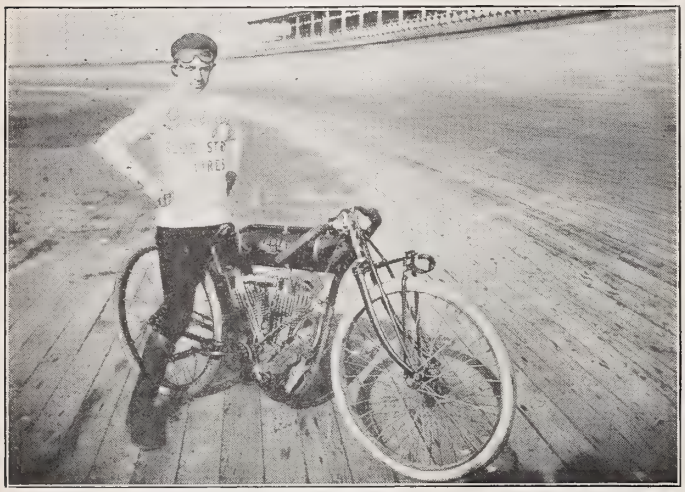
WHAT'S THAT? A MARVELOUS MOTORCYCLE!

Single as to motor cylinders, but a Double in all important features.

1. TWO DISTINCT OILING SYSTEMS: One a constant sight feed for normal use, the other instantly delivering to the motor any desired amount of oil for speeding or emergencies.

2. TWO DISTINCT BRAKES: One, the best hub brake on the market, the other a powerful shoe brake acting on the belt rim, and capable of hard and continuous service without a possibility of heating or sticking.

3. TWO COMPARTMENT GASOLINE TANK, assuring an ample reserve supply in case the regular compartment is allowed to run dry.



4. TWO DISTINCT RIDING POSITIONS: One, the most comfortable ever attained on a motorcycle by use of the adjustable foot rest, the other the usual position with feet on the pedals.

5. TWO SHOCK ABSORBERS: The most powerful and Elastic Spring Fork ever made and a positively controlled Spring Seat Post, the combination giving all the benefits of a Spring Frame with none of its weakness.

These and many other features equally good make *The New R-S the Finest Motorcycle in the World,* and the only one embodying the above twin features.

Write to-day for catalogue.
Some valuable open territory for live established dealers only.
Immediate delivery guaranteed.

Jake DeRosier, the Rider Who with BLUE STREAK Tires Shattered all Professional Records.

World's Amateur and Professional Records Now Held by Goodyear BLUE STREAKS.

These Great Triumphs for Goodyear Blue Streak Racing Tires prove a vital important truth to every man who owns a motorcycle.

The most phenomenal record ride ever achieved on any track, by any machine or rider, was made on February 7, 1911, by De Rosier on an Indian motorcycle equipped **for the run** with celebrated **Goodyear Blue Streak** Tires. At the end of 60 minutes De Rosier had covered 83 miles, 135 yards, **as against his own previous record of 79 7-8 miles MADE ON OTHER TIRES,** on an Indian motorcycle. Breaks every professional record from 1 to 92 miles.

GOODYEAR
BLUE STREAK
Racing Tires

Close on the heels of this triumph for Goodyear Blue Streaks, follows another, yet more significant. Don Johns, a 16 year old amateur, at the Los Angeles Motordrome, April 4, covered 20 miles in 14 minutes and 2 3-5 seconds, lowering every **amateur** record from **1** to **20 miles.** He rode an Indian motorcycle **likewise equipped with Goodyear Blue Streak Racing Tires.**

Thus in these two world-beating tests of speed, strength and endurance De Rosier and Don Johns have added yet another convincing proof to the unquestionable superiority of the Goodyear products.

—A proof of strength, endurance, resiliency, DEPENDABILITY never equaled or **approached** by any other motorcycle tire on earth.

—And a typical demonstration of the Superior tire value characterizing and making popular the entire line of Goodyear Motorcycle tires.

There are two styles of Blue Streak Treads. One, a combination Studded and Corrugated tread for dirt tracks, the other a Plain tread for use on board.

See next page for **reasons** for Blue Streak Supremacy. Then write for our Free Booklet.

World's Greatest Quintette of Motorcycle Tires—The BLUE STREAK Tire, One of Them.

Greatest because built by the world's greatest Automobile Tire Experts.

In the **Goodyear Quintette** of motorcycle tires the builders (who don't charge you a cent extra for the priceless benefit of their years of experience) have perfected a tire for **every road condition** — a tire that is more **efficient** and economical than any other Motorcycle Tire manufactured — a tire that takes its **rider to victory in every competitive test!** (See page opposite).

You get more WEAR out of a Goodyear Motorcycle Tire because the tread is **thicker** and tougher than found on any other tire. That's not conjecture but a **proved fact** because we test our tread and the tread of every other make on an **endurance machine,** and if ours isn't toughest, doesn't **last longest,** it never reaches the market.

You get more resiliency in a Goodyear Motorcycle Tire because it is built larger than all other makes of **same rated measurement.** The larger the tire, the greater the **cushioning** effect and the capacity to absorb shocks. **That stands to reason.**

GOODYEAR
Motorcycle Tires

In other words you get the **very greatest value** for the money you invest.

Goodyear Motorcycle tires are made of the finest grade NEW Para Rubber **properly compounded.** The fabric used is the toughest in existence and the **plies** are so thoroughly **fused** that internal **friction** and wear is eliminated. No blisters, weak spots or **blow outs** on Goodyear Tires.

In Blue Streaks, the fabric is different than found in other racing tires. Instead of the usual **cross thread** weave, the fabric is all warp-thread all run parallel. By laying one ply over another **at a certain angle** a degree of resiliency and strength is obtained that is found in no other motorcycle tire manufactured.

And this **resiliency**—the quality by which a tire absorbs road irregularities instead of forcing the engine to lift the load over them—is one of the underlying elements that have contributed so generously to Blue Streak Victories.

Goodyear Tires **stay on.** They are bound to the rim by beads; moulded, shaped and curved exact duplicate of your own rim. They can't help fitting. They cling to the rim, clinch in a grip that can never **give** nor **let go.**

Use one of these Five Great Motorcycle Tires:

1. **Goodyear Corrugated Tread Tires**—For the average give-and-take road.
2. **Goodyear Non-Skid Tires**—For city use when pavements are often slippery and dangerous.
3. **Goodyear Studded Tread Tires** — for mud, sand, snow and ice travel. Great for endurance runs — **mud can't gather on tread.**

4 and 5. Goodyear Blue Streak Racing Tires—(See page opposite).

Why don't **you win** on Goodyear Tires? Let us send you our booklet on Motorcycle Tires. **Goodyear** tires possess so many striking advantages that you **owe it to yourself to investigate.**

Vol. LXIII. New York, U. S. A., Saturday, April 29, 1911. No. 6

In the Wake of Spring

CHOOSE CLASSIC COLUMNS AS TH EIR BACKGROUND.

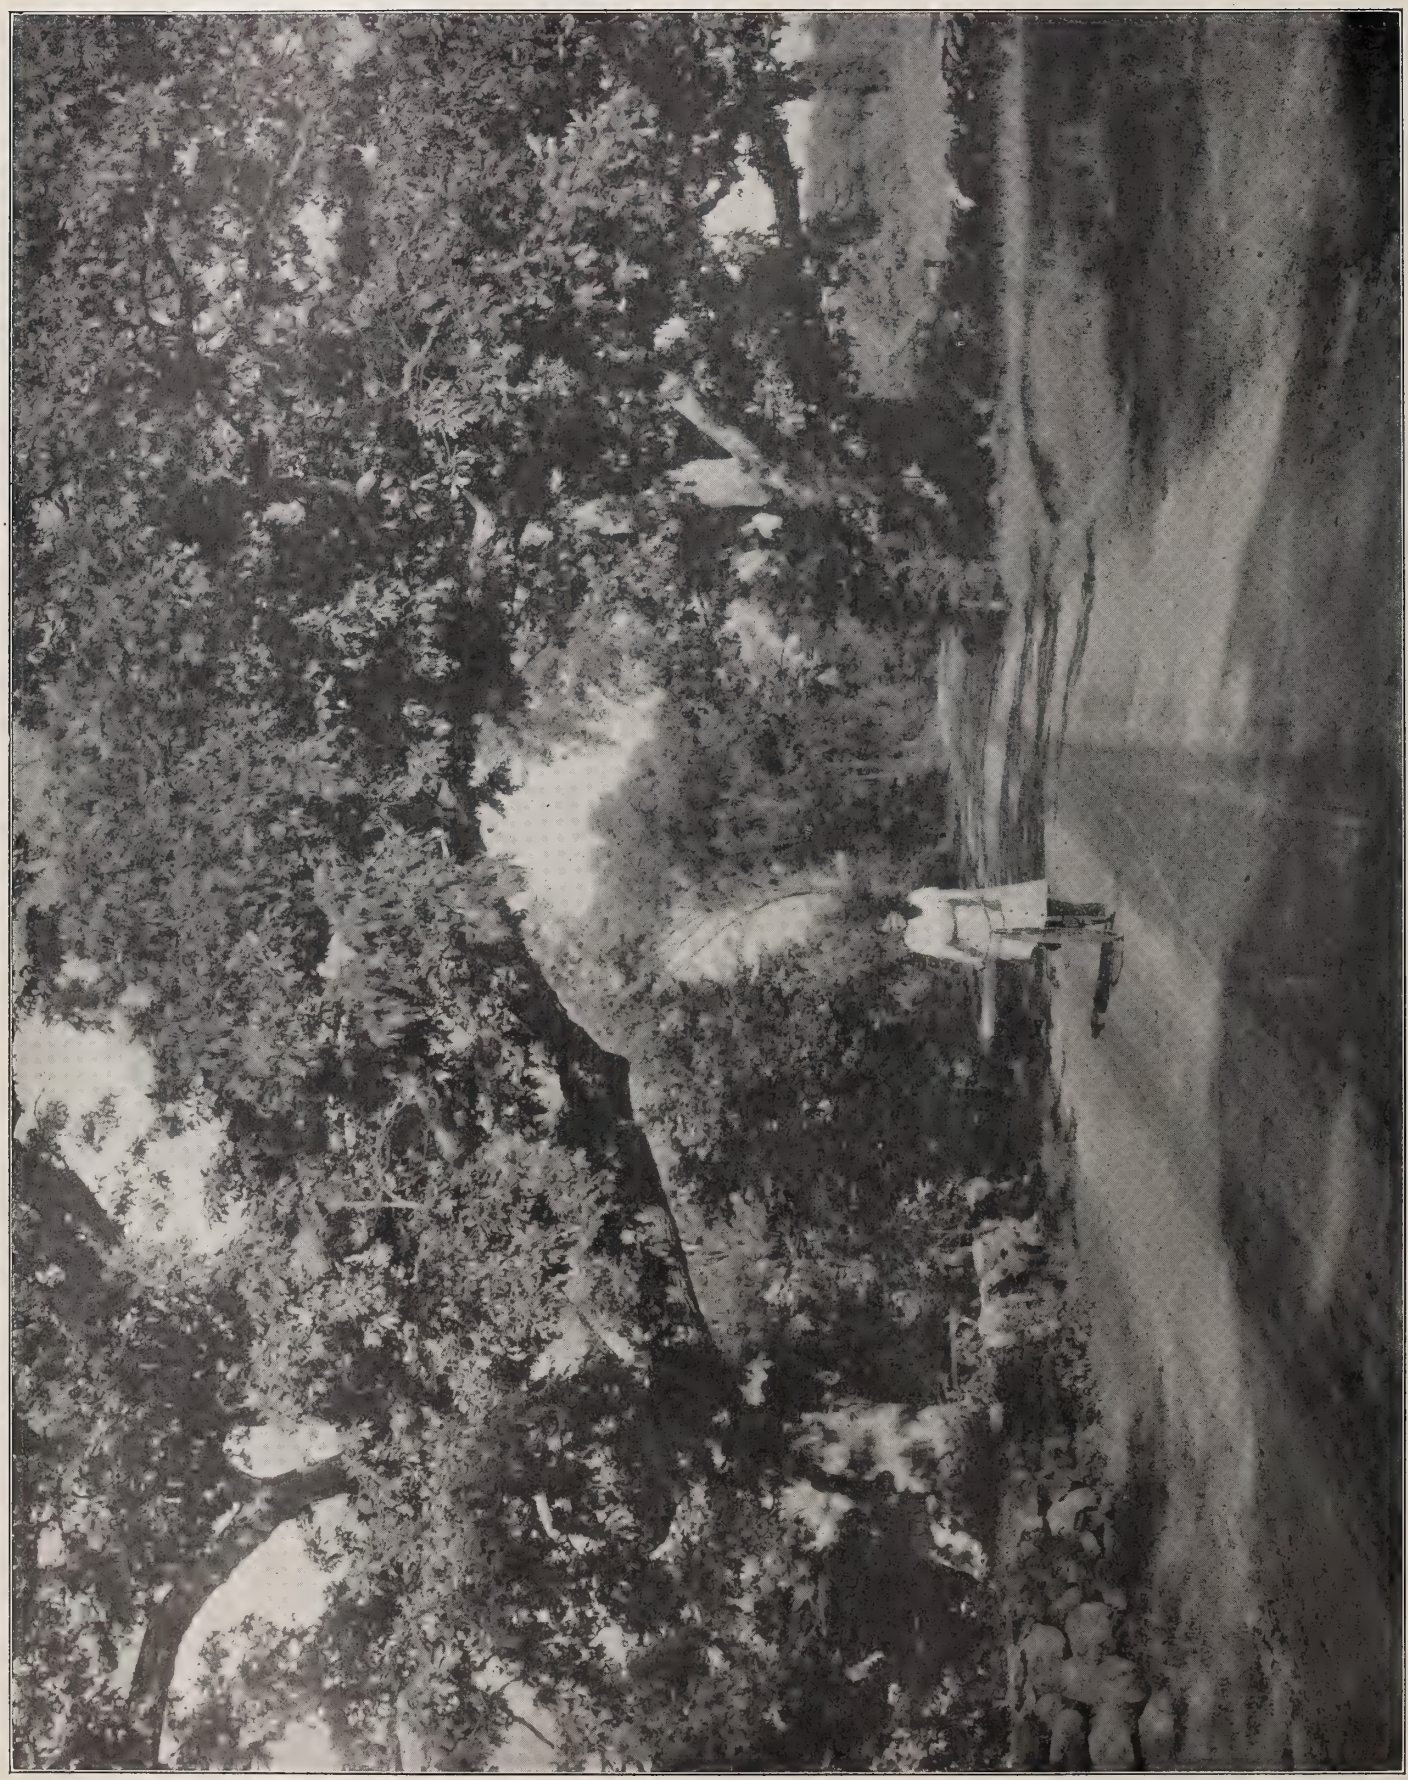
Demonstrators of Pierce motorcycles, in Buffalo, N. Y., in front of the Albright Art Gallery.

Calumets Take a Run to South Bend.

For its first motorcycle reliability run of the season, the Calumet Pleasure Club, of Chicago, Ill., on Sunday, 23d inst., made the trip to South Bend, Ind. and return, something over 200 miles. From the starting point at 113th street and Michigan avenue, the riders passed through Roseland, Riverdale, Dalton, Oak Glen, Hobart, Valparaiso, Westville and La Porte to South Bend. Ten riders started, but five dropped out before South Bend was reached and another failed to make the return trip.

The four who finished were Roy Bowser, on the M. M. that he rode in the F. A. M. and the Western District endurance runs of last season; Phillip Nelson, also on an M. M., and William Strode and Sweger, on Excelsiors. Tire trouble delayed Bowser about an hour at Hobart, but he caught up with the others later. Strode got in first, the others coming in soon after. All made the first half of the run on schedule time, but lost on the return trip, each being late at the Hobart control. Consequently, there were no perfect scores. The official scores have not yet been announced.

West Side Detroiters on an Excursion.



Twenty-two riders were in the squad of the West Side Motorcycle Club, a newly-organized motorcycle club of Detroit, Mich., who motored to Mount Clemens, Mich. on Sunday, 16th inst. The trip was made without mishap and the roads were found to be in excellent condition. The club has its headquarters at 862 Grand River avenue. The officers are: Robert Shattock, president; L. Russell, vice-president; Will Taylor, secretary and treasurer; Jack Scheull, captain; Frank MacDiamid, first lieutenant. The club now has 34 members.

Peninsulars Visit Fortress Monroe.

The Peninsula Motorcycle Club, of Newport News, Va., made its regular weekly run on Sunday, 16th inst., visiting Hampton, Phoebus and Old Point Comfort. At Fortress Monroe the riders were shown all over the government fortifications and defenses by the military guards, and this feature of the trip alone well repaid the journey, which all of the large number of riders declared highly enjoyable. On the return, the riders tried one another out on the splendid oiled roads between Hampton and Newport News, and in the language of one narrator, "airships would not have been in it with the bunch that came down that road." Some warm races are to be given at Jamestown, Va., in the latter part of May by members of the Peninsula club and of the Tidewater Motorcycle Club, of Norfolk, Va.

"Some Ribbon, My Dear, to Flutter from Your Arm."

Hitchcock Heads the Worcesterites.

At its annual meeting last week the Worcester (Mass.) Motorcycle Club elected the following officers for the ensuing year: Charles E. Hitchcock, president; A. E. Dahlin, vice-president; George A. Ware, secretary; Russell R. Coes, treasurer; William G. Cornwell, captain; Forester L. Kidder, first lieutenant; A. M. Chase, second lieutenant; directors: R. R. MacDonald, George F. Clark, E. R. Creamer, William P. Farrell and J. M. Amsden. Secretary Gibson, of the F. A. M., was a guest of the evening and gave a short talk on the advantages of membership in the F. A. M. An invitation from the Springfield Motorcycle Club to enter a team of three men in the inter-city team race on the Springgeld Stadium on Memorial Day was tabled for the present, but the club voted to lend its support to the extent of holding a run to the meet.

Freeport Likes Visiting Idea.

Three new members were elected at the last meeting of the Freeport (Ill.) Motorcycle Club, bringing the total membership to 25. The club is co-operating with the Redskin Motorcycle Club, of Monroe, Wis., on Sunday runs, in accordance with a suggestion advanced some time ago by the Redskins inviting nearby clubs to join in Sunday runs to the home towns of other clubs.

Weekly Events for Newark Riders.

The New Jersey Motorcycle Club, of Newark, is arranging a schedule of weekly runs and race meets for the coming season. The events will be held on alternate Saturdays, the meets taking place on the half-mile track at Olympic Park, which the club used last summer.

Spokane's Club Spreads Quarters.

Finding its quarters not to its liking, the Spokane (Wash.) Motorcycle Club has moved again. It now is located in Union hall, at Sprague avenue and Pine street, where meetings are held on Wednesday nights, and from which point all club runs start.

Have Organized in Santa Barbara.

A motorcycle club has been formed at Neighborhood House, an athletic club of Santa Barbara, Cal. The club has its headquarters at the Men's Club and expects to have 50 members before long, from the ranks of riders thereabout.

Use Herring for Bait in Providence.

If the weather is fair there will be few motorcyclists on Providence (R. I.) streets to-morrow, Sunday, 30th inst., after 7 a. m., for it will mark the opening of the season for the Providence Motorcycle Club, which will hold its annual "herring run" to East Taunton, Mass. This event is one of the big events of the Providence motorcycle calendar and draws riders from all around. Last year the run attracted the largest gathering of motorcyclists that occurred in New England during the year, and this year it is confidently expected to double the showing of 1910. Postponed to subsequent Sundays in case bad weather makes it necessary.

Against Atlantic City Road Hogs.

Aroused by the road hoggishness of the chauffeurs of hundreds of motor cars which visit Atlantic City, and who do not hesitate to crowd the motorcyclist into the ditch, the Atlantic City (N. J.) Motorcycle Club is going to seek protection from the F. A. M. Its first move will be to affiliate after which it will seek legal aid in instituting damage suits against car drivers who cause injury to any member of the club by reckless driving.

GATHERED FOR THE EASTER SUNDAY RUN.

The early morning scene in the courtyard of the Salisbury Arms, at Barnet England.

Church Service for Clevelanders.

Motorcyclists generally never have been noted as ardent churchgoers, but when one of their fellows happens to occupy a pulpit, it is not difficult to understand that they are more amenable to church religion than ordinarily would be the case. This is the way the Rev. A. C. Horrocks, a motorcycling pastor of Brecksville, O., regarded the situation, and when he proposed recently to the Cleveland Motorcycle Club that they attend a special service which he agreed to hold for them on Easter Sunday, received many acceptances. Despite the disagreeable weather more than a score of the club members rode the 28 miles from the Forest City to the little Ohio town to listen to the preacher.

Motorcycle for Harbor Patrol.

In most cities to make reference to the harbor police patrol calls up visions of tugboats or swift gasoline launches, but to the residents of New Orleans, La., the mental picture thus formed will soon also include a motorcycle. The dock board of that city has decided that a motorcycle should be purchased for the purpose of facilitating the inspection of water affairs by the harbor patrol squad, and accordingly a nice speedy red machine will soon be listed among the holdings of that body.

Modest Motorcyclist a Gallant Hero.

There are a lot of Chicagoans who have more regard for motorcycles now than they used to have, as a result of a daring pursuit and capture of a negro purse snatcher by an unknown motorcyclist last week. While a fashionably-dressed woman was strolling on Michigan avenue a negro darted out from a corner, grabbed her purse and fled. She screamed and a motorcyclist passing, who witnessed the theft, speeded up his machine and turned into an alley after the thief. He caught him before the culprit had a chance either to escape or hide his booty, for pursuit in that unusual fashion was entirely unexpected. The crowd which gathered threatened to handle the thief roughly, but the motorcyclist succeeded in taking him to a garage and held him for the police. Then the captor quietly slipped away without giving his name.

Columbus Quartet to Roam Europe.

Columbus, O., will be well represented by motorcycle tourists in Europe this year, as four riders of that city, Karl Prost, Karl McKee, George Greener and Ben Waddell have announced their intention of spending the summer roaming about Great Britain and the Continent on motorcycles. The quartet plans to sail from Boston about the middle of May and will explore the British Isles first. France is the next country on the program and then Italy. It is the desire of the tourists to visit in particular the countries where motorcycles are little known, as, for instance, the Tyrolean districts. All of the riders will carry cameras.

High School Course in Engine Design.

Recognition of the motorcycle as an important factor in the world of mechanics has been accorded by the Technical High School of Springfield, Mass. It has added to its curriculum a course covering the construction of motorcycle engines. Many of the students have designs on the payroll of the local motorcycle factory.

RIGHT TO VOTE AT BUFFALO MEET

Instruction and Warning to Members and Clubs by Federation of American Motorcyclists.

Printed on new, fresh, crispy paper, two circular letters and copies of the by-laws of interest to F. A. M. clubs and members are being sent out by Secretary Gibson. The first epistle, which is signed by President Willis and Secretary Gibson has to do with the new form of government of the F. A. M., whereby the clubs are permitted to send delegates to the national assembly on a pro rata membership basis, these representatives to conduct whatever business pertaining to the organization may come before them, and having full voting power if they have proper credentials.

In the circular, which is being sent to club secretaries, attention is called to article 8, sections 1-7 inclusive of the by-laws, which outline the procedure for selecting delegates in accordance with the constitutional amendment adopted at the 1910 national assembly.

Clubs are allowed to send one delegate to the national assembly for each 25 members or major portion thereof in good standing, said delegates to be selected by election. Alternates also are chosen at the same time, to attend should the regular delegate be unable to do so.

Before electing delegates or alternates, clubs are requested to forward to Secretary Gibson corrected typewritten lists of members so that he may know just to how many delegates each club is entitled. It further is requested that clubs forward this membership data 30 days before the national meet, the dates of which will be announced shortly. Clubs also are cautioned to send their best men as delegates, as it is the delegates who will have the shaping of the F. A. M. affairs the coming year.

The delegate form of government, it clearly should be understood, does not bar any F. A. M. member from the national assembly, even though he be not a delegate, but, of course, he has no vote on questions that may come up. The delegate system was adopted to simplify the conduct of affairs at the annual meetings which were growing unwieldly with the increase in membership under the old form of individual voting.

In the second circular secretaries of affiliated clubs are requested to furnish the national secretary with lists of members in order that he may unravel the few remaining tangles to which the present incumbent fell heir from his last two predecessors. It also is desired to keep a card record of each member, with a complete history of his F. A. M. pedigree.

Further in connection with the Buffalo convention he gives a warning notice, so that there will be no misunderstanding as to who can vote and who can not. His notice is as follows:

"As most all F. A. M. members know, the business of the F. A. M. at the next annual meet, held in Buffalo this summer, will be transacted by delegates chosen first from the membership of the affiliated clubs and then from the F. A. M. membership at large.

"Data bearing on this delegate apportionment will be taken from the file cards of the members in the office of the national secretary.

"Only fully paid up memberships will count. The same condition will exist as to the membership in general; for only a fully paid up membership card will admit to the pleasures in store for us at Buffalo.

"The national secretary wishes to give this timely notice, so that no member will have cause to regret his lack of promptness in keeping square on the books.

"The national secretary, with his assistant, will keep stated office hours in rooms at the official hotel in Buffalo during the meet, where he will be prepared to attend promptly to any F. A. M. business which may be brought to his notice. He will have a complete supply of F. A. M. matter, and will be able to supply to any member anything he may wish. Due notice as to these office hours will be given in the trade popers shortly before the meet."

FROM A CYCLIST IN HER SIXTH YEAR TO—

Her father, George Wagner being at that time a bicycle manufacturer, Miss Clara Wagner in her sixth year became a cyclist. Her bicycle was hand-made throughout, and was the smallest juvenile machine at that time.

NORTH SHORES TO TRY JOINT RUN

Chicagoans Arranging to Meet Other Clubs at Half-Way Points—Wickwire in the Windy City.

Following the suggestion originally advanced by the Cincinnati Motorcycle Club and which is being actively pushed by the Redskin Motorcycle Club, of Monroe, Wis., the North Shore Motorcycle Club, of Chicago, will hold a joint club run on Sunday, 30th inst., going to Valparaiso, Ind., about 52 miles away, where it will meet the South Bend Motorcycle Club riders, who will come from the other direction. This will be the first run of its kind that the club has attempted and others are expected to follow. Road Captain Leander, the endurance rider, is corresponding with a number of clubs within a 200-mile radius of Chicago, arranging runs to half-way points on future dates.

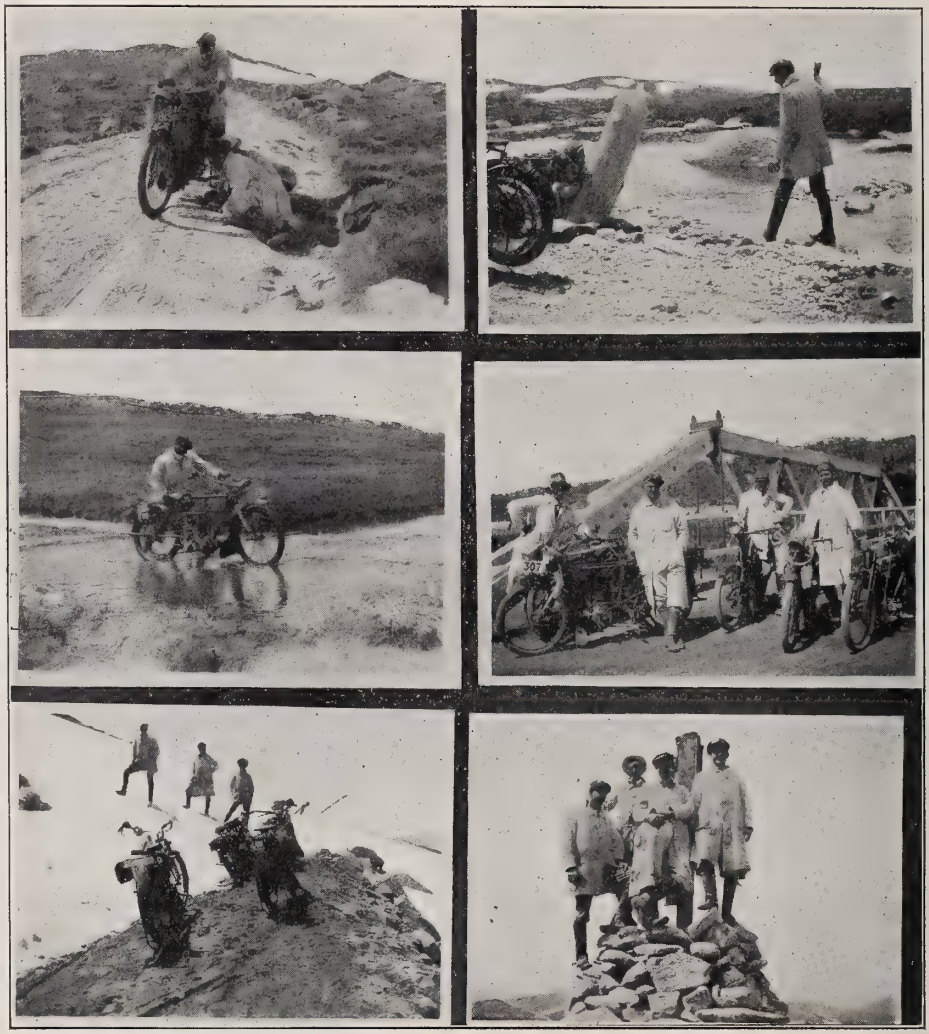
The three Sundays following the Valparaiso run will be given up to runs to the Hawthorne track, where the racing men will practice for the big meet on Memorial Day. The club is considering putting on a few professional events for this meet and several fast riders are waiting for definite news with great interest. One of these is Rex Wickwire, the star Indian racing man of San Antonio, Tex. Wickwire came to Chicago several weeks ago and is employed by the Edwards-Crist Mfg. Co. He says he will have his machine sent up from Texas and will ride if the "pro" events are put on. C. R. Crist was down in Texas during the winter and saw Wickwire ride in one of the meets there. He says that none of the northern cracks can show him anything, and the statement is borne out by the fact that Wickwire did the mile in 50 seconds on a three-quarter mile track, which was not any too good, taking the measure of Arthur Mitchel. He also had a good position in the last of the Mardi Gras races at New Orleans when he was forced to retire by the breaking of a chain. In person, Wickwire is a quiet, steady-eyed little fellow and has made a very favorable impression upon the members of the North Shore club.

Buffalo Got All but One F. A. M. Vote.

In the struggle for the 1911 national meet of the Federation of American Motorcyclists, the cities of Buffalo and Indianapolis were not as evenly matched in the voting on the part of the F. A. M. directors as had been supposed. F. I. Willis, president of the F. A. M., has just announced the result of the vote, showing that Buffalo's majority was overwhelming. Willis and Earle L. Ovington did not vote. Those who voted for Buffalo were G. H. Hamilton, R. G. Betts and Dr. J. P. Thornley, of New York City; E. M. Estabrook, of Bangor, Me.; W. F. Collins, of San Francisco, and E. L. Buffington, of Providence, R. I. One vote was cast for Indianapolis by Charles F. Ball, long a dealer in that city, but who dated his vote from Oklahoma City, Okla. The dates for the national meet at Buffalo will be set for the second week in July.

Baltimoreans Romp Up Finksburg.

Finksburg Hill, which is between Baltimore and Westminster, Md., no longer has any terrors for motorcyclists. The pimple, long and rough, still is on the job as actively as ever, but the lusty motors of today romp up with ease, where the small engines of earlier days often used to "die." On a recent joint run of the Baltimore and Maryland Motorcycle clubs to Westminster the riders took great delight in conquering Finksburg in retaliation for the indignities of walking and pedaling which it frequently inflicted on them in the past. At Westminster the motorcyclists enjoyed a fine dinner at Main Court Inn.



The Superior Motorcycle Club has been formed in Superior, Wis. It expects to have about 50 members before the season is over.

—A MOTORCYCLIST AT SIXTEEN YEARS.

In the interval, the Wagner Motorcycle Co., St. Paul, Minn., of which George Wagner is president, was created and the picture shows Miss Wagner on her first Wagner motorcycle. Her achievements in reliability competitions are notable.

From Hot to Cold on a Trip to "The Roof"

From balmy air and warm sunshine to bleak snows and sunshine that itself seemed cold, and thence back again to where the thermometer dallied in the upper register, all in an Easter holiday tour of 800 miles, is the experience of four daring motorcyclists who visited "The Roof of Australia" in an expedition from Sydney, N. S .W. One cannot go 800 miles in the great Australian continent without striking a great deal of variety both in topography and climate, and the quartet had its full share in the variety line, sounding both extremes of temperature on the trip. The machines used were N. S. U., Triumph and Rex. The first picture, in the upper left hand corner of the group, shows the twin Rex under examination for the purpose of discovering why it should develop the asthma in climbing mountain grades, and its carbureter was finally given plenty of air for the rarified mountain atmosphere. The picture on the right in the top row is entitled, "Snowballing by the Snowy River, the stream of which the Australian poet is so fond of singing." At the left in the middle row is a glimpse of one of the many streamlets that had to be forded in the trip. The view on the right was taken near Queanbeyan and on the site of the proposed Australian capital, which the projectors would model on the lines of the city of Washington, D. C., as a politically "neutral" governmental center removed from the commercial cities. The snow picture in the bottom row was taken on Mount Kosciuscko, three miles from the summit and 6,000 feet above sea level. This is the highest mountain in Australia, and is sometimes known as the latter's "roof." On the right in the bottom row, the motorcycle tourists are seen at the "trigonometrical cairn," marking the highest point on the continent, at the very summit of Mount Kosciuscko, where they indulged in the mild vandalism of carving their names on the post. They did not ride their machines to the very summit, as the heavy snow on Kosciuscko's top completely blocked their path as they neared the "cairn," so the short distance was made on foot.

Speed Means Safety for Safe Blowers.

Always quick to adopt any new device that will assist them in the successful practice of their exacting profession, safe blowers have taken to the motorcycle as a quick and safe method of transportation in making a raid and effecting a quick "getaway," according to the Los Angeles (Cal.) authorities. The police of that city and Ocean Beach, the latter a residential suburb, are looking for two men dressed as motorcyclists and riding motorcycles, whom they suspect of having blown the safe in the tax collector's office in the Ocean Beach City Hall early on the 21st inst. There was only $75 in the safe, but the men were scared away before they got even that. Two men riding motorcycles and dressed in a manner comporting with that pastime called at an Ocean Beach garage very early on the morning of the attempted robbery and made suspicious inquiries about the policing of the road to Los Angeles, claiming that they were looking for a car that had been stolen. It later developed that they had reported no theft to the police and that no car was stolen that night in that place, which causes suspicion to be directed to them.

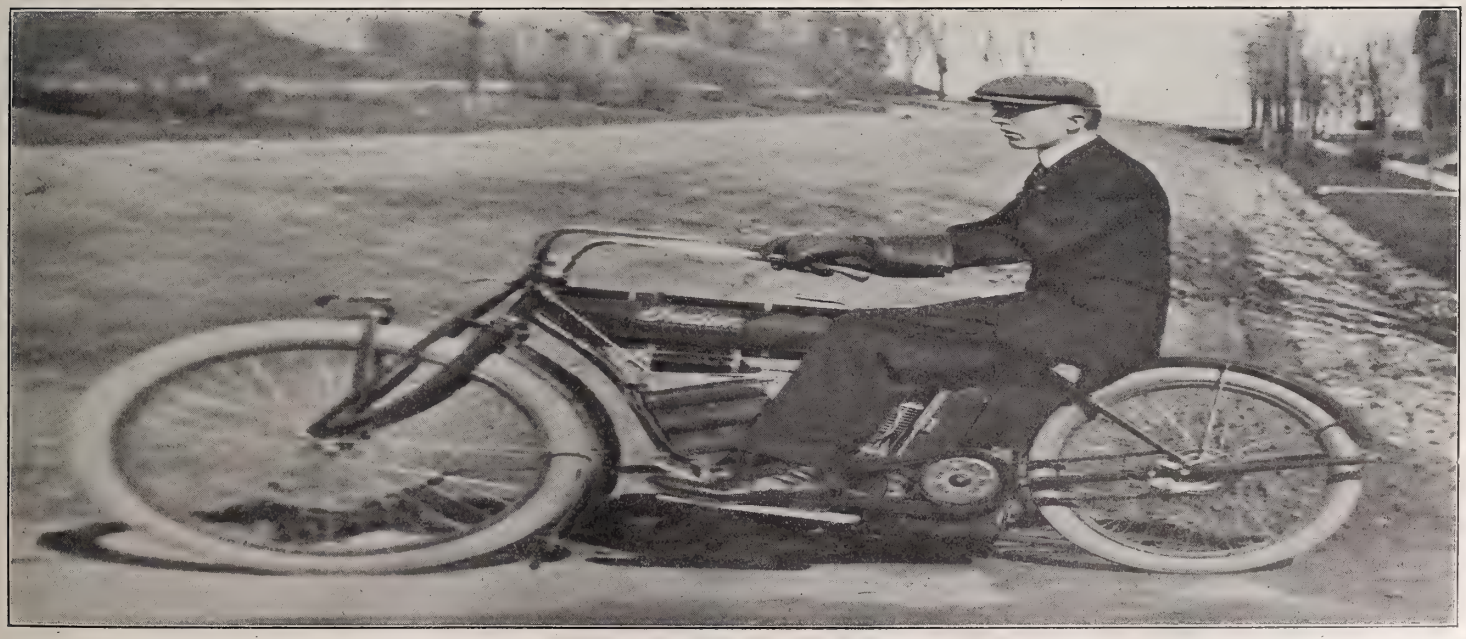
Cop Chases Cop in Joy Ride Race.

Motorcycle Policeman Weber, of Chicago, Ill., had the unpleasant duty of arresting a brother officer, Michael Mulvey, of the sidewalk squad, on the charge of "joy riding," one night last week. Mulvey sent word to the station that day that he was sick, but late that night he was caught by Weber tearing down Garfield boulevard in a limousine. When Weber commanded the chauffeur to stop, Mulvey, it is alleged, told him to "go jump in the lake" and attempted to do him bodily injury when Weber finally succeeded in stopping the car. Mulvey was in uniform at the time, but wore a rose that concealed his star. He now is under suspension.

Hawkeye Highway to Sioux City.

To motorcyclists contemplating a trip involving the crossing of Iowa, the announcement of the new highway in that state, 285 miles in length, will prove good news. The road, which is now in process of construction, is to be called the Hawkeye Highway, and will extend from Dubuque to Sioux City. Since the famous "River to River" highway, running from Davenport to Omaha, was completed last year the legislature and the people of Iowa have evinced a further and growing enthusiasm over good roads and are making an effort that this latest road will be a model of its kind and a great credit to the state.

Pomona Run Attracts Tandems.



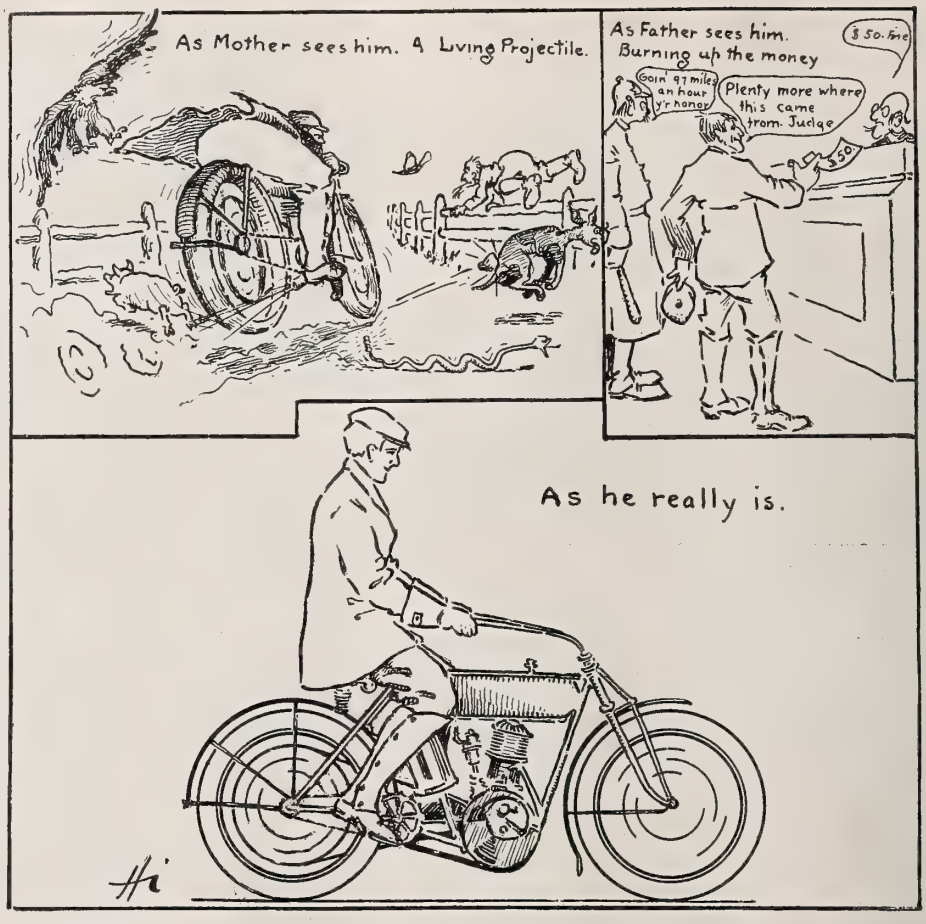
More tandem motorcycles than on any previous club run, were present on the Los Angeles (Cal.) Motorcycle Club's run to Pomona on the 9th inst. Over 80 machines, including tandems, made the trip.

"FLEXIBILITY" AND "VARIABLE WHEELBASE."

SINCE photographic evidence is generally free from question, it will be apparent that the publication of the accompanying pictures at once discloses the existence of phenomena of so remarkable a nature that they are certain to stir the whole motorcycling world. The contemplation of the possibilities revealed is in itself staggering. As is made plain by the pictures, the rider shown, starting with his machine in normal shape, can shorten his wheelbase for dirt track racing if he desires. If he is being beaten in a neck-and-neck finish in the stretch, he has but to lengthen his wheelbase, as indicated in the bottom illustration, the necessary distance to win by a nose. The shortened wheelbase, as in the right hand view, also is exceedingly useful in avoiding collisions with trolley cars and the like, provided the rider is running with normal or lengthened wheelbase and effects the change to short wheelbase quickly enough. Then, too, "flexibility" has long been a desideratum of the designers. Here "flexibility" is manifested with a vengeance. When reduced to commercial practice, there will be "millions in it."

EVERY COUNTRY GETS A CHAMPION

Indiana Motorcycle Club to Stir Up the State's Enthusiasm—Lantern Parade and Mystery Run.



What with downtown lantern parades, "mystery" runs, tours, race meets and social affairs, the Indianapolis Motorcycle Club could not plan a busier summer even if Indianapolis, Ind. had been successful in winning the 1911 national meet of the Federation of American Motorcyclists. The club is preparing to hold 15 motorcycle meets in the state during the next few months, the meets to take place at various county seats where there are good fair ground tracks and where satisfactory crowds of spectators may be drawn.

To show that there are no hard feelings, the club has adopted resolutions that are to be sent to Buffalo, congratulating the Buffalonians on their success in getting the F. A. M. meet and wishing the Buffalo Motorcycle Club great success in the conduct of the meet. The club will send a big delegation to Buffalo. If Indianapolis had been awarded the meet, the Indiana club would have started work at once on the club house that it intends to build and would have had it finished by July. Now the plans are changed and the club will not start to build until the first of September. The old club house has been revarnished, repapered and refurnished, so that it will serve satisfactorily until September.

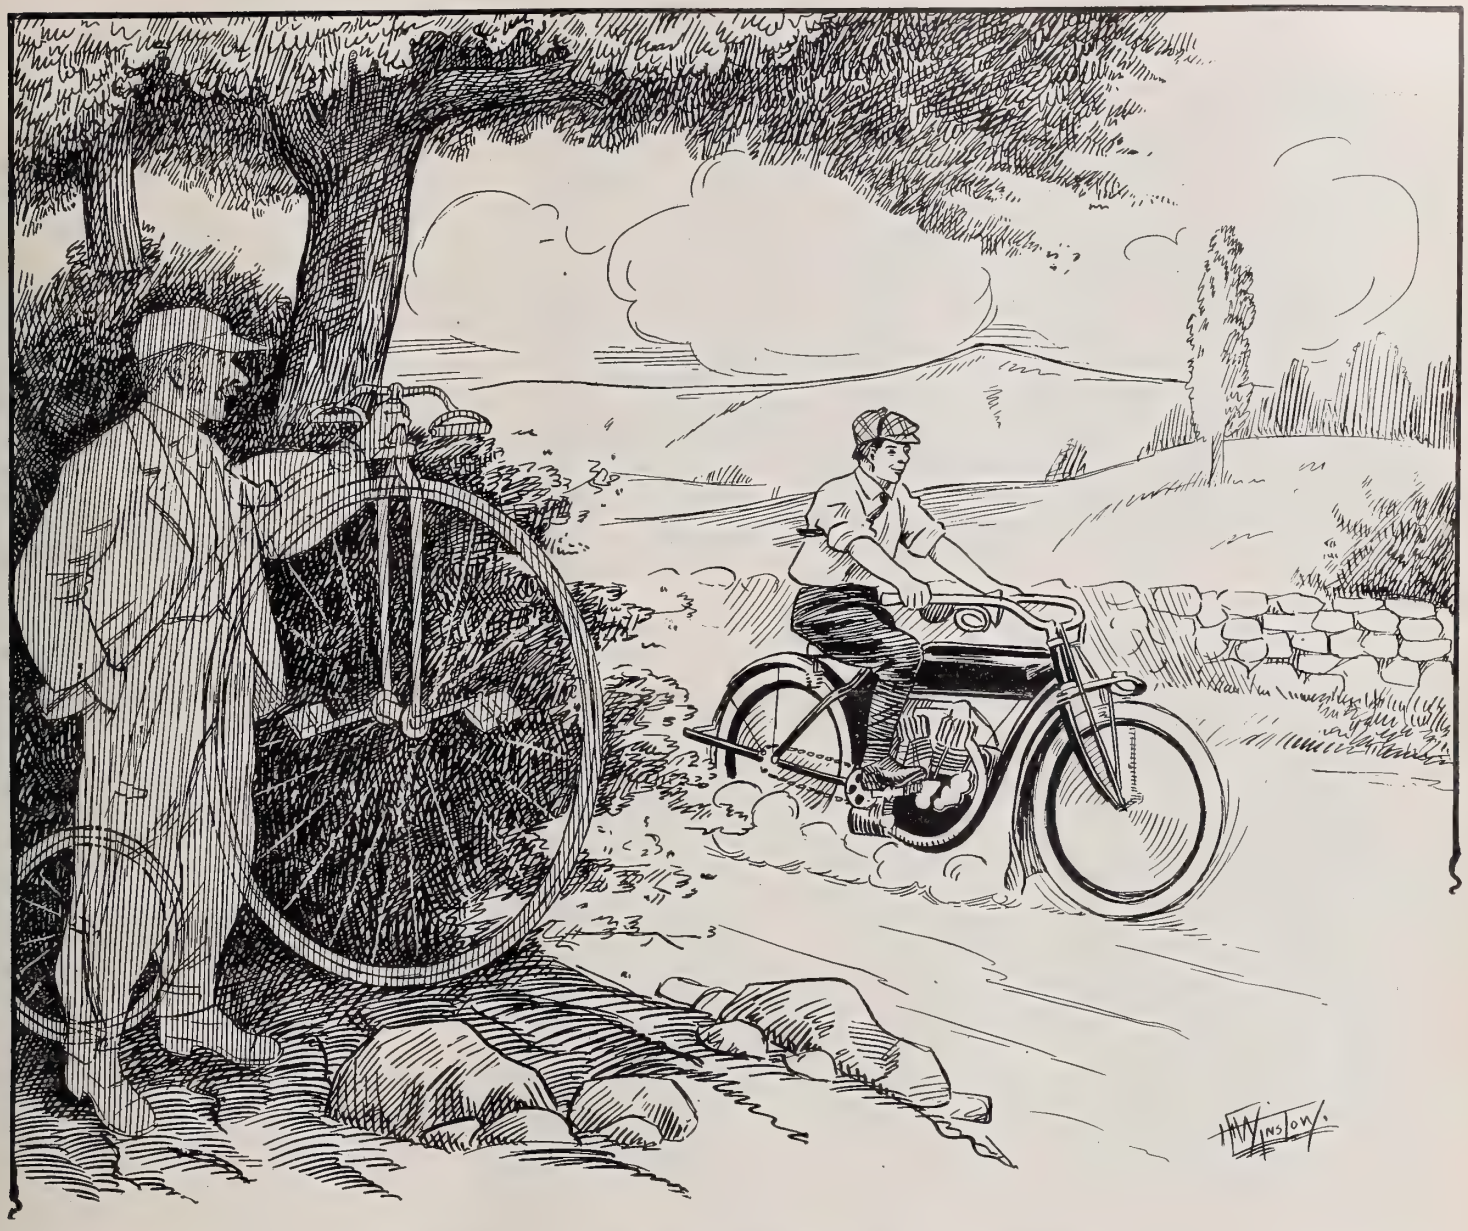
Of the 15 motorcycle meets that it is planned to hold, the first will probably be held May 6 or 7 at Noblesville or Martinsville, Ind. Six races will constitute each program. Four are to be closed events exclusively for members of the club; one is to be an open event and the last event will be for the county championship in each case, open only to riders of the county in which the race is held. Belt and chain machines will be run in separate events at times, but the usual restrictions as to cubic inch piston displacements and other F. A. M. requirements will be in force.

Six men are behind the venture, selected by the club last week. They are John Kinney, Ray Scott, John Hole, William Bowers, Erwin G. Baker and Harry Graf, the latter being the chairman of the committee. Each is putting up a certain amount of money to back the racing venture. The purpose of the races, it is stated, is only to make money for the Indiana Motorcycle Club and to interest people in all parts of the state in motorcycle riding. John Kinney says:

"In every county in Indiana there are a hundred riders where there should be 500, and we intend to interest the people in motorcycling. Prizes to the value of $25, $15 and $5 will be given for first, second and third, respectively, in each event. We are not going to take chances on any man's life in these races, where the tracks are small, and if necessary will run the races in small heats instead of letting too many riders on the track at once."

The club's "mystery" run will be held on Decoration Day, starting at 8 o'clock in the morning. The run will last an hour and a half, and none of the contestants will know where it will end. An entry fee of one dollar will be charged and each rider will get a souvenir valued at a dollar. The officials of the club state that if the riders are not satisfied they will get their money back. The reason for so short a Decoration Day run is that there is a big automobile speed contest scheduled for the motor speedway at 10 o'clock and most of the motorcyclists want to be there after the "mystery" run is over.

Some evening about the middle of May the club will hold a lantern parade in the downtown streets of Indianapolis, like the old-time bicycle lantern parades. This will be followed by a smoker and banquet at the club house. All the riders of the city will be invited to attend. The lantern parade was to have been given last week, but was postponed.



On the Fourth of July a big race meet will be held by the club either at Indianapolis or at Ft. Wayne. Many of Indiana's motorcyclists will be at the national F. A. M. meet in Buffalo at that time, but enough will remain to assure the success of the affair. One thing is certain, and that is that if the meet is given in Indianapolis it will not be held on the motor speedway, as the management of the speedway wants $500 for the use of the track for one day. The state fair grounds probably would be chosen.

In August the club will give a 200-mile reliability run to West Baden, Ind. and return. Prizes will be given. West Baden is about 135 miles from Indianapolis, so the riders will check in about 30 miles south of Indianapolis on the return trip.

System Helps the Western District.

Great progress has been made in the Western district of the Federation of American Motorcyclists under the direction of Vice-president Perrin B. Whitney, following the adoption of the system which has proved so successful for Vice-president Wilber in the Eastern district. A complete card index system is in operation, whereby all matters relating to memberships, sanctions and the like, are taken care of on time. The general conditions in the district are excellent. Every expense has been paid and there is a substantial sum remaining in the treasury, while new members are being added steadily. Whitney's card index has overflowed the drawer originally used for this purpose in his desk and is rapidly filling up the additional drawer assigned to it.

An Envious Shade

"Great Scott! To see what I missed by being born too soon!"

Motorcycles Do a "Wireless" Act.

Followers of the horses who like to lay a bet on a "sure thing" or on a likely chance had reason to be grateful to the motorcycle recently when the "racing extra" editions of the New York newspapers were enabled by means of the motorcycle to include the results of a big race meet held at Norfolk, Va., under the auspices of the New York Jockey Club. The authorities would not allow the managers of the race meet to establish either telephone or telegraph communication with the city, and as a result the newspapers had great difficulty in securing reports. This was especially inconvenient for some of the New York papers who were represented on the ground. In this emergency Ball & Co., the agents in Norfolk for the Indian, made arrangements with the New York Evening Telegram to transmit the latter's racing results news, and by the aid of Indian motorcycles regular trips were made from the track to the newspapers and telegraph offices in the city, enabling the results to be announced almost as quickly as had previously been done by means of a direct telegraph wire.

Mayor in San Francisco's Club.

It is not every motorcycle club that can claim the chief executive of its city among its members, which is one of the reasons why the San Francisco (Cal.) Motorcycle Club points with pride to the fact that Mayor McCarthy is an active member. The club now has over 300 names on the roster and is growing steadily. Its membership has been greatly stimulated by the rival activity of two membership teams.

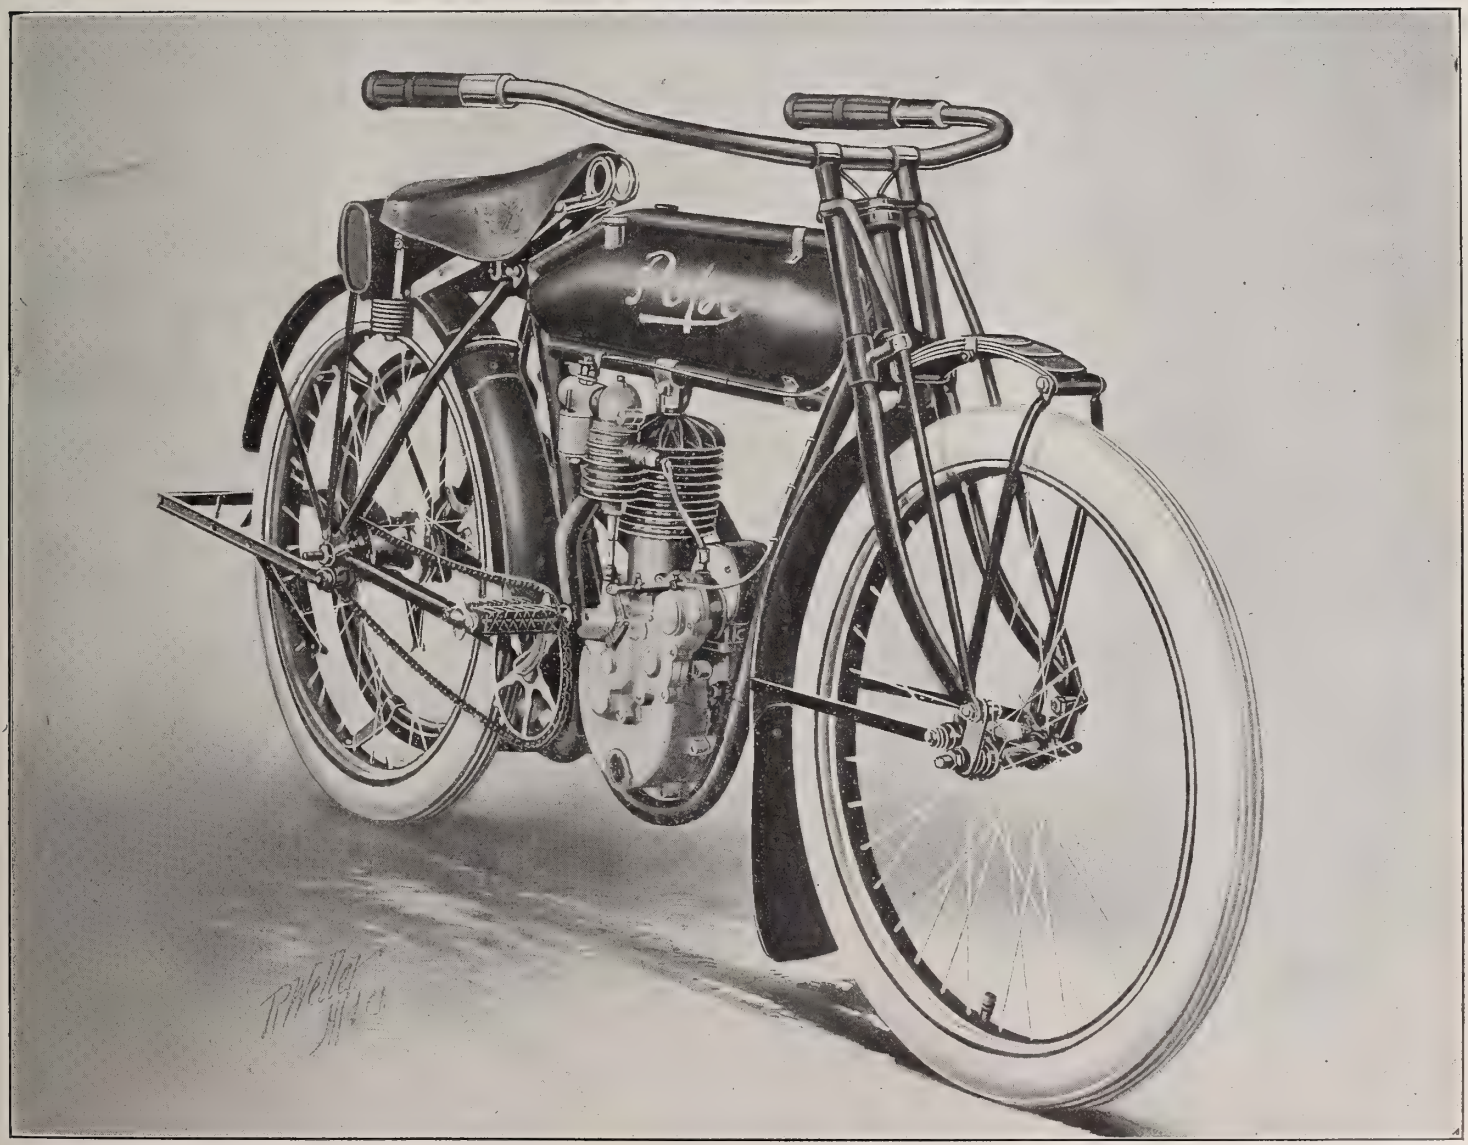
Gasoline Scout Corps in Toronto.

Military motorcycle scouts for the Canadian militia are to be recruited from the membership of the Toronto Motorcycle Club, of Toronto, Ont. The club has decided to organize a scout corps, and General Cotton, commanding the Ontario Division of the Canadian army, has "cottoned" to the proposal. It is probable that the motorcyclists will sign for three years. The corps is to be composed of 22 riders, who will be supplied with uniforms and all equipment except their machines. They will be given all the oil and gasoline they require while on duty. They also will receive $1.50 per day each when in camp. The corps is to be composed of 22 riders, quired to do foot drill, but they will be called upon to do signaling and scouting, together with some messenger work.

Cleveland, Spokane and Houston Contribute, Respectively, Three Group Photographs

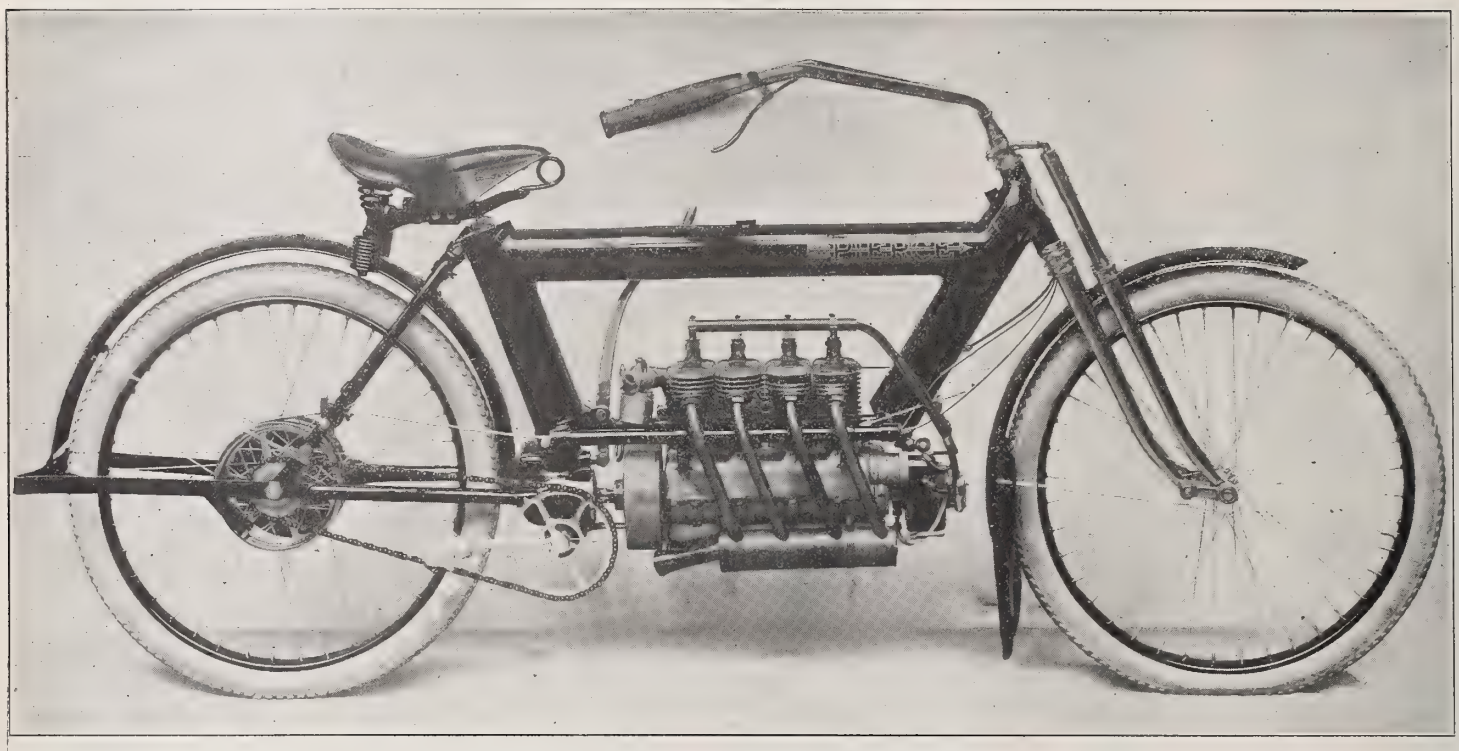
Trained in ways of hardihood by eating De Klyn's cake, breathing soft coal, listening to Max Hayes talk socialism on the square, and looking at the Soldiers' and Sailors' monument, the motorcyclists in Cleveland stop later and commence earlier on their riding season than do most riders in the Middle States, and a considerable proportion keep riding all the year around. It was nothing, therefore, for the Cleveland motorcycle dealers to be giving social runs while yet the enthusiasts in other cities were doing no more than looking at the calendar and wondering when riding weather would come. The illustration shows a group at the start of one of these dealers' runs some little time ago. One virtue of the early runs is that those who take them know the country thoroughly when fine weather does arrive and while late beginners are still experimenting and exploring.

So there would not be one of these straggly starts, where everybody shows up or not as he pleases, and starts out when he feels like it, the Spokane Motorcycle Club, of Spokane, Wash., dated all its members up to be in the group photograph that the club arranged to have taken just before the start of the first club run of the season. It worked great. The photograph itself—but you can judge for yourself, by the reproduction on our right, ladies and gentlemen. But anyway, the effect was to have all the riders there, and when once Road Captain Auld got his eye on them, nobody strayed away. There were about 40 in the crowd. The run was a ride over all the paved streets in the city and then out to the Spokane country club, just to give the roads outside the city a gentle tryout.



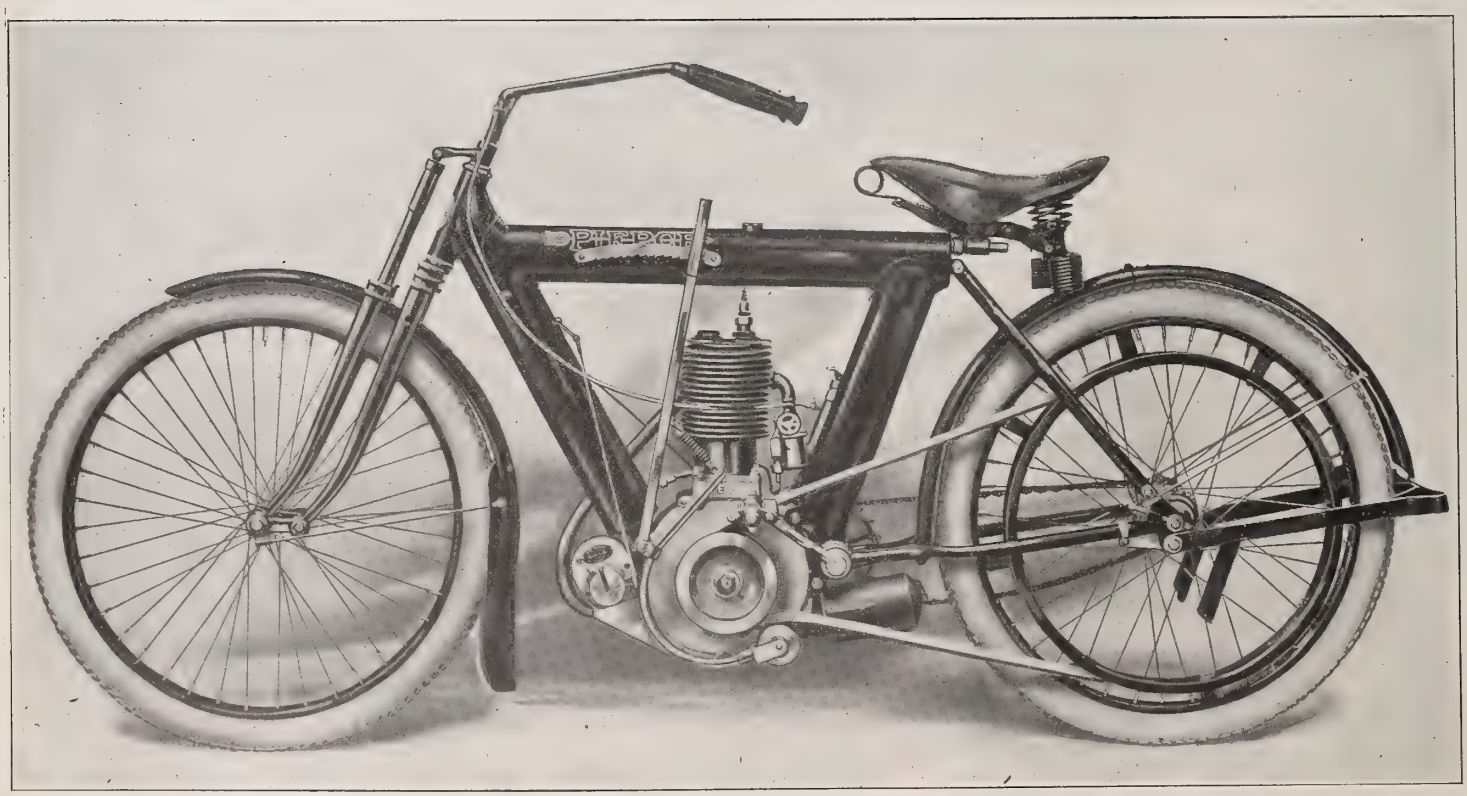
When an elevated railroad guard on a Third avenue "L" train in New York City comes to the station marked "Houston Street," he slams the gates open, yanks the door and lets out an inarticulate evocation that is something between a bellow and a whine. What he cons himself into thinking he is saying is "Howston" street, which is the way they pronounce it in the metropolis. But down in Texas the same combination of letters is pronounced on the "Hugheston" order, like Houston himself pronounced it, and it is from the city whose name is pronounced that way the photograph came. It was sent up by Austin Burges, the Indian agent, and is marked as being "A few more of the boys of the Sunny South who wish the Bicycling World and Motorcycle Review a great success for the coming year."

What Representative Motorcycle Makers Offer



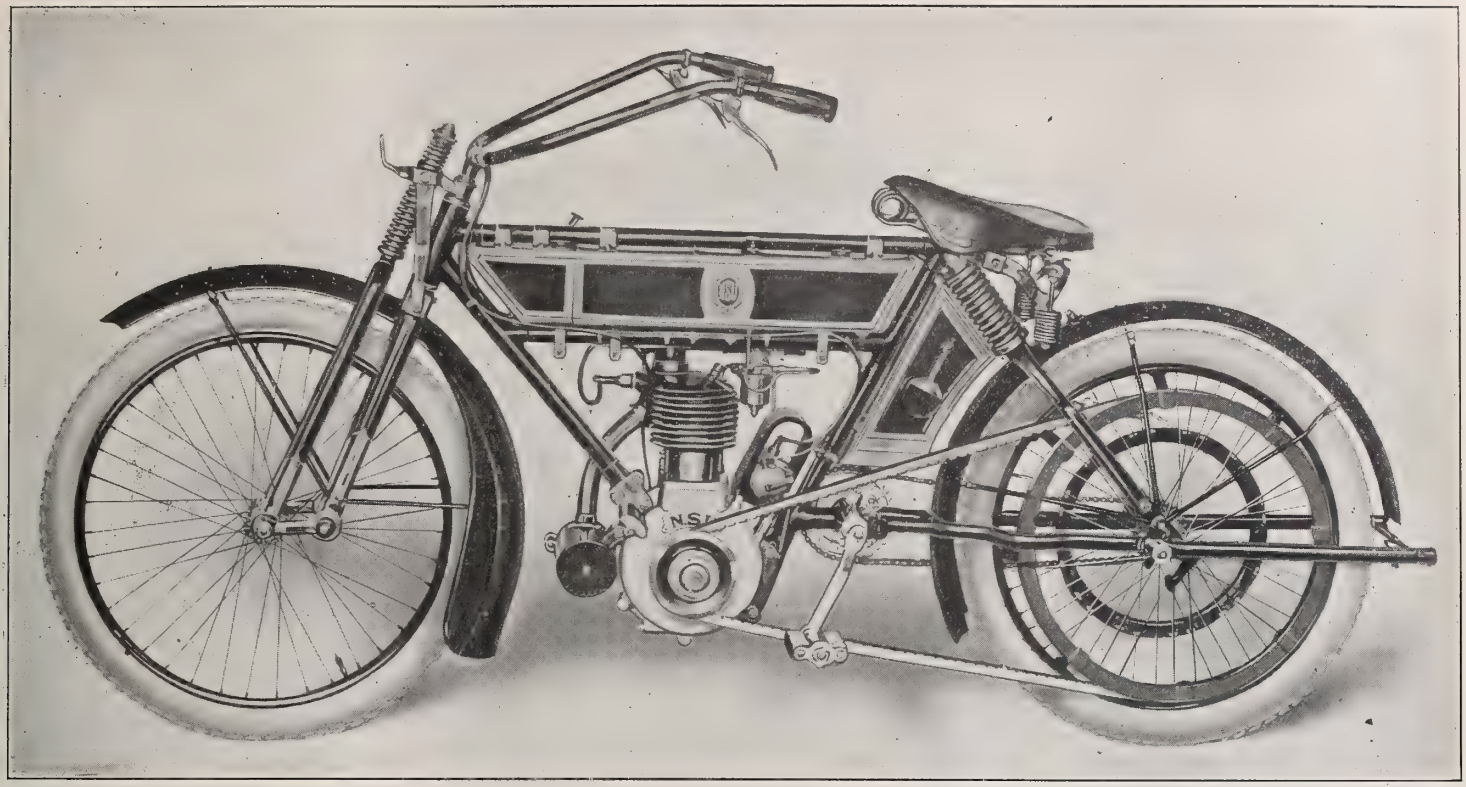
WIDE CHOICE AFFORDED IN 1911 MODELS—MACHINES EMBODY RESULTS OF KNOWLEDGE ACCUMULATED FROM PREVIOUS YEARS—GREAT RANGE IN POWER, PRICE AND IN ESSENTIAL ELEMENTS OF DESIGN—BOILED DOWN FACTS REVEAL CHARACTERISTIC AND INDIVIDUAL FEATURES OF VARIOUS MAKES

POPE—Pope Mfg. Co., Hartford, Conn.

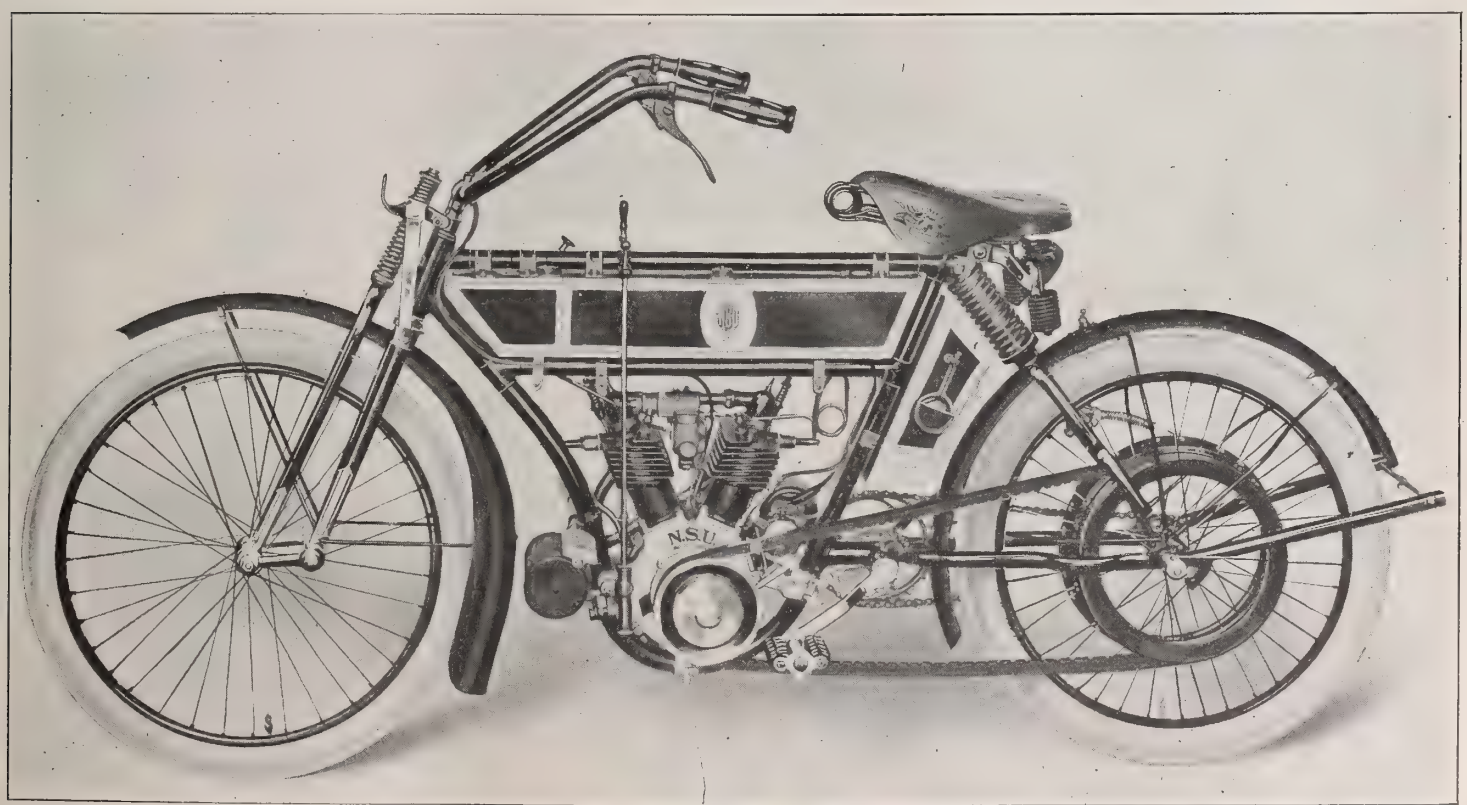


Pope single cylinder, 3 h. p., V belt drive; lightweight; magneto; long stroke; leaf spring fork; 26 in. wheels; internally ribbed frame; drip feed splash oiling; double grip control; one piece cylinder and head; automatic inlet valve; 54 in. wheelbase; 2¼ in. single clinch tires; coaster brake; double-stem handlebars; quick hanger adjustment; low riding position. Price, $175.

PIERCE—Pierce Cycle Co., Buffalo, N. Y.

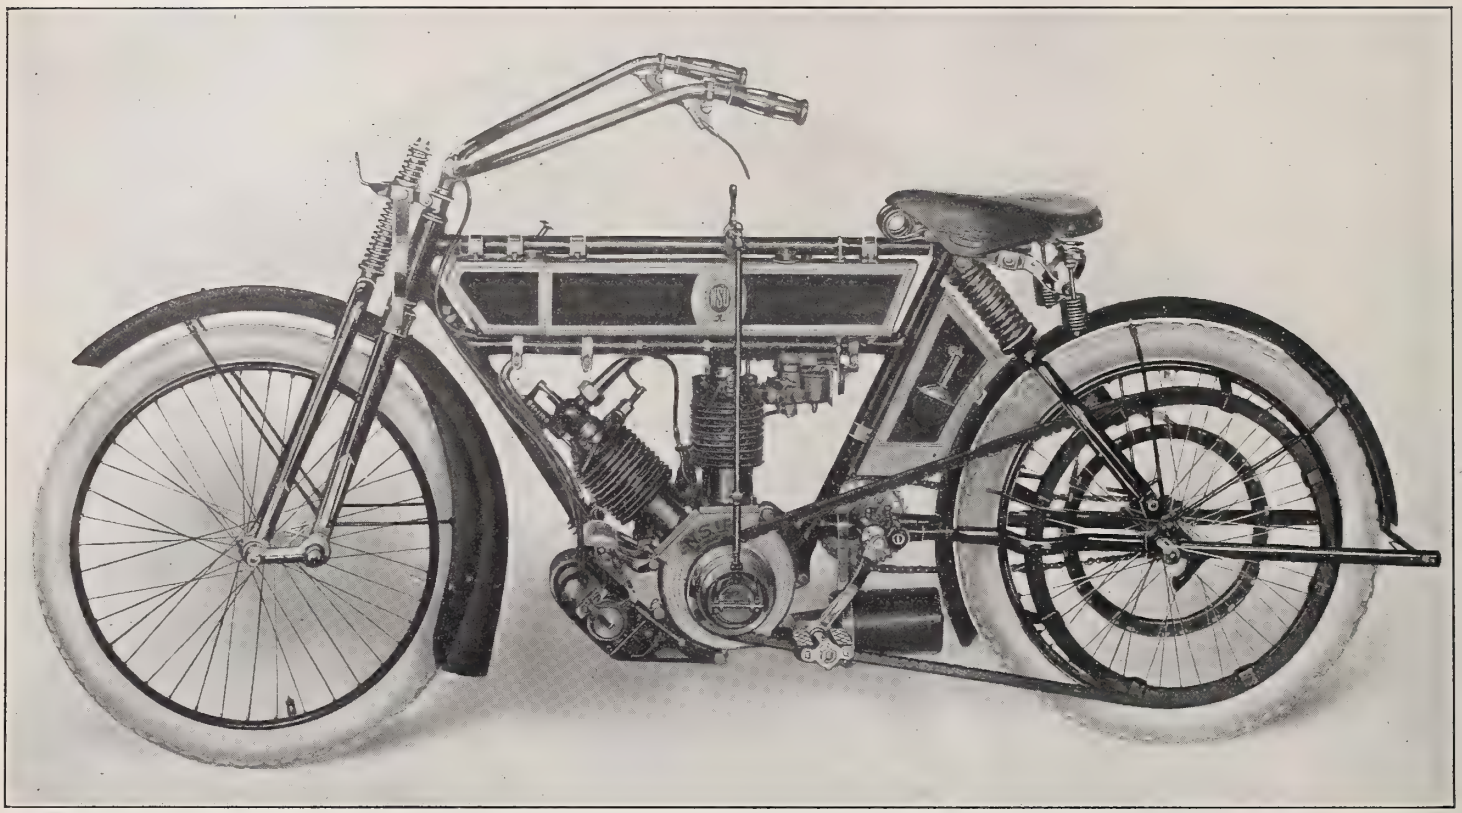


Pierce 4 cylinder, 6 h. p., two-speed, shaft drive; tanks in frame; cartridge spring fork; mechanical valves; mechanical oil pump; disk clutch; sliding gear transmission; two brakes; magneto; double grip control; 28 in. wheels; 2½ in. tires; 60 in. wheelbase; enclosed drive; ball bearing transmission and propeller shaft; interlocking mechanism prevents engagement of clutch before gears are engaged. Price, $400.

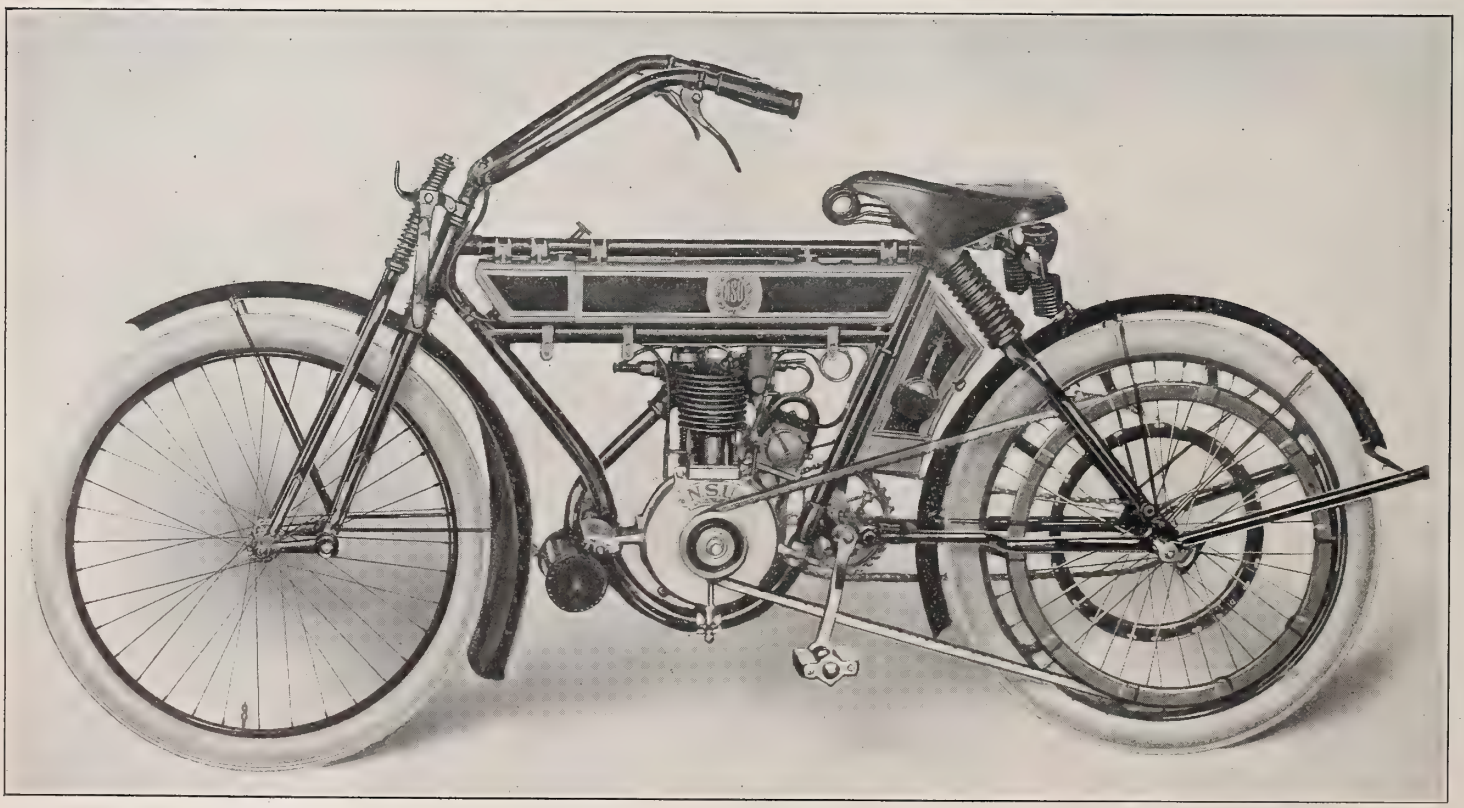


Pierce single cylinder, 5 h. p., flat belt drive; long stroke; ball bearing crank shaft; mechanical valves; one piece cylinder and head; tanks in frame; free engine effect through hand operated idler; cartridge spring forks with ball bearing links; hand pump oiler; 28 in. wheels; 2½ in. tires; 54 in. wheelbase; coaster brake; hinged rear guard. Price, $250.

N. S. U.—Imported by N. S. U. Motor Co., New York City.

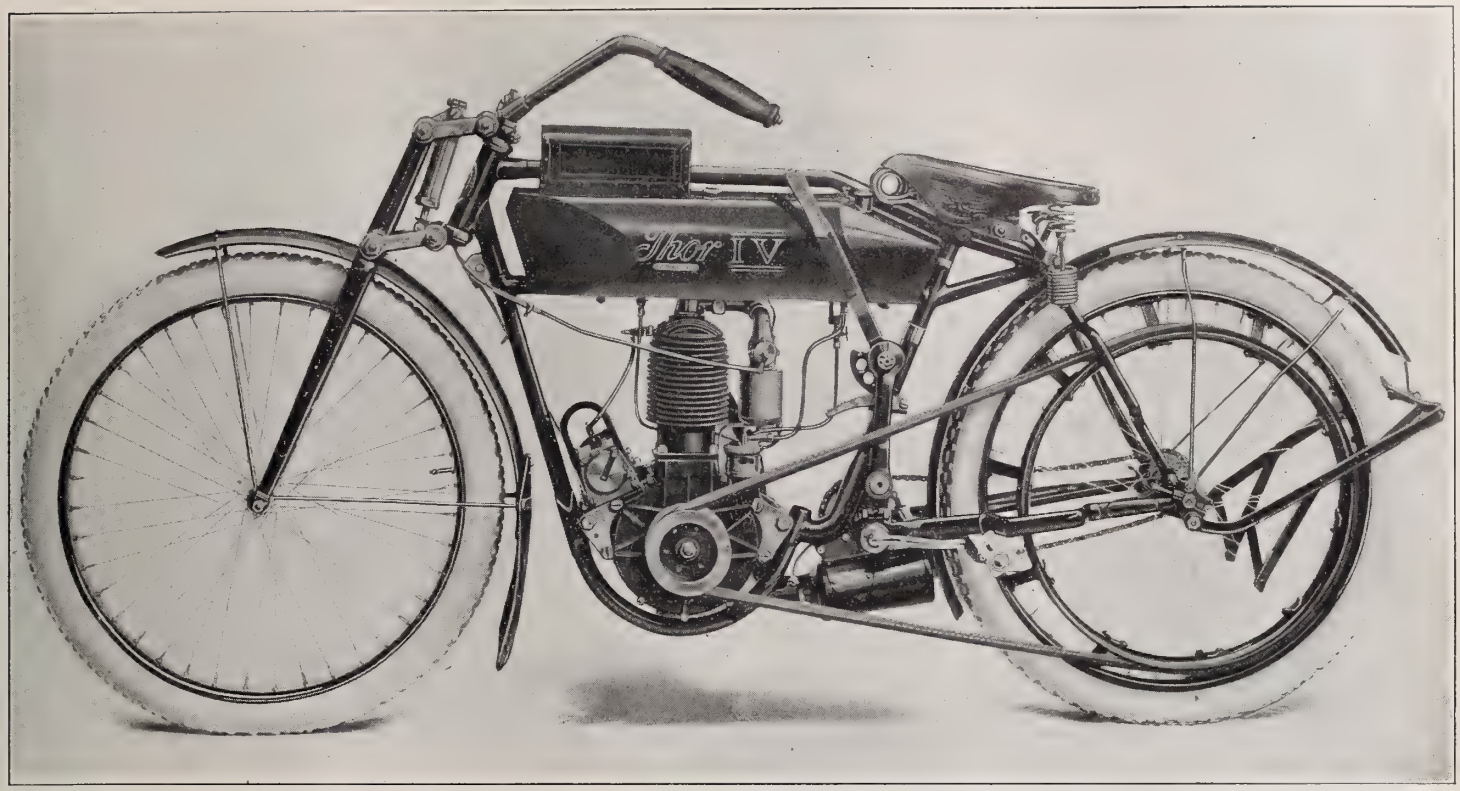


N. S. U. single cylinder, 4 h. p., V belt drive with adjustable pulley; spring frame and forks; mechanical valves; combination bail and bronze crank shaft bearings; magneto; one piece cylinder and head; handlebar control; double brakes; metal tool box; 26 in. wheels; 2¼ in. tires; 54 in. wheelbase; horizontal sliding seat post; quick demountable rear wheel. Price, $325.

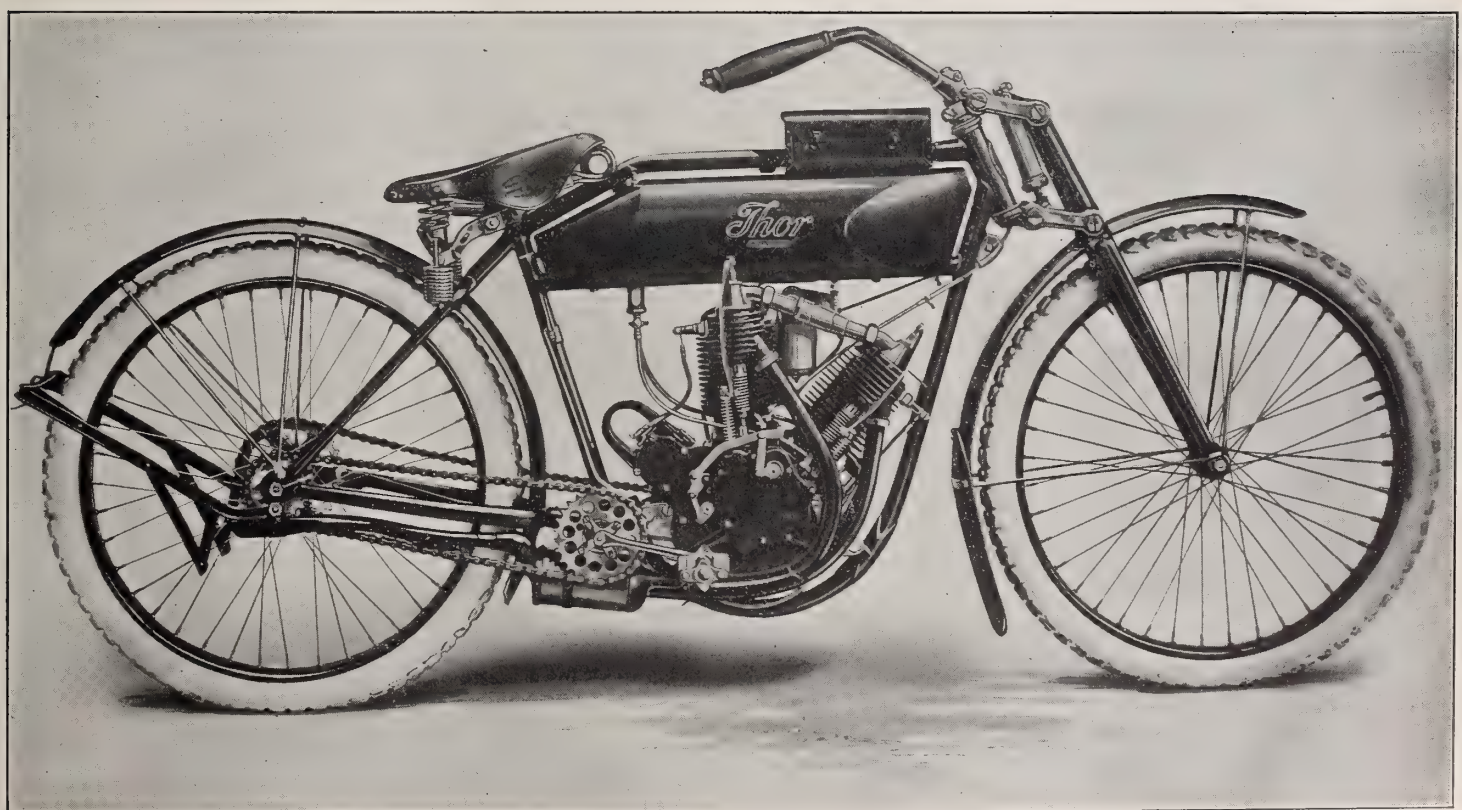


N. S. U. twin cylinder, 3½ h. p., "undergeared" V belt drive; magneto; spring frame and forks with reinforcements; mechanical valves; double brakes; free engine effect through floating drive pulley; high road clearance for rear pulley through undergearing motor, and pulley diameters easier on belt; 26 in. wheels; 2¼ in. tires; 53 in. wheelbase; raised V bars. Price, $300.

N. S. U.—Imported by N. S. U. Motor Co., New York City.

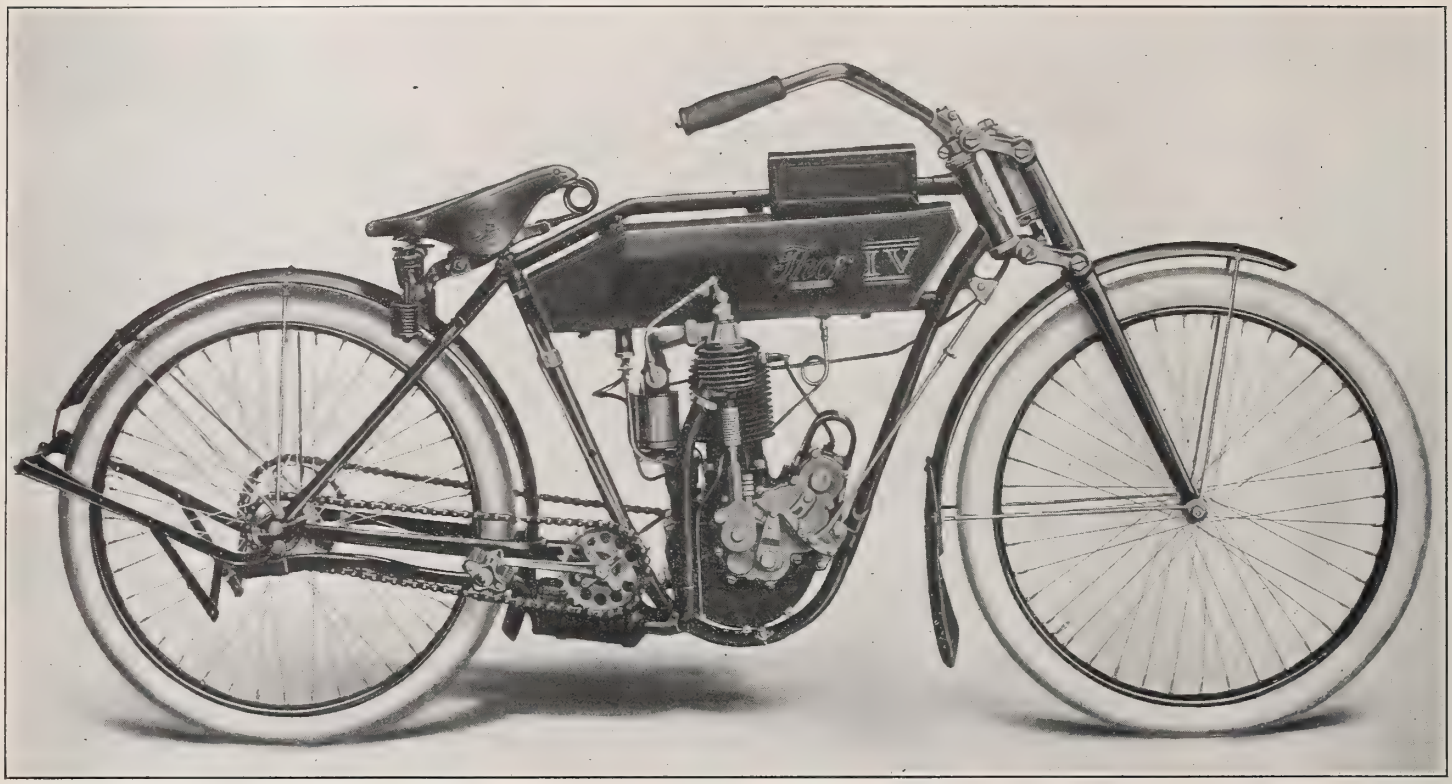


N. S. U. twin cylinder 6 h. p., V belt drive; rigid frame and spring forks; enclosed magneto; mechanical valves; adjustable pulley; double brakes; raised V bars; handlebar engine control; metal tool box; hinged rear guard; 26 in. wheels; 2½ in. tires; 56 in. wheelbase. Price, $375. Luggage carriers, foot rests and two-speed gears extra on all models where applicable.

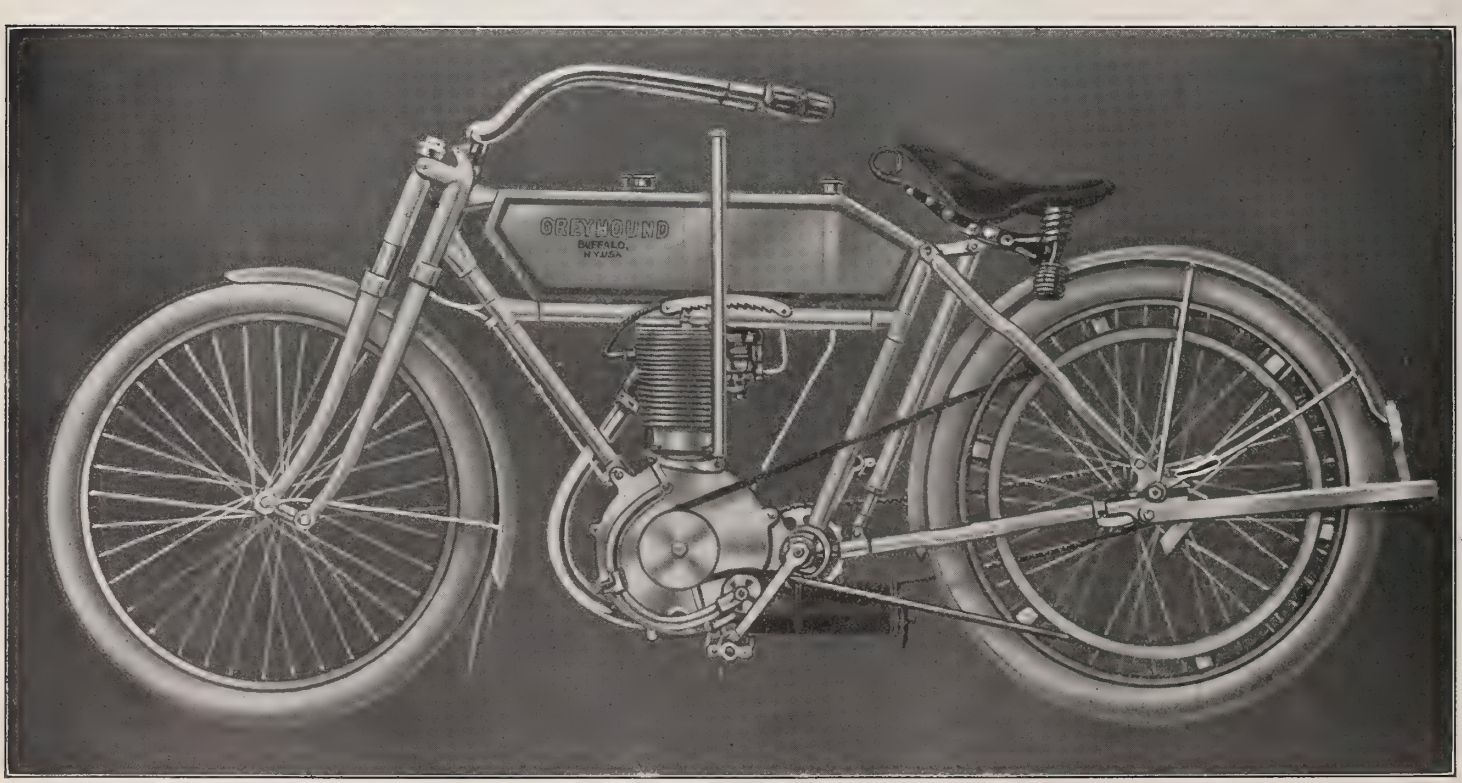


N. S. U. single cylinder 2½ h. p., V belt drive; magneto; spring frame and fork; mechanical valves; variable drive pulley; double brakes; handlebar control; automatic stand lift; detachable mudguards; automatic carbureter; 26 in. wheels; 2 in. tires; 53 in. wheelbase; cut-out switch integral with bar; gasoline gauge; brass tanks; frame and forks ribbed internally. Price, $250.

THOR—Aurora Automatic Machinery Co., Chicago, Ill.

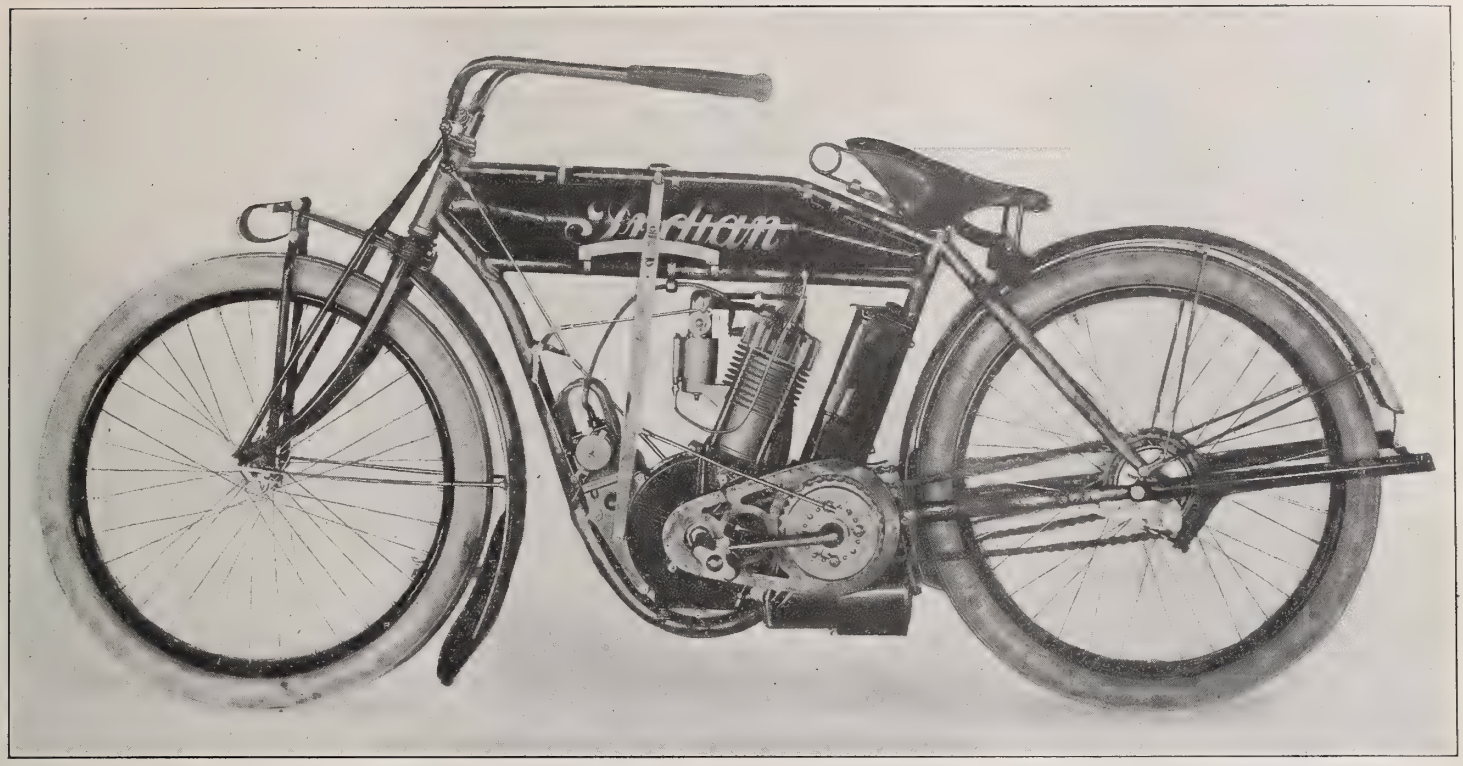


Thor single cylinder, 4 h. p., flat belt drive; magneto or battery; roller bearing motor; one piece cylinder and head; automatic inlet valve with opening regulated by motor throttle movement; pneumatic cushion forks; belt tension regulated by rack idler which actuates hinged rear section of frame; mechanical oiler; free engine effect through hinged frame action; short V bars. Price, $225, battery; $250, magneto.



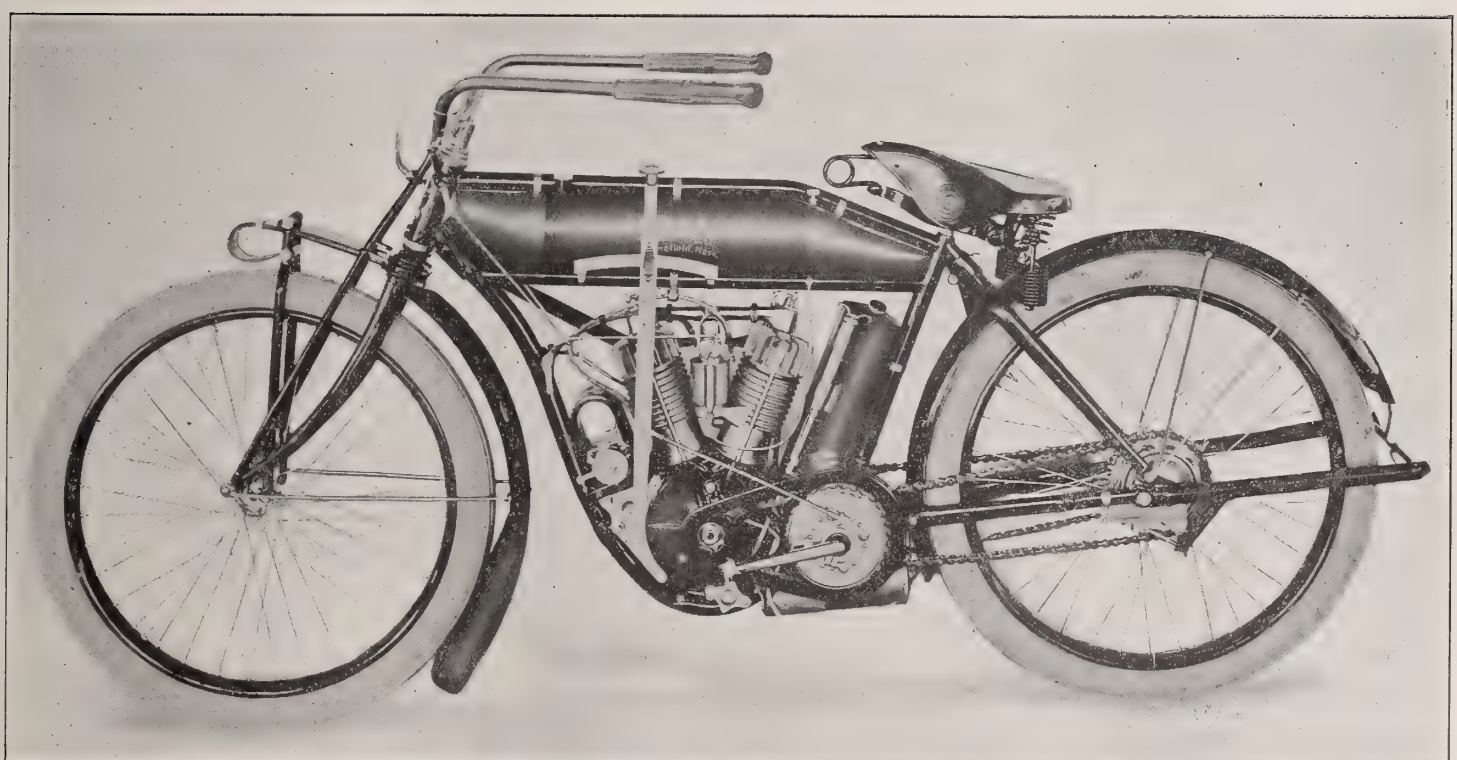
Thor twin cylinder, 7 h. p., chain drive undergeared; magneto only; roller bearing crankshaft; mechanical valves; full spark magneto control on all magneto models; automatic carbureter; mechanical oiler; single chain drive from undergeared motor sprocket, reducing chain speed; double grip control; muffler tail pipe; 28 in. wheels; 2¼ in. tires; 55½ in. wheelbase; coaster brake; copper tanks; single clinch rims. Price, $325.

THOR—Aurora Automatic Machinery Co., Chicago, Ill.



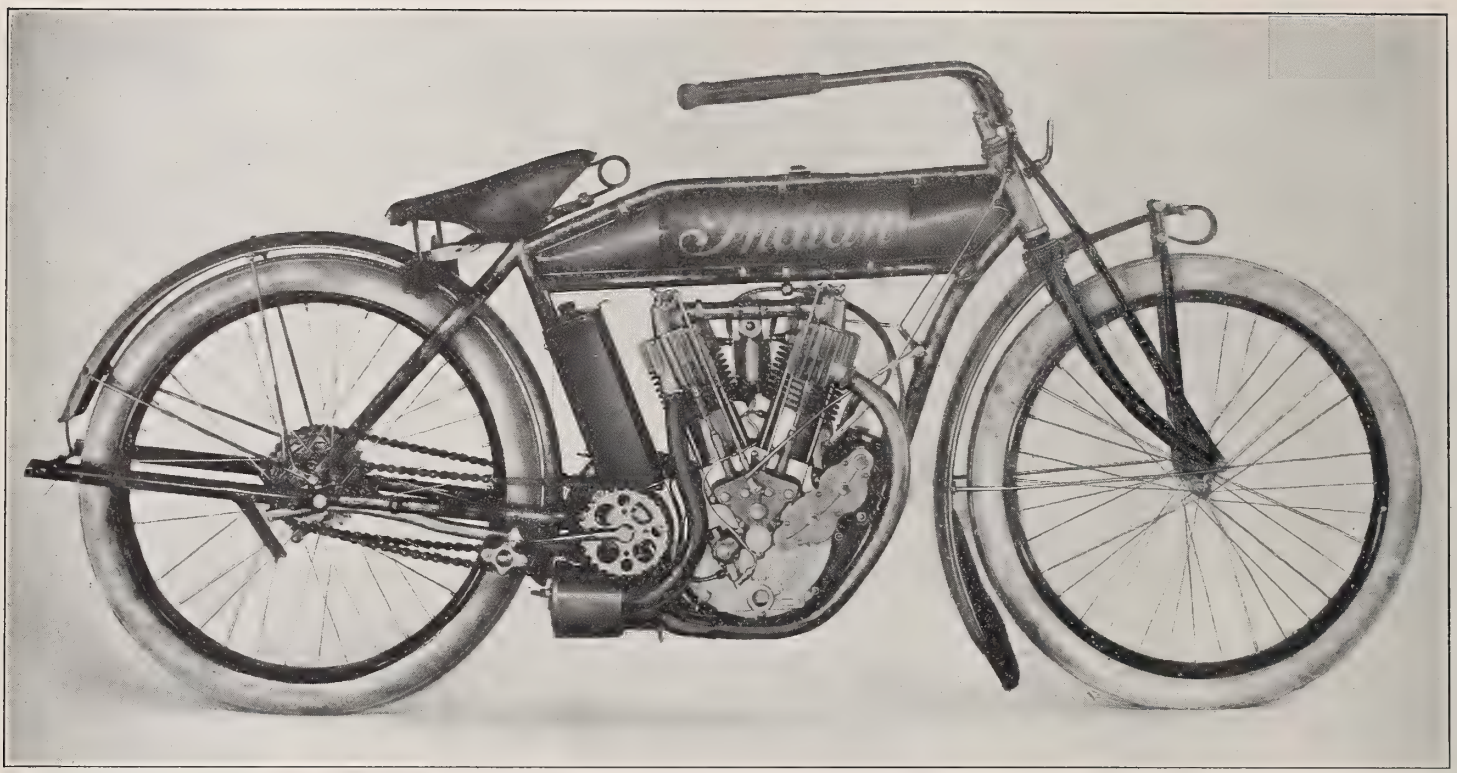
Thor single cylinder, 4 h. p., chain drive, undergeared; magneto or battery; automatic inlet valve with opening controlled by throttle movement; full spark magneto control; roller bearing motor; pneumatic cushion forks; short V bars; straight fork members; double grip control; mechanical oiler; muffler tail pipe; copper tanks; single chain drive; independent chain adjustment. Price, $225, battery; $250, magneto.

GREYHOUND—Greyhound Motor Co., Buffalo, N. Y.

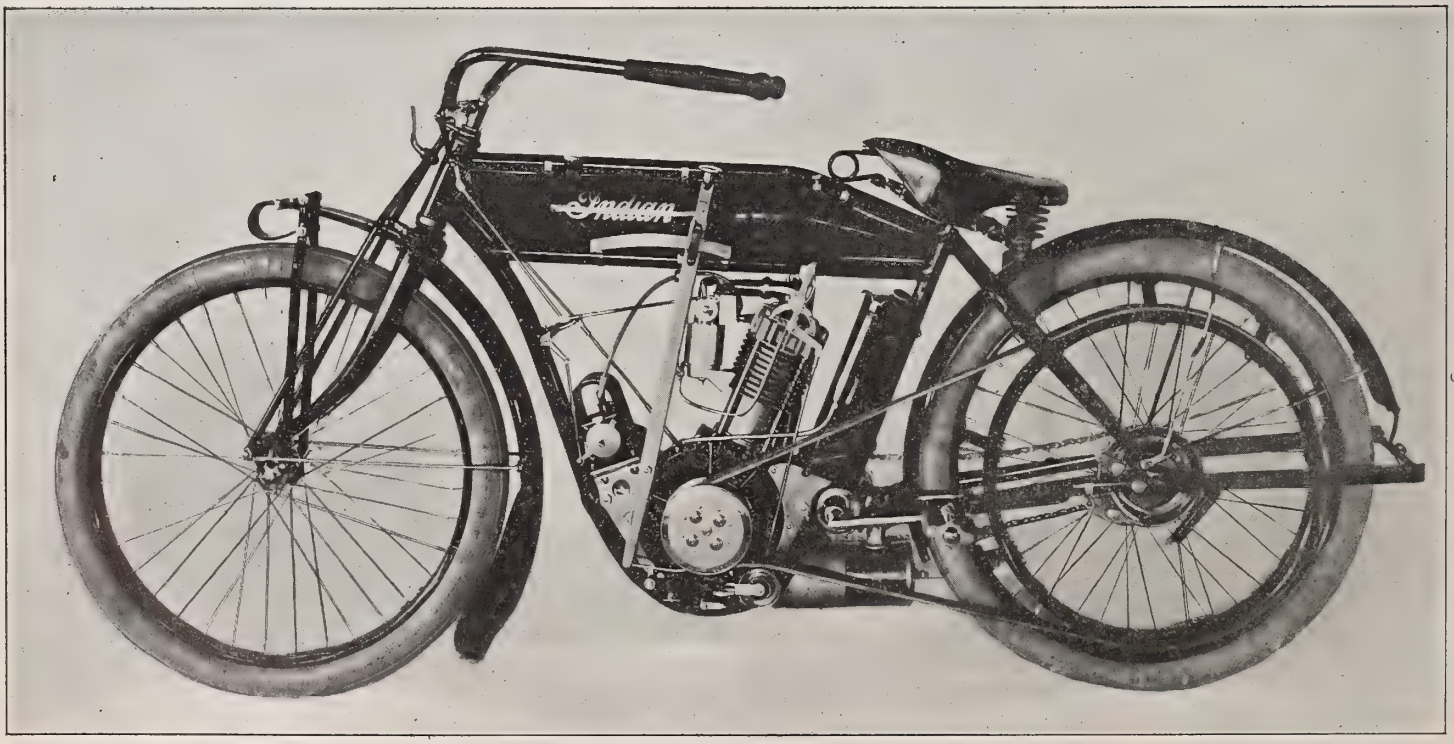


Greyhound single cylinder, 4½ h. p., flat or V belt drive; battery standard, magneto $25 extra; cartridge spring forks; shock absorbing seat post on rigid frame; one piece cylinder and head; automatic inlet valve; offset cylinder; drip feed lubrication; combination fuel tanks; large filler caps; coaster brake; 28 in. wheels; 2½ in. tires; 56 in. wheelbase; long U bars, non-turning; long stroke motor. Price, $225.

INDIAN—Hendee Mfg. Co., Springfield, Mass.

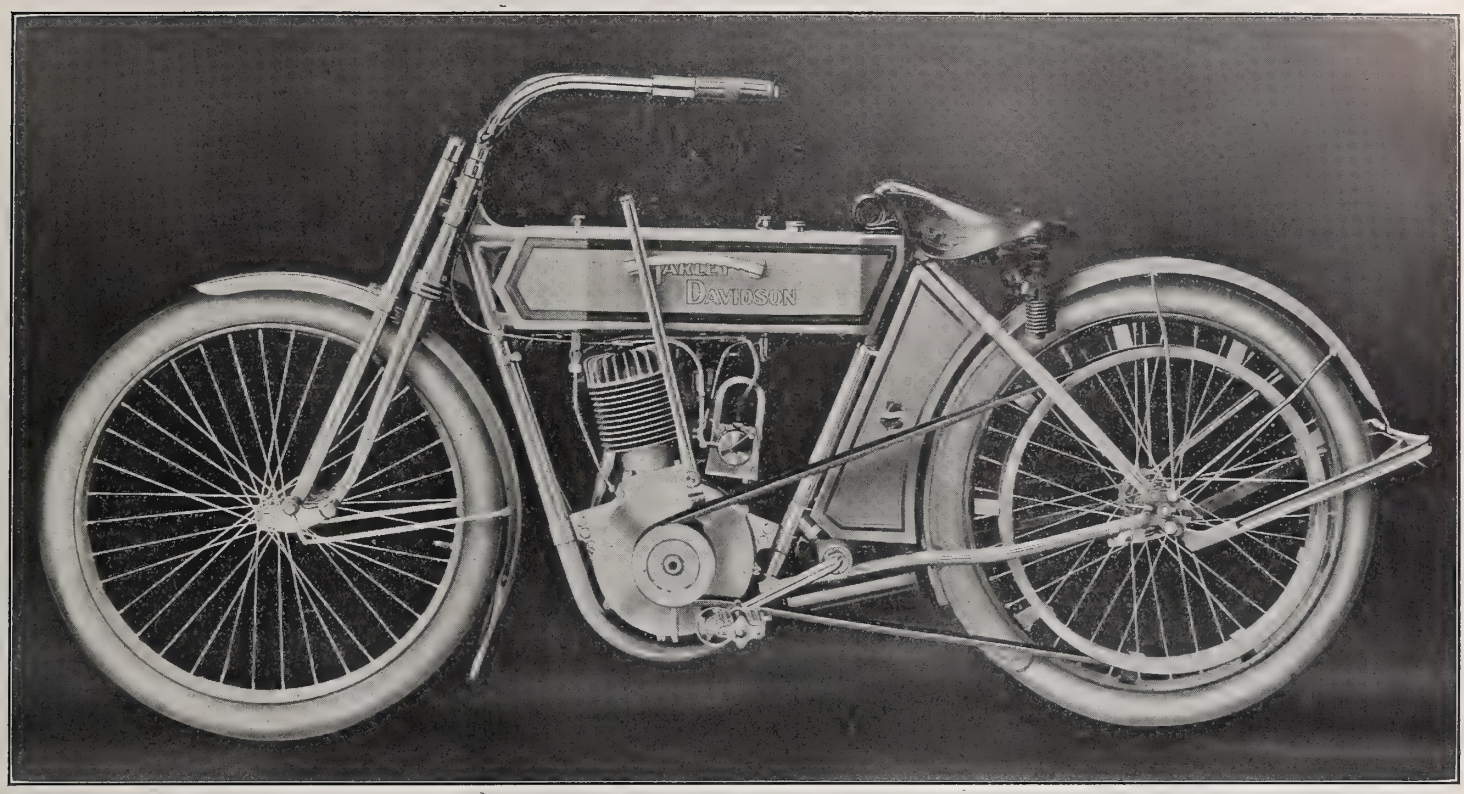


Indian single cylinder, 4 h. p., chain drive with free engine clutch; cradle spring fork; mechanical valves; mechanical and hand oil pumps; automatic multiple jet carbureter; magneto standard; battery $25 less; V band brake; two-speed $50 extra; 53 in. wheelbase, standard; 55 in. on two-speed model; also made with 2¾ h. p. motor in same running gear. Price, 4 h. p., $250; 2¾ h. p., $200, battery; $225, magneto.

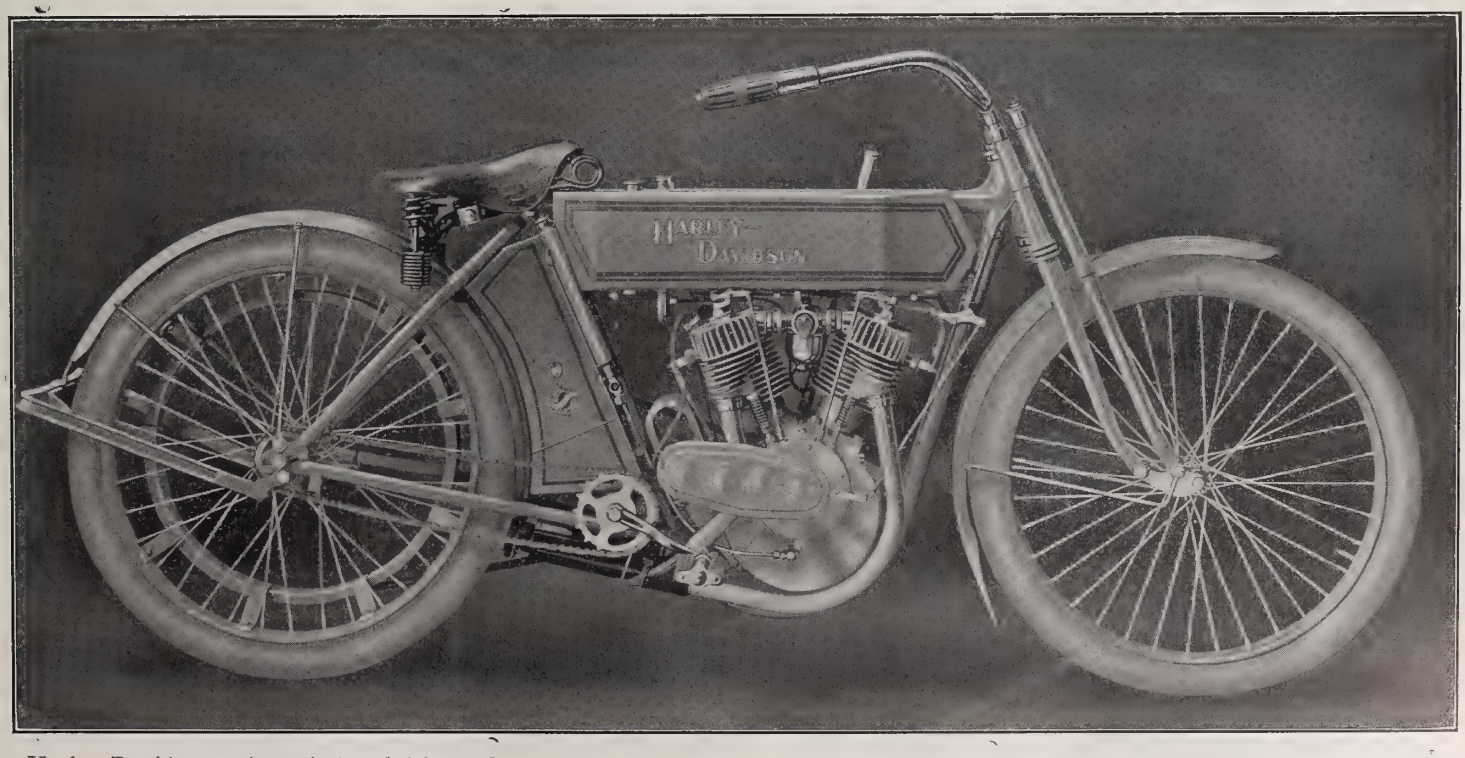


Indian twin cylinder, 5 h. p., chain drive with free engine clutch; magneto only; oil window in motor base; separate fuel tanks; beaded guards; folding stand; 28 in. wheels, 2½ in. tires; 53 in. wheelbase; internal girder in frame and fork; mechanical and hand oil pumps; folding stand; double clinch rims; gasoline capacity 2 gals.; oil, ½ gal.; general specifications same on all models. Price, $275.

INDIAN—Hendee Mfg. Co., Springfield, Mass.

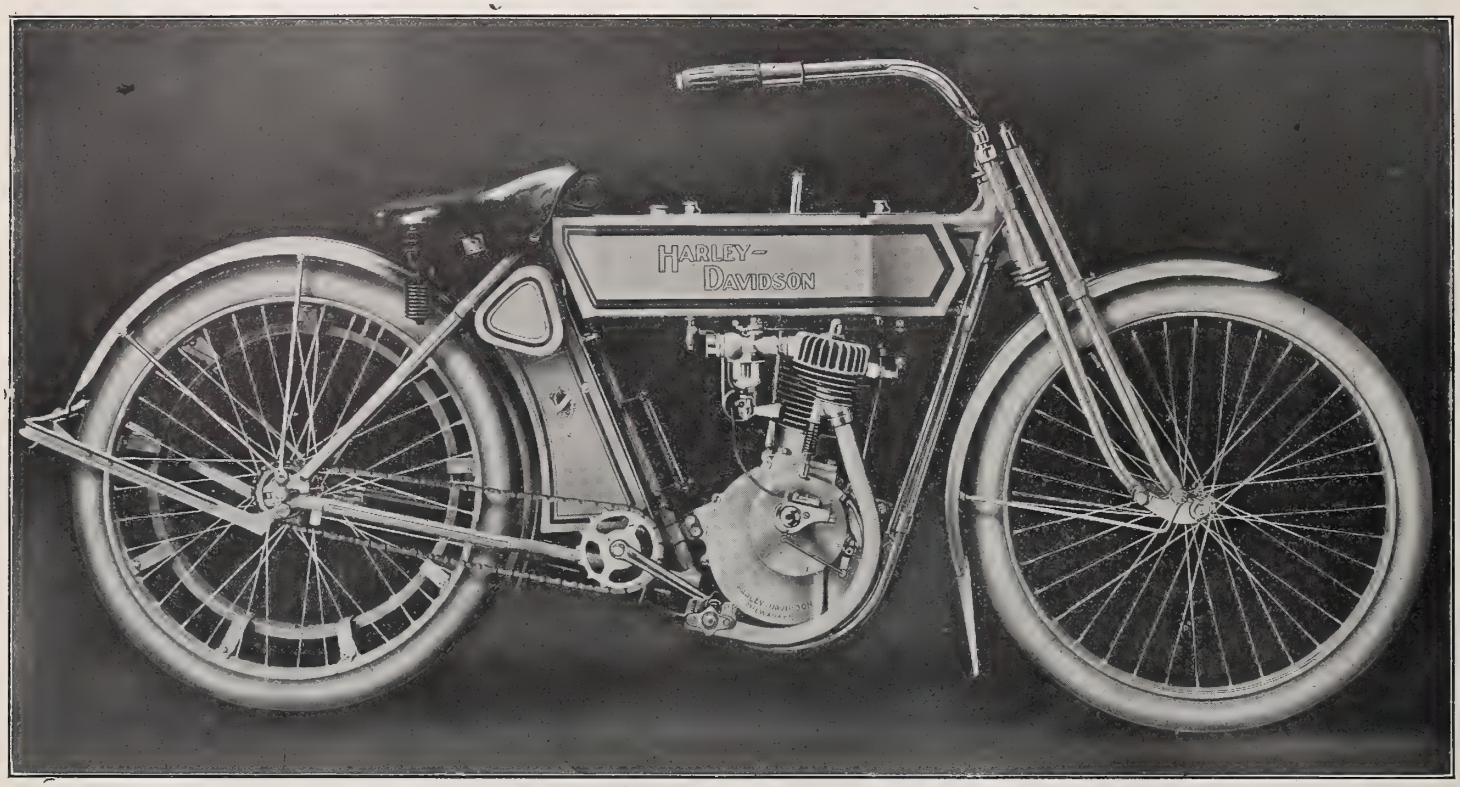


Indian twin cylinder, 7 h. p., chain drive with free engine clutch; magneto only; two-speed gear, $50 extra; 53 in. wheelbase standard; 55 in. with two-speed; racing bars, $5 extra all models; footboards in lieu of pedals on two-speed model; long U bars; double grip motor control; folding rear stand; short driving chain enclosed; mechanical valves; mechanical and hand oil pumps; multiple jet carbureter. Price, $300.

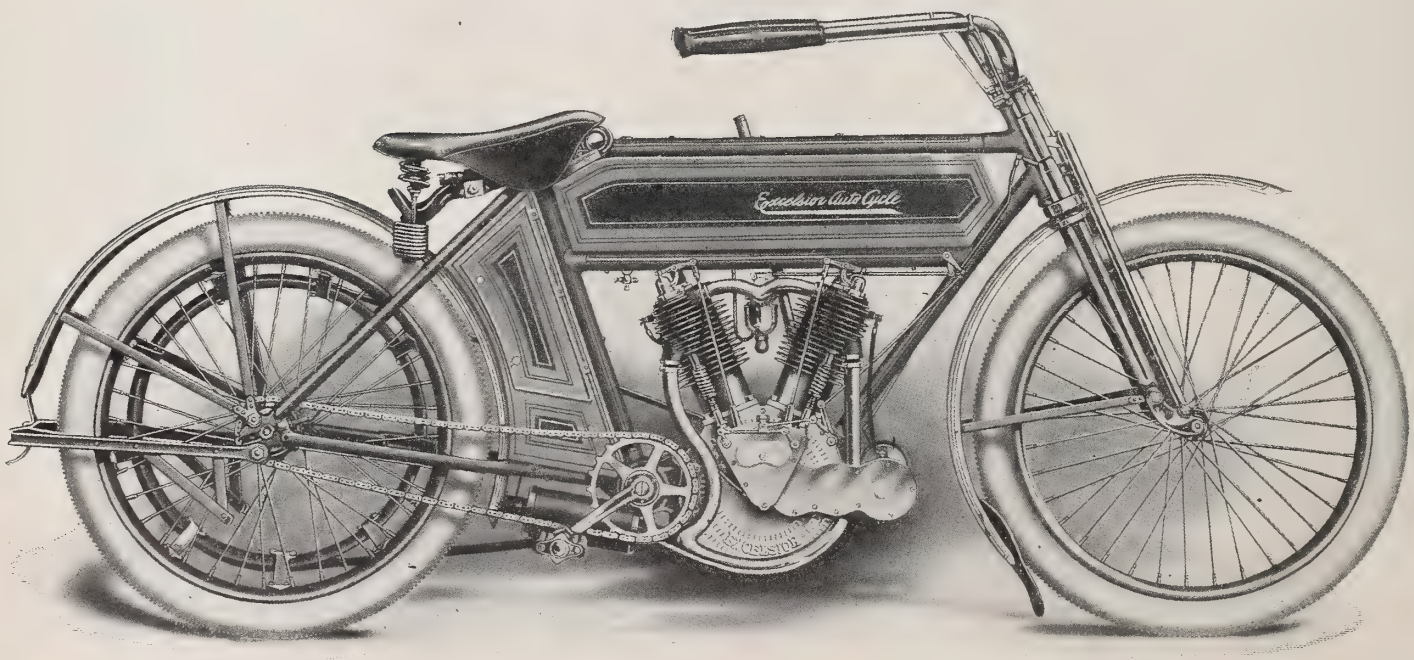


Indian single cylinder, 4 h. p., flat belt drive with free engine clutch; magneto standard, battery $25 less; clutch contained and enclosed in driving pulley; separate clutch and belt tension control giving real free engine; rear belt splasher; independent chain and and belt adjustment; belt pulleys faced with friction fabric; clutch adjustable without disturbing pulley; 53 in. wheelbase. Price, $250.

HARLEY-DAVIDSON—Harley-Davidson Motor Co., Milwaukee, Wis.

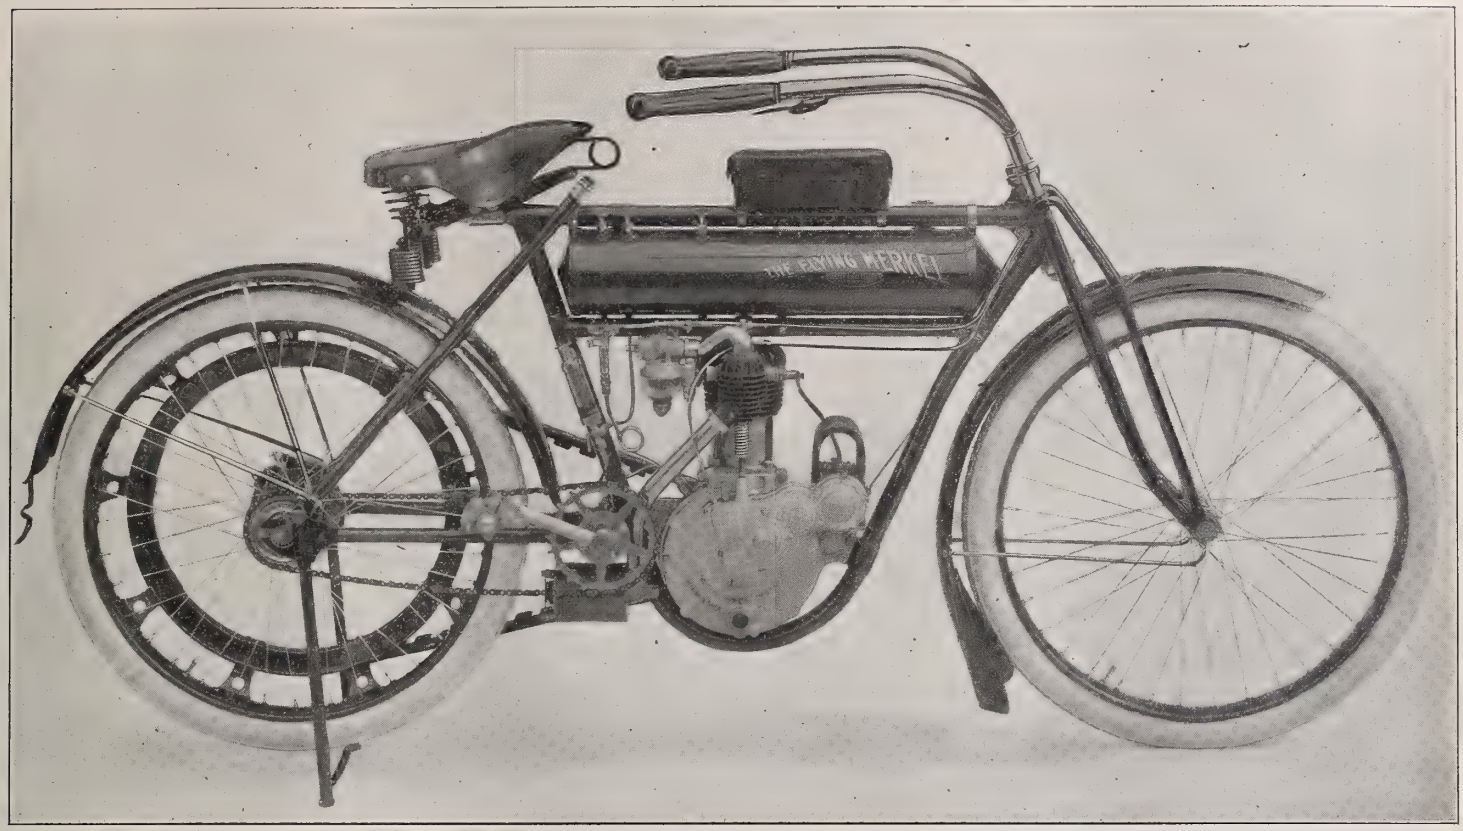


Harley-Davidson single cylinder, 4 h. p., flat belt drive with free engine effect through idler manipulation; magneto; one piece cylinder and head; automatic inlet valve; adjustable drip feed lubrication; loop frame strengthened at vital points; double plunger spring forks; double-stem bars; individual unit tanks of large capacity; double grip control; ratchet belt idler; rear belt protection shield; folding stand. Price, $250.



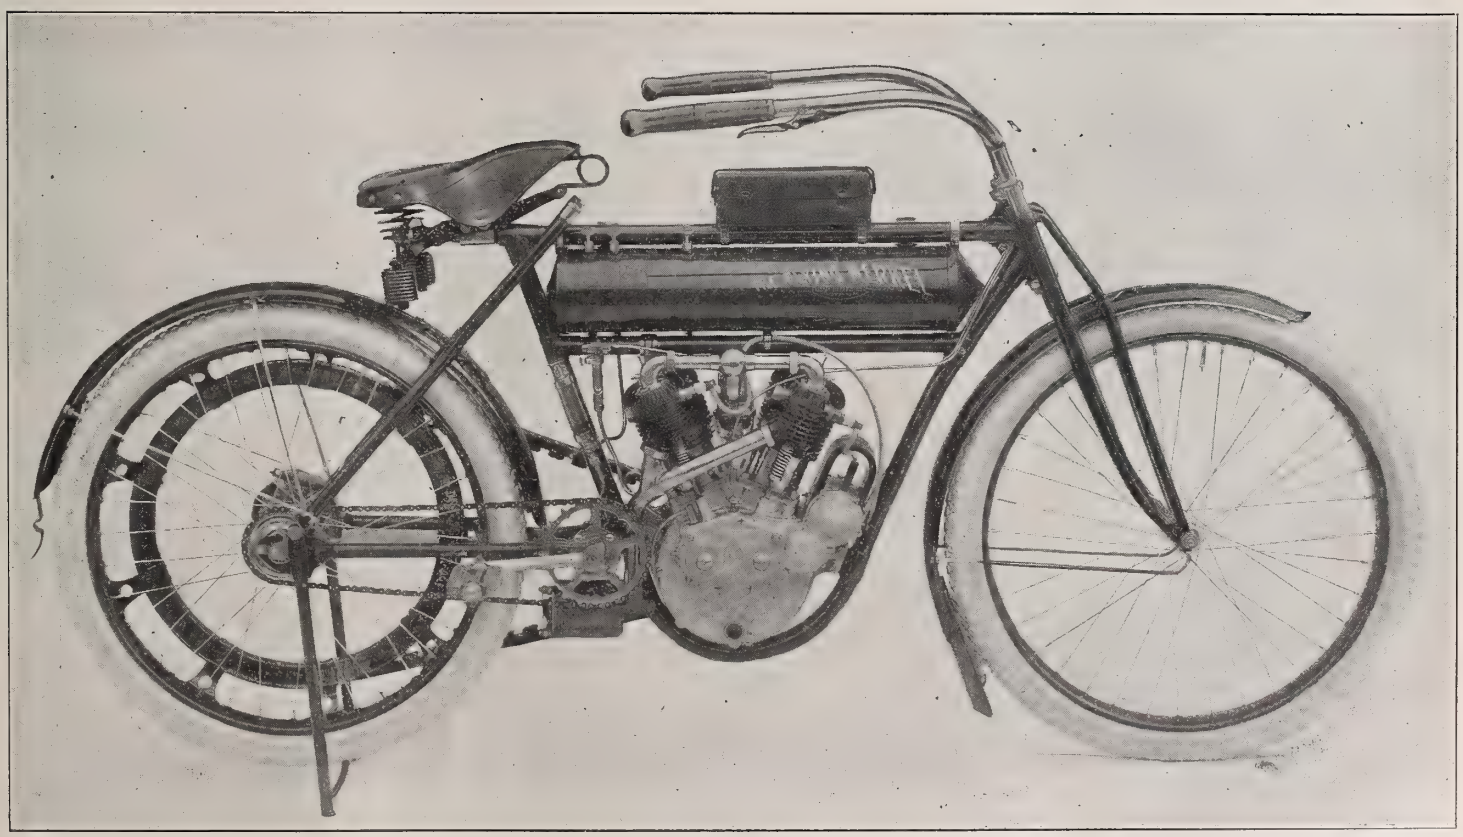
Harley-Davidson twin cylinder, 6½ h. p., flat belt drive with free engine effect through idler control; magneto only; mechanical valves; adjustable drip feed lubrication; large metal tool case with lock; 28 in. wheels; 2½ in. tires; 56½ in. wheelbase; protected magneto position; gasoline capacity, 2½ gals.; oil, 1 gal. Price, $300.

HARLEY-DAVIDSON—Harley-Davidson Motor Co., Milwaukee, Wis.



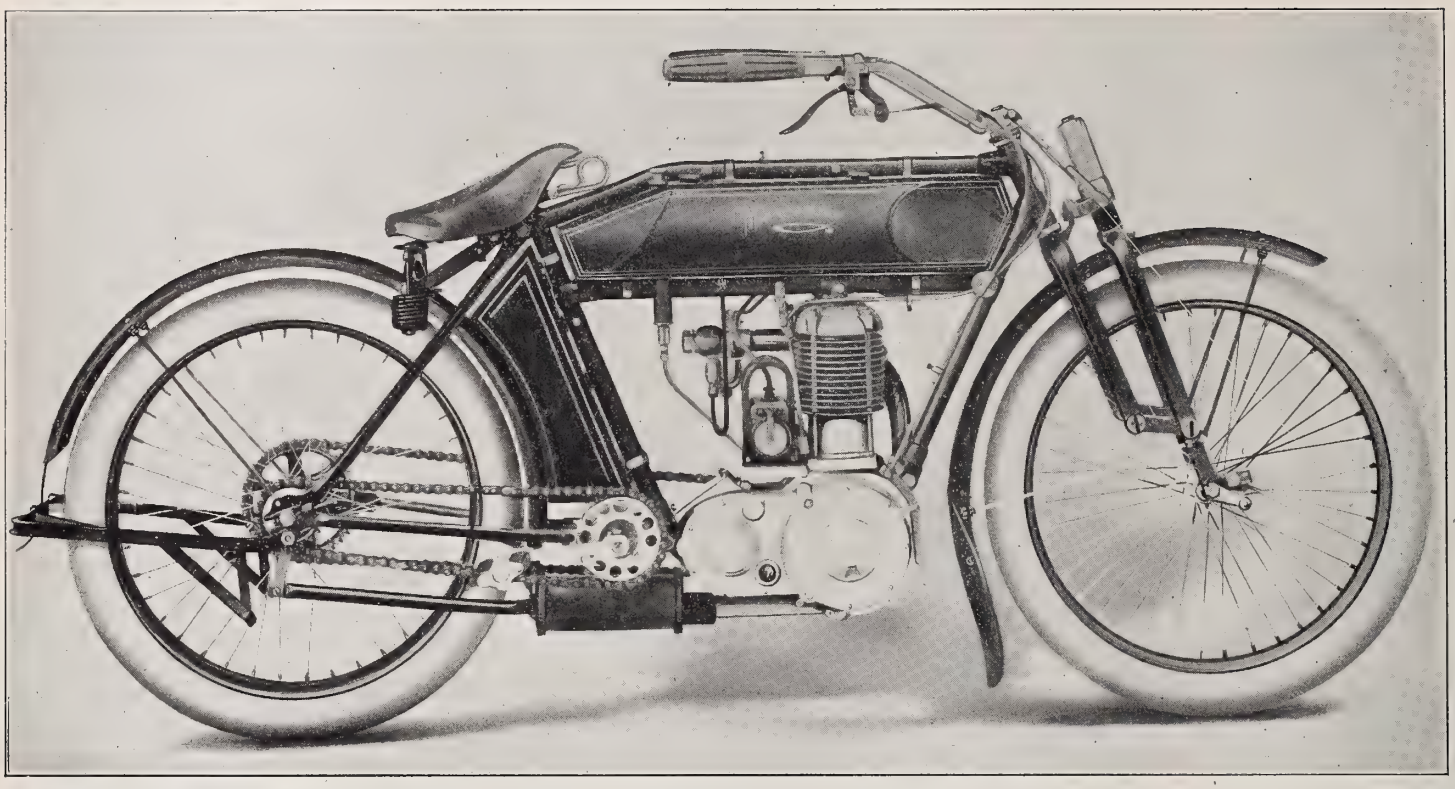
Harley-Davidson single cylinder, 4 h. p., flat belt drive with idler giving free engine effect; battery ignition; similar in other respects to magneto single. Price, $225.

EXCELSIOR—Excelsior Supply Co., Chicago, Ill.

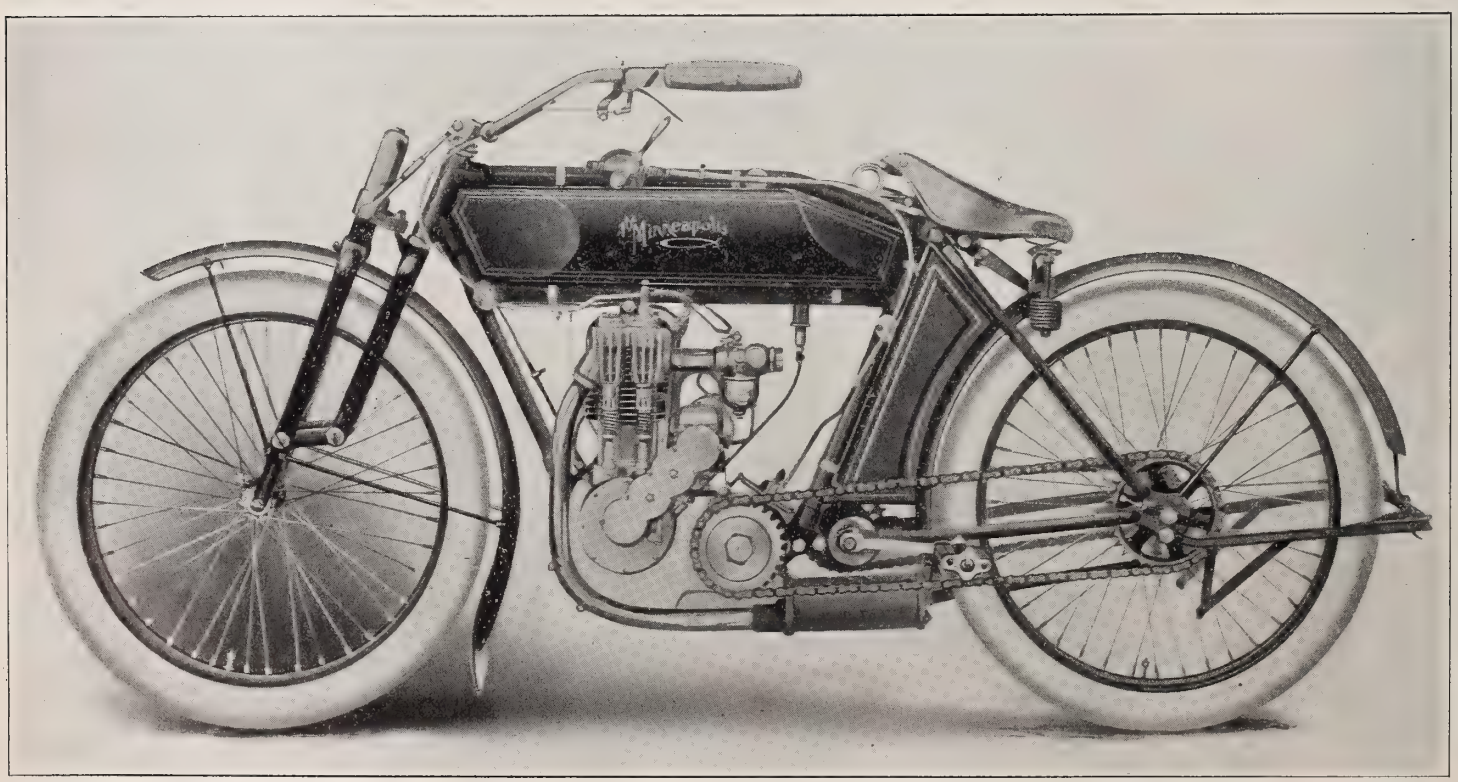


Excelsior twin cylinder, 6 h. p., flat belt drive with free engine effect through idler; double plunger spring forks; double-stem handle bars; one piece cylinder and head; mechanical valves; adjustable sight drip feed oiling; magneto only; combination fuel tank; large metal tool compartment; double grip control; air cooled coaster brake; saddle straddles top tube, which is dropped. Price, $310. Excelsior 4 h. p., single cylinder, $225, battery; $250, magneto.

MERKEL—Merkel-Light Motor Co., Pottstown, Pa.

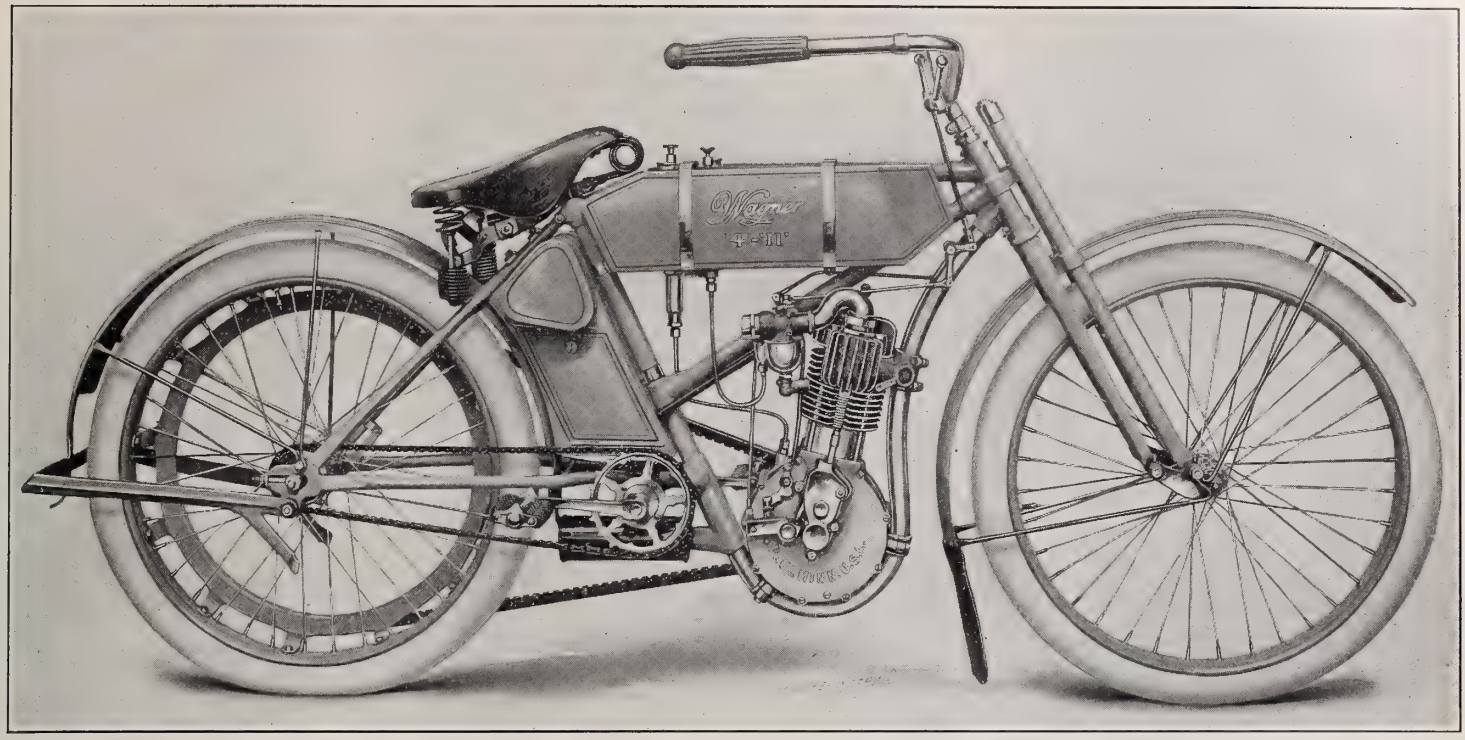


Merkel single cylinder, 4 h. p., V belt drive; spring frame; spring forks; ball bearing motor; cylinder and head integral; gravity oil flow in proportion to speed, interconnected with throttle; automatic carbureter; adjustable driving pulley; magneto only, rigid bars; seamless brass tank; needle valve fuel shut-off; automatic inlet valve; enclosed band brake; 28 in. wheels, 2½ in. tires; 53 in. wheelbase. Price, $250.

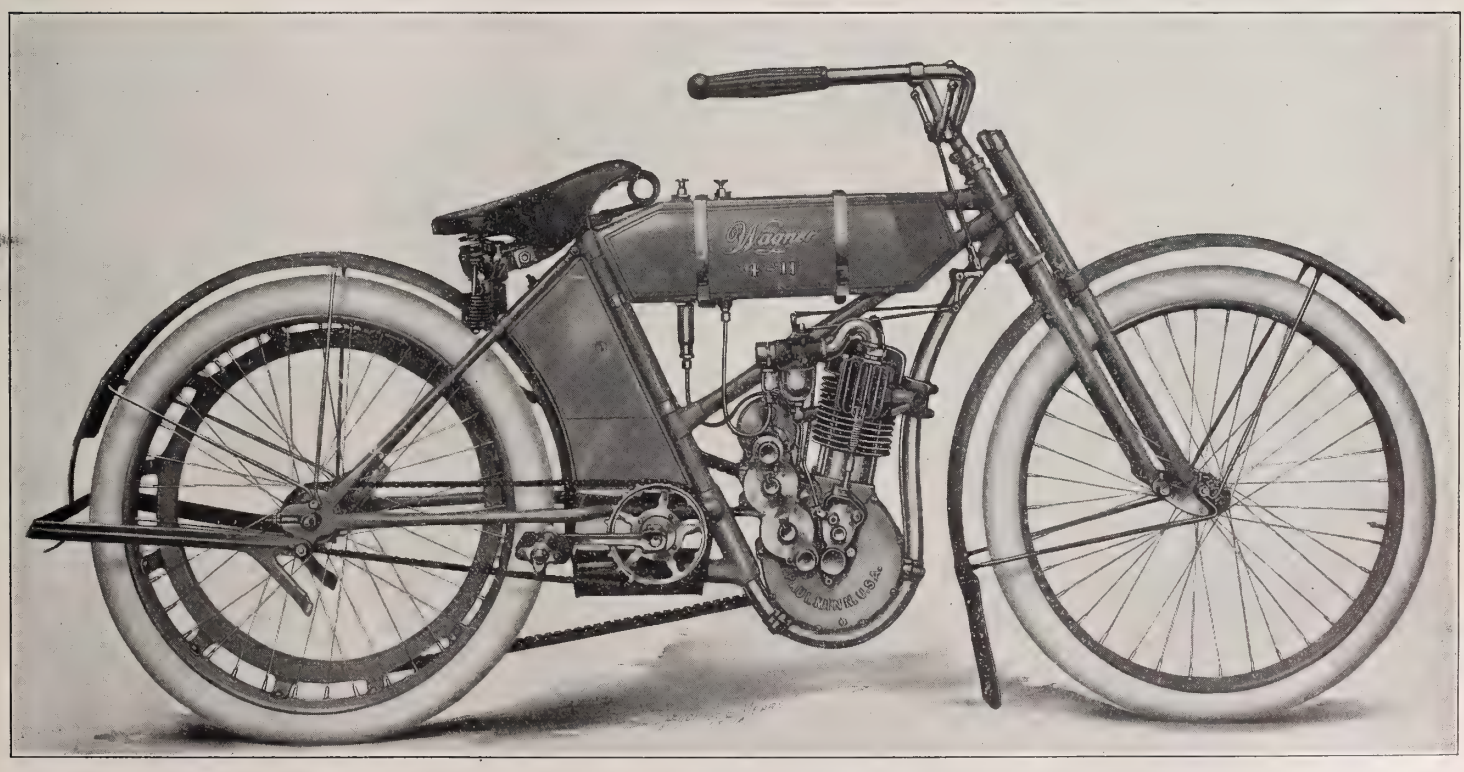


Merkel twin cylinder, 6 h. p., V belt drive; magneto only; double grip control; general specifications same throughout line. Price, $300. Also 7 h. p. twin, same in all other respects save size of cylinders; price, $325. Extra on all models: free engine clutch, $15; two-speed gear, $40; luggage carrier, $5.

MINNEAPOLIS—Minneapolis Motorcycle Co., Minneapolis, Minn.

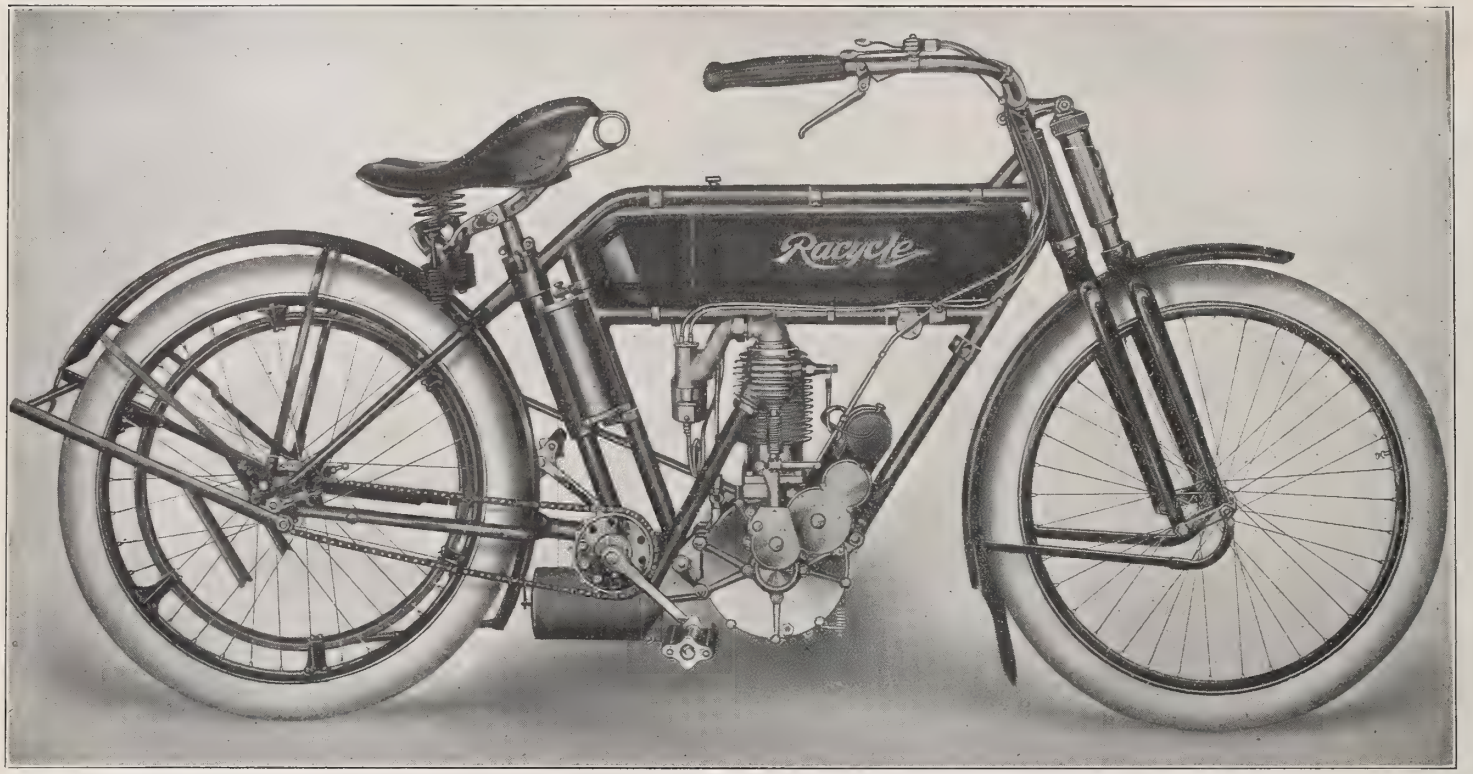


Minneapolis single cylinder, 5 h. p., with free engine clutch and single chain drive; undergeared motor; mechanical valves; magneto only; cylinder and head integral; undergearing and disk clutch carried on ball bearings, as unit power plant with motor in enclosed housing extension of crankcase; 26 in. wheels; 2½ in. tires; 54 in. wheelbase; muffler tail pipe; grip and handlebar control. Price, $265.

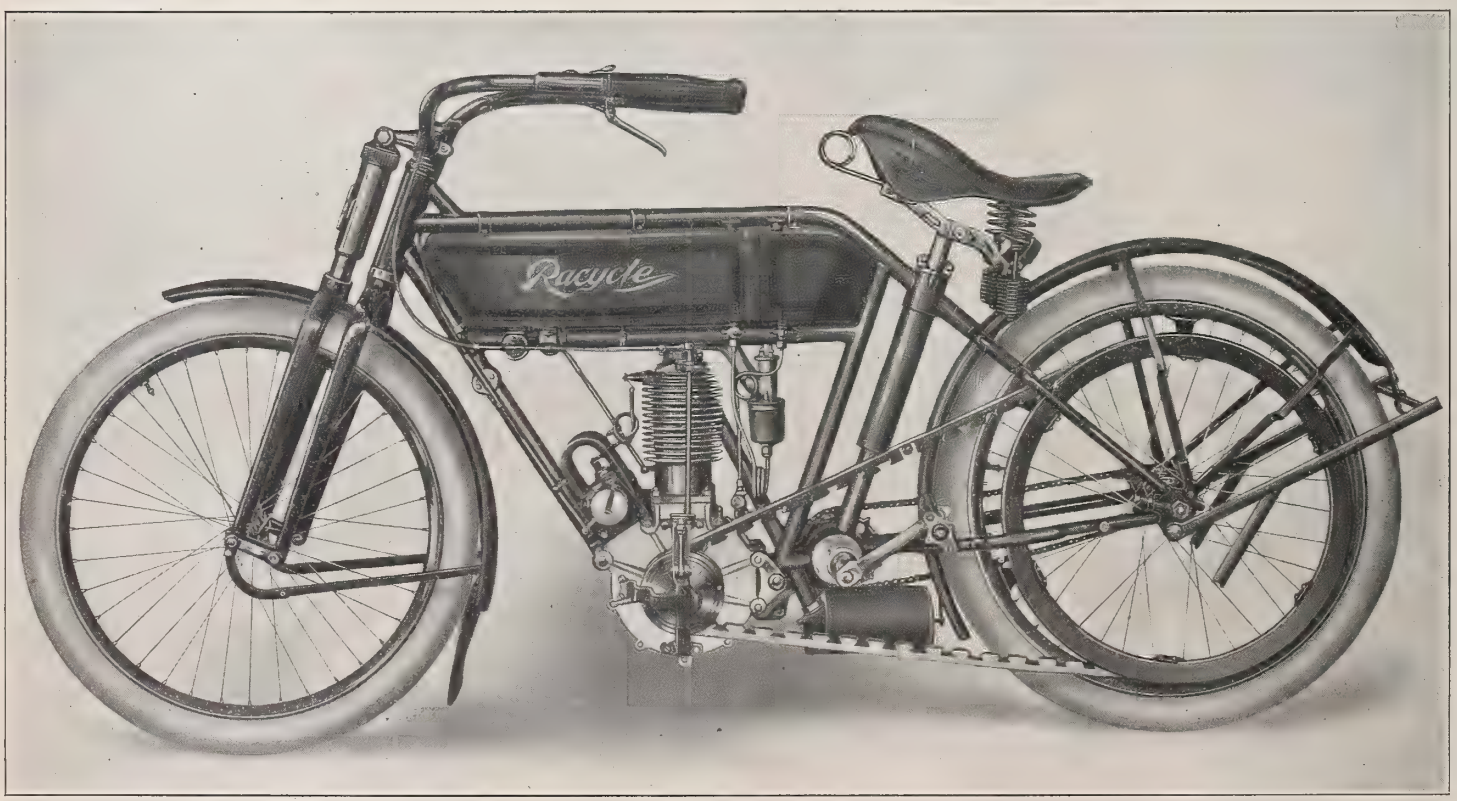


Minneapolis single cylinder, 5 h. p., chain drive with free engine clutch and two-speed gear; unit power plant consisting of motor, clutch and transmission in one housing; magneto only; mechanical valves; undergeared motor; single chain drive; 26 in. wheels; 2½ in. tires; 54 in. wheelbase; grip control; frame sector gear shift; both machines similar as to running gear. Price, $300.

WAGNER—Wagner Motorcycle Co., St. Paul, Minn.

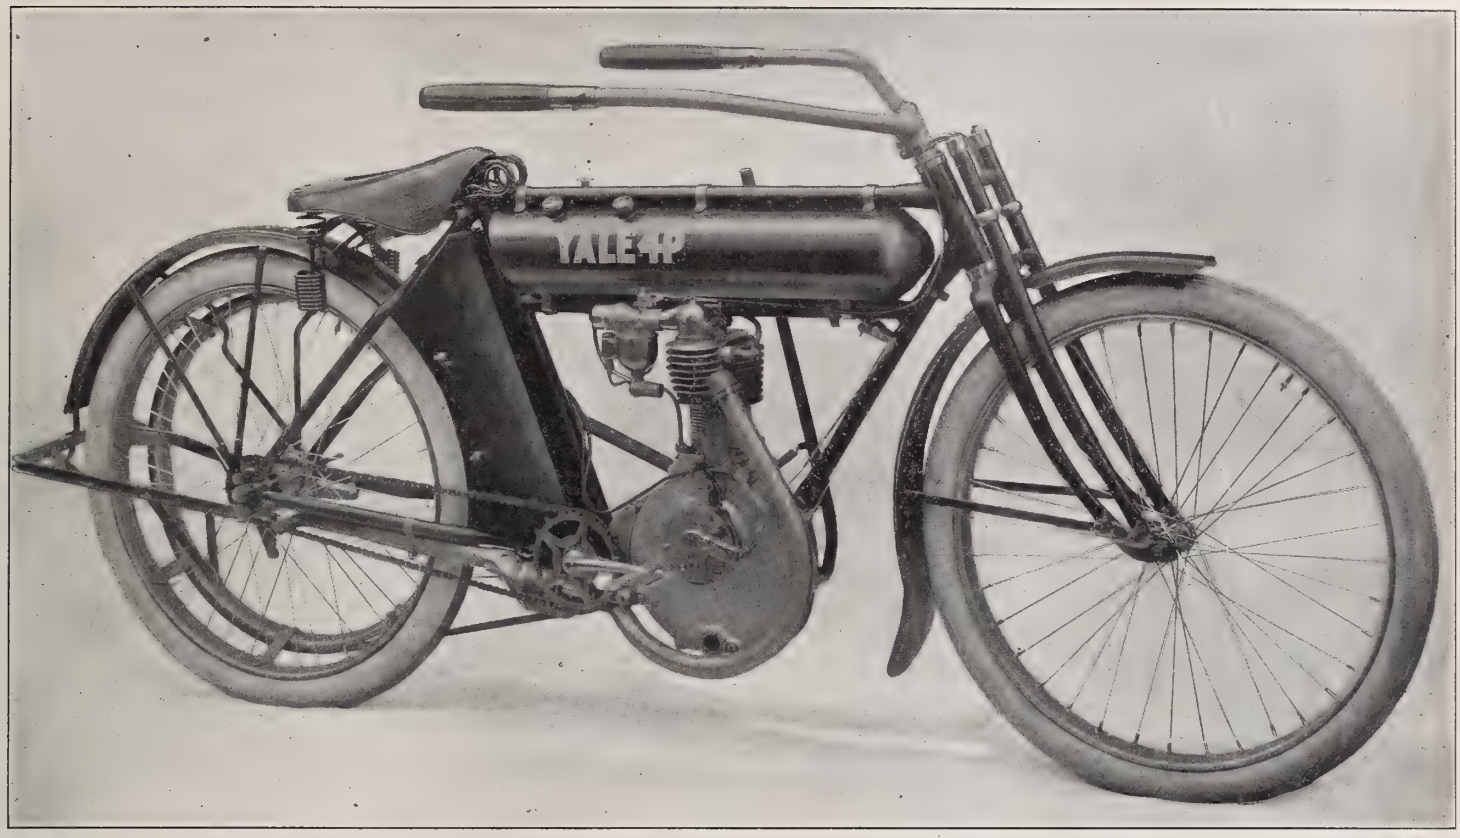


Wagner single cylinder, 4 h. p., with V belt; diamond loop frame with exhaust expansion chamber in frame tube loop; twin plunger forks; Schebler carbureter; hand pump oiler, standard; automatic drip feed at extra cost; 28 in. wheels; 2½ in. tires; 55½ in. wheelbase; cylinder and head separate; automatic inlet valve; double grip motor control; separate battery case, and metal tool box with lock. Price, $210.

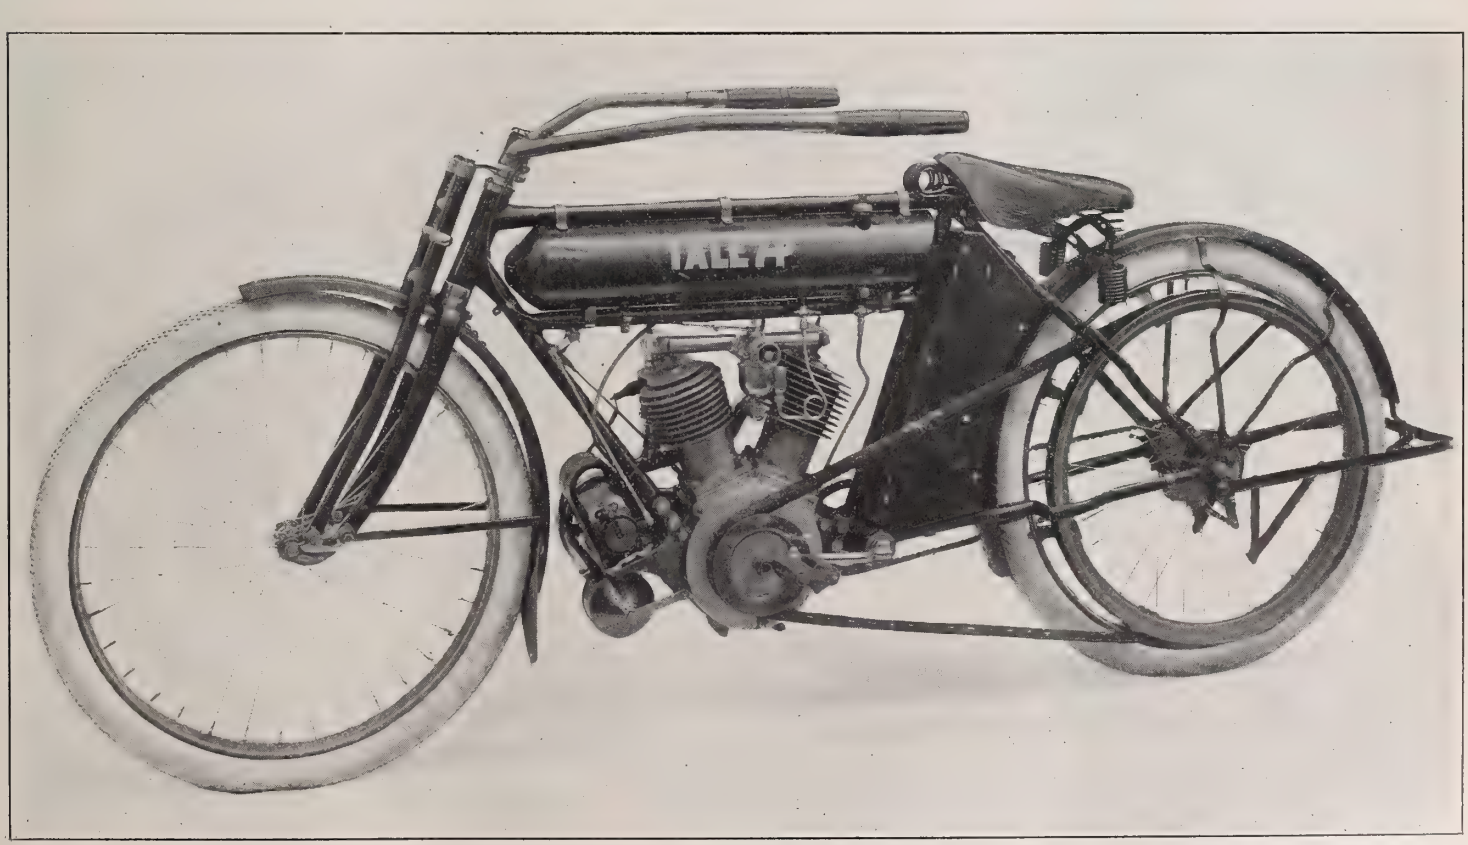


Wagner single cylinder, 4 h. p., with V belt and magneto ignition; in other respects similar to battery model; price, $235; battery model furnished with imported carbureter for $15 extra. There also is a 3½ h. p., Tourist model, which is similar to the 4 h. p. model save in engine dimensions. This model is built especially to take a two-speed gear, which is furnished for $50 extra.

RACYCLE—Miami Cycle & Mfg. Co., Middletown, O.

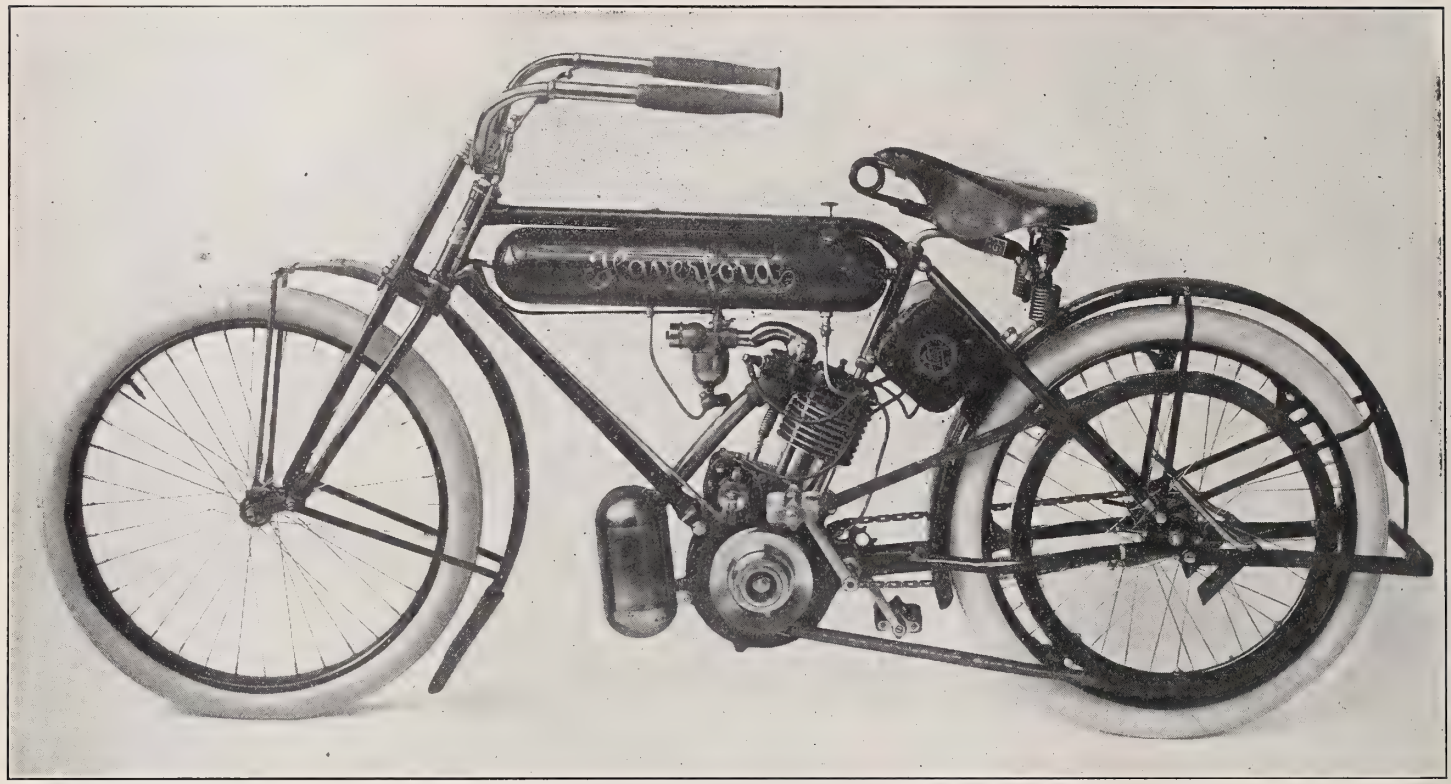


Racycle single cylinder, 4 h. p., flat belt drive with idler giving free engine effect; battery ignition interchangeable with magneto using same gears; cartridge spring fork; spring seat post, roller bearing; ball bearing motor; automatic inlet valve; one piece cylinder and head; imported carbureter; sight drip feed oiling; 28 in. wheels; 2½ in tires; 56 in. wheel base; double grip control; magneto, $25 extra. Price $225.

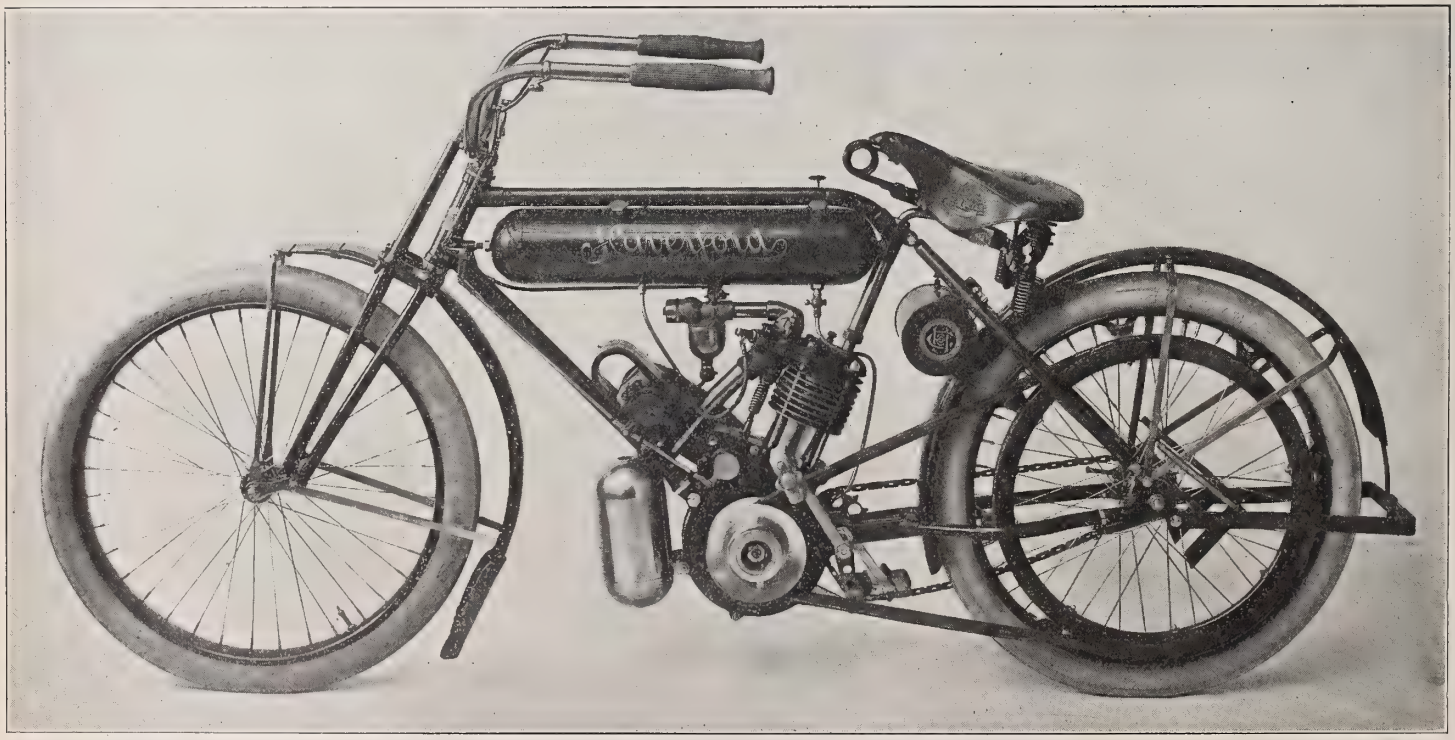


Racycle single cylinder, 4 h. p., with V belt and free engine clutch; magneto; individual tanks; capacity, 2 gals. gasoline, ½ gal. oil; folding rear stand; eccentric adjustment of crank hanger; general specifications same as other model with exception of belt and ignition. Price, $262.50; with battery, $25 less.

YALE—Consolidated Mfg. Co., Toledo, O.

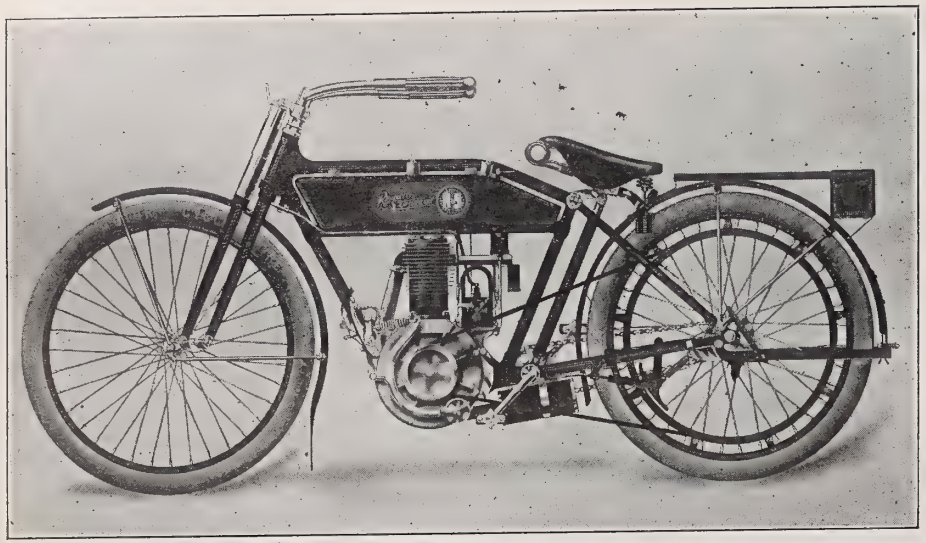


Yale single cylinder, 4 h. p., flat belt with idler, giving partial free engine effect; duplex spring forks; one piece cylinder and head; cylinder offset; automatic inlet valves; large fly wheels; oil window in motor base; Schebler carbureter; battery, standard; magneto, $35 extra; hand pump oiling; coaster brake; double compartment tank; long V bars; double grip control; large metal tool box; V belt optional. Price, $200.

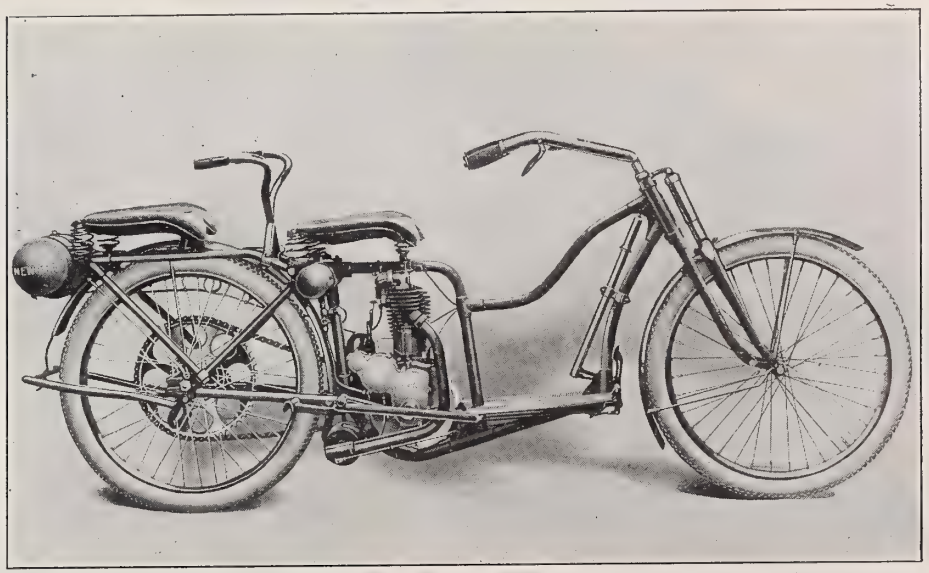


Yale twin cylinder, 7 h. p., flat belt with idler, giving free engine effect; V belt optional; magneto standard; band brake; wheelbase, 56 in.; other specifications same as single. Price, $300; free engine clutch on either model, $15 extra.

HAVERFORD—Haverford Cycle Co., Philadelphia, Pa.

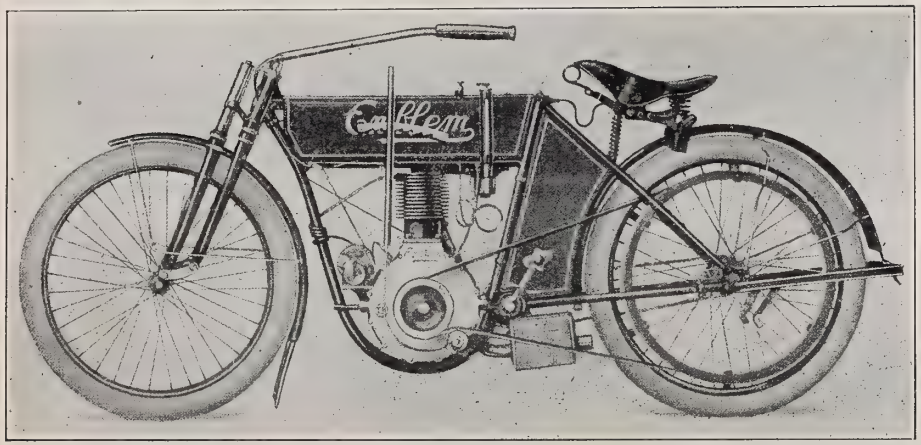


Haverford single cylinder, 4 h. p., V belt drive; leaf spring fork; cylinder and head separate; automatic inlet valve; triple expansion muffler; hand pump oiler, double grip control; combination fuel tank with separate compartments holding 5 quarts of gasoline and 1 quart of oil, respectively; battery ignition; 26 in. wheels; 54 in. wheelbase; wide guards with rear one detachable; automatic folding stand. Price, $150.



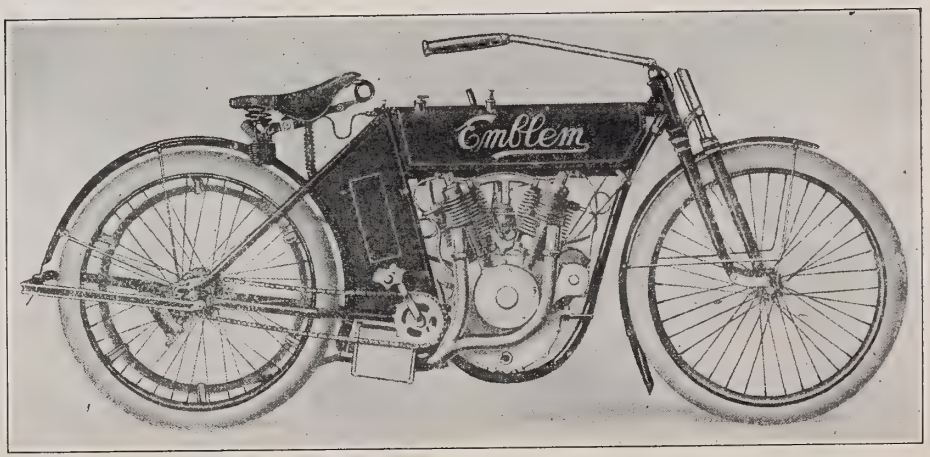
Haverford single cylinder, 4 h. p., with V belt drive and magneto ignition; similar to battery model in other general specifications and includes drop frame, giving low position; priming valve and cup for easy starting in cold weather; needle gasoline shut-off valve in tank; filler caps chained to prevent losing; metal tool case; coaster brake; sliding hanger adjustment and adjustable pulley. Price. $185.

R-S—Reading Standard Co., Reading, Pa.



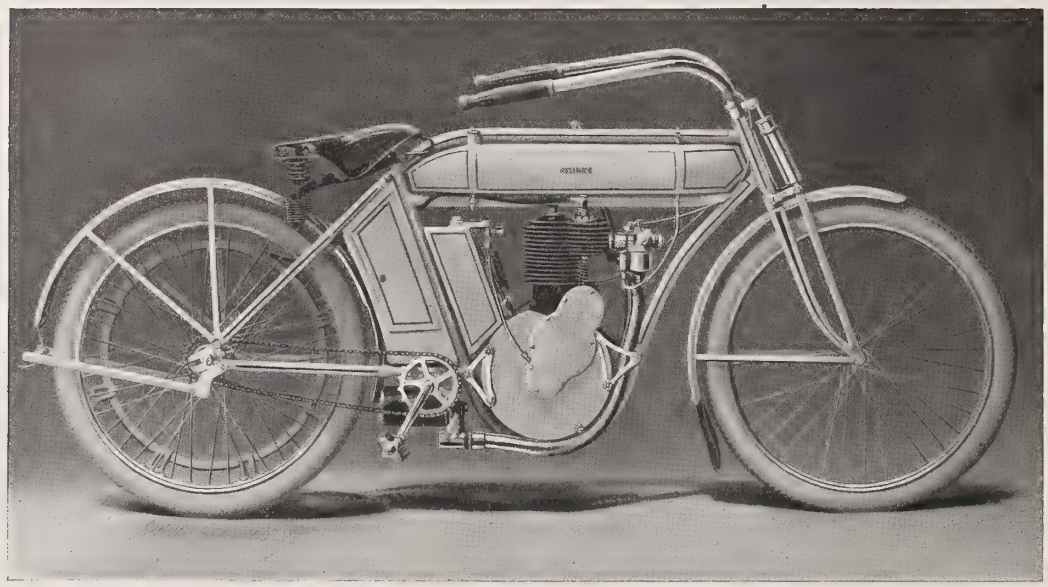
R-S single cylinder, 4 h. p., flat belt drive with foot operated ratchet idler giving a free engine effect; camelback drop frame with auxiliary spring seat post; cartridge spring fork; interchangeable mechanical valves; automatic carbureter; magneto standard; ball bearing crankshaft; two brakes; 28 in. wheels; 2½ in. tires; 55 in. wheelbase; automatic stand; gravity feed oil cup. Price, $250.

NEW ERA—New Era Auto-Cycle Co., Dayton, O.

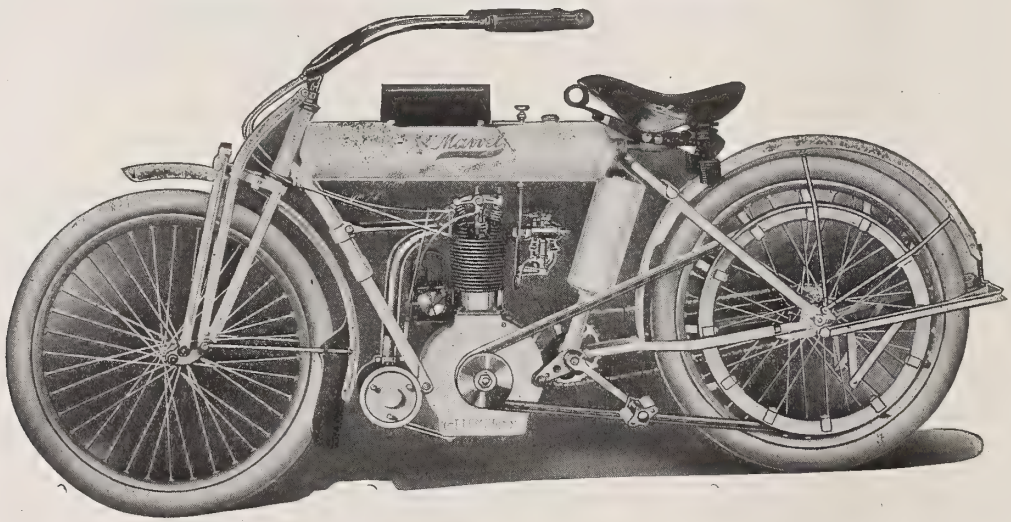


New Era single cylinder, 4 h. p., chain drive with tandem attachment; free engine clutch; two speed; roller bearings in rear wheel; 62 in. wheelbase; foot pedal control; hand starting with crank; magneto. Price, $300; same model with battery, $275; 6 h. p. model with magneto, but similar in general specifications, $325.

EMBLEM—Emblem Mfg. Co., Angola, Erie Co., N. Y.

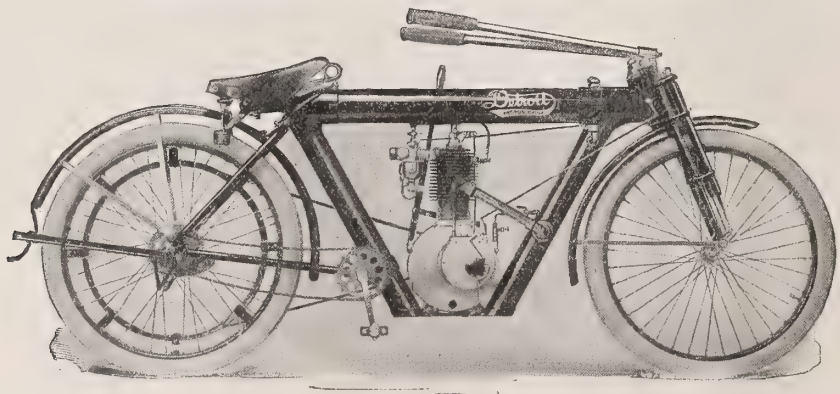


Emblem 7 h. p., twin with magneto, and 4 h. p. single with battery. Emblems are made in 15 models, with three sizes of engines, 4 and 5 h. p. singles and 7 h. p. twins. In general the entire line is closely related, the features of any model being interchangeable with the others. Any of the motors are interchangeable in any frame, as also are the ignition systems. The frame has an internal triangular reinforcement. The forks are of the plunger type. In the motor the crankshaft is mounted on ball bearings and automatic inlet valves



are used throughout; oiling is by hand pump; on the singles, battery ignition is standard and a magneto is $25 extra. On the twin, magneto is standard; on the singles V belt is standard, with flat belt and idler $10 extra, and a free engine pulley, $15 extra. The same extras apply on the twin. The price range is from $200 to $300, the 4 h. p. single shown listing at $210, and the 7 h. p. twin at $285. Racing models containing any of the three sizes of engine also are built, and come with either chain or belt drive.

RELIANCE—Reliance Motorcycle Co., Owego, Tioga Co., N. Y.



Reliance single cylinder, 4 h. p., with flat belt and idler giving free engine effect; offset crank shaft; mechanical valves; trussed spring fork; double grip control; automatic carbureter; pressure lubrication with hand pump; battery standard; magneto, $35 extra; 57 in. wheelbase. Price, $240.

MARVEL—Marvel Motorcycle Co., Hammondsport, N. Y.

Marvel single cylinder, 4½ h. p., with V belt; roller bearing crank shaft; offset cylinder; overhead mechanical valves; tank-in-the-tube frame; truss spring fork; 28 in. wheels; 2½ in. tires; 56 in. wheelbase; float oil feed; magneto only. Price, $225; free engine pulley, $17 extra; two-speed gear, $35 extra.

DETROIT—Detroit Motorcycle Co., Detroit, Mich.

Detroit single cylinder, 4 h. p., with flat belt and idler, giving free engine effect; tank-in-the-tube frame; castor spring fork; mechanical inlet valve; V bars; band brakes; 60 in. wheel base. Price, battery, $225; magneto, $250.

TO MOTORCYCLE THROUGH EUROPE

Bushnell Did It Before, and Is to Guide a Party—What the Jaunt Promises to Participants.

Still filled with enthusiasm over previous motorcycling experiences in Europe and desiring to repeat them in company with an agreeable group of Americans, P. N. Bushnell, of Aberdeen, S. D., is offering motorcyclists the opportunity of joining a touring party that he is organizing and which looks good enough to make many a motorcyclist leave home. In telling about what fun he has had in traveling Europe on a motorcycle and about how he was changed from a motorcycle hater to a motorcycle "bug" in two brief days, Bushnell also reveals some of the choice things he has in store for his companions when they reach the other side. He says:

"I expect to sail about June 1 for Hamburg or Bremen and take seven weeks to see parts of Germany, Switzerland and Holland, cross the Channel to England and have five weeks in the British Isles. I made a tour of Europe in 1908 and have had over 18 months of touring altogether of Europe, so I can tell just what can be seen on a motorcycle. I would not travel any other way over there, if I could possibly get a two-wheeler to travel on. There is no other way that will equal it for pleasure and expense is very slight.

"I am organizing a small and select party to go along. It will consist of both ladies and gentlemen, and we are going to take it easy and see all there is to be seen, and I shall be glad to hear from anyone interested in taking such a trip and to give details to anyone who might care to join us. My experience in touring there will enable me to take a party over at a less cost than they could accomplish by themselves, in addition to my knowing something of the customs of the different countries, speaking the language and being able to point out spots of interest little known to the ordinary tourist, which would otherwise be passed by.

"No one who has not been there can imagine the pleasure of a motorcycle trip through Europe. Just a glance through the various places will be enough, however, to make them want to go. Think of Berlin with its many miles of asphalt streets, beautiful parks and buildings; the palaces at Potsdam, the quaint and beautiful Spreewald; Wittenberg, the home of Martin Luther; the art galleries of Dresden; the scenery and customs of the Tyrol; Munich; think of traversing the famous Black Forest on the faithful "tub"; Heidelberg, the city of learning and student duels; the storied banks of the Rhine (the roads are elegant); Holland, with its canals, brick-paved roads, windmills and quaint costumes; England, the country of sand-papered roads, where every lane is a boulevard. Isn't it enough to make a centenarian want to go along? Anyone who could not enjoy himself on a trip like that doesn't deserve to have any pleasure. It is an experience that cannot be had in any other way. I visited places where the inhabitants did not know what a tourist looked like—places where the dogs bark at strangers. Places where you meet the real people of the country, plain, unvarnished, hospitable and intensely interesting. Places that are often not even mentioned on the railroad maps. Little wayside inns, where you are treated as one of the family. Can you blame a man for throwing off the cares of business and chasing off to partake? There will be no two answers to that question if you have ever been there.

"Laying aside all flowery eloquence, it will be a trip well ahead of anything I know of, and I have traveled about as much as most people, both here and abroad. It is cheaper by far than the same trip would be on this side and more interesting, owing to the entirely different customs, languages and scenery. To come anywhere near it in America would mean that a man would have to travel from coast to coast and from Canada to Mexico. And, by the way, I plan on coming back by way of Montreal, Niagara and the Great Lakes. This trip is no doubt familiar to many and they know what it is without my telling them.

"I will try and get the tour doped out so as to take in the two big endurance runs of England and Scotland. If I can possibly arrange it, this will be done, which will add a great deal to the novelty and interest of the trip.

"It might interest some folks to know how I came to join the ranks of the enthusiastic motorcyclists. I had always thought of the motorcycle as a joke, a pretty poor excuse for a bad attack of tinkeritis, and a very unenjoyable method of travel when a bicycle could be procured. I was, in other words, very much prejudiced against a motor-driven bicycle, but an enthusiastic person when it came to pedaling my head off on a regular. In 1908 I was in Europe, touring by train. My cousin, Will Stout, of St. Paul, who was on the staff of the Dispatch, was to take a trip through northwestern Europe and British Isles by motorcycle, in the interest of the paper. He needed a man as photographer, and, knowing that I had done something in that line, he tried to get me to take the job. I laughed at him—told him that a bicycle was good enough for me and all that rot about the engine being so heavy that it was too hard pedaling, etc. Finally he got me to try it out for only two days.

'Nuff said!

It did not take even the first day to convince me of all I had been missing. Now I could not do without a motorcycle. It beats the automobile six ways for Sunday. I have a car, and a good one, but it has not been out of the garage in two months. Couldn't keep me away from my motorcycle that long with a club. The funny part of it is that the more you ride the more you want to ride. I almost have to leave it alone during the busy season or I would have no time for business."

Sums Up the Case for the Motorcycle.

Crisp, pointed and epigrammatic picturing of the allurements and merits of the motorcycle is happily presented as the last page in the literature describing Reliance motorcycles, and so striking, imaginative and at the same time logical is the summing up, that it is worth reproduction. Its language is:

"The one dominant idea in man's progress has been his desire to annihilate space—to cover great distances quickly.

"This is not mere speed madness. It is a natural wish to master conditions—to save time and energy—to do more—to see more—to crowd more into life and to break the fetters that bind him to one spot.

"It took our grandfathers all day to travel 30 miles. Then came the power machines—the locomotive, the trolley, the motor car, the aeroplane the motorcycle.

"Of all these means of travel for covering distances easily and quickly, the handiest, the most pliable, the most individual, the least expensive is the motorcycle.

"The first cost is about the same as for a good horse. The power costs less than a horse's feed. There is practically no care nor stabling. The motorcycle does not eat its head off when idle.

"With a good motorcycle you can go further in an hour than a horse will take you in a whole day. City, town or country, the motorcycle is at home everywhere. It is equally adapted for business or pleasure.

"It is used in telegraphic messenger service, in the special mail service, in the rural free delivery service. It is used by the mounted police and in the armies of the great powers.

"It carries the city men to the country or to the golf links.

"On the farm it solves the problem of doing the odd errands to town quickly and cheaply without taking a horse from the day's work.

"It carries the mechanic to his job, the foreman or factory hand to his work.

"It permits the man employed in the city to live in the country.

"It takes the agent or canvasser from house to house. It carries the salesman from town to town without depending on trains.

"It saves time, it saves car-fare, and anyone who has tried it will tell you that motorcycling is about the most exhilarating sport in the world."

Some Things a Five-Time Motorcycle Owner Learned

My motorcycle experience has covered a number of years and I have been the owner of five machines. I have ridden in different states under many and varied circumstances, up the steepest hills and in the deepest sand on both old and new machines. My experience with old machines has probably been of greater value to me so far than anything else. With them I learned by hard lessons the art of repairing, which warms one up in the collar in more ways than one on a hot summer's day. It is that which every old or new motorcyclist must learn before he can get the fullest pleasure out of his machine or exhibit himself and his machine with pride before his friends and the still critical public and thus gain friends for his little "bachelor's auto," instead of making enemies.

My lessons were that I must ride my machine decently and sensibly and must not run it with wide open throttle; that I must treat it as I would a horse—it needs regular care, cleaning, adjusting; all nuts should be kept tight and it should be regularly fed, for I have found that it will not run without food when one is far away from the gasoline tank.

I learned what I, as a new motorcyclist, thought was unnecessary. If your machine has battery ignition it is well to always test the pulse before starting out, as sometimes it gets weak and then look out for the spark, or you will be seen bringing the machine home instead of the machine carrying you and some wit will probably come along and say, "Better get a horse."

Incidentally, too, I learned by experience that ignition troubles may sometimes only be located by straining the wires at all points, thus finding wires under insulation, which make a perfect circuit when the machine is standing still, but which on rough road causes skipping. To me such things were very valuable lessons.

I am sure all experienced motorcyclists will agree with me that when things are running well, the all important matter is to see that the motor is receiving oil in proper amounts for the speed of the engine, remembering that the speed and heat on different occasions and roads vary considerably.

It seems that too much stress cannot be laid on the care of these useful and fascinating machines, for it is a regrettable fact that half of the machines bought in the past have soon been sent to the junk heap simply because of misuse, caused by riders desiring to show off, with the result of discrediting motorcycling instead of boosting it. We veterans are glad that with better machines come better sense and better care every year.

In touring, motorcyclists know what it is to pass over long stretches of roads where crushed stone is put down loose, and well, too, they know the effect on tires of these sharp-pointed little stones, as well as nails, glass, tin and the like. I have found that an inexpensive tire cover can be made from a bicycle tire. One motorcyclist procured one for 20 cents that was almost new and only had one puncture. This single tube tire was cut open on the rim side entirely around and laid out flat. Short loops of rawhide, cut from common belt lacers, which are procurable at any hardware store, were riveted on every ten inches with split copper rivets, the heads being on the inside so as not to chafe the tire. The loops were two inches long and in them was placed a strop of the same material, buckled tight, one on each side. Strops are easily made by the use of a punch and small buckles, and they are not only cheap, but stronger than any other leather. The protector or cover was thus held on by the same principle as chains on automobile tires and this first experimental protective tire lasted on all kinds of roads over 600 miles under a heavy machine and rider. It was punctured a dozen times while the tires under it remained undamaged and unworn. A motorcycle tire would, of course, be better still on account of its larger size.

However, each rider will accumulate a thousand "kinks" and ideas, both of his own invention and from others. Out of the lot he will take great pleasure and satisfaction in employing and exploiting his own "pets," from a carbureter attachment, for winter weather starting, to some ingenious way of carrying luggage.

Now a few words on the joys of touring when you have a good machine and you know how to take care of it. For instance, on a fine day last September I left a point in western Ohio and rode over 100 miles in the morning, entering Cleveland by way of Elyria over fine roads after enjoying the beautiful scenery and rich farming country that lay along the entire route. While in Cleveland I visited friends and took in the sights of that beautiful ctiy in a more complete manner than on any previous visit, for what could be better than a motorcycle to take one to the points of interest of a great city?

Desiring to reach home as soon as possible I took the night boat for Buffalo, having my machine checked free. I might mention that I was misinformed as the time of the departure of the boat and I only had three minutes to get my ticket and drain off a gallon of gasoline, so that I could take my machine aboard. One would have laughed to see me open all the openings in that gasoline tank, turn the machine upside down and dump the gasoline into the lake as food for the fishes. I got my ticket and ran my machine on the gangplank just as they were about to pull it in.

The next morning I left Buffalo at 7:30 for Batavia, N. Y., encountering considerable water and a few muddy places and a much-worn macadamized road on the way. From Batavia to Rochester I found dry excellent roads. The day was ideal and the country picturesque. After a dinner in Rochester I proceeded to Geneva, over 50 miles of one of the finest pieces of oiled state road that I have ever encountered. I just sat on the machine listening to its steady, pleasant talk to see if it spoke of any needs. From Geneva to Ithaca there were country roads and large hills, well marked by the zealous automobile clubs so that one need not ask the road to any large town.

Ithaca, N. Y., and more gasoline next, and a chat with the college boys who were down at the motorcycle garage with their machines, and then for Cortland, where I could expect a pleasant evening with friends and their spare bed to stretch and dream of the fine day's ride. I arrived there at 7:30 p. m., having ridden 240 miles and my machine in perfect condition. The only accident of the day was the loss of my battery plug for a few minutes in the middle of the road.

The machine was in good shape when I started and was in good condition when I finished, because all day I had been controlling it with care. I was satisfied with the distance covered and the condition of the machine. I completed the last lap of 60 miles to my home near Binghamton, N. Y., the next day. The sport of motorcycling is great and it pays to take care of your machine.

L. VERNON DAVIS.

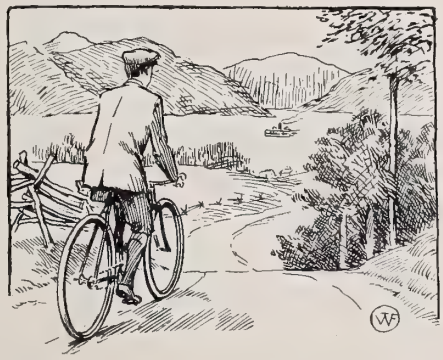
Cleveland Endurance Blanks Ready.

Entry blanks are out for the Cleveland (O.) Motorcycle Club's three-day endurance run on May 28-29-30. The distance is approximately 500 miles. There are three classes, private owners, trade riders and dealers' riders. The latter two classes practically are identical, and the dealers' riders, who must be employes of dealers, may team to compete for the Cleveland News trophy. Dealers will be allowed to enter only one team riding the same make of machine. For a perfect score of 1,000 points, individual riders will receive gold medals and silver medals will be given to those whose score is between 950 and 999 points. The standard road competition rules govern the contest.

A-Wheel in New England

THE MOST delightful two weeks' vacation a wheelman can have in this country is the one I am going to tell you about, and I know because I have tried it. Starting from and returning to Boston you can, in a fortnight's time, visit the Heart of the Commonwealth, the Connecticut Valley, both ends of Hoosac Tunnel, the Berkshire Hills, the Hudson River, Saratoga Springs, Lake George, Lake Champlain, the Green Mountains, the White Mountains, Lake Winnipiseogee, the Colonial towns of Portsmouth, Newburyport, Salem and Marblehead, the Swampscott, Nahant and Revere beaches and the Ocean Boulevard, which connects them with the hub of the universe. The average daily mileage will be about 40 miles, and sailing on three lakes and one river will add to the fascinations of the trip. If you're ripe for the ramble I'll reel off the route.

Leave Boston on a Sunday morning—an ocean trip from New York will bring you overnight—wheeling past the historic Common and the Public Garden to Arlington street and so on to the Millionaires' Mile on Commonwealth avenue. If you don't take any notice of the millionaires they won't molest you, but if you try to fool with them they are apt to act savage.



Go straight out through Allston, crossing the Charles River at the United States Arsenal and swinging around by the parkway into Watertown. Professor Hosford, the inventor of acid phosphate, believed that Leif Ericsson visited Watertown about A. D. 1000 and founded there the city of Norumbega, but he has few fellow-believers. When a large restaurant, conducted on temperance principles, was established at Norumbega Park, its critics insisted that the name was No-Rum-Begad.

Next we come to Waltham, the place where they make the watches and everybody works in the watch factory and lives on tick. And so we go through Boston's beautiful and far-reaching suburbs where the roads are good and the barns are painted. Once in a while we pass a house of undoubted Colonial origin or a tiny graveyard where little flags decorate alike the mounds above the patriots of the Revolution and their successors of the Civil War.

After twenty miles or so you pass the Wayside Inn, the self-same "ancient hostelrie" made famous by Longfellow's "Tales of a Wayside Inn." Now, Mr. Longfellow may have been a pretty good poet, but he never wrote anything just like this:

How do you get to the Wayside Inn?
That is just how you happen to feel.
Some of us travel in motor cars;
Some of us stick to the wheel.
If you lose your way and you ask a man,
He will answer with a grin,
"Go Way Inside by the Inside Way,
And you'll come to the Wayside Inn."

Worcester is forty-four miles from Boston and you stop there for the night, having attained its outskirts by a mile-long coast

down from quaint little Shrewsbury on the Hilltop and across the bridge which spans the slim waist of Lake Quinsigamond.

On Monday you ride from Worcester to Springfield, over good hard roads, through thriving mill towns and past fertile farms. There is one spot above all others where I love to linger and loiter and lazily loaf, a narrow pass where thickly wooded hills close tightly in on river, rail and road, and where a valley opens to the west, that is to me the very loveliest of all New England valleys that I know. Infrequent traffic passes up the road, a farmer's wagon or a motor car, the shallow river babbles noisily, a freight train lumbers slowly up the grade, light, fleecy clouds are in the sky above, while in the shadow of a roadside tree the cyclist tarries, glad to be alive.

In the afternoon you reach Indian Orchard. Do you know why it is called Indian Orchard, Mr. Johnson? No, George, why is it called Indian Orchard? Because it is there that the Indian-apple-is. Minstrel shows have stranded on worse jokes than that.

Springfield is only fifty miles from Worcester and the roads are so good that you arrive there long before supper time, and it seems a longer time than it is.

Now will be a good time to exploit my theories about touring. In the first place, you should always make an early start. In all these towns you are going to visit they have dinner in the middle of the day. If you can begin riding by seven you can thus guard against delay from accidents and can arrive at your dinner town long before twelve. Do your resting then, begin your leisurely dinner as soon as the bell rings and resume your journey as soon as you comfortably and healthfully can. If you have not laid out too long a distance for the day, you will be at your supper town in time for another good rest. The best time to write your letters is while you are waiting for meals. When the days are long you can often put in ten or twenty miles between supper and dark and, strange to say, you will find that the easiest riding of the whole day.

So after supper you ride from Springfield up the Connecticut Valley to Northhampton, a beautiful city with enough shade trees within its borders to stock a forest. Smith College will be closed for the summer when you get there, but you won't mind that, for its students are all girls, and who cares anything about girls, anyway?

You won't have time to visit Mount Tom, but that doesn't aMount Tom uch. A man who would decry so picturesque a height for so malignant a pun is a pusillanimous pup.

On Tuesday you ride northwesterly through Florence, the home of sewing machines and oil stoves, to Williamsburg, where railroad and trolley stop and hills begin to rise. Don't fail to notice the magnificent elm trees all about here, sometimes even growing in the middle of hayfields. Tobacco is also extensively grown along the river banks for miles up and down the Connecticut. When you leave Williamsburg you go up four or five miles of good state road to Goshen, a summer resort town of 1,500 feet above sea level, where you have an extensive view of the country once devastated by the bursting of a d——, which inundated the country for miles, causing great destruction. A heroic milkman named Collins Graves saved many lives by riding at breakneck speed down the valley and warning the doomed households of the onrushing waters.

Ashfield next, in whose vicinity were

born the author George William Curtis and the dry goods king Marshall Field. Descending to the Deerfield River at Buckland you follow the confined valley of that striking and paintable stream all the way to the Hoosac Tunnel, near the mouth of which you put up for the night.

On Wednesday morning you make an early start and climb the road over the tunnel. Near its beginning you come across a ledge of rock that looks for all the world as if it were composed of fossil trees, the texture of the wood and of the bark being

exactly like the real. Maybe it **is** petrified wood, I don't know. After an ascent of about two miles you turn around and behold the greatest jumble of mountains you ever looked at. It is as if some giant's hand had thrown twenty or thirty of them together side by side, forever to remain clumsily clustered in cumbersome confusion. The sight is awe-inspiring and sublime, and I think all will agree with me that it well repays the trouble and the toil.

The descent on the North Adams side of the tunnel is gradual enough, but it zigzags so around its acute corners that you should be a Prudent Peter and not a Careless Clarence in negotiating them. A level sandpapered road takes you to Williamstown, one of the prettiest towns in the whole state, the home of Williams College and the birthplace of the American Board of Foreign Missions.

In the afternoon you ride down to Pittsfield, skirting the foot of Mount Greylock, the highest mountain in Massachusetts, and passing in Lanesborough the last resting place of Josh Billings, the humorist. You are now in the heart of the Berkshire Hills, the country home of so many of our plutocrats, the height of whose season here is in the autumn and not in the summer. Dinner at Williamstown, supper at Pittsfield and then through Lenox to Stockbridge for the night.

On Thursday you continue down the valley of the Housatonic to Great Barrington, where William Cullen Bryant was born and where Mark Hopkins built the chateau he never enjoyed. Thence into New York State, where at Hudson you catch the up-river boat for Albany, enjoying splendid backward views of the Catskill Mountains. On Friday you wheel via Cohoes and Mechanicsville to Saratoga Springs. Now let me tell you about Saratoga. The waters of its mineral springs are cool, sparkling and delicious and you are tempted to imbibe deep and often. Should any fiend in human form invite you to drink alcoholic stimulants instead, his is the better way. Stick to the stuff with the serpent in the bottom of the glass and quaff not Nature's own crystal beverage. Your head may not feel normal the next morning, but your innards will be quiescent.

On Saturday morning you start early and ride through Glens Falls to the foot of Lake George. You may have to hustle a little to make it, but you have a long, lazy day of steamboating ahead of you and it's worth the trying. Lake George is to me the most delectable of them all, with its verdant frame of encompassing mountains and its inset of 365 islands, one for every day in the year and a turtle on a log for Leap Year. Camps, bungalows, cottages, villas, hotels and palaces abound and you can't help noticing that here as everywhere else the humbler the dwelling, the more fun its inhabitants have. The sweller the hotel, the more unforgivable it is to be joyous.

The forenoon is taken up with the trip up Lake George, the afternoon following suit with a sail on Lake Champlain. As you pass Ticonderoga everyone looks wisely at the dismantled fort and says, "In the name of the great Jehovah and the Continental

Congress." You ask them who said that and they reply, "Ethan Allen." But, mind you, that is everything they know about it. They don't know who Ethan Allen was or why he said it, but the quoting of it hints at history and insinuates intellectuality. Next time you pass a historic spot try them yourselves with, "Put none but Americans on guard to-night." Tell them George Washington said it, and if they ask any more, advise them to brush up their history. They won't do it, but they'll think you are endowed with learning.

The boat takes you to Burlington, Vermont, where you spend Saturday night. On Sunday you wheel eastward to Montpelier, directly through the heart of the Green Mountains, passing between its highest peaks, Mount Mansfield and Camel's Hump. The road is practically level all the way and the views are fine, the distance for the day being only forty miles. All the day you follow closely the Winooski, or Wild

Onion River. Gee, what must a wild onion be like, when the tame ones are what they are?

Monday's ride is to St. Johnsbury and it takes you through Marshfield, where of all the cows the minister's cow alone is permitted to browse on the lush, rank grass of the gutter or nibble coyly at the wayside clover. I once spent a July night in the hotel at that town. I'd hate to tell you what place my room was hotter than, but you know what place I mean. After leaving St. Johnsbury you begin to approach the White Mountains and after 24 miles you are in Franconia, where you stop for dinner, supper and breakfast. In the afternoon you visit the Profile, five miles away mostly up hill, and gaze your fill on that most satisfactory of all of Nature's freaks, the Great Stone Face, which from its height speaks to us of sternness and justice, but of absolute integrity. Scientists tell us that the forces of nature may at any time deprive us of that glorious vision, but let us hope it may not happen soon.

It was at Franconia that the waitress in the hotel once asked me whether I would have cranberries or bee-honey. It was like asking a small boy whether he'd have potatoes or cake. I know a limerick about Franconia.

A soft-headed youg man of Franconia
Became rich and, of course, became tonier;
So he ordered new suits,
New hats and new boots,
And the next thing he had was pneumonia.

On Wednesday you have a stiff climb of two or three miles before you reach Bethlehem, but after that it is much easier.

If you desire you may stop at the Mount Pleasant House and take the train to the summit of Mount Washington, and I certainly should advise you to do so if the day is clear. You may eat dinner on top and return in time to reach Bartlett before supper. The mountain views on this day will be the grandest you will have during the whole trip, as Mount Washington will be directly ahead of you for miles in the morning, while in the afternoon your way lies down through the Crawford Notch, never so steep as to be unridable and yet filled with magnificent coasts. You spend the night at Bartlett after only 37 miles of riding.

Friday is taken up with wheeling across country to Centre Harbor, passing first through Intervale, with many dismounts for backward views of the Presidential Range, and on beside the brawling Saco River through North Conway to Conway, where you stop for dinner after a short and easy ride. That afternoon you will make the acquaintance of grand old Mount Chocorua, but only from a distance, as you ride through Madison, Tamworth and Sandwich to Centre Harbor on Lake Winnipiseogee. By the way, that is pronounced to rhyme with Milwaukee.

A man from Lake Winnipiseogee
Was slender and skinny and gawky.
But he gained adiposity,
And attained corporosity,
By using what comes from Milwaukee.

On Saturday morning you have a delightful sail across the lake, leaving the mountains farther behind you at every turn of the paddle-wheels. Down the hill you ride to Farmington for dinner, then more down hill through Rochester and Dover to Portsmouth, where a hotel greets you that will gladden your heart. After supper you may wheel either across the river into Maine, to visit the Navy Yard at Kittery, or down the river to Newcastle, where was signed the treaty that ended the Russo-Japanese war. The tide about here runs extremely strong at times and there is a headland jutting out into the river that is known by the descriptive and diabolical designation of Pull-and-be-damned Point. Of course, the sentiment of the name is by no means so bad as it sounds.

Sunday is the last day of your vacation and you celebrate it by a long, easy and delightful ride of seventy miles over a fine road without a real hill to its name. The first twenty miles takes you into Newburyport, with its old High street fringed by handsome estates, many of whose houses are more than a century old. I knew that Newburyport was a fine old city, Mr. Johnson. Well, George, and how did you know that Newburyport was a fine old city? I knew-by-report, Mr. Johnson. Hush, George, it is the Sabbath day.

You pass through Rowley, where the old cemetery in the center of the town has more inhabitants than the town itself; Ipswich, Hamilton, Wenham and Beverly, all of which places contain magnificent summer residences, the latter holding the hot-weather capital of the United States, by reason of President Taft's spending the vacation season there; Salem with its Colonial architecture and its history blotted with the witchcraft delusion; Marblehead with its queer old streets and its harbor filled with swift, comfortable or palatial yachts; Swampscott with its summer hotels, where first you attain the Ocean Boulevard, the finest shore road on the continent; Lynn, the former home of three famous women, Moll Pitcher, Lydia Pinkham and Mary Baker Eddy; Nahant, that almost-island looming to the east, of which we pass through but a fraction; Revere Beach, the most orderly of all heavily-attended beach resorts in the world. No booze, no gambling and no bums.

And so we wheel back to our starting point and enter Boston by the Harvard Bridge across the newly-made Charles River Basin, bringing more with us than we took away, in tan, in muscle and in appetite.

Sometimes the hills have seemed to be unending,
Some precious hours have been lost in mending
Unfaithful coaster-brakes or punctured tires.
What then? They're but a portion of the game,
Your friends will say they've often had the same,
And those who say they never had are liars.

QUINCY KILBY.

Vanden Dries Leads Cyclists at the 22d.

In one of the cleanest fought and most exciting flat floor races of the season, William Vanden Dries led the field all the way in the two-mile bicycle scratch race at the military championship athletic meet at the Twenty-second armory on the 22d inst. C. A. Mohrman kept Vanden Dries busy all the way, but lost the victory by a wheel. C. A. Nugent was third. Time, 5:16⅕. The race was marked by sensational spills, in which W. Scheneyer and H. Lightfire, tumbled over the ropes into the crowd, but luck was with them and they escaped unscathed.

Essex Bicycle Club is 33 Years Old.

Not many bicycle clubs can boast holding a 33d annual meeting, but the Essex Bicycle Club, of Newark, N. J., is one that can, as it held its 33d annual on the evening of the 26th inst. in the balcony of the Arena on Market street. The meeting was followed by a theater party. The officers elected are: Colonel W. S. Richter, president; H. W. Knight, vice-president; B. J. Coe, secretary and treasurer.

Bicycles Expedite Japanese Letters.

Postal delivery by means of bicycles is the new system which went into operation in Tokyo, Japan, on February 11. The arrangement is that letters or parcels will be carried to destination and delivered within 30 minutes of the time of sending into the post office, provided that the destination is within the district where posted. If the destination be outside that district an additional thirty minutes will be required for each additional district. The charge for this special delivery is three cents within Tokyo and six cents for delivery in Yokohama.

CYCLES A "SOCIETY" ADJUNCT IN BERMUDA.

E. V. Kane, Miss Adelaide Townsend and Miss Viola Townsend, of New York.

RESISTING THE NEW YORK CHANGE

Proposed $5 Yearly Tax on Motorcyclists Arouses F. A. M. Committee—Hamilton Issues a Call to Arms.

Aroused by the threatening situation in New York State, where all motorcyclists may have to pay $5 per year and carry registration numbers, the legal action committee of the F. A. M. has actually gone into action and is urging every motorcyclist in the Empire State to bring pressure to bear at once on his state representative and state senator, urging the legislators to kill the proposed amendment to the Callan law that would bring motorcyclists under practically the same requirements as automobiles. Furthermore, the committee has engaged legal counsel to carry on the fight for the motorcyclists of the state, and their cause was represented in the hearing which was given on the bill on Tuesday, 25th inst., at Albany. Charles Thaddeus Terry, of New York, plead the cause of the motorcyclists. He is one of New York's prominent lawyers and has been conspicuous in work for the American Automobile Association in opposing unjust legislation against motorists.

Since it is impossible for the committee to reach all the motorcyclists in the state by means of letters, every rider is urged to pass the word to every other rider he knows, suggesting the writing of letters to their respective representatives and senators. The letter in each case should ask the legislator to vote against the proposed amendment to the Callan bill by which motorcyclists would be compelled to pay $5 a year and to carry registration numbers like the big automobiles. Motorcycles were taken out of the New York State automobile law in 1904 and nothing has happened meanwhile that would justify their being put back in it. Motor propelled bicycles have caused no more accidents and no accidents more serious than bicycles, and, like bicycles, they are at the mercy of everything else on the road, needing special protection from motor cars.

Motorcycles are put right in as motor vehicles, by the amendment, setting them on the same footing as motor trucks, limousine cars and high-powered roadsters. In fact the amendment simply strikes out the motorcycle exemption clause that the F. A. M. in 1904 succeeded in having put in the motor vehicle law. Not only have owners got to pay $5 a pair for registration, according to the amendment, but dealers and manufacturers would have to pay $15 a year, to cover what machines they might have out on the road. The number plate requirement is that motorcycles must carry "such sign or mark as may be furnished by the Secretary of State." Under the amendment, a man who sells his motorcycle must report the sale to the Secretary of State, and the man who buys it must report the purchase of it. Machines owned by cities and towns would not need to carry numbers. Sixteen years is the age limit set by the amendment, so that no rider under that age would be permitted to ride his motorcycle in New York State. As the amendment reads, every motorcycle would have to do like the automobiles do and carry two white lights in front and a red light at the rear.

The proposed law would make motorcyclists liable to a fine of $200 for violations of the law as to registration, speeding and the carrying of numbers, whereas a maximum of $10 for ordinary cases of speeding and traffic violation is what obtains at present. Motorcycle cases at present are disposed of by a prompt hearing in police court or lowest court, but under the proposed amendment motorcycle offenders would have to be bound over and held for special sessions, entailing delay and expense. For these and other reasons that the committee present, the motorcyclists in New York State have reason to become alive to the danger that threatens them.

Prince Has Lake Cities on the String.

Having interested motorcycle enthusiasts of Detroit, Cleveland and Buffalo in projects for building board tracks in those cities, Jack Prince is suggesting to them the advantage of a tri-city racing circuit. To the Detroit Club he has made a proposition for building a three-lap track for $7,500 or $8,000, and the club is inclined to go ahead with the plans. The Buffalo Motorcycle Club is interested in the board track project, due to the fact that Buffalo this year will be the scene of the national meet of the Federation of American Motorcyclists, and it is thought that a board track is needed for the national championship and other racing that will be given in connection with the meet. The Cleveland promoters have been conferring with motorcycle dealers as to the money-making possibilities of a board track in that city and are in communication wtih Prince as the possible builder.

Motorcycle Officers Too Frisky.

Because they have been burning up the streets and causing all kinds of trouble by misuse of their machines, it is alleged, motorcycle cops of Kansas City, Mo., are to be humiliated by having to carry numbers like ordinary mortals in that town, if the edict of the police board is carried out. There have been many complaints, it is said, of the reckless manner in which the motorcycle cops have been turning the city streets into Vanderbilt Cup courses and smashing up their machines as well as causing annoyance to people. Now the commissioners threaten to make the policemen carry big numbers so that they can find out who is responsible for all the "cutting up," as previous investigations have borne no fruit.

DEALERS HELP CLUBS TO START

Assisting in the Organization Movement in Different Sections—F. A. M. Affiliations Continue.

Dealers have caught the club organizing fever bad in the past few weeks and the epidemic is at its height. O. Overton, a Mobile (Ala.) dealer, reports progress on a club in that city. Not satisfied with nearly a dozen clubs already, Chicago apparently wants to have a club in every block. This impression is gained from the fact that W. J. Moerschbacher, 1007 Rush street, has the nucleus of another club lined up.

Earle H. Jayne, a Troy (N. Y.) dealer, is shouting F. A. M. club in the shirt and collar town, and shouting it so loudly that not only local riders, but students in the Rensselaer Polytechnic Institute have taken up the cry. There undoubtedly will be something doing soon. Between sales of machines, DeWitt Doyle, Emblem agent in Colorado Springs, Col., has found time to organize an F. A. M. club. The preliminaries will be completed soon. Louis C. Stumme, a live wire F. A. M. member of Danville, Ill., also is contributing his mite in the form of organizing an F. A. M. club. It will unfurl its banner shortly. Taking the alluring title of the Ideal Motorcycle Club of Rockford, Ill., motorcyclists of that city have organized. Clarence Carratt, 2107 16th avenue, is one of the moving spirits in the new club.

Even fashionable Atlantic City looks like a fertile spot for F. A. M. proselyting. The Atlantic City Motorcycle Club, which is not affiliated, is the object of special attention and solicitude from the chairman of the membership committee. The club still has a few rough edges which will be smoothed up if it comes into the F. A. M. family. The Topeka (Kan.) Motorcycle Club affiliated last week as number 112, bringing in 13 men. Next came the New Bedford (Mass.) Club, number 113, with 29 men.

Howell Will Ride Again Minus a Leg.

Despite the fact that last fall he lost a leg as a result of a motorcycle accident, Byers M. Howell, of the firm of A. B. & B. M. Howell, central Ohio agents for the New Era, will be seen again on his motorcycle this year. While on a cross-country trip between Columbus and Springfield, O., Howell was thrown from his machine and in the fall injured his right leg. Blood poisoning developed and the injured leg was removed to save the young man's life. With the coming of spring the old motorcycle fever entered Howell's blood and he commenced to figure how he might ride his machine in spite of the fact that he has but one leg. His mechanical ability aided him in re-arranging the controlling levers so that he now is able to ride quite as well as other motorcyclists.

EIGHT SCORES PERFECT IN FIRST TIME TRIAL

Twenty-one Starters, of Whom Only Two Fail to Finish — Merkel Twin Team Wins Fleming Trophy — Chapple Beats an Erie Train — Jersey Justice Cuts Rates — Two Nabbed on Broadway.

Mud and police were the chief obstacles to perfect scores in the first trio cup trial of the Motorcycle Touring Club of New York, (Affiliated) on Sunday, 23d inst., over the New York-Fishkill-Newburg-Suffern course, 138 miles, but in spite of these interferences and some mechanical troubles as well, eight of the 21 starters finished without any smudges on their road records. While tire equipment was well distributed, Bosch magnetos had a monopoly of the ignition honors, every perfect score machine, as well as all of the survivors being

THE CONTROL AT NEWBURGH

so equipped. Remarkable to relate only two of the starters failed to finish and their defection was due to mechanical trouble.

Those who earned clean scores were the following: G. A. Ashley, Merkel; Joseph Buckingham, Harley-Davidson; A. Hoffman, Merkel; S. B. Thorpe, Harley-Davidson; J. B. Meinell, Merkel; David Molin, N. S. U.; L. Schultheis, Merkel; William Wood, N. S. U. In addition to having the greatest number of perfect scores and greatest number of finishers of any particular make of machine, the Merkel twin team, consisting of Ashley, Hoffman and Siemsen, won the club team prize, scoring 2,988 points out of a possible 3,000. They represented the Motorcycle Touring Club (Affiliated). Second honors in this class went to the Indian team, consisting of Dreier, Levin and Toepel, who finished with 2,811 points. They also represented the affiliated club.

This club team prize is a silver cup offered to the team, representing a club, that shall have the highest total points after each trial. The winning team holds the cup until another team wins it in a succeeding trial, and it becomes the permanent property of the team winning it three times. The winning Merkel team made a double killing, for it also made the highest score in the competition for the three duplicate cups offered to the team of three men riding the same make of machine who achieve the highest total score in the entire series of trials. This class might be termed the "same-make team" division, but it was not a trade class, for there were but two tradesmen in it, the other contestants being private owners. The scores in the "same-make machine" class follow: Merkel, 2,988; Harley-Davidson, 2,985; Merkel, 2,975; N. S. U., 2,973; Indian, 2,811.

Of the 25 entrants 21 made good by starting and 19 finished. Albert Kreuder was the only post entrant. There were two classes, A for singles and B for twins. Eleven singles and ten twins started, and one of each class dropped out, giving the singles a slightly better average. Considering the generous rains of the preceding week the course was not as bad as might be expected, there being but one really difficult stretch.

The men were checked out in squads from F. B. Widmayer's establishment at 2312 Broadway at two-minute intervals after 7 a. m. by J. P. Thornley, chairman of the F. A. M. competition committee. The schedule called for 17 miles an hour, which seemed easy on the good roads, but called for some tall going after the mud stretch had done its work in delaying the riders. The first control was at Koenig Bros. garage at Tarrytown, and all but one arrived there on time. C. Frolke, Harley-Davidson, was missing.

Outside Tarrytown the hill climbing test

FERRYING ACROSS THE HUDSON

was held on Aqueduct hill, which is about 600 feet long with a maximum grade of 14 per cent. All but three got up the hill without pedaling or dismounting. M. P. Sullivan, who had a Thor twin with an Indian forecar attached, had to get out of the saddle and run alongside, nursing the machine with the clutch. He lost 10 points for this. C. E. Beuchner, Merkel, and Albert Kreuder, M.M., pedaled and then dismounted, which cost them 25 points each. Beuchner blew out a gasket and repeated the performance several times thereafter during the run, while Kreuder's engine simply "died" without any apparent reason. Through an oversight in instructing the checker on the hill, he debited the men who dismounted as simply having pedaled, but as they afterward admitted to the referee having dismounted, their word supersedes the hill checker's report. There is no controversy on this point, but simply a misunderstanding on the checker's part, due to his not having been told to indicate on his record when a rider dismounted.

At Peekskill the checking station was at George Sorenson's, the Merkel and Thor agent, and all but Frolke, who was out,

AHEAD OF SCHEDULE NEAR TUXEDO

arrived on time. Sorenson placed his establishment at the disposal of the contestants and also helped by providing checkers for the hill climb. All had a good word for the treatment they received from him. After leaving Peekskill the fun commenced. About six miles out the riders struck a mud stretch that knocked a good many clean scores to smithereens. It was several miles long and the spring mud was deep and heavy. It stalled engines in no time and walking and pushing the heavy machines became the fashion. Many were soon exhausted by this hard work and time flew—also precious points.

Sullivan and his heavy fore-car outfit got mired in the mud and soon "chucked it" so far as the contest was concerned. Toepel and Levin, of the Indian team, also received the mud degree in full form. McIntyre, on a Merkel, who was riding that machine for the first time, also floundered and pushed through the mud. As though this were not enough, he also experienced mechanical trouble. Krackowitzer, the N. S. U. man, who was referred to by his fellows as "B-r-r-r Crack!" also got stuck in the gumbo. In addition, he discovered that a nut on one of his inlet valve pull rods had dropped off and the valve was running automatically, which decreased his pulling power.

Wagonblast, a big 240-pounder, on a Merkel, took an involuntary bath in the Hudson near Storm King. While rushing along, his wheel struck one of the numerous gullies that gash the road and which are formed by water running down the mountain, and in a twinkling his machine was headed for the river, which at this point is only a few feet from the edge of the road. He did not go in very far and got only a slight wetting, but he damaged his crank hanger. Beuchner had a lot of trouble blowing gaskets on his inlet cage and was kept busy replacing them. Kreuder had mud trouble, and Krause, Harley-Davidson, fell and damaged his machine. Winhold, on the same make, stayed by his disabled companion and was rewarded for playing the Good Samaritan by being late

PEEKSKILL CONTROL AROUND CORNER

at Fishkill Landing along with all of those who had had real troubles of their own to delay them. All the other riders made Fishkill Landing without penalty, although some of them had troubles that worried them. Just outside Fishkill Landing the riders struck a long hill with sharp turns, that kept going up, up, up. Every time they went over a rise and thought that they were on top, they found another rise right in front, until ultimately the real top was reached. Sand and rocks made the going still harder and those who struck this killing grade with engines almost red hot from the long drill through the mud were punished some more.

After checking at Fishkill Landing the contestants were allowed two hours to cross the river to Newburg and have dinner. The ferry ran every 15 minutes and the trip across required nearly half an hour, but all got to the other side with plenty of time to spare. The hungry crowd descended on the restaurateur at the Newburg landing like a pack of famished wolves and almost cleaned the establishment out of victuals. It was the best day's business the proprietor had done in a long time and he was the acme of politeness and service to his dusty and tired-looking guests who despite their looks had plenty of money to spend.

The second call to saddles was sounded at Newburg at 12:30 p. m., when the riders checked out for the return trip. Suffern was the first check, and with ideal roads under them the riders gave their machines a full head. Everything was lovely along this stretch and the happenings were of the pleasanter sort, in contrast to the up-trip on the other side. Along this section Joe Buckingham massacred two chickens and tossed a dog in the air. The canine came down just in time to be run over by B-r-r-r Crack on his big N. S. U., but no one stopped to learn the extent of the kyoodle's hurts.

A. G. Chapple, who went along as trouble man for the Merkelites, carrying a big heavy bag of parts, had a race with an Erie train near Suffern. Chapple and some of his riders were racing when they overtook an Erie train, which is not a difficult achievement for any motorcycle, as any Erie commuter can testify. The passengers in the cars soon awoke to what was up and opened the windows and yelled and waved handkerchiefs at the flying motorcyclists. The riders steadily drew away from the train and beat it into the next station by over a mile. Harry Mapp also appeared at this point, having come up from New York to help out any Merkelites in trouble, but most of their trouble was over by that time.

After leaving Suffern, where, of course, all checked on time, there were more happenings. From Suffern there are two routes to New York, one via Fort Lee ferry and the other via Nyack and ferry to Tarrytown on the east bank, coming down on the east side. The Fort Lee route was the official one, but those who desired had the option of taking the other. Otto Weinig, a Merkelite who was not in the contest, met the riders outside Suffern and undertook to act as guide. Something went wrong, or else Weinig forgot his signs, for, at any rate, the Merkel

FINISH IN NEW YORK CITY

bunch got on the wrong road and were headed for Haverstraw and the backwoods before they woke up. When they realized their situation, there was some tall "beating it" across country to the Nyack ferry. When they got across to Tarrytown they had only 40 minutes to make the 25 miles to New York and they slid along wide open through the dense Sunday afternoon traffic. The expected happened when John Seimsen was overhauled on Broadway for speeding and was served with a summons to go to court the next day. The delay made him late at the finish and chipped 12 points off his otherwise perfect score.

Over in New Jersey the wheels of justice also were grinding. Winhold, of the Harley-Davidson outfit, was nabbed at a railroad crossing near Hackensack. He was clipping along with three others when a constable hailed them. The others "let out," but Winhold got to the crossing just as the gates were down and he was trapped. The constable lugged him before a justice nearby, who assessed him $6.50 after hearing his defense. The charge was no Jersey license plate. Winhold did not have the necessary amount and was able to dig up only $4. The justice did not hesitate to cut prices, even on Sunday, and gave Winhold a blind receipt for the fine, omitting the amount.

Dreier, Toepel and Levin, the Indian team, lost more points coming back be-

ARRIVING AT PEEKSKILL CONTROL

cause of late ferries and their unwillingness to take a chance on being arrested for speeding in New York. The 17-mile schedule meant "taking a chance" on Broadway.

At the finish, when the Merkel and Harley-Davidson teams learned that they were pretty close and a few points either way meant much, a rumpus started. The Merkelites claimed that Thorpe of the Harleys had no right to go into the Newburg control ahead of time and secure tools to work on his machine. Thorpe claimed that as captain he had a right to go in to see if arrangements for checking were all right, and that his securing tools did not constitute a violation of the rules.

Then the Merkelites took another tack and claimed that the score of the Harley team should not count, as a substitution in members had been made just before the start, an act that, after the entry blank was filed, was forbidden. It then came out that Thorpe of the Harley team went to Chairman Thornley at the start, the referee not being present, and told him that one of the regular members of the team was unable to ride and asked permission to name a substitute. This permission was granted on the ground that the contest had not begun and such a change would affect no scores, and Thorpe filed a card before the start containing the makeup of the new team. It was not generally known at the time, however, that he had secured permission to name a rebuilt team. Such a thing will not be allowed in future trials as it would affect the scores now pending, and if a team member drops out the team must continue without filling his place. The discussion

waxed warm for a time and the Merkel crowd filed a protest but shortly after withdrew it.

The summary:

Results of the first trio cup trial of the Motorcycle Touring Club of New York (affiliated), Sunday, April 23. Course, New York to Newburg and return, 138 miles.

Individual Scores.

Rider and Machine.	Points.
G. A. Ashley, 6 Merkel	1,000
A. Hoffman, 6 Merkel	1,000
J. Buckingham, 4 Harley-Davidson	1,000
S. B. Thorpe, 4 Harley-Davidson	1,000
D. Molin, 4 N. S. U.	1,000
W. Wood, 4 N. S. U.	1,000

Track Meet Carded for Zanesville.

Motorcycle races will be a feature of the opening of the fair grounds park, Zanesville, O., on May 25. The track will be put in shape soon and the meet will be conducted by the park association.

OAKLAND SAUCER OPENS AT LAST

Balke the Professional Star of the Day—Johns and Alzini Divide Trade Rider Honors.

Full compensation for the long delay and frequent disappointments connected with the opening of Jack Prince's new Oakland (Cal.) half-mile board motordrome was made to the large crowd which heeded the 'steenth announcement of the opening, last set for Sunday, 23d inst., a contract which the promoters, with the co-operation of the weather man, finally made good on that date. Rosy ante-inaugural promises of the wonderful speed which the new track would show were not too large for fulfilment, for miles under 44 seconds were clicked off regularly, and the racing was of that snappy and brilliant sort which made Los Angeles famous and now promises to do likewise for the new speed bowl at the dooryard of the Golden Gate.

Charles Balke, of the Indian racing team, achieved the honor of winning the first professional race to be run on the new dish, and also brought out the latent speed qualities of the track. Balke was the star of the meet, taking both of the professional events at 5 and 10 miles, respectively, after neck and neck riding at a clip that made the crowd dizzy. In the trade rider classes, Don Johns, DeRosier's latest "find," and J. Alzina, also of the tribe, were the top notchers. Johns trimmed Alzina in a 5-mile race and the latter turned the tables on the Angeleno at three miles. H. N. Oberg, of the San Francisco Motorcycle Club, was the king pin of the private owners, taking two out of three races on an Indian. R. Stewart, also Indian, accounted for the private owner event that Oberg passed up, making the triumph of that make complete.

With eight cylinders cracking like a battery of Gatlings, four men took the gun in the five mile professional. Balke went to the front at the break and the others were at his rear wheel seeking to come up. He unwound too fast, however, to permit such a thing, and the best that the others could do was to hang on. Traveling at better than 81 miles an hour, Balke stayed in front for the whole 10 laps and flashed across the line a winner, with Ray Seymour, Indian, in second pocket and M. J. Graves, Merkel, third. Balke's time was 3:38⅗, an average of 43⅘ seconds to the mile. The crowd liked this kind of racing and was generous with its applause.

Having tasted speed and excitement, the crowd was ready for another helping with even hotter seasoning, and its craving was satisfied when the ten miles professional was served. This event brought out a large field, a feature of all the races by the way, and proved the blue ribbon number on the bill. Again Balke shot to the front when the gun cracked, but Seymour and Graves were hot on his trail and the race settled down to a scrap between this trio, the others being forgotten. Streaking past the grand stand the men lay abreast as if their machines were lashed by a cross bar. On the far side one would break the alignment momentarily and crawl ahead a few inches only to be pulled down by one of the others. This see-saw provided plenty of thrills all the way and kept the crowd yelling itself hoarse. In the last lap Balke crept in front again and despite the best efforts of Seymour and Graves he again showed them the way at the finish line. Balke's time was 7:15⅗, an average of 43⅗ seconds.

Riding "23," the successor of the famous "21," Indian, Johns pulled down the 5-mile event for trade riders in the fast time of 3:47⅖, with Alzina and Campi, Indians, checking in that order. Alzina got hunk with Johns when they met in the three mile bout for trade riders and licked him, although the time was not as fast by nearly a second per mile. Local speed men then had their innings—that is, two of them did, H. N. Oberg and R. Stewart. This pair gathered all of the private owner events. Oberg beat Campi, who also rode as a trade rider, in a 5-mile dash and then demonstrated that belt drive Indians are fast, too, by winning the 3-mile race for that class. Stewart was the fleetest of the pack in the stripped stock class among the simon pures. Summary:

Five mile open, trade riders, twins 61 class or under—Won by Don Johns, Indian; second, Alzina, Indian; third, T. Campi, Indian. Time, 3:47⅖.

Ten mile open, professional, 61 class or under—Won by Charles Balke, Indian; second, Raymond Seymour, Indian; third, M. J. Graves, Merkel. Time, 7:15⅗.

Five mile, private owners, stripped stock 61 class or under—Won by R. Stewart, Indian; second, G. Jeferis, Indian; third, P. L. Peterson, Curtiss. Time, 4:35⅖.

Three mile, private owners, stock singles—Won by Oberg, Indian; second, T. Campi, Indian. Time. 3:33⅖.

Three mile open, trade riders, 61 class or under—Won by Alzina, Indian; second, Don Johns, Indian. Time, 2:14⅕.

Three mile, private owners, stock single belt drive, full equipment—Won by Oberg, Indian; second, G. E. Vilra, Emblem. Time, 3:30⅗.

Five mile open, professional, twins 61 class or under—Won by Charle Balke, Indian; second, Ray Seymour, Indian; third, M. J. Graves, Merkel. Time, 3:38⅗.

Rockford Ideals to Hold Meet.

The newly-formed Ideal Motorcycle Club, of Rockford, Ill., has leased the local driving park track for the season and will hold meets there. It is planned to rebank the track to permit high speed without danger. The first meet is booked for Memorial Day, when a 25-mile race will be the feature number.

WHERE JAKE DE ROSIER IS TO MEET GREAT BRITAIN'S FASTEST RIDERS.

The view shows one of the great sweeping turns of the 2¾ mile cement speed track at Brooklands, outside of London. It was taken on Easter Sunday during the running of the 65 mile per hour class race.

Loge Fastest in Mile High Climb.

In the presence of a record-breaking crowd, which lined the course and gathered on overlooking hills throughout the whole 16 miles, Frank Loge, on a Merkel, made the fastest time in the motorcycle classes in the Mile High hill climb at Redlands, Cal., on Friday, 21st inst., and also won the free-for-all class. Loge made the long and dangerous climb in 13:10, giving him an easy victory. Roy Shaw, Harley-Davidson, was second best in the free-for-all, being clocked in 15:47. While the motor cars went the full course of 15 7-10 miles, the motorcycles stopped at Yucaipa, 11 miles from the start. Loge averaged 50 miles an hour. In the single cylinder class, Herbert Gowland, Excelsior, was the winner, reaching Yucaipa in 15 minutes, and was followed by Ollie West, also on an Excelsior. West's time was 16:13. Frank Mulvihill, Thor, was third in this class. In the free-for-all Irwin Knappe, Indian, dropped into Sand Canyon while passing through that dangerous spot, the mishap putting him out of the running. The day was a gala occasion in Redlands and vicinity and business generally was suspended. There were several accidents among private motor parties due to speeding. An unknown motorcyclist contributed to the list of excitement by butting into the rear of a milk wagon with such force that he overturned the vehicle and frightened the horse, causing it to run away. When the excitement was over the wagon was demolished, the driver severely bruised, the horse badly cut and the motorcycle slightly damaged, while its rider escaped injury. For several blocks the street was strewn with milk and broken bottles and cans as a reminder of the crash.

Atlanta Club Leases Speedway.

Having proved a big and burdensome "white elephant" on the hands of its owners ever since it was built two years ago with the expectation of booming the sale of motor cars in the South, the Atlanta (Ga.) speedway has been leased for one year by the young Atlanta Motorcycle Club, which plans to make money by promoting meets on the big platter. The track is two miles to the lap and has a tar and asphaltum top dressing laid on oiled dirt.

Woman Motorcyclist vs. Aviator.

Provided the F. A. M. does not object, a race between a woman motorcyclist and an aeroplane will be the feature attraction at the combined motorcycle and aviation meet scheduled for Bennings track, Washington, D. C., on May 5, 6 and 7. It is said that a fair devotee of the motorcycle already has challenged an aviator to a match. The motorcycle card will consist of eight events, all amateur.

Fast Contest for Savannah Riders.

Fast time is scheduled for the reliability run that the Savannah Motorcycle Club, of Savannah, Ga., at a meeting on the 21st inst. decided to hold on the Grand Prize course on Memorial Day. The distance of the run will be 103 miles and three hours is allowed to complete it, which figures out 34 miles per hour. The course chosen is between nine and ten miles around and will be covered 17 times. Already 25 entries have been received and at least 40 are expected. At the same meeting five new members were taken into the club, which gives the organization a membership of something over 200. Arrangements are being completed for the races which the club is to give on the Fourth of July. It is intended that at least four events will be run off. One of these will be for twins only and will be for a distance of 100 or 200 miles.

Reade Heads the San Jose Club.

The San Jose Motorcycle Club, of San Jose, Cal., recently organized, has elected the following officers: Charles D. Reade, president; Ray Partlow, vice-president; Herbert Bean, secretary-treasurer; Emil Agraz, captain; Clarke, first lieutenant; D. Lance, second lieutenant. The club is taking steps for a series of interclub meets, with the members of the San Francisco Motorcycle Club as opponents.

O'BRIEN AND COLLINS TURN PRO

Jersey Rider and San Francisco Speed Artist After Seymour's Scalp at San Jose—Graves Shines.

San Francisco and Newark lost their two pet amateur motorcycle racing men at the mixed meet at San Jose, Cal., on the 16th inst., when W. G. Collins of the former city and Howard O'Brien from the 'skeeter state turned professional. The pair of erstwhile trade riders were not summarily switched into the cash division for being "caught with the goods" as have some others, but wanted to take a crack at Ray Seymour in a 25-mile professional event and willingly paid the price to satisfy their desire.

Collins, however, had bad luck on his first bona-fide cash ride and was eliminated by a flat tire in the 11th mile, leaving O'Brien to dispose of Seymour. It turned out the other way, however, for after a slashing battle, the Californian drew away and a 20-yard gap separated them at the finish. To M. J. Graves, the Merkel crack, went the speed honors of the day. He tore off two miles in 52⅖ and in 52⅗ seconds, respectively, while Seymour was clocked for a mile in 53 seconds. Graves also demonstrated his superiority over George Renel, on a Curtiss 7, in a three-mile match, in which Graves gave away 30 seconds to the Frenchman, but nevertheless overhauled him.

Collins lowered the colors of a local star, C. H. Northrup, Indian, in a five-mile match, which was run in two heats. Collins gave 20 seconds to Northrup and beat him two straight, the latter riding a "five" against the visitor's "seven." Ben Broderick, of San Francisco, bagged a couple of firsts in the 4 horsepower single class. H. Verrill, Thor, raked in the other single cylinder pot, at three miles. As usual, the motorcycles made monkeys of the motor cars in the matter of speed and thrills. Summary:

Baltimore Racers Play Horse.

Spectators who went to Electric Park, Baltimore, Md., on the 17th inst., expecting to see some horse racing, saw motorcycle racing instead, because the ponies did not show up. The crowd forgot its disappointment, however, after the first event, for there was plenty of action. Members of the Baltimore Motorcycle Club furnished the program, which consisted of three races. Honors were well distributed, Captain Fisher, S. H. Baum and Richard Gintling, the latter a 14-year-old youngster, taking firsts. Summary:

Three mile handicap—Won by W. S. Fisher, Indian (scratch); second, S. H. Groves, Indian (0:28); third, S. H. Baum, Indian (0:28). Time, 5:24½.

Two mile open, four horsepower singles—Won by S. H. Baum, Indian; second, C. E. Sherman, Merkel. Time, 3:20⅘.

Three mile handicap—Won by R. Gintling, Indian (0:28). Time, 4:54.

Alliance to Try Track Racing.

Motorcyclists of Alliance, O., will have a chance to try out their machines in competition during the period of July 18-21 when a big motorcycle and motor car race meet will be held at the Rockhill track. The meet will be run by the Alliance Driving Association and a large number of motorcycle entries are promised.

DE ROSIER AND CHAPPLE DICKER

Will Probably Ride a Match at Springfield—May Also Battle on Guttenberg Track.

The challenge for a match race which A. G. Chapple, the Merkel racing man, issued to Jake DeRosier, in last week's Bicycling World and Motorcycle Review, hardly had cooled before it was accepted by DeRosier, who walked into the office on Tuesday, 25th inst., fresh from California, and posted $100 in cash as a forfeit that he would meet Chapple. DeRosier stipulated, however, that he would not ride at Guttenberg, as the challenge provided, but would meet Chapple on the Springfield Stadium on Decoration Day for the $500 a side. On Wednesday DeRosier, Chapple and Manager O'Callaghan, of the Guttenberg track, met to talk matters over. O'Callaghan posted a check for $100 to cover DeRosier's money, but on condition that the match take place at Guttenberg, where of course it would be featured. DeRosier refused to ride at Guttenberg and refused to meet Chapple anywhere before Decoration Day, as he wanted to get his Indian machine ready. Chapple claimed that his friends would not back him at Springfield and that he did not know if the Merkel people would allow him to ride up there. Following the conference, he went to Pottstown to talk things over with the factory and subsequently wired that he would meet DeRosier at Springfield on Decoration Day. The match, of course, would be the feature of the big meet at Springfield on Decoration Day.

WHAT THE BONA-FIDE AMATEUR DOES IN REGARD TO CASH REWARDS.

"ACCEPT A TROPHY? YES. THANK YOU." "ACCEPT CASH? NO, SIR!"

Frank Hart, with Frank Seery in the role of tempter, spurns money that would make him a professional.

American and Foreign Motorcycle Records Up To Date

American records revised and corrected to April 29, 1911, from the official documents of the Federation of American Motorcyclists Competition Committee, by J. P. Thornley, chairman, and J. J. O'Connor, official compiler. All American records made since October, 1910, are supported by sworn affidavits of all officials connected with such record trials.

Organizations Related to the Sport and the Trade

The Federation of American Motorcyclists.

The Federation of American Motorcyclists is the national association of motorcycle riders, its objects being the control of the sport of motorcycle racing and other forms of motorcycle competition; the promotion of good fellowship, mutual aid and protection; the encouragement of the use of motorcycles; to ascertain, defend and protect the rights of motorcyclists; to facilitate touring and to assist the good roads movement.

Any white person over 16 years of age, of good character and who has complied with the by-laws of the Federation relating to applications for membership, is eligible to membership. All applications for membership must be endorsed by at least two members of the Federation residing in the district, or by two reputable citizens of the town in which the applicant may reside, and must be addressed to the National Secretary, accompanied by an initiation fee of $1 and the annual membership fee of $1, a total of $2. The annual fee for retaining membership after having joined, as indicated, is $1.

Any regularly organized motorcycle club having an active membership of not less than 15 members may become known as affiliated club of the F. A. M., by enrolling and keeping enrolled in the Federation at least 75 per cent. of its membership, a certified copy of such affiliated club's membership roll to be forwarded, after its annual meeting each year, to the National Secretary of the F. A. M., in order that such affiliation may be maintained. In consideration thereof the F. A. M. initiation fee for each individual member of such club shall be waived, provided that such individual applications for membership shall be certified by the secretary of the club of which the applicant is a member. All applications for membership and affiliation should be sent to G. B. Gibson, secretary-treasurer of the F. A. M., 24 Main street, Westboro, Mass.

The Federation will this year hold its annual national convention in Buffalo, N. Y., in July. The officers of the Federation, chosen for 1910-1911, at the national convention, which was held in the city of Philadelphia, Pa., on August 11 and 12, 1910, are as follows:

President, Fred I. Willis, Box 133, Indianapolis, Ind.; secretary-treasurer, G. B. Gibson, 24 Main street, Westboro, Mass.; vice-president for the Eastern district, Clifford C. Wilber, Keene, N. H.; for the Southern district, L. W. Thompson, 609 S. 4th avenue, Louisville, Ky.; for the Western district, Perrin B. Whitney, 1251 Michigan avenue, Chicago, Ill.; for the Pacific Coast district, A. W. Green, 108 West avenue, San Francisco, Cal.

Membership Committee—Chairman, E. M. Estabrook, Bangor, Me.; C. C. Wilber, Keene, N. H.; W. F. Hapgood, Springfield, Mass.; J. Leo Sauer, 51 Chambers street, New York City; L. J. Berger, 538 Dearborn street, Chicago, Ill.

Competition Committee—Chairman, Dr. J. P. Thornley, Hotel Ansonia, New York City; F. B. Hart, Reading, Pa.; W. F. Mann, 1,000 Boylston street, Boston, Mass.; L. R. Miller, 2348 South Broadway, Denver, Col.; L. Bamberger, Riverside, Cal.

Legal Action Committee—Chairman, G. H. Hamilton, 35 Murray street, New York City; Ira L. Holmes, Indianapolis, Ind.; J. L. Campbell, Dayton, O.; Chas. Wyatt, Indianapolis, Ind.; L. J. Leonard, Chicago, Ill.

Highway Improvement Committee — Chairman, W. G. Collins, San Francisco, Cal.

Transportation and Facilities Committee —E. L. Buffington, 135 W. Clifford street, Providence, R. I.

Publicity Committee—Chairman, Fred I. Willis, Box 133, Indianapolis, Ind.; Merle Sidener, 526 Board of Trade Building, Indianapolis, Ind.; E. S. Fretz, Pottstown, Pa.; Robert Morton, 845 Greene avenue, Brooklyn, N. Y.; W. D. Rishel, 301 Tribune Building, Salt Lake City.

Board of Directors—F. I. Willis, Indianapolis, Ind.; R. G. Betts, New York City; E. L. Ovington, New York City; G. H. Hamilton, New York City; W. G. Collins, San Francisco, Cal.; E. M. Estabrook, Bangor, Me.; C. F. Ball, Indianapolis, Ind.; E. L. Buffington, Providence, R. I.; Dr. J. P. Thornley, New York City.

National Association of Cycle Jobbers.

The National Association of Cycle Jobbers is composed of wholesalers of bicycles, motorcycles, bicycle accessories and motorcycle accessories. It will hold its next meeting at Atlantic City, N. J., August 1-4. Its officers, elected to serve until the next general meeting in January, 1912, or until their successors are elected, are as follows:

President, P. R. Robinson, New York Sporting Goods Co., New York City; secretary-treasurer, Fred I. Willis, Hearsey-Willis Co., Indianapolis, Ind.; vice-president for the New England district, J. W. Grady, of J. W. Grady & Co., Worcester, Mass.; for the Eastern district, George W. Nock, G. W. Nock Co., Philadelphia, Pa.; for the Southern district, C. L. Elyea, Elyea-Austell Co., Atlanta, Ga.; for the Middle district, J .C. Ralston, Beckley-Ralston Co., Chicago, Ill.; for the Pacific district, C. F. Wright, Ballou & Wright, Portland, Ore.

National Cycling Association.

The National Cycling Association is the successor to the League of American Wheelmen in the control of bicycle racing, having taken over the governing of the sport from the League in 1900. It also took over the control of motorcycle racing from the League at the same time, but yielded this control to the Federation of American Motorcyclists in 1906. All forms of bicycle racing come under the N. C. A. jurisdiction, including road and track events, home trainer racing and motor paced racing. The officers of the N. C. A. for 1911 are as follows:

President, Daniel M. Adee, 14 Dey street, New York City; first vice-president, Frank Mihlon, 152 Market street, Newark, N. J.; second vice-president, P. T. Powers, Flatiron Building, New York City; secretary, R. A. Van Dyke, 148 West 129th street, New York City; treasurer, R. F. Kelsey, 437 Fifth avenue, New York City.

Board of Control—Chairman, R. F. Kelsey, 437 Fifth avenue, New York City; District A, Howard G. Reynolds, Boston, Mass.; District B, Louis Debo, Buffalo, N. Y.; District C, C. R. Klosterman.

Board of Appeals—Chairman, N. E. Turgeon, Buffalo, N. Y.; C. B. Bloemecke, Newark, N. J.; R. G. Betts, New York City; S. A. Miles, Chicago, Ill.; Dr. C. G. Plummer.

Motorcycle Manufacturers' Association.

The Motorcycle Manufacturers' Association, as its name indicates, is the organization of makers of motorcycles, and numbers in its membership practically all of the prominent manufacturers. Its next annual meeting will be held in Atlantic City, N. J. the first week in August. Its officers are: President, E. S. Fretz, Merkel-Light Motor Co., Pottstown, Pa.; vice-president, John D. Hurley, 1307 Michigan avenue, Chicago, Ill.; secretary, A. B. Coffman, Consolidated Mfg. Co., Toledo, O.; treasurer, K. R. Jacoby, Miami Cycle & Mfg. Co., Middletown, O.

Cycle Parts and Accessories Association.

The Cycle Parts and Accessories Association is the organization of manufacturers of materials, parts and accessories for the bicycle and motrcycle trade. The next meeting of the association will be held at Atlantic City, N. J., August 1-4. The officers are:

President, R. D. Webster, Eclipse Machine Co., Elmira, N. Y.; vice-president, D. S. Troxel, Troxel Mfg. Co., Elyria, O.; treasurer, W. J. Surre, Continental Rubber Works, Erie, Pa.; secretary, Louis Schwab, Stevens & Co., New York City.

JOE FOGLER OUTSPRINTS KRAMER

Newark Velodrome Spectators See Real Thing in Cycle Racing—Hunter in a Tumble.

As a result of the disqualifications and fines imposed on riders on Easter Sunday by Referee Walter Bardgett for teaming, there was no attempt at repetition of the offense in the cycle racing at the Newark (N. J.) Velodrome, Sunday 23d inst., and the clean, open and exciting battles were the feature of the day. Track politics was eliminated and the races were run and won on the track instead of in the dressing rooms.

The surprise of the afternoon was the defeat of Champion Kramer by Joe Fogler in the two mile open. Fogler uncoupled from Kramer's rear wheel in the finish stretch and, swinging out alongside, pulled right away from the pride of the Oranges. It was a clean-cut victory, and when the fans recovered from their amazement they gave Fogler a big hand.

In the half mile handicap Kramer had a walkover, for Fogler and Clarke were out of the final, and Hehir made no effort to fight the champion for first place. Frank Blatz, the amateur champion, made short work of the Australian pursuit, overhauling the last man at 2 miles 1½ laps. Blatz heedlessly rode into a trap in the two-thirds mile handicap and did not get out until it was too late to share in the prizes.

Hunter and Turville, in the one motorcycle race on the card, treated the crowd to a few sensations that were not in their contract, and they were as much surprised at the happening as anyone. Hunter plunged into a turn too fast, and his machine slewed around and toppled over on the track with its rider. With great presence of mind Hunter looked around to try and avoid Turville, who was close behind, and managed to slide down a way, so that Turville by a big effort was able to go around on the outside without hitting the fallen man. Turville, however, nearly upset by having to make such a sharp swerve. When the excitement calmed down the men continued their race but at a less reckless gait. Turville won.

In the two mile professional, four elimination heats were necessary to decide the starters in the final. Those were Kramer, Fogler, Clarke, Drobach, Hill, Macfarland, Lawson and Hehir. Kramer and Clarke moved up near the front of the procession, while Big Mac and Fogler stayed in the rear. In the fourth lap Macfarland accelerated a bit and went up front, carrying Fogler on his rear wheel. There was a lot of shifting for the next two laps, and when it was over Kramer was way back on Clarke's rear wheel. The finale began when Drobach cut loose two laps from home, but after half a lap of going all out, he gave way to Macfarland. He had Hehir as tender and, as Clarke passed up the chance to be the mail car, Kramer grasped the opportunity. Fogler went after him. All this time Fogler glued to Kramer, and he started to unwind as they straightened out in the stretch. Fogler gained slowly at first and then went by Kramer with a rush, a broad smile on his face as he crossed the line half a wheel in front of Kramer. Fred Hill slipped in third and Drobach followed, while Macfarland registered fifth.

Events combined to make a victory easy for Kramer in the half mile handicap. He and Fogler started in the trial heat, but Fogler got a late start in the sprint and Kramer won. Fogler did not qualify, as the heat was not the fastest. Clarke was shut out in his heat, through thinking that two men qualified in a heat instead of one. Hehir took the fastest trial heat and thus helped Wells to qualify. In the final the men were closely bunched at the start, and Kramer had little difficulty in closing the short gaps. He went in front at the bell and jogged home without competition, as Hehir was satisfied to trail and the rest of the field were lost in the offing. Summary:

Quarter mile novice—Won by Harry Cordes; second, William Donkensloot. Time, 0:33⅕.

Half mile handicap, professional—Won by F. L. Kramer (scratch); second, P. O'S. Hehir (15); third, Fred Hill (30); fourth, Peter Drobach((20); fifth, Percy Lawrence (40). Time, 1:00⅖.

Two mile handicap, amateur—Won by Frank Cavanaugh (80); second, Paul Heidrick (65); third, George Pauli (55). Time, 1:23⅖.

Two mile, motorcycle—Won by Charles Turville; second, James Hunter. Time, 2:27.

Two mile open, professional—Won by Joseph Fogler; second, F. L. Kramer; third, Fred Hill; fourth, Peter Drobach; fifth, Floyd Macfarland; sixth, John Bedell. Time, 4:15⅕.

Australian pursuit, amateur—Won by Frank Blatz; second, Jerome Steinert; third, Herman Kjeldsen. Time, 5:08⅕.

Prizes in Plenty for Empire Handicap.

Fifteen place prizes, headed by a Columbia bicycle, and ten time prizes, with an Iver Johnson bicycle at the head of the list, are up for the Empire City Wheelmen's 15 mile handicap road race on May 7, which starts at Floral Park, Long Island. The entry fee is a dollar, and the club explains to prospective entrants that "there are no strings on the prizes." By riding fast enough, it would be possible for one rider to win three prizes, viz., place prize, time prize and a special. The handicapping will be done by three men who know just about where to place every rider in the metropolitan district. The handicappers selected are Sam Barnett, Franklin Fisher and Tom Murphy.

WESTERVELT LEADS PLUG HOME

Century Road Club of America's Informal Centuries Ends in Speed Work—Mommer Fast, Too.

"Where the road was good it was very, very good, but where it was bad it was horrid," is the way one paraphraser of the girl-with-the-curl nursery rhyme described the road conditions that were encountered on the annual informal bicycle century of the Century Road Club of America, on Sunday, 23d inst. At 8 a. m. the New York and Brooklyn divisions started from Columbus Circle and Prospect Plaza, respectively, joining forces at Valley Stream, Long Island. Thence the route led to Oakdale, the turning point of all centuries in ye olden days.

Owing to tire trouble on one machine, Bayshore was not reached until 1 o'clock, and as mine host of the South Side Hotel had dinner ready for the hungry crowd, it was decided to travel the remaining six miles to the turning point after dinner.

Upon again arriving at Bayshore, on the return trip, preparations were made for an old fashioned "plug home" to Freeport, a distance of 19½ miles. Sommer, Bastide, R. Dawson and Mommer started ahead, in order to check off the finish, and en route they indulged in a private race of their own. Mommer finished alone, Bastide and Sommer coming in together three minutes later, with Dawson still in the woods.

The real race, of the main party, developed into a pretty battle, the finish being a sprint in which Westervelt led De Bruyn over the tape by a good margin, with A. Hausenbauer a close third, followed closely by A. Dawson. Kudrle finished fifth, some distance behind, with Katz as sixth man. The winner was awarded a handsome silver loving cup. It was the first time that a cup had been offered in a race of this particular kind.

In the old days the "plug home" was always much larger, and finished at the starting point, but latterly it has been found impossible to have the finish at the starting point, owing to the increased traffic and congestion in town. Old timers still talk of the famous "plug home" of 1902, from Babylon to Brooklyn, a distance of 38 miles, which was won by Charles Mock after a gruelling struggle with Miller, who was then the champion of Staten Island.

Devonovitch Has Lead Poisoning.

Teddy Devonovitch, known to cycle race fans as "Whiskers," has been brought into Salt Lake City from a mining camp, suffering from lead poisoning. He is under treatment at the Holy Cross Hospital and is doing very well. In order to reach Salt Lake City for treatment, he had to ride 58 miles on horseback.

Salt Lake Track Officials Selected.

Officials for the cycle racing season at the Salt Palace track, Salt Lake City, Utah, have all been selected according to Ernest Pye, the manager of the track. The list is as follows: N. C. A. representative, Charles L. Berry; referee, R. L. Conley; associate referees, W. H. Nightingale, Willard Bean; chief judge, Charles H. Dowse; judges, George S. Auerbach, Judge C. B. Diehl, W. R. Sibley, J. Hal Moore, R. S. Wright, H. T. Rippeto, Rabbi Charles J. Freund, J. B. Edmonds, G. F. Youngberg; chief timer, Dr. C. G. Plumer; timers, Sydney Smith, J. M. Jorgenson, R. A. Barney, D. R. Hemphill, P. J. Oulette, Bert Margetts; chief scorer, James Kersh; scorers, W. Allsworth, C. H. Cutting, C. R. Gimmett, W. S. Zehring, W. A. Jackson, A. M. Good; starter, Charles E. White; announcer, Dr. W. F. Meakin; clerk of the course, Richard Grames. The Salt Lake season commences on Memorial Day, May 30.

Both Schudt and Tanner Best Schieder.

Much to the surprise of Buffalo (N. Y.) bicycle fans, their local indoor pride, Joseph Schieder, who has been cleaning up at the armory meets for the past year or so with unfailing regularity, was trounced in the two events held at the 74th Regiment armory in the closing meet of the season last week. Schieder qualified in both of his heats, but ran second in the finals. In the mile open the heat winners were Fred Schudt, Joe Schieder and E. Arenz. Schieder tried to overhaul Schudt in the drive for the tape in the final, but was unable to close up and a four-yard gap separated them at the finish. Time, 2:26⅗. Three trial heats thinned out the candidates for the final in the two-mile handicap until only Schieder, Joe Tanner and Tony Burk were left. When the windup began Tanner broke away and beat Schieder by a length at the finish. Time, 4:32.

Macfarland and Clarke Together.

That Floyd Macfarland, the big Californian, no longer was to manage Jack Clarke was the interesting announcement with which cycle track racing circles were regaled, following the first meet at the Velodrome, Newark, N. J., but it only required the arrival of Macfarland, some days later, to make it plain that he is still Clarke's manager, and that he will be for the season. While Macfarland will use all his efforts to make Clarke a rider of championship caliber, he will have to be a cold stranger to him when they are riding in the same events at the Newark track, as Walter Bardgett, the referee, is keeping a vigilant eye on every race to punish any teaming, assistance or undue friendliness or self-sacrifice.

World's Championships to be Late.

The world's cycling championships, which are to be decided at Newark in 1912 will not take place until some time in August or September. The foreign stars will not have concluded their more important European engagements until about the first of July and they will need some training on this side before entering the championships. It is probable that all the sprint championships will be decided at Newark, while the motorpaced events will take place at Revere Beach, Boston, Mass.

ON THE MERRICK ROAD, LONG ISLAND

Salt Palace Now Temperance.

No longer will the "handsome waiter" pass among the crowds at the Salt Palace track, Salt Lake City, with foaming brews or potent distillations, as the Salt Palace Amusement Co. has no liquor license this year. The fans now will have to take to Coca-Cola, ginger ale, "sas" or celery tonic.

"Hurrah for Spring!"

After New York-St. Louis Record.

With designs on the New York-St. Louis bicycle record, which has been standing for several years, D. W. Moore, of Bayonne, N. J., a member of the C. R. C. A. plans to start from the City Hall, New York, at 5 a. m. on June 20. Moore will ride a Columbia bicycle and will be accompanied as far as Tarrytown by some of the club members, while two of the more enthusiastic ones, J. B. Hawkins and Sylvain Segal, plan to keep him company as far as Albany. Moore already has visions of a club certificate hanging on his wall attesting to a new inter-city record.

Lafayette's Have a New Course.

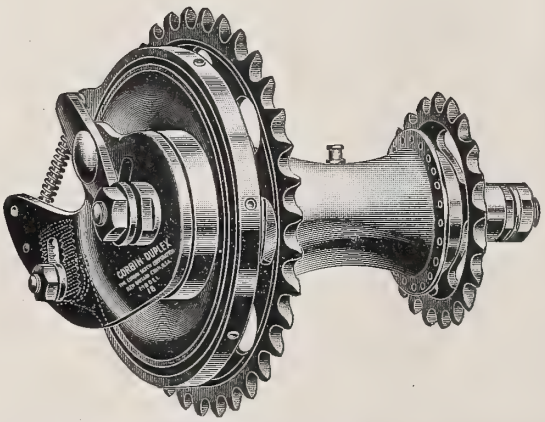
A new course is the main attraction for this year's annual 50 mile run of the Crescent Bicycle Club, of Baltimore, Md., which will take place on Sunday, May 21, with Reisterstown as the rendezvous. An easy schedule has been arranged to give novices every opportunity to qualify for the medals which will be awarded to all who finish within the time limit. In addition a handsome banner will be given to the club having the greatest number of members on the run.

Butler Joins the "A. T. F. A. D. B. R."

Nat Butler, the professional motor paced bicycle racing man, has become a salesman in the used-car department of the Alvan T. Fuller establishment in Boston, Mass., which handles the Packard. So many cycle veterans now are connected with the Fuller enterprise that Butler is described by the Boston paper as having "joined the Alvan T. Fuller Association of Distinguished Bicycle Riders."

Maya Taking a Honeymoon Trip.

Otto Maya, a veteran rider in six day bicycle races, was a visitor at the bicycle racing at the Velodrome in Newark, N. J., on Sunday, 23d inst. Maya lives in Erie, Pa. and was on a honeymoon trip.



The demand for Corbin brakes is this season more than double what it ever was before. Corbin quality and satisfaction cause that demand.

Seeking the Motorcycle Bargain.

Though a man be "rolling in wealth," he does not wish to pay out more good money than is necessary in the purchase of a motorcycle that will meet his requirements, and it is but natural that even intending motorcyclists who are quite well-to-do should consider the possibilities of obtaining bargains. Undoubtedly there are bargains in second-hand machines, in "left-overs" and in various special offerings of one kind and another, but with all conservatism and advisedness it is safe to say that the greatest bargain that any purchaser can obtain is in a new motorcycle of the latest model and of reputable manufacture, paying the catalog price.

If there be a positive expenditure limit that will not permit an intending motorcyclist to buy a machine of the latest model from a standard manufacturer, he must needs make the best bargain he can, but unless he be attended by all the gods of luck and happy circumstances, he is fairly sure to pay, in addition to his cash expenditure, a price that will pretty closely offset his saving.

In its mildest and least unpleasant forms, this price will be the mere humiliation of not having the speed, the power or the comfort that a new and standard machine of corresponding type would yield; in not being sure of the machine's capacity for hard, rigorous work; in feeling uneasy and uncertain whether one will arrive home in as good order as one starts out. In its more extreme forms it means having a machine that is obsessed with a thousand devils, each ingenious in causing breakdowns, troubles, expense, back-breaking experiences and wholly disheartening and discouraging misadventures.

Some people like to take a mechanical hazard and match their ingenuity and skill against the defects, imperfections and weaknesses of a machine that they recognize is no better than its extreme lowness of price would indicate, or perhaps even not as good. If they get results or service at all approaching what a good machine will give, they do so only by an expenditure of time, watchfulness, inventive genius, resourcefulness and "nursing" of which the average man is wholly incapable. Their triumphs may sustain and amuse them, but the general run of people would think the pleasure dearly bought.

What most motorcyclists want is service, toughness, endurance, reliability and freedom from trouble, with a minimum requirement of attentions, repairs and maintenance. Each year's refinements and improvements are intended to give these very things. Beyond a certain point, mere speed is a luxury, to be paid for accordingly, but the other qualities have become standard, and are what make the manufacturers' offerings worth the catalog price.

In issuing an alarm call to motorcyclists of New York state, calling their attention to the fact that unless they individually take action they are likely to have to pay $5 per year to use their machines in the state, the legal action committee of the Federation of American Motorcyclists is to be commended. The chairman of the committee, G. H. Hamilton, and Vice-President C. C. Wilber, of the Eastern district, who are responsible for the letters that have been sent to the New York state members, now need the support of the members, to the extent that the latter really sit down and write protests to the assemblymen and state senators. Those who do not know the names of the assemblymen or senators of their respective districts can easily get the information by communicating with their local newspapers.

Apparently no one is more indifferent as to whether there will be any national motorcycle championship events for professionals this year than are the professional riders themselves. Only one professional rider has given evidence of wanting some of the national championship events of the Federation of American Motorcyclists changed from amateur to professional, in order that riders of the latter class may have a chance at a national championship title. Unless the professional riders show an interest pretty soon, by communicating with the chairman of the competition committee on the subject, it is certain that there will be no professional championship races this year.

For giving an added interest to club runs, the plan of having the riders from one city meet those of another at some intermediate point is one of the best ideas that the motorcyclists so far have taken up. Equally good is that variation by which riders from different points join in a run to an objective point that all have in common, traveling a good part of the journey together. The preliminary correspondence between the clubs that is necessary for the arrangements, the actual meeting of the riders when the run takes place, and the memories and subsequent exchanges—all help to widen the outlook, to develop fraternity and to stimulate club interest, which is not always called forth by mere local runs to some designated point.

"Dwarfed by the later wonders of motor traction, the exceeding handiness of the bicycle, the advance that it represents over walking and the extreme simplicity of it are sometimes lost to sight," says the Akron (O.) Journal, in a recent editorial. "But in a quiet way the use of the machines increases daily. Perhaps the reason why they attract so little attention is the fact that no gaily decked parades now set forth for club runs on Sunday afternoons. Indeed, a pedestrian attracts as much attention as a bicyclist now."

"I have received a great deal of pleasure from reading your paper. Yours is the best motorcycle paper on the map."—G. W. Johnston, Rockford, Ill.

Coming Events

April 30, Providence, R. I.—Providence Motorcycle Club's annual "herring run" to East Taunton, Mass.; open.

April 30, New York City—Eastern Division C. R. C. A. spring century; open.

May 5, 6, 7, Washington, D. C.—Motorcycle races at Bennings track.

May 6, Tampa, Fla.—Tampa Motorcycle Club's race meet.

May 7, Baltimore, Md.—Lafayette Wheelmen's spring handicap road race; 12 miles.

May 7, New York City—Harlem Motorcycle Club's club championship races at Brighton Beach track.

May 7, New York City—Empire City Wheelmen 15 mile handicap bicycle road race, open, starting from Floral Park, L. I.

May 7, Chicago, Ill.—Second annual reliability run of the Chicago Motorcycle Club to Waukegan, Libertyville, Elgin, Aurora and return.

May 7, New York City—New York Motorcycle Club's annual double spring century run to Southampton, L. I., and return.

May 14, Guttenberg, N. J.—Opening motorcycle race meet on Guttenberg track.

May 14, New York City—Century Road Club of America, New York State Division, spring bicycle century run.

May 21, Baltimore, Md.—Crescent Bicycle Club's spring 50 mile pleasure run.

May 21, Brooklyn, N. Y.—Invincible Motorcycle Club's 150 miles spring run on Long Island, north shore.

May 21, Baltimore, Md.—Century Bicycle Club's 50 mile run to Reisterstown.

May 21-22, Seattle, Wash.—Two day endurance contest of the Seattle Motorcycle Club to Vancouver, B. C., and return.

May 24, Toronto, Canada—Toronto Motorcycle Club's endurance run to London and return, 256 miles; open.

May 25, Zanesville, O.—Motorcycle races at fair grounds.

May 27, Akron, O.—Motorcycle races; open.

May 28, New York City—Century Road Club Association's 30 miles handicap road race, Floral Park, L. I.; open. Rain date, June 4.

May 28 and 30, Chicago, Ill.—North Shore Motorcycling Club's two day race meet on Hawthorne track.

May 28-29-30, Cleveland, O.—Three day endurance run of Cleveland Motorcycle Club.

May 28 and 30, Terre Haute, Ind.—Terre Haute Motorcycle Club's race meet; open.

May 29-30, Newark, N. J.—Twenty-four hour endurance run of the New Jersey Motorcycle Club to Atlantic City and return.

May 30, Chicago, Ill.—North Shore Motorcycling Club's race meet at Hawthorne track; open.

May 30, Bridgeport, Conn.—Bridgeport Motorcycle Club's race meet.

May 30, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

May 30, Norwich, Conn.—Norwich Motorcycle Club's reliability run.

May 30, Detroit, Mich.—Racemeet of the Motorcycle Club of Detroit Wheelmen at State Fair track.

May 30, Springfield, Mass.—Motorcycle race meet of the Springfield Motorcycle Club, at the Springfield Stadium.

May 30, Elmira, N. Y.—Elmira Motorcycle Club's first summer race meet.

May 30, Newport News, Va.—Peninsula Motorcycle Club's endurance run to Richmond and return.

May 30, Long Branch, N. J.—Long Branch Cycle Club's second annual road race meet; open.

May 30, Asbury Park, N. J.—Twenty-five mile road race of the Monmouth Cycle Club.

May 30, Plainfield, N. J.—Third annual 25 mile handicap cycle race of the Plainfield Cycling Club.

May 30, Grand Rapids, Mich.—Bicycle and motorcycle races at Michigan State Field Day, under auspices of the Western Michigan Cycle Club.

May 30, Rome, N. Y.—Rome Motorcycle Club's 250 mile endurance run.

May 30, Detroit, Mich.—The Motorcycle Club of the Detroit Wheelmen race meet at fair grounds.

May 30, Wheeling, W. Va.—Ten mile bicycle road race; open.

May 30, Boise, Ida.—Boise Motorcycle Club's road races.

May 30, Salt Lake City, Utah—Eighteen mile bicycle road race.

May 30, Rockford, Ill.—Ideal Motorcycle Club's race meet at Driving Park.

May 30, Savannah, Ga.—Reliability run of the Savannah Motorcycle Club over the Grand Prize course.

June 4, New York City—Concourse Motorcycle Club's fourth annual run to Savin Rock, Conn., and return; open.

June 4, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Greenfield, Springfield and return; 175 miles. Second section.

June 18, Baltimore, Md.—Crescent Bicycle Club's annual spring road race.

June 18, Floral Park, L. I.—Century Road Club of America, New York State Division, 50 mile handicap bicycle road race; open.

July 1, Waterloo, Ont.—Dominion cycle race championships.

July 3-9, Rockford, Ill.—Racing carnival of the Illinois-Iowa Motorcycle Association.

July 4, La Salle, Ill.—Third annual open motorcycle race meet of the Illinois Valley Motorcycle Club.

July 4, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

July 4, Savannah, Ga.—Savannah Motorcycle Club's race meet.

July 4, Asbury Park, N. J.—Opening motorcycle meet at the Asbury Park track.

July 4, Grand Rapids, Mich.—Annual open bicycle road race of the Western Michigan Cycle Club.

July 15, Rochester, N. Y.—Rochester Motorcycle Club's race meet at Crittenden Park.

July 16, New York City—Motorcycle Touring Club of New York's second cup trio-trial, Newburg and return, 150 miles; open.

July 18-21, Alliance, O.—Motorcycle races at Rockhill track.

August 1-2-3-4, Atlantic City, N. J.—Summer meeting of the Cycle Parts and Accessories Association and the National Association of Cycle Jobbers.

August 6, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Rockport and return; 200 miles.

August 20, Grand Rapids, Mich.—Annual open, six hour, two man bicycle team race of the Western Michigan Cycle Club.

September 10, New York City—Century Road Club Association's 100 miles record run; open. Rain date, September 17.

Correspondence

Proposes Big Parade in New York.

Editor of the Bicycling World and Motorcycle Review:

If you will render your assistance, I believe New York City would have the opportunity to see the greatest parade of motorcycles and bicycles ever held anywhere. I have broached the plan to a few dealers in the uptown part of the city, where bicycling this year has attained a popularity not dreamed of two years ago, and they are enthusiastic over it. The plan is as follows:

On Sunday, July 16 (or one week later if weather reports show the probability of rain on that day), every rider of a motorcycle or bicycle, regardless of his club affiliation, is to be invited to take part in a flower-carnival-parade, fixing up his mount in any way he likes, either comically or bedecked with flowers or ribbons; he will be assigned a place in the section to which his style of ornamentation makes him best fitted; he will be asked to ride from Pelham Parkway on which the parade is to form, via Broadway, Fifth avenue and Broadway to City Hall Park, down Warren street to West street, along the river to 23d street, east on 23d street to Fifth avenue, and up Fifth avenue to 110th street.

The parade is to be divided into at least six sections: the first being made up of a sightseeing wagon with a band playing on top, and motorcyclists riding at least six abreast; the second section, preceded by the marshall and his aids, would include the most artistically decorated clubs, or companies of six or more riders making up one unit; next would come single riders followed by a juvenile contingent which also would have to carry flowers or ribbons; then a section of clubs or teams in racing togs and a comic section, and finally an unlimited number of ordinary riders. Three handsome prizes could be given to the most original, most comical and prettiest turnouts, respectively. According to the number of participants there would be three or more bands furnishing the necessary music while the whole expense would be covered by an entry fee of ten cents for motorcycles and decorated bicycles, and five cents for juveniles and undecorated bicycles.

THEODORE M. RAULEIN,
2159 Fifth avenue,
New York City.

Gear Ratios for Racing Bicycle.

Editor of the Bicycling World and Motorcycle Review:

I will be pleased to have you advise me what gear is used by bicycle racers in either track or road racing, or can I use any gear I desire if I wish to enter in contests.

H. A. K.

[Most of the bicycle racers use 96 gear. For racing on the home trainer rollers a higher gear is used. For road races some riders prefer a lower gear. A contestant in a bicycle race is permitted to use whatever gear he sees fit.]

Herreshoff's Hot Air Motorcycle.

Editor of the Bicycle World and Motorcycle Review:

In looking over one of your issues of a few months ago (page 780), I was interested in the exact history of Daimler's first motorcycle, since my uncle, James B. Herreshoff, 233 West 198th street, New York City, built a motorcycle with a hot air engine in 1874 and 1875.

This one was also constructed along the lines of a hobby horse, but hung a little closer to the ground, so that the rider's soles served as brake shoes on the ground instead of on the outside of a wheel. The transmission was as simple and direct as on a locomotive. The connecting rod from the piston went to the rear wheel, which served as a fly wheel. The machine was so simple in fact that even the control levers were left off, the speed being only regulated by the pressure of two leather soles scraping along the ground. The machine was used quite a little; mostly early in the morning on the sidewalk, so as not to scare horses. The air was heated by a bed of flaming coke in the first construction, but the coke was later replaced by a stream of burning benzine.

No speed records are preserved, but the machine's record trip was made along Hope street of Bristol, R. I., between Union and Bernside streets. Before starting the combustion chamber was wrapped with a layer of asbestos and paper outside of that to retain the heat. It had more power than previously, and while under way the paper caught fire and ignited the trousers of the rider in spite of his efforts to hold them away. A safety plug blew out soon after, however, and this was lucky, for the road terminated by an incline down to the shore of Bristol harbor. After this a pressure relief valve was operated from the handle bar. More information could be given by the inventor, who possibly has already been seen riding his row-cycle on the streets of New York. This is driven by the regular rowing motion and steered the same as a rowboat by pulling handles on one side. The rider, however, faces forward instead of backward as in a rowboat.

NATHANIEL G. HERRESHOFF,
Bristol, R. I.

School Children to See Tires Made.

Ten thousand school children are to be entertained by the United States Tire Co. on May 4, in four groups, at the company's tire factories in Hartford, Detroit, Indianapolis and Boston, respectively, in order that children may see and handle rubber as it comes into this country from South America, Africa and Ceylon; may follow its treatment step by step, from washing and mixing with sulphur to vulcanization, and may see its final conversion into tires. After the children have visited the different plants, the company will offer a cash prize for the best 300 or 400 word description of tire making and other facts relating to the company's output. At the Hartford plant the company is now producing 2,000 bicycle tires per day.

Iver Johnson Motorcycle Design.

Plans have been finally revealed concerning the new motorcycle that it has been known for some time Iver Johnson's Arms & Cycle Works, of Fitchburg Mass., has had in process of incubation. The machine is of the single cylinder type and is belt driven. The motor has 3¼ inch bore and 3¾ inch stroke, with high compression. It develops, theoretically, 4 to 5 horsepower. The valves are mechanically operated. For the transmission a V-belt is used, together with a free engine clutch pulley on the motor shaft that is described as being most compact and efficient. Spring construction is used for the front fork. The frame is an arched truss. An extra frame tube from front to rear arches directly over the motor. Between this and the top tube the tank is located.

Free Gauge for Motorcyclists.

Combining a handy motorcycle gasoline gauge with a ruler, giving inch measure and centimeter rule, a neat celluloid souvenir is being given by the Prest-O-Lite Co., of Indianapolis, Ind., to its motorcycling friends. The gasoline gauge, which is simply an extension of the ruler, and which like the rest of the device folds in sections, is finished in dull black with inch markings. Upon being inserted in the tank and then withdrawn, the gasoline adheres to the black surface. The reading is easily obtained of the depth of the gasoline by the contrast between the shiny part which has been in the gasoline and the dull blackness of the part of the measure remaining untouched by the liquid.

Reward for Stolen Belt Drive Indian.

Twenty-five dollars reward is offered for information leading to the recovery of a belt drive 1911 Indian, with 4 horsepower single cylinder engine and Bosch magneto, that was stolen from Ray W. Salmon, of Summit, N. J., on the night of April 14. The machine is finished in blue and its engine number is 45C029. When stolen the machine bore the New Jersey State license number C2455.

Thieves Annex an Excelsior.

Motorcycle thieves in Elyria, O., spirited away an Excelsior motorcycle on the night of the 17th inst. The machine belonged to Dennis Stevenson. Its engine number was 5666, and when stolen it bore license tag No. 28. Stevenson, who lives at 232 East Sixth street, would be glad to hear from anyone who has chanced to see the machine.

Six Contests Entered

100 Per Cen

HEMET, CAL.

On February 24th Lee Sheppard, riding a regular stock single cylinder Harley-Davidson, won every event on the program, including even the pursuit race in which he voluntarily conceded a handicap of one-quarter mile to a powerful double cylinder machine of another make.

ENID, OKLA.

At the Enid Fair, March 11th, a regular stock single cylinder Harley-Davidson won every motorcycle race. The winning machine was nearly a year old and had seen more than 15,000 miles of hard road service. Nevertheless, it lapped the nearest competitor in the fourth mile.

PORTLAND, ORE.

Match race on 2 3-10 mile hill, March 19th, between a 4 H. P. single cylinder Harley-Davidson and a 6 H. P. twin cylinder machine of another make. The Harley-Davidson won the contest by a margin of 51 seconds.

What These Victorie

The winning of these contests places in your hands the most conclusive of evidence; evidence which is indisputable as to the merit of the Harley-Davidson, compared with motorcycles of other makes. And the

What These Winnings Mea

Long ago you began to realize that the motorcycle field was scarcely scratched. You thought there was a big future for the motorcycle dealer, provided he selected the right machine. You carefully looked over the market and selected the Harley-Davidson. Here's

Harley-Davidson

190 L Street

Six Contests Won

Efficiency

PORTLAND, ORE.

Hill climb held under the auspices of the Portland Motorcycle Club, March 26th. A stock single cylinder Harley-Davidson made the fastest time on the hill, regardless of class. There were 16 entries, 5 twins and 11 singles. The single cylinder Harley-Davidson was just 1 min. 2 sec. ahead of its nearest competitor in the 4 H. P. class and 7 sec. faster than the fastest twin cylinder machine entered. Four singles and three twins failed to finish the climb at all.

MEMPHIS, TENN.

Impromptu race at Driving Park. Practically all motorcycles represented. Nearly 40 machines in all, including 4 twin cylinders. A stock single cylinder Harley-Davidson which had seen nearly a year of hard road service overtook everything in the field in two miles, excepting only a twin cylinder machine, which was passed in the third mile.

TAMPA, FLA.

Another runaway for the Harley-Davidson. In the road race held on March 26th over a 90 mile course, of which 35 miles were heavy sand, single cylinder stock Harley-Davidsons won first, second and third places. Another evidence of Harley-Davidson transmission efficiency.

Mean to Riders

machines that made these records are not specially built, high strung racing machines which you could not buy at any price, but stock machines, the exact duplicates of which any Harley-Davidson dealer will gladly sell you.

to Harley-Davidson Dealers

proof that you selected a machine worthy of your confidence—a machine with a future. But it's more than that. It's a machine with a present and every Harley-Davidson you sell this year will bring you more sales.

Motor Company

Milwaukee, Wis.

Six Contests Entered

100 Per Cent

HEMET, CAL.
On February 24th Lee Sheppard, riding a regular stock single cylinder Harley-Davidson, won every event on the program, including even the pursuit race in which he voluntarily conceded a handicap of one-quarter mile to a powerful double cylinder machine of another make.

ENID, OKLA.
At the Enid Fair, March 11th, a regular stock single cylinder Harley-Davidson won every motorcycle race. The winning machine was nearly a year old and had seen more than 15,000 miles of hard road service. Nevertheless, it lapped the nearest competitor in the fourth mile.

PORTLAND, ORE.
Match race on 2 3-10 mile hill, March 19th, between a 4 H. P. single cylinder Harley-Davidson and a 6 H. P. twin cylinder machine of another make. The Harley-Davidson won the contest by a margin of 51 seconds.

What These Victories

The winning of these contests places in your hands the most conclusive of evidence; evidence which is indisputable as to the merit of the Harley-Davidson, compared with motorcycles of other makes. And the

What These Winnings Mean

Long ago you began to realize that the motorcycle field was scarcely scratched. You thought there was a big future for the motorcycle dealer, provided he selected the right machine. You carefully looked over the market and selected the Harley-Davidson. Here's

Harley-Davidson

The Improved New Departure

Every wearing part of the 1911 model New Departure coaster brake, every working member is as hard, tough and indestructible as tool steel; in fact is tool steel.

The taper on the corrugated end of the clutch sleeve has been slightly changed so that the clutching contact of the hub shell on the forward drive is positive, complete and absolutely prevents all slipping.

The improved hardening of the brake drum provides a surface that will resist the most severe braking strains and wear that occur at this point, without cutting or other injurious results. The method of manufacturing the steel brake rings has also been improved.

Dealers who have the new parts write us that the New Departure is now faultless.

The improvements have been perfected without changing the design that has been so popular for years. Not a single feature has been sacrificed that has already put the New Departure in the top notch. With New Departures on your shelves, you can give your customers

RENOLD CYCLE CHAINS

1-2 in. pitch Roller Chain

1-8 in., 3-16 in., and 1-4 in. wide

(515)

The SWEETEST RUNNING and MOST DURABLE CYCLE CHAIN is the RENOLD ½ in. pitch Roller Chain, because:—

On a given diameter of sprocket there are twice as many teeth as for a Block chain.

The use of Rollers greatly reduces the friction between the chain and wheel teeth.

The Roller Chain permits of a better tooth form than the block.

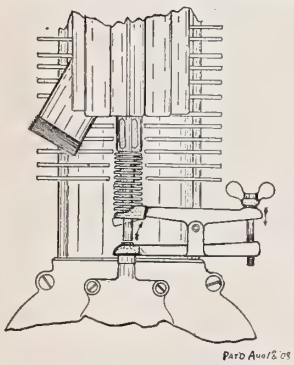
The Roller Chain, width for width, is stronger than the block.

The Roller Chain does not tighten up in mud so readily as the Block type, and adjustment for slack is not so important.

Records show that Renold Roller Chains last nearly twice as long as Block Chains.

The RENOLD TWIN ROLLER CHAIN has many of the advantages of the ½ in. pitch, and any rider can learn what these are without the expense of fitting new sprockets, because the Twin Roller Chain will run on sprockets cut for block chains.

1 in. pitch Twin Roller Chain



1-8 in., 3-16 in., and 1-4 in. wide

HAM'S DERBY
COLD BLAST MOTORCYCLE LAMP.

Made of Heavy Gauge Brass. Finished in Polished Brass, Nickel Plate, Black, Royal Blue, French Gray or Red with Brass or Nickel Trimming.

HAM'S DERBY
Cold Blast Motorcycle Lamp

BURNS KEROSENE OIL

Has none of the bad features of the acetylene and all of the good.

Produces a light of exceptional brilliancy and will not blow or jar out.

Handsomely designed to conform with the graceful lines of the Motorcycle and strongly constructed of Heavy Gauge Brass, all parts riveted.

Measures 9 inches high and is constructed so that the oil cannot slop out to collect. The fount holds sufficient oil to burn 16 to 18 hours, and is securely fastened to the lamp by the lock levers.

HAMLIGHT
QUALITY LAMPS

Fitted with a 4¾-inch Magnifying Optical Lense and Highly Polished Silver Plated Reflectors.

The Side Signals, which are Red and Green projecting Jewels, are arranged to be seen from the front and rear as well as from the sides.

Furnished with Combination Socket to take either round or flat bracket, or with double socket to take a double fork bracket. These Sockets are riveted through the back of the lamp to a steel plate on the inside.

There is a big demand for a good oil burning Motorcycle lamp, as it is far more reliable than gas. Get a sample and show it to some of your rider friends. The business is there—just get after it.

Write for detailed description and price list.

C. T. HAM MFG. COMPANY, Rochester, N. Y.

165th Street and Jerome Avenue **New York City**

The HOLDEN DUPLEX SPRING SEAT POST

PATENT APPLIED FOR

Above is a cut of our new Duplex Spring Seat Post, designed for use on loop frame INDIAN MOTORCYCLES.

With this appliance the rider is continually suspended on a double set of especially tempered coil springs which are adjustable to every man's weight and you may therefore take the longest and hardest of rides, over any sort of roads, secure in the knowledge that you will be entirely free from the jolt and jar ordinarily incident to riding over a rough road-bed. Furthermore you are able to obtain these wonderfully easy riding qualities without the loss of any of the many well known advantages of the INDIAN rigid frame construction.

Altho easily and quickly applied to the 1909 and 1910 INDIAN, when in place the attachment is as solid and free from all lost motion as tho built into the machine.

This seat post is mechanically "right" and we heartily recommend it for the consideration of all those who are looking for personal comfort.

GUARANTEE—We guarantee to replace all defective parts, for one year from date of sale. PRICE TEN DOLLARS.

G. N. HOLDEN, 141 Massachusetts Ave., Boston, Mass.

Motorcyclists and bicyclists should consider the importance of having their tires inflated to the right pressure.

IT IS TIRE ECONOMY AND IT SAVES MONEY

To know what pressure you have in your tires, use a

SCHRADER Universal Tire Pressure Gauge

(Trade Mark Registered in U. S. Patent Office)

(Patented March, 1898—Other Patents Pending)

It will tell the exact pressure in your tires at any time, day or night, by simply holding this Gauge to your Valve for a second. Its recording sleeve remains in place, showing the exact pressure in the tire so that the Gauge can be taken anywhere and read, at night to the front of machine into the light of the lamps. After the pressure has been ascertained the Indicating Sleeve can be pushed back into the Gauge with your finger. No catches or snaps to operate or get out of order. This Gauge is 2½ inches long over all, short enough to apply easily to the smallest diameter of wheel and can easily be carried in the vest pocket or the change pocket of your trousers.

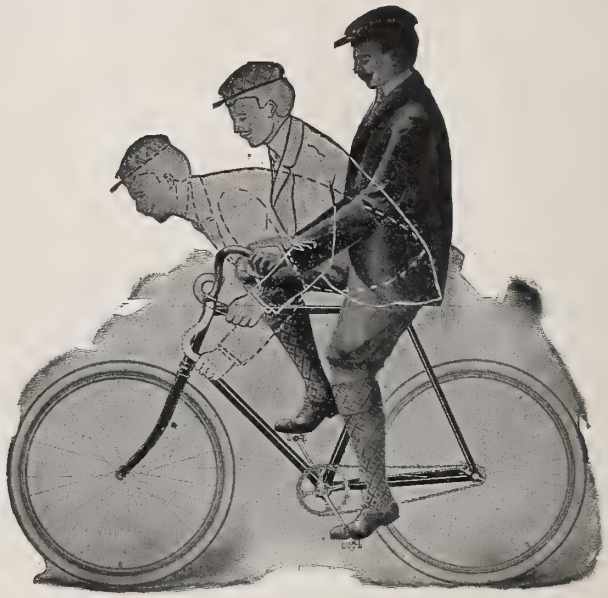
N. S. U.
Motorcycle Book

The 2½ H. P. Lightweight Roadster

THE history of the famous N. S. U. motorcycle is fresh from the press; it's most interesting reading and worth while writing for —DO IT.

It may be true that you own a motorcycle, but perhaps a friend of yours wants to get the best there is, a motorcycle that is simple, reliable, economical to run and above all, one with a Two Speed and Free Engine Gear, Spring Forks and particularly a Spring Frame. That can only be an N. S. U.—tell him about it; you'll surely grant him a favor.



Maybe you would like to change yourself and take up the agency for a Good Motorcycle—write us about it, at any rate.

Send for the Book.

Steering is not the only function of the handle bar!

¶ Cyclists require a proper position of the bar for the hand tension that makes the pedaling most efficient. The position must be different for different conditions, and conditions change according to changes in wind and road.

The KELLY Adjustable Handle Bar

provides that final touch to the best bicycles that makes them yield the maximum satisfaction and comfort to the rider. Man, woman or child will find the Kelly adjustable handle bar an aid to pleasant cycling.

¶ Cycle manufacturers and purchasers of bicycles in large quantities find the Kelly handle bar well worth including in their specifications.

THE ECLIPSE
Free-Engine Pulley

is a practical, variable speed clutch, not a geared two speed. Any speed can be obtained by regulating the disc contact, by means of a simple and efficient handle bar control. We guarantee permanent satisfaction.

Are You Pulley Informed?

Then Be Eclipse Equipped

Worth $50; Sells for $15

¶ More than twenty-two hundred riders thus far this season testify to these statements.

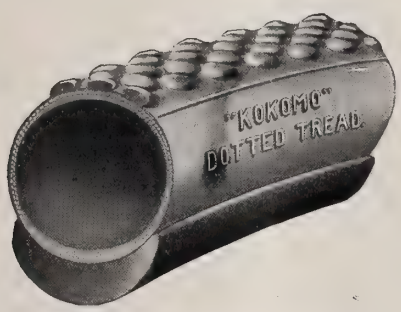
¶ If you are not Pulley Informed, let us mail our literature. Every day more live dealers join our ranks. During unsettled weather we have filled orders with reasonable promptness. When Spring stops flirting, our capacity will be over-taxed. We ask you to become thoroughly satisfied with our assertions. Then get in line quickly. Our claims for quality and service, and for a strongly growing demand are in no way exaggerated.

ECLIPSE MACHINE CO., Elmira, N. Y.

Here is a quartet of

KOKOMO Bicycle Tires

that fully meet the spring situation.



Kokomo Defender Special

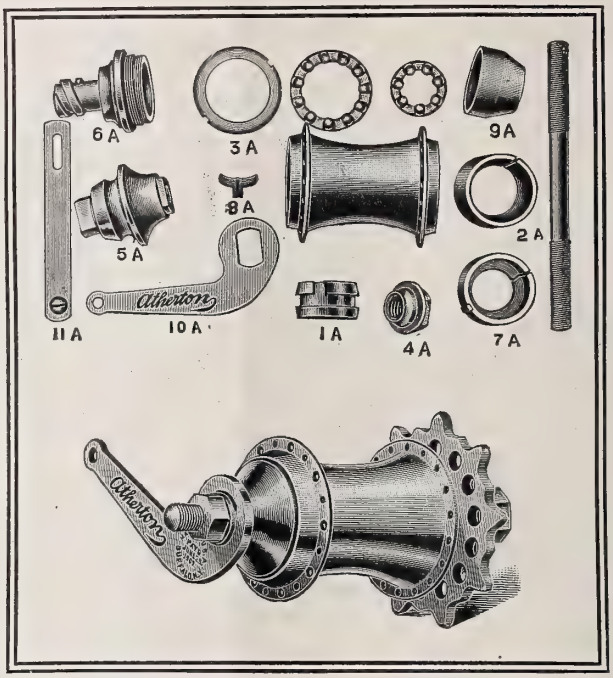
This popular guaranteed tire is specially designed and constructed for road use. It is made from the best materials obtainable, being carefully built up by hand with pure para inner tube, and, owing to the very high quality of the inner tube used, a puncture is very easily repaired.

Kokomo "New Oxford"

A medium price tire, yet so good in quality that it does not do it justice to call it a medium grade tire. We have built these tires so that in case of puncture they will not be worthless but can be repaired. Also furnished in smooth tread.

Kokomo Dotted Tread

A tire that prevents skidding and is safe and reliable on wet, slippery roads and city streets. Of high quality and careful construction. Furnished in road weight or in thick tread.



Kokomo Guaranteed Red Thorn

Made of red rubber, is extra heavy and is built especially for long service.

Are you profiting by what we offer you in Kokomo Tires?

KOKOMO RUBBER CO., Kokomo, Ind., U.S.A.

—And Still They Come

Another World's Record Just Smashed on Goodyear Blue Streaks

On an Indian Motocycle, especially equipped with Goodyear Blue Streak Racing Tires, Jake De Rosier rode 83 miles and 135 yards in 60 minutes, breaking every world's amateur and *professional* record from 1 to 92 miles.

Close on the heels of this triumph for Goodyear Blue Streaks, follows another, yet more significant. Don Johns, a 16-year-old amateur, at the Los Angeles Motordrome, April 4, covered 20 miles in 14 minutes and 23 3-5 seconds, lowering every *amateur* record from *1* to *20 miles*. He rode on an Indian Motocycle, *likewise equipped with*

Don Johns and the records he made on Goodyear Blue Streaks

1 mile	00:41 2-5	11 miles	07:52
2 miles	01:23 4-5	12 miles	08:35 2-5
3 miles	02:02	13 miles	09:19
4 miles	02:49 2-5	14 miles	10:02 2-5
5 miles	03:32 3-5	15 miles	10:46 1-5
6 miles	04:16	16 miles	11:30
7 miles	04:59 1-5	17 miles	12:13 2-5
8 miles	05:42 1-5	18 miles	12:57
9 miles	06:25 2-5	19 miles	13:40 1-5
10 miles	07:08 4-5	20 miles	14:23 3-5

GOODYEAR

Blue Streak Racing Tires

Now Hold All Professional and All Amateur Records

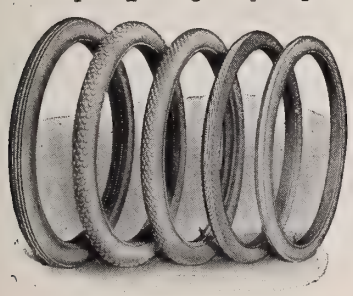
To stand up under the strain of such an endurance run as made by De Rosier, a tire *must* possess the extreme limit of *strength*, and to make possible such a continuous burst of speed as exhibited by *Don Johns*, it *must* possess the extreme limit of *resiliency*.

Racing tires like Blue Streaks, that are *known from actual performance* to have such qualifications, are plainly the most desirable tire for you to use. And *every* Blue Streak Tire is tested and must measure up to the highest standard of efficiency before it can leave the factory.

Two kinds of treads for Blue Streaks—one for dirt, another for board or cement. Both types are made by our own exclusive method of laying *threads parallel*. Goodyear *strength* and *resiliency* is the result

Goodyear Blue Streaks, as well as all Goodyear Motorcycle Tires, are built by the world's greatest tire experts. Nor do they charge a penny extra for the priceless value of their years of successful automobile tire-building experience.

Not only do they use the finest grade properly compounded rubber and the best grade automobile tire fabric in the construction of Goodyear tires, but they build them by an exclusive process of our own. This process absolutely prevents formation of air cavities in the rubber —eliminates "blisters" and "weak spots"—and forever does away with *blow-outs*.



Goodyear tires give better cushioning effect because they are larger than any other tires made for same size wheel; also tread is thicker, which helps account for their acknowledged *Wear-Supremacy*.

And Goodyear tires *stay on*. They are molded to exact duplicate of *your own* rim—beads fit rim clinch perfectly, bind tire to the rim in a grip that *never gives* nor *lets go*. Ride one of these five great motorcycle tires.

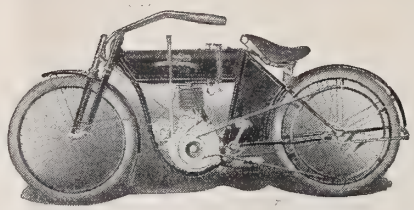
Jake De Rosier

1 2 3 4 5

Five Great Motorcycle Tires

1. **Goodyear Corrugated Tread Tires**—For the average give and take road.

2. **Goodyear Studded Tread Tires**—For mud, sand, snow and ice travel. Great for endurance runs **mud can't gather on tread.**



3. **Goodyear Non-Skid Tires**—For city use when pavements are often slippery and dangerous.

4-5. **Goodyear Blue Streak Racing Tires**—*The tires that hold all records.*

If you want **greatest proven tire value,** write today for our illustrated booklet on motorcycle tires.

PERSONS OLD COMFORT

FOR BICYCLES

Size of Top 11" x 7¾". List Price $2.75

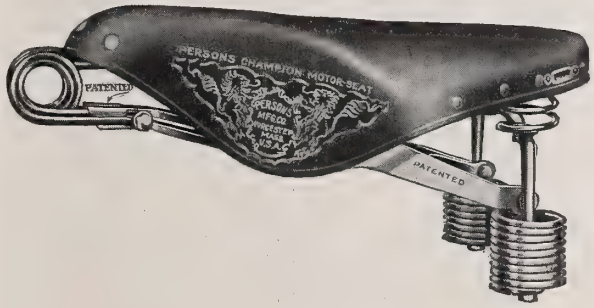
SUCH A SADDLE! AT SUCH A PRICE!

And you know Saddles BEARING OUR NAME contain EVERY ELEMENT OF QUALITY

Below are a Few Points of Superiority in the OLD COMFORT

TOP made of solid oak bark tanned leather that will not stretch. Our tops made from finest quality hides tanned on our own premises. Only selected hides and the best parts are used.

Riveted at pommel with solid copper rivets and at REAR OF CANTLE (the only proper way)—never on top of cantle. Note carefully we are the only saddle manufacturers employing these methods of riveting tops.



The springs and trusses are substantially made from finest quality steel wire and all metal parts are nicely nickel plated.

Note especially the double cup washer with two bolts which fasten the front spring to the truss. Besides being a most substantial method of fastening it holds the parts permanently secure and prevents side sway. It is also a neat construction.

All these neat refinements, truly mechanical features, in fact, "the finishing touches," are to be found only in saddles of our make where Quality is the keynote in their construction.

Motor Agents!

This superior quality Saddle as equipment makes any machine a BETTER SELLING PROPOSITION. It can be had for the asking at no extra cost to you.

MORE ATLANTIC CITY MEET PLANS

Baseball Game with Teams Chosen from the Trade—Manufacturers vs. Accessory Men.

Recreation as well as business is being provided for in the arrangements for the midsummer trade meeting of the Cycle Parts and Accessories Association, the National Association of Cycle Jobbers, the Motorcycle Manufacturers' Association and the bicycle manufacturers, and for one feature of the sport that is scheduled, a baseball game is decided upon. W. J. Surre, sales manager of the Continental Rubber Works, Erie, Pa., who is doing a great part of the work in connection with arranging for the convention, is taking steps to line up the teams.

"We have decided to add a baseball game to our program for the Atlantic City convention," says Surre, "because we think it will do a whole lot to promote sociability and fun. I learn that quite a number of the motorcycle manufacturers are very enthusiastic ball players, and it is our intention to have the ball game on the last day of the convention, in the afternoon, one team to be picked from the motorcycle and bicycle manufacturers, and the other team from the jobbers and parts makers. This will give us quite a field to select from, and we ought to get a couple of pretty good teams."

American Cycle Incorporates.

The American Cycle Mfg. Co., of Chicago, Ill., which is placing again on the market the American truss-frame bicycle, has elected the following officers: A. I. Innes, president and treasurer; J. L. Richards, vice-president; W. E. Richardson, secretary, and W. W. Garrison, advertising manager. The company has incorporated with a capitalization of $10,000 for the present. Its offices are at 319 Michigan boulevard, and pending the erection of a factory, it has arranged to have its bicycles made by the Great Western Mfg. Co., of LaPorte, Ind.

Horsey Making Motorcycle Patch.

The Horsey Mfg. Co., of Cleveland, O., which for some time has been making "no-cement" tire patches for automobiles, is now producing a smaller size patch especially for motorcyclists. Motorcyclists found the regular patches too large, so the company is putting up small packages containing patches which are suited to motorcycle tires.

Fisk Opens Branch in Fresno.

A branch in Fresno, Cal., has been opened by the Fisk Rubber Co., of Chicopee Falls, Mass., in charge of R. D. Macphail. It is located at 1362-4 I street, and is established to bring direct factory service to users of Fisk products in that vicinity.

Simpson in Trade in Dallas.

H. A. Simpson, formerly of Fort Worth, Tex., but now of Dallas, has become actively interested in the American Motor Co., of Dallas, and from now on will be engaged in the selling of M. M. motorcycles. Simpson is F. A. M. commissioner for Texas.

Continental Moves New York Branch.

The Continental Rubber Works Co., of Erie, Pa., has changed the location of its branch in New York City. From 43 Murray street the branch has been moved a few doors to 35 Murray street.

DODGES STOLEN "BARGAINS" NOW

Concern Learns the Sad News Too Late—Engine Number Figures in Some Clever Detective Work.

Although the firm advertises to buy second hand motorcycles, if a person should call on the City Supply Co., 56 Warren street, New York City, about this time and offer to sell a machine he would have a pretty hard time disposing of it unless he could show cast iron proof of his ownership of it. This caution in purchases is the result of a lesson the City Supply Co. has learned in regard to buying second hand motorcycles from strangers.

The tale dates back to April 14, when Ray Salmon, of Summit, N. J., was the victim of his belt drive 1911 Indian being stolen from the stable where he kept it. The machine was taken after 10 o'clock at night. When Salmon discovered the theft next day he immediately got busy and sent out an alarm and also had circulars printed describing the machine and offering $25 for its return. The next development occurred last week when a young man rode up to the branch of F. A. Baker & Co., 2142 Broadway, and offered to sell a 1911 Indian belt drive machine for $150.

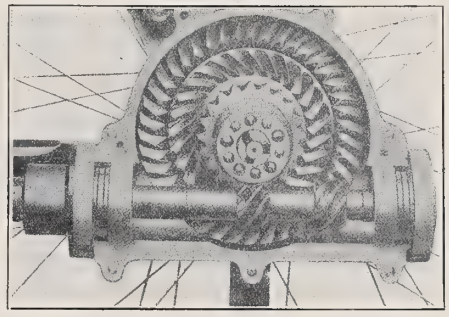
Ferdinand Mercier, who was in the store at the time, called up his company's downtown store and told them the circumstances. He suspected that it was the stolen motorcycle and received instructions to get the motor number and if it was the same as that on Salmon's machine to hold the rider and get the machine in the store. When Mercier tried to get the motor number the fellow became suspicious and jumped on and rode away before anyone

could stop him, and in a few moments had disappeared among the traffic.

A few days later a young man walked into Baker's down-town store on Warren street, and posed as a prospective buyer. He asked numerous questions about the care and operation of Indian machines, from Arthur Rochow of the Baker staff. Finally he confided to Rochow that he had a chance to buy a 1911 Indian belt drive at a bargain. Rochow immediately had visions of Salmon's machine and advised the visitor to get the engine number and see if it was the stolen machine before he bought.

The visitor went away and Rochow felt sure that he already had bought the machine, which proved to be the case. After leaving Baker's, the visitor went down the street to the City Supply Co., and told them that the machine he had bought from them was stolen property and that he wanted his money back. This was on Saturday morning. He returned the machine and got his money.

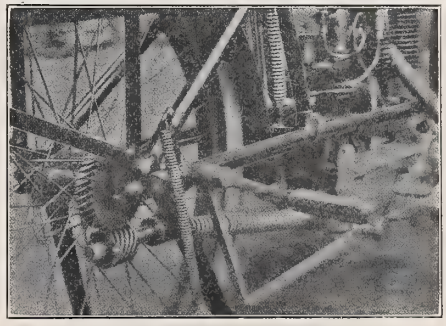
It appears that on last Wednesday a blond young fellow, with college manners, brought a 1911 Indian belt drive machine to the City Supply Co., and said that he needed the money and would sacrifice it for $150. He gave his name as Geo. B. Haward, of Greenwich, Conn. He disarmed whatever suspicions the firm might have had, by offering to leave the machine to be sold on commission. He agreed to leave it until Saturday, when he said that he would take it elsewhere if it were not sold.



Next day a purchaser came along in the person of Rochow's visitor. On Friday Haward passed the store in the afternoon, and he was called in, and after going before a lawyer and making an affidavit that he owned the machine he was paid $150 for it.

It was on Saturday morning that the City Supply Co. was informed that the machine was a stolen one. Why, oh why had the proprietor not waited until Saturday before paying? Being averse to suffering the loss of the money, the firm was unwilling to give up the machine until Salmon had the sheriff put up a bond of $500 that he would be responsible for its safety. This was done and the machine now is stored across the street with the Hayes Rubber Co., and on the 11th the courts will decide whether Salmon will get his machine back without having to reimburse the City Supply Co. for its loss. The company has retained an attorney and indicates that it will fight against giving up the machine unless it receives the money that it paid out for it in good faith. Although feeling sure that Haward had given a fake name and address, the City Supply Co. sent a telegram to him at Greenwich and it was returned, verifying its suspicions. It has a good description of him, however, and feels sure that it will get him eventually.

NOVEL WORM GEAR TRANSMISSION



Buch System Gives Three Speeds, with Direct Drive on Each—Flexible Shaft for the Corah.

Worm drive transmission is achieving considerable momentum in England, as is evidenced by the fact that several machines embodying this type of drive already have appeared, and one or two experimental systems for motorcycles, that lack incorporation in machines as yet, are being exploited. Among the most novel of the latter is a three-speed worm gear developed by Max Buch, 23 Meriden street, Coventry,

BUCH THREE-SPEED WORM DRIVE

in which all the gears are in mesh all the time and there is direct drive on all speeds. The drive shaft from the engine is coupled to the horizontal shaft of the gear, the latter shaft running longitudinally under the hub on the left side of the rear wheel of the motorcycle, as shown in the illustration. On this horizontal shaft the worm pinion directly under the hub axis line engages both the projecting center gear of the hub and the second or inner of the

CORAH WORM GEAR AND SHAFT

disk gears, while the pinion at the rear of the horizontal shaft engages the outer or larger of the two disk gears. From the center to the outer, the three gears in the hub are sleeved, one over the other, and by a three-position clutch in the hub the rear wheel of the motorcycle may be locked to rotate with any one of the three while the other two revolve idle. No arrangements have yet been made to place the gear on the market.

With ut embodying any variable speed features, the Corah motorcycle, made at King's Norton and illustrated and described in Motor Cycling, of London, reveals worm drive at the rear hub, with a flexible spring shaft from the engine. The illustration shows the mechanism with its outer protecting case removed.

Making Whistles that are a "Scream."

Motorcycle scream whistles are being manufactured at the American Motor Co.'s branch in Chicago, Ill., 2724 Michigan avenue. The whistle is the invention of Guy M. Greene, the branch manager, and is claimed to be one of the lightest on the market, weighing only 14 ounces. It may be operated from the handle bars, is suitable for either singles or twins, and is designed to sound both at very low speed and at the maximum of the machine.

Cycle Exports Gaining in Jumps.

Quite as marvelous as the growth of the home demand, the export demand for American bicycles is continuing to grow by leaps and bounds. The shipments of bicycles and parts to foreign countries during March, 1911, amounted to $78,370, as against $52,318 in March of 1910. For the nine months ending with March, 1911, the total is $607,452, as against $428,532 for the same period a year ago, showing a gain of $178,920 in the nine months.

Texas Dealer Wants Special Lines.

Charles Bailey has opened a bicycle shop in Marfa, Tex. He is seeking connections with wholesale houses with a view to getting the agency for special lines of bicycles and accessories.

Burges Gets Repair Shop Certificate.

Austin W. Burges, the pioneer motorcycle dealer and club booster of Houston, Tex., has received an F. A. M. repair shop certificate of the first class. Burges handles the Indian and Excelsior.

Detroit Motorcycle Takes Out Papers.

The Detroit Motorcycle Co., of Detroit, Mich., has filed articles of association, the capitalization being $10,000. The principal stockholders are James J. Brady, William J. Nagel and Judge William F. Donnolly.

Hall Cycle Incorporates in Waco.

The Hall Cycle & Plating Co. has incorporated in Waco, Tex., with a capitalization of $3,000. The incorporators are B. C. Manton, Lawrence Hall and T. G. Hall.

Will Handle Thor in Elgin.

The Elgin Tool Works, Elgin, Ill., is the latest concern in that section to take up the sale of motorcycles. It has secured the Thor agency.

Another Grand Rapids Dealer.

James Hoogerhyde has opened a bicycle shop in Grand Rapids, Mich. It is located at 111 West Bridge street.

GIVES TOURISTS FREE GARAGING

Gliesman Makes Liberal Offer to F. A. M. Visitors in New York—Big Garage is Now Complete.

Free garaging over night for F. A. M. motorcycle tourists going through New York City is the cordial offer that is being made by the Tiger Cycle & Aeroplane Co., of New York, which has its store at 782 Eighth avenue and its big motorcycle garage at 318-320 West 48th street, just around the corner. No charge will be made for the night's safe housing of the machine, the only requirement being that the rider show his F. A. M. membership card to prove that he is an F. A. M. member in good standing. Gasoline can be obtained at 20 cents a gallon and three grades of oil at 50 cents, 75 cents and $1 per gallon, respectively. The garage is open night and day, and when the store on Eighth avenue is closed, the garage is easily located by an illuminated Thor agency sign.

All the necessary alterations and other arrangements pertaining to the big motorcycle garage are now complete, so that it can take care of 350 motorcycles and 25 tri-cars without crowding. The place is the fruition of an ambition on the part of H. A. Gliesman, its proprietor, to have one of the biggest and most modern motorcycle garages in the country. Gliesman is a motorcycle veteran, his F. A. M. membership being No. 157. He holds certificate No. 2 for an F. A. M. repair shop of the first class. The new garage is in the central section of the city and is of dimensions that can accommodate a large number of machines without packing them like sardines. There is plenty of extra room, where motorcyclists may clean, adjust and tinker with their mounts to their heart's content. The place is 95 per cent. fireproof in construction throughout, and there is no tugging or hauling of machines up and down stairs, as the elevator service is of the best and is available at all hours of the day or night. The motorcycle repair shop that is maintained in connection with the garage is adequately equipped with modern machinery and is under the direction of an expert motorcycle mechanic.

Manufacturers Invited to Sessions.

The Sixteenth Annual Convention of the National Association of Manufacturers will be held at the Waldorf-Astoria Hotel, New York City, on May 15, 16 and 17. Results of the investigations made in Europe by the Association's special commissioners covering the subjects of accident prevention and industrial relief will be presented in the form of a voluminous report to the convention. Other questions of economic importance, such as immigration, industrial education, a reform of the patent laws and the creation of an independent tariff commission will also be considered. The sessions will be open to the general public and the Association extends a cordial invitation to all manufacturers to attend, whether members of the Association or not.

Hendee Occupies Its Coast Wigwam.

With the completion of the finishing touches by the decorators, the recently created factory branch of the Hendee Mfg. Co., in San Francisco, Cal., has taken possession of its new home at 234 Van Ness avenue. C. C. Hopkins, who is the only local Indian representative that city has known, is manager of the establishment, which will give the coast agents and patrons all the advantages of factory service at short range. One of the most up-to-date features of the branch is a reading room, where all the motorcycle publications are on file.

Package Delivery by Motorcycle.

Charles Manuel, of Springfield, Mo., has just installed a motorcycle package delivery in that city. He has a fleet of five motorcycle vans and his headquarters are in the old rink on Pickwick street. This enterprise is an innovation in Springfield, but is expected to prove very successful. The entire city will be routed and packages weighing not to exceed 150 pounds will be accepted for delivery.

"Blue Streaks" Fared Well in April.

April was a good month for motorcycle victories on Goodyear "blue streak" tires, according to S. A. Falor, manager of the motorcycle department of the Goodyear Tire & Rubber Co., Akron, O. Donald A. Johns broke all amateur records from one to 20 miles on an Indian equipped with "blue streaks"; the same tire equipment won first and second in the one mile track race and first in the five mile race of the Harlem Motorcycle Club, of New York, at Brighton Beach; and J. W. Brewer, on Goodyear tires, captured second in the 17 mile road race on the Motor Parkway, Long Island.

Keeps Tabe on Bosch Spark Census.

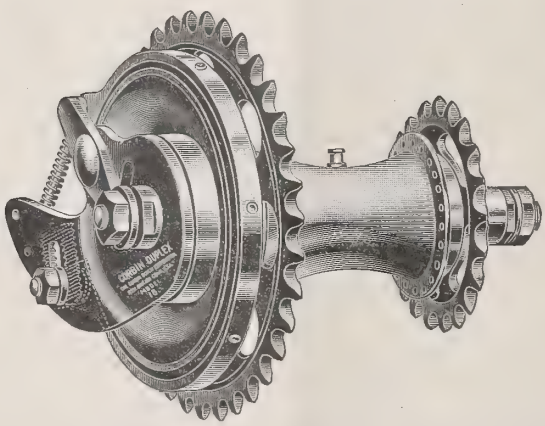
A modest little matter of 132,531 sparks in a little over an hour, is the way A. H. Bartsch, of the Bosch Magneto Co., New York City, figures the performance of the Bosch magneto on Jake DeRosier's motorcycle when DeRosier not long ago smashed a bunch of world's professional motorcycle records by going 92 miles in 66 minutes and some odd seconds. He calculates it all by simple arithmetic based on the number of revolutions of the twin cylinder engine in turning the rear wheel of the machine enough times to make the distance. Still further to impress his point as to the reliability of the Bosch magneto, Bartsch is willing to give inquirers the number of sparks which has been given by a Bosch used on the motorcycle of the Reverend E. W. Haswell, a motorcycling clergyman. The clergyman has used the one magneto for 70,000 miles at 5 sparks per revolution of his 26-inch back wheel. Bartsch supplies the answer on a reel of ticker tape.

Henry is Buffalo's New Sheriff.

John W. Henry, president and treasurer of the Vim Cycle & Hardware Co., of Buffalo, N. Y., has been appointed sheriff of Buffalo and Erie County. He was appointed by Governor Dix, to fill the unexpired term of Henry F. Jergo, who resigned to become deputy excise commissioner. Henry assumed his office on the 6th inst.

WHERE DIAMOND MOTORCYCLE TIRES ARE MADE.

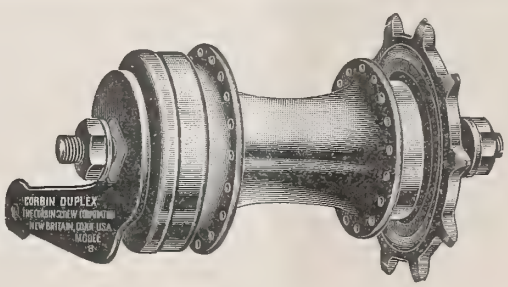
Motorcycle tires can claim their share in building up the immense plant of the Diamond Rubber Co., of Akron, O., as the company has been making Diamond tires for motorcycles for some time. The company was organized in 1898, and 12 years ago 200 men were employed, the factory area was 2½ acres and the total horsepower of the plant was 400. At the present time the plant, shown in illustration, has over 5,000 employes, has an area of 35 acres, and its machinery is kept in operation by over 4,000 horsepower generated in a mammoth central power plant.



The demand for Corbin brakes is this season more than double what it ever was before. Corbin quality and satisfaction cause that demand.

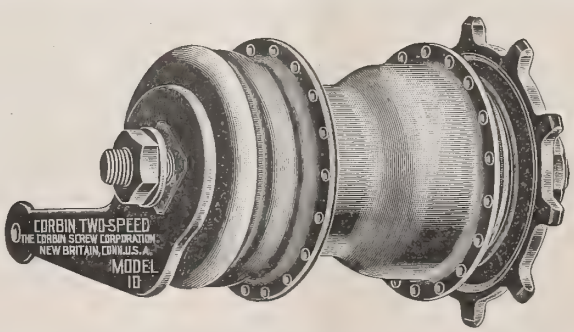
THE CORBIN SCREW CORP. CORBIN NEW BRITAIN, CONN. U.S.A.

CORBIN



Corbin V-Band Motorcycle Brake

Built on a scale commensurate with the duties of a high speed motorcycle brake.



Corbin Duplex Bicycle Coaster Brake

In every part and function a truly perfect coaster brake.

Corbin Two-Speed Coaster Brake

Giving the cyclist high or low gear at will, together with coasting free wheel and efficient brake.

NEW YORK, MAY 6, 1911.

For Gregariousness or Solitude.

In practically every motorcycle club there are to be found two classes of riders, viz., those who like company and go with the crowd, and those who like solitude and go off by themselves, away from the beaten paths. Some riders confess frankly that they are unable to extract any pleasure or enjoyment from a motorcycle ride unless they have company along to relieve the monotony, while others prefer to commune only with themselves and nature and are able to derive entertainment or diversion only by getting away from their fellows and civilization and losing themselves on solitary rambles through the seldom traveled sections.

For either class of rider, the motorcycle lends itself more readily than any other vehicle. If the rider wants company he can affix a tandem attachment or a side car and take some friend along, or if he prefers to ride solo he can find plenty of other riders who will be glad to make up a party. On the other hand, the rider who prefers to ramble by himself can do so without inconvenience to anyone and at the same time is not lugging along idle seats as would be the case with a motor car where the driver preferred rather to be alone.

In meeting these various whims of different classes of riders the motorcycle is peculiarly adapted to the purpose to which it is put in helping to make life worth living for those who seek in it a source of enjoyment. It offers an opportunity either to drop everything and run away from the cares and worry of work without having to take another along, or to make up a jolly party out for a good time, just as the rider's fancy dictates. Its "multiple unit" feature is one of its chief attractions and tends to make it appeal to men of many moods.

Making Haste with Decency.

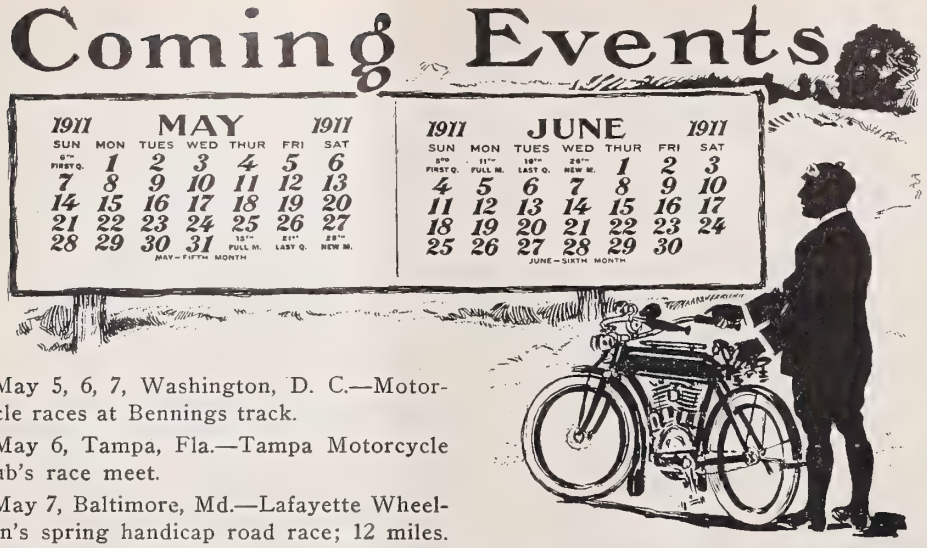
Of the many admonitions of various sorts that are offered to motorcyclists, and particularly to beginners, there is at least one that should be given more than passing notice, and that is the observance of road rules and the danger of shooting through street or road intersections at high speed. The average motorcycle beginner when he is possessed of a machine becomes intoxicated with the great speed at his command and thinks only of covering distance in the shortest possible time.

In this frenzy to "get there" he is apt to forget all sense of danger and takes chances that a conservative person would regard as suicidal. In these days of traffic-clogged city streets, "making time" is attended with big risks unless caution is observed. Veteran riders know that maintaining a moderate pace in crowded sections where there are many cross streets will enable them to cover more ground in a shorter time than high speed followed by frequent emergency stops or slowdowns.

When a motorcyclist is in a hurry in a city he will find that the best way to cover ground quickly is to beat it on the straight stretches between street crossings, where he has only the road in front to worry about and is not exposed to the danger of teams or motor cars shooting out from the side without warning. This is the great danger of passing cross streets at high speed, and has been the cause of many accidents, for it is almost impossible to see a vehicle coming through a cross street in time to stop when traveling fast, because of the buildings. The same warning applies to shooting through country road intersections at a pace which means "taking a chance" as to whether the way is clear on all sides.

Aside from the wisdom of using caution for his own sake and protection, the motorcyclist should have regard for that road courtesy which shows consideration for the rights of others and stamps the rider as a gentleman. Not a little of the criticism which has been directed against motorcyclists is due to their indifference to the rights of other road users, and it should be the aim of riders so to conduct themselves when on the roads that they will command the respect and good will of those whom they meet. At the present time when the public is giving more attention to motorcyclists and the sport, the manner in which the riders conduct themselves will do much to shape public opinion for or against them.

Detachable Rims for Motorcycles.



Observing the use of quick detachable tires and rims on motor cars, some motorcyclists have been led to inquire why this form of tire equipment could not be adapted to motorcycles, and it may be news to many of them that the experiment was tried on a considerable scale several years ago, when one of the big tire companies brought out motorcycle tires with detachable rims. Their use was by no means an unqualified success, however, and they soon disappeared. One rider who tried them relates the results of his experience as follows:

"I was guilty of using detachable rims one season, but I certainly do not want to use them again, as I do not think they are as handy or neat, nor do they have the strength of the single or double clincher rims. I had to get off repeatedly and get a couple of rocks to straighten out the dents that were caused by stones. Of course, I understand that this could have been remedied by heavier rims.

"Nine-tenths of the punctures can be repaired on a single or double clinch tire simply by removing a foot or so on one side, effecting the repair and being on the way again in ten minutes. It takes at least ten minutes with a detachable rim. Taking it all in all, I am not very enthusiastic over quick detachable rims."

"The motorcycle dealer or rider not getting 'next' through these weekly issues of the Motorcycle Review is way behind, sure." —A. T. M. Sheeder, Minersville, Pa.

Coming Events

May 5, 6, 7, Washington, D. C.—Motorcycle races at Bennings track.

May 6, Tampa, Fla.—Tampa Motorcycle Club's race meet.

May 7, Baltimore, Md.—Lafayette Wheelmen's spring handicap road race; 12 miles.

May 7, New York City—Harlem Motorcycle Club's club championship races at Brighton Beach track.

May 7, New York City—Empire City Wheelmen 15 mile handicap bicycle road race, open, starting from Floral Park, L. I.

May 7, Chicago, Ill.—Second annual reliability run of the Chicago Motorcycle Club to Waukegan, Libertyville, Elgin, Aurora and return.

May 7, New York City—New York Motorcycle Club's annual double spring century run to Southampton, L. I., and return.

May 14, Guttenberg, N. J.—Opening motorcycle race meet on Guttenberg track.

May 14, New York City—Century Road Club of America, New York State Division, spring bicycle century run.

May 21, Baltimore, Md.—Crescent Bicycle Club's spring 50 mile pleasure run.

May 21, Brooklyn, N. Y.—Invincible Motorcycle Club's 150 miles spring run on Long Island, north shore.

May 21, Baltimore, Md.—Century Bicycle Club's 50 mile run to Reisterstown.

May 21-22, Seattle, Wash.—Two day endurance contest of the Seattle Motorcycle Club to Vancouver, B. C., and return.

May 24, Toronto, Canada—Toronto Motorcycle Club's endurance run to London and return, 256 miles; open.

May 25, Zanesville, O.—Motorcycle races at fair grounds.

May 27, Akron, O.—Motorcycle races; open.

May 28, New York City—Century Road Club Association's 30 miles handicap road race, Floral Park, L. I.; open. Rain date, June 4.

May 28-29-30, Cleveland, O.—Three day endurance run of Cleveland Motorcycle Club.

May 28, 29, 30, Chicago, Ill.—North Shore Motorcycling Club's race meet at Hawthorne track.

May 28 and 30, Terre Haute, Ind.—Terre Haute Motorcycle Club's race meet; open.

May 29-30, Newark, N. J.—Twenty-four hour endurance run of the New Jersey Motorcycle Club to Atlantic City and return.

May 30, Bridgeport, Conn.—Bridgeport Motorcycle Club's race meet.

May 30, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

May 30, Norwich, Conn.—Norwich Motorcycle Club's reliability run.

May 30, Detroit, Mich.—Racemeet of the Motorcycle Club of Detroit Wheelmen at State Fair track.

May 30, Springfield, Mass.—Motorcycle race meet of the Springfield Motorcycle Club, at the Springfield Stadium.

May 30, Elmira, N. Y.—Elmira Motorcycle Club's first summer race meet.

May 30, Newport News, Va.—Peninsula Motorcycle Club's endurance run to Richmond and return.

May 30, Long Branch, N. J.—Long Branch Cycle Club's second annual road race meet; open.

May 30, Asbury Park, N. J.—Twenty-five mile road race of the Monmouth Cycle Club.

May 30, Plainfield, N. J.—Third annual 25 mile handicap cycle race of the Plainfield Cycling Club.

May 30, Grand Rapids, Mich.—Bicycle and motorcycle races at Michigan State Field Day, under auspices of the Western Michigan Cycle Club.

May 30, Rome, N. Y.—Rome Motorcycle Club's 250 mile endurance run.

May 30, Wheeling, W. Va.—Ten mile bicycle road race; open.

May 30, Boise, Ida.—Boise Motorcycle Club's road races.

May 30, Salt Lake City, Utah—Eighteen mile bicycle road race.

May 30, Rockford, Ill.—Ideal Motorcycle Club's race meet at Driving Park.

May 30, Elgin, Ill.—Elgin Motorcycle Club's race meet at Wing Park.

May 30, Rockford, Ill.—Ideal Motorcycle Club's race meet at the driving park.

June 4, New York City—Concourse Motorcycle Club's fourth annual run to Savin Rock, Conn., and return; open.

June 4, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Greenfield, Springfield and return; 175 miles. Second section.

June 18, Baltimore, Md.—Crescent Bicycle Club's annual spring road race.

June 18, Floral Park, L. I.—Century Road Club of America, New York State Division, 50 mile handicap bicycle road race; open.

July 1, Waterloo, Ont.—Dominion cycle race championships.

July 3, Douglas, Isle of Man, Great Britain—Fifth senior international Tourist Trophy race; 187½ miles.

July 4, Jacksonville, Fla.—Jacksonville Motorcycle Club's race meet.

July 3-9, Rockford, Ill.—Racing carnival of the Illinois-Iowa Motorcycle Association.

July 4, La Salle, Ill.—Third annual open motorcycle race meet of the Illinois Valley Motorcycle Club.

July 4, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

July 4, Savannah, Ga.—Savannah Motorcycle Club's race meet.

July 4, Asbury Park, N. J.—Opening motorcycle meet at the Asbury Park track.

July 4, Grand Rapids, Mich.—Annual open bicycle road race of the Western Michigan Cycle Club.

July 10-15, Buffalo, N. Y.—Annual national convention and national championship race meet of the Federation of American Motorcyclists.

July 15, Rochester, N. Y.—Rochester Motorcycle Club's race meet at Crittenden Park.

July 16, New York City—Motorcycle Touring Club of New York's second cup trio-trial, Newburg and return, 150 miles; open.

July 18-21, Alliance, O.—Motorcycle races at Rockhill track.

August 1-2-3-4, Atlantic City, N. J.—Summer meeting of the Cycle Parts and Accessories Association and the National Association of Cycle Jobbers.

August 6, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Rockport and return; 200 miles.

August 20, Grand Rapids, Mich.—Annual open, six hour, two man bicycle team race of the Western Michigan Cycle Club.

September 10, New York City—Century Road Club Association's 100 miles record run; open. Rain date, September 17.

SEVEN SPIN PERFECT AT 31 M. P. H.

Fast Reliability Run on Savannah Grand Prize Course—Spoils are Equitably Divided.

When a motorcycle reliability run scheduled for Memorial Day takes place a month ahead of the calendar designation of that anniversaiy and still occurs on Memorial Day—and that without juggling of dates—it may occasion wonder. Nevertheless, this is just what the Savannah (Ga.) Motorcycle Club brought about, the explanation being very simple, for Memorial Day in the South falls on April 26, more than a month earlier than in the northern states of the Union.

ON THE LAST LAP OF THE SAVANNAH 105 MILE RUN

From a field of 27 starters, seven completed the club's 105 mile jog over the Grand Prize course without penalty and earned perfect scores. The lucky seven were as follows: G. F. Balmer, Harley-Davidson; Desse Schrivalle, Indian; W. H. Williams, Thor; M. M. Martin, Indian; A. V. Martin, Indian; A. V. McGuire, Merkel; C. N. O'Neil, Merkel; W. M. Wheply, Thor. The course, which was 9½ miles to the lap, was covered 11 times, and with such excellent roads as the illustration shows, the wonder is that there were any failures. The contest was called an "endurance run," but more properly was a joy ride.

The schedule was exceptionally fast, 31 miles an hour, but considering the nature of the roads it could not be said to be hard to maintain. An innovation introduced to keep the riders moving was a "trailer car," which brought up the rear, and any rider that allowed the car to pass him was out of the run. Starting at 3 p. m., the contest finished at 6:15, after which the machines were submitted to a technical examination.

Troubles commenced in the very first lap, when O. A. Meyer, Pierce, retired with valve spring trouble. The next time around, J. Rossignal, N. S. U., said goodbye to the prizes, on account of a misbehaving magneto. W. B. Creager, Excelsior, withdrew in the third lap for want of oil, and the same cause retired J. Cafiero, Harley-Davidson, on the fourth circuit. The oil hoodoo also "got" L. R. Buckner, Harley-Davidson, on his fifth time around. On the last lap the hoodoo changed from oil to tires, and F. H. Balfour, Harley-Davidson, and F. I. Gibson, Merkel, were erased from the perfect score sheet.

While all these unfortunates were being eliminated, several of the others were drawing penalties. The most serious mishap of the contest occurred in the third lap, when W. S. Rustin, Indian, collided with H. A. Keck, Harley-Davidson, and broke three spokes in the latter's rear wheel. Both men were able to continue, but Rustin lost a package of points for his carelessness. In the seventh lap J. D. Ivey, Excelsior, was suddenly confronted with the choice of butting a horse and team or taking a ditch. He wisely chose the ditch and came off with nothing worse than a broken crank.

When the technical committee, which, by the way, is rather a luxury in motorcycle events, had completed its work, the prize distribution question came up and here again the Savannahans broke away from conventionalities. There was some $70 worth of merchandise, consisting of four articles, and it was decided to reward only those who earned perfect scores. This would have given each of the seven perfect riders prizes of about $10 cash value, but this was reduced slightly by deciding to give the driver of the "trailer car" $5 in trade for his services. The official scores:

Contestant and Machine.	Points.
G. F. Balmer, Harley-Davidson	1,000
Desse Schrivalle, Indian	1,000
M. M. Martin, Indian	1,000
W. H. Williams, Thor	1,000
W. M. Wheply, Thor	1,000
A. V. McGuire, Merkel	1,000
C. N. O'Neil, Merkel	1,000
H. A. Keck, Harley-Davidson	990
F. H. Balfour, Harley-Davidson	990
J. S. Balmer, Harley-Davidson	990
E. Stacy, Harley-Davidson	990
J. D. Ivey, Excelsior	990
P. G. Judkins, Excelsior	990
J. Mosher, Indian	990
R. Snedeker, Indian	990
E. B. Brogdon, Indian	990
F. I. Gibson, Merkel	985
W. T. Rustin, Indian	980
P. P. Yrater, Excelsior	940
W. F. Chapman, Thor	930
C. M. Creager, Excelsior	Out
W. B. Creager, Excelsior	Out
J. Rossignol, N. S. U	Out
O. A. Meyer, Pierce	Out
W. W. Delph, Racycle	Out
J. Cafiero, Harley-Davidson	Out
L. R. Buckner, Harley-Davidson	Out

F. A. M. Has Lamp Prizes to Offer.

Despite the recent literal "hot time in the old town" of Bangor, Me., Chairman Estabrook, who lives there, is keeping the F. A. M. membership publicity lamp filled with oil, the wick trimmed and the chimney clean. He announces that through the courtesy of the Hawthorne Mfg. Co., of Bridgeport, Conn., makers of "Old Sol" gas lamps and generators, the F. A. M. road to affiliation and membership will become a "great white way" for the next 30 days, and nights, too, and there will be no excuse for any club or any unattached rider losing the way in the Stygian darkness of ignorance of the benefits to be derived from getting on the reservation.

As an incentive to unaffiliated clubs to get busy and do so, the "Old Sol" people, through Chairman Estabrook, offer to give 12 of the No. 1 or No. 2 gas headlights, listing at $10 each, and a No. 5 generator, together with choice of brackets, to the first 12 clubs that affiliate, beginning on the 10th inst., each club to bring in not less than 15 new F. A. M. members. For clubs already affiliated three of the above outfits will be given to the three clubs, respectively, bringing in the largest number of new F. A. M. members for the 30 days beginning on the 10th inst.

Another stipulation of the contest is that any club that may win one of the prizes shall agree to put it up as a prize for a competitive contest, either in an open event or in a membership or club run attendance competition.

Uniforms for Fond du Lac Club.

Believing that uniforms enhance the appearance of the members when on their machines, the Fond du Lac (Wis.) Motorcycle Club appointed a committee at the last meeting to investigate the purchase of uniforms.

TRUE SPORT AT MACON'S MEET

Bona-Fide Amateur Motorcycle Racing Gives an Afternoon of Excitement—Schatzman the Star.

Boxes of candy and cigars, safety razors, cravats, pipes and several forms of jewelry, not to speak of gasoline and oil in large quantities, were the good old fashioned but strictly amateur prizes, that the motorcyclists of Macon (Ga.) raced for at the mile dirt track at Central City park on the 26th ult. It was a gathering of local boys out for a good afternoon's fun, and they showed themselves to be of the sort that are a credit to the sport. They wanted to win, and they rode to win, but those who lost took their defeat good naturedly, and there were no wrangles or brash talk. Neither were there any cash purses to cause misunderstanding, ill feeling and professionalizing.

Although he did not win everything, Carling Schatzman, who rode an Indian, took the chief honors of the meet and made several local track records. His total score were three firsts and two seconds. L. I. Brown, who used an Indian twin, also gathered in some merchandise, in exchange for two firsts and three seconds. What victories this pair did not get were taken by T. E. Brown on an Excelsior, who collected two firsts and several "places." There were a few Atlanta riders present, but they only got the leavings, Harry Glenn, a Merkel exponent, faring best of the visitors, with two second prizes, in the ten mile handicap for twins and the unlimited pursuit events.

Sand driven by a high wind prevented any very fast time being made, and Schatzman was clocked the fastest, doing several circuits in 1:03. His winning of the club championship cup for the third time, by his victory in the twin handicap, was one of the best races of the day. Another exciting event was the unlimited pursuit in which L. I. Brown, Indian, and Harry Glenn, Merkel, were the chief contenders. Brown won after a long pull. Summary:

One mile, free-for-all—Won by Carling Schatzman, Indian; second, L. I. Brown, Indian; third, T. E. Brown, Excelsior. Time, 1:10⅗.

Five mile club championship, singles—Won by T. E. Brown, Excelsior; second, Carling Schatzman, Indian; third, H. Wood, Thor. Time, 6:02⅖.

Five miles club championship, twins—Won by Carling Schatzman, Indian; second, L. I. Brown, Indian; third, A. Heath, Indian. Time, 5:44.

Ten mile handicap, open—Won by Carling Schatzman, Indian; second, L. I. Brown, Indian; third, T. E. Brown, Excelsior. Time, 10:30⅕.

Five mile handicap, singles—Won by T. E. Brown, Excelsior; second, Carling Schatzman, Indian; third, G. E. Williams, Thor. Time, 6:25⅗.

Ten mile handicap, twins—Won by L. I. Brown, Indian; second, Harry Glenn, Merkel; third, W. Herndon, Indian. Time, 10:37⅖.

Unlimited pursuit—Won by L. I. Brown, Indian; second, Harry Glenn, Merkel; third, T. E. Brown, Excelsior.

One mile slow race—Won by Robert Orr, Indian.

Bests Britain's Best Motorcycles.

Duplicating the commendable knack of gold medal winning which it acquired in the very first American endurance run, the Indian motorcycle has made a double big killing in England by capturing the Jarrott Cup, the major prize, and three gold medals in the London to Land's End and return trial promoted by the Motor Cycling Club. Strenuous motorcycle competitions are a hobby with the Britishers, and the trial in question was particularly severe. Three Indians were entered and all qualified for medals, making the highest comparative score and the highest possible score. No better illustration of the decisive victory of the Indian and the severity of the trial can be had than the showing of the best English machines. Nine Triumph machines entered and one won a gold medal; 6 Rex, two gold medals; 7 Bradbury, two gold medals; 4 Rudge-Whitworth, two gold medals.

Worcester Tailenders Eat Dust.

Twelve members of the Worcester (Mass.) Motorcycle Club turned out on Sunday, 30th ult., for the regular weekly run. The course was over the Worcester Clinton-Marlboro triangle, and was very dusty. While those with fast machines managed to stay up front and keep themselves fairly presentable, the tailenders were unrecognizable at the finish after trailing in dense clouds of dust all day.

NOTHING MARS "HERRING RUN"

Providence and Other Rhode Island Motorcyclists Have a Great Outing—Feast at Taunton.

With club pennants gaily fluttering from over half of the machines, 150 riders turned out on Sunday, 30th ult., for the annual "herring run" of the Providence (R. I.) Motorcycle Club to East Taunton, Mass. The start was made at 10 a. m. from Exchange place, and over 100 local riders were in the ranks when the signal to get under way was given. The remaining 50 were picked up along the route, which led through East Providence, Rehoboth and Taunton. Upon arriving at the rendezvous the herring were found in bountiful numbers. At Taunton the riders were the guests at lunch of B. A. Swenson, of Providence, and Beauvais Bros., of Taunton, who jointly provided good things to eat, drink and smoke. The weather was ideal, likewise the roads, and as there were no mishaps everybody voted the outing a big success. The long string of machines with pennants flying attracted considerable attention along the route. The next number on the club calendar is the annual picture run which will take place on the 14th inst. The picture will be taken in Roger Williams park, and a large number are expected to turn out.

"HERRING RUN" ARRIVAL AT TAUNTON "GREEN"

Two Aberdeen Club Fathers.

According to F. A. M. State Commissioner P. N. Bushnell, of Aberdeen, S. D., a large measure of credit for the motorcycle club recently organized there is due to A. G. Wiley and G. V. Rolph among others. In his note about the Aberdeen club recently, Chairman Estabrook indicated that C. A. Hunt was the leading spirit in its organization, and it is but fair to the other two to give them due credit.

NO DE ROSIER-CHAPPLE MATCH NOW

Riders Fail to Agree on Terms—DeRosier to Sail for England Soon—Posts a Forfeit.

Negotiations between Jake DeRosier and A. G. Chapple for a match race between them some time this month were broken off on Tuesday, when after fruitless efforts to agree on the purse and several other conditions, DeRosier decided not to meet anyone until he returns from England. This action is in line with his expressed desire to get to England as early as possible to prepare for the Tourist Trophy race, and as he was unwilling to enter into any matches here without time for preparation he did not care to delay his departure several weeks to accommodate Chapple. As an evidence of good faith, however, he has left $100 with the Bicycling World and Motorcycle Review as a forfeit, that upon his return from England he will meet Chapple or anyone else, on any track for any distance for any amount of side bet and 50 per cent. of the gate.

On last Saturday night, after dickering all week on purses, distances and tracks, DeRosier and Chapple practically agreed to meet in a 500 mile match on Guttenberg track, on May 21, for $500 a side and 50 per cent. of the gross. DeRosier, having $100 already posted, put up $400 more on the spot, and a check for $500 was written out on behalf of Chapple when Manager O'Callaghan, of the Guttenberg track, called a halt and refused to bind himself for any purse until he could consult with the Guttenberg Motordrome people who are going to conduct the meets there. On Monday morning he brought word that not only would the track lessees decline to give 50 per cent. for such a match but also they would not put on a 500 mile race or any other race that would interfere with the regular program. When DeRosier heard this, he called everything off and said that he would not ride anyone until he comes back from abroad. It has been his contention all along that when he started East he expected no challenges and had no desire to meet anyone before sailing for the other side.

Two Championships Allotted.

Two of the F. A. M. national championships for this year have been awarded and will be decided this month. The San Francisco (Cal.) Motorcycle Club will run the two mile championship at Elmhurst track on the 21st inst., and the North Shore Motorcycling Club, of Chicago, will stage the five mile championship on Hawthorne track on Memorial Day. Both championships will be held in connection with race meets, of course. This will leave three more championships, viz., the one and ten mile and the one hour, for the annual meet at Buffalo.

Board Tracks for Denver Racing.

For the second Sunday in succession rain knocked out the regular meet at the Tuileries track, Denver, Col., on the 30th ult. The meet was to have rung down the final curtain on the famous old dirt course, for a new board saucer is under way. It will be 20 feet wide and have 47 degree banking. The new saucer will be built on the site of the old track, but the opening date has not been determined yet. This will give Denver two board saucers, for another is being erected at Lakewood, so that when both are in commission there should be no lack of racing in the Colorado capital.

Chicagoans Rich in Accessory Prizes.

Two hundred dollars worth of accessories, including such luxuries as tires, speedometers, lamps, tandem attachments, free engine pulleys and other articles, will be given as prizes in the second semi-annual reliability run of the Chicago Motorcycle Club, which will be held on Sunday, 7th inst. The club trophy, of course, is the major prize, but it does not revert permanently to the winner and must be defended twice a year by the holder.

North Shores to Have Three Day Meet.

Expanding its original program 50 per cent., the North Shore Motorcycle Club of Chicago is bidding for the honor of running the largest motorcycle event in the Middle West around Memorial Day, by making its race meet scheduled for that time a three day affair. The new dates are May 28, 29 and 30, and a record breaking entry list is looked for.

SPRINGFIELD WELCOMES THE PRO'S

Offers Them Cash Getting Opportunities on Decoration Day—Inter-City Team Race Promising.

Now that it is certain that Jake DeRosier will not compete at the big meet at the Springfield (Mass.) Stadium on Decoration Day, the Springfield Motorcycle Club calls attention to the fact that there are good opportunities for other professionals to swell their bank rolls. While DeRosier undoubtedly would be a great drawing card, on the other hand his presence would be very likely to scare off the other pro's who feel that they would not have a look-in against him, and his absence leaves a clear field for the others. The inter-city team race in the trade rider class promises to be one of the best events on the card for entries already are in from Boston, Providence and Springfield, and Waterbury, New Haven, Hartford and Bridgeport are thinking seriously of putting in teams. As an indication of the interest which is being manifested in the inter-city race, there were a large number of riders practicing on the Stadium last Sunday.

Stewart Claims No Result in Match.

Neither man could be declared the winner in the motorcycle match race at Cambridge City, Ind. on the 16th inst., between Erwin G. Baker and F. A. Stewart, according to Stewart. The latter maintains that the race was to be run in three heats. Baker, on an Indian, won the first and Stewart, on a Merkel, won the second, while the third heat, he says, was not run on account of a disagreement as to machines.

A Bit of Speed Practice at the Guttenberg (N. J.) Track.

MOTORCYCLE COMPETITION ON ENGLISH "RIBBON" ROADS.

The views, show, respectively, the starting point and part of the course of an Easter contest of the Herte County Club.

New York Amendment Mass Meeting.

All the motorcyclists of New York City and the metropolitan district are invited to attend a mass meeting to be held at Huber's Casino, Jerome avenue and 162d street, Bronx, on Wednesday night, 10th inst., at 8 o'clock, to protest against motorcycles being included in the New York automobile law as is provided for in an amendment now before the legislature. The meeting is called by a committee consisting of M. E. Toepel, Maurice Sullivan and Albert Kreuder, representing the New York, the Concourse and the Affiliated Touring Motorcycle Clubs, respectively.

Harlems Help Southampton Run.

Indicating a disposition to be friendly with the other clubs in the metropolitan district, the Harlem Motorcycle Club, of New York City, has called off its closed club race meet which was scheduled for Sunday, 7th inst., so that it would not conflict with the Southampton run of the New York Motorcycle Club. The Bronx riders realized that the Southampton event was one of the most important of the season around New York, and had no desire to antagonize it; in fact, the Harlem club will be represented by several of its rider members.

Milwaukee's Climb Postponed.

Because of wet roads, the hill climb which the Milwaukee (Wis.) Motorcycle Club had planned to hold on Becker's hill on Sunday, 30th ult., was postponed. It will be held on the 7th inst., if the weather and roads permit.

F. A. M.'s April Membership Gains.

Statistics for April just compiled by Secretary Gibson of the F. A. M. show that 464 new members were enrolled last month. The increase by states follows: Illinois, 56; New York, 43; Massachusetts, 42; Kansas, 41; Pennsylvania, 41; Ohio, 40; New Jersey, 34; Indiana, 31; California, 27; Rhode Island, 22; Colorado, 14; Washington, 11; Texas, 8; Nebraska, 7; Missouri, 6; Florida, 6; Iowa, 5; West Virginia, 4; Michigan, 4; Connecticut, 4; Maryland, 3; Alabama, 3; South Dakota, 3; District of Columbia, 2; Wisconsin, 2; British Columbia, 2; New Hampshire, 1; Mississippi, 1; Arizona, 1. Of the total gain the Western district led with a contribution of 169, followed closely by the Eastern division with 151 new members. The Pacific district turned in 31 recruits and the Southern district came through with 18. There was a total of 107 renewals from all districts.

Saginaw Motorcyclists Organize.

Thirty motorcyclists of Saginaw, Mich., met at the home of H. J. Allington, 616 S. Warren avenue, on the 29th ult., and organized the Saginaw Motorcycle Club. Maurice Canutson was elected temporary captain, and organization will be completed and a permanent set of officers chosen at the next meeting, which is scheduled for the 12th inst. The club has decided to affiliate. The first informal run of the members occurred on Sunday, 30th ult.

Miami Riders Visit Homestead.

The Miami (Fla.) Motorcycle Club held a run to Homestead, 30 miles out, on Sunday, 30th ult. When they got there they had lunch, rested a while and after inspecting the town came home leisurely. Fourteen riders took the trip and reported a good time.

Scranton on Affiliated List.

The Scranton (Pa.) Motorcycle Club now is entitled to all the privileges that go with F. A. M. affiliation. It came in on the 3d inst. with 20 men and received number 116. The secretary is C. R. Jones, 627 Lackawanna avenue.

Rah! Rah! Rah! for the I. U. M. C.!

Motorcycling has "caught on" strongly with the students of Indiana University, of Bloomington, and they have organized the Indiana University Motorcycle Club. While other colleges have had motorcycle clubs, the Indianans have advanced a step further than their fraters and enlisted two members of the faculty in the club, which would seem to assure its well being with the powers that be. The officers are: Walter A Teter, president; Professor R. A. Rice, vice-president; Len Lewis, secretary; Charles S. Sherman, treasurer; W. L. Moore, captain. The captain is the supreme authority on runs, and a system of signals has been devised for indicating bad roads and turns. The club contemplates affiliation with the F. A. M. The club colors are cream and crimson, and it was decided that on all runs members shall carry red streamers on the handlebars, bearing the club's name, with the idea of advertising the seat of learning which it represents. The present membership is 15.

Paradox in New Jersey Club's Prices.

Record high and low prices for 1911 Yale motorcycles were established in Newark, N. J., on the 25th ult., when a new single cylinder model listing at $200 was disposed of for something like $580, and yet the purchaser only paid 25 cents for it. While this may seem paradoxical, it nevertheless is true, for S. R. Cook of Orange, has the machine, and the New Jersey Motorcycle Club has the money, to prove it. The New Jersey club is not competing with dealers for business, but some time ago it decided to put up a 1911 Yale single and sell chances on it at a quarter a chance. At the drawing last week it was stated that 2,320 tickets were sold, so it does not appear that the club lost anything on its venture, while Cook surely got his money's worth and a little more for good measure.

NEW YORKERS FAILING TO ACT

Appear Not Alive to Danger of $5 Annual State Fee—Are Urged to Write to Assemblymen.

If motorcyclists of New York state are saddled with a $5 registration fee and other restrictions, they will have only themselves to blame for their indifference to the threatened legislation. Although circular letters have been sent out to all clubs and F. A. M. members in the state by Chairman Hamilton of the F. A. M. legal action committee, telling them of the proposed inclusion of motorcycles in the state automobile law, and requesting them to get busy, it does not appear that many of those directly affected are doing anything to help themselves. However, a few have done some good work in opposing the objectionable bill.

L. H. Guterman and J. Leo Sauer, of the Harlem Motorcycle Club of New York City, have got in touch with a couple of the assemblymen of their district and outlined to them the situation, and requesting their support in opposing the bill. The assemblymen wanted to know how many accidents had been caused by motorcycles in this state, and to what extent they wore the roads and what their status was in neighboring states.

This data was given to them and they seemed impressed with the reasonableness of the motorcyclists' claim for a continuance of the present conditions of no taxation or number requirements. The assemblymen promised to use their best efforts in having the section of the bill relating to motorcycles killed. Guterman and Sauer also have another assemblyman on the string and expect to enlist his support on their side. It all depends on how much the motorcyclists bestir themselves and use their influence with their assemblymen and senators.

While a mass meeting of motorcyclists has been called for next Sunday night at Huber's Casino, Jerome avenue and 162d street, New York, to protest against the proposed bill, which by the way still is in committee, it has developed that all the clubs in the metropolitan district were not notified of this meeting nor invited to send representatives, so that it is probable that the meeting will not be representative of the sentiments of all the clubs around New York. The Invincible Motorcycle Club of Brooklyn has a motion on the table providing for an appropriation of $25 to a fund to fight the bill if all other New York clubs will contribute a similar amount.

McGraw Heads the Jacksonville's.

D. S. McGraw was elected president of the Jacksonville (Fla.) Motorcycle Club for the coming year at its annual meeting on the 25th ult. The other officers chosen were as follows: Albert Stoddard, vice-president; G. Hutchinson, secretary; C. E. Livingston, assistant secretary; Frank Powers, treasurer, J. E. McGraw, captain. The treasurer's report showed the club to be in good financial condition. Four new members were elected, bringing the total membership up to 42, and several applications are pending. It was voted to hold another race meet on July 4, the proposition being received enthusiastically. The racing committee was entrusted with the details of the meet, and instructed to secure the mile track at Moncrief Park if possible. If the track can be had it will be put in shape, but if it is not available the races will be held on Pablo Beach, which qualified in the speed line last month when world's records were hung up by motor cars, and which always has enjoyed the reputation of being one of the best speedways in the world, especially adapted for fast riding.

Fort Dodge Has a New Club.

At a meeting held on the 25th ult., with nine motorcyclists present, temporary organization of a motorcycle club in Fort Dodge, Ia., was effected. Permanent organization will be completed at the next meeting on the 8th inst., and efforts will be made to get every motorcyclist in the city to join. For the present meetings will be held in the Young Men's Christian Association building.

ATLANTA SPEEDWAY RACE PLANS

Trade Riders and Professionals to be Barred from Competing—Thirty Prizes to be Put Up.

Having succeeded, through its president, R. H. Colburn, in getting the famous Atlanta Speedway for a series of motorcycle races, the Atlanta Motorcycle Club, of Atlanta, Ga., has scheduled its first card at the Speedway for May 20, for amateurs only. There will be ten events, and 30 prizes are offered, including a cup, several sets of motorcycle tires, lamps, saddles, sweaters and the like. Invitations will be sent out to the riders in Chattanooga, Memphis, Macon, Birmingham, Rome, Jacksonville and all the larger Southern towns.

Motorcycling in Atlanta has made big strides in the last 60 days, and it is the ambition of the Atlanta Motorcycle Club to stimulate this interest and make Atlanta one of the greatest motorcycling towns in the South. All of the well known machines will be represented in the races. Several prominent trade riders will appear to give exhibitions, but no trade riders or professionals will be allowed to compete in the races, which are for amateurs exclusively. Entry blanks are issued by R. H. Colburn, president of the Atlanta Motorcycle Club, 42 Walton street, Atlanta, Ga.

ATLANTA (GA.) RIDERS BEFORE THE CAMERA.

Some of the members of the Atlanta Motorcycle Club ready for a run to Roswell, Ga., the old home of ex-President Roosevelt's mother. The picture was taken in front of the new postoffice in Atlanta. The second man from the right is C. Surman, who with his dog walked from Wilmington, Del., and who was converted to motorcycles on the way.

GIVING TIRES A SLUSH AND SLIME TEST.

Trying out the "gripfast" qualities of the Fisk Gripfast tread.

Erie Excursionists Dine at Dunkirk.

Dunkirk, N. Y., was the destination of the Erie (Pa.) Motorcycle Club for its first Sunday run of the season on the 23d ult. Despite an early morning rain the riders found the roads good, and Dunkirk was reached in good season for dinner. After voting the Dunkirk chefs O. K., the visitors rode around town a bit to familiarize themselves with the landmarks and then headed for home, arriving well before dark. Runs will be held every Sunday and holiday throughout the season, weather permitting.

Lafayette's Organization Revived.

Adopting the abandoned constitution of the first motorcycle club, which now is defunct, motorcyclists of Lafayette, Ind., are forming a new club. A meeting was held in the Y. M. C. A. building on the 27th ult., at which 14 enthusiasts were present, and steps were taken toward the formation of a club. A name will be chosen and officers elected at the next meeting. The first informal club run was held on the 30th ult., when 16 riders went to Crawfordsville.

Straight Talk from Police Chief.

"By using the proper judgment in operating your machines and having the proper respect for the rights of others, you motorcycle riders can be of real service to the public instead of subjects for complaint, which seems to be the case all too frequently at present," said Chief of Police James M. Carl, to the members of the newly organized Cedar Rapids Motorcycle Club, of Cedar Rapids, Ia. Chief Carl was asked to give the members a short talk along the line of motorcycles from the police point of view, and it may be taken for granted that his address will be the turning point for better conditions in motorcycle traffic in the city.

Chief Carl stated that the club could be of the greatest assistance in the state-wide movement for good roads, and said that as long as the members of the club show the proper spirit and regard for the rights of others they will be given every assistance and encouragement possible by the chief and his men. The chief also affixed his signature to an identification notice on the backs of the membership cards, which makes the card a sufficient bond for the appearance of the rider at the police station the following morning in case he is arrested for speeding. This is something, however, that the members of the club will prevent, if possible.

The club now numbers about 40 members, and the officers are making an effort to secure permanent quarters. Several locations are being considered including an excellent room on the west side.

At the meeting it was decided that the club would join the Federation of American Motorcyclists, the dues of each member in the national organization to be taken from the club treasury.

Emmitsburg Pike Road Now Free.

Coming as an Easter gift, the Emmitsburg pike in Maryland is now open to free travel. There are 21½ miles of pike. It connects with the Frederick and Woodsboro pike about two miles from Frederick. There were five toll gates on the road, and the aggregate round-trip toll for a motorcycle in the past was about 90 cents. The Frederick and Emmitsburg Turnpike Road Co. had been in existence for 66 years. It was incorporated in 1845. It is likely that the company will now dissolve.

FOUR GENERATIONS GO MOTORCYCLING.

From right to left they are: T. M. Stansbury, age 77; G. C. Stansbury, age 52; A. C. Stansbury, age 27, and Raymond Stansbury, age 3 years. They are the proprietors of the Canton Motor and Cycle Supply Co., the Harley-Davidson and Pope agents.

FREE ENGINE CLUTCH OPERATION

Expert Gives Pointers that Assist Toward the Best Results—Slipping the Clutch in Hill Climbing.

Discussing the subject of motorcycle free engine clutches and their operation, and the extent to which they answer the purpose of two-speed gears, Douglas Leechman, M. I. A. E., an expert who supplies mechanical advice to the members of the Cyclists' Touring Club, has some very pertinent and practical things to say. In addition to giving valuable pointers on the use of the clutch, he makes clear just what is to be expected of it in the way of greater power in hill climbing than is obtainable from transmissions not involving the clutch.

"Whatever form of this kind of clutch is used, and wherever it is fitted," he says, "its object is to allow the engine to run entirely or partly free of the road wheel, or vice versa. Thus the engine can be started and the rider take his seat comfortably while the machine as a whole remains stationary. Then when all is ready the clutch is let in gradually and off go rider and steed. If a block is encountered in the traffic or the rider wishes to slow up for a bit, he withdraws his clutch and stops the machine without stopping the engine. He should, of course, throttle down the gas and retard the spark while he is waiting, as otherwise the motor will soon get very hot, besides making a most horrible amount of noise. With a little practice the rider will soon learn where to set his control levers so that the engine will just keep running quietly at such times. Do not try to get the revolutions down to the absolute minimum at one fell swoop, as this will probably stop the engine, and it is often a great nuisance to have to start it again in a crowded street.

"The spark and throttle levers should first be set back to a safe extent, and the extra air adjusted at the same time if necessary. Then if the wait is prolonged finer adjustments may be made without much risk of having to restart the motor. When ready to go on again, the levers can be gradually restored to their normal positions. I say 'gradually' advisedly, for many riders are guilty of jerking their levers about as if they were engine-room indicators on a steamboat. A motor cannot be expected to rush up its revolutions from 500 to 2,000 or more per minute in the twinkling of an eye; it should be led up steadily from the one to the other, and if this be done carefully it is possible to get far more out of the engine than if the levers be set suddenly.

"Where motorcyclists are apt to make a mistake with free engine clutches is in expecting them to serve as variable gears. The way they go at it is, when they get to a hill that is too much for the motor, to let the clutch out a little so that the friction surfaces slip over each other. What this accomplishes is the maintenance of the normal high-speed revolutions of the engine and therefore of the power, but that power is not all usefully employed: the part of it corresponding to the slipping of the clutch is absolutely wasted so far as the driving of the machine is concerned; it is simply employed in generating heat. All that can be hoped for in this direction is that more power shall be saved in keeping up the revolutions per minute than is run to waste through the clutch. The effective power therefore can never be equal to that obtained when the motor is running at its normal speed and driving through the transmission without slip."

Has It Ever Happened to You?

The cashier of a Western bank bought a motorcycle several weeks ago, and he at once began learning how to operate it. He received the machine on a Saturday and by the Tuesday following, thinking he had completely solved all the mysteries of construction and operation, he started out for a neighboring town, just to show his friends he knew all about how to handle it. He made the trip in fine condition, but on the return, when a few miles out of town, the machine refused to work. After spending several hours in vain efforts to induce it to move on, he was glad to see a friend who was supposed to be an expert in finding and repairing such breaks coming along the road. It seemed to be too serious for both of them, however, and they went to a nearby farmhouse and telephoned to the town for a man to come with a team to bring the rider and his motorcycle home. Just about the time the liveryman appeared, the cashier discovered the cause of all the trouble—an empty gasoline tank. Since then he carries a bottle of gasoline in his pocket when starting on a long trip.

HAS A HAPPY PASSENGER.

H. Norwood of Roxbury, Mass., takes his young nephew along on his motorcycling trips whenever possible. How the boy hates it!

WHY HE ABANDONED THE MUDGUARD

Motorcycle Demonstrator Who Suffered from His Expertness—Old Cyclist Taught Him Value of Saddle.

"What a cinch we have!" somewhat sarcastically ejaculated the salesman who when occasion requires also acts as demonstrator for a well-known make of motorcycles, as he strolled hands in pockets, up and down the store. "But you wouldn't spell it that way if you could change places with one of us for a little while. It may look all right, this riding around the country extolling the merits of our machines, and that part of the job isn't half bad at that. But when it comes to taking a novice, and probably a total stranger, for a trial spin, it is, as Kipling would say, quite another story.

"Take my case, for instance," he continued, with a little less gleam in his eye. "Someone comes in here, looks the machine over and asks about seventeen million questions, all of which I patiently answer; I obligingly start her up and show him just how easy it is, and after a while he loosens up enough to say: 'Yeh, I gotta Firefly, but I wanted to see how your brake worked—it's pretty good—guess I'll fix mine up that way.' Now wouldn't that cause a blow-out? But he's not the only one with whom we have to contend. Perish the thought. He's only one of many.

"We don't mind—at least I don't—explaining things and telling the why and the wherefore in words of one syllable. It's part of our business, and we get to like it same as a teacher finds a certain enjoyment in knowing that he or she can instill a little knowledge into the growing brains of a troupe of little darlings. But when an absolute ignoramus wants to know what the belt is for—and I had a man ask me just that—we're likely to throw up our hands in supplication, and certainly we commence to wonder if that particular bright individual ever looks further than his nose.

"But as I hinted before, such considerations are as naught when it comes to taking someone out for his first ride. If the man knows how to ride a bicycle, and the majority of those who come to us do know how, the task is not as hard as when the prospective customer never has ridden. But even then we have our troubles. I had been in the habit of getting my customers firmly seated in the saddle, and after running a short distance behind them with the motor running, jumping up behind them and sitting on the rear mud guard. By reaching under his arms I could control the machine and at the same time prevent myself from falling off. 'Foolish proceeding,' you say? Well, I had been doing it for some time, and I thought I had it down pat. But never again! I've had a tandem

seat put on since my last experience.

"I had followed my usual method one evening, and we got away pretty nicely. The customer was a bicycle rider from 'way back, and very soon I relinquished the grips to him and 'hung on by my teeth.' He thought it was fine—nothing like it! Well, to cut a long tale short, as the story books say, the machine was a six horse twin and the throttle lever stuck a little. Approaching a slight rise the man ahead attempted to open up a little, and as she wouldn't open he applied more force. When she did open she opened wide, and you all know the way a 'six horse' will jump when you suddenly give her the gas. She jumped all right, but I did not. I stayed right where I was; or rather I descended. And not the least bit gently, either. As for the rider, he kept right on going for about an hour—never missed me, he said.

"When he got back to the store I had another convert to the joys of motorcycling. I also had a sore spot, though little recked I of the bump, for he came across with a check and he wouldn't have any other machine than the one he had been riding. I guess that ought to help some. But you can bet your boots that hereafter when I take a man out I'm going to have a real saddle to sit on."

Would Mount Whole Police Force.

To replace entirely the present force of sidewalk pounders with motorcycle officers for patroling the whole city is the project that is being entertained by Mayor Burkhart and several of the city fathers of Dayton, O. It is their belief that such a reorganization would be greatly to the city's advantage, for they figure it out that it would greatly reduce the number of officers now required, as one motorcycle policeman would be able to render better service than now is obtained from half a dozen men on foot. In discussing the plan the mayor said:

"There are a great many advantages in having the suburban districts regularly patroled by motor cops. In the first place, the chief has figured that one motor cop will be able to do the work of four or five unmounted patrolmen. For instance, in Riverdale there are three patrolmen used for the two late shifts and two for the early day trick. The same number are used to patrol Dayton View. Where six men are now used for these two suburbs, one motor cop should be able to take care of the territory, covering all the streets at least three times in the eight hours work. Another great advantage in having the motor cops do such duty would be the time saved in getting the men to any scene of disorder immediately following the receipt of information at police headquarters. The result of one motor cop displacing perhaps four patrolmen would mean that more men could be put on the traffic squad downtown, where a larger force is badly needed."

MYSTIFIED THE MARBLE PLAYERS

Kentucky's Mileage Record Holder Was an Unintentional Plunderer—Made Amends Later, However.

With about 20,000 miles to his credit, many of which were marked with amusing experiences, Charles Baumeister, a wealthy young motorcyclist who lives in Pewee Valley, about 24 miles from Louisville, Ky., has covered a greater total distance in his four years of riding than any other rider in the Blue Grass State. He became a motorcyclist in 1908, and has grown more of an enthusiast every year since. In relating one of the odd incidents of his riding, he says:

CHARLES BAUMEISTER

"I use my machine in going from Pewee Valley to Louisville and return, a round trip of 48 miles, every day, winter and summer, and I have often made the journey with six inches of snow on the pike. On one of my trips to Louisville on a nice spring day I saw some small boys playing marbles on the pike. When they saw me coming they stepped back to the side of the road.

"Immediately after passing them I noticed that my motor was losing power and would barely pull the hills. Finally it began missing, so I dismounted and, putting the machine on the stand, began adjusting the carbureter. Suddenly something dropped out of the intake pipe of the carbureter, and the motor resumed plugging away as sweetly as ever. Looking on the ground, I discovered an agate that one of the boys must have used as a taw or shooter. It had been thrown up by the front wheel and had lodged in the carbureter air intake pipe, cutting off my air supply. On my return home that afternoon, the boys were again at their marble game, so I returned the agate to them. I suppose they are wondering yet how I got it while riding past them at 20 miles per hour."

Graff Concerned in Dynamite Case.

Harry Graff, president of the Indiana Motorcycle Club, of Indianapolis, Ind., has been projected into the limelight of publicity as a result of the arrest in Indianapolis of the alleged dynamite conspirators who are charged with having a hand in the blowing up the Los Angeles Times and in similar outrages. Graff is the custodian of the American Central Life Building in Indianapolis, where the International Association of Structural Iron and Bridge Workers has its headquarters and where John J. McNamara, the secretary, was arrested and spirited away to Los Angeles for trial. Detectives found dynamite and caps in the basement. Graff was questioned as to what he knew about it. He explained that McNamara had come to him and asked permission to file "old papers" and "letters" in the basement, as the association had no room for them in their fourth-floor office. Graff told him to go ahead. When it transpired that it was dynamite that had been stored, Graff's hair stood on end as the result of visions of the possibilities that had existed of his being blown up. Next day the police were afraid to move the dynamite and they employed an expert in that line. He could not do it all alone very well, however, and Graff helped him. In fact Graff carried out most of the explosive and as a result the newspapers printed his picture on the front page as a hero. Graff indicates that if he is called to Los Angeles as a witness in the dynamiting case he may take his motorcycle along to try out the far-famed touring ground of Southern California, thus making a fine holiday trip out of what some people would consider a rather arduous duty.

Bruce-Brown Likes the Motorcycle.

Still enamored of the motorcycle, despite the fact that he has become one of the foremost automobile race drivers of the world, David Bruce-Brown, the young New Yorker who won the Grand Prize automobile race at Savannah, Ga., and who owns a stable of high powered motor cars, has purchased a 5 horsepower Indian twin, from Amos Shirley, a New York dealer. "I am just crazy about it, too," exclaimed Brown, after being good-naturedly bantered by George Robertson, another well known race driver, about taking to the gasoline saddle horse. He was an ardent devotee of the sport of motorcycling even before he became an automobile race driver.

Ovington Essays a Flight.

E. L. Ovington, former president of the F. A. M., who now is an aviator, made his first flight in this country at Hempstead, L. I., on the 26th inst. Driving a 70 horsepower Bleriot he flew from Belmont Park to Garden City.

Acme Wheelmen Race at Guttenberg.

The Acme Wheelmen, of New York City, held a club run to the Guttenberg (N. J.) track, Sunday, 30th ult. Unlike a previous occasion, when they got there they found the track in partially decent shape and were not forced to take to the road to hold their races. Edward Spillane, with one minute handicap, won a five mile club race in which points counted for the club championship. Edward Rick and John DeBruyn, scratch men, finished second and third, respectively. Mile time trials also were held in a competition for a medal offered by Eugene Suykerbuyck, a club member, to the member of the club riding the fastest standing start mile on the Guttenberg track this year. Those who participated in the trials, and their times, were as follows: John DeBruyn, 2:44; Irving Higgins, 2:44; Ben Hutmacher, 2:51; Edward Spillane, 2:53; John Schmidt, 2:54. Despite the fact that automobile races had been held there on the day previous, the track was in fair shape, but a stiff wind which blew across the course prevented any fast time being made.

Clarke and Lawson Match at Newark.

As a sample of the quality cards that the management of the Newark (N. J.) Velodrome intends to offer the fans this season, it has announced a match between Jack Clarke and Iver Lawson as the feature of Sunday, 7th inst. Lawson was and still is the idol of the Salt Lake fans, despite the fact that Clarke has given him a few trimmings in his own bailiwick, and as the Australian is a great favorite at Newark a corking battle can be looked for. There also will be a new face among the amateurs in the person of Alvin Loftes, of Providence, who is one of the best simon pures in Yankeeland. He has announced his intention of going after the scalp of Frank Blatz, the amateur champion.

Grand Rapids Has Another Club.

Grand Rapids, Mich. has a new bicycle club. It was organized last week and is called the Burton Heights Cycle Club. The officers are as follows: Charles H. Hunt, president; Fred Woodward and H. Jones, vice-presidents; Arthur Hunt, secretary; J. Stard, treasurer; Hugh Jones, sergeant-at-arms. There are 18 members in the club and all are enthusiastic bicycle riders. In addition to the customary weekly runs the club plans to hold a road and a track meet in June.

Thread City Cyclers Re-Elect.

Standing pat unanimously on the present administration as an appreciation of the latter's work during the past year, the members of the Thread City Cyclers, of Willimantic, Conn., re-elected all of the old officers at its annual meeting last week. The officers are as follows: Charles W. Hill, president; George Rosebrooks, vice-president; Samuel Lyman, recording secretary; Harry Kelley, financial secretary; Frank M. Lincoln, treasurer; board of directors: the officers, Harold Williams and Clinton Wood.

Empire City's Have a Speedy Man.

It being their pride that their club house is the road and that to be admitted to their ranks a cyclist has got to prove his pluck, speed and endurance, the Empire City Wheelmen, of Brooklyn, N. Y., have developed a set of as hardy and speedy road riders as can be found anywhere, and in the front rank of the Empire aggregation is Joseph Orlando, who is known as the "Italian-American champion," and who

JOSEPH ORLANDO

captured the cycle Marathon on Long Island, a race in which he won five special prizes. The sash that he wears in the picture was given him by the club for his victory in the Marathon. Not only is he fast on the road, but he is quite at home on a board saucer track. On the old quarter mile saucer at Vailsburg, N. J., he was officially clocked for a quarter mile in 27⅘ seconds. On both track and road he has a "jump" that none of his fellow club riders can hold when he is "right." He is 30 years old, is married and has four children. Orlando will be one of the scratch men in the Empire City Wheelmen's 15 mile handicap at Floral Park, Long Island, on May 7.

Salt Lake's Big Road Handicap.

Forty prizes, including seven high-grade bicycles, are up for the 18 mile bicycle road race which E. B. Heagren is promoting in Salt Lake City, Utah, for Memorial Day. The course again will be over the Lagoon road. Entry blanks are out and from the healthy inflow of entries, Heagren feels safe in predicting at least 100 starters in the race. The race will be held under N. C. A. sanction.

Rain Drenches Newark Race Fans.

Profanity was scattered about promiscuously at the Newark (N. J.) Velodrome by over 8,000 fans on Sunday, 30th ult., when the weather man opened his faucets and drenched the track and a majority of the crowd who were in the uncovered bleachers. The races hardly had got under way when the first drops arrived, but the riders stayed on the boards as long as they could, which was until Jack Clarke and Edward Root fell off their machines at the start of the second heat of the professional handicap. Then it was announced that the meet was postponed until Sunday, 7th inst., and rain checks would be given. Naturally all of the fans could not be accommodated with passes at once and most of them had to take a good wetting before they received their checks. It was the largest crowd that has turned out at the new track, and one of the largest that ever attended a Newark meet, showing the popularity of the sport in that city at present and auguring good things for the coming season.

More Machines for the Police Parade.

The New York City Police Department is adding to its rolling stock again. It has placed an order for 24 Reading Standard bicycles with T. J. Sixsmith, 203 W. 100th street, the metropolitan agent, making 100 Reading Standards that he has sold the department in the last year. The motorcycle fleet also was increased by the addition of four Indians, which were supplied by F. A. Baker & Co., 10 Warren street.

The annual police parade, which is one of the chief public functions of the year in New York City, will be held on next Saturday afternoon, 13th inst. Two of the prominent divisions will be the motorcycle and bicycle squads, the former consisting of about 35 men, and the latter being in the neighborhood of 125 strong. The line of march will be down Fifth avenue from 59th street to Washington Monument, where the men will be reviewed by the city and police officials.

Eastern Race Circuit Starts Soon.

Cycle racing on the whole Eastern racing circuit, including not only Newark, N. J., where the racing has already commenced but New Haven, Conn.; Providence, R. I., and Boston, will be in full sway after May 30. The same arrangement of dates will prevail as last year, the racing being in Newark on Sunday afternoons and Wednesday nights; in New Haven on Thursday nights; in Providence on Friday nights, and in Boston on Saturday nights. The season in Salt Lake City, Utah, also commences on Memorial Day.

Arrest Sidewalk Riders in Denver.

Police authorities of Denver, Col., are getting after bicycle riders who are giving play to their disposition to ride their machines on sidewalks. Several arrests have been made and the offenders fined.

SPRING STIMULATES BALTIMORE

Big Season of Cycle and Motorcycle Events Already Started—Busy Times for the Clubs.

All is in readiness for the coming Memorial Day races to be held on the Electric Park course in Baltimore, Md. The lease has been signed and the bonus put up. The affair will be open to stock machines only, and all open ports will be barred. The entry blanks are now on the press. The exhibition is intended to show the prospective buyer what he can get for his money and just what the machines will do.

Entries for the big bicycle road race at Baltimore Md., scheduled by the Lafayette Wheelmen for Sunday, May 7, closed Tuesday evening. The event will take place over the Shell Road six mile loop. The race will be 12 miles, the riders circling the course twice. The course is splendidly situated, as the spectators will be afforded views of the start, middle and the finish of the race. The affair is at present holding the attention of the local and Washington speed men. Numbers of local ridders have been in training for the event for the past four weeks over the nearby roads, and, judging from the present indications, the entry list will prove a record breaker. Thirty prizes, consisting of 25 place and five time awards, will be contested for. The handicaps will range from one to eight minutes over the scratch men. Last Sunday the Crescent Bicycle Club ran to Ramia's, on the North Point Road, which is the starting place of next Sunday's race. The members met at this place at 10:30 o'clock and spent several hours in training.

William H. Logue, Jr., has invited all local riders to attend the speed trials on the Prospect Park course on Sunday. Bicycle training and speed trials for motors will start at 1 o'clock and continue until six in the evening. The track has been resurfaced and the turns banked, and is one of the best in that section of the country. Ample training quarters for bicycle racing men have been provided for by the management of the park. Manager Logue, who originated and conducted the speed trials last year, will endeavor to make the coming events more interesting, if possible, than they were last summer, when so much enthusiasm was aroused among the local bicycle and motorcycle riders.

That bicycling is regaining its own was evidenced by the exceptionally large and enthusiastic meeting of the Carroll Cyclers last week. They met for reorganization purposes and elected the following officers for the ensuing year: Charles H. Bokebeyer, president; Albert H. Heiland, secretary-treasurer; John Ruhl, captain; Harry Franklin, color bearer; Charles Hassfeld, first lieutenant, and Harry Friers, second lieutenant. The Carrolls are receiving a number of recruits and are now planning for the season's events to be held by them, among which will be an inter-city run to Washington, road races, half-century runs and like events. Sunday they ran to Chattolenee Springs, through the Green Spring Valley.

The good weather prevailing in and around Baltimore has caused hundreds of cyclists to get their wheels into shape and turn out. The local clubs are receiving a number of applications for membership and new clubs are being organized.

A number of enthusiasts met recently at William Logue's store, Broadway and Barnes street and an organiaztion committee reported. Frederick Welsh was made chairman and called the meeting to order. The committee report was approved and accepted and the prospects for the season demanding attention, immediate steps were taken to organize.

The organization will be known as the Baltimore Bicycle Club and any white bicycle rider of good character will be welcome to any of the meetings, held every Wednesday night. All local riders have been invited to attend the regular Sunday runs of the club.

The officers who were elected are: President, Harry Lindeman; vice-president, Nicholas Heilman; secretary, John Andrae; treasurer, Fred Welsh. Road officers: Captain, Fred Welsh; color bearer, Richard Lindeman; first lieutenant, Frank Nelson; second lieutenant, William Bush.

Green and white will be the club's colors. The club will enter all of its fast men in the Lafayette Wheelmen's road race.

March was another record month in the century mileage contest of the Crescent Bicycle Club, according to the report of the competition just made by Captain Baker. During March the members of the club rode 3,391 miles and ten centuries, which is ahead of the figures for the same month in any of the previous contests held by the club. The competition has been running since the first of the year and 7,472 miles and 13 centuries have been ridden during the three months ending April 1. This is more than double the best previous record for the same period, and the contest reflects the healthy condition existing in the Crescents.

The positions of the leaders in the contest remains practically the same as in the last report. Charles H. Thoms, by hard riding, retains his hold on the first place, with William Leimbach second, and August Leimbach in third position. These three riders are making a spirited race for the leading honors, while Fred M. Sanborn, the winner of the 1910 contest, holds fourth place, well within striking distance of the lead.

The standing of the leaders in the contest up to the first of the present month follows:

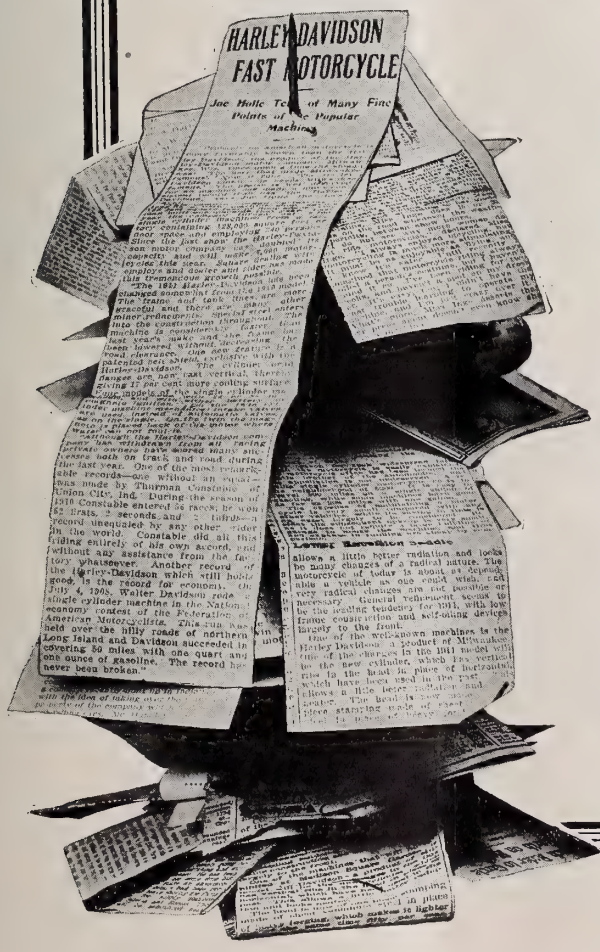
1, Charles H. Thoms; 2, William Leimbach; 3, August Leimbach; 4, Fred M. Sanborn; 5, Langdon M. Sanborn; 6, Thomas W. Baker; 7, Alfred J. Baker; 8, G. Andrew Miller; 9, J. Fred Huber; 10, John W. Trost; 11, George Peilstecker; 12, William Foos; 13, Fred E. Mommer; 14, Fred S. Plitt; 15, Edward Dorschell. Total reported, 7,472 miles and 13 centuries.

The Crescents' recent run to Washington caused quite a shaking up in the standing of the members in the run attendance contest. Doc Sanborn, one of the four perfect score-riders, lost his cork in the vicinity of Laurel and did not complete the trip, while Captain Baker did not even get that far. Alfred J. Baker, Charles H. Thoms, William Leimbach and August Aldo McDonald, aided by an early start, were the first to arrive at the Capital. Langdon M. Sanborn and Wilbur W. Shaw rode over on a tandem, but arrived too late at the meeting point. A number of members rode to Pikesville before starting for Washington, thus completing a century.

The Crescents are now making extensive preparations for their annual half-century run, which will be held on May 21, with Reistertown as the destination. This change of route is expected to add to the interest of the event and a large turnout of riders is looked for. An abundance of time will be given the novices to complete the distance and handsome medals will be awarded all who finish within the time limit. A banner will be awarded the club entering the largest number of riders in the run.

In addition to the medals offered in the century mileage and the run attendance contests, the Crescents are offering a solid gold medal, termed a meritorious record medal, to those members who during a calendar year ride 5,000 miles, five centuries, attend three-fourths of the club's runs and secure three new members for the club. These medals will be made a permanent fixture of the club, being awarded each year and they will be well worth the effort necessary to secure them. The club will also adopt a new sweater which will be quite a change from the present creation of red and gold. The new sweaters will be of a light grey color with the club's emblem in a neat size on the front, and their arrival is expected daily.

The Racycle Bicycle Club held a blind run recently. Manager Bob French, of the racing team, took the riders out to determine their condition for entering the Lafayette Wheelmen's road race the first Sunday in May, over the famous old Shell road. The racing team of the Racycle Club will be composed entirely of new men. Wilbur Lentz, who won second place in the club's last road race, will in all probability be one of the team, and E. E. Sampson, who surprised the crowd last fall by winning second time and third place prizes in the club's last road race, will probably be second man, and a third member of the team will be picked later.



The Story the Spindle Told

"Last fall I began to wonder just exactly what results our machines were giving in the hands of the private owners," said Wm. S. Harley, of the Harley-Davidson Motor Co. "I wanted to know whether or not our expensive inspection system, which kept an accurate check on all raw material, finished parts, workmanship and completed machines, was worth while and whether or not it would pay us to keep it up. I know that many times Harley-Davidson stock machines had successfully competed against racing machines of other makes, but I confess that I was inclined to believe that the rider was just a little better than the average.

"It occurred to me that the best and quickest way to get the information I wanted was to get hold of all the newspaper clippings that I could where mention was made of races in which the Harley-Davidson took part. I gave orders, therefore, that all such clippings were to be put on a spindle on my desk.

"A day or two after this I was called out of town and did not return for about a week. Well, when I saw my desk, the first thing that caught my eye and about the only thing that I could see, was that spindle. It was jammed full. There were clippings of endurance runs, road contests, one, two, three, five, ten and twenty mile open races, and so on.

"When you stop to consider that many motorcycle manufacturers had built special racing machines with open ports, special ignition and auxiliary oiling systems, machines which were built for speed only and which could compete in but two or three events and then had to be returned to the manufacturer for overhauling and replacements, and that they hired special riders at high salaries just for such races and contests, do you wonder that we are proud of our stock machines and proud of the real amateur riders that rode them?

"You can see now, perhaps, one of the reasons why no Harley-Davidson dealer ever gave up the agency of our machine voluntarily for that of another make. You can see why our sales have increased at a greater rate than those of any other two manufacturers combined and why we have to make a Harley-Davidson every eight minutes to supply the demand."

Harley-Davidson Motor Co.

725 L Street **MILWAUKEE, WIS.**

MAKE CENTURY IN SPITE OF RAIN

Cyclists of Eastern Division, C. R. C. A., Defy Discouragements from Jupiter Pluvius—Eighty Starters.

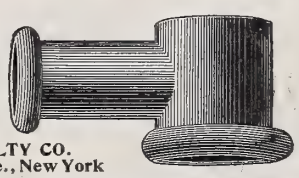
As was the case last year, Jupiter Pluvius again turned his sprinklers on the annual spring century of the Eastern Division of the Century Road Club Association, which was held on Long Island on Sunday, 30th ult. While he scared away quite a few of the entrants, and drenched those who refused to heed his threats, the run went through as per program. It was the club's 13th annual.

Out of the 125 entrants, over 80 started, the others losing their courage when on the morning of the run they found a thick fog and heavy mist waiting for them. There were two divisions, fast and slow, and the start was from Columbus Cicrle, New York City.

Under command of Chief Pacemaker George Bieregel, the slow division, 60 strong, left at 7:15 a. m. Bieregel was assisted by E. W. Moore, Hoyt Baker, J. M. Mitchell and Ralph Zarr. The fast division got away at 8:30 with 22 men in line under the leadership of A. R. Cooley. The latter's lieutenants were Henry Kest, F. E. Mommer and S. Segal.

The route was over Queensboro bridge and out along Hoffman boulevard, Hillside avenue to Floral Park. The fast division arrived here just as the slow division was leaving. The slow division went on to Hicksville and Amityville and then doubled back to Hicksville, passing on the way back the fast division, which after a 15 minutes rest at Floral Park had continued. Upon reaching Hicksville the slow bunch waited for the fast men to arrive, and both sections sat down to dinner.

After the slow men had rested a bit following their meal, they again took to the road, leaving the fast division to tarry a while longer. The route home from Hicksville was along the New Bridge road and through Bellmore to Freeport. The fast division left Hicksville 45 minutes after the slow men. A stop was made at Freeport and then the riders followed the Merrick road and Rockaway turnpike to Rockaway beach, but did not stop here. Near Valley Stream they were caught in the rain but continued on and got back to New York late in the afternoon, well soaked but having made the century nevertheless. There were the usual minor mishaps, such as punctures and spills.



Century for Jersey Cyclists.

This being the open season for motorcycle and bicycle spring century runs, the New Jersey Division of the Century Road Club of America announces its spring 100 miles cycle run to Highland Mills and Monroe and return on Sunday, 7th inst. The start will be from 528 Summit avenue, West Hoboken, at 7 a. m., and all who go along are guaranteed a treat of the good roads and pretty scenery for which Jersey is noted. The committee predicts over 100 starters if the weather is on his good behavior. There are two divisions, regular and fast, and the latter bunch will have a little brush in from Hackensack on the return trip, with prizes for the first three men.

"Hands Off" Forbidden in Redlands.

Riding a motorcycle or bicycle "hands off," the ambition of many a novice, is taboo in Redlands, Cal., and Chief Wallace has issued orders to his men to bring in all riders caught in the act. The chief thinks that many of the accidents in which motorcycles and bicycles figure are due to loss of control of the machines by the riders who travel with their hands off the bars. This display of expertness, he thinks, is entirely due to a desire on the part of the riders to "show off," but the practice now promises to become unpopular through the enactment of a city ordinance making it punishable by a fine.

Kelly-Racine Tires
For Motorcycles and Bicycles
are now being made in our new factory, which commences as the only tire factory in the world completely equipped at the outset with the most modern and advanced tire making facilities known to the art.
We shall produce 1,500 motorcycle tires and 3,000 bicycle tires per day, together with 1,200 inner tubes, a full line of tire sundries and a line of automobile, motor truck and carriage tires. Each tire, too, will have years of "know how" in it. Get acquainted with us promptly, as our earliest customers will have reason to rejoice.
KELLY-RACINE RUBBER CO.

The Improved New Departure

Every wearing part of the 1911 model New Departure coaster brake, every working member is as hard, tough and indestructible as tool steel; in fact is tool steel.

The taper on the corrugated end of the clutch sleeve has been slightly changed so that the clutching contact of the hub shell on the forward drive is positive, complete and absolutely prevents all slipping.

The improved hardening of the brake drum provides a surface that will resist the most severe braking strains and wear that occur at this point, without cutting or other injurious results. The method of manufacturing the steel brake rings has also been improved.

Dealers who have the new parts write us that the New Departure is now faultless.

The improvements have been perfected without changing the design that has been so popular for years. Not a single feature has been sacrificed that has already put the New Departure in the top notch. With New Departures on your shelves, you can give your customers

THE HANDSOMEST COASTER BRAKE
THE FINEST FINISHED COASTER BRAKE
THE BEST WEARING COASTER BRAKE
THE SIMPLEST TO REPAIR
THE SAFEST TO RIDE
THE EASIEST TO SELL
THE "FAULTLESS" NEW DEPARTURE

The 1911 catalog of improved model for bicycles, the internal expanding band coaster brake for motorcycles, the 1911 line of bells, cyclometers and sundries, will be sent you on request.

THE NEW DEPARTURE MANUFACTURING COMPANY, Bristol, Conn.

COASTER BRAKE LICENSORS

Death of Elliott Mason.

Elliott Mason, who was one of the first men in the United States to take up the sale of bicycles and who for many years had the handling of the Pope Mfg. Co.'s bicycles in New York City, died in Westfield, Mass., on Monday, 24th ult., at the home of his son Roger. His death was caused by tuberculosis, with which he was attacked some two or three years ago. In the effort to effect a cure, he had for some time been sleeping out of doors.

It was in the late 70's that Mason became one of the pioneer cyclists on this side of the water. He was at that time a school teacher in Yonkers, N. Y. Between 1879 and 1881 he rode 13,000 miles on his high wheel "ordinary." Outside his school duties, practically all his spare time was given to cycling, and after he had interested a number of other people in the bicycle he started a bicycle school in Yonkers. In the spring of 1881 he went to Boston to enter the employ of the Pope Mfg. Co., and a year later he moved to New York City as the Pope agent in the metropolis. He was one of the chief organizers of the Citizens' Bicycle Club, of New York, and was the first member of the club to make a century, from Coburg to Kingston, N. Y. When the American Bicycle Co. was formed, taking in the Pope company, Mason gave up the New York sale of bicycles and was transferred to the Pope factory at Hartford, where he remained until ill health came upon him. He and Mrs. Mason, who survives him, rode their bicycles regularly until he was taken with the sickness that caused his death. Mason was one of the most trusted lieutenants of the late Colonel Albert A. Pope, with whom he enjoyed the closest friendship. He also had a wide acquaintance with the pioneers of the industry throughout the country.

Divided Skirt Advocate is Dead.

Viscountess Harberton, the pioneer exponent of the divided skirt for women, which in its very latest development as the "harem skirt" is causing such a sensation, and who as a cyclist once involved the Cyclists' Union of England in legal proceedings because of her riding costume, died in London, England, on the 2d inst. Among her other accomplishments, Lady Harberton was a devotee of the bicycle, and always insisted that the divided skirt was the only proper dress for women who cycle. On one occasion while on a cycling tour, she stopped at an inn in Surrey, and the inkeeper refused her service because of her attire. The Cyclists' Union brought action against the innkeeper for refusing to serve a traveler, but lost its case, as the court maintained that the innkeeper had the right to draw restrictions.

Police in Trouble Over Cycles.

Because Chief-of-Police Gunn, of Hartford, Conn., sold a dozen bicycles that had been recovered during the year and had not been claimed, at public auction recently, without advertising the sale a month in advance, some people are questioning the legality of the proceedings. The sale netted $58.50, which goes into the police fund, but it is just possible that the sum will go out again. The law provides that all lost or stolen property recovered during the year shall be sold if not claimed after being held for one year. It specifies, however, that notices of the sale shall be inserted in the papers for four weeks beforehand, but in this case the chief only advertised his bargain sale a few days previous. It was a real bargain sale, too, for some of the bicycles were almost new and had an average value of $25. A local dealer offered $40 for the lot, but the chief would not sell them that way and neither would he sell any to members of the department for fear some unkind persons might hint at graft. Several of the machines awaiting disposal were sold at private sale before the public auction and some of the purchasers of these got real bargains, for they had their pick of the assortment. Cycle thieves in Hartford, though very industrious, have a highly discriminating taste.

This is NEVERLEAK Season

Are You Ready?

No bicycle kit and no bicycle repair shop is complete without NEVERLEAK, the wonderful TIRE FLUID that heals punctures without the rider having to dismount.

There's big money in NEVERLEAK for you — especially in the "TIP TOP" offer, which means a lower price to you, and twice the usual number of certificates.

Did you ever see NEVERLEAK premiums? They're dandies. Dealers everywhere are enthusiastic over them. They're easy to get because NEVERLEAK is such a sure and easy seller. Just ask your jobber why NEVERLEAK will make money for you.

This Steady Light Saves Lives

Solar Lamps for cyclists and motorcyclists never flicker or "hesitate," but shine **steadily** and **brilliantly** every **moment.** A Solar Lamp is an advance guard that is not only desirable but **necessary** to speeding riders. Many a Solar has saved a life by showing obstructions far ahead. A faltering, flickering light is almost more dangerous than no light at all. It bewilders the rider and makes him reckless or makes him slow.

Solar Lamps are proof against vibration, and embody the best of the science of lamp manufacture. They have been the recognized standard for the past fourteen years.

See Solar Motorcycle Lamps at your dealer's. Write for the Catalog. Then see the lamps.

INDIANAPOLIS, IND.

The New England Racer Price $55
A WINNER
Fast Strong
Light Snappy
The Only Bicycle in the World Built for Sprint RACING on Small Board Tracks.

Three Reasons Why

First. It brings the rear wheel four inches closer to the hanger, bringing more weight on the rear wheel, and relieves the strain from the front wheel and forks. This will be appreciated by all track riders, as it is a well established fact that in order to acquire any great amount of speed on tracks with sharp turns, it is essential to have all possible weight of the rider on the rear wheel.

Second. The **New England Racer** uses from 14 to 19 inches less chain than the average racing models. This is a big factor in racing, as a long chain is bound to swerve, and if not kept tight will jump the sprockets or catch on the top of a tooth and break. This is a frequent occurrence on board tracks. On the **New England Racer** the chain can be adjusted as loose as the rider desires without the least danger of jumping the sprockets or breaking.

Third. The rear stays being much shorter, are stronger, and will prevent the sprockets from pulling out of alignment with each other under great strain.

Here is a quartet of

KOKOMO Bicycle Tires

that fully meet the spring situation.

Kokomo Defender Special

This popular guaranteed tire is specially designed and constructed for road use. It is made from the best materials obtainable, being carefully built up by hand with pure para inner tube, and, owing to the very high quality of the inner tube used, a puncture is very easily repaired.

Kokomo "New Oxford"

A medium price tire, yet so good in quality that it does not do it justice to call it a medium grade tire. We have built these tires so that in case of puncture they will not be worthless but can be repaired. Also furnished in smooth tread.

Kokomo Dotted Tread

A tire that prevents skidding and is safe and reliable on wet, slippery roads and city streets. Of high quality and careful construction. Furnished in road weight or in thick tread.

Kokomo Guaranteed Red Thorn

Made of red rubber, is extra heavy and is built especially for long service.

Are you profiting by what we offer you in Kokomo Tires?

KOKOMO RUBBER CO., Kokomo, Ind., U.S.A.

12,000 Miles

WITH ONE SET OF

WHITNEY

MOTORCYCLE CHAINS

Read the following letter by A. H. Helgeson who has made a remarkable record with one set of "Whitney" Chains on a Minneapolis Motorcycle. These chains have been driven from the Pacific to the Atlantic, from Canada to Mexico, and all over California, through rain, mud, dust, and sand and are still good.

Can any service be more strenuous and severe than this?

What test could show more clearly the true strength and wearing qualities of "Whitney" Chains?

THE WHITNEY MFG. CO., Hartford, Conn.

Dear Sirs:—Yours of February 28th at hand. In regard to old chains, I have now covered over 12,000 miles on one set of your chains and have not even exchanged drive chain for pedal chain. Not one link or roller broken. Have carried tandem lately, which is a strain on chains. Just think of what these chains have gone through! From Los Angeles to New York, beside myself pulling 150 lbs. of extra luggage, and then from Canada to Mexico, and all over California, and still stick together. It sounds impossible, but this being the fact.

I will send old chains by express next week, as I intend to put on a new set. The old chains have done their duty, and then some. I think they are still good for a few thousand miles.

Put me down as a booster for "Whitney" Chains, as I will have no other.

Respectfully yours,

733 Ottawa St., Los Angeles, Cal. A. H. HELGESON.

"Whitney" Chains are made by specialists, in a factory especially equipped for the making, with years of experience to back them; made from material chosen for quality regardless of cost.

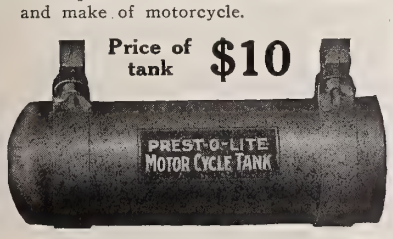
THE WHITNEY MFG. COMPANY, Hartford, Conn.

Makes Night Riding Safe

Motorcycle policemen all over the country are having their mounts equipped with **Prest-O-Lite.** They must be prepared for fast flights over rough streets, and cannot take chances on light that flares up or dies out.

Your need is precisely the same. Without this perfect lighting system, your machine, yourself and possibly a passenger are in constant risk of dangerous and costly accident.

PREST-O-LITE Gas Tank



Floods the road far ahead with strong, steady, dependable light, turned on and off like a gas jet. Each tank gives 40 hours of light (using a 1-4 ft. burner). When empty exchange tank for a full one, at a small fee.

FREE

Our Handy Ruler

Light, flexible, folding foot rule. Half of it is specially made for finding depth of gasoline in tank. Inches and centimeters. Measures tires, etc. Handy in a hundred ways. Sent free on request. Give name and address, and make of motorcycle.

Price of tank **$10**

Dimensions: Length, 12 inches; diameter, 4 inches; weight, 7 lbs.

This clean convenient service costs, as a rule, **less** than the carbide which a generator consumes.

Remember, too, that the genuine **Prest-O-Lite** tank has its permanent **cash value,** because it is in universal use and demand. When empty, it can be promptly exchanged, **anywhere and always.** These things are not true of any imitation.

YALE BICYCLES

THE NEWARK, NEW JERSEY, POLICE DEPARTMENT BICYCLE SQUAD

They Ride Yales

The Newark Police Department demand Service. Therefore, bought Yale Bicycles in competition with all other makes.

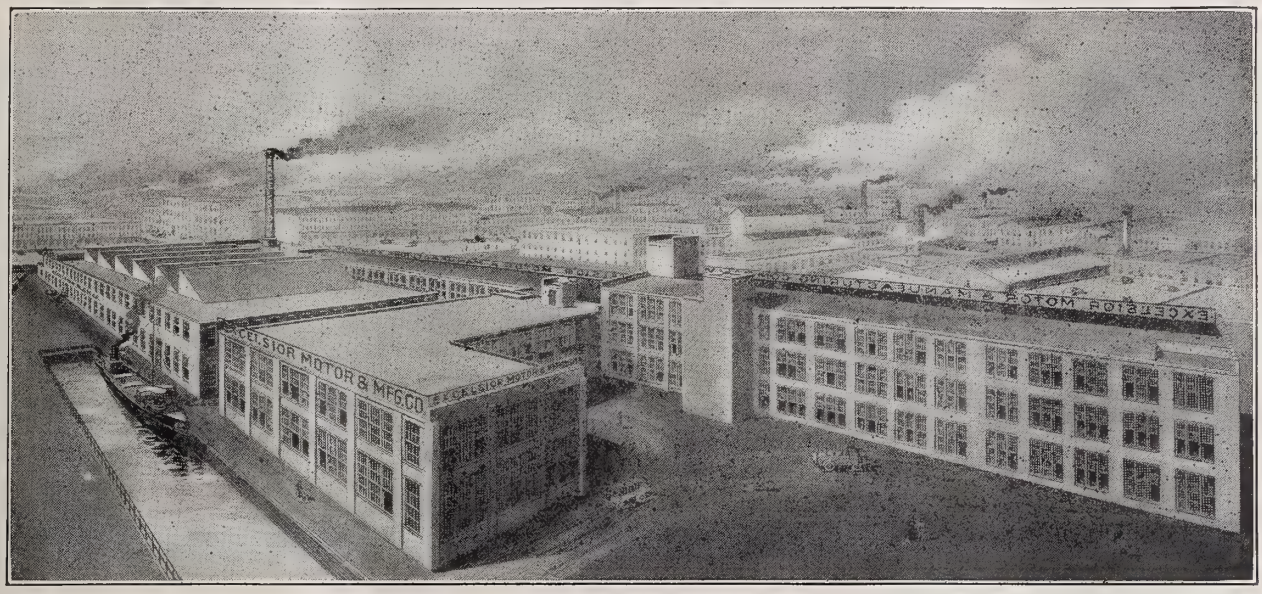
"What you get for your money is the amount of service you get from the article you buy."

YALE BICYCLES are QUALITY Bicycles and give that high class service which pleases your customers and makes them proud of their mounts.

The Yale Bicycle is the best selling proposition on the market. We can show you a nice increased profit selling Yale Bicycles. Write today.

You owe it to yourself to learn our story. Prompt shipment.

THE CONSOLIDATED MANUFACTURING COMPANY



1709 Fernwood Avenue, TOLEDO, OHIO

We also make Yale Motorcycles, Hussey Handle Bars and Drop Forgings of Every Description.

DISTRIBUTORS—Hub Cycle Company, Boston, Mass.; Alexander-Seewald Company, Atlanta, Ga.; Pacific Coast Rubber Co., Tacoma, Wash.; Bean Son Co., Oakland, Cal.; Scott-Hamburger Tool & Supply Co., Denver, Col.; Keyser Fry, Reading, Pa.; Kelley-How-Thomson Co., Duluth, Minn.; Pacific Coast Rubber Co., Portland, Ore.; Wm. H. Hoegee Co., Los Angeles, Cal.

The Factory Behind the Product

A strong plant is never grown in barren soil and the quality of any product is dependent upon the facilities for its manufacture.

The factory producing the

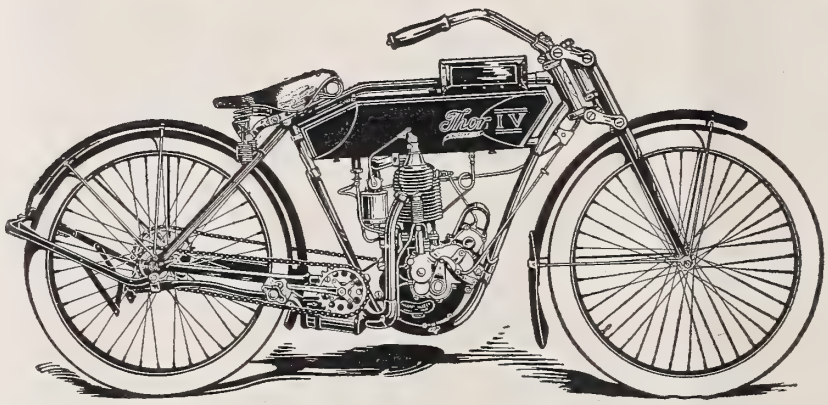
EXCELSIOR AUTO-CYCLE

is beyond question the most thoroughly equipped and complete motorcycle factory in the world.

With the buildings just finished, the total floor space is slightly over 190,000 square feet and the machinery and equipment is the best obtainable.

A comparison of these facilities with those of factories with a limited product or building only a part of the machine will clearly indicate one of the reasons for

EXCELSIOR SUPERIORITY



Three models for 1911 — two Singles and a Twin. All described in Catalog C-11. Write for it today.

EXCELSIOR SUPPLY COMPANY

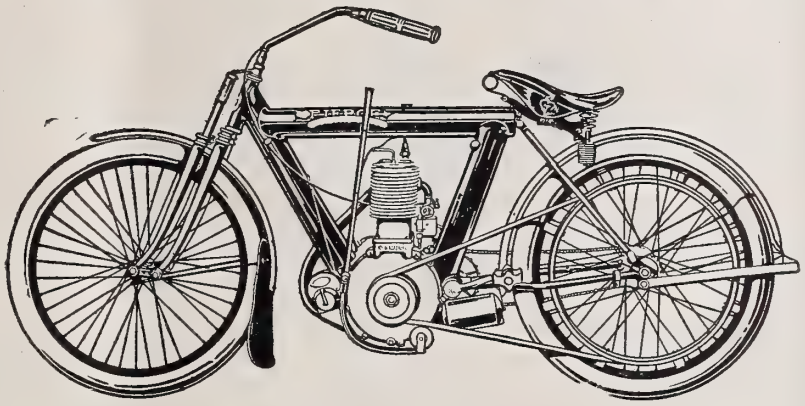
Thor IV Motorcycle

With a Free Engine Multiple Disc Clutch That Runs in Oil

The Thor Free Engine Clutch is now perfected and will be equipped on all Thor Chain Drive Models in the future.

This clutch is designed after the same principle used in the famous Thor Coaster Brake. It is perfect in action and principle of construction.

The undergeared chain transmission as used on the Thor Motorcycle is the only ideal motorcycle transmission on any motorcycle. Past records prove that Thor Motorcycles are without an equal. Just read the road news and be convinced.



Thor Motorcycles won the Chicago Motorcycle Club Endurance Contest held May 7th. Best individual and team average defeating 7 H. P. twins of several makes. They also won the Savannah Motorcycle Club Endurance Contest held April 26th.

Examine the Thor with Free Engine Clutch. Do it now.

It's What the Riders Say!

One Cylinder

Four Cylinder

(Letter written by R. B. Whitehead of the Whitehead-Hoag Co. to the Pierce agent in Newark. Similar letters come to us daily from all parts of the country.)

Newark, N. J., May 2d, 1911.

MR. FRANK MEYER, Mgr.,
Motorcycle Dept., L. J. Wurth Company

Dear Frank:--I think you will be interested in knowing my experience with the single cylinder Pierce on the club run to Hackettstown Saturday and Sunday.

The machine is the most satisfactory hill climber I have ever ridden. Hills like Schooley's Mountains, Mt. Pleasant Avenue, North Field Road and Eagle Rock were negotiated with no effort on the part of the motor. The Pierce was the only single that went up without being pushed or pedalled.

I made it a point to stop in the steepest part of Eagle Rock hill with the engine free by loosening up the belt. I then started again, and picked up speed so rapidly that it was necessary to cut off the power at the last turn in order to make it.

This statement may surprise you, but if at any time you wish to take a ride up there, I will "show you." The motor will not heat up, and always has a jump.

I don't think you people realize what a good selling proposition you have in this single. It would be well worth your while to feature it. Its unique design and simplicity in addition to its unusual power, to my mind, puts it far ahead of any other single, and I have ridden them all.

Again thanking you for your favors, and assuring you I shall always be pleased to speak well for the single Pierce, demonstrate it, and boost it, I am,

Sincerely yours,
R. B. WHITEHEAD.

The merits of our product are thoroughly exploited in catalog "A" copy of which will be gladly sent on request.

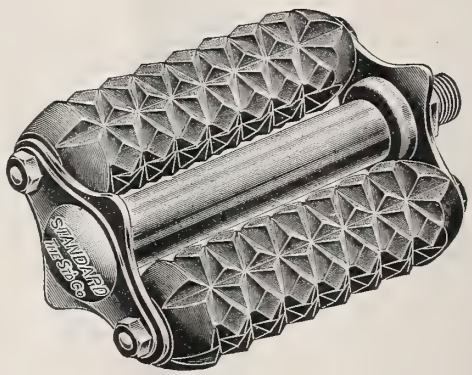
There is no agency so valuable as the Pierce. If you are a dealer in unoccupied territory, ask for our proposition "The Agency That Pays."

FISK
BICYCLE
TIRES

The Quickest Selling Line on the Market

THESE tires are their own best advertisement. Thousands are weekly shipped out as Standard Equipment from the factories making Iver Johnson, Pope, Pierce, Yale, Emblem, and Snell bicycles.

50% of the high grade bicycles in 1910 were Fisk Equipped. Makers and riders have profitted by the experience. This year more than 75% of the medium and high priced wheels carry Fisk Tires.



DEALERS wishing to work along the line of least resistance should write for our new illustrated catalog and trade prices.

B104P
BROOKS Motor Cycle Saddle—specially constructed to give a low riding position.

A Trade-Winning Line of Motorcycle Tires

1911 Goodyear Motorcycle Tires—the largest line of motorcycle tires manufactured—is winning business on rock-bottom merit alone.

For each type of the five Goodyear tires is the longest-wearing tire of its kind. Hence each produces mileage at a fraction of the cost riders must pay for mileage with other tires. Consequently Goodyear tires in the end are the cheapest—and the first cost is no more than commonplace tires.

GOODYEAR
Motorcycle Tires

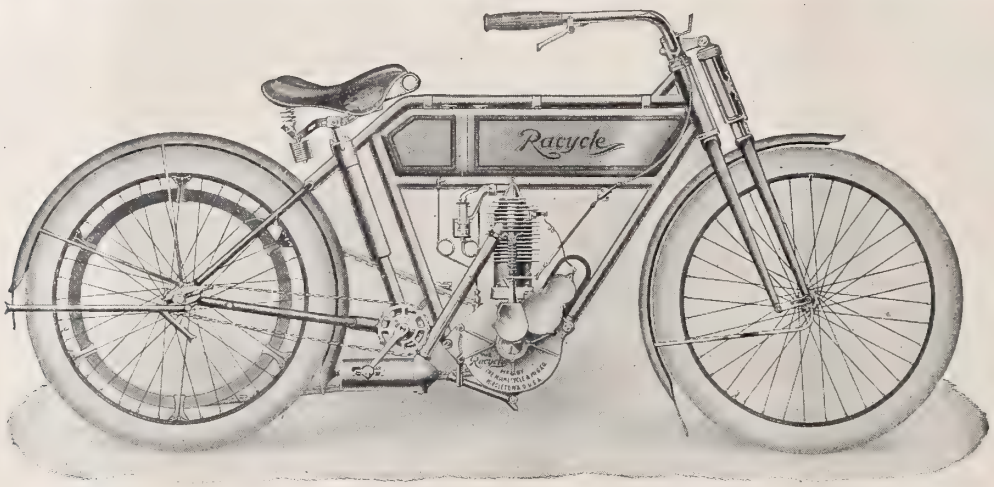
The Goodyear line this year comprises five types of tires—one to fit every road condition which the motorcyclist encounters.

The man who rides for recreation—who encounters **give and take roads**—gets utmost tire value from the Goodyear Corrugated Tread Tire. For pleasure-riding, our Corrugated Tread Tire is king of them all.

For all-the-year-'round business travel over muddy roads—for endurance runs—the self-cleaning Goodyear Studded Tread Tire is supreme. The studs are farther apart than on ordinary tires, so that this tread cleans itself.

On slippery brick and asphalt pavements the Goodyear Non-Skid Checkerboard Tire is the only efficient tire of its kind. The contact of its tread with the street forms a vacuum, which insures forward traction and absolutely prevents skidding. On wet streets the Goodyear Non-Skid is the absolutely effective non-skid tire. Chicago's Motorcycle Policemen all ride on Goodyear Non-Skid Tires, to the exclusion of every other so-called non-skid tire.

For racing events there are two types of Goodyear Blue Streak Tires—the combination tread for dirt tracks and the plain tread for the saucer. Blue Streak Tires hold the world's time record—92 miles in 1 hour 6 minutes and 35 seconds, by DeRosier, at Los Angeles, February 7th.



Our extensive advertising, our sales promotion campaign and the sterling worth of every type of Goodyear tires is making this splendid line a highly profitable proposition for dealers and agencies. For trade quotations please write us at once. Address

Vol. LXIII. New York, U. S. A., Saturday, May 13, 1911. No. 8

MERKEL AND MIAMI MERGER ON

Negotiations Practically Concluded for Combining Motorcycle Manufacturing Interests—Compelling Reasons.

Negotiations looking to the merging of the Merkel-Light Motor Co., of Pottstown, Pa., makers of the Flying Merkel motorcycle, with the Miami Cycle and Manufacturing Co., of Middletown, O., makers of the Racycle motorcycle and bicycle, which have been in progress for some little time, this week reached a point where they are practically concluded, although the details of the alliance or merger are not fully completed as yet. The plan involves the transplantation of the Merkel equipment and manufacturing activity from Pottstown to Middletown.

Many considerations have influenced the Merkel company to consider the new alliance and combination. The company's business has been such that it has greatly outgrown the factory facilities afforded in Pottstown, and the latter place offers no inducements for the company to stay. In addition, the scarcity of skilled labor in Pottstown, and the poor express and freight accommodations have presented difficulties. It is probable that the removal of the company from Pottstown will not take place until next fall, after the 1911 manufacturing season is over, but in time for an early start on 1912 production.

Free Engines for All Chain Thors.

That all chain driven Thor motorcycles hereafter offered by the Aurora Automatic Machinery Co., of Chicago, Ill. will be equipped with the Thor free engine clutch, is the announcement made this week by Sales Manager H. T. Roberts, and the announcement is such as to be of vital interest not only to Thor agents but also to the motorcycle trade in general. The clutch is of the multiple disk type, and is designed on the same principle that has been successfully employed in the Thor coaster brake.

The entire mechanism runs in oil, and, according to Roberts, "will absolutely last a lifetime." There are four sets of ball bearings, and the safety margin provides for a strength four times greater than any calculable strain. After an extended period of development and test, the clutch is now in approved form, as part of the regular Thor equipment.

Macon Dealers Add to Their Line.

The Motorcycle & Supply Co., of Atlanta, Ga., is to handle the Thor in addition to the Merkel motorcycle. The company has enlarged its quarters and now has a good sized show room at 42 Walton street, opposite the new postoffice.

Handling Racycle in Cleveland.

The Bailey Company, of Cleveland, O., has become an active element in the retailing of motorcycles in the Forest City. It has obtained the Racycle agency and is conducting a lively campaign.

Kilham Changes Quarters in Beverly.

Joseph F. Kilham, who handles the Yale and the Indian motorcycle in Beverly, Mass., has moved his store from Railroad avenue to a new location. He is now at 55 Broadway.

Cooper Gets Wagner for Columbus.

W. R. Cooper, of Columbus, O., has obtained the agency in that city for the Wagner motorcycle. His establishment is at 45 West Main street.

RELIANCE FACTORY CLOSES DOWN

Creditors Asked to Await a New Adjustment — Technical Difficulties in the Product.

The Reliance Motorcycle Co., of Owego, N. Y., manufacturing the Reliance motorcycle, has closed its works for an indefinite period, and at the same time is asking for further leniency from its creditors who hold its obligations following its reorganzation last fall. The reason assigned for the closing of the works is that certain technical deficiencies have been found in the new motor of the 1911 Reliance model, and the company does not wish to put out machines until all faults have been corrected.

It is claimed that in all preliminary tests the motor designed for the 1911 model made an entirely satisfactory showing, and that long trials on the road during the winter months disclosed no defects in either manufacture or design, but that with the coming of warm weather, trouble was experienced in overheating. Until all difficulties with the motor have been corrected, no machines will be put out. Pending such time as the company again resumes manufacturing and will be on its feet as a going concern, the creditors will be asked to accept a new adjustment, the terms of which will shortly be made known to them.

Rollins Changes Firm Name.

The Rollins Bicycle Co., of Beaumont, Tex., has changed its name and has become the Rollins Supply Co. Eli Rollins is still manager and sole owner. The company handles bicycles and motorcycles, and is located at 521 Pearl street.

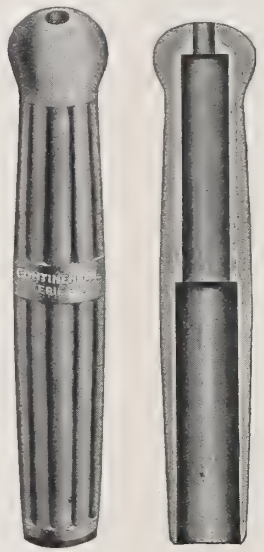
Jenkins Takes New Business Home.

After being located at 10 W. 60th street, New York City, for nine years, George P. Jenkins, one of the veteran motorcycle dealers of the metropolis, last week took a new store at 256 W. 55th street. When Jenkins is settled in his new home he will have one of the largest and best appointed exclusive motorcycle establishments in New York. It is situated next to the Automobile Club of America annex in the heart of the motor car district. The building where Jenkins now is has just been entirely renovated and refinished, and he occupies the first floor and basement. The floor space is 25 x 100, and the street floor will be devoted to salesrooms, office, used motorcycle display room, parts department and repairs. The quarters are well lighted and there is an excellent front display window. The basement will be used for storage and surplus stock, and is served by a large elevator with outlet direct to the street. Jenkins handles the M-M line exclusively, and his establishment also will be the headquarters of the New York Motorcycle Club. Much motorcycling history was made at Jenkins's old stand, for at various times it was the headquarters of the Metropole Cycling Club and the New York Motorcycle Club. Several of the early national endurance contests, as well as many local events, have started from the place, which is but a step from Columbus Circle.

Grady Offerings Shown Graphically.

With 92 pages describing and illustrating bicycles, motorcycles and all sorts of bicycle and motorcycle accessories, the 1911 catalog of J. W. Grady & Co., of Worcester, Mass., is in itself an impressive evidence of Grady activity. New England bicycles, fathered by the Grady company are given a conspicuous place, together with Hudson and Dayton bicycles. In the motorcycle field the Harley-Davidson is the offering, as the company has the New England agency for this machine, with the exception of one or two cities. The offering of bicycle accessories and tools is unusually complete.

Lister Acquires Merkel Agency.



The Lister Motorcycle Co., of Cleveland, O., has taken the Merkel agency, which was released as the result of business difficulties experienced by the Morse Motor Sales Co., of that city, a new firm which had taken the Merkel line. The Lister company also handles the Harley-Davidson.

Jerseyites Want Printed Matter.

All manufacturers and dealers who wish to do business with the members of the New Jersey Motorcycle Club of Newark, N. J., are invited by the club to forward catalogs and other printed matter for the club library. Dealers in the Metropolitan district and in New Jersey are asked to forward their business cards to the club. H. N. Davis, the secretary of the club, is located at 321 High street, Newark, N. J.

Fabric Strength in Long Grips.

Taking account of the possibility of accident were a motorcycle handlebar grip to break off at the end of the bar, the Continental Rubber Works, of Erie, Pa., has brought out a form of long rubber anti-vibration grip in which there is an inner lining of fabric throughout, which makes the grip tough and strong. With this construction, it is claimed, it is impossible for the grip to break off at the end of the bar. The exterior and interior of the grip, respectively, are shown in the accompanying

illustrations. The relief part of the grip, which is not supported by the bar itself, is naturally subject to considerable strain, and to provide for this there are built up several plies of fabric. It is impossible for the end of the bar to cut the grip, as the grip at that point is of solid fabric. The rubber is soft and resilient, as the fabric gives the grip the strength and firmness that otherwise could be obtained only by the use of stiff, hard stock. The grips are packed in neat boxes, containing one pair each, and for quantity orders special labels are printed if desired.

Diamond Takes to the Motorcycle.

In addition to making motorcycle tires, the Diamond Rubber Co., of Akron, O., has become a motorcycle owner itself, by the purchase of a 4 horsepower Excelsior for the use of D. B. Dodd, general route manager of the Diamond company's advertising crews. There are seven of these crews working throughout the United States from Maine to California, each crew equipped with a motor truck or light delivery wagon, and consisting of a manager, chauffeur and from seven to ten sign painters. In following these crews and inspecting the work they have done, Dodd finds his motorcycle indispensible. Without any hesitation the Diamond company decided on Diamond tires for the equipment of the machine.

Has Vacuum Cups for Non-Skidding.

First announced during the time of the New York motorcycle show, a new motorcycle tire, with non-skid rubber cups in the tread, is being placed on the market by the Pennsylvania Rubber Co., of Jeannette, Pa. It is styled the vacuum cup tread tire, and resembles the vacuum cup automobile tire made by the company. The tread is formed of a series of cups molded in the rubber, which are designed to form sufficient suction with a wet road surface to prevent skidding in any direction. On a dry surface the cups do not have the suction action. The suction, while preventing side slip, does not in any way retard the rolling of the tire, as each cup is released by the turning of the wheel. In mud the cups give added traction, as they are imbedded in the soft roadway so that their sides obtain a strong hold. The quality of the materials in the vacuum cup tire is exactly the same as that in the automobile tire of the vacuum cup type. On account of the additional cost of manufacture, the price is somewhat higher than for the ordinary corrugated tread, but the advantages afforded by the vacuum tread are claimed to compensate for the additional first cost.

Goodby Issues a Big Year Book.

"Everything for bicycle builders and dealers" is part of the slogan in the foreword of the 1911 bicycle and motorcycle supply catalog of Albert E. Goodby, Providence, R. I., and the illustrations and descriptions contained in the 108 pages of the book well indicate how fully the Goodby array of goods support the slogan. The catalog is in a handsome light blue cover, and its first pages are devoted to Royal and Oxford bicycles, together with children's velocipedes and tricycles. Standard makes of bicycle and motorcycle tires follow, including Goodby's own bicycle tire offerings, such as the Overland and the Goodby single tube. The balance of the catalog shows bicycle and motorcycle accessories, fittings, parts and tools.

For Persuading Police Departments.

"Enforce Your Ordinances," is the striking title of a booklet that has been issued by the Hendee Mfg. Co., of Springfield, Mass., makers of the Indian motorcycle. Its purpose is to persuade the police departments of the various cities of the usefulness of the motorcycle in apprehending automobile speeders and in extending the work of the police department by providing rapid transportation. The book is filled with pictures and testimonials relating to the already successful use of Indian motorcycles in various cities.

Mark to Offer Kokomo Machines.

The Mark Auto Supply Co., 1505 Crawford road, Cleveland, O., is one of the comers in the ranks of the motorcycle dealers. It has taken the agency for the Kokomo motorcycle.

TRANSFORMATION AT R-S PLANT

Woods Applies Scientific Principles to Management—Remarkable Effects of Radical Changes.

How the application of scientific and expert business management to a motorcycle manufacturing plant may exercise a transformation that is little short of astonishing in its results is at present being exemplified in a striking way at Reading, Pa., in the factory of the Reading Standard Co., where R-S motorcycles and Reading Standard bicycles are manufactured. Practically all of the more prominent motorcycle manufacturers are applying advanced principles and modern systems both to their fiscal and their manufacturing affairs, but in the majority of cases their present high efficiency in all departments is the result of evolution and has not involved the striking contrast in a short period that is found in the Reading Standard situation.

Following the complete reorganization of the affairs of the company last December, when the chief creditors of the concern agreed to accept preferred stock of the company for their claims and came into control, the general management of the company was placed in the hands of Clinton E. Woods, who had been manager under the receiver and who enjoyed a high reputation as an expert in factory and business management. What has been accomplished since then in bringing a badly disorganized plant to a remarkable state of efficiency and productivity, goes to support the reputation that Woods already had. The present condition and appearance of the factory indicate what has taken place, while the actual record of manufacturing results is an eye-opener to those interested in the manufacturing problem.

When the reorganization was effected and Woods was given rein to go ahead with his plans, his first step was to take a minute inventory of every bit of physical property in the plant. The inventory was of such a character that an analysis of it enabled him to make a thorough housecleaning. Tools, machinery, equipment, parts and material that were defective, useless or unnecessary were disposed of or scrapped, leaving only the useful and necessary. The machinery was rearranged on the floors so that manufacturing processes might follow each other in orderly succession, avoiding as far as possible the frequent backward and forward carrying of parts and materials from one part of the plant to another, and aiming for the general effect of having raw material enter at one end of the building while the finished products come out at the other end.

One of the most apparent and radical improvements was effected in the assembling department, where previously there had been much confusion and turmoil. The problem was well thought out, and a system was provided whereby the assembling now proceeds in regular stages, with all necessary parts arranged readily to the hand of the assemblers, so that they can accomplish their work with a minimum of lost motion or wasteful hunting, fitting or sorting. The manufacture and inspection of all parts was brought to a point where absolute interchangeability is obtained, and no time is lost in assemblers having to correct misfits or to match parts for oversize or undersize.

In the stock room a sweeping reform was made, and, as described by one visitor, the stock room is now "a model of good business housekeeping." One of the first steps was to bring the supplies of all the various parts and materials up to their proper proportion, so that manufacturing would not be interrupted for the want of this or that. This proportion once obtained, a perpetual inventory and automatic alarm system was installed, so that at all times the exact quantity of any given article or class of material in the stock room is known, and when the supply begins to fall short of the proper proportion in relation to the whole, the system gives adequate warning, so that more may be ordered in ample time to prevent a shortage that would hold up production.

No less than $100,000 worth of stock parts and materials are to be found as the normal aggregate in the stock room. Of this a part is a reserve for earlier models of R. S. machines, so that old customers of the company will not be left in the lurch for repairs or replacements on machines of past years.

Although radical changes were made in the physical conditions and arrangements of the factory, these changes were made with the introduction of as little "red tape" as possible, the policy being for simplification rather than complication. Where system and record keeping was introduced, it was for the purpose of saving effort and accomplishing "short cuts."

In regard to the employes or the "human element" in the factory, Woods altered the personnel of the organization as little as possible, and there was no such wholesale firing and hiring as had been expected. He accepted the men as he found them, and bent them to his plans. An early step in his scheme of increasing their efficiency, was the raising of the pay of 28 of the head men constituting his corps of lieutenants, to stimulate their interest and loyalty, a measure that was actuated purely for reasons of factory economy.

With a late start for the season of 1911 and the introduction of changes that in themselves required considerable time for their being put into effect, the factory already has delivered over 300 R-S motorcycles, and is putting out 20 motorcycles and 50 bicycles per day, a rate of production completely overshadowing the greatest per diem production in any previous year of the company's history. Furthermore, this has been brought about with apparent ease and smoothness, and without a material enlarging of the factory or the operating force over what had obtained before.

Next in order are the plans that are being laid for the equalizing of factory production throughout the year, to avoid the "season" rush of production that involves a subsequent waste period of slack and idleness. To carry out such a policy of production equalization requires that early provision be made for the succeeding year, in the stocking of parts and materials necessary to carry on manufacture during the fall and winter months, and steps to this end already are being taken.

Back Rests and Saddles Described.

Not only for the motorcyclist interested in the saddle proposition, but also for those who are looking for motorcycle trunks, carrier bags, panniers or cases for the carrying of spares and tools, the "motorcyclists' edition" of the "Brooks Book" for 1911. issued by J. B. Brooks & Co., Ltd., Great Charles street, Birmingham, England, is likely to prove helpful in the selection of equipment. Back-rests for motorcycle saddles are one of the novelties included in the catalog. They give an easy-chair effect to an ordinary saddle. The full line of Brooks saddles is shown, from the broad seat with heavy padding and compound springs to the models that are very light and those that are very low, the latter being especially designed for riders who wish to get the seat position as low as possible.

Human Types that Match Models.

Two unusually complete and handsome catalogs have been issued by Rudge-Whitworth, Ltd., of Coventry and Birmingham, England, manufacturers of bicycles and motorcycles. The motorcycle catalog shows Rudge-Whitworth construction in detail, with pictures, while the bicycle catalog is distinguished by a series of photographic half-tone illustrations, showing the various types of riders for which the different models of machine are intended. These riders include boy scouts, girls with tennis racquets, business men and a few lords, vice-roys and cabinet ministers thrown in for good measure. Both catalogs contain many pages relating to parts and accessories, and the bicycle catalog has a large diagram showing every important part of the bicycle.

Hughes Joins New Departure Forces.

Frederick Hughes, who for the past six years has been the chief engineer of the Driggs-Seabury Ordnance Corp., of Sharon, Pa., has joined the engineering staff of the New Departure Mfg. Co., Bristol, Conn. His activities will be chiefly in connection with the company's production of ball bearings.

Recruiting on Rival Club Runs.

There is a grand opportunity for motorcycle club membership committees to do some effective recruiting for new members by taking in open runs of their own and other clubs. These runs generally attract many of the new as well as several old riders who are unattached and who could be induced to join a club if the advantages of such affiliation were properly and attractively presented to them.

Some motorcyclists after having joined a club become dissatisfied with some features of it and would join some other club having a different way of doing things. These riders offer one class of prospects whom membership committeemen of other clubs can search out and work on. Then there are other riders who have the joining habit and are ready to add to their club affiliations whenever a good club seeks them.

While such recruiting methods to some may seem questionable and a breach of club ethics, this is not so, and it is perfectly proper for any club to solicit new members on any run or competition whether it be promoted by itself or another club. A club which has more to offer its members than some other club cannot be blamed for presenting these advantages to desirable prospects whom it seeks to enroll, and on the other hand, a motorcyclist who finds that he can obtain more benefits from a club other than that to which he already belongs, is perfectly justified in identifying himself with the new club even at the cost of resigning from the others. Membership recruiting in motorcycle clubs is a business proposition, and the club that has the most to offer cannot justly be criticized if it lures to its ranks members of other clubs, as its advantages become better known.

Flouting Sanction Requirements.

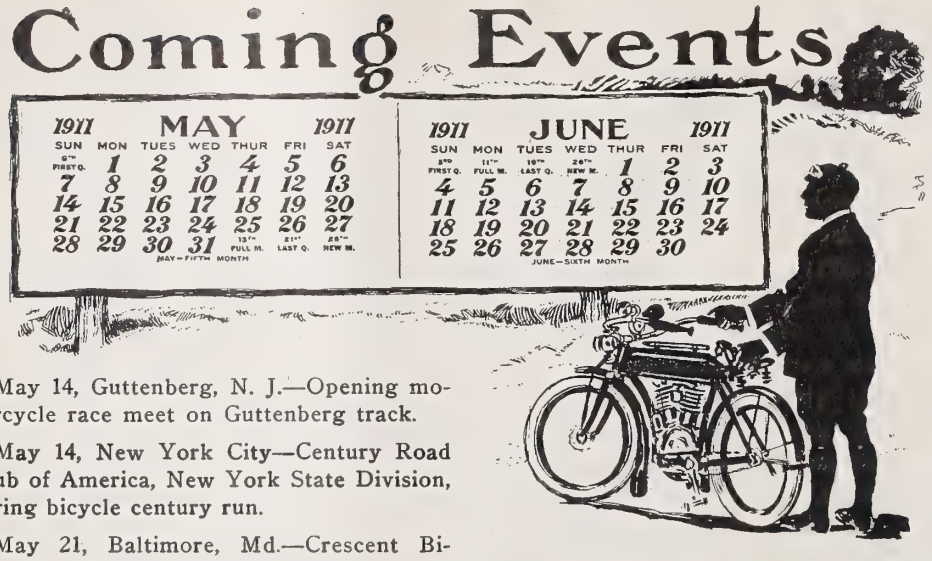
Motorcycle clubs that contemplate running unsanctioned events, not because of the cost of a sanction but on the ground that they do not think a sanction should be necessary for an open run, should take a hint from the experience of the New York Motorcycle Club in connection with its Southampton run. When the plans for the run were drawn the club decided to dispense with a sanction because it never before had been required to have one.

Nothing happened until the eleventh hour, when the chairman of the F. A. M. competition committee suddenly became active and threatened to outlaw the contest and suspend all riders who participated in it, if it were held without a sanction. Even this threat did not bring the club to terms, but it had a salutary effect on the riders. Many of them, when they learned that no sanction had been obtained, were indignant that they should have been put to expense in coming from out of town to compete in an event that they understood was sanctioned, when it was not, and that they would be suspended if they rode.

On the morning of the run, when many riders refused to start if no sanction were obtained, the club officials backed down and procured a sanction. The club claimed that its objection to securing a sanction was a matter of principle based on precedent. The chairman of the competition committee asserts that when he makes new rulings that are designed to improve competition, they must be obeyed regardless of precedent. He takes the stand that if his rulings and his interpretations of the rules are obnoxious to clubs, they should obey them under protest, and bring the matter before the national assembly at Buffalo for final decision.

The chairman asserts that a club is not justified in taking the law in its own hands and running its events as it chooses if it does not concur with his rulings. In this contention the chairman seems to be in the right, and it would seem to be the wisest policy for clubs to obey under protest any rulings which they do not like, and to ask the national assembly to hear the case. A disposition to obey the rules first, and take an appeal if they are distasteful, will gain not only friends but concessions.

Selling "Service" as Well as Machines.



Purchasers of new motorcycles no longer are satisfied to regard the transaction closed with the exchanging of cash and machine. They expect not only good service from the machine but also good service from the dealer in the matter of quick delivery of parts for replacements, a full compliance with the terms of the guarantee in regard to the replacement of defective parts and gratuitous technical service in the matter of minor adjustments.

Just as "service" has come to be a prime consideration in the sale of motor cars, it also promises to loom large in the marketing of motorcycles, though of course not nearly to the same extent as with the four-wheeled vehicle. The agent is regarded as the proxy of the manufacturer, and is expected to fulfill to the letter all promises of the manufacturer, no matter how extravagant they may be.

As motorcycle purchasers become more discriminating, agents will find that the carrying of fairly complete stocks of parts or the ability to deliver any part on demand, the quick and liberal adjustment of any claims for replacements under the guarantee with a reasonable concession to the customer, if necessary, even though he is to blame for the damage, and a disposition to look over his machine occasionally and make whatever slight adjustments may be required, without charge, all will count for a great deal in keeping customers satisfied and in making new ones.

It is to the interest of manufacturers to co-operate with agents in keeping customers satisfied by seeing that their machines are kept running and that they give good service. The customer buys not merely a machine, but along with it a promise of several thousand miles of uninterrupted pleasure, and he has every right to expect and receive it.

Coming Events

May 14, Guttenberg, N. J.—Opening motorcycle race meet on Guttenberg track.

May 14, New York City—Century Road Club of America, New York State Division, spring bicycle century run.

May 21, Baltimore, Md.—Crescent Bicycle Club's spring 50 mile pleasure run.

May 21, Brooklyn, N. Y.—Invincible Motorcycle Club's 150 miles spring run on Long Island, north shore.

May 21, Baltimore, Md.—Century Bicycle Club's 50 mile run to Reisterstown.

May 21-22, Seattle, Wash.—Two day endurance contest of the Seattle Motorcycle Club to Vancouver, B. C., and return.

May 24, Toronto, Canada—Toronto Motorcycle Club's endurance run to London and return, 256 miles; open.

May 25, Zanesville, O.—Motorcycle races at fair grounds.

May 27, Akron, O.—Motorcycle races; open.

May 28, New York City—Century Road Club Association's 30 miles handicap road race, Floral Park, L. I.; open. Rain date, June 4.

May 28-29-30, Cleveland, O.—Three day endurance run of Cleveland Motorcycle Club.

May 28, 29, 30, Chicago, Ill.—North Shore Motorcycling Club's race meet at Hawthorne track.

May 28 and 30, Terre Haute, Ind.—Terre Haute Motorcycle Club's race meet; open.

May 29-30, Newark, N. J.—Twenty-four hour endurance run of the New Jersey Motorcycle Club to Atlantic City and return.

May 30, Bridgeport, Conn.—Bridgeport Motorcycle Club's race meet.

May 30, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

May 30, Norwich, Conn.—Norwich Motorcycle Club's reliability run.

May 30, Detroit, Mich.—Racemeet of the Motorcycle Club of Detroit Wheelmen at State Fair track.

May 30, Springfield, Mass.—Motorcycle race meet of the Springfield Motorcycle Club, at the Springfield Stadium.

May 30, Elmira, N. Y.—Elmira Motorcycle Club's first summer race meet.

May 30, Newport News, Va.—Peninsula Motorcycle Club's endurance run to Richmond and return.

May 30, Long Branch, N. J.—Long Branch Cycle Club's second annual road race meet; open.

May 30, Asbury Park, N. J.—Twenty-five mile road race of the Monmouth Cycle Club.

May 30, Plainfield, N. J.—Third annual 25 mile handicap cycle race of the Plainfield Cycling Club.

May 30, Grand Rapids, Mich.—Bicycle and motorcycle races at Michigan State Field Day, under auspices of the Western Michigan Cycle Club.

May 30, Rome, N. Y.—Rome Motorcycle Club's 250 mile endurance run.

May 30, Wheeling, W. Va.—Ten mile bicycle road race; open.

May 30, Boise, Ida.—Boise Motorcycle Club's road races.

May 30, Salt Lake City, Utah—Eighteen mile bicycle road race.

May 30, Rockford, Ill.—Ideal Motorcycle Club's race meet at Driving Park.

May 30, Elgin, Ill.—Elgin Motorcycle Club's race meet at Wing Park.

May 30, Rockford, Ill.—Ideal Motorcycle Club's race meet at the driving park.

June 4, New York City—Concourse Motorcycle Club's fourth annual run to Savin Rock, Conn., and return; open.

June 4, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Greenfield, Springfield and return; 175 miles. Second section.

June 18, Baltimore, Md.—Crescent Bicycle Club's annual spring road race.

June 18, Floral Park, L. I.—Century Road Club of America, New York State Division, 50 mile handicap bicycle road race; open.

July 1, Waterloo, Ont.—Dominion cycle race championships.

July 3, Douglas, Isle of Man, Great Britain—Fifth senior international Tourist Trophy race; 187½ miles.

July 3-9, Rockford, Ill.—Racing carnival of the Illinois-Iowa Motorcycle Association.

July 4, Jacksonville, Fla.—Jacksonville Motorcycle Club's race meet.

July 4, La Salle, Ill.—Third annual open motorcycle race meet of the Illinois Valley Motorcycle Club.

July 4, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

July 4, Savannah, Ga.—Savannah Motorcycle Club's race meet.

July 4, Asbury Park, N. J.—Opening motorcycle meet at the Asbury Park track.

July 4, Grand Rapids, Mich.—Annual open bicycle road race of the Western Michigan Cycle Club.

July 10-15, Buffalo, N. Y.—Annual national convention and national championship race meet of the Federation of American Motorcyclists.

July 15, Rochester, N. Y.—Rochester Motorcycle Club's race meet at Crittenden Park.

July 16, New York City—Motorcycle Touring Club of New York's second cup trio-trial, Newburg and return, 150 miles; open.

July 18-21, Alliance, O.—Motorcycle races at Rockhill track.

August 1-2-3-4, Atlantic City, N. J.—Summer meeting of the Cycle Parts and Accessories Association and the National Association of Cycle Jobbers.

August 6, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Rockport and return; 200 miles.

Correspondence

Offer for DeRosier-Chapple Match.

Editor of the Bicycling World and Motorcycle Review:

If DeRosier and Chapple are sincere in their desire to get together in a match race at 500 miles, and in view of the fact that Mr. Hapgood, of the Hendee company, says that DeRosier will race Chapple on any track in the country, there is nothing that I can see that stands in their way, now that I have offered to stage the race here, to be held at Olympic Park track, and I will put up one-half the net gate receipts as a prize for the winner, or will split it any way the riders may decide.

We have held very successful meets here for the last three years, can furnish competent officials and a good track, with adequate facilities for riders and their attendants, and hope they will accept the offer that I have made.

C. E. HOLGATE,
123 Union street, Newark, N. J.

HART MAKES GOOD AT BENNINGS

Washington Meet Promoters Welsh on Motorcycle Race Prizes—DeRosier's Fee Sends Aviators Up.

What originally was scheduled to have been a three day motorcycle and aviation meet at Bennings track, Washington, D. C., on May 5, 6 and 7, shrunk to a one day affair, so far as the motorcycle part of the program was concerned. On the second day the riders went to the management and asked for the prizes for the first day. These were refused, it being said that no prizes would be delivered until the close of the third day. Thereupon they refused to ride any more and withdrew.

With competition from a horse show, the meet drew a small crowd on the first day and the aeroplanes did nothing, the motorcycles being the whole show. There were five races, and Frank Hart, of New York, who made his Indian debut, won two of them. He was beaten in a handicap, because the distance men were put too far in front.

R. K. Marsh, Indian, captured the ten mile handicap, and B. Feuerstein, Indian, was the winner in a three mile event. T. R. Dedge, Indian, won the novice. The track was ankle deep in sand and the best time made was a mile exhibition by Hart in 1:04. Jake DeRosier also was on the ground and wanted to ride some exhibitions, but when he modestly said that he would ride for $50, he was indignantly asked if he wanted "the entire gate." However, he rode some practice workouts with Hart and showed some of the local boys that the reports that he could not ride on a dirt track well were badly twisted.

Of the local riders, Mangold was good, and gave Hart some work to do to hold him off. Hart rode on the new Indian racer with both valves over the piston and also an auxiliary exhaust valve. The machine was altogether too fast for the track. When the riders declined to ride on the second day their entry blanks were handed to them. There was a crowd of 20,000 people on Saturday, and when it was announced that there would be no motorcycle races, many of them went out in disgust and demanded their money back. Glenn Curtiss and his aviators promoted the meet, but no responsible party could be found, for when the motorcyclists applied to any of the aviators about the prizes the air men disclaimed all knowledge of them and referred the inquirers to someone else. J. B. Anderson, one of the riders who acted as spokesman for the motorcyclists, found that the only prizes on hand were some cylinder oil, inner tubes, pedals and toe clips, although the program promised "handsome cups." As the meet was sanctioned, Chairman Thornley, of the F. A. M. competition committee, is investigating the evasion of the promoters and promises to make them sweat. Summary:

Ten mile open—Won by Frank Hart, Indian; second, M. A. Mangold, Indian; third, J. B. Anderson, Indian. Time, 13:39.

Three mile novice—Won by T. R. Dedge, Indian; second, William Denham, Indian; third, E. Isel, Harley-Davidson. Time, 5:01.

Five mile open—Won by Frank Hart, Indian; second, M. A. Mangold, Indian; third, J. B. Anderson, Indian. Time, 6:15.

Three mile open—Won by B. Feuerstein, Indian; second, R. K. Marsh, Indian. Time, 4:01⅘.

Ten mile handicap—Won by R. K. Marsh, Indian. Time, 12:30.

One mile exhibition—Frank Hart, Indian. Time, 1:04.

Forward Protest Against $5 Fee.

About 55 motorcyclists of New York City, representing three motorcycle clubs, held a mass meeting at Huber's Casino, Wednesday night, 10th inst., to protest against the provision in the automobile bill introduced by Senator White which includes motorcycles and provides registration, numbers and penalties for them. After discussion, on motion of Stanley Thorpe, seconded by W. A. McClellan, a protest addressed to the chairman of the rules committee at Albany, against motorcycles being included in automobile legislation was drawn up by C. L. Frobisher, of the Concourse Motorcycle Club. The protest was signed by all present and will be forwarded to the committee. It now appears that all that can be done for motorcyclists has been done and their fate rests with the rules committee. Any further protests against motorcycle legislation should be addressed to Senator White, chairman of the senate committee on internal affairs, with the request that he transmit them to the rules committee. Senator White is the father of the bill which includes motorcycles, but it is understood that he is willing to have them excluded. They were included at the request of the secretary of state, who thought that they should contribute to the state revenue.

Goerke's Leg Now Mending Well.

All fears that Walter Goerke, the Brooklyn motorcycle racing man, who sustained a triple fracture of the left leg in the Long Island Motor Parkway road race on April 2, would be permanently crippled were dispelled last week when the surgeons at the Bethany Deaconesses hospital in Brooklyn removed the copper plate which had been attached to the broken bones and found them knitting nicely. Goerke was removed to his home, 1155 Bushwick avenue, on Thursday, 11th inst., and his leg is mending so well that he expects to be about on crutches in about a month.

GRAVES SLIDES AT SANTA ROSA

Goes Sprawling in Neck-and-Neck Finish with Collins and Seymour—Two Days of Racing.

Sliding for home, the apoplectic moment in a baseball game, fades into insignificance as a thriller in comparison with the slide for the finish which M. J. Graves, the Merkel speed merchant, took while riding at better than a mile a minute in the motorcycle races at Santa Rosa, Cal., on Sunday, 7th inst. Riding neck-an-neck with Seymour and Collins, Graves rubbed wheels with the former in the home stretch, about 15 yards from the finish, and in a flash he was dismounted and hurled along the ground, coming to a stop 30 yards beyond the line. His usual good luck was with him and aside from bruises he was unhurt.

Seymour won the race, and Graves received compensation for his plow imitation by being given second. Collins protested against this, but was overruled. Elbow-rubbing riding was the rule in the motorcycle events, and they easily were the feature of the two day meet which began on Saturday, and was conducted by the Santa Rosa Automobile Association.

Collins won a five mile race on Saturday, beating Graves and Seymour by less than a length. In the next race, a three mile open, Graves collected first money, with Collins second and Seymour again in the rear. In this race Graves made the fastest mile of the meet, 49¼ seconds.

To make up for his poor showing on Saturday, Seymour made a clean sweep on Sunday, taking both of the handicaps. Graves slid in second in the three mile and Collins occupied that berth in the five mile. The races were run on a mile dirt track. All of the riders were professionals and their visit was in the nature of a quiet pot hunt, for Collins, Seymour and Graves gathered everything. George Renel, the Paris "wizard," who has switched to a Curtiss, was a consistent tailender. Summary:

Saturday, May 6.

Five mile open—Won by W. G. Collins, Indian; second, M. J. Graves, Merkel; third, Ray Seymour, Indian. Time, 4:41⅘. Fastest mile, by Seymour, 50 seconds.

Three mile open—Won by M. J. Graves, Merkel; second, W. G. Collins, Indian; third, Ray Seymour, Indian. Time, 2:48. Fastest mile, by Graves, 49¼ seconds.

Sunday, May 7.

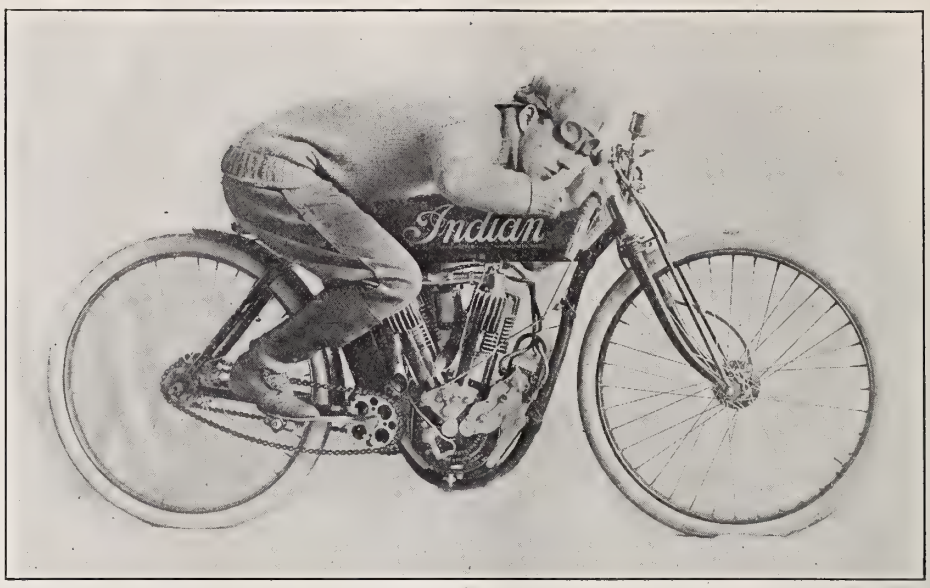
Three mile handicap—Won by Ray Seymour, Indian; second, M. J. Graves, Merkel; third, W. G. Collins, Indian. Time, 2:28½.

Five mile handicap—Won by Ray Seymour, Indian; second, W. G. Collins, Indian; third, George Renel, Curtiss. Time, 4:53⅗.

FRACTIONS CHIP CHICAGO SCORES

Matthews the Only Perfect Score Man in Semi-Annual Reliability—Bernard Gets Second Honors.

Hot competition marked the Chicago Motorcycle Club's semi-annual reliability run over the Chicago-Elgin-Aurora triangle course on Sunday, 7th inst. In a field of 28 starters, including some of the best road riders of the Middle West, only one perfect score was made and that was earned by E. W. Matthews, on a 4 horsepower Thor. The fact that Matthews was the only perfect score does not mean that he won hands down, for his margin of victory was but one point. Harvey Bernard, 7 Merkel, ran second with a score of 999 points. He fell from mathematical grace in the technical examination to which the machines were submitted at the finish.



How closely the places were decided is indicated by the fractional points which were chalked down against riders, and meant either one place higher or lower as the case happened to be. Most of the penalties were incurred in a hill climb, which was held on the famous Algonquin hill. The penalties imposed in the hill climb do not mean that in all cases riders either pedaled or dismounted.

In scoring the climb the fastest time in both single and twin classes was taken as a reckoning factor, and one point per second was assessed on machines in both classes for every second their time fell below that of the standard times. In the twin class Bernard was the fastest on the hill, while Matthews led the single division. His time was very remarkable, for it eclipsed that of many of the twins. The winner was decided by the technical examination, for up to that time Bernard and Matthews had perfect road scores and led their classes in the hill climb. The technical quiz shattered Bernard's chances when the committee discovered a loose head nut and taxed him one point. This technical inspection is distinctly a Western method of breaking tie scores, and is yet to be introduced in the East. Prizes consisting of accessories were awarded to the first 13 men, and Matthews will hold title to the trophy cup offered by the club until someone beats him in a future contest. Ideal weather and good roads favored the contestants, and the chief troubles were due to police activity in small towns. The summary of the results is shown in the accompanying table.

Contestant and Machine.	Score.	Hill.	Penalties Tech.	Sched.
E. W. Matthews, 4 Thor	1,000			
Harvey Bernard, 7 Merkel	999		1	
H. T. Roberts, 4 Thor	998.5	1.5		
Albert H. Davis, 6 Excelsior	998	2		
J. E. Merz, 7 Merkel	997.5	2		.5
Fred I. Huyck, 6 Merkel	997.2	2.8		
C. A. Leander, 4 Thor	997	3		
F. E. Beck, 4 Harley-Davidson	996.7	2.8	.5	
W. L. Walsh, 4 Harley-Davidson	995.7	2.8	1.5	
S. S. Burke, 4 Excelsior	995.3	3.7	1	
A. P. Carrol, 4 Excelsior	995	4.5	.5	
V. P. Erich, Excelsior	994.7	5.3		
Edward Schadde, 6 Merkel	993.6	6.4		
Russel Firkins, 4 Armac	985	12.5	2.5	
R. C. Crist, 6 Excelsior	984.2	15.8		
Charles A. Wellman 2¾ Indian	984	7		9
B. F. Koch, 4 Harley-Davidson	983.5	3.5		13
P. B. Whitney, 7 Indian	982	12		6
C. S. Hinckley, 7 Indian	979	13		8
John R. Purdy, 4 Harley-Davidson	977	9		14
H. R. Clausen, 4 Yale	948.5	4.5		47
M. N. Graves, 4 Thor	943	50		7
F. H. Simon, 4 Armac	919	50		31
E. C. Malmborg, 6 Merkel	837	100		63
D. S. Lawson, 7 Merkel	800	100		

J. C. Hart, 4 Harley-Davidson; W. S. Covington, 4 Harley-Davidson; T. C. Monroe, 4 Sears, did not finish; arrested for speeding.

BALKE IN THE EAST AFTER SCALPS.

It will be the East against the West at the opening motorcycle meet of the season at Guttenberg, N. J., Sunday, 14th, for two stars will clash, A. G. Chapple, of New York, on a Merkel, and Charles Balke, of Los Angeles, on an Indian. Chapple is considered the best Eastern professional at present, while Balke is one of three "native son" daredevils over whom Californians rave. Both riders are thoroughly at home on dirt tracks, but each has an entirely different style of riding so that some corking sport is assured. The management promises that the track will be in good condition and that in addition to the regular program a special feature will be put on. Both Balke and Chapple are scheduled to disclose new racing machines.

Ready for Cleveland's Three Day Run.

The three day spring reliability run of the Cleveland Motorcycle Club, which is scheduled for May 28-29-30, will start from the club house, 1864 East 79th street. The first day will include the towns of Elyria, Norwalk, Bellevue, Delaware and Columbus; the second day will be from Columbus to Marysville, Bellefontaine, Lima, Findlay, Bowling Green and Toledo; the third day takes the tourists to Fremont, Clyde, Castalia, Sandusky, Norwalk, Oberlin, Elyria, Lorain and into Cleveland, finishing at the club house. The affair is under F. A. M. sanction and gold medals will be awarded to all having perfect scores, while silver medals will be given to those from 950 to 999 points out of the possible total of 1,000.

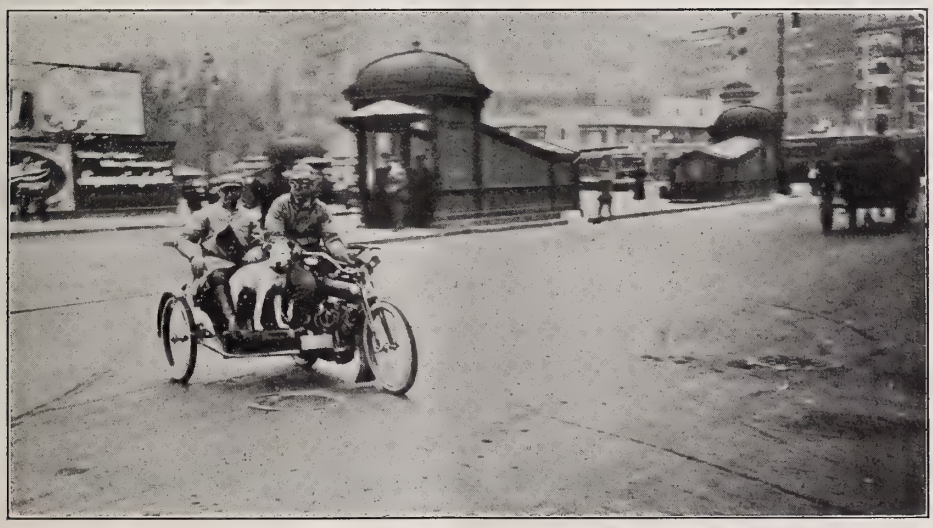
Elgin Club to Stage a Race Meet.

Decoration Day will be observed by the Elgin (Ill.) Motorcycle Club with a race meet at Wing Park speedway. There will be five events, and as drawing cards the club is trying to sign a couple of top notch riders. All of the local riders will enter, and at least 30 entries are expected. The local dealers and the club will contribute the prizes.

SOUTHAMPTON RUN PROVES A SPEEDFEST

All but Eight of the 63 Starters Finish in New York Motorcycle Club's 200 Mile Annual Trip—Thornley Routed Out of Bed for a Sanction—Club Shield Contest Close.

Sixty-three men, two ladies and a dog, all very dusty and very tired, but still ready for more riding, survived the New York Motorcycle Club's tenth annual run to Southampton and return on Sunday, 7th inst. Seventy-three riders and machines started, but eight of them had trouble and quit or else quit because they felt like it. Although the entry blank said that the distance was 200 miles, cyclometers registered between 209 and 210 miles.



Officially the contest was a spring double century run; actually it was a free-for-all road race with a couple of controls to act as a sort of throttle on the riders. Practically everyone looped it all the way, or as far as they could go. This "looping" naturally showed up any weak spots in machines or tires, and many a roadside spot was converted into a temporary repair shop.

Early Broadway strollers near Columbus Circle btween 5 and 6 a. m., Sunday, stopped and stared as they beheld groups of riders tearing down the road toward the Circle. Mufflers were wide open and the racket in the vicinity of the starting point resembled a miniature Central American revolution. The open mufflers later led Frederick B. Hart, of the Reading Standard Co., who was on hand looking after his riders, to remark that in Chicago riders kept their mufflers closed and did not dare make such a racket, and that he now understood why the open muffler received so much notice in the Eastern press. The polise on duty paid no attention either to the open mufflers or the early speed trials along Broadway.

Incidentally the run came mighty close to being outlawed and disrupted. The club neglected to secure a sanction, and Chairman Thornley lay low until the day before the run. Then, when he found that the club had no intention of getting a sanction and apparently proposed to ignore him, he sent word around that all who competed in an unsanctioned contest would be suspended. The warning had its effect, and the riders refused to start unless a sanction was obtained. At the last minute on Sunday morning, when the officials acting for the club realized that there would be a riders' strike if no sanction were obtained, they came down to earth and sent a messenger up to the hotel to rout the chairman out of bed to write out a sanction. It was only to oblige the large number of riders from other places whose pleasure he did not wish to mar that he consented to give the sanction on such short notice. Incidentally the club paid a double sanction fee, $4, for its stubbornness.

SCENE AT THE START NEAR COLUMBUS CIRCLE

THE JENKINS TRIO BOUND FOR SOUTHAMPTON

Owing to the delay in obtaining the sanction, the run did not start until 6:15 a. m. A few post-entries were received, and then the checking cards were distributed, also the blue handlebar ribbons with the name of the club, contest and date stamped on them. Despite the fact that there was no Brooklyn division, quite a few riders came over from the Invincible and Curtiss clubs of Brooklyn to participate, but it is probable that there would have been many more if there had been a Brooklyn division.

With most of the officials at the start participating in the run themselves, there naturally was confusion and bungling. The riders were sent away haphazard, and there was no directing head to assemble the various makes of machines together, and keep the riders orderly and quiet. By 7 o'clock the last rider was gone, several stragglers having come around to the start after the main body had left. One of the most picturesque starters was Frank Hart, on an R-S twin. He wore a sweater that once was white, but was discolored with

dust, on the back of which was a big smiling Indian head. Several predicted that this grinning figure would furnish the Long Island deputy sheriffs with a grand means of identifying the wearer for speeding, but Hart managed to finish without being arrested, although a few others were not so fortunate. Freeport "cops" were on every corner and warned the riders to slow down, but in other places it was a case of "giving her all she would take."

IN THE PATCHOGUE CONTROL

Trouble began before some of the riders were out of sight of the start. M. E. Toepel, Indian, was the first to retire. He had countershaft trouble. It was the usual case of an ill wind blowing somebody good, for Stanley Thorpe, Harley-Davidson, who had overslept, came along and was given a checking card and officially started. All this happened near the Queensboro bridge in New York. On the Brooklyn side of the bridge Joseph Buckingham, Harley-Davidson, was run into and thrown by a careless rider. Buckingham had his knee cut and his clothing torn, but he kept on.

Patchogue, approximately 59 miles out, was the first check and the schedule allowed three hours to make it. Several of the fast ones made it in a little over two hours. In the twin class the speed honors to this point went to John Constant, 5 Indian, with McKenzie, 7 Indian, a couple of seconds behind. Making their first public appearance in a contest, the new R-S singles took the speed honors to Patchogue in the single cylinder class, much to the surprise of several who did not look for speed in them. These two fast ones were ridden by R. S. Morton and Edward Swain, respectively. The early ones at Patchogue had to wait until 9 o'clock before they could check out.

Once released, it was a case of burning the road again to Southampton, 31 miles from Patchogue. Constant and the others who had miniature Blitzen Benzes devoured the stretch in 70 minutes. At Southampton, Joseph Buckingham, Harley-Davidson, was the first single in, and coming back he likewise beat all the other one-lungers to controls and the finish. Two hours were allowed for dinner at Southampton and the riders who got there enjoyed a fine turkey dinner at the Commercial hotel. The price was 75 cents, for what would have cost at least $2 in New York. Quite a few machines needed attention at Southampton after the grueling punishment they had received on the outward trip.

At one o'clock the homeward trip commenced, and was more fruitful of excitement and happenings than the morning run. In the Shinnecock hills, Constant hit a turn too fast. It was a left turn and he went off the road. Fortunately at that spot there happened to be a rail fence with one of the rails out, and man and machine shot through the opening into the field unhurt. Constant did not cure his speed fever in the least, for he made the 31 miles to Patchogue in 63 minutes and McKenzie was right behind.

At another point Constant and Steiner, on an Excelsior twin, were feeling each other out when a big black snake decided to cross the road. Although his snakeship made good time, Constant ran over his head and Steiner cut him in half, which was a sort of double killing. Davis, on a Marvel, also had a little adventure. His front wheel picked up a hen which got in the road and it soon was converted into mincemeat. There was a great flurry of feathers while the process was going on.

Frank Seery, who used to ride a motorcycle but now drives a car, went out to see what it would do against his friends' machines. All he ever saw of his friends was their dust and their backs. Unlucky Albert Kreuder ran into a bicyclist and later had to tell a judge how it happened. The judge aparently was not satisfied that Kreuder was not to blame, for Kreuder contributed to the judicial strongbox.

Riders reported that there was lots of glass and nails in the roads. This accounts for the large amount of tire trouble, Thorpe, Harley-Davidson, having nine punctures, and Siemsen, Merkel, seven. Near Patchogue, J. J. Rogers, R-S, went off the road and smashed a wheel. He retired right then.

Not a few rear wheels on the big machines failed to stand up under the severe pounding and almost collapsed. They had to be tightened up often. Shortly after 5 p. m. Constant and Buckingham appeared at the Circle. They had about 6 inches of dust on their persons, and every time they moved or spoke it dropped off in layers. They were immediately surrounded by the usual crowd of curious ones who wanted to know where the race was and who won.

AGAIN TO THE SPEED WORK

Constant covered the 210 miles in 7 hours actual riding time, an average of 30

miles an hour. Buckingham and McKenzie averaged about 29 miles. At short intervals others began to come in. Several of the riders went either to their homes or to dealer's stores and cleaned up, then returning to check in. At 6 o'clock, the checking time, there were about half of the riders waiting to check in, and a big crowd was watching them. At 6:30 p. m. all who were in were lined up for their picture.

Three of the most interesting contestants in the run were Miss Blanche Roscoe, 5 Indian, who finished on time, and M. P. Sullivan and George P. Jenkins, with fore and side cars, respectively. Sullivan and Mrs. Sullivan rode in a 6 horsepower Thor with Indian tri-car attachment, and finished on time. Jenkins's machine, an M-M twin, carried three passengers, the third being a pet dog. His dogship suffered very much from the dust, and as his master neglected to provide him with goggles he was nearly blind at the finish. Sullivan solved the cooling problem with a blower fan driven from the engine. The device attracted considerable attention.

There were ten makes entered. In the contest for the club trophy, a bronze trophy for the club having the largest number of members entering, 13 clubs participated. The Motorcycle Touring Club of New York, a corporation, led with 12 members, and probably will be awarded the trophy when it is proved that all of its members who entered are bona fide members. The club contest was close, the Concourse and Touring Club, affiliated, tying with 11 members. Summary:

Medal winners in the New York Motorcycle Club's tenth annual run to Southampton, L. I., and return, Sunday, May 7, 1911, 210 miles: Stanley B. Thorpe, 4 Harley-Davidson; Charles Busch, 4 Excelsior; Archibald Smith, 5 Indian; J. C. Foley, 4 Indian; M. P. Sullivan, 6 Thor; R. S. Morton, 4 R-S; H. W. G. Cox, 6 Excelsior; Oscar L. Brandt, 5 Indian; E. McClintock, 4 R-S; J. W. Brewer, 4 R-S; Frank Hart, 6 R-S; D. W. Marvin, 7 Indian; R. Steiner, 6 Excelsior; E. Phelps, 6 Excelsior; J. A. Hiller, 4 Excelsior; E. L. Swain, 4 R-S; Henry Yost, Jr., 4 Thor; R. E. Stuebinger, 5 Indian; W. A. McClelland, 7 Indian; Miss Blanche Roscoe, 5 Indian; E. A. Hansen, 5 Indian; Thomas Rice, 5 Indian; John Siemsen, 6 Merkel; F. J. Dreier, Jr., 5 Indian; A. McIntyre, 6 Merkel; S. Levin, 5 Indian; Arthur Leslie, 4 Yale; Harvey Snyder, 4 Excelsior; John Steele, 5 Indian; David Molin, 4 N. S. U.; Fred Voelker, 6 N. S. U.; Joseph Buckingham, 4 Harley-Davidson; W. M. Annis, 7 Indian; C. E. Fracer, 5 Indian; I. W. Barnard, 4 Indian; S. G. Rich, 4 M-M; C. S. Hersh, 5 Indian; Nicholas Enello, 4 M-M; L. A. Strasburger, 7 Indian; O. W. Weinig, 7 Merkel; H. Nichols, 4 Yale; H. Trauppner, 4 Yale; R. Walker, 4 Yale; B. J. Huerlander, Jr., 4 Yale; G. A. Ashley, 6 Merkel; H. E. Hill, 6 R-S; John B. Hawkins, 7 Indian; G. A Smith, 6 Merkel; F. L. Vanderpool, 7 Indian; W. M. McKenzie, 7 Indian; C. J. Davies, 5 Marvel; George Zechiel, 5 Indian; E. B. Herrschaft, 5 Marvel; John A. Gaucher, 7 Merkel; J. U. Constant, 5 Indian; A. J. Rochow, 7 Indian; W. Kaufman, 5 Indian; Robert Black, 4 Merkel; Henry J. Wehman, 5 Marvel; George P. Jenkins, 7 M-M; A. P. Lane, 4 M-M; J. J. Cox, 6 Excelsior; J. V. Horton, 6 R-S; H. N. Davis, 4 Excelsior; John Vanden Houten, 4 Marvel.

Those who did not finish, and the reasons for their failure, follow: J. J. Rogers, 4 R-S, engine trouble; James Edwards, 4 R-S, late at finish through staying with another rider in trouble, and did not check in owing to misunderstanding of time limit; M. E. Toepel, 5 Indian, countershaft trouble; William Wood, 4 N. S. U., broken exhaust valve rocker; Oscar Hollister, 7 Indian, tire trouble; C. R. Burbank, 7 M-M, broken inlet valve; W. I. Templeton, 5 Indian, tire trouble; E. Rosein, 6 Thor, quit to keep previous engagement; no trouble.

Standing of the clubs in the competition for the bronze shield for the club having most bona fide entries:

Invincibles Lower the Age Limit.

Two important amendments to the constitution were made by the Invincible Motorcycle Club, of Brooklyn, N. Y., at its regular meeting Tuesday night, 9th inst. The minimum age limit for members was reduced from 21 to 18 years by unanimous vote, it being the sentiment of those present that the former limit would shut out several desirable motorcyclists who have not yet reached their majority. A membership committee also was created to investigate and act upon all applications for membership, this action also being unanimous. Secretary Constant reported the receipt of the club's affiliation papers from Secretary Gibson, of the F. A. M. The certificate is number 114. President Warlick reported that the matter of incorporation was in progress and that the papers would be ready soon. For the competition committee Captain Rochow outlined the route for the club's 150 mile spring run on Long Island on Sunday, 21st inst., and entry blanks were ordered printed. Among the communications was one from Chairman Thornley, of the F. A. M. competition committee, that the spring run requires a sanction. The club did not take the same view of the matter, but decided to be on the safe side and pay a sanction under protest and to bring the matter before the national meeting at Buffalo for final decision. Following adjournment the members repaired to the bowling alleys, where teams were formed and two close and exciting games were rolled.

Gay Ribbons Help the Detroiters.

Every man making a club run gets a ribbon with distance marked and the name of the destination of the run, in the club runs that the Detroit Motorcycle Club, of Detroit, Mich., holds every two weeks. A different colored ribbon is used for each trip, and at the end of the season each club member who has made all the trips receives a gold medal. This is but one of the many schemes the club is putting into effect for maintaining interest and attracting new members, and the successful results are apparent, one bit of evidence being the taking in of 22 members on Friday night, 5th inst. The club's run on Sunday, 14th inst., is to Toledo, O., to visit the Toledo Motorcycle Club. The Detroit Motorcycle Club was formed in 1908, and is now one of the veteran clubs of the country. Its affiliation is No. 12 with the Federation of American Motorcyclists. The officers are: A. F. Gregor, president; William Fields, vice-president; Charles Drude, secretary; J. B. Gault, treasurer; Joseph Fry, road captain; Allen Carter, sergeant; William Wandersee and Al Devault, directors.

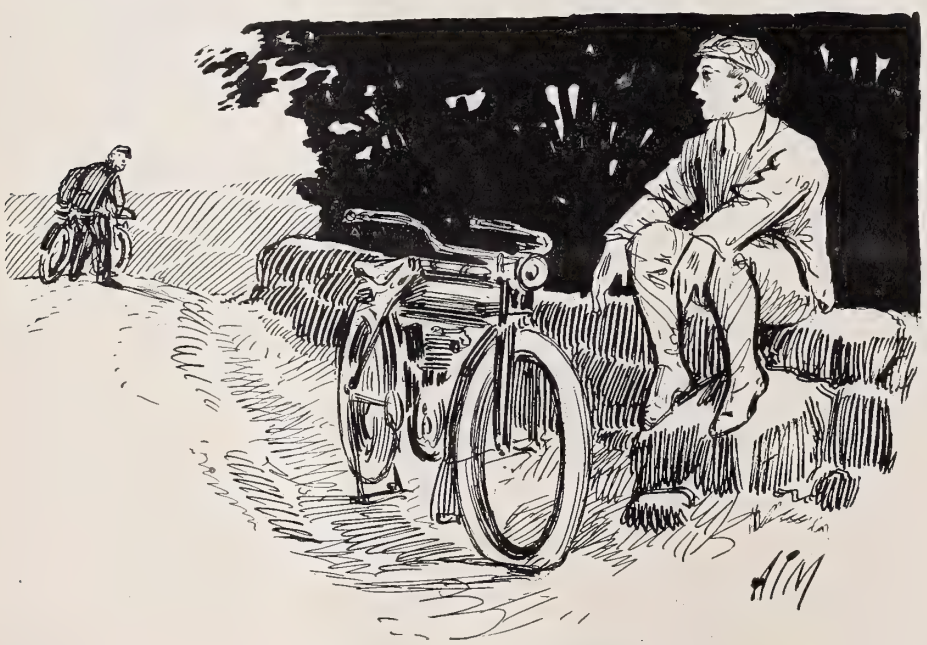
Newark 24 Hour Contest Plans.

Four classes are provided for in the New Jersey Motorcycle Club of Newark's 24-hour endurance run to Atlantic City and return on May 29-30. There will be competitive divisions for private owners, trade riders and manufacturers' teams, and an invitation class for ladies. The prizes consist of a silver cup for the most consistent performance by an individual rider, a club trophy to the team entered by a manufacturer making the best score, gold medals for all perfect individual scores, silver medals for riders scoring 980 points or over and bronze medals for riders making between 950 and 980 points. The contest will start from the club rooms, 18 New street, at 7 p. m. on May 29, the first check being at Lakewood. Between midnight and dawn the riders will be "eating up" the stretch to Atlantic City, the turning point and a checking station, of course. Here the route will turn north and lead to Camden, another checking station, and thence on to Mendham. After checking at Mendham, the riders will start on the last leg for home. The contest has been sanctioned by the F. A. M. and entry blanks are out. May 20 is the last call for entries. This run will be the largest and most important road event in the East on Memorial Day.

LOTS OF FUN ON WESTING'S RUN

Indianapolis Indian Riders on a Joyful Outing to Spring Lake Park—A Mean "Let-Go."

By actual count there were 75 Indian motorcycles lined up at 9 o'clock Sunday morning, 6th inst., in Indianapolis, Ind., for the annual G. H. Westing run, which this year proved to be the most successful that the Indianapolis agent for the Indian has ever given. Five of the machines carried two passengers, so that there were 80 riders on the trip. It had been planned to make the destination Martinsville, Ind., about 30 miles out, as the preceding annual runs had all been to that place, but the objective point was changed to Spring Lake Park, 16 miles east on the national road, where there is a big sign that reads, "Shay's Famous Chicken Dinners." There was no regret at the change, as the Shay dinners were found to be the "real thing." The spread was far better even than the usual good old fashioned meals, as everything from fried chicken to hot biscuits was placed at the disposal of the visitors—who really disposed of it all, too. Westing's guests never before enjoyed so good a dinner on the annual run, and it was mainly on account of the excellence of the dinner served that Spring Lake had been selected.



It took the riders only 30 minutes to make the 16 miles, as the roads were in good condition and better weather could not have been asked for. The riders kicked up quite a bit of dust going out, and a number of "come-on-let's-go" races were held. No one had to make a stop going out, except one rider who took a spill, but he was up and away in no time.

At Spring Lake Park after dinner—and it was a good while after, too, for the dinner laid out most of them for a time—two ball games were held. One was between the "In Leaders" and the "Dust Eaters," and this game ended in a dispute over the score, which was something like 58 to 58 in favor of the other team. The other game was between the "Singles" and the "Doubles," and was a hard fought contest. The "Singles," with Goodman in the box, won 4 to 3. King pitched a nice game for the losers, but was not supported well. After the ball games a number of other feats were pulled off, among which was a tug-of-war between the "Magnetos" and the "Carbureters." Westing was the judge of the contest, which ended in favor of the "Magnetos," at the expense of a good jolt when the "Carbureters" let loose of the rope on purpose while the "Magnetos" were pulling with all their strength.

Pictures Follow Providence Herring.

Following close on the tail of its "herring run," the Providence (R. I.) Motorcycle Club will have its annual "picture run" on Sunday, 14th. Roger Williams Park will be the setting place for the panorama, as in former years, and a record turnout is expected.

THE FUSSY THING!

(An Actual Road Incident)

"Want any help?"
"Yes."
"What's the trouble?"
"Puncture."
"Why don't you get busy and fix it?"
"Don't want to soil my hands—spent 50 cents on them yesterday having them manicured."

MAY TACKLE THE HOOSIER HILLS

Strenuous Reliability Trip in Prospect for Indiana Club—Stiff Route is Picked Out.

Silver cups worth $75 or more and remaining in the possession of the Indiana Motorcycle Club by reason of the racing being called off on the second day of the national F. A. M. meet in Indianapolis, Ind., in 1909, are to be among the prizes to be awarded in the big reliability run that the club is shortly to give. Erwin G. Baker, of the club, has been traveling around the state of Indiana during the past week and has picked out a route for the run that is described as a "peach," inasmuch as it includes a variety of going, not forgetting a set of the few young mountains of which the Hoosier State can boast.

The route is from Indianapolis to Martinsville, Gasport, Spencer, Bloomington, Nashville (Brown county, where the grades are), Columbus, Edinburg, Franklin, Greenwood and back to Indianapolis. The distance as measured by Baker is 165½ miles. The suggested dates for the run are Sunday, May 21, or Sunday, June 4. The route is a strenuous one, and he says that if any man finishes with a perfect score he will deserve a diamond medal or a handsome trophy.

An entrance fee of three dollars will be charged all riders not members of the club and the Federation of American Motorcyclists. The entry fee will make them members of both, and will give them the right to contest for the reliability prizes. If a rider be a member of the club and not of the F. A. M., he will be charged two dollars, which will include his fee for becoming an F. A. M. member, and if he be an F. A. M. member and not a member of the club, he will be charged two dollars and will be initiated into the club. Riders who belong to both the club and the F. A. M. will be charged only a dollar.

One F. A. M. Lamp Prize Awarded.

One of Chairman Estabrook's "Old Sol" lamp and generator outfits which he is offering to the first 12 clubs that affiliate with the F. A. M. and bring in 15 or more members per club, was claimed this week by the Cedar Rapids (Ia.) Motorcycle Club which affiliated with 17 men. It is the first club to draw a lamp prize. Two other clubs also have affiliated, but they came in before the prize offer was made. The new members of the constantly growing F. A. M. club family are the San Antonio (Tex.) Motorcycle Club, and the Ideal Motorcycle Club, of Rockford, Ill. The Texans mustered in 26 men, and the Illinoisans arrived 20 strong. A total of 123 clubs now are affiliated and new ones are being added weekly.

MILWAUKEEANS IN A HILL CLIMB

Sporleder Fastest in the Free-for-All—Schneider is Spilled—Honors Well Divided.

Gravity received a hard experience at the Milwaukee (Wis.) Motorcycle Club's annual hill climb on Becker's hill, near Menomonee Falls, Sunday, 7th inst. In the free-for-all class Ralph Sporleder, on a "seven" Indian, made the best time of the day, 9⅕ seconds. Schneider, Merkel, and Cyrus Wade, Indian, tied for second place with 9⅗ seconds. On his second trial Schneider took a nasty spill and cut his knee badly as well as wrecking his machine. He went down on a turn.

No contestant had a monopoly of victory, a different rider being returned the winner in each event. Wade, on an Indian, was the fastest in the trade rider class for 50 cubic inch machines, conquering the hill in 10⅗ seconds. Edward Becker, Harley-Davidson, contributed his mite toward keeping Milwaukee famous by finishing second, and Albert Trupke, Indian, was third in this class.

In the private owners class, 3.50 machines and under, Schoene, Rohn and Scammon, all Indians, were placed in that order. The winner's time was 11½ seconds. In the 30.50 class for trade riders, Oakley Fisher, Indian, pounded out a victory, but was unable to do better than tie the time of the private owner winner. Milwaukee product scored again in this class, when Rudy Toombs on a Waverly took second, and Edward Becker, Harley-Davidson, registered the third best time. This event was closely contested also, Fisher beating Toombs by a tenth of a second. Over 40 riders competed in the various classes, and a large crowd saw some good sport. Summary:

Trade riders, 30½ cubic inches class—Won by Oakley Fisher, Indian; second, Rudy Thoombs, Waverly; third, Edward Becker, Harley-Davidson. Time, 0:11½.

Private owners, 30½ cubic inches class—Won by Schoene, Indian; second, Rohn, Indian; third, Scammon, Indian. Time, 0:11½.

Trade riders, 50 cubic inches class—Won by Cyrus Wade, Indian; second, Edward Becker, Harley-Davidson; third, Albert Trupke, Indian. Time, 0:10⅗.

Free-for-all—Won by Ralph Sporleder, Indian; second, tie between Schneider, Merkel, and Wade, Indian. Time, 0:09⅕.

Lantern Parade in Indianapolis.

All that uproar and din of excitement to be heard over Indianapolis way on Monday night, 15th inst., is caused by the great lantern parade of the Indiana Motorcycle Club through the city's down-town streets. Large posters announcing the event have been placed in the most conspicuous places in Indianapolis, and if the expected 500 riders with decorated machines are all in line, the Indianapolitans will be having a rare sight. Two prizes are awarded by the club; one for the neatest machine and the other for the most handsomely and originally decorated machine. After the parade a reception and smoker takes place at the club house, 444 W. Vermont street. Harry Graff, president of the club, has been working to get a permit from the police, throwing the city wide open to the motorcyclists for the night, and that there will be no ban on open mufflers and the riders may make all the noise they want to.

Concourse Savin Rock Run Program.

Entry blanks are out for the fourth annual spring run of the Concourse Motorcycle Club of New York City to Savin Rock, Conn., June 4. Savin Rock, which is 75 miles from New York on the Boston Post road, and five miles from New Haven, is the leading summer resort on the Connecticut coast, and is famous for its shore dinners. It is a favorite rendezvous for Sunday runs of motorcyclists in Connecticut and Massachusetts, being reached by excellent roads from all points. The schedule calls for 18 miles an hour, and the run will start from Jerome avenue and 165th street at 7 a. m., making the riders due at Savin Rock shortly after 11 a. m. The entry fee is $2 and includes a shore dinner for all who arrive at the resort within the time limit. There will be a secret control en route at which penalties will be inflicted for variation from the schedule, and will decide prize winners. Invitations will be sent to several motorcycle clubs in Massachusetts and Connecticut to hold runs to the resort on June 4 and co-operate with the New Yorkers in making the largest turnout of motorcyclists in New England this year.

Louisville Club Gets Shomo's Ideas.

An interesting address on the subject of motorcycle clubs, their management and the conduct of successful clubs, was the feature of the regular monthly meeting of the Louisville Motorcycle Club, of Louisville, Ky., on the 1st inst., held at the store of L. W. Thompson, 609 South Fourth street. The address was made by F. D. Shomo, of the Hendee Mfg. Co.'s forces, who happened to be in the city at the time. After his talk he expressed his pleasure at meeting the members of the club, and indicated his hope of seeing most of them at the national convention of the Federation of American Motorcyclists in Buffalo next July.

Constant Discovers a Knock.

John U. Constant, winner of the Long Island Motor Parkway road race last month, reports a "bad knock in the bearings" of the gold watch that he received as first prize.

MAKE AN EVENT FOR BELT DRIVE

Springfield Promoters Change a Decoration Day Number—Purses Attract Professional Riders.

At the request of several riders of belt drive machines, some of whom have entered in the inter-city team race, and did not care to attend if they were limited to competing in one event, the Springfield (Mass.) Motorcycle Club has made a revision in the program for its big meet at the Stadium on Decoration Day, and has substituted a belt drive handicap for private owners in place of trade rider handicap. The fact that a great many trade riders will be prevented from coming to Springfield on Memorial Day by reason of rival meets throughout the country also influenced the change.

With the exception that the distance has been cut from 25 miles to 15 and that private owners with belt drive machines only are eligible, the event is unchanged. The 61 cubic inch limit applies and the prizes are a $25 silver trophy to the winner, $15 stop watch for second, and a $5 silver cup for third. The remainder of the original program stands.

As was anticipated, the fat cash prizes offered in the professional events are bringing many inquiries and entries from the pro's, and these classes give every promise of drawing classy fields. If the coming meet is successful, and there is every indication that it will be, the club will run a big double header meet on Labor Day and the Saturday preceding, with the intervening Sunday allowed for rest. Reserved seats for the Memorial Day meet are selling in Springfield like the proverbial hot cakes, and the meet is being so well advertised locally that it will be surprising if the standing room only sign is not out when the first race is called.

German Prince Orders Motorcycle.

Royal motorcycle patronage has again been bestowed on the N. S. U. Motor Co. in Germany, as the company this week received another order from the German Imperial family. Prince Friederich Sigismund, of Prussia, telegraphed for the immediate delivery of a 3½ horsepower N. S. U. motorcycle, fully equipped. This is the third N. S. U. to be used by the younger Imperial generation.

Meriden Riders Called Together.

A. D. Elster, a dealer of Meriden, Conn., has issued a call to riders of that city to get together at his store and talk over the proposition of organizing a motorcycle club. Meriden has a good number of riders, and from the numerous assurances of support which he has received, Elster expects to launch a live club soon.

THORNLEY SLAPS SAVANNAHANS

Their Disregard of F. A. M. Brings Ostracism—Club Scouts Exploring 1,000 Mile Endurance Route.

Scouting out a route for an endurance contest of about 1,000 miles, which may be held some time after the Fourth of July, several members of the Savannah Motorcycle Club, of Savannah, Ga., left Savannah on Sunday, 7th inst., for a trip to Augusta and return, a distance of 275 miles. It was the idea of the scouts to find out how the machines stand such a trip, and if they get through without too much difficulty, they will make a petition at the next meeting of the club, asking that the club give a run that would last a week, and that would have a total mileage of about 1,000 miles. The run would be from Savannah to Augusta, from Augusta to Macon, and from Macon to Atlanta, and the return would include the same cities. If the project goes through, it will be the longest endurance run that has ever taken place in the South.

Already several dealers along the route of the proposed run have indicated their willingness to help by donations of prizes and in other ways, and it is known that the dealers in Savannah and Augusta have pledged an aggregate of $300. The projectors believe that as much as $1,000 in prizes and awards could be obtained.

If the plan is accepted by the club, the run could not be held until some time in midsummer, after the Fourth of July races. A meeting of the club will be held next week, at which time it will come to some decision concerning the run. The Fourth of July race program will be laid out first, after which the endurance run matter will be taken up. The annual meeting of the club falls in June, but the officials are trying to have the meeting brought forward to next Tuesday night. It will be at that meeting that the length of the races will be decided, and the officials for the ensuing year selected.

Because of the apparent contempt that they heretofore have shown for the F. A. M., particularly in competitive events, and because they have conducted and participated in unsanctioned meets, the motorcyclists of Savannah, Ga., in general have been put under the ban by Chairman Thornley, of the F. A. M. competition committee, in an official manifesto. In granting a sanction to the Atlanta Motorcycle Club for a race meet on the 20th inst., the chairman serves notice on all clubs and promoters that the Savannahans are ineligble to compete. His statement is as follows:

"Sanction has been granted to the Atlanta Motorcycle Club for races to be run on May 20. I would like to call the attention of the trade, and the motorcycle fraternity generally, to the fact that Savannah, Ga., has been conspicuous in its disregard of the efforts of the F. A. M. to improve the condition of riders generally, and of the racing game. They have repeatedly run off meets in Savannah without the sign of a sanction, and very few riders in Savannah have thought enough of the F. A. M. to become members. Therefore, should any rider from Savannah attempt to compete at Atlanta he should be refused permission to ride, as he has automatically disqualified himself. Moreover, should any rider succeed in spite of this fact in entering a race and winning it, a protest against the delivery of his prize will be upheld from this office. This holds good, not only of members of the F. A. M. who have automatically disqualified themselves by riding at unsanctioned meets, but it also holds good of anyone whether a member or not, who has so competed."

Exclusively Indian Club for New York.

Exclusiveness, in a certain sense, will be the keystone of the Indian Motorcycle Club of New York, which now is in an embryo state, and will be born next week. At a meeting held at the uptown store of F. A. Baker & Co., 2142 Broadway, last week, at which 25 motorcyclists were present, a temporary organization was formed with B. F. Edgar, president, and H. F. Bidwell, secretary and treasurer. A committee was appointed to draft a constitution and by-laws, and these will be submitted at the next meeting. Twenty-five motorcyclists already have agreed to join, and the membership limit will be placed at 30 for the present. Important requisites for membership are that a motorcyclist ride an Indian motorcycle and that he belong to no other motorcycle club. These conditions are imposed with the idea of forming a club in which factionalism and cliques will be absent, and it is the opinion of the founders of the new club that their aims best can be realized by having the members all ride the same make of machine so that they will have a common cause for pride, and give their entire allegiance to one club. Permanent officers will be elected at the next meeting, and the club will affiliate with the F. A. M. when it is running smoothly.

Kentuckians Taste Spring Joy.

Fair weather and fine roads gave members of the Louisville Motorcycle Club, of Louisville, Ky., their first real 1911 taste of motorcycling joy, on Sunday, 7th inst., in a run to Scottsburg, Ind., and return, a total distance of 80 miles. All the way the roads were excellent, except for "hog backs," which were very numerous. A good dinner awaited the travelers at Scottsburg. Not a mishap marred the trip, and the pleasures of the day were such as to make the riders declare the run the most enjoyable that has been given this year.

PROVIDENCE TOUR DATE CHANGED

Niagara Falls Trip to Coincide with F. A. M. Buffalo Dates—All Riders are Invited to Join.

Following the definite announcement of the dates for the 1911 F. A. M. meet at Buffalo, N. Y., July 10 to 15, inclusive, the Providence (R. I.) Motorcycle Club has decided to hold its first annual tour to Niagara Falls and return at the same time, making three big tours that will start from different sections of the country and converge in the Bison City during F. A. M. week. Without a doubt this year's meet will witness the largest gathering of motorcyclists that ever has assembled in this country.

Originally the Rhode Islanders planned to hold their tour as a separate affair around the first of August, but in order to give the tourists a chance to participate in the entertainments to be held in conjunction with the national meet they revised their plans. The tour will start from Providence on Sunday, July 9, and will proceed by easy stages to Buffalo, being due there on Wednesday, 13th, about the same time as the big national tours which will start simultaneously from New York and Chicago the first part of the week.

On Thursday, 13th, the Providence tourists will move on to Niagara Falls, turning point of the tour. The falls are but a short ride from Buffalo, and the day will be spent there, and on the following day the tourists will return to Buffalo to attend the business meeting of the F. A. M. Over 100 Providence motorcyclists and a considerable number from other places have signified their intention of going on the tour and are now arranging their vacations for that time.

All motorcyclists, regardless of their club or F. A. M. affiliations, are invited to participate in the tour. B. A. Swenson, the Providence dealer, who in conjunction with Vice-President Wilber, of the Eastern district, prepared plans last fall for the tour, will act as toastmaster and has charge of the arrangements. He will supply any desired information in respect to inquiries addressed to him at 298 Blackstone street, Providence, R. I.

Fast R-S Monster for Louisville.

Real "eat-'em-up" speed work is to be seen around Louisville, Ky., before long, as R. L. Davis, the R-S agent, has received a big 7 horsepower R-S racing machine with ported cylinders, drop bars, racing control and all that sort of thing. Davis says he intends to enter it not only in the race meets around Louisville, but in important races in other parts of the country as well, and intimates very strongly that he'll "make 'em sit up and take notice."

NEWARK'S RACING DRAWS 12,000

Clarke Easily Bests Lawson in Their Match—Kramer Outwits Macfarland—Wiley Defeats Duer.

Those who believe that bicycle racing is very close to the jumping off place would have had a great awakening had they been at the Newark (N. J.) Velodrome Sunday, 7th inst., and seen the crowd of over 12,000—this is not a misprint—people who jammed the stands and overflowed in the infield so thickly that they formed a deep fringe around the inside edge of the track. That bicycle racing has its devotees among all classes and all ages was shown by the character of the crowd, which included babes in arms and patriarchal gray beards, as well as all the intermediate stages of man and womankind. It was undoubtedly the largest crowd that ever attended a Newark bicycle meet, and Newark is noted for big crowds.

HOW CYCLE RACING DRAWS THE FANS TO THE NEWARK VELODROME—LAST SUNDAY'S CROWD

Jack Clarke and Iver Lawson were the opponents in a match race that was the feature of the card. Clarke won, and won so easily that it seemed like a runaway for him, but his victory was due as much to good headwork as it was to fast riding. Two heats, each at half a mile, were run, and Clarke took both of them. He unwound so fast at the very start of the first heat that he caught Lawson napping and the latter had to do some tall hustling to close up. The real fight commenced on the last turn, but Clarke drew away in the stretch with apparent ease and led Lawson by half a length to the tape.

In the second heat Lawson got away first and Clarke speeded up again and took the lead before the first lap was finished. Lawson then forced the fighting earlier than usual, but Clarke responded in kind, and, ducking his head, which is an ominous sign, he shot away from Lawson and led at the tape by three-quarters of a length.

Frank Kramer's track generalship was well shown by the way in which he outwitted the crafty Macfarland and beat him at his own game in the three mile professional. Although a ukase has been issued against teaming, Macfarland had a sort of secondary "big train" composed of Hehir and Clarke to help him. Fogler also was doing some scheming on his own account, and Kramer had to plan to outwit all of these past masters at track politics. He did it in a great fashion, too. Macfarland took the lead at the gun, something unusual for him. He stayed near the front with Hehir and Clarke hooked on in that order. Kramer was further back and Fogler was on his wheel.

Finishing the bell lap Kramer decided it was time to break away, and he did. The move was so sudden that it caught Clarke napping, and Macfarland, as well. Fogler, however, was awake and hung on when Kramer shot to the front. When Macfarland sensed the situation he accelerated quickly, but Kramer gained steadily and caught him on the last turn. Clarke was confused by Kramer's sudden break and lost himself. Having disposed of all but Fogler, Kramer, profiting by bitter experience, saved some steam for the wind-up. Hehir also came up strong from the rear and closed in on Kramer and Fogler in the stretch. Here Fogler played his hand and shot out, but Kramer also had some speed left and beat the Brooklynite by half a length. Hehir was third and Fred Hill fourth.

Big handicaps shut out the scratch men in the trials of the one-third mile professional, but they fought all the way and made the trials more exciting than the final. The latter consisted of limit men and was won by Lloyd Thomas. Jumbo Wells accounted for the two mile invitation after a long sprint. George Wiley had an easy victory over Ray Duer in their motorpaced match, Duer losing his pace often.

Frank Blatz, the amateur champion, did not make his usual win among the simon pures, in the five mile event, being brought down by another rider, who fell in front of him. Blatz remounted and rode hard but could not catch up. Jerome Steinert tunneled out a victory by clever headwork on the pole in the last lap. Herman Kjeldsen was second. Summary:

Half mile handicap, amateur—Won by Chester Smith (30); second, Jerome Steinert (20); third, George Pauli (35). Time, 0:57⅕.

One-third mile handicap, professional—Won by Lloyd Thomas (70); second, Albert Crebs (45); third, Werner Beck (75); fourth, H. E. Bleecker (75); fifth, Floyd Krebs (40). Time, 0:33⅖.

Half-mile match, professional, A. J. Clarke vs. Iver Lawson; best two out of three heats—First heat won by Clarke; time, 1:22. Second heat and match won by Clarke; time, 1:18.

Five mile open, amateur—Won by Jerome Steinert; second, Herman Kjeldsen; third, George Pauli. Time, 11:36⅕. Winner most laps, Paul Heidrick, 13 laps.

Two mile invitation, professional—Won by Jumbo Wells; second, Menus Bedell; third, W. L. Mitten; fourth, Charles Stein. Time, 4:23⅘.

Five mile motor paced match, George Wiley vs. Ray Duer—Won by Wiley. Time, 7:14.

Three mile open, professional—Won by

F. L. Kramer; second, Joseph Fogler; third, Patrick Hehir; fourth, John Bedell. Time, 5:53.

Canadian Cycle Racing Starting.

Bicycle racing will soon be in full swing in Canada. The Press Club, of Toronto, has secured a sanction from the Canadian Wheelmen's Association for the first bicycle race meet of the Canadian season at Toronto, on the night of May 24, which is a holiday in the country to the north, where they celebrate "the Queen's birthday." Dan McGillicuddy, of the Central Y. M. C. A., Toronto, gave the road racing a start on the last day of April, when he rode from Ottawa to Napanee, a distance of 143 miles, in nine hours, which is a record for this course. Figuring it out, McGillicuddy traveled at the rate of 16 miles an hour. This feat was accomplished with practically no training. The rider hopes to surpass this performance before the season is out. Meanwhile an army of riders are getting out on the roads for warm weather training with a view to getting in condition for racing.

Choice Plums for Plainfield's Race.

Arrow, Barnes and Columbia racing bicycles, respectively, head the prize list for the Plainfield (N. J.) Cycling Club's third annual 25 mile handicap road race, on Memorial Day. The bicycles were contributed by F. A. Baker & Co., by the club and by the Pope Mfg. Co. There are 30 other prizes, consisting of sundries and merchandise. The race will start at 10 a. m., and the course will be straightaway on Mountain avenue to Mountainside, a 12½ mile leg, which will be covered twice. A sanction has been granted by the N. C. A., and all amateurs registered with that body for 1911 are eligible to compete. Entry blanks are out and entries close on the 26th inst., with Jack Horner, 33 Somerset street, Plainfield, N. J.

Redman to Manage Wandamere Track.

Ivor Redman has been appointed manager of the Wandamere motordrome in Salt Lake City, Utah, the track where the Salt Lake fans get their motorcycle racing thrills. He is a former bicycle rider. The racing season at Wandamere opens on the evening of May 26, with an amateur Marathon card, the first of its kind ever put on in Utah. Only local amateur talent on strictly stock machines will be permitted to compete.

Schieder and Golden at Newark.

Two visiting amateurs who enjoy considerable speed reputation in their own bailiwicks, arrived at Newark, N. J., this week, with a possible view to taking a try at the amateur cycle racing at the Velodrome. They are Joseph Schieder, of Buffalo, N. Y., who is the king pin of Buffalo's flat floor riders, and Joseph Golden, of Toronto, Ont.

LINDERMAN LEADS THEM ALL HOME

Baltimore Cyclists Battle in Lafayette Club's Big Road Handicap—Shaw the Speediest.

Five hundred persons, on Sunday, 7th inst., gathered at Raimia's, on the famous Shell Road, near Baltimore, Md. and fully 500 more were scattered along the triangular six mile course of the road. Fifty bicycle riders, some of whom were scratch, were on their mark, and at 2:45 o'clock a man armed with a .32 caliber revolver pointed the muzzle heavenward and called out—"Are your ready? Go!"

"Bang!" spoke out the revolver and a bunch of long markers of the eight minute division, which was the limit handicap mark, were set in motion. The annual spring 12 mile handicap road race of the Lafayette Wheelmen, the first bicycle event of the season in Baltimore, was on. The crowd gathered at the starting point burst into a cheer, which was taken up all along the line. Eight minutes later the scratch men were off.

Spectators armed with glasses watched the cyclists speed down the road in a cloud of dust. Soon the cloud was the only object to tell the hundreds at the starting place that the men were speeding for the home stretch, and a moment later even the dust cloud was invisible, for the riders had turned the first bend. It was not long, however, before someone shouted, "Here they come!" and, sure enough, the riders were speeding toward the first half of the course. They again disappeared, and, when they hove in sight on the last stretch, R. Linderman, of the Baltimore Bicycle Club, a newly formed organization hardly a month old, was leading. He rode from the six minute mark and was the first man to cross the tape.

Close upon him was Jacob Davis, of the Lafayette Wheelmen, who rode from the seven minute mark, and was the second to put the front wheel of his bicycle over the line.

Joseph Schieder, of Buffalo, N. Y., after a string of amateur cycle race victories at home, will race at Newark.

The first time prize, which was awarded to the rider making the fastest actual time, was captured by W. W. Shaw, of the Carroll Cyclers, who covered the course in the fast time of 33 minutes 40 seconds. Second time prize was pulled down by John Ruhl, of the Carroll Cyclers, his time being 33:43. Third time prize went to E. Sampson, of the Racycle Bicycle Club; time, 34:05.

Thirty prizes in all were awarded. The prize winners follow, numbers in parentheses indicating handicap allowance in minutes:

		Actual Time.
1.	R. Linderman, B. B. C. (6)	36:00
2.	J. Davis, L. W. (7)	37:05
3.	W. Leimbach, C. B. C. (6)	36:30

Kramer-Clarke-Fogler Team Match.

As the star attraction on the cycle race program at the Newark (N. J.) Velodrome on Sunday, 14th inst., a three cornered team match is scheduled. The teams will be Macfarland and Clarke, Kramer and Fenn, and Fogler and Root. In addition to the Sunday racing, the Velodrome will commence its program on Wednesday night, racing either on next Wednesday or on the Wednesday after. Manager Chapman is completing all arrangements for the racing at New Haven, Providence and Boston, which with Newark will constitute his racing circuit after Decoration Day. The track at Providence has been put in good condition again, and the necessary repairs are being made at New Haven and at the Hub.

Harley-Davidson Again Triumphant!

2 HARLEY-DAVIDSONS STARTED
2 HARLEY-DAVIDSONS FINISHED

(Of course!)

in the New York Motorcycle Club's Tenth Annual Spring Run, May 7th, to Southampton, Long Island—New York's Biggest Motorcycle Run.

Distance, 210 Miles
Actual Riding Time, 10 Hours
Entries, 73—65 Finished

PLENTY DOING IN GRAND RAPIDS

Western Michigan Cycle Club Promoting Bicycle and Motorcycle Races—Championship Results.

Club championship races, Sunday road runs, a 200 mile endurance run, and a big Decoration Day field day are some of the items on the sporting calendar of the active Western Michigan Cycle Club of Grand Rapids. The field day is receiving special attention just at present, and all that is needed to make it a big success is good weather, according to the Michiganders. In addition to athletic events there will be two motorcycle races and four bicycle events, for both of which entry blanks are out.

WESTERN MICHIGAN CYCLISTS GATHERED FOR A ROAD RUN

In the club championships there will be two classes in order to give the young riders a chance to find themselves, and the awards will be gold, silver and bronze medals in each class. One of the most ambitious undertakings of the season will be the 200 miles endurance run to Lansing and return early in September. It will occupy two days, and all survivors will receive bronze medals. During the quiet periods when nothing big is "in the works," Sunday road runs will be held.

On Sunday, 7th inst., the first of the club championship events was held, to determine the speed championships of the club's two classes, viz., Class A and Class B. Class A is composed of the senior members of the club and Class B includes the juniors. The club championships are decided after contests, at quarter-mile, half-mile, three-quarters, one mile, two miles, five miles and ten miles, respectively. The winners are scored by points, five for first, four for second, three for third, etc. In Sunday's contests, at quarter-mile, R. Missner was first in Class A, with R. Sproat second and F. Gilmer third. Time, 43 seconds. In Class B the winner was J. Sproat, with A. Schneider second and J. Doan third. Time, 43½ seconds.

Little Albert on a Flying Trip.

Grocers' errand boys have been the central figures in many wonderful mishaps, but none perhaps was more strange than that which befell Albert Valle, of Los Angeles, Cal., last week when he collided with a motor car while riding his bicycle, and was thrown 12 feet in the air, landing on top of a cab which happened to be standing in the path of his descent. More scared than hurt, Valle climbed down off his aerial landing station and entered into negotiations with the motor car driver, who agreed to pay all damages.

Brody's Bicycle Deals Bring Penalty.

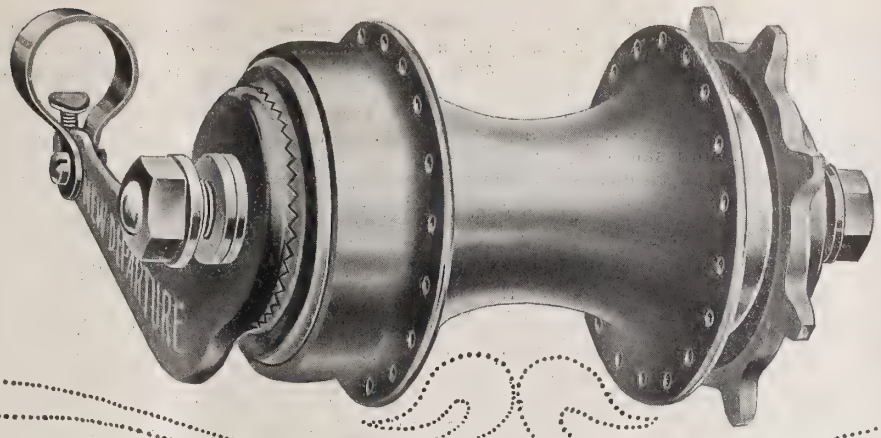
John Brody, Hartford, Conn., whom the police claim to have connected with many bicycle thefts in that city recently, was sentenced to jail for three months for embezzlement and bound over to the superior court for theft. Evidence was presented to show that he had hired a bicycle of a dealer and failed to return it, as well as having made several attempts, one of them successful to dispose of bicycles at second hand stores. The accused denied the charges.

New Cycle Track for Berlin, Ont.

A sign of the return to popularity of cycling in Canada is the building of bicycle tracks in several places in the Province of Ontario. At Berlin, Ont., new athletic grounds are being laid out, the grandstand of which is being made of concrete and steel. A third-of-a-mile bicycle track is one of the features of the park.

STYLES WINS EMPIRE HANDICAP

Fisher Takes Time Honors from Scratch—A Big Field—Malloy Injured in a Bad Tumble.



Jumping the field in the last quarter, Stanton A. Styles, a member of the New England Wheelmen and of the Century Road Club Association, riding a New England bicycle with 4:30 handicap, won the 15 mile handicap bicycle road race of the Empire City Wheelmen, of Brooklyn, N. Y., over the Floral Park, L. I., course, Sunday morning, 7th inst., crossing the finish 150 yards in the lead. A. E. Rhodes, of the Empires, and also a 4:30 marker, finished second. Gus Wohlrab, of the association, who had 1:30 handicap, finished third. His time was 41:54⅕. Franklin Fisher, of the Empires, the first scratch man to finish, captured first time prize.

Immediately after he had finished, Styles's victory was protested on the ground that he had switched other riders, but the protest was disallowed and afterward was withdrawn. There were 125 entries and 97 starters, the limit men being sent away by Starter Victor Lind at 11:15 a. m. Deep in sand and seamed with ruts, the course, which was over a 7½ mile stretch out from Floral Park and return, was very bad, and there were numerous spills. The most serious mishap befell James Malloy, a 1:30 man, who went over his bars three miles from the start. He was picked up unconscious and was taken to Nassau County hospital at Mineola suffering with a broken nose, deep cuts in his face and hands, and body bruises. His wheel was smashed.

A humorous incident of the start was the refusal of Walter Raleigh, Jack Townsend and Hugh Brown, of the Irish-American A. C., to start when they learned that they had been given 45 seconds handicap. They claimed that they always had ridden from scratch, and considered the offering of a handicap as an insult. The Acme Wheelmen won the cup offered by the promoting club to the outside club having the most members as starters in the race. Thirty-six of the starters finished. Prizes will be awarded to the winners at the quarters of the Empire City Wheelmen, 319 Atlantic avenue, Brooklyn, Monday night, 15th inst., at 8:00 o'clock.

Toronto Police Have Two Wheelers.

The police department of the city of Toronto, Ont., now has five motorcycles. The equipment last year included two Browns, but three 1911 model Triumphs hace been added this season. One machine has been in use for five years, and has covered 23,000 miles in that time. The machines are only used in the summer time.

The Improved New Departure

Every wearing part of the 1911 model New Departure coaster brake, every working member is as hard, tough and indestructible as tool steel; in fact is tool steel.

The taper on the corrugated end of the clutch sleeve has been slightly changed so that the clutching contact of the hub shell on the forward drive is positive, complete and absolutely prevents all slipping.

The improved hardening of the brake drum provides a surface that will resist the most severe braking strains and wear that occur at this point, without cutting or other injurious results. The method of manufacturing the steel brake rings has also been improved.

Dealers who have the new parts write us that the New Departure is now faultless.

The improvements have been perfected without changing the design that has been so popular for years. Not a single feature has been sacrificed that has already put the New Departure in the top notch. With New Departures on your shelves, you can give your customers

THE HANDSOMEST COASTER BRAKE
THE FINEST FINISHED COASTER BRAKE
THE BEST WEARING COASTER BRAKE
THE SIMPLEST TO REPAIR
THE SAFEST TO RIDE
THE EASIEST TO SELL
THE "FAULTLESS" NEW DEPARTURE

The 1911 catalog of improved model for bicycles, the internal expanding band coaster brake for motorcycles, the 1911 line of bells, cyclometers and sundries, will be sent you on request.

COASTER BRAKE LICENSORS

PATENTS.

975,056. Spark Plug. William H. McNutt, New York, N. Y. Filed Aug. 4, 1910. Serial No. 575,508.

1. A spark plug provided with a protruding electrode or pole piece, a foraminous metal cap inclosing said pole piece and having one orifice registering with the end thereof and forming the opposing electrode, the size of said pole piece being so proportioned to that of said orifice, that when the electrodes are operatively positioned the passage therebetween is of less than flame-passing magnitude, and all the other orifices of said foraminous cap being also of less than flame-passing magnitude.

976,322. Carbureter. Julius Wm. Walters, Glens Falls, N. Y. Filed Nov. 21, 1905. Serial No. 288,401.

1. A constant level carbureter comprising a shell or casing, a float cup arranged therein and provided with a centrally depressed cover, said float cup being spaced apart at its sides, bottom and top from said casing to form an air passage entirely around said cup, an ejector in said depression opening into said cup for the escape of hydrocarbon, an air inlet at the bottom of the casing, and means at the top of said casing for deflecting air into the said depression.

976,911. Carbureter. John N. Petersen and William F. Pettit, New Orleans, La. Filed Nov. 14, 1908. Serial No. 462,583.

1. A carbureter comprising a valve casing having a substantially straight air passage therethrough, means for supplying gasolene to said valve casing, means for supplying air thereto, a plurality of longitudinal flanges in said valve casing, means for controlling the supply of air and gasolene to said valve casing, a mixture valve mounted to slide in said valve casing and having its periphery in contact with the inner faces of said longitudinal flanges, and two valve seats to which the gasolene supply and the air supply respectively lead, the said seats being arranged to be simultaneously engaged by said mixture valve, to check the flow of air and gasolene.

977,533. Bicycle Lock. Clarence H. Myers, Denver, Col. Filed Nov. 17, 1908. Serial No. 463,104.

In a bicycle lock, the combination of a head or sleeve and a steering post or shaft normally movable in the head or sleeve for steering purposes, the said post and sleeve having openings therethrough which register when the said parts are in a prede-

PITTSFIELD

MOTORCYCLE SPARK COILS

Unaffected by Vibration — Waterproof

OUR WONDERFULLY EFFECTIVE INSULATION by vacuum process and impregnation of a special solid compound holds the entire coil together and prevents short circuits through vibration or moisture. No amount of jolting impairs their efficiency.

Motorcyclists who use the Pittsfield Coil are freer from aggravating breakdowns and delays on account of poor sparking.

They are compact, fire the mixture quickly with a spark of great intensity and prolong life of batteries.

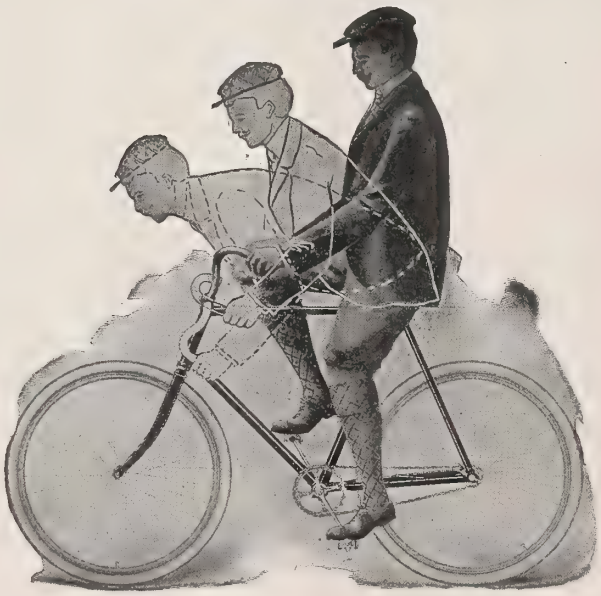
THE NEW R-S
Has Come Into Its Own

The First Public Test of The 1911 Reading Standard

was in the New York Motorcycle Club Double Century Run, May 7.



Four New 1911 Reading Standards started; all finished with perfect scores. No trouble, no delay, no worry. The comfort, convenience and safety of the Double Brake System, Adjustable Foot Rests, Shock Absorbing Seat Post, and above all the remarkable efficiency of the R-S Ball Bearing Motor was conclusively demonstrated, not only to the riders, but to nearly one hundred (100) contestants who watched the performance of this machine with great interest. The first 50 miles became a road race and the New R-S proved its speed as well as reliability, two of them being the first singles to reach Patchogue, beaten only by three big twins, two of which started several minutes ahead of the R-S.

A Word to Live Dealers—The New R-S has more visible and prominent selling points than any other motorcycle now on the market, and above all there is quality in design, workmanship and material that has ever before been reached on motorcycle construction. We have some valuable territory open. Write for catalogue and terms.

Motorcyclists and bicyclists should consider the importance of having their tires inflated to the right pressure.

IT IS TIRE ECONOMY AND IT SAVES MONEY

To know what pressure you have in your tires, use a

SCHRADER
Universal Tire
Pressure Gauge

(Trade Mark Registered in U. S. Patent Office)

(Patented March, 1898—Other Patents Pending)

It will tell the exact pressure in your tires at any time, day or night, by simply holding this Gauge to your Valve for a second. Its recording sleeve remains in place, showing the exact pressure in the tire so that the Gauge can be taken anywhere and read, at night to the front of machine into the light of the lamps. After the pressure has been ascertained the Indicating Sleeve can be pushed back into the Gauge with your finger. No catches or snaps to operate or get out of order. This Gauge is 2½ inches long over all, short enough to apply easily to the smallest diameter of wheel and can easily be carried in the vest pocket or the change pocket of your trousers.

PRICE $1.00 EACH

The Quickest, Surest Way of Getting Back Home

The Diamond TIRE SLEEVE

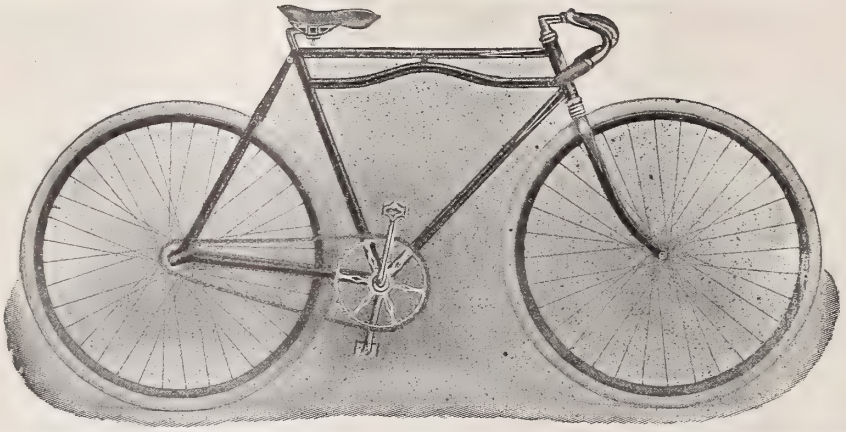
The Diamond Tire Sleeve protects any injury under the length of the sleeve—

Averaging, according to your tire cross sectional size from 5 to 5½ inches.

Fits inside and under the rim. Envelopes the casing as a tight fitting glove. Holds a rim cut as effectively as a puncture on the tread (the construction of Diamond Motorcycle Tires prevents rim cutting).

Can be applied in from 3 to 5 minutes. Will not creep or move.

Gives several hundred miles' service under ordinary conditions.



A fabric patch to protect the inner tube in case of large injury accompanies each sleeve, making a complete repair.

Furnished for motorcycle tires of cross sectional sizes 2¼ inches—2½ inches—2¾ inches. Net price $1.00 each.

Write for booklet, "Diamond Repair Devices."

The New England Racer Price $55

A WINNER
Fast Strong
Light Snappy

The Only Bicycle in the World Built for Sprint RACING on Small Board Tracks.

Three Reasons Why

First. It brings the rear wheel four inches closer to the hanger, bringing more weight on the rear wheel, and relieves the strain from the front wheel and forks. This will be appreciated by all track riders, as it is a well established fact that in order to acquire any great amount of speed on tracks with sharp turns, it is essential to have all possible weight of the rider on the rear wheel.

Second. The **New England Racer** uses from 14 to 19 inches less chain than the average racing models. This is a big factor in racing, as a long chain is bound to swerve, and if not kept tight will jump the sprockets or catch on the top of a tooth and break. This is a frequent occurrence on board tracks. On the **New England Racer** the chain can be adjusted as loose as the rider desires without the least danger of jumping the sprockets or breaking.

Third. The rear stays being much shorter, are stronger, and will prevent the sprockets from pulling out of alignment with each other under great strain.

J.W. GRADY & CO. WORCESTER MASS.

The POLICY of HANS RENOLD Limited, when designing a chain, is to obtain the best, and to seek this regardless of expense. When satisfied that no better chain can be made, the cost of each process is cut down as far as possible. Where the choice lies between cost and quality, there is no hesitation—**quality always wins.** This is the policy that has gained for RENOLD CHAINS their world-wide reputation. The RENOLD works are devoted exclusively to the manufacture of chains of **one quality only,** and now cover over seven acres.

Your bicycle tire needs are exactly met by at least one, and perhaps all, of these four leaders from

KOKOMO

Kokomo Defender Special

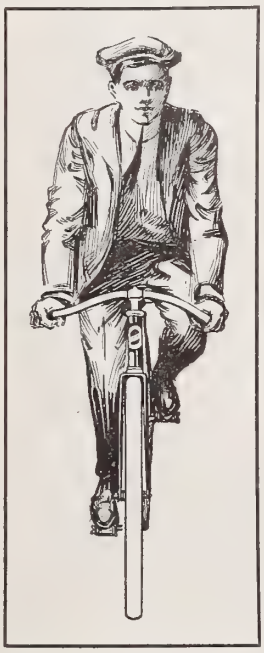
This popular guaranteed tire is specially designed and constructed for road use. It is made from the best materials obtainable, being carefully built up by hand with pure para inner tube, and, owing to the very high quality of the inner tube used, a puncture is very easily repaired.

Kokomo "New Oxford"

A medium price tire, yet so good in quality that it does not do it justice to call it a medium grade tire. We have built these tires so that in case of puncture they will not be worthless but can be repaired. Also furnished in smooth tread.

Kokomo Dotted Tread

A tire that prevents skidding and is safe and reliable on wet, slippery roads and city streets. Of high quality and careful construction. Furnished in road weight or in thick tread.



Kokomo Guaranteed Red Thorn

Made of red rubber, is extra heavy and is built especially for long service.

Are you profiting by what we offer you in Kokomo Tires?

Saving Tire Money for Riders Increases Dealers' Business

The Goodyear Pathfinder Single Tube Tire is the biggest-value bicycle tire that *can* be offered to riders.

For it is made of the finest grade of new Para rubber; it gives greater mileage than any other bicycle tire—hence the tire cost per mile is *cheapest* with the Goodyear Pathfinder—it costs far less than any other in the end.

The **Goodyear Pathfinder,** because of its tube of new Para rubber, can be repaired quickly either by plugs or vulcanization.

Thus the rider whose bicycle is Goodyear-equipped saves money on tires and dispenses with repair difficulties—he gets tremendous satisfaction from his tires.

That means a repeat order for the dealer who sold him **Goodyear Pathfinder Bicycle Tires.** The pleased rider is a constant, steady advertisement—a business producer—for that dealer.

That's why dealers in **Goodyear Pathfinder Single Tube Bicycle Tires** are doing a big business on this product alone—are making big money by selling them.

Our **Pathfinder Non-Skid Extra Heavy Bicycle Tire** means additional business for dealers. Its block tread forms a vacuum upon contact with slippery streets and *prevents skidding and side-slipping.*

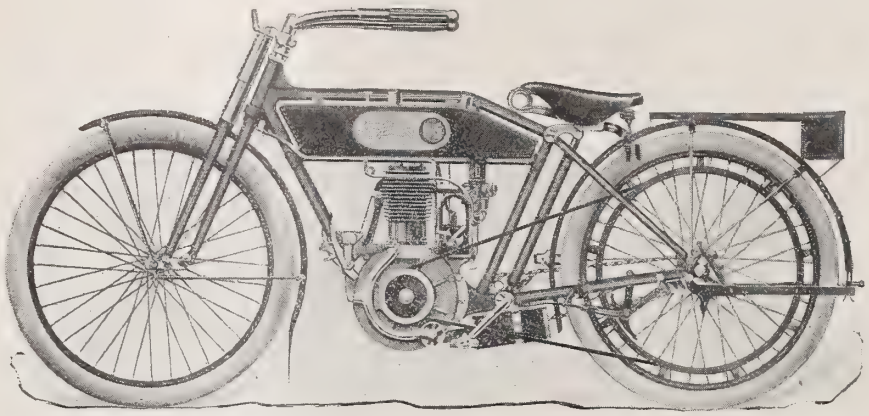
Please note from the illustration how the construction of these two business-producing tires give durability greater than any other tire.

In addition to the finest new Para rubber, the special closely-woven Egyptian fabric is superior to that of ordinary tires. A strip of this fabric one inch wide has a tensile strength of 150 pounds, while that of the ordinary muslin used in commonplace tires is but 40 to 60 pounds.

The rim side of the **Pathfinder Non-Skid Tire** is pebbled so as to give the rim-cement a tight grip—this abolishes the possibility of "creeping."

The reinforcing strip is made of toughened rubber that preserves the resiliency and gives additional resistance to wear.

These facts are of vast importance to the rider—hence taking advantage of them in your business means a decided increase in sales.



That is our message to dealers—it means something to *you.* Write us today.

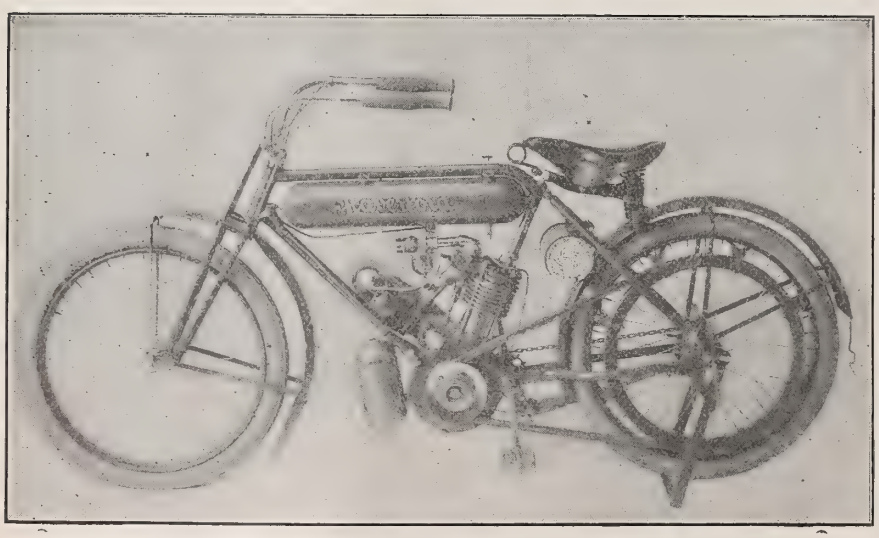
THE NEW R-S
Has Come Into Its Own



The First Public Test of The 1911 Reading Standard was in the New York Motorcycle Club Double Century Run, May 7.

Four New 1911 Reading Standards started; all finished with perfect scores. No trouble, no delay, no worry. The comfort, convenience and safety of the Double Brake System, Adjustable Foot Rests, Shock Absorbing Seat Post, and above all the remarkable efficiency of the R-S Ball Bearing Motor was conclusively demonstrated, not only to the riders, but to nearly one hundred (100) contestants who watched the performance of this machine with great interest. The first 50 miles became a road race and the New R-S proved its speed as well as reliability, two of them being the first singles to reach Patchogue, beaten only by three big twins, two of which started several minutes ahead of the R-S.

A Word to Live Dealers—The New R-S has more visible and prominent selling points than any other motorcycle now on the market, and above all there is quality in design, workmanship and material that has ever before been reached on motorcycle construction. We have some valuable territory open. Write for catalogue and terms.

1911 Models Now Ready

The Factory Behind the Product

A strong plant is never grown in barren soil and the quality of any product is dependent upon the facilities for its manufacture.

The factory producing the

EXCELSIOR AUTO-CYCLE

is beyond question the most thoroughly equipped and complete motorcycle factory in the world.

With the buildings just finished, the total floor space is slightly over 190,000 square feet and the machinery and equipment is the best obtainable.

A comparison of these facilities with those of factories with a limited product or building only a part of the machine will clearly indicate one of the reasons for

EXCELSIOR SUPERIORITY

Three models for 1911—two Singles and a Twin. All described in Catalog C-11. Write for it today.

EXCELSIOR SUPPLY COMPANY

400 W. Randolph Street CHICAGO, ILLINOIS

San Francisco Branch—361-363 Golden Gate Ave.
Eastern Representative—STANLEY T. KELLOGG, 169 Beechwood Ave., Bridgeport, Conn.

Gliding along over a fine country road—the breeze a pleasant song in your ears—

On the best stretch, unfortunately, you may hit a broken bottle or a horse shoe nail—small tube puncture.

If you have to labor with the old-time patch and cement you're likely to get out of tune with the day and yourself.

Then's the time for

Diamond

Cementless Patches

All that's necessary is to—

Clean puncture thoroughly, apply patch, insert tube and go ahead.

The heat caused by running the tire securely vulcanizes the patch—making it a permanent repair.

Each repair costs you 8 1-3 cents. An air-tight box of 12 patches for only $1.00. Your dealer sells them.

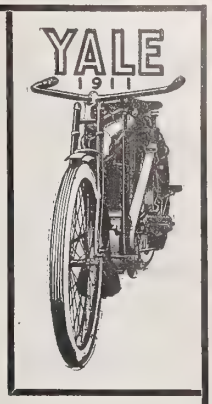
Pennsylvania BICYCLE TIRES



For 1911

in various grades embody all of the features necessary for a complete line. Under a new arrangement of qualities we offer to the jobber an assortment of values which cannot be equaled elsewhere.

PENNSYLVANIA RUBBER CO., Jeannette, Pa.

YALE
MOTORCYCLES

Again Demonstrate That Service Feature

(SO ESSENTIAL IN A REAL MOTORCYCLE)

In the New York Motorcycle Club's Tenth Annual Spring Run, May 7th, to Southampton, L. I., and return—210 miles—73 started; 63 finished. 5 Yales started; 5 Yales finished with perfect scores —1000%— and received medals. The Yale riders were Arthur Leslie, H. Trauppner, R. Walker, B. J. Huerlander, Jr., and H. Nichols. The last named won the individual perfect score cup in the New Jersey Motorcycle Club's 250 mile Decoration Day run in 1910.

Quality Counts

Good Light Costs Less Than Accidents

Unless you can see the ruts, bumps, holes and obstacles along your path at night, you are exposing your machine, yourself and possibly a passenger, to constant risk of serious accident. One such accident would cost you more than a whole year's supply of Prest-O-Lite.

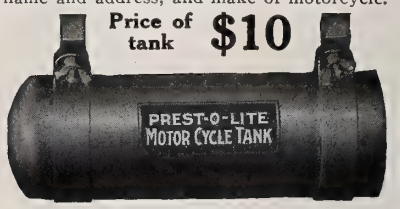
PREST-O-LITE Gas Tank

Shows up every detail of the road, and floods it far ahead with strong, unwavering light, which you turn on and off like a gas jet.

The Prest-O-Lite Tank gives you 40 hours of steady, dependable light (using a ¼ ft. burner). When empty, exchange it for a full tank, at a small fee. No dirty work, no uncertainty of light flaring up or dying out, and yet Prest-O-Lite service costs no more—usually costs less—than the carbide which a generator consumes.

Remember, too, that the genuine Prest-O-Lite Tank is in universal use and demand, and is always saleable for about what you put into it. It is the **only** tank that, when empty, can be promptly exchanged, **anywhere and always.** Don't let anyone give you a counterfeit—you may not be able to "pass" it.

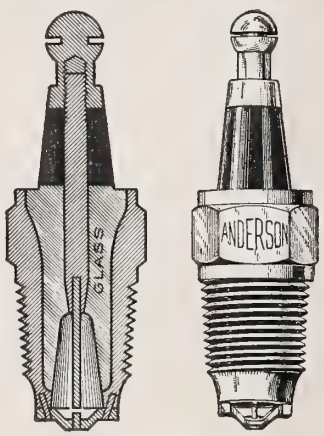
The Prest-O-Lite Co. **245 East South St. Indianapolis, Ind.**



Branches at Atlanta, Baltimore, Boston, Buffalo, Chicago, Cincinnati, Cleveland, Dallas, Detroit, East Cambridge, Jacksonville, Kansas City, Long Island City, Los Angeles, Milwaukee, Minneapolis, New York, Oakland, Omaha, Philadelphia, Pittsburg, Providence, San Francisco, Seattle, St. Louis and St. Paul.

EXCHANGE AGENCIES EVERYWHERE

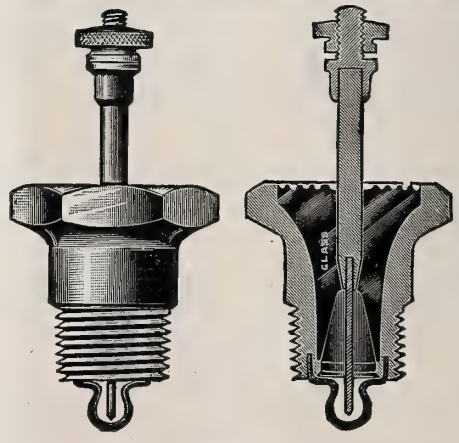
FREE—Our Handy Ruler



Light, flexible, folding foot rule. Half of it is specially made for finding depth of gasoline in tank. Inches and centimeters. Measures tires, etc. Handy in a hundred ways. Sent free on request. Give name and address, and make of motorcycle.

Price of tank $10

Dimensions: Length, 12 inches; diameter, 4 inches; weight, 7 lbs.



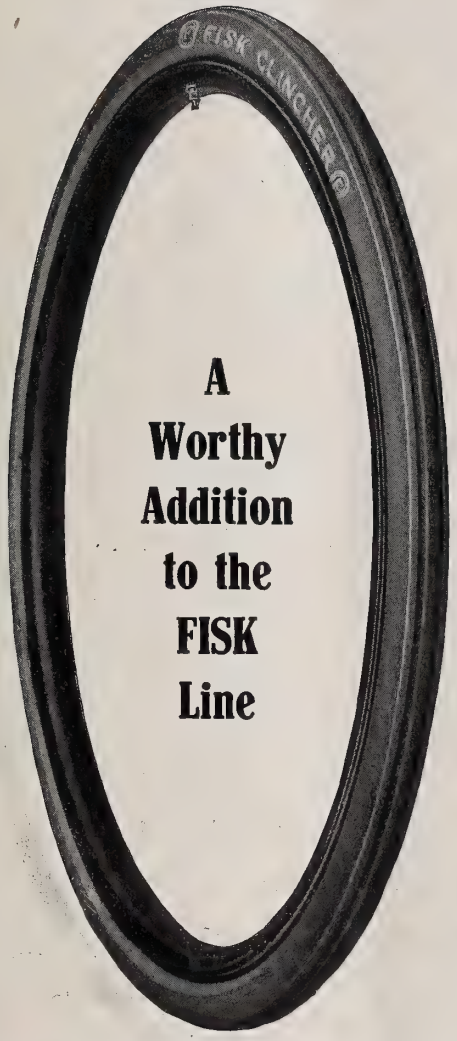
ANDERSON GLASS-AND-STEEL SPARK PLUGS

Model B
Licensed Price, $1.50

"A Window to the Engine"

Glass Insulation, the Glass Being Welded to the Steel. Absolutely the Strongest, Most Enduring and Certain Plug on the Market, Although of Glass.

Model A
Licensed Price, $1.50



Anderson Glass-and-Steel Spark Plugs now are offered in a new model with small diameter shell and a mica stem, styled the Model B. The basic principle of glass insulation welded to the steel shell and central electrode into one integral mass obtains in both models, and the flash of the explosions is shown through the glass insulation of Model B as in Model A.

ANDERSON SPARK-PLUG COMPANY, Washington, D. C.

Factory at No. 206 North Holliday Street, Baltimore, Md.

FISK

CLINCHER BICYCLE TIRE

A Worthy Addition to the FISK Line

THE new Fisk Clincher Bicycle Tire has a very effective corrugated tread and with each casing is supplied our Para Gum Bicycle Tube. It has been selected by the leading makers of high-grade wheels, and the flattering letters we have received from wheelmen are evidence of popular approval.

Write for illustrated literature.

Vol. LXIII. New York, U. S. A., Saturday, May 20, 1911. No. 9

DOWSE IN A NEW TIRE VENTURE

Former President of G & J Re-Enters the Trade—Ward Resigns to Join Him—Will Take Federal Plant.

By the incorporation, under Wisconsin laws, with $1,000,000 capital, of the Federal Rubber Mfg. Co., of Cudahy, Wis., a suburb of Milwaukee, it has become known that Byron C. Dowse, who resigned last March as president of the G & J Tire Co., of Indianapolis, Ind., has re-entered the tire business, as he is one of the leading spirits in the newly incorporated company, which is to manufacture tires and rubber goods. The new company is to take over the plant of the Federal Rubber Co., of Cudahy, which has been making automobile tires and rubber goods for the past few years. None of the obligations or business of the old company will be involved in the sale, however, as Dowse's company is buying only the factory and the equipment, together with some other physical assets. Beyond the similarity of names and the fact that the new company buys the older company's plant, there is no direct relation between them. The Federal Rubber Mfg. Co., with Dowse at the wheel, will take full possession of the Cudahy factory on July 1.

Motorcycle and bicycle tires will be among the chief products of the Federal Rubber Mfg. Co., along with solid and pneumatic automobile tires and mechanical rubber goods. When the plant is transferred to its new owners it will be remodelled and greatly extended, and the builders' plans already have been prepared for the erection of new buildings and additions to the power plant.

Dowse was president of the G & J Tire Co. for three and a half years, his connection with the company being one of long standing, dating back as far as 1899, when the Rubber Goods Mfg. Co. acquired the Indianapolis plant and marketed tires under G & J patents. Prior to this he was engaged for over four years as selling representative of the Gormully and Jeffery Mfg. Co., Chicago.

Richard Ward, secretary and treasurer of the G & J Tire Co., has resigned that position to take up a similar position in the new company under Dowse, his former president. Ward has been in the rubber business for 14 years, having occupied various positions with the India Rubber Co., the Midgeley Mfg. Co. and the G & J Tire Co. At the time of his resignation he occupied the position of office manager for the Central District office of the United States Tire Co.

Fire Loss for Indianapolis Dealer.

Fire visited the building at 231 Massachusetts avenue, Indianapolis, Ind., in which George C. Detch, bicycle dealer, is located, and caused him a loss of $1,800, on the night of the 11th inst. His stock was not insured.

Canada Cycle Changes Its Name.

The Canada Cycle and Motor Co., of Montreal, Can., has changed its name, and in the future will be known as the Russel Motor Car, Ltd. The company has raised its capital from $800,000 to $1,600,000, half in preferred stock.

Musselman on European Trip.

A. J. Musselman, president of the American Motorcycle Co., Chicago, Ill., sailed for Europe on the President Lincoln, on Wednesday, 17th inst. He will remain abroad for about six weeks.

MIAMI EFFECTS MERKEL PURCHASE

Jacoby Announces Plans for the Future—Buffum and Merkel Remain—Ball Closes His Interests.

All details of the purchase of the Merkel-Light Motor Co., of Pottstown, Pa., by the Miami Cycle and Mfg. Co., of Middletown, O., have been completed. The official announcement was made this week by K. R. Jacoby, president and general manager of the Miami company, in the following statement:

"Our company has purchased in its entirety the Merkel-Light Motor Co., and from this time on will be the manufacturer of the Flying Merkel motorcycle. The Merkel plant at Pottstown will be increased in capacity and the output considerably enlarged, so that Merkel dealers can be assured of prompt service on orders for Flying Merkels. Mr. J. F. Merkel and Mr. Edward Buffum will be associated with this company in the manufacture and sale of the Merkel motorcycle, and the entire factory and sales force of the Miami Cycle and Mfg. Co. will bend their efforts toward the placing of the Flying Merkel on the top of the list in the motorcycle world."

John R. Ball, the secretary-treasurer of the Merkel company, in disposing of his interests and retiring from participation in the company's affairs, is doing so in order to return to Milwaukee, Wis., his former home, where he has large personal interests. E. S. Fretz, the Merkel president, also has found that the growing affairs of the Merkel company have demanded a degree of time and attention that it has been difficult for him to give, owing to the press of his other interests.

Dancers Thoroughly Hartford Tired.

Apropos of the selling slogan of the company, "The tire that lasts," there was a great deal of "tire" of the enduring sort prevailing about midnight in the bones of a majority of the 1,500 people who attended the third annual concert and dance of the Hartford Rubber Works Company Mutual Benefit Association in Foot Guard Hall, Hartford, Conn., on the 12th inst. Vigorous tripping of the light fantastic for three hours or more was responsible for the ebbing of the tide of physical endurance. Over 2,000 tickets for the function were sold and a neat sum will accrue to the association's treasury from the affair. Led by Charles B. Whittlesey, president of the association, and his daughter, Miss Helen Whittlesey, the grand march began at 9 o'clock with over a hundred couples in line. The hall was decorated in the national colors, and blue and white electric lights. Calcium lights with rotary color effects were placed in the galleries and added to the beauty of the scene when the regular lights were switched off. In the dance card an innovation was found, the regular dance names being replaced by names of products of the company, such as "Our Bicycle Tires," "Our Non-Skid Treads," etc. Souvenirs were distributed, fans to the ladies and lead pencil "cigars" to the gentlemen.

Lincoln Holland Issues a Map.

For the benefit of motorcyclists touring the district embracing Los Angeles, Riverside, Orange and San Bernardino, Cal., an excellent detail map is being issued by Lincoln Holland, the motorcycling veteran from the East, who is now handling the M. M. motorcycle in Los Angeles, and whose establishment is at 1034 South Main street. The map shows all the good roads, the wagon roads, the toll roads and the trails, and covers the territory from the Santa Monica mountains to the San Jacinto mountains, and from Mt. Baldy down to Coast Royal.

Squier Sees a Canadian Demand.

Geo. H. Squier, traveling agent for the Aurora Automatic Machinery Co., of Chicago, makers of the Thor motorcycle, was a visitor in Toronto recently. "The Squire" says that Toronto looks good to him as a motorcycle center, and predicts that within two years there should be at least 2,000 of the two-wheeled motors chasing around the streets of that place. He was surprised that American manufacturers had not catered more to the Canadian trade.

Marathon May Move to New Britain.

Having originally been transplanted from Hartford to New Haven, Conn., the Marathon motorcycle, which is distinguished by a two-cylinder two-cycle construction, is likely again to move its home, this time to New Britain, Conn. The firm of George G. Prentice & Co., of New Haven, which took over the manufacture of the Marathon from L. E. Rhodes, of Hartford, is to be purchased by the New Britain Machine Co., of New Britain, the latter company having just increased its capital stock from $250,000 to $500,000 for the purpose. Preparations now are being made to move the New Haven manufacturing operations to New Britain at an early date.

Exploits Grinnell Glove Campaign.

Advertising its advertising is the object of an elaborate 16-page circular in colors which has been issued by the Morrison-Ricker Mfg. Co., of Grinnell, Ia., in connection with its Grinnell "Rist-Fit" ventilated gauntlets and gloves for motorcyclists, cyclists and automobilists. The circular reproduces a number of the striking advertisements that are being used by the company in the motorcycle and automobile papers.

BYRON C. DOWSE.

Former president of G & J Tire Co., who heads new Federal Rubber Mfg. Co.

Washers for Glass Spark Plugs.

Glass spark plugs, which on some engines project too far into the cylinder, may be made to fit satisfactorily by introducing a sufficient number of washers to provide a tight fit and yet prevent the end of the plug reaching far enough into the cylinder to be in danger of coming into contact with the piston head.

Hall Handling M. M. in Cleveland.

The A. J. Hall Cycle & Auto Works, of Cleveland, O., have added motorcycles to their line, and are offering the M. M. They are located at 3741 W. 25th street.

Takes Merkel Agency for Macon.

E. D. Arnett has taken the Merkel agency for Macon, Ga., and vicinity. He is located at 416 Cherry street.

Widmayer Issues 1911 Motorlog.

Listing practically all of the standard motorcycle accessories, as well as several specialties of the firm's own make, such as chain tools and magneto cut-outs, the 1911 "motorlog" of the Frank B. Widmayer Co., 2312 Broadway, New York City, comes from the press in 48 page form. It is liberally illustrated, with nearly 200 illustrations, and is indexed for quick reference to any article. In addition to motorcycle goods, Peerless bicycles in single and double bar models, and a wide range of shop tools also are illustrated and described.

Tire "Dope" of the Mental Kind.

Plenty of "human interest" has been thrown into the writing of a booklet, styled The Tires of "Old War-Horse," which is labeled as being "a story with a moral." The "old war-horse," it transpires, is Jake DeRosier, and the tires are Goodyear "blue streak" racing tires, and the story relates how the latter assisted DeRosier to surpass his best previous efforts.

Leipsic Trying Electric Tri-Cars.

Electric tricycles are an innovation introduced in the Leipsic (Germany) post office service. The machines can carry a heavy load, and are used in the collection of mail matter from the street boxes. They are operated at a speed of about 12 miles an hour, and the storage batteries yield something more than 40 miles.

Gas Company Buying Heavily.

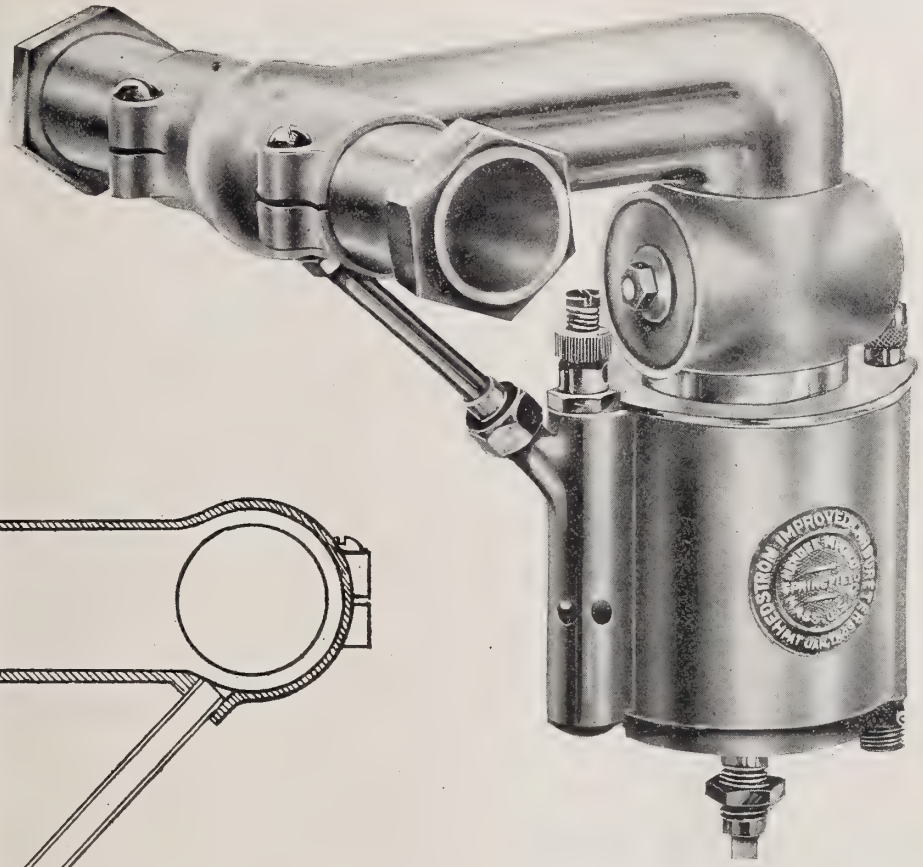
By the addition of four more Harley-Davidson machines to its equipment, the People's Gas Light & Coke Co., of Chicago, Ill., has attained the distinction of being one of the large motorcyle users of the country. The company now has 25 machines, all of the one make.

Bisbee Proud of an Old-Timer.

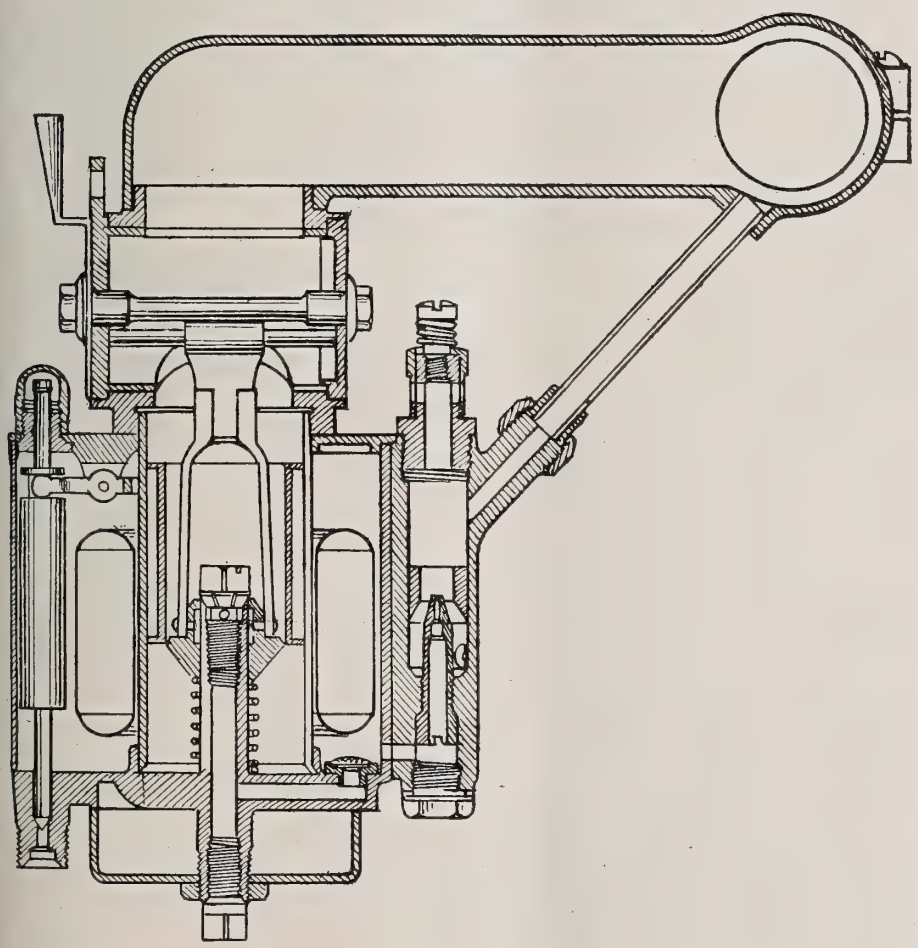
A. Bisbee, 609 Fannin street, Houston, Tex., an F. A. M. repairman of that city, rejoices in the ownership of one of, if not the first, motorcycle ever brought to that city. It is of the vintage of 1902 and he learned to ride it at that time. It is claimed to be in good running order still.

Houston Telephone Using Machines.

Five motorcycles have been purchased by the Houston (Tex.) office of the Southwestern Telegraph and Telephone Co., for the use of its linemen and inspectors. The machines, which are Indians, were sold to the company by Austin W. Burges, the Houston agent.



Smith Transferred to Chicago.



W. A. Smith, of Brockton, Mass., who has been connected with the office staff of the American Motor Co., makers of M-M motorcycles, has been transferred to the Chicago branch. He will act as assistant to Manager Guy M. Greene.

TWO-JET INDIAN CARBURETER

Hedstrom Evolves a New Design Embodying Multiple Jet Principle—Details of Its Operation.

Looked forward to with more than ordinary impatience by those who had heard of its coming, a new two-jet or "multiple jet" carbureter for Indian motorcycles has been brought out by the Hendee Mfg. Co., of Springfield, Mass., marking the first American application of multiple jet carburation to motorcycles. The principle has been applied to motor cars with great success, and in applying it to motorcycles the Hendee company seeks to provide a carbureter that will deliver a more nearly perfect mixture throughout the engine range from low speed to high speed than appears possible where only a single jet is employed.

As shown by the accompanying photographic illustration and the sectional drawing, the general form of the improvement is the adding of a small jet outside the float chamber of a carbureter that in other respects resembles the standard Indian single jet carbureter. The extra jet has its own induction pipe leading to the inlet manifold, and in connection with the spray nozzle and small mixing chamber an auxiliary air shutter is provided at the top, applying solely to the extra jet and not affecting the main part of the carbureter. Like previous Indian carbureters, the new multiple jet carbureter is designed by Oscar Hedstrom, the designer of the Indian motorcycle. For the present it will be fitted only to the 7 horsepower Indian models.

Gasoline is fed to the small jet from the regular float chamber, the fuel level for both the large central jet and the small outside jet being the same. The small nozzle is removable for cleaning by unscrewing a plug underneath it, at the bottom of the small chamber, the operation entailing the disturbance of no other part. A slot in the bottom of the small nozzle piece furnishes a seat for a screwdriver.

Air is admitted to the small mixing chamber through four holes, these holes being a slight distance below the top of the nozzle. The mixing chamber is constructed just above the top of the jet to give increased suction or a Venturi tube effect. On the top of the small chamber is the auxiliary air shutter, of the revolving sleeve type, with a friction spring to keep it in whatever adjustment it may be set. Turning the knurled outer sleeve uncovers two opposite holes in the inner sleeve, which admit additional air.

At low speed the main part of the carbureter can be idle, with the throttle entirely closed, the necessary amount of mixture being supplied entirely by the small or auxiliary jet. From the auxiliary mixing chamber the mixture is drawn through the small diagonal pipe that leads into the main manifold supplying the two cylinders of the engine. The small pipe is permanently fastened to the manifold, but is atached to the mixing chamber by a union, which permits its being disconnected from the latter when it is desired to dismount the main inlet and manifold from the carbureter, this latter operation being accomplished in the usual way, by unscrewing.

For slow speed running, the use of the small jet instead of the main jet results not only in a much lower rate of travel than has been possible with big engines equipped with the single jet carbureter, but gives a

great fuel economy and much more silent running. In fact, the silence is a marked feature. It is claimed that in tests on a quiet street the only noise that could be heard from a big twin running on the small jet was the click of the valves.

The main nozzle and the small nozzle, although fed from the same chamber, are entirely independent of each other, as are the air shutters in connection with them, respectively. The small pipe from the auxiliary jet is always open and the passage of mixture through it is not controlled by the main throttle, as the pipe goes directly into the manifold at a point beyond where the main throttle is fitted between the manifold and the carbureter. On the lowest speeds only the small jet is in actions, but as the main throttle is opened, for increased speed, the main jet begins at once to come into operation correspondingly. At maximum speed both jets are in full operation, giving a maximum flow of fuel and affording a slight increase in power and speed over what is obtained with a single jet when the latter is adjusted to give low speed running as well.

Restoring Voice to Horn Reeds.

Rubber bands are a temporary voice restorative for bulb horns that refuse to honk because of too wide an opening in the mouth of the reed. The band is slipped around the reed a couple of times and moved up or down as the case may be, the horn being blown after each shifting of the band, to determine its proper position. The band, being elastic, draws the tongue of the reed slightly closer to the throat, so that the air will not rush through without vibrating the reed, and still is yielding enough to permit the air pressure to distend the reed slightly. Of course it is only a temporary remedy but it is a good one if properly applied. In cleaning reeds care should be taken not to bend permanently the tongue away from the throat, and if it should become so set it can be brought back by squeezing in a vice.

Advocates Two Sparks at Once.

Not only are two heads better than one, which is the way the old adage has it, but two sparks are better than one, according to Otto Heins. He is the president of the Bosch Magneto Co., of New York, and he believes that he knows something about sparks. In a paper presented before the Society of Automobile Engineers, Heins made a demonstration showing that when two sparks are given simultaneously on opposite sides of a cylinder the time required for the complete inflammation of the mixture is reduced and greater power is obtainable from the engine. The company for some little time has been producing magnetos capable of generating two sparks in a cylinder, giving what is known as "multi-point ignition." These have had limited application to motorcycles and have been tried out on a few racing machines.

ODD DESIGN GIVES FLEXIBILITY

Unusual Construction in the "Wedge-Grip" V-Type Belt—How Internal Strains Are Avoided.

Giving an extreme degree of flexibility while at the same time providing the depth necessary for the wedging action which is an important principle in V-belt driving, a V-type belt of unusual construction is offered by the Strand Mfg. Co., 035 Center street, Milwaukee, Wis., the belt being known as the "Wedge-Grip." In bending around a small pulley there is no buckling of the inner face of the belt and no stretch of the outer ply, it is claimed, while the unique middle ply, which consists of short, overlapping diagonal pieces, as shown in the accompanying illustration, avoids internal strain while retaining the strength and increasing the flexibility. The belt is

three-ply between rivets and has four thicknesses at the points where the rivets are located. "Surface tanned" tough leather is used, and the rivets are copper. The coupling device used for the belt takes advantage of the special construction, the hinge plates at each end going in between the middle ply and the top ply, and the middle ply and bottom ply, so that there are three layers of leather and two of metal, all bound firmly together by a through bolt. The hinge pieces of the two ends are coupled together by a removable pin, and the ends of the leather are brought very close together. The belt may be put on or taken off easily, simply by slipping out the pin. The ⅞ inch size sells for $8.00, while the 1 inch is $8.50, and the 1⅛ inch is $9.00, all on a "money back" basis after a month's use.

Tests for the Mixture Proportions.

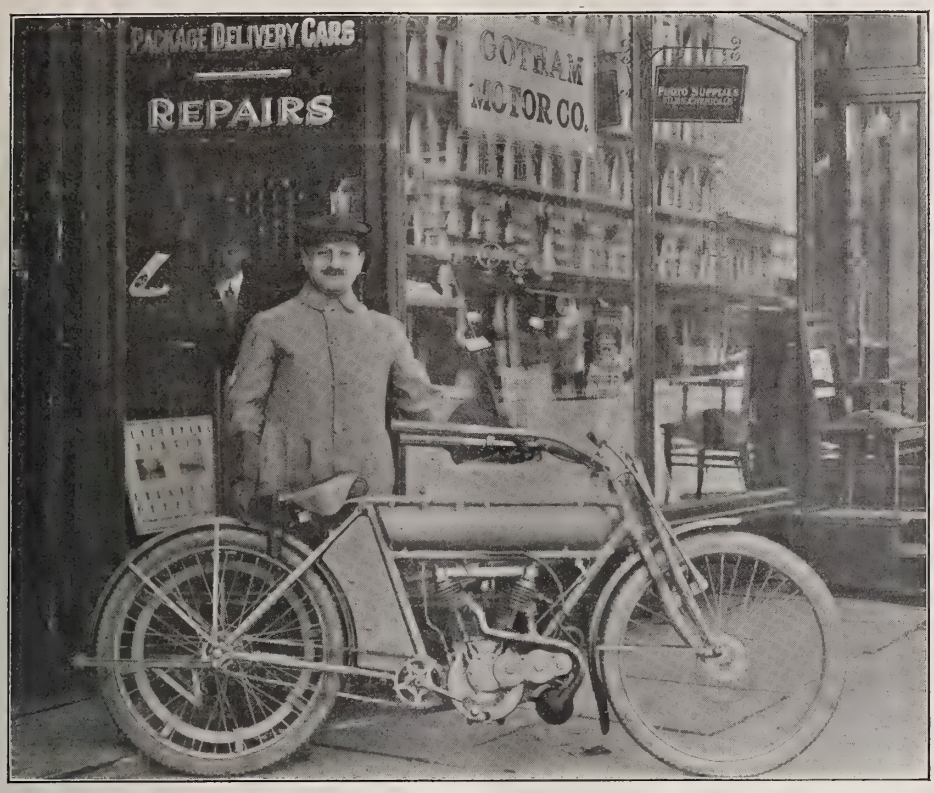
In order to determine if the mixture is too rich or too weak, the gasoline should be shut off and the engine run on open throttle on the supply remaining in the float chamber. If the normal mixture passing through the throttle is too rich, the engine will speed up noticeably as the fuel level in the float chamber drops, the constantly decreasing quantity of fuel remaining in the carbureter having a stimulating effect on the mixture. On the other hand, if it is thought that the mixture is too weak the float chamber may be flooded partially, while the engine is running. If such treatment causes the engine to speed up it is a sure indication that the normal mixture is too weak. A too weak mixture at wide throttle openings often can be detected by placing the hand over the main air port so as to partially obstruct it. If the mixture be too weak, the increased suction induced by the obstruction of the port will enrich the mixture and cause the engine to pick up, as long as the hand is held over the port.

Polished Nickel to Resist Carbon.

There are carbon removers galore, all claimed to do the "Dutch Cleanser" act to perfection, but a New York motorcyclist, acting on the old adage about an "ounce of prevention," etc., is trying out a scheme for preventing the collection of the by-product of combustion. Believing that carbon will not adhere to a highly polished surface he has had the top of his piston and the interior of the combustion chamber nickel plated and buffed. While it is doubtful if the nickel will long stand up under the terrific heat to which it will be exposed, the fact that nickeled exhaust pipes retain their high finish for a considerable period, after the machine is in use, gives the motorcyclist some assurance of the practicability of his plan. The outcome of the experiment is awaited with interest.

U. S. Consul Tells of a Boom.

In telling of the activity in motorcycle manufacture in Birmingham, England, United States Consul Albert Halstead, in an official trade report says: "For some years the motorcycle was not particularly popular, was considered a noisy and irritating instrument of transport, but there is a change in public sentiment, and the trade is enjoying a boom. The efficiency of the motorcycle has been materially improved, and exports have been considerable, while the imports have lessened. Two or more large firms in the Birmingham district who previously made only bicycles have started in the manufacture of motorcycles, and another prominent firm is considering establishing this new branch."



Orders Come from Far Away Places.

That the market for American-made motorcycles knows no territorial limits is suggested by the receipt of orders by the Hendee Mfg. Co., Springfield, Mass., in the past few weeks from such far-off places as Panama, Brazil, Chile, Philippines and South Africa. In view of the fact that the orders were placed in the face of strong foreign competition and were entirely unsolicited it is natural to infer that "there's a reason."

The Public Service Corporation, of Camden, N. J., has taken to an active utilization of motorcyles. The Camden agent for the Harley-Davidson has entered the Corporation's order for seven machines.

B. A. Swenson, Providence, R. I., who introduced motorcycles in the Providence police department, received an order for another machine last week. The "cops" use Indians exclusively.

WHERE THE YALE HAS ITS HOME IN NEW YORK CITY.

The Gotham Motor Co., 204 W. 116th street, handles the Yale in the metropolis. The genial looking man with the twin is L. Goldsmith, owner and sales manager.

Helpful "Dont's" from a Dealer.

For the benefit of new riders, whether or not their machines are new, a veteran dealer offers a few "don'ts," the observance of which will in his opinion add to their enjoyment as well as their wallets. Here are the pearls of wisdom which dropped from the mouth of the sage:

Don't neglect to keep inner tubes in a suitable place, protecting them from light, foreign matter and mechanical contact.

Don't place spare inner tubes in a box with tools—the inner tubes will resent such treatment.

Don't throw the tools in a large tool box with a mess of junk—get a kit, and leave the junk at home.

Don't take along so many tools that you will be unable to pick out the one you need.

Don't forget that the fates are appeased the more readily if you look over the machine once in a while, and tighten things up.

Don't place too much reliance in the ball bearings in the wheels—they may be ever so fine, but this is no reason why they should not be cleaned, inspected and freshly lubricated at reasonable intervals.

Don't allow your machine to complain for lack of attention. A little attention every day is far better than spending Saturday afternoon tinkering when you ought to be riding.

Don't allow a motor to run without attention until it emits strange noises—the damage may then be done.

Don't allow the secondary cables to rub against metal parts, especially if the latter are hot. Either the cables will chafe or the insulation will burn through and then ignition trouble will commence.

Don't batter the insulation on the secondary cables—rubber insulation should be handled with care.

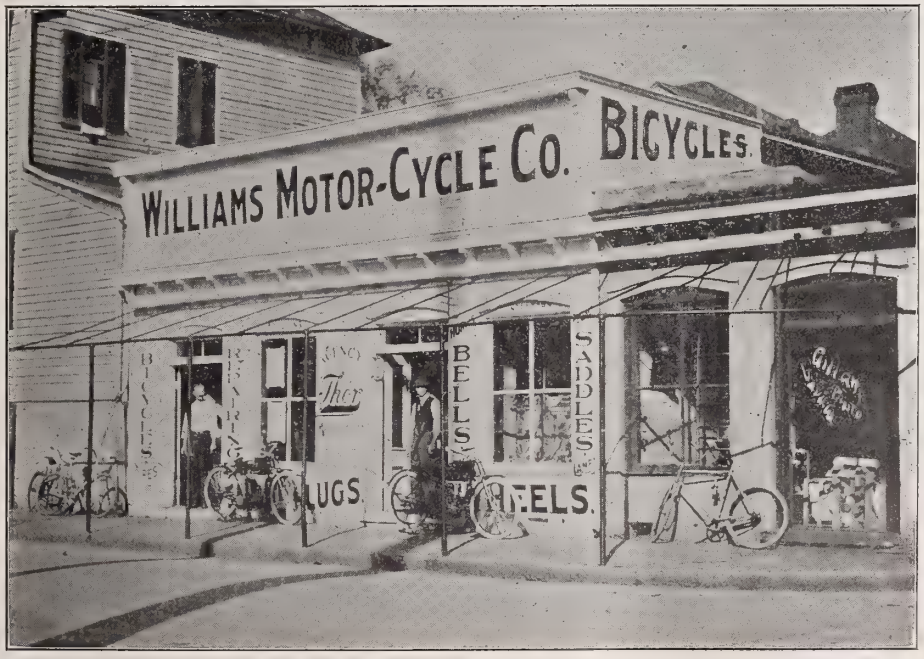
Don't tamper with the adjustments of the magneto—if you do not understand that device, let it alone until you come to a pilgrim who does.

Don't fail to supply the wants of the magneto from a lubricating point of view—this means that a little of good quality lubricating oil should be used once in a while.

Don't spill oil into the crevices of the magneto. The windings are insulated with cotton and this vegetable fiber is not proof against the wiles of the lubricant.

Don't empty the gasoline tank and then go around it with a lighted match or candle—there will be enough vapor left in the tank to teach you a lesson.

Don't drill holes in the frame to attach foibles—if the designer thought that the frame members were too liberal in size he would have saved a little on the cost of tubing.



Don't wait for a "spill" before adjusting the brakes—you may not be able to adjust them when it is all over.

Don't skimp on the amount of lubricating oil the manufacturer specifies in his instruction book—remember oil is cheaper than parts and railroad fare.

Dayton Police Add More Machines.

Four more motorcycles will be installed soon by the Dayton (O.) Police Department, making six machines in use for police work. The machines are in service 24 hours a day, being used by three relays of men, each on eight hour shifts. The finance committee of the common council has voted to recommend a bond issue of $1,400 to purchase the machines, as a measure to increase the police efficiency.

SAVANNAH (GA.) HEADQUARTERS FOR THE THOR.

Traveler Tormey, of the Thor sales force, says: "There sure is some motorcycle business in Savannah or it would not warrant a motorcycle establishment like this."

"That Brake" is a Corbin

Flint, Michigan.

MR. L. SMITH, Indian Agent,
Flint, Michigan.

Dear Sir:--As per your inquiry concerning the machine and equipment bought of you last year will say I have not had the least bit of trouble of any kind, with the exception of punctures, and the machine is in A No.1 shape at present.

About that brake--say, it certainly is a dandy. I can stop at any old time or place and feel perfectly safe all the time.

I have ridden 4,476 miles, according to the cyclometer.

With best wishes, I remain,
Yours truly,
(Signed) CLARENCE MANIES.

NEW YORK, MAY 20, 1911.

Cash Prizes and the Amateur.

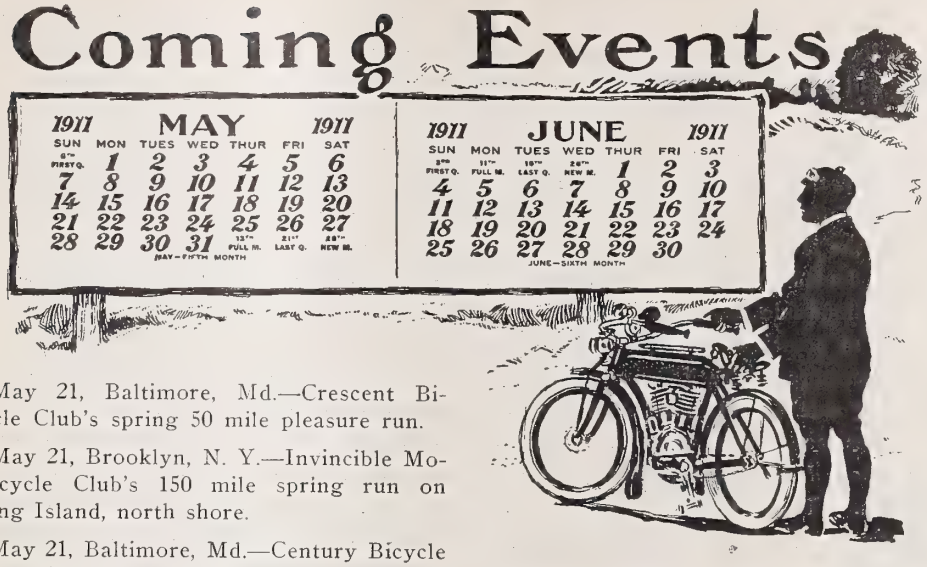
In many localities, particularly in some parts of the South and West, there is an entire disregard of the sport-governing rule that amateurs must not race for cash prizes, and that by doing so they become professionals, ineligibe to race against bona-fide amateurs. This disregard is no studied outlawry or defiance of the conventions, but comes of a lack of knowledge of the rule or a lack of appreciation of the reasonable necessity for its enforcement.

Having practically no relations with riders in other cities, motorcyclists and cyclists in not a few districts can see absolutely no harm in racing for cash prizes, and they no more consider themselves professional riders by doing so than they would regard themselves professional billiard players because they occasionally bet on their skill in that game. As a matter of fact, there may no harm come to them because of their racing for cash, but should any of them visit other places where racing is carried on actively and where the rules governing the sport are properly recognized, they will be at a great disadvantage. They will find that the rules place them in the professional class as cash chasers, and that unless they make racing an actual profession they have no chance in competition whatever, as they will be pitted against the fastest men in the world. They will be denied the opportunity to compete against bona-fide amateurs who have been careful to preserve their amateur status.

Furthermore, there is another and far reaching side to this matter of observing the rules concerning cash prizes as distinguished from merchandise prizes and trophies. The Federation of American Motorcyclists, which governs all competition in the United States wherein motorcyclists are the competitors, has affiliations with the Amateur Athletic Union and other bodies governing various kinds of sport both here and abroad, and if a rider becomes a professional under the rules of the Federation of American Motorcyclists he also becomes a professional to the other bodies with which the Federation is in alliance. Because of this, a motorcyclist's participation in even one race in which he competed for a cash prize, might debar him from taking part in an amateur Marathon run, golf tournament, tennis match, baseball or football game, boxing bout, skating race, fencing match, polo game, basketball game, wrestling match, or other amateur athletic contest. The same thing holds true for cyclists, who are answerable to the National Cycling Association.

The rule about cash prizes making the competitors professionals is not peculiar to the Federation of American Motorcyclists and the National Cycling Association, but is the general rule enforced by all the chief sport-governing bodies. To compete for cash in one sport is to become a professional in all, under the rules.

Where communities do not come in contact with the professionals who make competitive sport their business and who depend on cash prizes for their livelihood to a greater or less extent, there is apt to be a feeling that in declaring that everyone who competes for cash is a professional, the sport-governing bodies are guilty of an unwarranted intrusion and meddling, quite beyond their rights or authority. This feeling, however, is rapidly dissipated when the situation is viewed broadly, and those who engage in sport purely for sport's sake are glad to call on the sport-governing bodies for protection and rigid enforcement of the rule when real professionals begin to dominate and monopolize their competitions.



"Twenty dollars in gold" sounds attractive as the prize in a motorcycle or bicycle race intended for real amateurs, but it is a blunder on the part of the promoters that the riders should beware of.

Will Wonders Never Cease!

A way has been found to have motorcycle trade riders and professionals race against each other without the trade riders becoming professional. Like the art of printing, it is a Guttenberg discovery. There long has been the expressed wish on the part of the motorcycle fans to see what the star trade riders could do on the track against the star professionals, and the promoters at Guttenberg, N. J., have devised a happy scheme whereby this is brought about—without affecting the status of the trade riders. In its first presentation, the scheme takes the form of staging a half-hour race for professionals and a half-hour race for trade riders on the same track at the same time, but with the two classes of riders "to be checked up separately." Strangely enough, the chairman of the competition committee of the Federation of American Motorcyclists has been persuaded of the legitimacy of such a race, it being represented to him as a measure adopted chiefly "to save time."

As an ingenious evasion of the F. A. M. rules separating the amateurs from the professionals, the scheme is a crackerjack, particularly as its originators are able "to get away with it." The real feature of track racing from the spectators' standpoint is not the checking up of winners in separate classes, but the actual hammer-and-tongs competitive riding on the track, while the race is on. That is what they they pay their money to see and is what the promoters aim to provide, as otherwise most people would be quite content to get the results by mail instead of going out to the track to see them put up on the score board. With the fast trade riders on the track with the professionals, the speed battle between men of the two classes will be a merry one. While each class will have its own set of prizes, the race will nevertheless be an exhibition and competition of speed rivalry between trade riders and professionals, a rare sight for the fans. It takes brains to be a promoter these days!

Coming Events

May 21, Baltimore, Md.—Crescent Bicycle Club's spring 50 mile pleasure run.

May 21, Brooklyn, N. Y.—Invincible Motorcycle Club's 150 mile spring run on Long Island, north shore.

May 21, Baltimore, Md.—Century Bicycle Club's 50 mile run to Reisterstown.

May 21-22, Seattle, Wash.—Two day endurance contest of the Seattle Motorcycle Club to Vancouver, B. C., and return.

May 24, Toronto, Canada—Toronto Motorcycle Club's endurance run to London and return, 256 miles; open.

May 25, Zanesville, O.—Motorcycle races at fair grounds.

May 27, Denver, Colo.—Motorcycle races at White City track.

May 27, Pittsburg, Pa.—One-hundred-mile endurance race of the Pittsburg Motorcycle Club at Schenley Oval; open.

May 27, Akron, O.—Motorcycle races; open.

May 28, New York City—Century Road Club Association's 30 mile handicap road race, Floral Park, L. I.; open. Rain date, June 4.

May 28-29-30, Cleveland, O.—Three day endurance run of Cleveland Motorcycle Club.

May 28, 29, 30, Chicago, Ill.—North Shore Motorcycling Club's race meet at Hawthorne track.

May 28 and 30, Terre Haute, Ind.—Terre Haute Motorcycle Club's race meet; open.

May 29, 30 and 31, Hartford, Conn.—Motorcycle races at Charter Oak Park.

May 29-30, Newark, N. J.—Twenty-four hour endurance run of the New Jersey Motorcycle Club to Atlantic City and return.

May 30, Rockford, Ill.—Rockford Motorcycle Club's race meet at the driving park.

May 30, Bridgeport, Conn.—Bridgeport Motorcycle Club's race meet.

May 30, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

May 30, Detroit, Mich.—Racemeet of the Motorcycle Club of Detroit Wheelmen at State Fair track.

May 30, Norwich, Conn.—Norwich Motorcycle Club's reliability run.

May 30, Peoria, Ill.—Peoria Motorcycle Club race meet at Peoria mile track.

May 30, Springfield, Mass.—Motorcycle race meet of the Springfield Motorcycle Club, at the Springfield Stadium.

May 30, Elmira, N. Y.—Elmira Motorcycle Club's first summer race meet.

May 30, Newport News, Va.—Peninsula Motorcycle Club's endurance run to Richmond and return.

May 30, Long Branch, N. J.—Long Branch Cycle Club's second annual road race meet; open.

May 30, Asbury Park, N. J.—Twenty-five mile road race of the Monmouth Cycle Club.

May 30, Plainfield, N. J.—Third annual 25 mile handicap cycle race of the Plainfield Cycling Club.

May 30, Grand Rapids, Mich.—Bicycle and motorcycle races at Michigan State Field Day, under auspices of the Western Michigan Cycle Club.

May 30, Rome, N. Y.—Rome Motorcycle Club's 250 mile endurance run.

May 30, Wheeling, W. Va.—Ten mile bicycle road race; open.

May 30, Boise, Ida.—Boise Motorcycle Club's road races.

May 30, Salt Lake City, Utah.—Eighteen mile bicycle road race.

May 30, Elgin, Ill.—Elgin Motorcycle Club's race meet at Wing Park.

May 30, Rockford, Ill.—Ideal Motorcycle Club's race meet at the driving park.

June 4, New York City—Concourse Motorcycle Club's fourth annual run to Savin Rock, Conn., and return; open.

June 4, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Greenfield, Springfield and return; 175 miles. Second section.

June 10, New Haven, Conn.—Motorcycle hill climb on Shingle Hill in West Haven.

June 18, Baltimore, Md.—Crescent Bicycle Club's annual spring road race.

June 18, Floral Park, L. I.—Century Road Club of America, New York State Division, 50 mile handicap bicycle road race; open.

June 30, Douglas, Isle of Man, Great Britain—First junior international Tourist Trophy race; 187½ miles.

July 1, Waterloo, Ont.—Dominion cycle race championships.

July 3, Douglas, Isle of Man, Great Britain—Fifth senior international Tourist Trophy race; 187½ miles.

July 3-9, Rockford, Ill.—Racing carnival of the Illinois-Iowa Motorcycle Association.

July 4, Jacksonville, Fla.—Jacksonville Motorcycle Club's race meet.

July 4, La Salle, Ill.—Third annual open motorcycle race meet of the Illinois Valley Motorcycle Club.

July 4, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

July 4, Savannah, Ga.—Savannah Motorcycle Club's race meet.

July 4, Asbury Park, N. J.– Opening motorcycle meet at the Asbury Park track.

July 4, Grand Rapids, Mich.—Annual open bicycle road race of the Western Michigan Cycle Club.

July 10-15, Buffalo, N. Y.—Annual national convention and national championship race meet of the Federation of American Motorcyclists.

July 15, Rochester, N. Y.—Rochester Motorcycle Club's race meet at Crittenden Park.

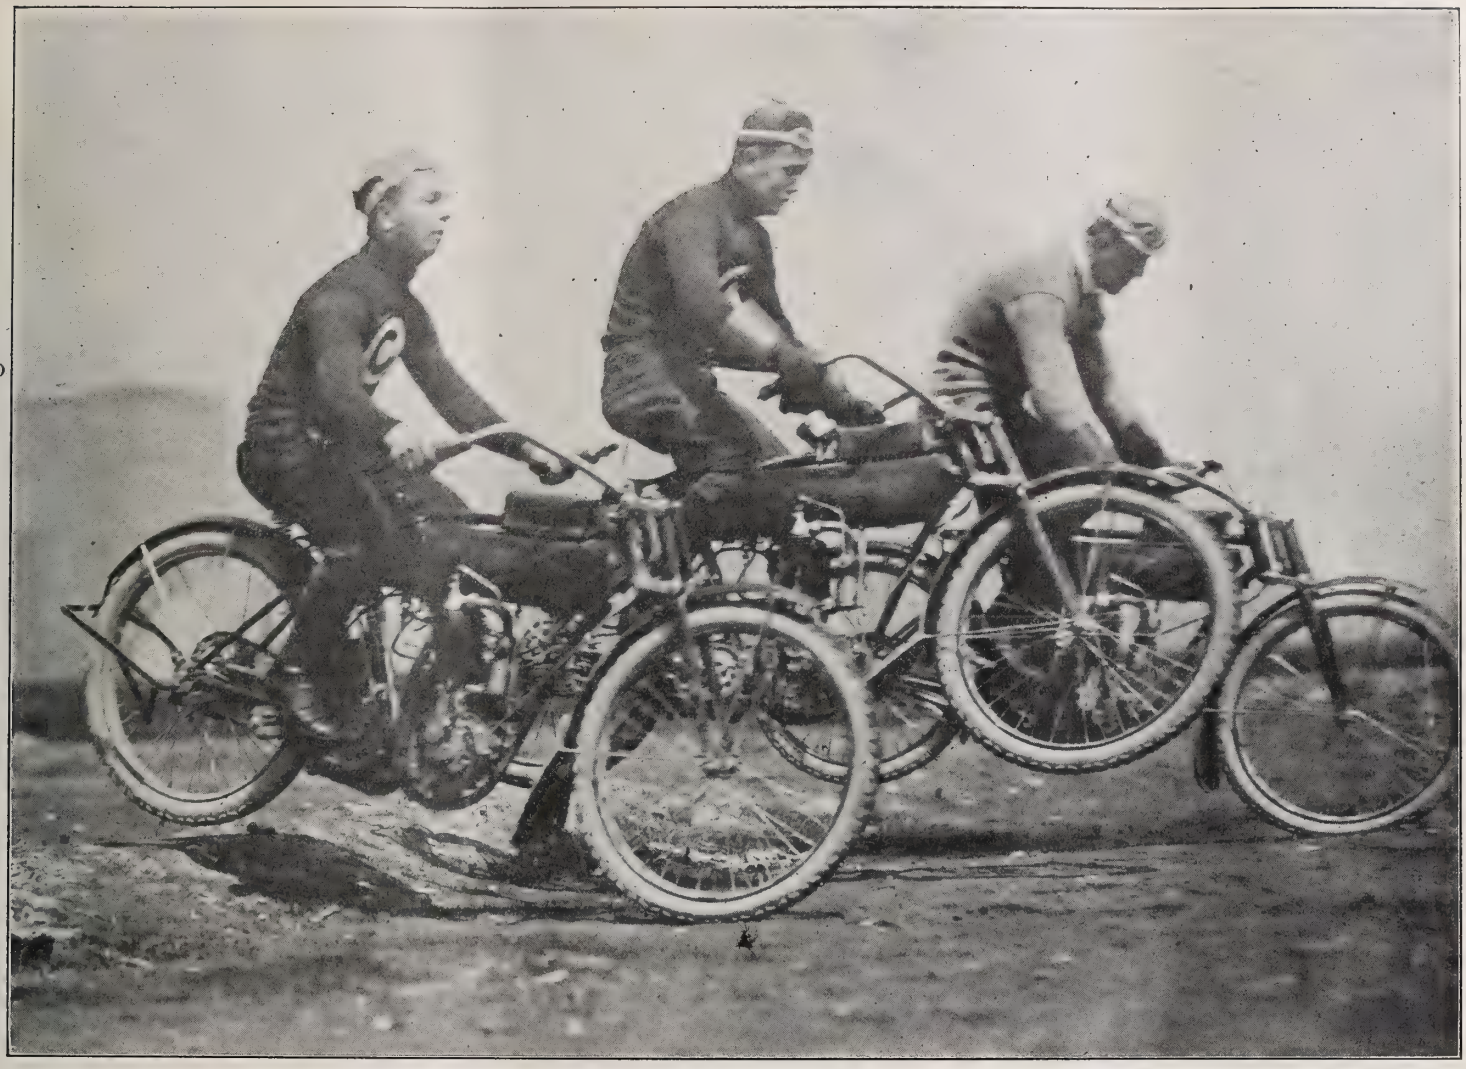
July 16, New York City—Motorcycle Touring Club of New York's second cup trio-trial, Newburg and return, 150 miles; open.

July 18-21, Alliance, Ohio—Motorcycle races at Rockhill track.

August 1-2-3-4, Atlantic City, N. J.—Summer meeting of the Cycle Parts and Accessories Association and the National Association of Cycle Jobbers.

August 6, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Rockport and return; 200 miles.

August 20, Grand Rapids, Mich.—Annual open, six hour, two man bicycle team race of the Western Michigan Cycle Club.



September 10, New York City—Century Road Club Association's 100 miles record run; open. Rain date, September 17.

September 17, New York City—Motorcycle Touring Club of New York's third cup trio-trial, Newburg and return, 150 miles; open.

September 24, New York City—Century Road Club of America 100 mile bicycle record run, open, from Floral Park, L. I.; rain date, October 1.

October 1, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Springfield, Boston and return; 200 miles.

Rough Riders Taking the Hurdles

This remarkable photograph shows three members of the Chicago Athletic Association's motorcycle team in a sportive "rough riding" caper. They are E. W. Matthews, who with the only perfect score won the recent semi-annual reliability run of the Chicago Motorcycle Club, C. A. Leander and H. T. Roberts. It will be seen that each machine has one wheel high from the ground.

All Ready for Springfield's Big Meet.

What undoubtedly will be one of the classiest fields of cash chasing motorcycle racers that ever has come to the line in this country will start in the professional events at the Memorial Day meet of the Springfield (Mass.) Motorcycle Club on the Springfield Stadium. Those already entered are James Baxter, of Scotland, with a fast Rex; L. H. Guterman, New York, R-S; A. G. Chapple and Arthur Mitchel, Merkel, and the "three Charlies"—Balke, Spencer and Gustafson—on Indians. The latter two, who created the 24 hour amateur record and who still are in the amateur class, will turn professional at this meet. When this field gets away in the 50 mile race the vicinity of the track will be no place for folks with weak hearts, for every one of the riders can be looked to to go the limit of the track in speed. Danger of accidents through overcrowding will be avoided by limiting the starters to three at a time in all events. It is expected that the 15 mile belt drive handicap will bring out a large field and settle the question as to the fastest belt machine in New England. Handicapping will be on a horsepower basis. To give eleventh hour prospects a chance to get in, the closing of entries has been extended from the 20th to the 24th. The club warns outsiders who plan to attend the meet to secure their tickets at once, as at the present rate of sale the stands are likely to be sold out on the day of the race. Large blocks of tickets are being taken by the clubs in the New England States, as well as by groups of Springfield citizens.

Hartford to Have May 30 Races.

Motorcycle races are in prospect as a feature of the sports carnival to be held at Charter Oak Park, Hartford, Conn., on the 29th, 30th and 31st inst. The meet will be conducted by the Connecticut Fair Association, and L. H. Butterfield will act as manager.

Chicago's Three Day Speedfest Plans.

Nearly $700 worth of prizes will be hung up for the three day race meet of the North Shore Motorcycling Club of Chicago, at Hawthorne track, on the 28th, 29th and 30th inst. There are 27 races on the program, and prizes will be awarded in every event save the two time trials. Monday, the 29th, and the second day of the meet, will be known as blue ribbon day, as the prizes will consist of blue ribbons and no entry fee will be charged. Memorial Day, when the best racing of the meet will occur, will be championship day, and the star event will be the five mile national championship. Events for "stripped stock" and "fully equipped stock machines" also are specifically provided for. Entries close on the 25th inst., with Charles McCabe, 732 Sheridan Road, Chicago.

Jacob DeRosier sailed for England on the steamship Campania on Wednesday, 17th inst.

CRUSHING OUTLAWRY IN DENVER

Chairman Thornley Sustains Tuileries Management in Regard to Sanctions—Rival Tracks Effect Truce.

Threats of an outlaw track and the conducting of outlaw motorcycle meet at Denver, Col., by parties who attempted to dictate to the F. A. M. as to how racing would be conducted in that city, have led Chairman Thornley, of the F. A. M. competition committee, to issue a statement disclosing his dealings with the promoters in Denver who wish to conduct motorcycle meets. While one promoter indicates a willingness to comply with the requirements of the chairman, the other amusement purveyor was disposed to carry a chip on his shoulder, and when it was knocked off speedily by the chairman, Mr. Chip Toter threatened dire things.

The turning on of the light also benefits riders who go in for racing, for they now will have no excuse for pleading ignorance if they find themselves suspended for competing at an outlaw meet. The statement follows:

"In order that the Denver racing situation may be quite clear to the members of the F. A. M., and to motorcycle riders all over the country who are not F. A. M. members, but whom we hope to gather into the fold some day, I take this opportunity to inform them on the state of affairs existing at this time. Last winter there were two applicants for sanctions for motorcycle races to be held in Denver this season. One of the applicants was Mr. Gilpatrick, owner of Tuileries Park, and the other was Mr. Burt, manager of the White City Amusement Park. A duplicate proposition was made to both of these gentlemen by me, the White City people being given the preference because of their statement that they proposed to build a board track.

"My proposition to them was as follows: That they should apply for sanction for specific and individual days throughout the season; that they should pay in advance 25 per cent. of the total amount due for sanctions at the rate of $5 per sanction, whereupon all dates applied for would be reserved, and no sanctions would be granted on the dates reserved to any other party within a radius of ten miles. Thereafter they were to apply for sanctions one at a time, and making payment of $5 with each application, and no sanctions were to be granted after the first one issued, until the referee's report of each preceding race had been filed, certifying that all prizes due at that meet had been delivered. After the total amount of sanction fees for the dates applied for had been paid there would remain 25 per cent. of the dates unused for which sanctions would be issued without further charge, upon the filing of the referee's report stating that the prizes for the previous race had been delivered.

"This proposition was turned down by the White City people. It was said that they had abandoned their intention to put up a board track, and it was intimated that they wanted a blanket sanction for a number of years for a small yearly fee before they could see their way clear to putting up a board track.

"Mr. Gilpatrick then promptly accepted my proposition that the White City people had declined, and he deposited $50 on account for 40 sanctions, applying for practically every Saturday, Sunday and holiday throughout the season. As this seemed to be the only chance for organized racing in Denver under proper supervision this year, the F. A. M. entered into the proposed agreement with Mr. Gilpatrick. He also expressed the intention of putting up a board track next year should conditions warrant it.

"Immediately upon the running of the first motorcycle race meet at the Tuileries track this year, it was such a financial success that a promoter saw his way clear to put up a track for the White City Amusement Park, and applied to me for sanction on the original proposition. It was manifestly impossible for me to grant a sanction to anyone else within a radius of ten miles of the Tuileries and keep the word of the F. A. M. Neither do I propose to split hairs upon the exact distance, whether it is one mile or 50 yards over ten miles away.

"I informed everyone in Denver who wrote me on the subject that I would prefer to go down in defeat in keeping my word than to succeed by breaking it. Nevertheless the White City people proceeded to start their track, I am credibly informed, also stating that they would run outlaw races, sanction or no sanction.

"It gives me great pleasure to announce that following my statement that I would stand by our agreement with Mr. Gilpatrick, not dreaming for an instant that he would think it desirable to put up a board track, I was pleasantly surprised and gratified to receive word through my representative in Denver that Mr. Gilpatrick would immediately put up a board track, three laps to the mile, circular and properly banked. This, therefore, is the situation in Denver now. Mr. Gilpatrick has F. A. M. sanction, and has promised to put up a track which ought to be the best of its kind in the country. The White City outlaw track, I am informed, will be a four lap affair.

"I also have received word which would lead me to believe that this proposed White City track will be largely in part, if not in whole, the old Los Angeles Coliseum transplanted bodily. If Mr. Gilpatrick erects his track as proposed. I shall endeavor to see that a number of championship races are run on it. Any man who competes in an outlaw meet will not be allowed to enter in championship races under any condition as long as I am chairman. I certainly trust that we will have the support of all F. A. M. members, and the public, for not allowing ourselves to be dragged into sanctioning a scheme which is purely a money making proposition, by violating our agreement, which we should keep, win or lose, if we wish the respect of true sportsmen."

Through generosity on the part of the Tuileries Park track management it practically is settled that there will be no outlaw motorcycle racing in Denver, Colo., this season. Although they had the exclusive right to run sanctioned race meets in Denver, the Tuileries people agreed not to oppose the granting of sanctions to the White City Amusement management for weekday meets other than holidays. Accordingly a sanction has been granted for races at the White City track on Saturday, 27th inst. The Tuileries Park management has reserved for its own meets all Sundays and holidays throughout the season. Racing at the Tuileries Park commences on Sunday, 21st inst., on the new three-lap board saucer. The track is banked to 47 degrees and is expected to develop some fast travel.

SOUTHAMPTON RUN MEDALS.

Survivors of the recent spring run of the New York Motorcycle Club, to Southampton, L. I., and return, are to receive fobs of the design shown. The fobs will be ready in about two weeks, a new die being necessary for the medal.

BALKE RIDES RINGS AROUND EASTERNERS

Guttenberg Race Meet Gives Western Whirlwind Two Easy Victories—Constant and Hart Score in the Trade Rider Events—New Indian Racing Machine Disclosed.

Shooting up the center of the stretches as straight as a die and as swift as a rocket, Charles "Fearless" Balke, the California "dark horse," who was imported specially for the occasion, swept everything before him in the professional events at the opening motorcycle meet of the season at Guttenberg, N. J., Sunday, 14th inst. Straddling one of the Indian racers, labeled "No. 27," Balke simply ran away from A. G. Chapple, of the Merkel forces, who was expected to make things interesting for the Angeleno. Balke met Chapple twice, and the more he met him the harder he licked him. That in a nutshell tells the story of the professional events.

Among the trade riders, John Constant and Frank Hart, on Indians, cleaned up Will Teubner and W. H. Wray, of the Merkel contingent. Constant on a 5 horsepower machine did not have as much speed as Teubner's "7," but the handicap of 36 seconds was enough to give the Brooklynite first by 100 yards. Hart rode "No. 26," the new valve-in-the-head Indian, in the miss-and-out and played with Wray, who was the only other contestant that was in his class. Hart opened a big lead, then let Wray cut it down, and then increased it again, only to let Wray creep up again. Hart won with plenty to spare.

CHAPPLE, BALKE AND GUTERMAN AWAITING THE WORD

GENERAL VIEW OF THE STRETCH AT GUTTENBERG

Victories for the Indian contingent began with the three mile novice and were duplicated in every event thereafter. F. L. Vanderpoel won the novice after an exciting chase to catch J. A. Gaucher, Merkel, who started to run away in the first mile. Vanderpoel won by 75 feet, with Earl Eckel, Indian, second, and Gaucher third.

With practically no advertising save that accorded by the motorcycle trade press, and with a track most inaccessibly situated to New York City, the meet drew over 1,000 people, showing the possibilities if future affairs are well managed and well run. The track was very dusty, showing no traces of having been oiled, and the turns were dangerous, being studded with several holes and treacherous ruts.

In practice Balke was riding miles in 0:59 and 1:01, and fell twice on the turns. That made him a bit cautious and he came through the races without any mishaps. Balke and Guterman, on Indians, and Chapple, on a Merkel, were the starters in the five-mile open professional. Balke went in front at the getaway and once out of the turn set a fearful pace down the stretch. He drew away from the others in big jumps and, easing around the far turn again, looped it down the homestretch. This was his style of riding throughout and he increased his lead in every stretch, taking the turns easily. Chapple did not have the speed and lost ground in every lap. Balke won by a quarter mile, and Chapple beat Guterman by 10 yards.

Instead of a handicap, the 20-mile professional was changed to a scratch race with the same trio on the line. Again Balke took the lead, but Guterman closed in and they rode neck-and-neck for a time. Balke began to open a gap on the back stretch. Chapple was quite a way behind. At the end of the first mile Balke had a 50-yard lead, and at two miles he had 70 yards. Guterman was second and Chapple was the length of the stretch from Balke. Guterman went out at five miles with a puncture.

Balke gained steadily and speculation began as to when he would lap Chapple, and whether he would be put out by accident. Balke had half a lap on Chapple at 10

miles. At 14 miles Balke had Chapple in the stretch and let out a little more. He passed Chapple on the backstretch at 18½ miles and as Chapple's machine then slowed perceptibly Balke gained faster and won by 1¼ miles.

Frank Hart started to make a runaway of the five-mile handicap for trade riders. He was succeeding famously until the second mile, when a puncture put him out. While he lasted he outran the field, but when he retired Will Teubner, Merkel, was the fastest. Mercier, Indian, tried to catch Teubner, but was shaken, and shortly after had a blowout. In the meantime, Teubner was devoting himself to trying to catch Constant, Indian, who was spinning around breezily. Teubner gained steadily, but five miles was too short to cut down the handicap, and Constant won easily. Percy Drummond, Indian, was third. Immediately after the race Referee Pitman gave Constant a lecture on looking back, and told him that

COMING FAST IN THE STRAIGHT

a repetition of the offense would mean disqualification.

Hart also got a similar warning for looking back in the miss-and-out. Will R. Pitman, who was one of the right hand men of Colonel Albert A. Pope in the bicycle days, refereed his first motorcycle meet. He was unknown to most of the motorcyclists, but those who infringed the rules soon found that he meant business. Before the meet he gave the riders a heart-to-heart talk, and told them that he intended to give every one a square deal, but that he was going to enforce the rules at all costs. In the past, refereeing has been so loose at Guttenberg that the new order of things came in the nature of a surprise to the riders, and at first it was difficult for them to realize that Pitman meant what he said.

PART OF THE BLEACHER CROWD

START OF THE TEN MILE RACE FOR TRADE RIDERS

There was considerable interest manifested in the new Indian twin, in which all valves are over the pistons and are operated by overhead rockers. It is known as "No. 26," and is a radical departure in valve design from Indian standard practice. Another innovation on it was the stamping of the cylinder dimensions on the crank case. The bore is 3¼ and the stroke 3 5-32 inches, respectively, giving a displacement of 52.36 cubic inches, which is the equivalent of about 6 horsepower. It was said by the Merkel riders that the Merkel racing machines would be ready by Memorial Day.

SMILING IS EASY FOR BALKE

Quite a delegation came down from Springfield for the races, but of the visitors, only one, Charles Spencer, preferred a motorcycle to railroad cushions. Riding a "7" Indian with two-speed he left home at 5 a. m. and covered the 149 miles to New York in 4½ hours. Not satisfied with this little stunt he rode back after the races, making the 300-mile round trip in less than 12 hours. In addition to the dozen or more cameras at the track a moving picture machine was in operation. Jake DeRosier looked after the Indian forces, but did no riding himself. Summary:

Three mile novice, 61 cubic inches—Won by F. L. Vanderpoel, 7 Indian; second, E. S. Eckel, 5 Indian; third, J. A. Gaucher, 7 Merkel. Time, 3:47⅕.

Five mile handicap, trade riders, 61 cubic inches—Won by J. U. Constant, 5 Indian (12 seconds); second, W. J. Teubner, 7 Merkel (scratch); third, Percy Drummond, 5 Indian (12 seconds). Time, 5:26:

Five miles free-for-all, professional—Won by Charles Balke, 7 Indian; second, A. G. Chapple, 7 Merkel; third, L. H. Guterman, 7 Indian. Time, 5:14⅘.

Ten miles miss-and-out, trade riders, 61 cubic inches—Won by Frank Hart, 7 Indian; second, W .H. Wray, 7 Merkel. Time, 11:02⅘.

Twenty miles free-for-all, professional—Won by Charles Balke, 7 Indian; second, A. G. Chapple, 7 Merkel. Time, 20:54.

Chicago Catholics to Organize.

Aiming to organize a motorcycle corps of Catholic motorcyclists of Chicago, which is to be affiliated with the National Catholic Athletic Association of that city, officials of the organization have issued a call to Catholic motorcyclists for a meeting at the Great Northern Hotel on the 24th inst., to discuss the proposition. According to the sponsors of the plan, they can enlist over 200 riders in such a corps.

Peoria to Hold a Meet.

Peoria, Ill., is not behindhand in the matter of a motorcycle race meet on Decoration Day. The Peoria Motorcycle Club has carded a good program at the Peoria mile track.

IN FRONT OF THE SOLDIERS AND SAILORS' MONUMENT IN INDIANAPOLIS.

The gathering is that of riders taking part in the annual Indian run given by G. H. Westing, the Indian agent in Indianapolis. The picture was taken just before the start to Spring Lake Park, which this year was the objective point.

Detroit Decides to Build Motordrome.

Detroit really is to have a board motordrome for motorcycle racing, according to present indications, as the Detroit Motorcycle Club's members have ratified a five year lease of the Shippacasse property on Kercheval and Alter roads. A board has been appointed to go through with plans for a stock company and the building of the track, and the organization of the stock company was completed on Monday, 15th inst. The board consists of William Wandersee, Fred Kitcherer, R. M. Hunter, A. M. Carter and A. F. Gregor. Hunter was chosen president, Wandersee vice-president and Gregor the secretary and treasurer.

The Detroit Motordrome Co. is the name selected for the company, which is to be capitalized at $10,000, with 1,000 shares at $10 apiece. Most of the stock is already spoken for, and the balance will be sold by the secretary. The track is to be constructed by Jack Prince, the veteran track builder, and it is expected that it will be ready for racing by the Fourth of July. It will be three laps to the mile. The grandstand is to have a capacity of 6,500 people. The property is considered an ideal location for a motordrome, as it is only three blocks from Jefferson avenue and can be reached by a five cent fare. The plot contains nine acres.

Dual Event for Guttenberg's Card.

Although the F. A. M. competition rules forbid it, professionals and trade riders will ride against each other in the half hour race at Guttenberg, N. J., Sunday, 21st inst. In this case, however, it is stated that there will be no violation of the rules, as there will be separate prizes for each class and each will be checked individually. In other words, it will be a double header to save time. A sanction has been given under these conditions. Other numbers on the bill that promise well are a 20 mile open for trade riders, and miss-and-out races for professionals and trade riders.

Five Meets for Oshkosh.

The Oshkosh Motorcycle Club, of Oshkosh, Wis., is preparing to hold a series of five race meets during the summer, on the half mile track at the Oshkosh Driving Park. The first meet will probably be held the latter part of May. H. H. Schrottky has offered a cup, which must be won three times in succession.

Pittsburgers to Put On 100 Mile Race.

Motorcycle racing will hold the boards, or rather the dirt, in Pittsburg, Pa., on Saturday, 27th inst., when the Pittsburg Motorcycle Club will stage a 100-mile race at Schenley Oval. The time limit is 2½ hours, with an additional prize to the winner if he finishes inside this time. The regular award is a silver cup to the winner, and silver and bronze medals to the second and third men. It is asserted that the cup will be the handsomest ever awarded for an athletic event in Western Pennsylvania. As an additional incentive to the riders to keep their throttles wide open A. G. Schmidt has offered a gold medal to be awarded to the winner if he finishes inside the time limit. On the time allowance the winner will have to average at least 40 miles an hour. The morning of the 27th will be available for practice, and the race will start at 2 p. m. Sanction has been applied for, and Dr. W. A. McCrady will referee. Entry blanks have been distributed among the local dealers, and also are obtainable from E. B. Connell, 106 Whitfield street, Pittsburg. The race is the forerunner of more speed competition than Pittsburg has had heretofore.

SUNDAY RUNS ARE NOW IN STYLE

Enjoyable Outings of Clubs in Baltimore, San Jose, Cincinnati, South Bend, Racine, Philadelphia and Brooklyn.

The lure of the mountains was too much for the members of the Baltimore Motorcycle Club to resist on Sunday, 14th inst., so, headed by their faithful chief, Captain W. S. Fisher, the veteran motorcycle rider of Baltimore, they assembled at the entrance to Druid Hill Park, and with honk honk of horns and racket of exhaust, disappeared in the park, headed for Braddock Heights, on the apex of the Catoctin mountains, beyond Frederick. With Nature smiling and the trees radiant in their new spring dress, the back-to-nature movement tingled in their blood.

It was the club's last long run for this month, as Captain Fisher has decided that blind runs to nearby places will be in order, so that the members can get themselves and their machines in condition for the big races under the auspices of the Maryland Motorcycle Club at Electric Park on May 30. Duke Richardson, who has charge of the tours and long runs of the Baltimore Motorcycle Club is busy mapping out a long distance program, which will probably extend to Buffalo to take in the annual meet of the F. A. M.

The Maryland Motorcycle Club held a blind run last Sunday, with Westminster as the destination. The club has already visited this season all of the accessible points in the vicinity of Baltimore.

In the run to Westminster, Captain Samuel Congdon, Dick Gintling and Secretary Fred Wilkins were the first to reach the destination, making the distance of 29 miles in an hour and ten minutes, which is very good time considering the condition of the pike. The rest of the crowd came in by ones and twos, some having had punctures. A portion of the club went to Gettysburg.

Motorcyclists from San Jose, Santa Cruz and Watsonville, Cal., held joint runs to Gilroy on Sunday, 7th, and practically owned the city during their stay. The city authorities closed the roads so that the visitors could hold races, and afterward they were entertained with exhibitions of broncho busting by a local artist. At 11 a. m. the San Jose riders invaded the city, 50 strong, and were followed soon after by the Santa Cruz Club, with 30 riders. As the two bodies swept into the city they were given a hearty welcome by the citizens. Monterey road was closed to traffic and the motorcyclists put on their races, the local constable patroling the course, which was lined with an immense crowd, who came in motor cars, carriages, bicycles and on foot. C. Boyd won two of the events, and Emile Agraz, local Sheriff, and E. Reed tied in another. The fourth event, a tandem race, with several girls occupying respective tandem seats, was declared a tie between three machines. After the races the motorcyclists enjoyed a fine dinner, at which Sheriff Agraz acted as toastmaster. In the afternoon the visitors and the crowd gathered at Fellom's ranch, where broncho busting was part of the fun. It was late in the day when the visitors started for their homes, after voting the Gilroyers and the local authorities bully hosts. Several non-club members who participated in the outing had such a good time that they signed membership applications in the San Jose Club.

All in uniforms of dark khaki, with caps to match, 21 members of the Cincinnati Motorcycle Club, of Cincinnati, O., took part in the club's first run of the season on Sunday, 7th inst., to Foster's Crossing, which is about 20 miles out. Four of the machines carried lady passengers on tandem seats. When Foster's Crossing was reached the riders were the guests of the Bumiller-Remelin Co., one of Cincinnati's motorcycle agencies, at a fine chicken dinner. The excellent appearance of the club as a whole, resulting from all the riders being dressed alike in becoming uniforms, was the subject of considerable favorable comment.

Four of the nineteen starters in the club run of the South Bend (Ind.) Motorcycle Club to Kalamazoo, Mich., on the 7th inst., completed the 144 miles with perfect scores. They were the following: Charles B. Frank, Excelsior; Eugene Benz, Merkel; Harrison Weade, Excelsior; Chester Reynolds, Harley-Davidson. Checking stations were located at Decatur, Ind., and Kalamazoo. From South Bend to Decatur the roads were very bad, but beyond Decatur to Kalamazoo they were in fair shape, although quite dusty for the entire route. The actual riding time was seven hours, with an hour and a half for dinner at Kalamazoo.

Twelve members of the Racine (Wis.) Motorcycle Club held a run to Chicago and return on the 7th inst. President Newman was in command. The club now has 26 members and is growing steadily. Cross-country runs will be featured this summer.

Eighteen members of the Frankford Motorcycle Club, of Philadelphia, Pa., participated in a club run to Reading on the 7th inst. The distance was 136 miles round trip, and was made with no mishaps other than punctures. Dinner was enjoyed at Reading, and all arrived home before dark.

The M. M. Club, of Brooklyn, N. Y., held its first motorcycle spring run on Sunday, 7th inst., to Patchogue, L. I. Aside from one or two punctures, not a mishap occurred. The 16 riders had a good dinner at the hotel in Patchogue.

Concourse and Tourist Joint Run.

What may lead to the organization of a baseball league among the motorcycle clubs of New York and Brooklyn will have its institution on Sunday, 21st inst., when the Concourse and the Affiliated Motorcycle Touring clubs will hold a joint run to the vicinity of Mt. Kisco and play a game of baseball between picked teams representing the clubs. The losers will set up the dinners for the winners. The riders will start at 8 a. m. from J. C. Foley's garage, Jerome avenue and 165th street, Bronx.

LAKE GENEVA LURES MILWAUKEE MOTORCYCLISTS.

The Milwaukee Motorcycle Club held a run to Lake Geneva, Wis., on Sunday, 14th inst., the round trip being 125 miles. Threatening weather scared off many members. After the first 20 miles, the excursionists were drenched. The weather cleared, however, while they enjoyed a chicken dinner, and, after being photographed, they had a fine homeward trip.

KANSAN "CHAMPION" IS HUMBLED

Wilson and Weishaar Show Him Their Heels at Wichita—Divide All the Events Between Them.

Max Wilson, on a Harley-Davidson, and Ray Weishaar, Indian, two Wichita speed merchants, put some deep dents in the reputation of Paul Warner, of Ellsworth, who was touted as the "champion of Northern Kansas," in the motorcycle races at the Fair Grounds, Wichita, Kan., on the 6th inst. Both Wilson and Weishaar took Warner's measure every time he started, and between them they won everything. Rain spoiled the regular program, and kept several of the entrants away. Some of the races were run under weeping skies. Summary:

Five mile singles—Won by Max Wilson, Harley-Davidson; second, Ray Weishaar, Indian; third, Paul Warner, Indian. Time, 6:35⅘.

Three mile handicap, open—Won by Ray Reishaar, Indian; second, Paul Warner, Indian. Time, 3:46.

Unlimited pursuit—Won by Max Wilson, Harley-Davidson; second, Ray Weishaar, Indian. Distance, 8½ miles. Time, 12:03⅗.

One mile against time—Ray Weishaar, Indian. Time, 1:12.

Powers Had the Power at Jacksonville.

Frank Powers, riding a Merkel, was the star of the motorcycle events held in conjunction with the automobile meet at Jacksonville, Fla., on the 13th inst. Powers won two events, including the feature race, and took second in another. The other winners were F. Terry and A. A. Stoddard, also on Merkels. Close finishes marked the five mile handicap and the five mile private owner events and, on a whole, the motorcycle racing outclassed the automobile events. Summary:

Five mile private owners—Won by Frank Powers, Merkel; second, J. Yerkes, Thor. Time, 6:07⅗.

Five mile single cylinder, trade riders—Won by F. Terry, Merkel; second, Frank Powers, Merkel. Time, 7:09.

Five mile handicap—Won by A. A. Stoddard, Merkel (scratch); second, John Marsicano, Thor; third, Carl Torres, Thor. Time, 6:51.

Twenty mile handicap—Won by Frank Powers, Merkel. Time, 22:49⅕.

Nazareth a Hollenbeck Meet.

Of the half dozen or more Philadelphia motorcyclists who went out to Nazareth, Pa., on the 13th inst. to compete in the motorcycle events which formed part of the program at the automobile meet of the South Jersey Motor Club, only one, E. T. Hollenbeck, on a 4 horsepower Marvel, bagged any victories. When Hollenbeck quit riding he had won all three events and the others had to be content with "places." One thousand people were present and they made up in enthusiasm what they lacked in numbers. Summary:

Five mile handicap—Won by E. T. Hollenbeck, Marvel; second, William Stout, R-S.; third, H. Schilling, R-S. Time, 6:29⅘.

Five mile open—Won by E. T. Hollenbeck, Marvel; second, William Stout, R-S; third, Edward Kruck, Excelsior. Time, 7:15⅕.

Five mile open—Won by E. T. Hollenbeck, Marvel; second, William Stout, R-S; third, Edward Kruck, Excelsior. Time, 7:04⅕.

Endicott Constable Bags Three.

Inability of their machines to go as fast as those of their fellows was responsible for the arrest of three Binghamton (N. Y.) motorcyclists recently. The Broome County Motorcycle Club held a run to Elmira and on the way back the main party stopped to wait for one of the riders who had tire trouble. When the repair was made the party commenced to "loop it" to make up lost time and went through the village of Endicott "all out," much to the rage of the local constable, to whose admonitions the motorcyclists paid not the slightest attention. The constable was in a wrathy mood when he perceived three laggards of the party approaching, and when they were close upon him he hurled a fence rail in front of them, forcing them to dismount. Then he placed them under arrest for speeding and ordered them to appear for trial. When the motorcyclists appeared before the bar of "justice" they were accompanied by the club's attorney. The court decided to let the motorcyclists off with a warning. They were told, however, that the speed trap will be maintained and all motorists traveling over 15 miles an hour (by the constables' watches) will be taken in.

Runs Into the Wrong Motorcycle Crowd.

For driving on the wrong side of the road and running down two motorcyclists, H. B. Knox, an automobile driver of San Jose, Cal., was arrested by Motorcycle Officer Agraz on the 7th inst., and released on bonds to appear for trial. Members of the San Jose Motorcycle Club who witnessed the incident will appear against him. The occurrence took place during an outing of the club and Agraz happened to be in the party.

Climb Scheduled for Shingle Hill.

Three motorcycle events are included in the automobile hill climb that is scheduled for Shingle Hill, just outside New Haven, Conn., on June 10. The motorcycle classes will be 30½, 55 and 61 cubic inches, respectively. Entry blanks and all information can be had of James F. Cox, 508 State street, New Haven, Conn.

CINCINNATIANS RACE AT LATONIA

Motorcycle Events Form Part of a Two Day Motor Carnival—Ross Makes Two Easy Wins.

Togged out in blue overalls, Joseph Wanstradt, a youngster astride an Indian, was the pet of the large crowd that attended the two-day motor carnival of the Cincinnati (O.) Automobile Dealers at Latonia, Ky., on the 13th and 14th inst. Wanstradt won the last motorcycle race of the meet and was wildly acclaimed by the spectators. Olin Ross won two close and exciting races, and the other went to John Mast, Merkel. Summary:

Saturday, 13th.

Five mile open 30½ cubic inches—Won Olin Ross, Indian; second, Joseph Wanstradt, Indian; third, C. Swarm, Thor. Time, 6:16.

Ten mile handicap—Won by John Mast, Merkel; second, K. Hayes, R-S; third, R. W. Lucas, Indian. Time, 11:34⅖.

Sunday, 14th.

Ten mile open—Won by Olin Ross, Indian; second, Joseph Wanstradt, Indian; third, R. W. Lucas, Indian. Time, 11:37⅖.

Five mile handicap—Won by Joseph Wanstradt, Indian; second, R. W. Lucas, Indian; third, John Mast, Merkel. Time, 5:15⅗.

Mostly Torres in Tampa's Contests.

Falls and mechanical troubles had a lot to do with shaping the results at the race meet of the Tampa (Fla.) Motorcycle Club, at Tampa Bay track on Saturday, 6th inst. Those who managed to escape the trouble hoodoo furnished some exciting competition, and honors were fairly well scattered. The Torres brothers, Lewis, on a Thor, and Carl, on a Harley-Davidson, were the stars of the meet, bagging two firsts and two seconds in four starts. No times were taken. Summary:

Three mile open—Won by T. Johnson, Merkel; second, Carl Torres, Harley-Davidson; third, John Marsicano, Harley-Davidson.

Five mile open—Won by Carl Torres, Harley-Davidson; second, T. Johnson, Merkel; third, F. Weber, Indian.

Ten mile open—Won by Lewis Torres, Thor; second, Carl Torres, Harley-Davidson; third, F. Weber, Indian.

Five mile consolation—Won by John Marsicano, Harley-Davidson; second, F. Weber, Indian; third, L. Brown, Harley-Davidson.

The Rochester Motorcycle Club of Rochester, N. Y., has changed its quarters. It has moved from 214 Central building to Rooms 19 and 20 Palace Hall, corner of Plymouth avenue and Main street, W.

SUNSHINE MAKING MORE CLUBS

Motorcyclists Getting Together in Every Section of the Country—Affiliations with F. A. M. Continue.

New clubs continue to spring up like mushrooms in all sections. The following are mixing club batter in their respective cities: L. C. Hansen, Greenleaf, Kan.; S. A. Hokanson, Middleboro, Mass.; D. W. Voorhis, Pompton Plains, N. J.; W. P. Gains, Triplett, Mo.; George G. Gilbert, St. John, N. B.

Danville, Ill., now has a motorcycle club, thanks largely to the efforts of L. C. Stumme, who has been doing preliminary work along that line for some time. He issued a call to riders on the 20th ult., and launched the club with 22 members. The officers are: B. L. Howell, president; Chas. Alexander, vice-president; L. C. Stumme, secretary and treasurer; Lovell Gillespie, captain; Howard Smith, first lieutenant; Albert Dill, second lieutenant; directors-at-large, P. H. Learn and E. P. Beckelhymer. As soon as it "clinches" a few more desirable prospects, which will raise the membership to about 30, the club will affiliate and thus be one of the first to qualify for an "Old Sol" lamp and generator.

Chairman Estabrook, of the F. A. M. membership committee, reports the following clubs affiliated during the last week: The Motorcycle Club of the Detroit (Mich.) Wheelmen, No. 117, 24 men; Johnstown (Pa.) Motorcycle Club, No. 120, 34 men; Williamsport (Pa.) Motorcycle Club, No. 121, 16 men; Newark (O.) Motorcycle Club, No. 122, 29 men. George M. Norton, of Meadville, Pa., is working on a new club, and Harley-Davidson clans are being formed by the local agents in Washington and Marietta, Ohio. The latter will become 100 per cent. F. A. M. Officers have been elected by the newly organized Mobile (Ala.) Motorcycle Club as follows: Zack Agee, secretary; I. Rubel, treasurer; F. R. Peterson, captain; Claude Johnson, first lieutenant; Rug. Morse, second lieutenant. A special meeting will be held to act upon the matter of affiliation, as the leading spirits in the club wish to make it 100 per cent. F. A. M. There already is plenty of work for the club in its own garden, for the county is planning to tax motorcyclists $3 for a license, and the city already is collecting $2 on the same account. There are rumors that the club soon will be heard from vigorously in protest. In the first ten days of the month, nine clubs affiliated, bringing in 192 members.

Preliminary plans for a motorcycle club in Joliet, Ill., were laid on the 9th inst., when 17 motorcyclists responded to a call and signed a charter list of what will be known as the Joliet Motorcycle Club. C. W. Winkler was chosen temporary chairman and H. F. Stoll, temporary secretary. Committees were appointed to draft a constitution and by-laws, and to secure suitable quarters. Officers will be elected soon.

The motorcycle owners of Great Falls, Mont., are contemplating the formation of a local club. Clarence Mar and H. R. Noble are the leaders in the movement, and they have asked all owners of motorcycles to gather and take up the matter of forming an organization. They propose that the club shall have charge of runs to other points on holidays and Sundays, and also promote a spirit of good fellowship among the motorcyclists.

San Antonio's Liberal Intentions.

Free admission is the bait which the San Antonio (Tex.) Motorcycle Club holds out to secure a big crowd at the 200-mile track race which it proposes to run soon. The race will take place on the Fair Grounds track, but the date has not yet been fixed. The prize committee has secured several good prizes and a big entry is expected. Two other important matters were acted on at the club's last meeting. It was voted that the club affiliate with the F. A. M., and President Huter was given power to act in the matter. It also was voted to draw on the club treasury to defray one-half the expenses of any member who is disabled or injured while riding a motorcycle. This latter action is expected to make a strong appeal to non-members and to bring many new riders into the club.

Elmira Organization Incorporates.

Incorporation papers of the Elmira (N. Y.) Motorcycle Club have been filed with the County Clerk. Among the objects stated are to increase interest in motorcycling in Elmira and vicinity and to establish suitable grounds for a track and club house, for conducting motorcycle race meets and exhibitions. Nine directors, each to be chosen for one year, are provided for. The board of directors for the first year is composed of the following: George H. Carrier, Burton Forsythe, Frederick S. Ellett, P. B. Rutan, Charles Teasdale, Arthur Holley, Leon Peters, Victor Campbell and Louis F. Longwell.

MONEY WELL SPENT.

"Here is a dime, boy. Just stoop down and take a look at the window of the oil reservoir for me."

NO NATIONAL ENDURANCE RUN

F. A. M. Directors Decide to Drop It This Year—Two Big Tours Are to be Provided, Instead.

After making a canvass of the motorcycle manufacturers to learn their sentiments in the matter, President Willis, of the Federation of American Motorcyclists, announced this week that there will be no national endurance run this year. It will be the first year in the history of the F. A. M. that the annual endurance run has been omitted. Instead of the endurance run a double header tour will be held, with sections starting from New York and Chicago simultaneously and meeting at Buffalo where the meet will be held.

In addition to a majority of the manufacturers expressing themselves as being in favor of a tour in preference to the endurance run, the board of directors of the F. A. M. also placed themselves on record as in favor of a tour. President Willis, while regretting that the endurance run will not be held, expressed the opinion that the manufacturers, as past supporters of the endurance runs, should have a voice as to its continuance or abandonment this year, and that his decision was based on the wishes of the majority. President Willis himself, together with some of the manufacturers, was in favor of holding both the endurance run and the tours, but the board thought that the handling of both would be too large a task.

Dates for the starting of the tours will be announced later. No penalties will be assessed or prizes given on the tours, and they will be go-as-you-please affairs with a definite night stop for each day. An official route for both tours will be laid out and followed, and it is planned to have motorcyclists and clubs removed from the starting points pick up the tours at convenient cities along the route. In this way the tours will be swelled at each large city, and when they reach Buffalo will be of immense proportions, it is expected.

President Willis points out that the abandonment of the endurance run this year does not necessarily mean that it will be dropped permanently, and that it can be revived next year if the citw that gets the meet so desires. There is nothing in the F. A. M. constitution requiring that the national endurance run to be held each year, it being left to the discretion of the promoting club.

Record Crowd in Providence Pictures.

More than 100 motorcyclists turned out for the annual picture run of the Providence (R. I.) Motorcycle Club on Sunday, 14th inst. As in former years the riders assembled in Roger Williams Park, where the panorama was taken, requiring special photographic paraphernalia. It is claimed that the picture when developed will be the largest motorcycle group ever taken in New England. While waiting for the photographer to get his apparatus ready the riders indulged in horse play and got better acquainted with each other. After the bulb had been pressed, the riders were released, and, forming into small groups, scattered for various places of amusement, the day being ideal for riding. The club will hold a run to Springfield, Mass., on Decoration Day to attend the motorcycle races at the Stadium.

Delegate Blanks for F. A. M. Meet.

Blank certificates of appointment of club delegates and state delegates at large to the national convention at Buffalo are being sent out by Secretary Gibson, of the Federation of American Motorcyclists. In the blanks sent to clubs, spaces are provided for entering the names, one on each blank, of the delegates appointed by the club to represent it at the meet. This certificate of authority is to be signed by the president and secretary of the club sending the delegate. Similar blanks are being sent to state commissioners together with information as to the number of F. A. M. members in the state in good standing, and instructing the commissioner to appoint the proper number of delegates and alternates to represent the unaffiliated membership. Two more affiliated clubs are reported by the secretary as follows: Crawfordsville (Ind.) Motorcycle Club, No. 124, 15 men; San Jose (Cal.) Motorcycle Club, No. 127, 40 men.

Barred from Motorcycling in Denver.

To be barred for all time from riding a motorcycle on the streets of Denver, Col., is the unusual punishment that has been meted out to J. B. Shultz, of that city, by the Denver fire and police board. Schultz was deprived of his motorcycle permit some time ago as the result of an accident in which he ran down a man 60 years old, who subsequently died from his injuries. A motorcycle policeman recently caught Schultz again riding on a Denver street, and as the latter's permit had not been restored to him he was arrested. The records failed to show that a new permit had been granted Schultz, but it was discovered that a permit had been taken out by J. B. Scholz, whose handwriting was recognized as that of Schultz. The board then took action, denying Schultz of his right ever to take out a motorcycle permit in Denver.

No Place for Motorcycle Touring!

Motorcyclists who are contemplating a vacation trip to Prince Edward Island will do well to leave their machines behind, for they will prove an expensive method of getting about. Riding a motorcycle anywhere on the island will cost the rider a $500 fine, or if he prefers, a six months sojourn in the local "jug."

LANTERN LIGHTS DRAW MEMBERS

Indianapolis Night Parade Proves a "Puller-In" for Indiana Motorcycle Club—Prize Awards.

Led by two motorcycle policemen of the local force, the Indiana Motorcycle Club, of Indianapolis, held its first annual lantern parade on Monday night, 15th inst., with almost 200 machines in line. Arranged as a membership accelerator the parade was a huge success and resulted in several applications for membership being handed in. All riders in the city were eligible to take part and over two-thirds of those in line were non-members, but after the parade this ratio was reversed. The line of march was from the club house on West Vermont street through the leading business streets of the city. Following the police escort came a car containing the club officers, then the press car and next a truck carrying a brass band. First prize for the best decorated machine was taken by a machine belonging to the Hearsey-Willis Co., and ridden by Wililam Grimes. It was decorated with lanterns cleverly arranged. Second prize in this class went to the H. P. Motorcycle Co., which entered a Yale ridden by Frank Stringer. The winning machine in the unique class was decorated to represent a motorcyclist looping the loop. Mayor Shank was the judge of machines. All of the local dealers entered machines and there were several ingeniously arranged outfits of comic nature. After the pa ade a smoker was held at the club.

Danville and Terre Haute Visitors.

Members of the Danville and Terre Haute Motorcycle clubs held runs to Indianapolis on Sunday, 14th inst., and while there were guests of the Indiana Motorcycle Club. About 30 riders were on hand from both cities. One feature which marred the affair and prevented several riders from reaching the rendezvous was that the first starters from Terre Haute made a road race of it and shook off the less speedy ones. Several of the latter lost the road and others quit in disgust at being abandoned. It is promised, however, by the powers that be in the Terre Haute club that the occurrence will not be repeated.

Swiss Owners Must Have Tags.

All owners of motorcycles residing in Switzerland, whether native or foreign, must now be provided with "international route certificates," as provided by the regulations prescribed by the International Convention of October 11, 1910, which became effective throughout Switzerland on May 1, 1911. The motorcycles, in addition to the numbered plates in the rear, must have a distinctive plate bearing the letters "C. H." (Confederatio Helvetica).

Correspondence

Makes Comments on Guttenberg Races.

Editor of the Bicycling World and Motorcycle Review :

I have before me an entry blank of the Guttenberg (N. J.) Motordrome Racing Association, with a schedule of events for their meet of May 21, and I notice that event No. 5 reads: "One-half hour race, professional, and one-half hour race, trade rider," both races to start at the same time, but to be checked separately. This seems a distinct transgression of the rules of the F. A. M. If we are going to have pros and trade riders compete to-gether, why not make them all pros and be done with it?

Another thing that I noticed at Guttenberg last Sunday, 14th inst., was the fact that several of those riders who competed in the novice race used racing machines. This state of affairs was very obvious and anyone with eyes could have seen it. I would like to bet the referee, or Chairman Thornley himself, who was there, that one-third of the riders in the novice, which, of course, should have been a private owner event throughout, did not own the machines they rode.

I do not know whom it was up to to make a complaint in a case like this, but I should think that the chairman of the competition committee, being present, certainly should have interfered. I don't suppose that promoters know they are injuring their own interests by letting such conditions exist, as a young man on the side lines who had been thinking of entering such a race, would say, when he saw what he was up against, "What's the use; they have factory machines; I haven't any show at all, so I guess I won't ride."

In this particular case the riders themselves were afraid to say anything because they had different makes of machines, and, of course, if one were thrown out on such grounds the others naturally would be also, and it would have spoiled this race if it had been run in strict accordance with the competition rules.

A SPECTATOR.

Clutch's Value in Climbing Hills.

Editor of the Bicycling World and Motorcycle Review:

I have been an appreciative reader of your paper for some time and have noted with interest several articles regarding the free engine clutch. As a result of something over a year's use I am an enthusiastic advocate of the clutch. There appears to be no difference of opinion on the part of your correspondents regarding the desirability of the clutch for starting on side hills, sand and rough roads, or for traveling slowly in crowded traffic, but there does seem to be a lack of appreciation by some of them concerning the hill climbing ability of the clutch. It is just this point I want to give your readers, especially the riders who use the country roads.

Every rider of any experience knows that he can climb nearly any hill very readily if it be smooth and he has a chance to "make a run at it." In other words, the engine has a certain speed at which it develops its maximum power, and right here is where the clutch comes in. You can run the engine at just the proper speed to develop its best power while the motorcycle is loafing along leisurely up the hill, going over bumps that would "jolt the liver out" of the rider if he were going at anywhere near the speed required to make the hill with the old-fashioned transmission.

My clutch enables me to go up any hill in this part of the country, whereas there are dozens of them on which the machine used to be stalled before I attached the clutch. There is also another advantage possessed by the clutch. In going through very deep sand, where it is impossible to ride on account of the machine skidding, the engine may be made to pull the machine while the rider walks beside it to guide it.

Fullerton, Neb.

Wants Extra Brakes on Motorcycles.

Editor of the Bicycling World and Motorcycle Review:

Being a subscriber to the Bicycling World and Motorcycle Review, which I believe everyone should be who has the motorcycle fever, I hope you will let me express myself in regard to the desirability of an extra brake on motorcycles, which I see has at last been put on by one company in this country. I would like to know how riders feel about it.

CLARENCE E. WERNER,
F. A. M. No. 1381,
New York City.

Why Didn't He Stop It? He Did!

While trying to operate a new, bright red Indian motorcycle in Johnson Square, Savannah, Ga., Adolph Cumpert, who said he came from New York City, ran amuck and crashed into a big block of marble in front of a bank, crumpling the front of the machine, but escaping injury himself. Cumpert's efforts to start the machine attracted a crowd and immediately he was under way he lost control. After the accident he told the police that he had ridden a machine in New York and thought he was competent to run one. When asked why he did not stop the machine when it was running wild, he answered with serious face that he did, and the crowd roared. The stone that he hit would have stopped a steam roller.

Vincennes Boasts a Mounted "Cop."

Vincennes, Ind., is the latest city to adopt motorcycles for its police department, and has bought a 1911 Indian. When the machine arrived the local sleuths were all anxious to try it. Chief Adams was among those who had the craving and, of course, his prerogative gave him first choice. He was unable to make it run, however, and was much crestfallen to see his secretary mount and ride nonchalantly away as if it was an everyday habit. The secretary was gone a long time before he returned, but it was not due to trouble, for he came back smiling. Now the police are wondering where they will store the machine, for it is so heavy that it requires two men to carry it up the steps of the city hall and often but one man is available for the strenuous job.

Catch a Burglar on a Trolley.

Pursuing a street car which had nearly ten minutes start, Motorcycle Policemen Martin and Connors, of Toledo O., recently gave a convincing demonstration of the efficiency of motorcycles in police duty, by overtaking the car and arresting an alleged housebreaker who was making his escape on it. They were called to Air Line Junction, four and one-half miles distant, by a man who said he had caught an intruder in his house. When the officers arrived, the man had lost his intruder but retained the latter's coat tail, which had pulled off when the fellow had made a break for liberty. The alleged burglar had boarded a street car bound for Toledo, and the motorcycle policemen put after the car, although it had a long start. They overtook it and found a man who was minus a coat tail. Within 20 minutes of the time they had left the station house, they returned with their prisoner, after a nine mile trip.

Fresno Requires Registration.

Motorcycles must now be registered in Fresno, Cal. according to a new ordinance which has just been signed by the mayor and which gives the police certain powers over the regulation of motorcycle traffic. The ordinance requires that each machine shall carry metallic number placards, one on each side. The numbers must be three inches long and half an inch wide. The new law exempts the non-resident motorcyclist while actually traveling through the city provided such non-resident is not engaged or employed in any business, occupation or profession in whole or in part in the city. For registration and issuance of a number, a fee of 50 cents is charged. The ordinance met with the approval of the Motorcycle Club of Fresno, and that organization has put in a request for the first 60 registration numbers, to be assigned to club members.

Elgin is Fining the Speeders.

Warnings against speeding within the city limits are being handed out by the authorities of Elgin, Ill. Two traps have been established and on the second offense violators are picked up.. Two motorcyclists already have been fined.

TEAM MATCH RACE STUMPS KRAMER

Best He Gets is Second in Each Heat Against Fogler and Clarke—Spirited Newark Racing.

Each with an able partner, the three big guns of the cycle sprint brigade at Newark, N. J.—Kramer, Fogler and Clarke—provided the star number on Sunday, 14th inst., in a three-cornered team match race, mile heats, and, if one be impatient for the answer, Joe Fogler won it, by grabbing two of the three heats with Clarke first in one heat and Kramer second all three times. Edward Root, who has been Fogler's partner in several six day races in which the pair came to victory, helped Fogler, while Willie Fenn was Kramer's assistant. Clarke was in tow of Floyd Macfarland.

In the first heat Macfarland stirred things up some distance from the finish, making Kramer and Fogler ride a long sprint, in the latter part of which Clarke was fresh and well placed, so that in the first burst of real speed he has shown this season he flew home in front, with Kramer and Fogler in second and third, respectively. The Australian's stock was way above par after this bit of work. In the second heat, Clarke was also well placed when the three assistants began to drop off. He tacked on to Fogler for the sprint, whereupon Kramer came up on the outside and locked him in. Fogler went all the way, with Kramer giving battle on the outside, so that Clarke had no chance either to drop back and come on the outside or to break through in front. Fogler's ride to the tape was a whirlwind, and Kramer could only take second.

In the final heat Macfarland continued his policy of just mixing up the other teams and spoiling their plans by feinting, sprinting and mingling into their affairs, leaving Clarke at the rear to take care of himself, on Kramer. Macfarland went up front and began to whang it out a long way from home. When the bell jingled, Fogler, Kramer and Clarke, in that order, cut loose from their helpers. Clarke shot out from the rear, but instead of going to the front and making his fight from there, he chose to be revengeful or crafty, and kept Kramer in, back of Fogler. Kramer tried to butt out but failed, and meanwhile Fogler was eating up space so fast that when Clarke gave up elbowing Kramer and tried to get in front, the job was too much for him. He weakened in the home stretch so that Kramer, waking to the situation, threw a spasm that beat out Clarke for second. Fogler's two winning heats gave his team first money in the match, while Kramer's three times in second place gave the Kramer-Fenn partnership the second purse on points, six points against the Clarke-Macfarland combination's total of five—one first and two thirds.

In the two mile pro open, Kramer was wholly at ease. In the final there were pacemakers, and these were followed in the last mile by Fred Hill, Goullet, Kramer, Clarke, Fogler, Hehir, Root and some tailenders. When the pacemakers retired at the bell lap, Hehir came out and shut in Clarke. Before he reached Kramer, however, the latter started a runaway sprint, leaving the field in pursuit, headed by Goullet. Clarke and Fogler were pocketed in the jam. Kramer kept flying, and arrived several lengths ahead of Goullet and Fred Hill. Clarke got out in time to finish fourth, ahead of Hehir, while Fogler was sixth.

Chester Smith, of Baldwin, L. I., showed his contempt for champions by defeating Frank Blatz, the amateur title holder, in the half mile amateur open. Carl Ericson, from 150 yards, captured the three mile amateur handicap, with Smith second, from 45 yards. Joseph Schieder, the Buffalo flat floor star, who rode from the 100 yard mark, was beaten for third by Paul Heldrick, a 140 yard man, but was able to account for fourth. A lively scramble marked the one mile professional handicap, in which sturdy Peter Drobach, from ten yards, took first from Hehir, who pursued him from scratch. The summary:

Two mile open, professional—Won by Frank Kramer; second, Alfred Goullet; third, Fred Hill; fourth, A. J. Clarke. Time, 4:50⅗.

Three mile handicap, amateur—Won by Carl F. Ericson (150); second, Chester Smith (45); third, Paul Heidrick (140); fourth, Joseph Schieder (100). Time, 6:35⅘.

Team match, professional, mile heats—First heat won by Clarke and Macfarland; second, Kramer and Fenn; third, Fogler and Root; time, 2:29⅕. Second heat won by Fogler and Root; second, Kramer and Fenn; third, Clarke and Macfarland; time, 3:46. Third heat and match won by Fogler and Root; second, Kramer and Fenn; third, Clarke and Macfarland. Time, 2:47⅗.

One mile handicap, professional—Won by Peter Drobach (10); second, Patrick Hehir (scratch); third, Alfred Goullet (20); fourth, Norman Anderson (50). Time, 2:09⅘.

Half mile open, amateur—Won by Chester Smith; second, Frank Blatz; third, William Pettit. Time, 1:01⅘.

C. R. C. A. Handicap Postponed.

Because of the close proximity of the date to Decoration Day, when a great many other bicycle events are scheduled, and on account of the poor condition of the course selected, the 30-mile open handicap road race of the Eastern division of the Century Road Club Association, New York City, booked for May 28, has been postponed indefinitely. It is planned to hold the race later in the season.

BALTIMORE CYCLISTS ARE BUSY

Clubs in a Continuous Round of Trips, Tours and Races—Cycle Division for Carnival Parade.

The ninth open half century run of the Crescent Bicycle Club, of Baltimore, Md., was held on Sunday, 14th inst., with Reisterstown as the destination. This 50 mile pleasure trip is an annual feature with the Crescents, and the turnout was a record one, fully 100 of the pedal power advocates attending. The run was open to all local cyclists. They assembled at the corner of Broadway and North avenue at 8 o'clock in the morning, and finished at the same point at 3 o'clock in the afternoon. An extra half hour was allowed at the finish, giving seven and one-half hours in which to complete the run.

As Reisterstown is somewhat short of the required distance, a trip around the city was made at the start of the run. Handsome medals were awarded to the riders who finished within the generous time limit. These medals were distributed immediately after the finish of the run. As an additional prize a silk banner was awarded to the club entering the largest number of riders. Entries were received up to the time for the start, thus giving some of the riders who were doubtful of entering plenty of time in which to make up their minds.

On the Saturday previous, the members of the Crescent journeyed to Frederick and return, on the first club century of the season. This trip took the place of the usual short distance run. While there exist many century routes far easier than the run to Frederick, the trip has a certain fascination attached to it, and the Crescents always make the journey as a club run at least once each year.

As in most club runs held by this organization, the riders were allowed to choose their own starting time, the only requirements being that a century be ridden with Frederick as the destination. The riders gathered at Ridgeville at noon for dinner, and a number who started from Fulton and Edmonson avenue at 6 o'clock in the morning arrived away ahead of the schedule time. Owing to the injuries received by a number of cyclists in the annual road race of the Lafayette Wheelmen on the 7th inst., the turnout was not as large as expected, but a fair sized crowd attended.

The next big event on the Crescents' program will be the annual spring road race, which will be held this year on Sunday, June 18. The race will be over the famous Shell Road course, and will be a 12 mile event. A large list of prizes will be offered, and the entry blanks and circulars will be off the press in a few days.

The Lafayette Wheelmen assembled last Sunday and took a run through the famous Green Spring Valley, returning to the city about 3:30 o'clock.

The R-S Bicycle Club journeyed as far as Halethorp, where the aviation meet was held recently, and from where Hubert Latham, the noted French aviator, started on his flight over the city of Baltimore.

Members of the Baltimore Bicycle Club assembled and took a spin as far as Chase's Station, returning and arriving at home in time for dinner.

Many of the members of the Bayonne Wheelmen accompanied the Crescents on their run to Reisterstown.

West Baltimoreans are planning a great carnival for Memorial Day, and elaborate plans are being formulated. Through the efforts of Charles W. Bokemeyer, the bicycle dealer, whose place of business is at Fulton avenue and Lexington street, and who is the president of the Carroll Cyclers, the committee has agreed to allow the bicycle riders and the motorcyclists to participate. In view of this fact, Bokemeyer is getting the various clubs interested. He has arranged an elaborate turnout of his club, and great credit is due to him for bringing this feature into the celebration. Bokemeyer has planned that every participant must have his machine decorated, and has offered a prize for the best decoration. Fulton avenue will be a main artery of the carnival doings, and Bokemeyer will have his place decorated and illuminated with hundreds of incandescent lights.

Long Branch Offers Many Prizes.

Three bicycles and a generous stock of sundries already are in the hands of the prize committee for the second annual race meet of the Long Branch (N. J.) Cycle Club on Decoration Day. The meet will will be held on a three-quarters mile dirt track that now is being put into good shape. There will be seven events on the card, four open and three closed club, as follows: Two lap handicap, open; one lap, open; ten lap handicap, open; quarter mile, open; one-half mile, club; two lap handicap, club, and a four lap handicap, club. First prize in the two lap open handicap will be a Reading Standard racer. The winner of the ten lap open handicap will get a Columbia racer, and the second man will be given an Arrow racer. Sanction has been granted by the N. C. A. and entries close on the 24th. Entry blanks can be obtained from the club, 554 Broadway, Long Branch, N. J.

More Members of New Englands.

Eight more members were taken into the ranks of the New England Wheelmen, of New York City, at the last meeting, including Franklin Fisher and Robert Lawson. Apparently the New Englands are out to absorb all the other Metropolitan bicycle clubs, judging from the rate at which they are recruiting new members.

FOUR CLUBS IN 100 MILE RACE

Pacific Coast Cyclists Hold a Relay Contest—Garden City Wheelmen Defeat Three Rivals.

In a hard and closely fought contest the Garden City Wheelmen of San Jose, Cal., won the Pierce trophy bicycle relay road race of 100 miles over the San Leandro triangle course, on the 7th inst. Second honors were taken by the New Century Wheelmen of San Francisco, and third place went to the Acme Wheelmen of Oakland. The Bay City Wheelmen were fourth. Each team was composed of ten men, each man on a team riding ten miles. Four of the ten heats were won by the Garden City's, and in most of the others they were well up in front. The scoring was done on a time basis, the fastest total time of a team deciding the winner. The total time of the Garden City team was 4:29:30.

Real excitement was stirred up at the finish of the ninth round, which proved a battle royal between the representatives of the three leading teams. It also added to the prestige of O. Inman, of the Garden City team, through his stirring victory over Cecil Nelson and A. Sangalli, two crack riders. Sangalli suddenly started a long sprint for the tape, catching Nelson and Inman asleep. Inman, however, started in hot pursuit, and ran away from Nelson, who tried to hang on. The terrific pace that Inman maintained soon carried him past Sangalli and he sailed across the line a winner by a wide margin. Tracy, of the Bay City's, was last.

In the final heat, Wayne Walther, of the Garden City team, had practically a gift, for after he started his final sprint he ran away from the others and won by an eighth of a mile. Whatever chance of victory the Acme Wheelmen had went glimmering in the seventh round, when L. Goodwin fell and lost much time changing mounts. The special prize for the rider making the fastest ten mile heat was won by H. Born, of the Bay City Wheelmen. His time for a heat was 22:04. The Pierce trophy is a challenge cup, and must be won three times by a club to become its permanent property. The first time it was offered in competition it was won by the Garden City Wheelmen, and then was won twice in succession by the New Century Wheelmen.

Summary:

First heat—Won by T. Weggerman, N. C. W.; second, G. Erick, G. C. W.; third, C. Mourow, A. W.; fourth, S. Schadt, B. C. W. Time, 34:04.

Second heat—Won by C. Baxter, G. C. W.; second, A. Payne, B. C. W.; third, W. Penaluna, N. C. W.; fourth, E. Maker, A. W. Time, 29:10.

Third heat—Won by B. Hartwell, A. W.; second, A. Mahoney, G. C. W.; third, E. McLaughlin, B. C. W.; fourth, J. Viscotti, N. C. W. Time, 24:12.

Fourth heat—Won by B. Clark, A. W.; second, E. Buttleman, N. C. W.; third, G. Lorenzini, B. C. W.; fourth, L. Gerken, G. C. W. Time, 27:37.

Fifth heat—Won by H. Hoffman, A. W.; second, W. Bellezer, N. C. W.; third, W. Chaboya, G. C. W.; fourth, F. Curran, B. C. W. Time, 25:49.

Sixth heat—Won by H. Born, B. C. W.; second, R. Martin, A. W.; third, W. Hammitt, N. C. W.; fourth, O. Trulson, G. C. W. Time, 22:04.

Seventh heat—Won by A. Born, N. C. W.; second, C. Chaboya, G. C. W.; third, G. Kalvig, B. C. W.; fourth, L. Goodwin, A. W. Time, 25:10.

Eighth heat—Won by H. Eisentroutt, G. C. W.; second, B. Bush, N. C. W.; third, R. Decassia, A. W.; fourth, J. Fitzgerald, B. C. W. Time, 28:45.

Ninth heat—Won by O. Inman, G. C. W.; second, A. Sangalli, N. C. W.; third, C. Nelson, A. W.; fourth, M. Tracy, B. C. W. Time, 23:45⅗.

Tenth heat—Won by W. Walther, G. C. W.; second, E. Carroll, A. W.; third, G. Knabenshue, N. C. W.; fourth, O. Young, B. C. W. Time, 28:17.

Total time—Garden City Wheelmen, 4:29:30; New Century Wheelmen, 4:30:51⅗; Acme Wheelmen, 4:32:31; Bay City Wheelmen, 4:37:04⅕.

Asbury Park Course is Chosen.

All interference with contestants by motor cars or other traffic in the 25 miles amateur handicap road race of the Monmouth Cycle Club of Asbury Park, N. J., on Memorial Day, has been forestalled by the selection of a course that is free from traffic and at the same time embraces ideal roads. The start and finish will be on Corlies avenue, and the race will start at 10 a. m. Two $50 high grade bicycles head the prize list and there are 26 other prizes. Entries close on the 25th ult., with Elwood A. Mooney, 605 Main street, Asbury Park, N. J. Sanction has been granted by the N. C. A., and only amateurs are eligible to compete.

Andrews and Smith Switch Clubs.

A bomb was exploded in Canadian cycling circles this week when the announcement was made that Walter Andrews, the Canadian champion, and Bill Smith, both of the Royal Canadian Bicycle Club of Toronto, had jumped to the Toronto Bicycle Club which is presided over by G. L. MacKay, the Dominion racing chairman. The two have sported the silks of the R. C. B. C. for many years and their change of allegiance was a big surprise.

Kjeldson Sails to Land of Hamlet.

Herman Kjeldson, a Dane who has proved one of the fast amateurs in the cycle racing at Newark, N. J., has gone to Denmark. He sailed this week.

HOW CYCLE "TEAMING" STARTED

Macfarland Invented It on an "I and Stevie" Basis—A Demonstration for the Chairman.

Team work, which is at present causing much agitation in cycling circles, was started in 1896, and the idea of one rider sacrificing his chances in a race by helping another rider to win, originated in the brain of Floyd Macfarland, says the Newark News. Cycling and cycle racing were at their zenith at the time, and all the big bicycle and tire manufacturers had racing teams on the track. The riders received big salaries, as well as all their expenses. There was racing nearly every day, the prizes were big and the circuit extended from the Atlantic to the Pacific. Macfarland was on the Palmer team and Orlando Stevens was on the Morgan and Wright team. The two teams were waging a bitter fight for supremacy, and the best professionals in the country were on the rival squads. It was the first season in the professional ranks for Macfarland and Stevens and they were the young stars of their respective teams.

Eddie Bald and Tom Cooper were winning a majority of the first and Macfarland and Stevens were generally battling for place prizes. At the finish of every race Stevens and Macfarland were generally found fighting it out side by side, sometimes in front and sometimes at the tail end of the bunch, but always side by side. It began to look like a personal affair between the pair, in which they were simply trying to beat each other.

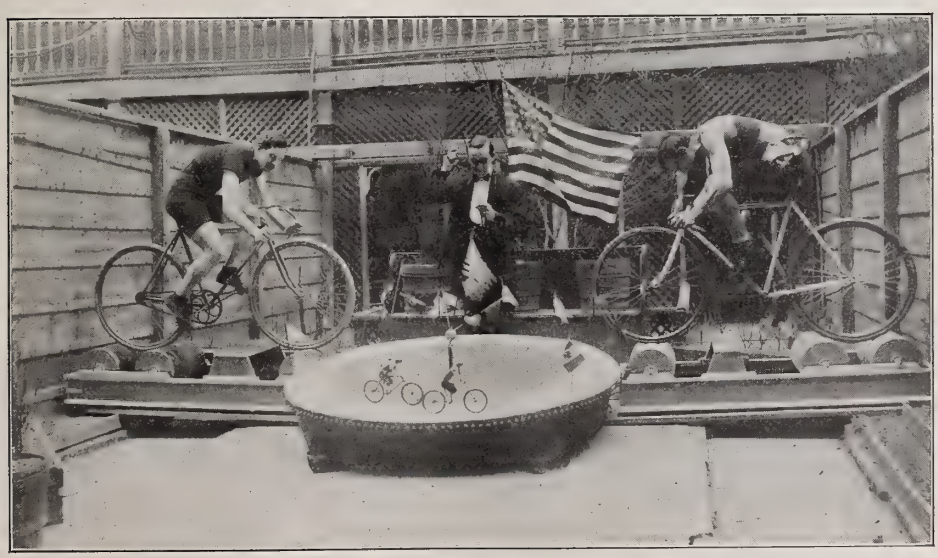
Macfarland and Stevens were pals off the track and the spectacle of seeing his chum come alongside of him in every race and fight as though his life depended on the result and with him returning the challenge with a vengeance, finally struck a humorous chord in Macfarland's make-up and with the idea of ending what appeared to him to be a laughable and ridiculous situation, Macfarland suggested to Stevens that they become pals on the track as well as off and work together instead of against each other in the races.

The proposition was agreeable to Stevens and they decided to work together in the races at Appleton, Wis., the next day. They both qualified for the final of the handicap, which was worth $100. As they left the training quarters for the final, Mac told Stevens to "get on" and he would take him. Mac took him, all right, and jumped the bunch a half mile from the finish, landing Stevens some ten lengths to the good in the home stretch. Stevens won with ease. The riders on both the Morgan & Wright and the Palmer team thought Macfarland had gone crazy. They could not fathom Macfarland's apparently foolish ride.

They alternated in pulling each other and were winning nearly all the races and it was not until three weeks later that the riders finally got wise. Macfarland was canned by the Palmer people, but was immediately taken on the Morgan & Wright team.

Macfarland and Stevens continued to work together for the next four years and became famous as the "I and Stevie" team. Macfarland was "I" and the brains of the combination. They rarely framed up a race in advance. They worked so well together that it was seldom that a word passed between them as to how they would ride or who would do the pulling. The one who had the most advantageous position from which to do the pulling did the donkey work and the other went on and won. They were not glory riders and cared nothing about winning except for the cash that went with victory.

Macfarland and Stevens worked so nicely together that the other riders were kept guessing continually. There was no given time or place in a race for them to come together, and very often the riders thought they were not going to work together when, like a flash, they would be together and away. Nowadays one can pick the combinations before a race has gone a lap, as a rule, if there are any combinations in the race.



A remarkable phase of the situation at this time was the fact that the other riders did not form combinations to beat "Mac" and Stevens. This can be accounted for in a measure by the fact that Macfarland and Stevens, riding alone in heats, did not always qualify for the finals, thus giving the the other riders an even break in many races. Then again the combination did not always win when they worked together. But probably the best reason why there was no other combinations formed at that time was because there was not a rider in the game who cared to sacrifice his chances for the sake of letting another win—they were all glory riders in those days.

In the summer of 1897 at Manhattan Beach August Martens, the Minneapolis Dutchman, who was then on the Spalding team, pulled Eddie Bald in a half mile handicap and the latter won. This was the first time any riders outside of Macfarland and Stevens engaged in team work. The action of Bald, who was then champion, in accepting help in a race was considered scandalous by Tom Cooper, Earl Kiser, Arthur Gardiner and the other top-notchers then in the game. The following year, however, they were all guilty of team work at various times.

With the introduction of team work in cycle racing the element of strategy came forcibly into play, and many races were won by clever head work. At a New York state circuit meet at Elmira in the spring of 1898 Macfarland qualified for the final of the open, but Stevens was shut out in his heat. Freeman had qualified so "Mac" worked with him in the final. The races were held on the old half mile horse track, which was in very bad shape for bicycle racing. The home stretch had been rolled and was in fairly good condition, but the rest of the track, with the exception of about a foot on the pole close to the fence, which had been worn smooth by the local riders, was little better than a plowed field for cycle racing.

"Mac" and Freeman both got off to a bad start and lay pretty well back in a big field of riders. On entering the home stretch on the first lap Mac started to sprint and got going so quickly that he opened a ten-foot gap on Freeman before the latter realized "Mac" had started the

GIVE CYCLE ROLLER RACERS IN VAUDEVILLE.

The stage name is "The Army and Navy Cycling Wonders," which is a heap more thrilling than plain Jack Higgins (on the right) and George McAdams (on the other hand)—not forgetting George Wyrzy, manager.

dash for home. When Freeman looked up the could hardly discern the fleeting form of the fast disappearing Macfarland, so completely was he enveloped in a cloud of dust.

Instead of jumping and going after Macfarland, Freeman kept on at the same gait and let "Mac" go, figuring that if he (Freeman) was unable to see "Mac" it was a cinch that the riders back of him could not and as long as he held the narrow path he was sure none of the riders could get around and he stood a fair chance of beating them down the stretch and copping second money. He took it easy down the back stretch and started to unwind as he reached the turn. When the bunch swung into the home stretch and spread across the track for the final sprint they were astounded to behold Macfarland just crossing the tape 75 yards away. Freeman battled with the bunch all the way down the stretch and beat them out for second money. This sort of stategy did not meet with loud cheers from the other riders and immediately after the race Bald, Cooper and Gardiner threatened to lick Freeman for letting Macfarland get away.

This race and a few others in which Macfarland sprung his great coup—the three-man combination—drove Kiser, Cooper, Bald and Gardiner off the New York state circuit. They refused to ride and appealed to Mott, chairman of the racing board, to stop Macfarland, Stevens and Freeman from working together. The chairman gave them his ear all right and was present at the next meet, which was held at Washington, to make a personal investigation of what the "big four" had termed an unfair practice. The chairman called the trio that was to be investigated together before the start of the first race and told them to ride exactly as they had been riding all season. They did. In the final of the two-mile handicap Macfarland was on scratch with Ball, Cooper and Kiser, Stevens and Freeman had 20 yards and Kimball, Fisher, "Doc" Brown, Newhouse, Nat Butler, Barney Oldfield, Jimmy Bowler and a dozen other good men were strung out to the 250 yard mark. It was a great field of riders and "Mac" figured that the men on the long marks would go all the way.

Under the conditions he was quick to see a way of making team work look good to Chairman Mott, so he instructed Stevens and Freeman to change pace with him and make it so hot none of the other scratch men would care to come up and take their share of the pace. His object was to make the race fast and catch the limit men regardless of where the trio finished, but to try to win, if possible. When the race started Stevens got off first and went the first lap as hard as he could go.

Freeman and Macfarland were on behind Stevens and Freeman took the second lap. "Mac" took the third lap and made it very hot. When "Mac" swung up, Bald, who was on his wheel, refused to go, so Stevens took another lap. None of the other scratch men would take any pace, which was the very thing Macfarland desired. Macfarland, Stevens and Freeman continued to change pace and caught the limit men a lap and a half from the finish. Instead of slowing down, they tore around the limit men and kept up the heart-breaking pace. It was "Mac's" turn to go on the last lap, and how the old boy did tear! He carried Stevens and Freeman with him and they were never headed, finishing one, two, three.

After the race Chairman Mott went to the training quarters and congratulated the riders whose methods he had come down to investigate. "If that was team work," remarked the chairman, "then I want to see more of it, for that was the finest bicycle race I ever saw." Then he went over and told Cooper, Kiser and Bald that they should have been fined for not taking pace.

The race was very fast and Macfarland's time equalled the world's record.

Leimbach Leads Baltimore Mileage.

Four months of persistent pedaling brought its reward to William Leimbach, of the Century Bicycle Club of Baltimore, Md., when the monthly results of the century mileage contest for April were announced on May 9, for it showed him to be the leader of the competition. Leimbach displaced Charles H. Thoms, who had led the field since the first of the year.

Another important change in the standing of the contestants was the moving up of Fred E. Mommer from thirteenth to sixth place. During April the total mileage reported was 4,976 miles, which sets a new monthly record for the club. Thirteen centuries were ridden by the contestants during the month, tying the best previous record.

For the four months ending April 30 a total mileage of 12,448 was reported, together with 26 centuries, breaking all previous records for a similar period. The present contest is the most spirited and exciting that the club, now entering on its fifth year of existence, has held.

Placed in the order given, the first fifteen men in the mileage competition are as follows: William Leimbach, Charles H. Thoms, August Leimbach, Fred M. Sanborn, F. E. Mommer, Alfred J. Baker, J. Fred Huber, George Peilstecker, Thomas W. Baker, John W. Trost, William Foos, F. S. Plitt, G. A. Miller and Edward Dorschell.

SPEEDY ON THE FLAT FLOOR.

Edward H. Goodwin, of the Irish-American Athletic Club. He was the big flat floor winner in 1910.

Clarke and Kramer Team Match.

Kramer and Clarke are to have a go at each other at the Newark (N. J.) Velodrome on Sunday, 21st inst., in a team match race at one mile heats. Clarke will have Macfarland as his partner, of course, while Kramer will have Willie Fenn. A five mile motor paced race between Wiley and Collins will be the other big feature of the program, the balance of which will consist of three professional and three amateur events. The pro numbers will be a two-third mile handicap, a two mile open and a two mile invitation. For the amateurs there will be half-mile novice, a five mile open and a half mile handicap.

Racers Starting for Salt Lake.

As an advance guard of the Eastern cycle racers who will compete at the Salt Palace track this summer, Peter Drobach and Alfred Halstead left for Salt Lake City, Utah, on Monday, 15th inst. Iver Lawson, Patrick O'Sullivan Hehir, Norman Anderson, Charles Stein and Albert Crebs, who also will leave Newark, N. J., to go to Salt Lake, will make their departure on Monday, 22d inst. Willie Fenn, who was under contract to ride at Salt Lake this summer, has obtained a release, and will remain at Newark.

Afternoons for Providence Track.

Although Providence, R. I., will remain on the Eastern cycle racing circuit, Manager Chapman has been obliged to give up Friday night racing in that city on account of objections made by local citizens, who framed a petition against it. Instead of holding the races on Friday nights, therefore, Chapman will have the racing on Saturday afternoons. The races at Boston will take place on Saturday evenings, as heretofore.

Winnipeg Issuing Cycle Tags.

Bicycle tags for the year are again being issued by Winnipeg, Man. The annual fee is 50 cents and the applicants must produce their machines for inspection and description.

RESULTS OF EMPIRE HANDICAP

Correct Official Score Follows Issuance of Unofficial Announcements—Net Times of Those Who Finished.

Although the 15 mile handicap road race of the Empire City Wheelmen, of Brooklyn, N. Y., was held on the 7th inst., it was not until nearly a week later that the official scores were compiled. Unofficial scores were given out immediately after the race, but these proved erroneous in many instances. The complete official score of the place and time men, as corrected by the officials, is given in tabular form, with handicap and net time, as follows:

S. A. TTYLES, PLACE WINNER

Place Prizes.

	Rider and Club.	Handicap.	Time.
1	S. A. Styles, N. E. W.	4:30	44:48⅕
2	A. E. Rhodes, E. C. W.	4:30	45:07⅖
3	Gus, Wohlrab, C. R. C. A.	1:30	42:49⅖
4	A. Hausenbauer, C.R.C.A.	2:00	43:19⅗
5	John Stofko, E. C. W.	2:00	43:23
6	Wm. Napier, E. C. W.	4:00	45:23⅕
7	J. DeBruyn, A. W.	1:30	42:53⅖
8	Wm. Seegelken, E. C. W.	4:00	45:23⅗
9	M. Schulman, unattached.	4:00	45:27⅕
10	E. W. Hipwell, E. C. W.	4:00	45:46⅕
11	J. Kratjchy, unattached.	4:00	45:53
12	Harry Kaiser, I. J. W.	4:30	46:27⅕
13	Wm. D. Marino, E. C. W.	4:00	46:03⅕
14	T. Cambria, N. H. W.	4:00	46:09⅖
15	Jos. Winget, T. R. C.	6:00	48:09⅗
16	Irving Higgins, A. W.	1:30	43:39⅘
17	F. Fisher, E. C. W.	Scratch	42:10
18	N. Gutoff, unattached.	2:30	44:40⅕
19	H. Napthal, unattached.	2:00	44:10⅖
20	G. Giovanni, U. S. I.	2:30	44:40⅗
21	Henry Blanda, N. H. W.	3:00	45:30⅕
22	H. G. Lilienthal, B.S.A.C.	2:00	44:30⅖
23	Thos. Kennedy, E. C. W.	2:30	45:00⅗

Victoria Day Starts the Canadians.

From a bicycle point of view, Canada's national holiday, the 24th of May, better known as Victoria Day, will be the starting gun for the season's campaign. Both the pedal pushers and the motor straddlers will be participating in the first events of the season. The first bicycle meet is scheduled to take place on the night of the 24th at Toronto, while the Toronto Motor Cycle Club intends holding its first point-to-point run on the holiday, London, Ontario, 128 miles away, being the objective point. Two days will be taken for the run.

START OF THE SCRATCH BUNCH IN THE EMPIRE HANDICAP

Connecticut Cities After Thieves.

Immediately upon their discharge from the Hartford (Conn.) county jail after serving time for stealing bicycles, Harry Correri and Angelo Stazerelli were rearrested by New Haven detectives and taken to that city to answer for the alleged theft of bicycles in that city. The prisoners are supposed to be members of a gang of bicycle thieves who operated in the Elm City not long ago.

EASTERN DIVISION ELECTS SEGAL

He Succeeds Berlenbach as Captain—Many Club Runs Around New York City Are Planned.

Sylvain Segal has been elected captain of the Eastern division, Century Road Club Association, New York City, to fill the vacancy caused by the moving out of the former captain, J. P. Berlenbach, from the jurisdiction of the division. In his speech of acceptance, the new captain stated that he would give special attention to the holding of club runs within 30 or 40 miles of New York City. The first run under the new leader has been called for Sunday, 21st inst., and the destination is Hudson Park, on Long Island Sound. The riders will leave Columbus Circle at 9 a. m. For the Memorial Day outing a run to Philadelphia is planned. It will start on the 28th and finish on the 30th. Other runs are scheduled to Paterson, N. J.; Greenwich, Conn.; Long Branch, N. J.; Oyster Bay, L. I., and Huntington, L. I. All cyclists, whether members of a club or not, are invited to participate in these runs. As the runs will start from various points intending entrants can keep informed regarding them by attending the club meetings at 307 W. 54th street, New York, on the second and fourth Friday nights.

Discover a Rich Bicycle Mine.

What proved to be a veritable bicycle mine was discovered in an underground establishment by the police in San Jose, Cal., following the arrest of Nick Bruno, an alleged bicycle thief. The place was filled with bicycles, and it is believed that it was the headquarters of a band of cycle thieves. About $25,000 worth of bicycles per year have been stolen in San Jose.

N·D N·D N·D

RECENT PATENTS.

977,813. Carbureter. Charles A. Marrder, New York, N. Y. Filed May 4, 1909. Serial No. 493,893.

1. In a carbureter for producing explosive mixtures of constant proportions comprising a mixing chamber with air intake, a fuel supply pipe within same issuing the fuel through its open top, a movable nozzle forming an auxiliary storage chamber for the fuel, an adjustable fuel supply regulator within said nozzle, and means outside of the mixing chamber to move said nozzle and fuel supply regulator up and down on the fuel supply pipe whereby both the air and fuel supply may be regulated and stopped by the operator.

978,076. Carbureter. David M. Tilden, Springfield, Mass. Filed Feb. 15, 1910. Serial No. 544,044.

1. A carbureter comprising a casing having openings in the top and two sets of openings in the bottom thereof, a drum forming a receiving chamber and rotatively mounted within said casing, there being openings formed in the top and the bottom of said drum, and there being additional openings formed in the bottom of the drum adapted to register with the openings of the casing, a fuel supply pipe passing through the casing and projecting into the nterior of the drum, a spring controlled fuel valve for controlling the fuel supply pipe, said valve carrying a horizontally disposed disk of considerably greater diameter than the fuel supply pipe, there being a plurality of openings formed through said disk as and for the purposes set forth.

979,032. Shock Absorber for Vehicles. William J. Pierce, Los Angeles, Cal. Filed May 31, 1910. Serial No. 564,075.

1. A shock absorber consisting of a bracket having rearwardly extending forks, and having a seat post adapted to be removably attached to a bicycle frame, said seat post and said bracket being rigid with each other and removable as one piece from the bicycle frame, a saddle bar, means for pivotally supporting said saddle bar on said bracket at one point, and means for resiliently supporting said saddle bar on said bracket on said forks.

979,483. Spring Seat Post. William S. Harley. Milwaukee, Wis. Filed April 30, 1910. Serial No. 558,598.

1. In a vehicle frame having a horizontally disposed bar, an oblique seat mast in union with the frame-bar, a spring controlled sleeve post in telescopic connection with the seat mast, and a seat bar pivotally secured to said frame bar; the combination of a head extending from the sleeve post, a pin carried by the head, a bearing block loosely mounted upon the pin, and a bracket secured to the seat bar having a depending slotted ear, within which slot the bearing block is fitted and adapted to have play.

979,484. Lubricator System. William S. Harley, Milwaukee, Wis. Filed June 14, 1910. Serial No. 566,787.

1. In a lubricator system having an oil reservoir, a filter, and a pump mechanism; the combination of a housing, a rotary plug seated within the housing, the plug and housing constituting valve members, two sets of oil grooves in one of the members, each set consisting of a circular and a semi-circular transverse groove disposed upon different planes and connected by a longitudinal groove, an oil receiving and an oil discharge duct adapted to have alternate communication with the semi-circular grooves of each set, the oil receiving duct of one set being in communication with the the oil reservoir, and the oil discharge duct of the other set being in communication with the oil reservoir, and the oil discharge duct of the other set being in communication with the filter and oil reservoir, and an oil duct in constant communication with each circular groove and pump mechanism.

979,674. Spring Fork for Wheeled Vehicles. Charles R. Kittle and John W. Gates, Los Angeles, Cal.; said Gates assignor to R. K. Holmes, Los Angeles, Cal. Filed March 28, 1910. Serial No. 551,929.

1. An improved front fork for a wheeled vehicle comprising an U-shaped frame mounted upon the axle of the front wheel and extending upwardly and over the wheel; a bifurcated front member; rocking bars mounted upon the axle of the front wheel and pivotally connected to the lower ends of the bifurcated member; spring barrels connected to the legs of the bifurcated member at the rear thereof; plungers within said spring barrels, said plungers having stems extending upwardly to and pivotally connected with the U-shaped frame; coiled springs within said barrels around said plunger stems; removable closures for the lower ends of said spring barrels; and coiled springs between said closures and said plungers.

This is NEVERLEAK Season

Are You Ready?

No bicycle kit and no bicycle repair shop is complete without NEVERLEAK, the wonderful TIRE FLUID that heals punctures without the rider having to dismount.

There's big money in NEVERLEAK for you — especially in the "TIP TOP" offer, which means a lower price to you, and twice the usual number of certificates.

Did you ever see NEVERLEAK premiums? They're dandies. Dealers everywhere are enthusiastic over them. They're easy to get because NEVERLEAK is such a sure and easy seller. Just ask your jobber why NEVERLEAK will make money for you.

THE BILLINGS & SPENCER CO.
Hartford, Conn.
CLAIRE L. BARNES & CO., 405 McCormick Bldg., Chicago

YOU want this book and need it a thousand times more than you need the 25 cents it costs!

It's the treasure book of the motorcyclist and you don't have to go far to find someone who will tell you how good previous editions have been. But now there is a new, 1911 edition, revised and enlarged so that it includes free engine clutches, two-speed gears, mechanical lubricators and magnetos, together with special matter on motors, valves, carbureters, fuel and important general subjects, all plentifully illustrated.

Dealers and jobbers in all parts of the country are selling "Care and Repair of Motorcycles" to new riders and to veterans as the best aid in correcting and avoiding motorcycle trouble. Ask your dealer about it, or send a quarter to us for a copy to be sent you postage prepaid. It is brimful of practical advice and suggestions relating to every type of motorcycle.

Dealers and jobbers' quantity orders filled in the order of their receipt. Electrotypes for catalogs supplied on request.

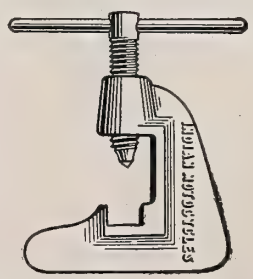
New York Branch—35 Murray Street

A Front and Rear Light in One Lamp

We show here a Solar Motorcycle Headlight with a 1½-inch red jewel side light extending on either side. These red lights are set at an angle and the rider's body cannot obstruct both, so, at all times, a red light shows to vehicles approaching from the rear. This same lamp throws a brilliant searchlight far into the distance ahead and makes a steady, clear, bright-as-day SAFE path to follow. High speed at night can be made with this lamp and crowded streets can be traveled in safety. This lamp is heavily nickeled and has a powerful 4-inch lens mirror reflector. No other make of motorcycle headlight can equal it.

A SOLAR Lamp



We made the first gas bicycle lamp sold. Solars have always led in improvements. If you want the latest things in motorcycle lamps send for the Solar Catalog. See Solar Headlights and Lamps at your dealer's.

BADGER BRASS MANUFACTURING CO.
Kenosha, Wis. [139] **New York City**

116 Crescent Ave.
BRIDGEPORT, CONN.

Motorcyclists and bicyclists should consider the importance of having their tires inflated to the right pressure.

IT IS TIRE ECONOMY AND IT SAVES MONEY

To know what pressure you have in your tires, use a

SCHRADER
Universal Tire
Pressure Gauge

(Trade Mark Registered in U. S. Patent Office)

(Patented March, 1898—Other Patents Pending)

It will tell the exact pressure in your tires at any time, day or night, by simply holding this Gauge to your Valve for a second. Its recording sleeve remains in place, showing the exact pressure in the tire so that the Gauge can be taken anywhere and read, at night to the front of machine into the light of the lamps. After the pressure has been ascertained the Indicating Sleeve can be pushed back into the Gauge with your finger. No catches or snaps to operate or get out of order. This Gauge is 2½ inches long over all, short enough to apply easily to the smallest diameter of wheel and can easily be carried in the vest pocket or the change pocket of your trousers.

PRICE $1.00 EACH

KELLY HANDLE BAR CO., Cleveland, O.

The New England Racer Price $55

A WINNER

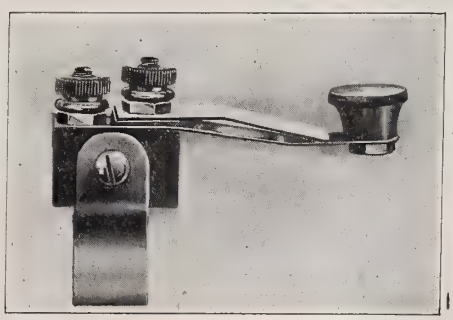
Fast Strong
Light Snappy

The Only Bicycle in the World Built for Sprint RACING on Small Board Tracks.

Three Reasons Why

First. It brings the rear wheel four inches closer to the hanger, bringing more weight on the rear wheel, and relieves the strain from the front wheel and forks. This will be appreciated by all track riders, as it is a well established fact that in order to acquire any great amount of speed on tracks with sharp turns, it is essential to have all possible weight of the rider on the rear wheel.

Second. The **New England Racer** uses from 14 to 19 inches less chain than the average racing models. This is a big factor in racing, as a long chain is bound to swerve, and if not kept tight will jump the sprockets or catch on the top of a tooth and break. This is a frequent occurrence on board tracks. On the **New England Racer** the chain can be adjusted as loose as the rider desires without the least danger of jumping the sprockets or breaking.



Third. The rear stays being much shorter, are stronger, and will prevent the sprockets from pulling out of alignment with each other under great strain.

No. 5—MOTORCYCLE PEDAL. RIGID FRAME, RAT TRAP.
Well made, durable and sold at attractive prices.

Your bicycle tire needs are exactly met by at least one, and perhaps all, of these four leaders from

KOKOMO

Kokomo Defender Special

This popular guaranteed tire is specially designed and constructed for road use. It is made from the best materials obtainable, being carefully built up by hand with pure para inner tube, and, owing to the very high quality of the inner tube used, a puncture is very easily repaired.

Kokomo "New Oxford"

A medium price tire, yet so good in quality that it does not do it justice to call it a medium grade tire. We have built these tires so that in case of puncture they will not be worthless but can be repaired. Also furnished in smooth tread. .

Kokomo Dotted Tread

A tire that prevents skidding and is safe and reliable on wet, slippery roads and city streets. Of high quality and careful construction. Furnished in road weight or in thick tread.

Kokomo Guaranteed Red Thorn

Made of red rubber, is extra heavy and is built especially for long service.

Are you profiting by what we offer you in Kokomo Tires?

KOKOMO RUBBER CO., Kokomo, Ind., U.S.A.

12,000 Miles

WITH ONE SET OF

WHITNEY

MOTORCYCLE CHAINS

Read the following letter by A. H. Helgeson who has made a remarkable record with one set of "Whitney" Chains on a Minneapolis Motorcycle. These chains have been driven from the Pacific to the Atlantic, from Canada to Mexico, and all over California, through rain, mud, dust, and sand and are still good.

Can any service be more strenuous and severe than this?

What test could show more clearly the true strength and wearing qualities of "Whitney" Chains?

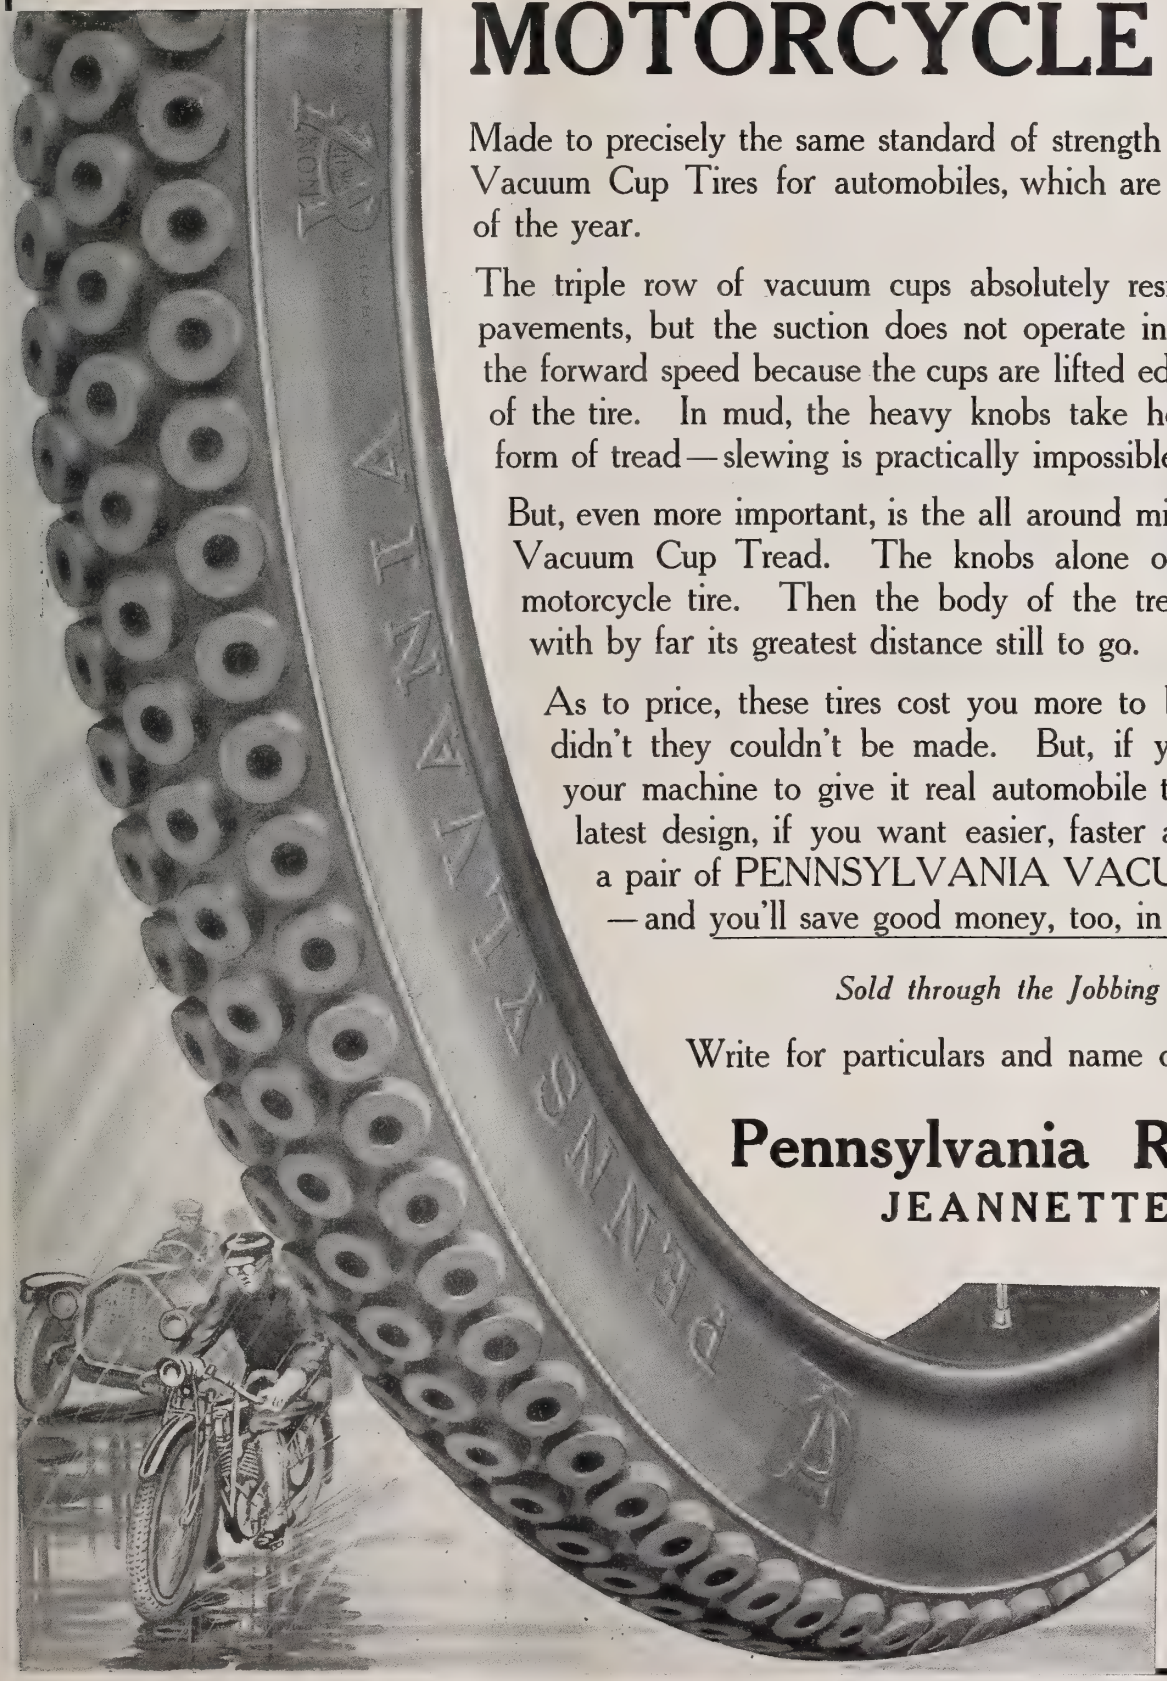
THE WHITNEY MFG. CO., Hartford, Conn.

Dear Sirs:—Yours of February 28th at hand. In regard to old chains, I have now covered over 12,000 miles on one set of your chains and have not even exchanged drive chain for pedal chain. Not one link or roller broken. Have carried tandem lately, which is a strain on chains. Just think of what these chains have gone through! From Los Angeles to New York, beside myself pulling 150 lbs. of extra luggage, and then from Canada to Mexico, and all over California, and still stick together. It sounds impossible, but this being the fact.

I will send old chains by express next week, as I intend to put on a new set. The old chains have done their duty, and then some. I think they are still good for a few thousand miles.

Put me down as a booster for "Whitney" Chains, as I will have no other.

Respectfully yours,



733 Ottawa St., Los Angeles, Cal. A. H. HELGESON.

"Whitney" Chains are made by specialists, in a factory especially equipped for the making, with years of experience to back them; made from material chosen for quality regardless of cost.

THE WHITNEY MFG. COMPANY, Hartford, Conn.

Set a New Pace in Motorcycle Tire Service

Pennsylvania Vacuum Cup MOTORCYCLE TIRES

Made to precisely the same standard of strength and efficiency as our Vacuum Cup Tires for automobiles, which are the service sensation of the year.

The triple row of vacuum cups absolutely resists skidding on wet pavements, but the suction does not operate in the slightest against the forward speed because the cups are lifted edgewise by the rolling of the tire. In mud, the heavy knobs take hold as can no other form of tread—slewing is practically impossible.

But, even more important, is the all around mileage capacity of the Vacuum Cup Tread. The knobs alone outwear the ordinary motorcycle tire. Then the body of the tread goes into service with by far its greatest distance still to go.

As to price, these tires cost you more to buy. Yes. If they didn't they couldn't be made. But, if you think enough of your machine to give it real automobile tire equipment of the latest design, if you want easier, faster and safer going, buy a pair of PENNSYLVANIA VACUUM CUP TIRES —and you'll save good money, too, in the long run.

Sold through the Jobbing Trade.

Write for particulars and name of nearest distributor.

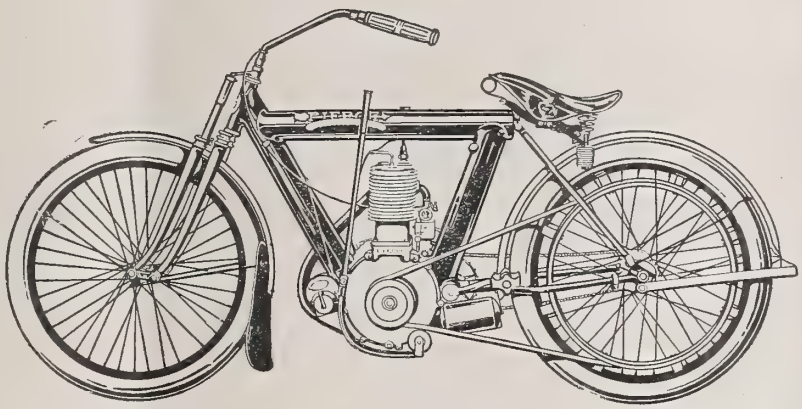
THE NEW R-S
Has Come Into Its Own

The First Public Test of The 1911 Reading Standard

was in the New York Motorcycle Club Double Century Run, May 7.

Four New 1911 Reading Standards started; all finished with perfect scores. No trouble, no delay, no worry. The comfort, convenience and safety of the Double Brake System, Adjustable Foot Rests, Shock Absorbing Seat Post, and above all the remarkable efficiency of the R-S Ball Bearing Motor was conclusively demonstrated, not only to the riders, but to nearly one hundred (100) contestants who watched the performance of this machine with great interest. The first 50 miles became a road race and the New R-S proved its speed as well as reliability, two of them being the first singles to reach Patchogue, beaten only by three big twins, two of which started several minutes ahead of the R-S.



A Word to Live Dealers—The New R-S has more visible and prominent selling points than any other motorcycle now on the market, and above all there is quality in design, workmanship and material that has ever before been reached on motorcycle construction. We have some valuable territory open. Write for catalogue and terms.

POPE
Racing Bicycles

Used By America's Best Racing Men

COLUMBIA, TRIBUNE AND RAMBLER RACERS

Pope racers are made in three styles, Columbias, Tribunes, and Ramblers, each retaining the distinctive features of its respective line, but containing in addition, special features, suggested by some of America's best racing men. They are real racing machines —not converted roadsters.

What a Prominent Race Promoter Writes.

J. M. Chapman, probably the leading race promoter in this country, writes :

> "In the Six-Day Bicycle Race promoted by me in the Boston Arena, October 31st-November 6th, some of my riders changed from bicycles they had been riding to the COLUMBIA, choosing this machine because of its stiffness and less likelihood to break on the steeply banked turns. COLUMBIAS are indeed very popular racing machines and are much in evidence in races. Good Bicycles are very necessary for good riding."

The same qualities which have made Pope Bicycles pre-eminent as racers are responsible for their success in general use.

The Pope Manufacturing Co.
HARTFORD, CONN.

FISK
BICYCLE TIRES

The Best by Actual Test

LAST year 50 per cent. of the high-priced wheels manufactured were equipped with Fisk Tires.

THIS year 75 per cent. of the medium and high-priced wheels will be sent out with Fisk Tires.

THIS shows how Fisk Bicycle Tires have steadily gained in popular approval. Experienced wheelmen are now demanding them and the manufacturers of Iver Johnson, Pope, Pierce, Yale, Emblem and Snell wheels are using only Fisk Tires as standard equipment.

DEALERS will find a ready-made demand for new Fisk Equipment and replacements. Write for catalog and trade prices.

GOODYEAR

5 Types of Long-Service Motorcycle Tires

For 1911 we have produced the greatest tire of motorcycle tires ever placed on the market.

The line is also the largest—five separate, distinct types of tires—one for every road condition.

With the launching of this splendid line we have also set in motion a mighty business-producing campaign for mutual benefit of dealers and the Goodyear Company. Extensive advertising, telling riders of the amazing merit of the Goodyear line, is already piling up the sales. In addition, our sales promotion campaign is accomplishing tremendous things.

This line is a large trade-winner, for the fact that it is a fast seller is due to plain merit and a wide range of choice.

For each type of Goodyear Motorcycle Tire is the longest-wearing tire of its kind in the world. So it produces mileage at least cost to the rider—at a more reasonable price than any other tire in the world. And the Goodyear costs no more than commonplace tires in the beginning—in the end its cost is far below any other tire, for it lasts longer.

The Goodyear Corrugated Tread Tire is for the rider who uses his motorcycle chiefly for pleasure-riding.

The Goodyear Studded Tread Tire is for the all-the-year-'round motorcycle that must combat muddy roads. It is a wonderful non-skid tire and in addition is self-cleaning, owing to the improved construction of studs.

The Goodyear Non-Skid Tire—the tread forming a perfect vacuum with the street—absolutely prevents side-slipping and skidding because of the power of the force of suction. This tire is used on all machines of the Chicago Police Department's Motorcycle Squad.

Our two types of Blue Streak Racing Tires are for dirt tracks and the saucer—combination and plain treads, respectively.

Our extensive advertising, our sales promotion campaign and the sterling worth of every type of Goodyear Tires is making this splendid line a highly profitable proposition for dealers and agencies. For trade quotations please write us at once. Address

THE BICYCLING WORLD and MOTORCYCLE REVIEW
Founded 1877

Vol. LXIII. New York, U. S. A., Saturday, May 27, 1911. No. 10

LIST PROVES ENORMOUS DEMAND

One Motorcycle Concern Already Has Names of 100,000 Prospective Buyers —More Added Daily.

As one of the first questions confronting the thinker on motorcycle trade matters, the query as to how many people there are who may be considered possible motorcycle customers at the present time, is engaging considerable attention, and the facts and figures that are being elicited from various sources in the search for information are proving amazing even to those who have been foremost in optimism. Without any definite data, it is possible for almost anyone to predict with safety that hundreds of thousands of motorcycles will be sold in the United States within the next few years, but broad general guesses are less valuable to manufacturers in aiding them to estimate probable demand than specific figures, a fact which lends importance to the information vouchsafed by the president of one motorcycle company that his concern has the names of no less than 100,000 prospective customers who are known to be in the market for motorcycles at the present time, and who sooner or later will become actual purchasers.

Not all of these 100,000 prospective customers are in a position to buy new machines, as many of them are limited, in in purchasing power and in interest, to second-hand motorcycles, but the names already obtained are being added to daily at a rate that will soon make the list nearer 200,000 than 100,000. The list includes names obtained directly from agents, names of friends sent in by customers who already are motorcyclists, and names of inquirers answering advertisements and expressing their intention of buying.

Minneapolis Gets a Stewart Branch.

The Stewart & Clark Mfg. Co., of Chicago, Ill., making the Stewart speed indicator, has opened a branch office in Minneapolis, to take care of the growing business in the Northwest. It will be in charge of Alfred H. Champlin. Three new men have been added to the Stewart traveling force: Thomas J. Snelling will cover Iowa and Minnesota; J. B. Suess will travel Illinois and Wisconsin, and J. J. Hildebrecht in Pennsylvania and New Jersey.

Fisk Opens in Sacramento.

The Fisk Rubber Co., of Chicopee Falls, Mass., has opened a branch in Sacramento, Cal., making the 30th direct factory branch now operated by the company in different parts of the country. The new branch is located at 1310-1312 K street, and like all the other Fisk branches, is equipped with a repair department. It gives direct factory service on Fisk tires not only to agencies, but to the retail trade.

Githens Leaves G & J to Join Dowse.

Herbert A. Githens, manager of the motorcycle and bicycle sales department of the G & J Tire Co., Indianapolis, Ind., has resigned to become associated with his former chief, Byron C. Dowse, in the newly organized Federal Rubber Mfg. Co., of Milwaukee, Wis. His wide knowledge of the trade will be an asset in the sales organization of the new company.

New Dealers Start in Modesto.

Medlecott & Johnson have opened a motorcycle and bicycle store in Modesto, Cal., at 903 H street. They hail from San Francisco, where they gained considerable experience in the motorcycle business.

RELIANCE WISHES TO CONTINUE

Bandlers Make a Proposition to the Creditors—Would Waive Their Own Claims if Accepted.

Creditors of the Reliance Motorcycle Co., of Owego, N. Y., which recently closed its factory following the discovery that certain defects exist in the engine and oiling system of the 1911 model, were called upon, at a meeting in New York City on the 26th inst., to consider giving the company the opportunity of continuing in business and going ahead for the season of 1912, rather than to close it out at forced sale, where the present liquidation of the assets would bring little, if anything. The creditors are asked to accept 1912 notes of the company for their claims, the first of the series of notes to be payable June 1 of next year.

Since November, 1910, the Bandlers and their friends have put into the company over $40,000. This claim they will waive if the other creditors will permit the company to continue. They propose to advance sufficient money to carry through the manufacture and marketing of a season's output for 1912, and, according to their plan, they will repay to themselves only the money that they advance from now on, after which the net proceeds resulting from the sale of the 1912 machines will be distributed pro rata among the other creditors. Thereafter the plant is to be sold for the best advantage of the creditors, unless the Bandlers decide to continue in the motorcycle business, in which event any balance due creditors is to be satisfactorily arranged for in order that they may continue.

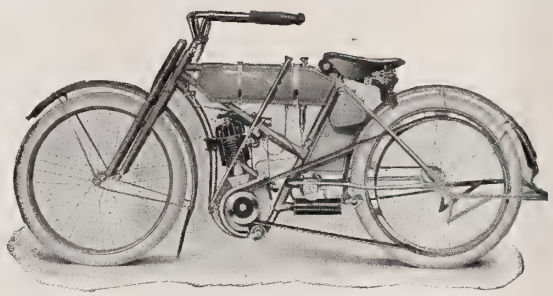
The assets at the present time are given as amounting to $55,621.86, while the lia-

bilities, including the Bandler claims of $40,000, come to a total of $74,327.46. The assets are listed as follows: Real estate and buildings, subject to first mortgage held by bank (including $2,144.19 repairs made since November 1, 1910), $13,319.03; office and shop fixtures, $880.50; unearned insurance premium, $150; second-hand motorcycles, $500; machinery, tools and equipment (subject to mortgage of $1,719.74), $17,719.95; material and labor that can be used in connection with the production of a new model, $23,052.37; yielding a total of $55,621.86. The liabilities are given as follows: Bills payable (includes $1,719.74 secured by liens on machinery), $13,431.27; accounts and open accounts, $11,483.85; Tioga National Bank (mortgage of $5,000 on real estate), $6,000; Messrs. Bandler, $40,825; deposits of others, $1,191.20; wages, $1,396.14; a total of $74,327.46. If the business is permitted by the creditors to continue, the Bandlers waive their claims in favor of the other creditors, and this deduction of $40,825 would leave the total of liabilities as $33,502.46.

Harris on a Coronation Mission.

D. P. Harris, head of the D. P. Harris Hardware Co., New York City, manufacturers' agents and distributors to the trade, sails on the Lusitania on the 31st inst. with Homer P. Snyder, of Little Falls, N. Y., for a combined business and pleasure trip of about two months. They will go direct to Paris, and later to St. Petersburg, returning to England by way of Germany, in time for the coronation of King George V. At the coronation Harris has a good chance of being right up in the front row. He has been commissioned as a special representative of an Episcopal church in Nova Scotia, in which he takes an active interest, to convey to King George the church's thanks for a gold Bible, which the King, as the official head of the Anglican church, recently presented to the Nova Scotians on the occasion of the celebration of their 300th church anniversary. After the coronation Harris will return by way of Nova Scotia, where he spends a good part of his summers. He will be back in time for the big cycle and motorcycle trade meeting in Atlantic City, N. J., where other members of the trade will have a chance "to shake the hand that shook the hand" of King George.

Detch Believes in Fire Insurance.



George C. Detch, of Indianapolis, Ind., who sustained a loss of about $135 recently in a fire that visited the building in which his cycle establishment is located, is somewhat annoyed at the insurance bureau reporter who, in recording the loss, added the words "no insurance." Detch says: "Any man that does not carry insurance on his store should be classed with the third-raters—the lowest type of business man, and I hope that I am not of that type. It happens that we were carrying about $6,700 insurance."

FLAT BELT ON A WAGNER MODEL

Offered as an Option in the Transmission, Instead of V Belt—Idler Has Spring Tension.

Affording a choice between V belt and flat belt transmission a new model Wagner motorcycle, with flat belt drive, is now being offered by the Wagner Motorcycle Co., of St. Paul, Minn. In its general features, aside from the transmission, the new model is much the same as the 4 horsepower Wagner with V belt, and the price is the same.

For the tensioning of the belt a hand operated spring tension idler is used, and ball-bearing idler pulley. A one-piece steel

WAGNER FLAT BELT MODEL.

crowned belt pulley is used on the rear wheel, both the engine pulley and the rear pulley being leather-lagged. The belt is 1¼ inches wide, heavy double ply, waterproofed, cemented and stitched. The new model, which is ready for delivery, has the standard Wagner diamond loop frame and twin shock absorbing fork. The engine is 3¼ bore and 3⅛ stroke. The wheel base is 55 inches. The machines are finished only in French gray.

Gauge Equipment on Gas Tank.

Indicating the amount of acetylene gas remaining in the tank, pressure gauges are being attached to the latest models of

Prest-O-Lite motorcycle tanks by the Prest-O-Lite Co., of Indianapolis, Ind. The gauge is fitted to the end of the tank, as shown in the accompanying illustration. This marked improvement puts the motorcycle tank on an equal footing with the automobile type of Prest-O-Lite, so far as equipment is concerned, and eliminates the chance of the user finding himself out of illuminating gas miles from home because of being unable to tell how much gas remains in the tank. An interesting booklet showing the best manner of attaching the Prest-O-Lite tank to various makes of motorcycles and illustrated with half-tone pictures of different makes with the tank attached, is being sent free to motorcyclists.

Trenton Has a New Motorcycle Agency.

In Trenton, N. J., a new motorcycle agency has been opened, known as the Motor Shop. Its proprietors are J. E. Allen and O. L. Holmes. Allen is a mechanic of ability, being chief electrician of the Trenton Iron Co., while Holmes has traveled extensively for the same firm as an erecting engineer. Both are enthusiastic motorcyclists, and Holmes is the organizer of a local motorcycle club. The new concern will handle the Thor line.

Fry Distributes Snell and Yale.

Quick delivery of Yale and Snell bicycles to Pennsylvania bicycle dealers is to be expedited by a new arrangement that the Consolidated Mfg. Co., of Toledo, O., the maker of these brands, has put into effect. The company has arranged that Keyser Fry, 616 North Eighth street, Reading, Pa., an established cycle jobber, shall distribute both Yale and Snell bicycles in his territory.

Takes Excelsior in Louisville.

A change in the Excelsior motorcycle agency has taken place in Louisville, Ky. The agency formerly was held by Ray Bros., of 308 West Jefferson street, but has been obtained by the Wolke Cycle Co., of 635 East Broadway, which already had the Emblem agency.

Toledo Equipment Is Bankrupt.

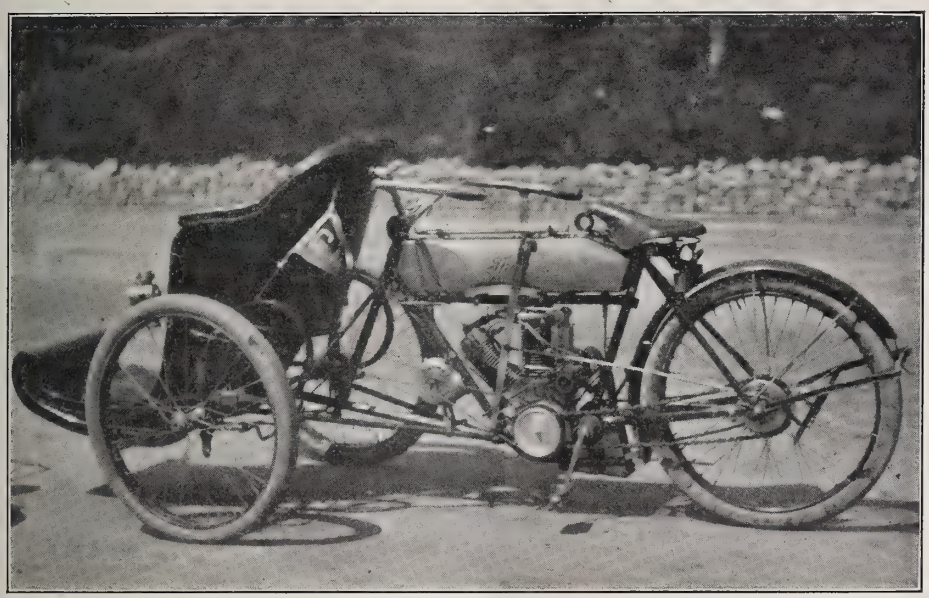
A petition in bankruptcy has been filed by the Toledo Equipment Co., 318½ Superior street, Toledo, O., a concern dealing in bicycles, automobile accessories and phonographs. The liabilities of the company are placed at $10,650.32 and assets $5,753.62.

Huter Acquires Dallas R-S Agency.

George Huter, of Dallas, Tex., has taken over the agency for the R-S motorcycle. Huter is well known among the motorcyclists of the state, being president of the Lone Star Motorcycle Club of Dallas, and official F. A. M. referee for the state of Texas.

Franklin Cycle Intends to Build.

The Franklin Cycle & Supply Co., of Columbus, O., the Central Ohio agent for Excelsior and Thor motorcycles, will erect a two-story building for its business. The structure will be at the corner of Fourth and Gay streets.



Loomis & Blair Incorporates.

The Loomis & Blair Motorcycle Co. has been incorporated in Los Angeles, Cal. The company begins with $10,000 capital stock, of which $1,010 has been subscribed.

HAIR BLOWER COOLS THE ENGINE

Overheating Difficulties Banished in Novel and Ingenious Way—Tri-Car with Unusual Fittings.

Overheating of the engine always has been one of the most serious problems involved in the use of tri-cars, not only because of the heavy load carried, but chiefly on account of the fact that the arrangement of the front seat blankets or prevents the flow of cooling air against the outside of the cylinders. In attempting to remedy this drawback designers have fitted cooling fans, but these proved only partially successful. In automobile practice blower cooling has been tried on air cooled engines with success, but the first instance of its application to a motorcycle is of but recent birth.

TRI-CAR EQUIPPED WITH BLOWER COOLING SYSTEM

In seeking to overcome the overheating of his tri-car engine, Maurice T. Sullivan, of New York City, a pioneer rider, recently conceived the idea of applying a blower fan to his machine and immediately decided to reduce his theory to practice. His machine is a 6 horsepower Thor twin, to which is coupled an Indian fore-car atttachment. The first step was the procuring of a suitable blower, and after looking around Sullivan decided that a small sirocco blower, such as is used for drying hair in hair dressing parlors, was best adapted for the purpose.

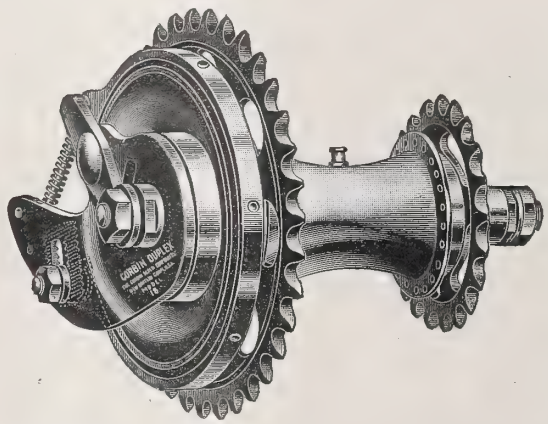
After figuring out the simplest and most direct way to drive it, the blower was mounted on the lower rear stays of the fore-car running gear, and further supported by the diagonal frame tube. The housing is of aluminum and is 4½ inches in diameter. The device consists of a sirocco wheel, mounted on ball bearings and built up of a large number of bronze blades. The wheel is 1⅜ inches wide and 4 inches in diameter and the individual blades are ⅜ inch deep.

Air is drawn in through a 2¾ inch intake and delivered through a 2 inch exhaust. At ¼ pound atmospheric pressure and 2,600 revolutions the fan is said to deliver 37 cubic feet of air per minute. It is geared 6 to 1, and the power required to drive it is estimated at 1-50 of a horsepower. The drive is by a round leather "shoestring" belt running over aluminum pulleys. The large driving pulley is mounted on the motor countershaft. The entire outfit weighs only 2 pounds and 7 ounces.

It had its first real test in the 210 mile Southampton run of the New York Motorcycle Club on May 7th, and kept the engine remarkably cool all day, despite hard driving. Under the present arrangement the air blast is somewhat scattered by being split by the diagonal frame tube in front of the blower outlet port, and Sullivan plans to remedy this by fitting shields which will direct a large portion of the air directly at the cylinders.

Another feature of the machine is the application of an Indian free engine clutch to the rear wheel. Usually the clutch is fitted to a countershaft, but on the Thor no countershaft is used, because of the undergeared motor drive. The only changes necessary to fit the clutch were the straightening of the left rear stay, giving an increased width between stays of 1¼ inches, and the making of a special left rear cone, 1¼ inch longer than regular. The clutch is operated by the usual hand lever. One of the advantages which Sullivan claims for this clutch arrangement on the rear wheel is that it brings the chain pull directly over the center bearing, and as the sprocket is carried between two bearings there is no side chain pull on clutch or bearings.

RESTORING OIL PUMPS TO ACTION

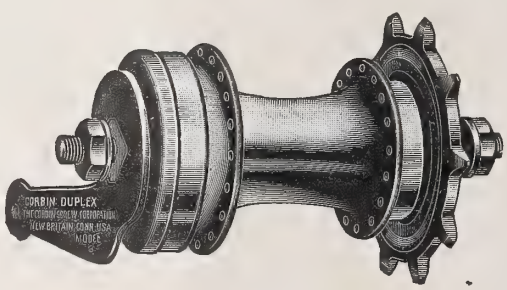


Procedure Necessary When Washers Come Off the Plunger—Flipping Out the Loosened Parts.

Where both mechanical and auxiliary hand pump lubricating systems are fitted to a motorcycle the rider practically is immune from lubrication trouble, for if one system goes wrong he has the other to rely on, and his common sense should tell him when his engine needs oil if the mechanical pump goes on strike without notice. Where only a hand pump is fitted, lubrication is a more serious matter, and the system needs frequent inspection to insure its reliability. One of the rather infrequent but most annoying mishaps that hand pumps are heir to, and one that can put the lubrication system entirely out of commission for the time being, is to have the washer retaining screw on the end of the plunger come adrift. When this occurs, the washers slide off and there is "nothing doing" in the lubricating way when the plunger is drawn up to inject a charge into the motor base. It is then that the trouble becomes apparent and it is likely to give many a rider a tall scare unless he knows how to go about the repair. In such a case the first thing to do is to withdraw the plunger rod, unscrew the cap on top of the pump barrel and remove the washers. They usually will be found at the bottom of the barrel, probably entirely under oil or nearly so. The best way to remove them is with a spoke or a piece of wire. This takes time and tries temper, but it can be done.

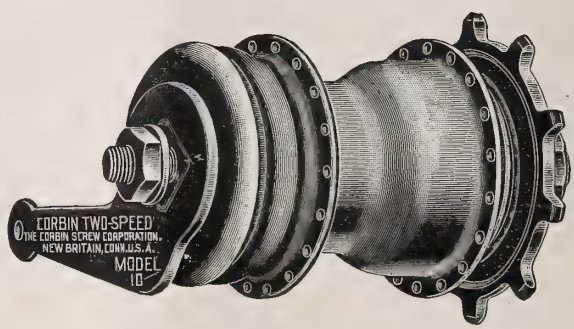
The next problem is a little more difficult and that is to extract the screw and metal washer, which also are at the bottom of the pump barrel. The best way to do this is to uncouple the feed pipe from the pump to the motor base, unscrew the nipple at the bottom of the pump barrel, take out the ball valve and spring and let the oil in the pump barrel drain out. This operation will not release any of the oil in the tank for that is retained by another check valve. After the oil has been drained from the pump barrel the screw and washer will be visible. By poking a spoke or straight wire in the hole at the bottom of the barrel and giving the wire a quick shove upward it will flip the screw and washer out, although it may require several trials to do so. This done, nothing remains but to reassemble the pipe connections and put the washers on the plunger. Before this is done the plunger and screws and washer should be washed in gasoline to remove all traces of oil, else the screw is apt to come loose again in a short time. It can be fastened securely by shellacking the threads after they have been cleaned, which will cause them to "stick" tenaciously.

CORBIN



THE CORBIN SCREW CORP. CORBIN NEW BRITAIN, CONN. U.S.A.

Corbin V-Band Motorcycle Brake



Built on a scale commensurate with the duties of a high speed motorcycle brake.

By the use of a V-shaped drum and a triangular friction band, 50 per cent. more braking surface than on previous models, is obtained, and the flat band is superseded. The releasing mechanism is entirely outside, acting directly on the end of the brake band, making its action easy and reliable. There is no interference with chains. Altogether it is the most effective motorcycle brake on the market.

Corbin Duplex Bicycle Coaster Brake

In every part and function a truly perfect coaster brake.

Corbin Two-Speed Coaster Brake

Giving the cyclist high or low gear at will, together with coasting free wheel and efficient brake.

Dealers' "Invasions" of Territory.

One of the difficulties that beset many motorcycle dealers is in trying to keep other agents who handle the same make of machine from invading their territory. While a majority of manufacturers protect a dealer to the extent of refusing to sell machines to others in his territory, a few makers are not so particular in this respect and take any direct sales that come their way, regardless of any moral claim the agent in that district may have to the business. It is not the manufacturer who sells direct in his territory that the agent has to worry about most, however, but the outside agent who seeks to cultivate gardens other than his own, either by price inducements or other concessions calculated to draw customers.

When a dealer is allotted a certain slice of territory by a manufacturer it means that he is given the exclusive right to handle a particular make of machine in that district, but if the dealer cannot control prospective purchasers of motorcycles in his territory and prevent them from buying machines elsewhere, the manufacturer is not to blame.

Of course, if Dealer B is luring away customers in Dealer A's territory by price cutting, A is justified in complaining to the manufacturer, and the latter should take steps to protect him. But if A's customers prefer to deal with B because he gives better service or better treatment, and has more reasonable charges, A has no just cause for complaint. He cannot expect B to refuse to sell to buyers outside his own territory, or to ask them why they do not deal with A. The result would be that they would quickly go and leave their money with some third dealer.

Personality, treatment of customers and business methods are the vital factors in successful merchandising, and the dealers who can offer these in the best way will draw business from far outside their own territory. Instances are not wanting where an outside dealer reaps a good slice of business that geographically belongs to another dealer, but which the latter loses because of his unpopularity with local riders.

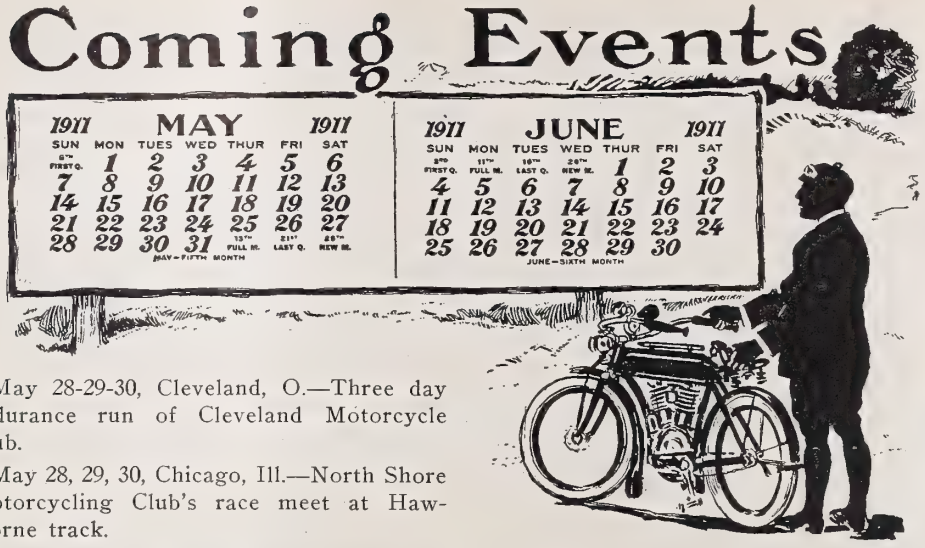
Checking loss of business in his territory where sales are going to another dealer is a matter for the losing dealer to remedy himself as best he can. Provided an outside dealer does not cut prices, either directly or indirectly, through the offering of free accessories, repairs or storage, he has a perfect right, under most contracts, to sell motorcycles to people outside his own territory if he can do so. No manufacturer or dealer has sufficient control of the purse strings of the residents of any district to dictate to them as to where they shall buy motorcycles or supplies. The agent can solicit the business in his territory, but he cannot command it, and if some rival is getting the business the remedy would seem to be an improvement in his own business methods.

Easily-Read Numbers in Races.

Practically every race meet that is held demonstrates forcibly the unsatisfactory and misleading system of numbering contestants that is now prevalent. One of the most desirable amendments which can be made to the F. A. M. competition rules at the annual meeting this summer is the adoption of a standard style of numbers, with the requirement that they be used at all sanctioned contests.

At present, numbers are painted on cloth, or even paper, and pinned on the clothing of the rider, hastily and carelessly in most cases. Generally numbers are not thought of until the last minute before a race starts and then there is a mad rush to procure them and slap them on in any sort of fashion. There is no standard size of number required, and in consequence some are large and others so small that it requires a field glass to distinguish them from the official stand. They cannot be distinguished by the spectators, thus rendering programs practically worthless, as few spectators can identify riders except by their numbers.

When a rider is moving at the speeds now attained, unless he has a generous sized number pinned securely to his back so that it does not curl up or flutter in the wind, it is almost an impossibility to make out the figure, and his identity must be learned in some other way. This, of course, gives opportunity for errors in scoring and for disputes. The F. A. M. might profitably adopt the English system of numbering, consisting of the use of large metal disks painted black with the numbers in white, the disks being fastened to either end of the front axle.



With this arrangement, the white numbers on black ground stand out clearly, as the figures can be made large. The disks are about 14 inches in diameter and do not revolve with the wheel, being held stationary by the axle nuts. Numbers so arranged can be read at a distance, both as the rider approaches and as he recedes, and there is little or no chance for error in scoring. Such numbers have been used in this country on a few occasions and have proved a great improvement over the usual fluttering rag kind.

Why "Compromise" Needlessly?

Threatening legislation, which but for the vigilance and activity of men having the motorcyclists' cause at heart might have been put into effect, has been averted in New York State, and consequently the motorcycle owner in the Empire State will not have to register, carry a tag or pay an annual fee to the state. With this example before them, why should motorcyclists in any state accept "compromise" and willingly agree to licenses, registrations, tags and fees, even at reduced rates under what automobilists must pay?

In 1904 the Federation of American Motorcyclists, through its executive officers, proved to the satisfaction of the Legislature that motorcycles are not automobiles and should not be taxed as such.

Coming Events

May 28-29-30, Cleveland, O.—Three day endurance run of Cleveland Motorcycle Club.

May 28, 29, 30, Chicago, Ill.—North Shore Motorcycling Club's race meet at Hawthorne track.

May 28 and 30, Terre Haute, Ind.—Terre Haute Motorcycle Club's race meet; open.

May 29, 30 and 31, Hartford, Conn.—Motorcycle races at Charter Oak Park.

May 29-30, Newark, N. J.—Twenty-four hour endurance run of the New Jersey Motorcycle Club to Atlantic City and return.

May 30, Rockford, Ill.—Rockford Motorcycle Club's race meet at the driving park.

May 30, Bridgeport, Conn.—Bridgeport Motorcycle Club's race meet.

May 30, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

May 30, Detroit, Mich.—Racemeet of the Motorcycle Club of Detroit Wheelmen at State Fair track.

May 30, Norwich, Conn.—Norwich Motorcycle Club's reliability run.

May 30, Canton, O.—Bicycle road race under auspices of local dealers.

May 30, Baltimore, Md.—Maryland Motorcycle Club's race meet.

May 30, Kokomo, Ind.—Kokomo Motorcycle Club's race meet.

May 30, Canton, O.—Canton Motorcycle Club's race meet.

May 30, Kenton, O.—Motorcycle races.

May 30, Troy, N. Y.—Motorcycle race meet.

May 30, Denver, Colo.—Motorcycle race meet at Tuileries Park.

May 30, Wheeling, W. Va.—Ten mile bicycle road race; open.

May 30, Boise, Ida.—Boise Motorcycle Club's road races.

May 30, Salt Lake City, Utah.—Eighteen mile bicycle road race.

May 30, Elgin, Ill.—Elgin Motorcycle Club's race meet at Wing Park.

May 30, Rockford, Ill.—Ideal Motorcycle Club's race meet at the driving park.

May 30, Grand Rapids, Mich.—Bicycle and motorcycle races at Michigan State Field Day, under auspices of the Western Michigan Cycle Club.

May 30, Peoria, Ill.—Peoria Motorcycle Club race meet at Peoria mile track.

May 30, Springfield, Mass.—Motorcycle race meet of the Springfield Motorcycle Club, at the Springfield Stadium.

May 30, Elmira, N. Y.—Elmira Motorcycle Club's first summer race meet.

May 30, Newport News, Va.—Peninsula Motorcycle Club's endurance run to Richmond and return.

May 30, Long Branch, N. J.—Long Branch Cycle Club's second annual road race meet; open.

May 30, Asbury Park, N. J.—Twenty-five mile road race of the Monmouth Cycle Club.

May 30, Plainfield, N. J.—Third annual 25 mile handicap cycle race of the Plainfield Cycling Club.

May 30, Rome, N. Y.—Rome Motorcycle Club's 250 mile endurance run.

June 3-4, Kenesaw, Wis.—Chicago Motorcycle Club's race meet.

June 4, Providence Motorcycle Club's first reliability run for Swenson trophy.

June 4, New York City—Concourse Motorcycle Club's fourth annual run to Savin Rock, Conn., and return; open.

June 4, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Greenfield, Springfield and return; 175 miles. Second section.

June 10, New Haven, Conn.—Motorcycle hill climb on Shingle Hill in West Haven.

June 11, Floral Park, L. I.—Italian-American "championship" 50 mile bicycle race.

June 17-18, St. Louis, Mo.—St. Louis Cycyling Club's annual Pike County tour.

June 18, Baltimore, Md.—Crescent Bicycle Club's annual spring road race.

June 18, Floral Park, L. I.—Century Road Club of America, New York State Division, 50 mile handicap bicycle road race; open.

June 30, Douglas, Isle of Man, Great Britain—First junior international Tourist Trophy race; 187½ miles.

Correspondence

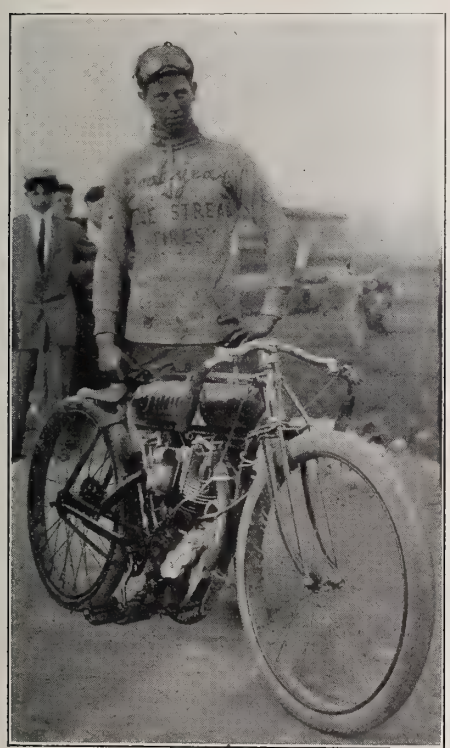
Defends Guttenberg's Dual Race.

Editor of the Bicycling World and Motorcycle Review:

In reference to an editorial appearing in the Bicycling World and Motorcycle Review of May 20 regarding an event to be held at Guttenberg on Sunday, May 21, in which a half-hour race was scheduled for professionals and trade riders competing simultaneously but not against each other, I would like to say that certainly as far as the rules are concerned I can see nothing that would prevent such an event. As a matter of policy, of course, it is open to question.

In road events professionals have competed under F. A. M. sanction simultaneously with amateurs, but not against them. They have been, as far as records are concerned, divided into separate classes. Unless professionals are to be treated as lepers and pariahs, unworthy of association, it would seem to me excellent policy to treat them with a reasonable amount of consideration, and to encourage them to ride in road events as long as they were not theoretically or practically competing against amateurs. I see no reason why the same should not also hold good of track events.

The half-hour event which was programmed at Guttenberg and took place there was of this nature. It was distinctly stated on the entry blank and program that the two classes were separate; the trade riders competing for prizes of a specific cash value and competing among themselves. There was and could be no more competition between the individual riders of the two classes as far as any award is concerned than there would be between an amateur trying to break a professional record that had been made on a Los Angeles or San Francisco track, in California, or, for that matter, on the same track.



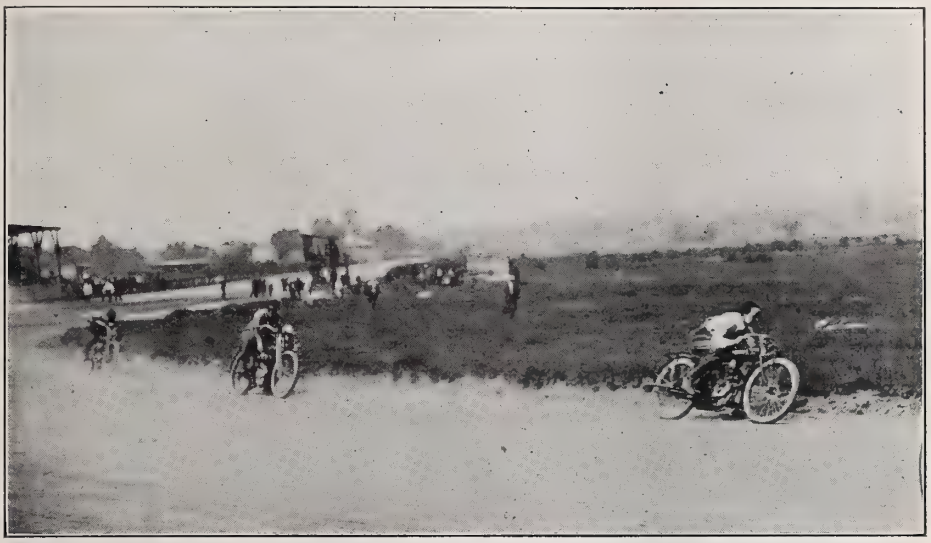
It may be that I have a hair-splitting mind that I can see no infraction of either the spirit or the letter of the rules in permitting such an event to take place. The practical reason for allowing it was simply that there was a scarcity of riders for such an event, and to have one or two men ride around the track for half an hour would have become monotonous to the crowd. While I do not believe in sacrificing or breaking the rules for any crowd or any promoter, I do believe that it is the part of good policy to try and attract the crowd and help the promoters who are honestly trying to give us racing in New York. To help them at the present time means that we will in all probability have good racing; not to help them or to obstruct them means that we will have no racing at all.

J. P. THORNLEY,
Chairman F. A. M. Competition Committee.

HART THE STAR AT GUTTENBERG

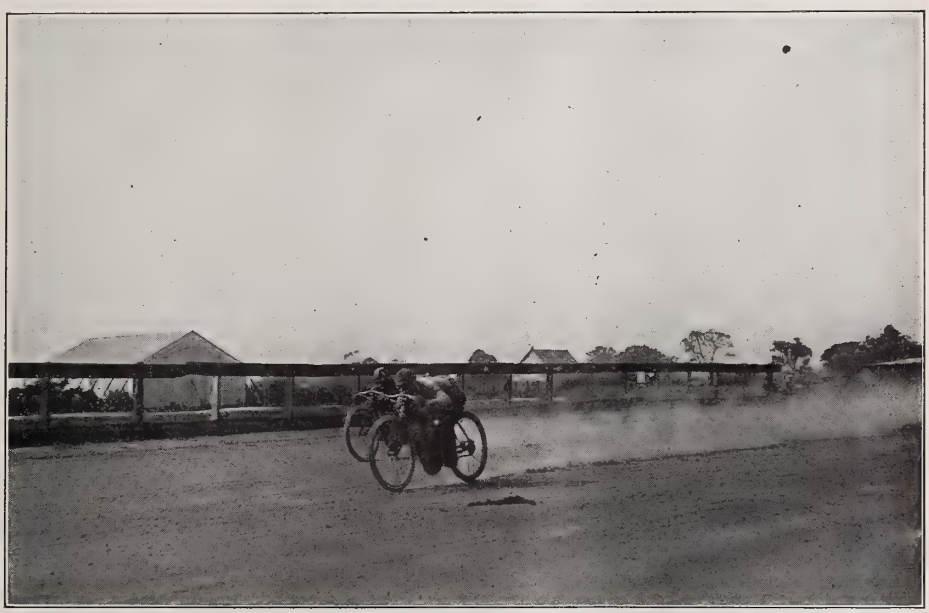
Teubner Captures the Twenty Mile Open—Balke Finds Victories Altogether Too Easy—Chapple Gives Up.

Tearing off a strip of daredevil riding equal in quality to any ever before shown on the Palisades speed platter, Frank Hart, the young New Yorker recently drafted into to Indian racing forces, made a game but unsuccessful effort to offset a sensational fall at the getaway of the 20 mile open for trade riders at Guttenberg, N. J., Sunday, 21st inst. Although Hart's desperate efforts to catch the field went for naught on account of tire trouble, he "delivered the goods" in brilliant fashion in the ten mile and half hour races for trade riders.



FRANK HART AND "NO. 26"

After cleaning up the professional events at Guttenberg for the second Sunday in succession, Charles Balke, the California "native son," is inclined to think that the Eastern professionals are "pie," at least around New York City. He had his rivals at his mercy at all times, and both of his victories were veritable gifts. He had the "goods," but was not called on to show more than a very small sample, and he won as he pleased. Chapple, who was expected at least to give Balke a semblance of a run for the money, stayed out of one race after it was held up 15 minutes to give him time to get ready, and in the other he retired before the end of the first mile. It looked as if he "quit" deliberately in the latter, not coming around to the stands, but he claimed his machine developed tantrums.

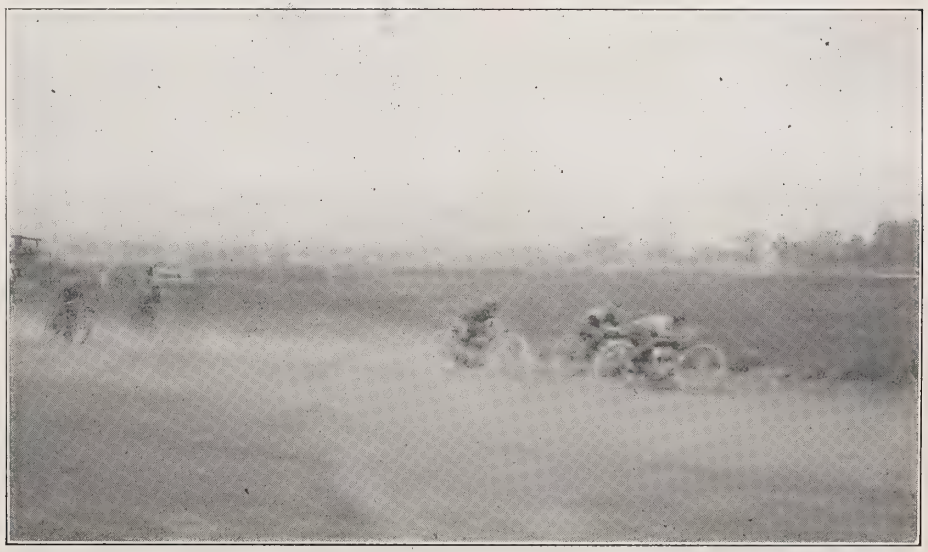


Hart's enforced retirement in the 20 mile trade riders event left "Will" Teubner, of the Merkel team, with a fine strong grip on first place and he never let go. Teubner rode a fast and pretty race, and, after Hart passed out, he never again was in danger and steadily drew away from the field. He won by nearly a mile. In the five mile private owner race, F. L. Vanderpoel, Indian, showed that his novice victory on the Sunday previous was no fluke, for he again won by a big margin over Robert Buttlar, Indian, and J. Frederick, Merkel.

Some exceedingly clever team work was shown by Balke and Hart in the half-hour mixed race for professionals and amateurs, the headliner on the program. Comparatively few became aware of it, so cutely was it done, but those who did enjoyed the tactics immensely. Incidentally, as far as the spectators were concerned, no classes were recognized, and whenever one rider passed another, regardless of class or position, he was cheered warmly.

This race was delayed for nearly 20 minutes by Chapple. He declined to ride his own twin, on the ground that it was not in good shape. Neither would he take Teubner's machine, although it ran in fine form earlier in the day. Chapple insisted on riding a 4 horsepower single, and then wanted a 25 second handicap from Balke. Not to please Chapple, but to make the race as interesting as possible, Referee Pitman tried to persuade Balke to allow the handicap, but the latter declined to do so, as he said it was against instructions.

FIVE MILE RACE FOR PRIVATE OWNERS



BALKE AND GUTERMAN IN THEIR MATCH

Finally Chapple agreed to ride from scratch. Balke and Louis Guterman, on Indians, were the others in the pro division. The trade rider aggregation consisted of Hart and Constant, on Indians, and J. J. Cox, R-S. Chapple got away poorly and Balke went to the front with Hart tacking

on. Guterman also got away badly, his control sleeves uncoupling and stalling him as he was pushed off. Balke and Hart burned up the back stretch and opened a gap on the field. Chapple did not show any great speed and disappeared for good in the vicinity of the top turn. His early flickering out was disappointing, for although the machine had not been used in previous events of the day, it was thought to be capable of fast work.

For the first five miles it was a lively scrap between Balke and Hart. Balke led all the way and handed out such a sizzling gait that Hart was the only one who could hold on. Constant was running third, with Guterman and Cox fighting it out further back. Guterman was slowly regaining his lost ground at the start. Coming into the stretch in the sixth mile Hart's speed dropped off suddenly and the crowd voiced its disappointment, for his game riding all day had made him a warm favorite. He coasted in with a broken short driving chain and lost two miles while it was being replaced. Constant then was leading in the trade class, with Cox second. Balke, of course, was having a joy ride, with Guterman the only one to worry him, and that not to any serious extent.

When Hart returned to the fray he rode faster than before. Then some real track generalship was shown. Balke had the entire field in his rear, and he eased off a bit at a time, slowing the others also, but they did not seem to be aware of it. Hart had two miles to make up, and he looped it hard, passing the bunch and drawing away steadily. Balke was riding slower than before and had flagged the field to help Hart get back his lost ground. He was doing it quite perceptibly.

When Hart passed Balke the crowd yelled with delight, although the latter was two miles ahead. For several miles none of those in back of Balke realized what he was up to. Finally Constant either "got wise" or got tired of Balke's dust, for he shot out and passed him, only to be pulled down in a twinkling, for Balke was wide awake for would-be lap stealers. Hart was regaining a lap steadily, and Cox and Guterman were having a real exciting see-saw. The way Cox's old R-S twin held its speed was a genuine surprise to the "insiders."

At 14 miles Constant had several spokes cut out of his front wheel on the lower turn by "kissing" Cox's machine and lost three miles for repairs. According to officials who witnessed the mishap Cox skidded suddenly and Constant attempted to cut in without allowing sufficient clearance. No one went down, and there were no protests or penalties, but Constant got some advice from the referee about allowing more than a length before cutting in.

Hart lapped the field at 19 miles amid great cheers, having made up half his lost ground. This put him in the lead in the trade class again, for Constant then was three miles back, and Cox had been unable to recover the lap he lost at the start, when he had to stop to tighten a loose compensating sprocket. Balke and Guterman were on the same round at 20 miles, but Balke had a good lead.

Hart gained steadily and lapped Constant and Cox again at 26 miles. Time was nearly up now and as Balke completed his 28th mile he got the finish flag. He beat Guterman by a quarter mile, drawing most of his lead in a final spurt. About 43 seconds after Balke finished Hart got the flag, and he also rounded out 28 miles, three-quarters of a mile ahead of Cox. Constant was more than two miles back.

PITMAN TELLING WHAT'S WHAT

Teubner, Cox, Mercier, Hart and Constant were the starters in the 20 mile race for trade riders. All except Hart got away good, with Teubner on the pole. A few yards beyind the foul line Hart's machine suddenly bucked like a broncho and threw him, the machine falling on top of him with the engine racing wildly. Spectators shouted with alarm, and attendants ran to his assistance, for it was feared that he would be lacerated or burned. He had extricated himself by the time help arrived, and feverishly mounting, started in mad pursuit of the field, who were a quarter of a mile in front.

FERD MERCIER ON THE NEW, EIGHT-VALVE INDIAN

Right then the spectators saw some thrilling riding, for Hart threw caution to the winds and rode as if possesed of a thousand devils. He got a wild ovation for his gameness every time he passed the stands. In the meanwhile Teubner was setting a hot gait, having turned the second mile in a minute flat, and led Mercier, the second man, by the length of the stretch. Hart was closing the gap in big chunks when misfortune landed a knockout in the fourth round, both tires exploding simultaneously on the back stretch. It was a most unusual mishap and gave Teubner the victory then and there.

He gained steadily on the others and reeled off miles at the same consistent gait and all close to the minute. In the seventh mile Constant was lapped by Teubner, and in the ninth the former retired with a broken chain, having fallen on the top turn. At ten miles, the half-way station, only three men were left. Teubner was making a

How We Are Helping To Get Their Share

This year Harley-Davidson dealers have already sold and delivered more machines than the Harley-Davidson factory turned out during the entire year of 1910.

There are three reasons for this phenomenal record.

First:—The Harley-Davidson 1911 models are unquestionably by far and away the best machines we have ever built.

Second:—We are carrying on the most extensive national advertising campaign ever inaugurated by a motorcycle company.

In June of this year we are taking quarter, half and full pages in the national magazines herein illustrated and 50 others. We are telling 28,000,000 people of the joy, pleasure and economy of riding a Harley-Davidson. This campaign is bringing thousands of new prospects to our dealers' stores. The volume of sales that thus comes to our dealers has surprised both the dealer and ourselves.

Third:—To complete this sales campaign and to turn

How We Are Helping Harley-Davidson Dealers To Get Their Share of the June Business

This year Harley-Davidson dealers have already sold and delivered more machines than the Harley-Davidson factory turned out during the entire year of 1910.

There are three reasons for this phenomenal record.

First:—The Harley-Davidson 1911 models are unquestionably by far and away the best machines we have ever built.

Second:—We are carrying on the most extensive national advertising campaign ever inaugurated by a motorcycle company.

In June of this year we are taking quarter, half and full pages in the national magazines herein illustrated and 50 others. We are telling 28,000,000 people of the joy, pleasure and economy of riding a Harley-Davidson. This campaign is bringing thousands of new prospects to our dealers' stores. The volume of sales that thus comes to our dealers has surprised both the dealer and ourselves.

Third:—To complete this sales campaign and to turn the "wait a little while" and "I'll think it over" men into actual buyers we have a most complete factory "follow up" campaign. And it's doing the business, too. At the right of this advertisement you will find some of the booklets, folders and circulars used in this "follow up" campaign. They are bringing the dealer tremendous results. They are daily turning his prospects into sales. Naturally, Harley-Davidson dealers are enthusiastic over this sales system.

The Lister Motorcycle Co., Cleveland, O., says in part: "Sold 12 already out of the last batch of 47 prospects sent us. More sales coming."

C. H. Lang, Chicago representative, says: "Have averaged three sales a day for six weeks. The 'Harley-Davidson' sales system is surely O. K."

This "sales system" has naturally brought inquiries from territory where we are not as yet represented. These inquiries are awaiting good dealers' attention.

If you are in open territory and want to make connections with a wide awake progressive business house, if you can show us that you could properly handle the Harley-Davidson business either as a side line or by giving it your whole time, we have some mighty interesting information we should like to put before you.

HARLEY-DAVIDSON MOTOR CO., 757 L St., Milwaukee, Wis.

"The Silent Gray Fellow."

"King of the Country Road."

ALTHOUGH there are 44 active motorcycle manufacturers in America, NEARLY ONE THIRD OF ALL THE MOTORCYCLES SOLD IN THIS COUNTRY ARE HARLEY-DAVIDSONS.

runaway and Mercier and Cox were seesawing in lively style. Mercier had a powerful machine, but owing to a weak arm, which recently was broken, he could not hold the machine at speed and he wavered badly as it was. Teubner finished the last mile seven-eighths of a lap ahead and got a hearty welcome. Mercier beat Cox in a final dash by 25 feet.

With Chapple "stalling" and the crowd impatient for action, the miss-and-out professional was changed to a five mile match between Balke and Guterman. They made an exciting race of it, riding neck and neck, with Guterman drawing good leads and Balke chopping them down in big stretches. Balke won by 75 yards.

Hart's lust for speed became real consuming in the 10 mile trade riders open, and he proceeded to satisfy his craving. A scrap between Hart and Teubner was looked for, as they were pretty well matched, Hart having a faster machine, while Teubner is a better tactician. Teubner got away very fast and swung into the stretch going great guns. Hart was at his heels and after a sensational flight up the turn Hart went in front. The pyrotechnics were all over then, for Hart never was headed and gained steadily. He made the second circuit in a minute flat. Then he got under the minute, doing the third in 59⅗ seconds, and the fourth in 59⅗ seconds, the latter equaling the automobile record for the track. Then he dropped back to minute miles, and toward the last eased up a bit more.

Balke rode old reliable Indian No. "27," while Hart starred on No. "26," the new valve-in-the-head machine. It has four valves to a cylinder, two inlets and two exhausts, each pair being operated by one rocker arm, and is showing wonderful speed for its displacement of 52.26 cubic inches.

Referee Pitman handed out his first penalty on Sunday, M. Costello, Peugot, being the offender. For looking back in the ten mile trade event he was barred from further racing for the day, but was allowed to retain the third prize which he won in that event. Pitman is waging war on riders who look back, drag their feet on the turns, do any fouling, delay the starts or give any back talk, or otherwise infringe. He first gives them a warning, and on the second offense the axe falls. Those who have been inclined to trifle with him have found that it is very much akin to "monkeying with a buzz-saw," and most of them have about decided to "be good." Incidentally riders can feel sure of getting their prizes at race meets where Pitman rules, for he is insisting on a check from the promoters for the full value of the prizes before a rider goes to the line.

The track was very dusty Sunday, and made things disagreeable for the occupants of the stands, for they were suffocated by dense clouds of it every time the machines passed them. The homestretch, at least, should be well oiled. Summary:

Five mile, private owners, 61 class—Won by F. L. Vanderpoel, 7 Indian; second, Robert Buttlar, 7 Indian; third, J. Frederick, 6 Merkel. Time, 5:41⅕.

Ten mile open, trade riders, 61 class—Won by Frank Hart, 6 Indian; second, W. J. Teubner, 7 Merkel; third, M. Costello, 7 Peugeot. Time, 10:09⅗.

Five mile match, professional, Charles Balke vs. Louis Guterman, both on Indians. Won by Balke. Time, 5:27⅗.

Twenty mile open, trade riders, 61 class—Won by W. J. Teubner, 7 Merkel; second, Ferd Mercier, 5 T.T. Indian; third, J. J. Cox, 7 R-S. Time, 20:38.

Half-hour mixed race, professional and trade rider—Professional class won by Charles Balke, 7 Indian, distance, 28¼ miles; second, Louis Guterman, 7 Indian, 28 miles. Time, 30:32⅗. Trade rider class won by Frank Hart, 6 Indian, distance, 28 miles; second, J. J. Cox, 7 R-S, 27¼ miles; third, John U. Constant, 5 Indian, 25 miles. Time, 31:15.

"Blue Overalls" Resented by Wanstradt.

It was all a mistake about the "youngster in blue overalls" at Latonia! In the original report of the motorcycle racing, in which Cincinnati riders participated on the 13th and 14th inst., at Latonia, Ky., the "youngster" was described as being Joseph Wanstradt, whereas Wanstradt is neither an immature youngster nor does he wear blue overalls. The essence of the error, which several members of the Cincinnati Motorcycle Club have been quick to correct, is that the ten mile handicap on Saturday, 13th inst., was wrongly given as being won by John Mast, when the actual winner was Pat McManus, a rider of a 4 horsepower Indian, who really is a youngster. Young McManus wore a pair of blue serge trousers, but was guiltless of overalls. The two most important facts brought out by the correction are that McManus and not Mast won the ten mile handicap and that aWnstradt had nothing to do with the "youngster" or the "blue overall" business.

Denverites in a Loose Road Race.

While gross inaccuracies are scattered throughout the official report, which, when analyzed, contradicts itself in several places, according to the promoting newspaper, Cort Edwards, riding a Merkel, won the 166 mile motorcycle road race from Denver, Colo., to Greeley and return, on Saturday, 13th inst. His alleged time for the run was 3:53:00⅗, which would give him the remarkable average of nearly 41 miles an hour, over all sorts of roads and through city and country traffic. Perry Meade, on an Excelsior single, was credited with being second place holder, although, according to his alleged time, 3:51, he would seem to be the winner. Joseph Wolters, Excelsior twin, was registered third; time, 4:08:00. Eleven of the 38 starters finished.

Loose management and apparent violation of the F. A. M. rules characterized the race, which was an advertising scheme, conducted by a local newspaper. There were two classes, amateur and professional, and while they started separately, they finished together, and seemingly were checked as one class at the finish. What the prizes were and whether there were prizes for each class does not appear, but at any rate, the race was sanctioned by the F. A. M. The professional class, consisting of six men, was sent away first, and 15 minutes later the amateur division of 32 riders left.

Deducting his handicap, Meade, the second man, appears to have made better time than Edwards, who is credited with winning, but nothing was said as to prize distribution. The professionals rode twins and the amateurs singles.

The other finishers in the order of arrival were as follows: George Heyes, Excelsior single; Walter Whiting, Harley-Davidson single; Herman Mapel, Excelsior twin; John Wirt, Thor single; L. Brown, Merkel twin; Frank Kunze, Excelsior single; James Noonan, Harley-Davidson single; Albert Newell, Merkel single.

Many Records for Jersey 24-Hour.

Private owner contestants in the 24-hour endurance run of the New Jersey Motorcycle Club on the 29-30th not only will have a chance to win medals, but also to stock up on very desirable sundries. This merchandise, which includes tires, lamps, brakes and shock absorbers of standard make, will be awarded to the riders who show the most consistent running, based on checking at secret controls. Trade riders also have something coming to them for consistency, and the best performance in this class will entitle the maker to a motor seat. The individual medal awards are gold, silver and bronze for the three highest road scores. For the manufacturers' team division a handsome silver trophy has been hung up. Teams will be limited to three men, and team members also are eligible for medals. Entries already are in for teams representing the Yale, Excelsior, Reliance, Indian and Merkel machines, and several other teams are expected. Twenty-seven entries already are in hand, and in the final rush it is predicted that as many more will be handed in. Final details were completed at a meeting Tuesday night, 23d, and the session was followed by a "feed."

Akron Prepares for Its Race Meet.

The Akron Motorcycle Club, of Akron, O., has everything in readiness for its first races of the season on June 3. The meet is sanctioned by the F. A. M. and the races are open to all F. A. M. amateurs. There will be two other race meets and one endurance run this season. On the 11th inst. the club members were the guests of the Norka Theater, and on the evening of the 16th inst. 30 of the members rode to Louis Young's Hotel, about five miles south of the city, where a banquet was served for them.

ATLANTANS ON THEIR SPEEDWAY

Run Four Exciting Events Before Rain Stops the Program—Chambliss and Burke Divide Honors.

Rain wet the powder of the race meet of the Atlanta (Ga.) Motorcycle Club on the Speedway on Saturday, 20th inst., in the fourth event, leaving seven events that had to be laid aside for the day. Weather permitting, the left-over speed cartridges will be fired on Saturday, 27th inst. Porter Chambliss, on an Indian, was the star of the short speed session, winning the 12 mile dealers' trophy race, which carried with it the "Southern championship," although the authority for this designation is not apparent. Chambliss repeated in the 10 mile open for 61 cubic inch flyers, spinning the five laps at a 57 second average, the best time of the day, with Cawthorne, on another Indian, as the runner-up.

START OF THE TEN MILE OPEN ON THE ATLANTA SPEEDWAY

While Chambliss devoted himself to finding bulls-eyes in the twin class, Burke, also an Indian speed shooter, was doing the same thing in the single division. He introduced himself by capturing the 10 mile novice, and boosted his score by winning the six mile. All the races were exciting and proved entertaining to the large crowd present. The events were open to amateurs only, and were run promptly and in snappy order. Summary:

Ten mile novice, 30½ cubic inches—Won by Burke, Indian; second, Brown, Excelsior; third, McMillan, Harley-Davidson. Time, 11:11⅘.

Six mile open, 30½ cubic inches—Won by Burke, Indian; second, Sisson, Excelsior; third, Reynolds, Indian. Time, 6:43⅘.

Ten mile open, 61 cubic inches—Won by Porter Chambliss, Indian; second, Cawthorne, Indian; third, Glenn, Indian. Time, 9:28⅘.

Twelve mile amateur, Atlanta dealers' trophy—Won by Porter Chambliss, Indian; second, Reynolds, Indian; third, Sisson, Excelsior. Time, 12:48⅘.

Whittler's Suspension Is Raised.

Through a clerical mistake in the referee's report, stating the date of expiration as May 26, and the disposition of the chairman of the competition committee to abide by the report as it stands, the three months' suspension inflicted on March 26 on Fred E. Whittler, of Salt Lake City, the professional motorcyclist, expires this week, although according to the calendar it still has another month to run. This glad news was conveyed to Whittler on the 20th inst. in a letter from the chairman, together with a warning that in future mistakes of the sort will not be interpreted to the advantage of the offender. Whittler was suspended for breaking a contract on the ground of alleged unfair treatment at the hands of the promoter.

Merz Breaks a Leg at Hawthorne.

While practising for the Decoration Day motorcycle races at Hawthorne track, John Merz, manager of the Merkel branch in Chicago, Ill., was the victim of an accident on Thursday, 25th inst., that resulted in his left leg being broken below the knee. He was using a twin Thor belonging to Matthews and the machine proved too much for him to handle at the highest speed, as he fell on the turn, doubling his leg under him.

Texans to Be "Pro" at Taylor.

Professional motorcycle races will be run on July 7 at Taylor, Tex., under the auspices of the Taylor Fair Association. Sixty dollars in cash is offered as prizes.

BROADRICK WINS TWO MILE TITLE

Oakland the Scene of First National Championship Race on the Coast—Seymour Scores.

Turning seeming defeat into an easy victory, Ben Broadrick, of San Francisco, steering an Indian, won the two mile F. A. M. national amateur championship for 1911 at the race meet of the San Francisco (Cal.) Motorcycle Club on the Oakland Motordome on Sunday, 21st inst. It was the first of the championships that ever have been run on the coast, and also the first in six years that has been decided on a board track. The winner's time was 1:29.

Next to the championship, which was the top-liner on a classy bill, the ten mile professional event proved a worthy rival for the favor of the few fans present. While Ray Seymour, on an Indian, led the field from the start to finish, the struggle for second place was of the blood-tingling see-saw sort, between Graves, McNeil and O'Brien. Graves was retired, and in the final dash O'Brien flashed across the line a tire width ahead of McNeil. Seymour collected first money again in the five mile professional, with Graves, Merkel, second.

Some of the halo that settled over the new national two mile champion was dispersed by the fates in the 25 mile open for amateurs, when J. Alzina, Indian, who ran second to Broadrick in the championship, trimmed the title-holder in a brilliant spurt when Broadrick appeared to have the race all wrapped up and ready to carry away. H. O. Young, on a Harley-Davidson, was the king-pin of the private owners. He won the novice, ran second in the belt event for owners and bagged two third prizes in other events.

Half a dozen aspirants for the two mile championship presented themselves. They were given a flying start, but crossed the line in open formation, Broadrick and Eichelberger, the latter on a Thor, being several yards in the rear when the leaders flashed by. Broadrick got right down to business and commenced to close the gap despite the best efforts of the leaders to keep it open. Alzina, Indian, proved the hardest of the advance guard to overhaul, and he led the procession until the last quarter of the first mile, when Broadrick passed him. Thereafter Broadrick never was headed, although Alzina pressed him to the finish. Broadrick won by 40 yards, and Alzina beat Eichelberger a similar distance.

Seymour had the ten mile professional well in hand all the way and contented himself with holding the lead. Graves, Merkel, started after Seymour to give him battle, and in so doing attracted two other

dangerous opponents, who camped on his trail. It looked like a combination to smother Graves, Seymour shutting him off in front and McNeil and O'Brien attacking from the rear. Graves fought gamely and hung on to Seymour until his machine "died" suddenly and he dropped out. Instantly McNeil and O'Brien changed from joint pursuers of Graves to aggressive antagonists and fought each other as warmly as they had Graves. Meanwhile, Seymour was sliding serenely along in front. McNeil and O'Brien battled elbow to elbow, first one creeping away and then the other, only to be pulled down. In the last lap O'Brien drew another lead of a few inches and managed to keep it intact until the finish line was reached.

Everyone present got a big surprise in the 25 mile open, for Broadrick led for 20 miles and seemed a sure winner. He had lapped most of the field and seemed beyond striking distance of the others. Suddenly Alzina poked his fires more strenuously and his machine responded with a final and wonderful burst of speed. He crept up on Broadrick with a certainty that was amazing, and, after passing the new-made champion, continued to draw away. Alzina won with plenty to spare and Broadrick had a foreclosed mortgage on second place. J. Heck, a Thor rider, got a glad hand from the crowd for his gameness in returning to the fight after a mishap had knocked his chances to smithereens.

Private owners were well provided for, two events being set aside for them. H. O. Young won his novice on a Harley-Davidson. C. E. Obert, Indian, the runner-up, was disqualified as being ineligible, and his elimination advanced T. Williams, Thor, to second, and T. Campi, Indian, to third. Obert cast his line again in the belt drive pool, and fished out a victory that stayed after it was landed. Young followed Obert across the line, and G. Viera, Excelsior, was booked third. Viera had better luck on a Thor, for he won the five mile open for singles, with Eichelberger, also on one of the "thunder gods," checking in second. After the usual daredevil elbow riding, the five mile professional flickered off the watch dials, with Seymour, Graves and O'Brien over the line in that order. Summary:

Five mile novice, private owners, fully equipped stock machines—Won by H. O. Young, Harley-Davidson; second, T. Williams, Thor; third, T. Campi, Harley-Davidson. Time, 6:09⅘. C. E. Obert, Indian, second, but disqualified as ineligible.

Five mile open singles—Won by G. Viera, Thor; second, E. D. Eichelberger, Thor; third, H. O. Young, Harley-Davidson. Time, 4:47⅕.

Five mile scratch, professional—Won by Ray Seymour, Indian; second, M. J. Graves, Merkel; third, Howard O'Brien, Indian. Time, 3:35⅘.

Two mile national championship, amateur—Won by Ben Broadrick, Indian; second, J. Alzina, Indian; third; E. D. Eichelberger, Thor. Time, 1:29.

Twenty-five mile, scratch, stock singles, fully equipped, amateur—Won by J. Alzina, Indian; second, Ben Broadrick, Indian; third, H. O. Young, Harley-Davidson. Time, 27:20.

Ten mile open, professional—Won by Ray Seymour, Indian; second, Howard O'Brien, Indian; third, B. McNeil, Thor. Time, 7:19.

Three mile, private owners, belt drive singles—Won by C. E. Obert, Indian; second, H. O. Young, Harley-Davidson; third, G. Viera, Excelsior. Time, 3:30⅗.

Warns Against Chillicothe Races.

Motorcyclists are warned against competing in an unsanctioned meet scheduled by D. K. DeLong at Chillicothe, O., on Decoration Day, in a statement issued by the chairman of the competition committee. The official ukase is as follows:

"It has been brought to my attention that Mr. D. K. DeLong, of Chillicothe, O., is promoting a race meet in that town on May 30. No sanction has been requested by Mr. DeLong and should he have requested a sanction it would have been refused for good and sufficient reason. Motorcycle riders who contemplate competing at this meet, or who do compete at this meet, are hereby warned that such competition will disqualify them automatically."

Swenson Trophy Run Route.

Competition for the silver trophy donated by B. A. Swenson to the Providence (R. I.) Motorcycle Club for a series of reliability runs during the season will begin on Sunday, June 4. The first run will be over a 130 mile course and will be run on the lines of the national endurance run, with checking stations at prominent cities en route. Speed will not be the determining factor in scoring, but rather promptness at controls. The trophy is a handsome large silver cup and there also are lesser awards. The course selected for the first run includes Arctic, Hope Valley, Westerly, Narragansett Pier, Wakefield, Wickford and East Greenwich.

Canton Cards Its Own Sport.

Lovers of motorcycle and bicycle racing in Canton, O., will not have to spend railroad fare to enjoy a few miles of their favorite sport on Decoration Day, for a little of each will be on tap right at home. The Canton Motorcycle Club will hold a race meet and has secured entries from Akron, Massillon and other nearby places, so good racing is promised. It will be the first of a series of four meets which the club will conduct this season. One of them will be a club championship affair, with a silver loving cup as the chief prize. The bicycle dish for Decoration Day is a road race which will be served by the local dealers. The course is to Massillon and return.

Eastern Clubs Head for Springfield.

Several motorcycle clubs in the East will hold runs to Springfield, Mass., on Decoration Day, to attend the big race meet of the Springfield Motorcycle Club at the Stadium. Among the clubs that will send delegations are the Hartford, New Haven, Bridgeport, Worcester, Boston, Commonwealth of Boston, and the Providence; the New York, Concourse, Harlem and both Touring Clubs of New York City; the Invincible, of Brooklyn; Rhode Island, of Providence, and Meriden, of Meriden, Conn. A large army of unattached riders from all parts of New England also will be on hand.

UP TO A HOME ON THE HILLTOP

J. A. Seitz, of Syracuse, N. Y., conquering Adams street hill on a Pierce single.

NEW YORK SENATE COMMITTEE LEAVES MOTORCYCLES EXEMPT

Strikes Out the Objectionable Clauses in Reporting the Proposed Amendment to the Automobile Law—Motorcycles Not Included—F. A. M. Successful in Protecting Empire State Riders from Registrations, Tags and Heavy License Fees.

Once more have the motorcyclists of New York State gained a victory over those who seek to have motorcycles classed as motor cars under the automobile law, which would entail their having to p y heavy annual fees, their being registered and tagged and the liability of the motorcyclists to the fines and punishments to which automobiles are subjected. That feature of the proposed amendment to the automobile law that was designed to bring motorcyclists into the law has been defeated, as the Senate committee on Internal affairs on the 24th inst. reported the proposed amendment, with all reference to motorcycles stricken out.

No small credit for warding off the adverse legislation is due to G. H. Hamilton, the chairman of the F. A. M. legal action committee, who, with the aid and advice of ex-President R. G. Betts, of the F. A. M., set in motion a campaign that brought about the striking out of the motorcycle clauses. The efforts of Hamilton and Betts were promptly supported by the trade papers, by some of the clubs in the state, and by individual riders. Senators and Assemblymen were urged to act against the stretching of the automobile bill to include motorcyclists, and the aggregate result was the elimination of the motorcycle provision from the amendment, so that New York motorcyclists continue to enjoy the status that was properly granted them in 1904, when the F. A. M., in a campaign led by President Betts, succeeded in having them freed from the onerous and unjust requirements of the automobile law.

Concourse Team Has Diamond Alone.

Although the Concourse Motorcycle Club and the Touring Club of New York (affiliated) were scheduled to play a baseball game on Sunday, 21st, it is still to be played. Whether the Tourists got "cold feet" does not appear, but at any rate but one of them showed up at the rendezvous. The Concoursers were there with bats, gloves and all the paraphernalia, and when they found that they would have no competition from outside they rode up to City Island and began a game with two picked teams from their own men. After one inning was played a policeman came along and shooed them away. The motorcyclists moved over to an adjoining field and there continued their game uninterrupted. After the motorcyclists tired of swatting the sphere, they stowed away a hearty dinner and then jogged up the Boston post road.

Marylanders Make for Laurel.

Fine macadam roads and beautiful scenery were the inviting and picturesque setting for the regular Sunday run of the Maryland Motorcycle Club of Baltimore on Sunday, 21st inst. Laurel, a pretty town, 22 miles out, was the destination. Because of the heat, a short run was called, and the motorcyclists returned to Baltimore in time for dinner. This disposed of, they reported at Electric Park for the annual picture and then indulged in some impromptu speed work to test out the track. Races will take place there later.

Providence Club Is Active.

At the last meeting of the Providence (R. I) Motorcycle Club eight applications for membership were received. On Sunday, 21st, the club held a run to Wachusett Mountain in Massachusetts, and there was a good turnout. The club will enter a team in the inter-city club team race at the Springfield meet on Decoration Day. A committee was appointed to investigate the feasibility of holding an illuminated night parade some time during the season.

Hart to Compete at Hawthorne.

Frank Hart, the new Indian star of the East, will make his debut in the West at the half-week speed carnival of the North Shore Motorcycling Club of Chicago, at Hawthorne track, on May 28-29-30. He will be the only Eastern rider present. Rex Wickwire, of San Aantonio, Tex., the leading Indian racing man of that state, will be another visitor to "Chi" from afar. Local cracks will be on hand in droves.

Rockfords and Ideals Unite.

Consolidation of the Rockford and Ideal Motorcycle clubs of Rockford, Ill., has been effected, and the amalgamation is expected to benefit the sport locally, as there will be no conflict of events, or division of effort in local motorcycle affairs. The original plans for a race meet at the driving park on Memorial Day will be carried out.

Shelbyville Meet Is Scheduled.

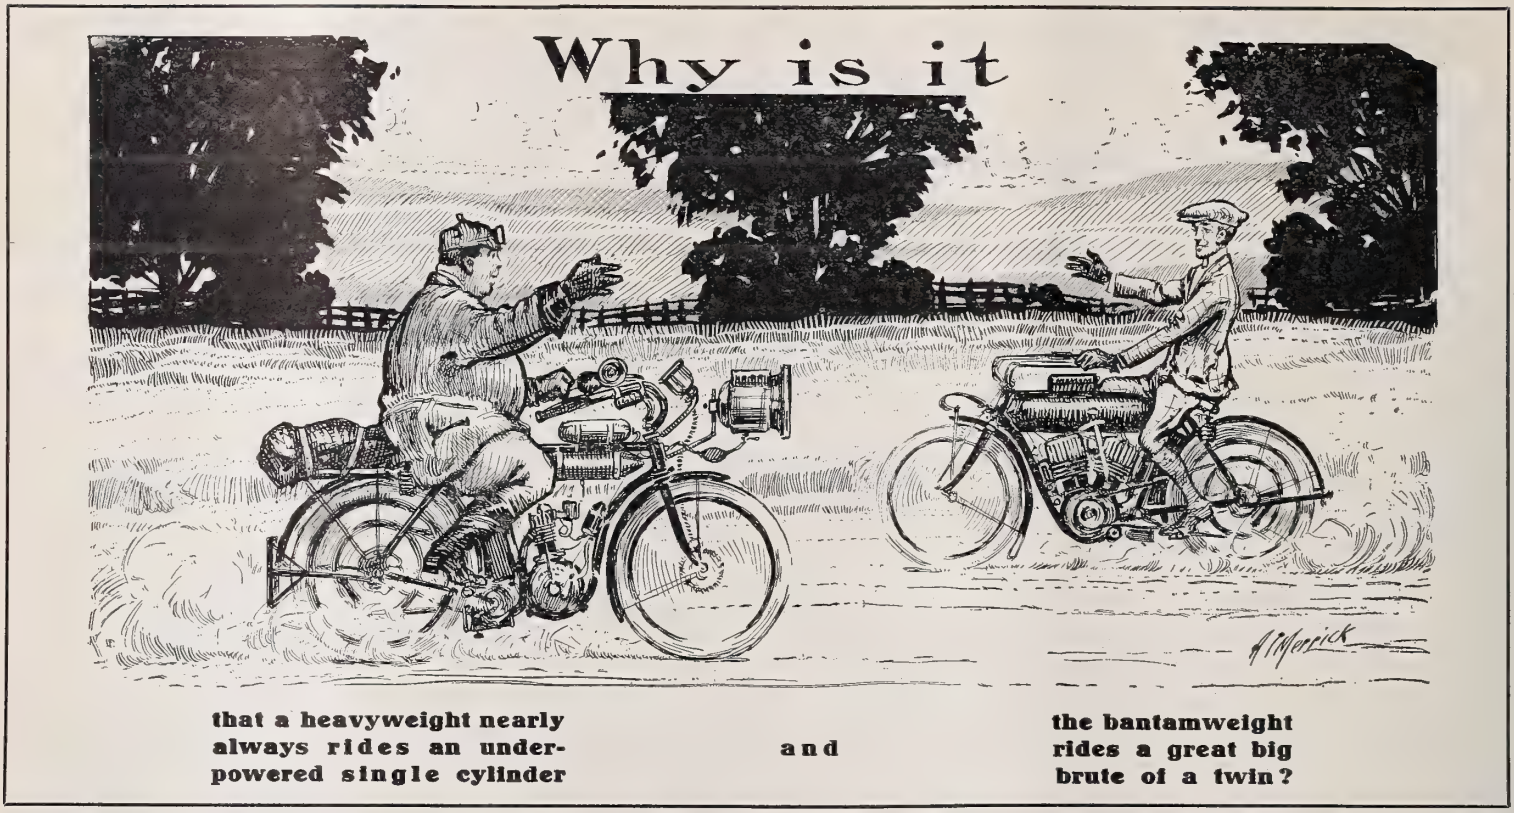
Plans are in the making by the Indiana Motorcycle Club of Indianapolis for a race meet at Shelbyville on Sunday, June 4. It will be the first meet to be held on the proposed Indiana motorcycle racing circuit. On July 4 the club will hold a closed club meet at Lebanon.

Eau Claire Racing Stimulated.

Motorcycle and bicycle racing in Eau Claire, Wis., is to be stimulated by W. P. Hart, the sporting editor of one of the local papers. His first venture in this line will be a field day on May 30, in which motorcycle and bicycle races will be featured.

TWELVE GOT LOST IN THE HILLS

Only Five Contenders Survive Indiana Club's Hard Run—Both Stewart and Baker Claim First.



Five of the 17 riders who started in the Indiana Motorcycle Club's 160 mile reliability run on Sunday, 21st inst., survived the tough trip, and there now is a dispute as to which of two of them is entitled to first honors. The survivors are: Fred Stewart, Yale; E. G. Baker, Indian; John E. Merz, Merkel; H. T. Bretney, Merkel, and John Littleford, Thor. Stewart claims a perfect score, but this claim is attacked. Baker's score is announced unofficially as 999, and he thinks he won first place in the run. The club officers say they will not make a definite decision about the race until the first of next week, when a board meeting will be held. The other three finished in the order given.

It was one of the roughest rides that any of the contestants had ever been in, the route being through Brown County, Indiana. Rain had been coming down all day Saturday all over Indiana and the roads were in bad shape. When the riders started at 7 o'clock Sunday morning the weather was fine, but before they had traveled 50 miles a downpour started that did not stop until after the run was finished.

There were three controls on the route, at Bloomington, Spencer and Indianapolis, respectively. Spencer comes before Bloomington, and Stewart's score is in question because it is claimed that he left the Spencer control some time before he should, and that it was only because he checked in and tore out again at once that he got to Bloomington on time. All the others were late at Bloomington, where Baker lost his one point. Stewart says he did not know he had to wait at Spencer and does not think he should be disqualified. The checking sheet shows that he left Spencer 30 minutes before he was due even to arrive there.

Stewart paid dearly for his day's ride, as somewhere on the route he lost the diamond and gold medal that he won in the 1910 Western District endurance run. Most of the 12 riders who dropped out came to grief in the Brown County hills, between Spencer and Bloomington. The next run, over the same route, will be held next month, and the rider that wins two out of the total of three runs that are to be held will be awarded a big silver trophy cup, valued at $50 and known as the Indiana Motorcycle Trophy.

Traveling on railroad schedule, Rex J. Lyons, carrying a tandem passenger, Miss Barbara Webber, won the Marshall Spark Plug trophy in the sealed time run of the Syracuse (N. Y.) Club on Sunday, 21st.

Affiliating Clubs Hot After Lamps.

Big gains in motorcycle club affiliation were made during the past week, and five of the new members of the F. A. M. club family claimed Old Sol lamp and generator outfits offered to clubs affiliating 15 men or more. With but eight more numbers to go, it practically is certain that the 150th certificate of affiliation will be issued before the close of the month. The new affiliated clubs are as follows: No. 142, Portland (Ore.) Motorcycle Club, 40 men; No. 140, Redskins Motorcycle Club, Monroe, Wis., 16 men; No. 139, Two Rivers (Wis.) Motorcycle Club, 19 men; No. 138, Fostoria (O.) Motorcycle Club, 16 men; No. 137, Old Dominion Motorcycle Club, Richmond, Va., 30 men; No. 136, Indiana University Motorcycle Club, Bloomington, Ind., 15 men; No. 135, Indian F. A. M. Motorcycle Club, Kansas City, Mo., 25 men; No. 134, Buffalo (N. Y.) Motorcycle Club, 40 men; No. 133, Cleveland (O) Motorcycle Club, 44 men; No. 132, McHenry County Motorcycle Club, Harvard, Ill., 27 men; No. 151, Oshkosh (Wis.) Motorcycle Club, 17 men; No. 130, Macon (Ga.) Motorcycle Club, 20 men; No. 129, Salina (Kan.) Motorcycle Club, 18 men; No. 128, Atlantic City (N. J.) Motorcycle Club, 27 men; No. 127, San Jose (Cal.) Motorcycle Club, 40 men; No. 126, Rome (N. Y.) Motorcycle Club, 32 men; No. 124, Crawfordsville (Ind.) Motorcycle Club, 15 men. Perhaps the most significant affiliation in the list is that of the Buffalo (N. Y.) Motorcycle Club, which will have the conduct of this year's F. A. M. meet. Advance work, which ultimately is expected to result in the formation of new clubs, is being done by the following: John J. McGuckin, 571 Forty-seventh street, Brooklyn, N. Y.; Robert S. McNaughton, Appletin, Wis.; B. L. Wright, McGrange, Ill., and Charles R. Love, Rocky Ford, Colo. Leo L. Wildman, Conneaut, O., reports that the new club in that city will affiliate as soon as it has the requisite number of members.

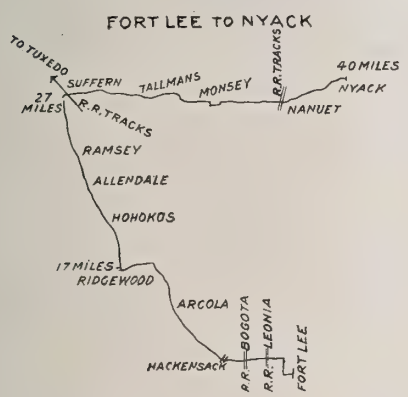
Toronto Riders to Engage Counsel.

Tiring of the seemingly arbitrary way in which they are being fined, the members of the Toronto Motorcycle Club, of Toronto, Ont., have decided to engage permanent counsel to defend any member of the club who may be arrested for speeding. One of the main objects of the club has been the prevention of speeding and the careful observing of the speed ordinances, but the magistrates have dealt so harshly with cases of alleged speeding that have come before them, that the motorcyclists feel it is necessary to take extra steps for self-protection. It is proposed to engage a King's counsellor, who belongs to the same law firm as that to which the prosecuting attorney belongs.

Chicago Pitcher Has 7 H. P. Delivery.

There is at least one base ball player in the big leagues who is sure of the united support of all motorcycling base ball fans and that is James Scott, pitcher of the Chicago American League team. Scott has just become a motorcyclist, and a full-fledged one at that, for after purchasing a 7 horsepower Indian he joined the North Shore Motorcycling Club, and the fans already have christened him appropriately: the "motorcycling kid."

Twelve Days for Providence-Niagara.



Now that the definite dates for the big Providence-Niagara Falls and return tour of the Providence (R. I.) Motorcycle Club have been announced, motorcyclists of that city and of many other Eastern cities also are counting the days until the starting day of the tour reels around. Entry blanks were sent out last week, and designate the tour dates as July 9, to 20, inclusive, a period of 12 days. Accordingly motorcyclists who are going along—and that means all who can get away—drew big circles around those dates on the July calendar leaf as a reminder that they would be "out of town" at that time. Prospective visitors to motorcycling friends in New England in July will govern themselves accordingly if they would avoid disappointment. The tour will leave Providence on Sunday morning and will progress by easy stages. No night stops have been chosen in advance, but the route will be through Worcester, Springfield and Pittsfield, Mass., thence crossing the state line to Albany, and on through Schenectady, Amsterdam, Little Falls, Utica, Oneida, Syracuse, Auburn, Rochester, Buffalo and the Falls. The return will be over the same route. The tour is open to all riders regardless of their competition classification, and the only stipulations exacted are that all entrants be F. A. M. members in good standing and have reliable machines in good repair. The tour is sanctioned. The entry fee is $3 and entries close July 5. B. A. Swenson will be tourmaster, and any inquiries addressed to him at 298 Blackstone street, Providence, R. I., will receive prompt and careful attention.

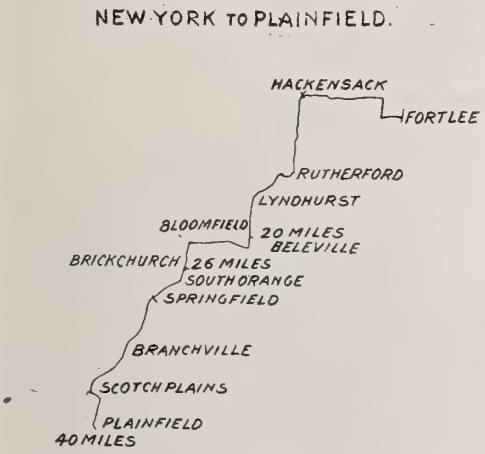
Three Short Tours on Northern New Jersey's Good Roads

Many motorcyclists are not aware of the fact that northern New Jersey abounds in good roads and picturesque scenery, and for that reason the writer desires to point out three of the most desirable rides, which while not lengthy afford an enjoyable afternoon ride and extend for the greater part over macadamized roads. A New Jersey license costs but two dollars and is money well invested.

Route No. 1—Fort Lee to Nyack.

Crossing Fort Lee Ferry (129th street) from New York City to the Jersey side,

start north along the short road and continue to a prominent fork at the top of the "Fort Lee Hill," about one and one-half miles, taking the left fork through the town of Fort Lee to Leonia, three miles. Here the road crosses the railroad tracks and the meadows and leads to Bogota on the West Shore railroad, five miles. A mile beyond this the tracks are crossed again, also a drawbridge leading into Hackensack, seven miles.



Turning right into Main street in Hackensack continue north to Passaic street, a broad street lined with trees. Cross the railroad tracks once more near the station and continue west on Passaic street, passing through Maywood and Arcola. The going here is fine and the views on the east bank of the Saddle River picturesque. Arcola is 11 miles from the starting point. About 4 miles beyond Arcola take Ridgewood avenue to the left and continue west one and a half miles to a prominent cross road at the Rouclere House, passing a large wagon repository a short distance beyond.

Continue through Undercliff and Honokus. East of Undercliff and just north of Paramus is an old church, in which Aaron Burr was married. North of Honokus the road is known as Franklin Turnpike, and is a fine stretch of State road ten miles from Ridgewood to Suffern. En route to Suffern, Allendale, Ramsey and Mahwah are passed. East of Allendale about two miles is Saddle River, a small village, and here is located one of the oldest churches in the country, which dates back to pre-Revolutionary times. Recent attempts to modernize it have spoiled much of its historical quaintness.

Just before reaching Suffern the New York State boundary is crossed, Suffern being 27 miles from Fort Lee ferry. Here a choice of routes is offered. The State road runs to Newburgh, 35 miles distant, passing through Tuxedo and Arden, with fine roads and beautiful scenery. The road east leads to Nyack, 13 miles beyond Suffern, and passes through hilly country. Here are located Tallmans, Monsey and Spring Valley. At Monsey the road descends a steep hill, crossing the railroad at a dangerous point. Beyond Monsey lies Nanuet and crossing the tracks twice here continue east through West Nyack, a station on the West Shore railroad. This point is about two and a half miles from Nyack. From here the road leads over a rough and very steep hill into Nyack, and after passing through the town an abrupt descent to the ferry is made. The boats run nearly every hour and take about 25 minutes to cross. From Tarrytown the route to New York is about 22 miles, which, added to the route given, makes a run of about 62 miles.

Route No. 2—New York to Plainfield.

As in route No. 1, continue due west at the top of Fort Lee Hill to Hackensack,

six miles. Here take the main turnpike south after crossing the railroad tracks, this road is known as Terrace avenue and continues to Rutherford, four miles beyond. From this point a panorama view of New York City can be had, the Metropolitan Tower and the Singer building looming up across the meadows. Just before reaching Rutherford there is a steep hill with car tracks, where caution should be exercised. At Rutherford turn right under railroad bridge and, passing through the main part of the town, take Park avenue to Lyndhurst, and thence along the east shore of the Passaic (do not cross at the Avondale Bridge), but continue south, passing the Jersey City waterworks. Just beyond this point turn to the right, crossing the bridge which leads into Belleville, 14 miles.

Here turn into John street, and by going up several grades and crossing car tracks a good macadam road is reached, which joins Belleville avenue at Bloomfield, three

FORTLEE TO GREENWOOD LAKE.

miles further on. Just after crossing the railroad tracks at Bloomfield turn left into Glenwood avenue, and after crossing the tracks twice more in about two miles Prospect street is reached. This is a broad street lined with trees and about two miles beyond is Brick Church, on the Delaware, Lackawanna and Western railroad. This point is 25 miles from Fort Lee. Continue for about two miles down the street called Harrison street, South Orange avenue is reached and here turn to the right, where a good view of the mountains is seen. At the foot of the hill turn left into Valley street, and from here the road runs direct to Springfield, five miles beyond. At Springfield the road becomes Westfield road and is good riding. Locust Grove and Scotch Plains are next passed through and at last Plainfield is reached, 40 miles from the starting point. Plainfield is one of the most attractive suburban towns in this locality. From here rides can be taken over the mountains to Millington and Morristown on the north, and New Brunswick on the south.

In returning to New York City, a different route can be taken. On the east side of the tracks take North avenue, which is a fine macadam road paralleling the tracks to Westfield, five miles, where it crosses and runs parallel to Elizabeth, 12 miles from Plainfield. From Elizabeth, Frelinghuysen avenue leads north to Newark, about six miles, and, once in Newark, continue direct north to Bridge street,

where it joints Harrison avenue, which latter crosses the meadows to Jersey City Heights. The writer has taken the lower road, known as the "Plank road," but as the road is in poor repair and the term "plank" is very descriptive, he would not advise its use. Harrison avenue is in fair shape and most of the automobile traffic crosses here. Once on Jersey City Heights the Hudson County Boulevard can be taken north about six or seven miles to its junction with the old "Bull's Ferry" road and to the precipitous road down the "Palisades Gorge," which is both steep and dangerous. At the foot of this the River road can be taken one and a half miles north to the Fort Lee Ferry. Other ways of reaching New York are by going through Jersey City and taking one of the lower ferries or by continuing north on the Hudson County Boulevard to Fulton street, and turning east to the Weehawken Ferry. The return route is about 42 miles.

Route No. 3—New York to Greenwood Lake.

Another attractive ride is as follows: Take route No. 2 from Fort Lee Ferry to Ridgewood, 20 miles. At Ridgewood continue west across the tracks through Midland Park, Wortendyke and Wykoff, crossing the railroad tracks at Camp Gaw and continuing direct to Oakland, 29 miles. This village is the home of the Kanouse spring water and also some of the Du Pont powder works are located here. A storekeeper there will be glad to tell the visitor all about an explosion which occurred a few years ago in these works, and which shook the whole region and destroyed considerable property.

From Oakland a very picturesque road known as Valley Road runs parallel to the Ramapo Mountain, and this leads direct to Suffern, N. Y. Connecting with route No. 2 the distance is only about nine miles.

Continuing south at Oakland and crossing the railroad tracks the road winds past the Pompton Lakes, and four miles beyond Oakland is Pompton itself. More powder mills are located here. Turning to the right and crossing the tracks once more the road leads direct to Greenwood Lake and runs parallel with the Greenwood Lake railroad tracks most of the way. The country is quite hilly, but the roads are fair and one is well repaid for a visit to the lake. This region is full of old iron mines, some of which are still worked, but the majority of which are abandoned. The lake is a large body of water and there are several summer hotels located around it. It is about 37 miles from Fort Lee Ferry and the writer knows of one motorcyclist who made it in an hour and a half, which is good going, as part of the route is quite hilly, although the roads are good for the most part. From two to two and one-half hours is a proper allowance to make for this trip.

CLEVELAND CADY.

TWO ENTHUSIASTIC TANDEMITES OF LORAIN, O.

They are, respectively, Dr. A. M. Webster, who is a Buckeye veteran in motorcycling, and Maria Gardner, who, in addition to riding tandem, does considerable touring on a motorcycle of her own. On excursions en tandem, as shown in the picture, they have in the aggregate traveled many thousands of miles in Ohio.

WHERE EVERY CLUB MEMBER HAS A CLUB JOB.

Every member has some work to do in the interest of the club in the scheme of things adopted by the McHenry County Motorcycle Club, of Harvard, Ill., a young but energetic organization, which already has 27 members and expects a much larger membership very soon. Work is what makes clubs active and enduring, according to the officers, and they are seeing to it that every member has some task or duty in connection with the club's affairs. Every candidate for membership must be an F. A. M. member in order to get in, and the club itself has F. A. M. affiliation No. 127. The officers are: F. Mac. Schellenger, president; Pearl L. Peck, vice-president; Robert J. Latter, secretary and treasurer; Harold Miller, captain; Benjamin Ames, first lieutenant; Jessie Scheffner, second lieutenant; James W. Rogers, Percy Leonard, R. T. Christopher, directors; M. E. Norton, Glen McNuitt, C. H. Eckhart, membership committee; Leslie Hayworth, club photographer.

The grant to each member of active participation in the affairs of the club is expected to develop and sustain interest and enthusiasm of all the members. It makes each member responsible for the performance of certain duties, and tends to bring about their accomplishment, as a rivalry is stirred up, as to which members are doing the most for the club in the line of helpful work.

SOME MEMBERS OF THE McHENRY COUNTY CLUB, HARVARD, ILL.

KRAMER IN SPLENDID SPEED FORM

Defeats Clarke in Three Wonderful Sprints —Wiley Rides Too Fast for Collins —Schieder Proves Strong.

In flights of speed that under the circumstances were as brilliant as any in his ten years of championship history, Frank Kramer put it all over Jackie Clarke on Sunday, 21st inst., at the Newark (N. J.) Velodrome, and showed himself to be in the unfailing Kramer form. A team match race in mile heats, in which Kramer and Willie Fenn were pitted against Clarke and Macfarland, was the feature of the afternoon. In the first heat, Kramer, leading from the start of the back stretch on the bell lap, simply shook Clarke off. The latter could not even hang on, let alone pass Kramer. In the second heat, Macfarland locked Kramer in while Clarke beat it for home in the back stretch after the bell. Kramer could not get through Macfarland, so he dropped back and came on the outside, passing them both as though he were an antelope racing with billygoats. He made the lap in 16 seconds, which for a sixth of a mile is within a fraction of a second of the world's record. In the two-mile professional open it was much the same, Clarke and Macfarland were in front at the last turn, but he kept coming. Thirty yards from the tape he breezed by, although Clarke was plugging his hardest and setting a furious pace.

Joseph Schieder, the amateur from Buffalo, made a good showing, and won the five mile amateur open, after Paul Heidrick had been disqualified for taking the lead on the inside of the pole line. Elmer Collins, in his first motor-paced appearance of the season, was a poor opponent for George Wiley, who rode him off his feet. Herman Brooks, of Passaic, N. J., graduated in the novice, and Alfred Goullet and John Bedell accounted for the two-thirds mile professional handicap and the two mile professional invitation, respectively. Summary:

Half mile novice—Won by Herman Brooks; second, R. G. Westervelt. Time, 1:05⅕.

Two-third mile handicap, professional—Won by Alfred Goullet (45); second, E. F. Root (30); third, Fred Hill (40). Time, 1:19.

Three mile team match, professional, Kramer-Fenn vs. Clarke-McFarland, two out of three heats—First heat won by Kramer-Fenn. Time, 3:05⅕. Second heat and match won by Kramer-Fenn. Time, 3:00.

Half-mile handicap, amateur—Won by Jerome Steinert (10); second, John Becht (65); third, Adam Byerman (40). Time, 0:57⅖.

Two mile invitation, Class B, professional—Won by John Bedell; second, Norman Anderson; third, Ernest Jokus. Time, 4:35⅘.

Five mile open, amateur—Won by Joseph Schieder; second, William Pettit; third, Adam Byerman. Time, 11:07⅖.

Two mile open invitation, professional—Won by F. L. Kramer; second, A. J. Clarke; third, John Bedell. Time, 4:18⅕.

Five mile motor-paced match, Elmer Collins vs. George Wiley—Won by Wiley. Time, 6:51⅖.

Italian-American "Champions" to Race.

It will be Italian day at Floral Park, L. I., on Sunday, June 11, when the second annual Italian-American Cycle road race "championship" will be decided. The race is at 50 miles, the course being from the Floral Park Hotel to Jericho, Hicksville, Bellmore, Amityville and return, with a checking station at Amityville. The Italian vice-counsel in New York, Dr. Manzini, will be the starter, and Dan M. Adee and David Greenbaum will be the referees. About 60 entrants, including Joseph Orlando, the present holder of the Italian-American title.

Empires Plan Another Marathon.

Joseph Orlando, of the Empire City Wheelmen, Brooklyn, N. Y., who won the big bicycle Marathon road race at Valley Stream, L. I., in 1909, will have a chance to repeat this year, for the New England Wheelmen, of New York City, are going to hold a Marathon bicycle road race some time during the season. It will go the full distance of 26 miles, 385 yards, and probably will be run over the Floral Park, L. I., course. At least four bicycles and $400 in merchandise will be offered as prizes, and two $55 racing bicycles already have been donated for first place and time awards, together with a quantity of other prizes.

C. R. C. OF A. ON SPRING CENTURY

Survivors in the Two Divisions Total 85 —Dinner Stop at Hicksville —The Course.

In the spring century bicycle run of the Century Road Club of America over Long Island roads on Sunday, 14th inst., 85 of the 115 starters finished the 100 mile grind. There were 160 entries, but 45 of them were scratched. There were two divisions, fast and slow, the fast coterie consisting of 25 men, while the easy-going class was more popular, having 90 starters. Fred E. Mommer was chief pacemaker of the fast division, his assistants being A. R. Cooley, Charles Hausenbauer and Henry Weinert. E. E. Fraysee commanded the slow division and his lieutenants were Herman Geiler, Julius Schmidt and Henry Sommer. Frank E. Nemzer and Charles Krudrle acted as couriers. Prospect Plaza, in Brooklyn, was the starting point, the slow division leaving at 7:30 a. m., and the fast men starting an hour later. The course led along the cycle path to Coney Island, then through Valley Stream and Amityville, where the fast men caught the slow division. At Hicksville the riders stopped for dinner. The homeward trip was over the Jericho turnpike to Hillside avenue and the Plaza, the fast men finishing at 5:30 p. m. and the slow brigade at 5:45.

THE "EASY-GOING" DIVISION OF THE C. R. C. OF A. CENTURY

Rosedale Cyclists on a Run.

Eighteen cyclists turned out for the club run of the Rosedale Cycle Club of New York City, to Van Cortlandt Park on Sunday, 21st inst., under command of Captain Arthur Wolfson. Upon arrival at the park the riders formed themselves into teams and played a game of base ball.

C. R. C. A. CYCLISTS ON A RAMBLE

Take a Sunday Run to Hudson Park—Make a Stop to See Racing—"Insurgents" Best "Classyites."

Frowns from the weather man did not discourage the Eastern Division of the Century Road Club Association from its bicycle run on Sunday, 21st, the first under the guidance of Captain Sylvain Segal, and their optimism was rewarded shortly after the start, when the sun came out. The riders left Columbus Circle, New York City, at 9:15 a. m., their course leading up Broadway and Amsterdam avenue to 106th street, through Central Park and up Seventh avenue to the headquarters of the New England Wheelmen, where the first stop was made. Leaving there, the next stop was for the cork race of the New England Club, at Pelham road, and then on to Hudson Park, the run's destination. After eating a hearty dinner, the cyclists indulged in a three-inning baseball game, in which the "Insurgents" defeated the "Classyites" by a score of 6 to 2. After the game an excursion was made to the village of New Rochelle, the homeward trip being by way of Baychester and City Island, arriving in the city at 5 p. m. The next run is scheduled for June 4, to Paterson, N. J., with a visit to Passaic Falls. These runs are not restricted to club members, and a cordial invitation is extended to all cyclists regardless of their club affiliations. Full particulars regarding runs can be obtained from Sylvain Segal, 100 W. Eighty-eighth street, New York City.

EASTERN DIVISIONERS "ON THE ROCKS" (PELHAM ROCKS)

Enos Emulates His Story Heroes.

Jack the Giant Killer evidently was sufficiently real to little Enos Wilder, a 10-year-old lad of Morristown, N. J., to be an inspiring example when Enos encountered a wicked "giant" of his own, or else Enos is a very good Sunday school scholar and learned thoroughly the lesson of David and Goliath. At any rate, Enos did something that classes pretty well with the exploits of either the redoubtable Jack or the bold David, although Enos may never get the same enduring fame that rewarded the two earlier heroes. Enos was not looking for trouble when he met this adventure. A great big foreigner came along and took a fancy to the bicycle that Enos was riding. He not only took a fancy, but he took the bicycle as well, despite all the fight that Enos was able to give him. Enos tugged and pounded at the big man, to make him give up the machine, but the fellow simply laughed at him and, pushing him aside, started to ride off. Here it was that the inspiration from out of the books came to Enos. Packing together a lot of tin foil which he had in his pockets, he made one big missile of it and hurled it at the "giant." Plunk! It hit the big fellow right in the head, whereupon the bicycle gave a wobble or two and then the "giant" and the bicycle went tumbling to the ground together. Before the "giant" could recover from his daze and stupefaction little Enos rushed in and untangled his machine, and was safely off before the big fellow awoke to the fact that he was in the down-and-out class along with Jack's giant and David's Goliath.

Pushes Dental Gold and a Bicycle.

Cycling has lost none of its savor for Dr. Jesse Cope Green, of Westchester, Pa., despite the fact that he is now 93 years old. Dr. Green is a dentist and took up bicycling at the early age of 80. He bids fair to keep up this form of exercise for some years to come. He has been a practicing dentist since 1843, and at present employs a chief assistant who has been pushing gold into teeth for 52 years.

RENOLD CYCLE CHAINS

1-2 in. pitch Roller Chain

1-8 in., 3-16 in., and 1-4 in. wide

(615)

The SWEETEST RUNNING and MOST DURABLE CYCLE CHAIN is the RENOLD ½ in. pitch Roller Chain, because:—

On a given diameter of sprocket there are twice as many teeth as for a Block chain.

The use of Rollers greatly reduces the friction between the chain and wheel teeth.

The Roller Chain permits of a better tooth form than the block.

The Roller Chain, width for width, is stronger than the block.

The Roller Chain does not tighten up in mud so readily as the Block type, and adjustment for slack is not so important.

Records show that Renold Roller Chains last nearly twice as long as Block Chains.

The RENOLD TWIN ROLLER CHAIN has many of the advantages of the ½ in. pitch, and any rider can learn what these are without the expense of fitting new sprockets, because the Twin Roller Chain will run on sprockets cut for block chains.

1 in. pitch Twin Roller Chain

1-8 in., 3-16 in., and 1-4 in. wide

The
New England Racer
Price $55

A WINNER

Fast Strong
Light Snappy

The Only Bicycle in the World Built for Sprint RACING on Small Board Tracks.

Three Reasons Why

First. It brings the rear wheel four inches closer to the hanger, bringing more weight on the rear wheel, and relieves the strain from the front wheel and forks. This will be appreciated by all track riders, as it is a well established fact that in order to acquire any great amount of speed on tracks with sharp turns, it is essential to have all possible weight of the rider on the rear wheel.

Second. The **New England Racer** uses from 14 to 19 inches less chain than the average racing models. This is a big factor in racing, as a long chain is bound to swerve, and if not kept tight will jump the sprockets or catch on the top of a tooth and break. This is a frequent occurrence on board tracks. On the **New England Racer** the chain can be adjusted as loose as the rider desires without the least danger of jumping the sprockets or breaking.

Third. The rear stays being much shorter, are stronger, and will prevent the sprockets from pulling out of alignment with each other under great strain.

Well made, durable and sold at attractive prices.

Your bicycle tire needs are exactly met by at least one, and perhaps all, of these four leaders from

KOKOMO

Kokomo Defender Special

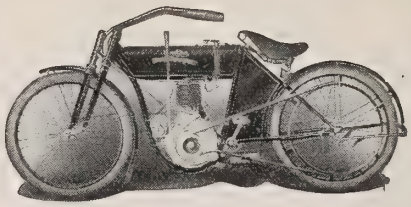
This popular guaranteed tire is specially designed and constructed for road use. It is made from the best materials obtainable, being carefully built up by hand with pure para inner tube, and, owing to the very high quality of the inner tube used, a puncture is very easily repaired.

Kokomo "New Oxford"

A medium price tire, yet so good in quality that it does not do it justice to call it a medium grade tire. We have built these tires so that in case of puncture they will not be worthless but can be repaired. Also furnished in smooth tread.

Kokomo Dotted Tread

A tire that prevents skidding and is safe and reliable on wet, slippery roads and city streets. Of high quality and careful construction. Furnished in road weight or in thick tread.



Kokomo Guaranteed Red Thorn

Made of red rubber, is extra heavy and is built especially for long service.

Are you profiting by what we offer you in Kokomo Tires?

KOKOMO RUBBER CO., Kokomo, Ind., U.S.A.

If you ride or handle the Emblem, you are behind the Emblem and the Emblem is behind you. If you don't, you are pretty sure to be behind the Emblem, but in a different and unpleasant sense. Why not be "Emblematic"? We're friendly.

Set a New Pace in Motorcycle Tire Service

Pennsylvania Vacuum Cup MOTORCYCLE TIRES

Made to precisely the same standard of strength and efficiency as our Vacuum Cup Tires for automobiles, which are the service sensation of the year.

The triple row of vacuum cups absolutely resists skidding on wet pavements, but the suction does not operate in the slightest against the forward speed because the cups are lifted edgewise by the rolling of the tire. In mud, the heavy knobs take hold as can no other form of tread—slewing is practically impossible.

But, even more important, is the all around mileage capacity of the Vacuum Cup Tread. The knobs alone outwear the ordinary motorcycle tire. Then the body of the tread goes into service with by far its greatest distance still to go.

As to price, these tires cost you more to buy. Yes. If they didn't they couldn't be made. But, if you think enough of your machine to give it real automobile tire equipment of the latest design, if you want easier, faster and safer going, buy a pair of PENNSYLVANIA VACUUM CUP TIRES —and you'll save good money, too, in the long run.

Sold through the Jobbing Trade.

EXCELSIOR AUTO-CYCLE

"ALWAYS ON THE JOB"

A Few of the Excelsior Decoration Day Wins

A telegram, May 30, from the Tuileries race track in Denver, Col., says: "In five mile open race for dealers, all withdrew their machines, admitting Excelsior was too fast in five mile exhibition against time. Walters (Excelsior) made 4:40 flat."

Telegram, May 28, from Denver, says: "At opening of White City track, Denver's new motordrome, May 27, Joe Walters (Excelsior) wins five mile open single cylinder race in 4:42⅕. May 28, at the Tuileries new third-mile saucer, in ten mile open, single cylinder race, Walters (Excelsior) wins in 9:52."

In the Cleveland Motorcycle Club's Decoration Day endurance run, the Excelsior team made perfect scores.

At Guttenberg, N. J., on May 28, Cox, on an Excelsior, won two out of four events.

At Atlanta, Ga., on May 27, the Excelsior won two firsts.

At Peoria, Ill., on May 30, the Excelsior won two firsts.

In the Newark (N. J.) twenty-four hour endurance run, six Excelsiors finished.

In the Chicago three day race meet, May 28-29-30, the Excelsior again demonstrated its ease of handling by winning first and second in the five mile novice. Williamson (Excelsior) won the five mile private owners, 30.50 class. De Salvo (Excelsior) won the 20 mile free-for-all, and De Salvo (Excelsior) equalled the track record of 1:00⅗ for the mile, flying start.

THE NEW R-S
Has Come Into Its Own

The First Public Test of The 1911 Reading Standard

was in the New York Motorcycle Club Double Century Run, May 7.

Four New 1911 Reading Standards started; all finished with perfect scores. No trouble, no delay, no worry. The comfort, convenience and safety of the Double Brake System, Adjustable Foot Rests, Shock Absorbing Seat Post, and above all the remarkable efficiency of the R-S Ball Bearing Motor was conclusively demonstrated, not only to the riders, but to nearly one hundred (100) contestants who watched the performance of this machine with great interest. The first 50 miles became a road race and the New R-S proved its speed as well as reliability, two of them being the first singles to reach Patchogue, beaten only by three big twins, two of which started several minutes ahead of the R-S.

A Word to Live Dealers—The New R-S has more visible and prominent selling points than any other motorcycle now on the market, and above all there is quality in design, workmanship and material that has ever before been reached on motorcycle construction. We have some valuable territory open. Write for catalogue and terms.

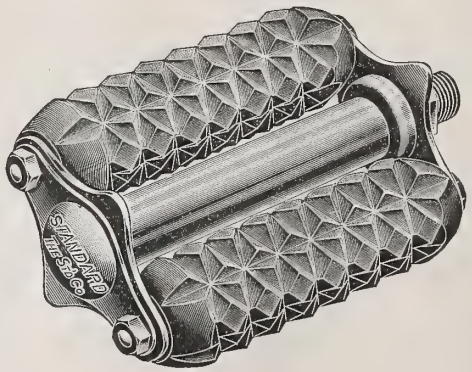
POPE
Racing Bicycles

Used By America's Best Racing Men

COLUMBIA, TRIBUNE AND RAMBLER RACERS

Pope racers are made in three styles, Columbias, Tribunes, and Ramblers, each retaining the distinctive features of its respective line, but containing in addition, special features, suggested by some of America's best racing men. They are real racing machines —not converted roadsters.

What a Prominent Race Promoter Writes.



J. M. Chapman, probably the leading race promoter in this country, writes :

> "In the Six-Day Bicycle Race promoted by me in the Boston Arena, October 31st-November 6th, some of my riders changed from bicycles they had been riding to the COLUMBIA, choosing this machine because of its stiffness and less likelihood to break on the steeply banked turns. COLUMBIAS are indeed very popular racing machines and are much in evidence in races. Good Bicycles are very necessary for good riding."

The same qualities which have made Pope Bicycles pre-eminent as racers are responsible for their success in general use.

The Pope Manufacturing Co.
HARTFORD, CONN.

From the feet up, there is resilient comfort in the

No. 3 Standard Motorcycle Pedal

Plenty of rubber, of the kind that lasts a long, long time without wearing out or getting hard. Deep corrugations so that the foot clings to the pedal. The No. 3 Standard Motorcycle Pedals sell for $3 per pair.

A Strong Selling Advantage

—Greater Business for Dealers in Bicycle Tires When They Point Out to Riders the Truths Told Here

The ease in making repairs on the **Goodyear Pathfinder Bicycle Tire** is the great secret of this tire's wonderful popularity.

This is due to its *tube* of *new*, first-grade Para rubber, fresh from the rubber trees.

Either plugs or vulcanization repair it *in a hurry*.

Riders *want* tires that repair the quick, simple, easy way.

Selling *easily-repaired* tires to them brings you *re-orders*. It makes that rider a powerful advertisement for your business—among *his friends*. Hence it produces *new business*.

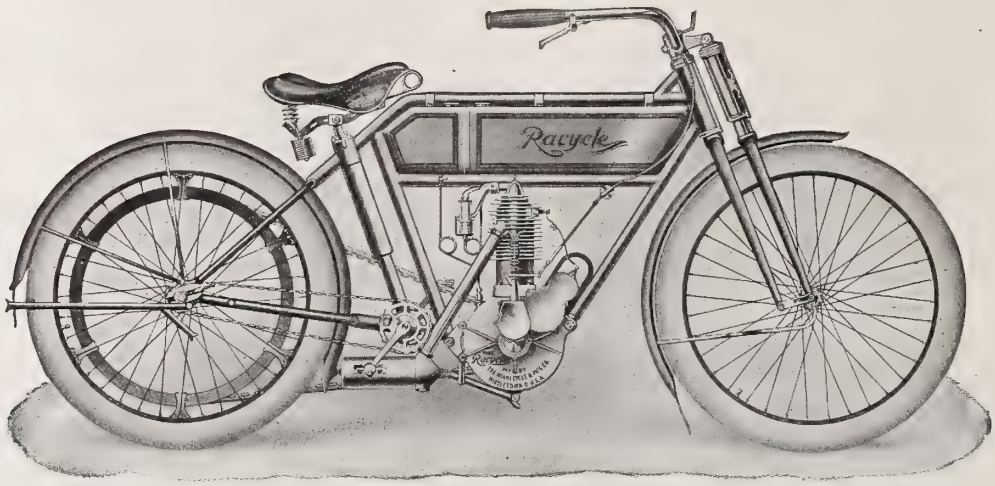
Dealers, taking advantage of that fact, are making *big money* on

GOODYEAR
Pathfinder Bicycle Tires

That is the way to enlarge *your* business on bicycle tires—without additional effort.

Note, in the photographic illustrations, the seen-at-a-glance superiority of the **Goodyear Pathfinder Tires.**

These are the things that *induce* riders to purchase this remarkable tire—the sound satisfaction the tire gives, the increased mileage and the ease with which repairs are made cause re-orders and *bring* in *new* business to Goodyear dealers.



Please consider these points in connection with your own business—figure the volume of increased bicycle tire business that must result from taking advantage of the Pathfinder's merit.

Then write us. Allow us to give you trade quotations and our proposition to dealers. Please write today to

Quality Means Economy—"Racycle" Means Both

It's Not What We Say
It's What the Machine Does that Proves

Free Engine Clutch or Idler

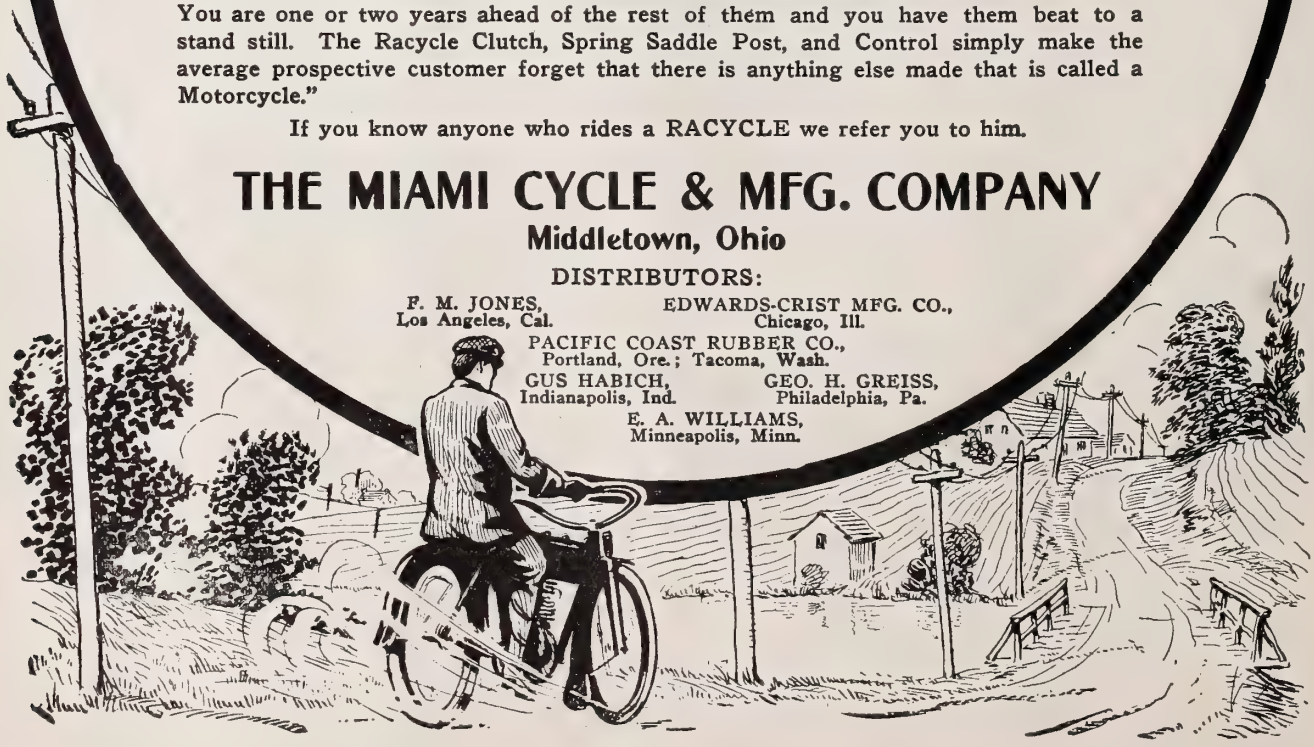
THE Racycle

Spring Seat Post and Forks

A Great, Big Winner

Read what C. A. Fenn, of Bloomington, Ill., says:

"What I think of the Racycle Motorcycle can all be summed up in very few words. You are one or two years ahead of the rest of them and you have them beat to a stand still. The Racycle Clutch, Spring Saddle Post, and Control simply make the average prospective customer forget that there is anything else made that is called a Motorcycle."



If you know anyone who rides a RACYCLE we refer you to him.

Vol. LXIII. New York, U. S. A., Saturday, June 3, 1911. No. 11

RELIANCE PLANS TO CONTINUE

Creditors Agreeing to Bandlers' Proposition —New Engine and Oiling System Designed for 1912 Model.

The Reliance Motorcycle Co., of Oswego, N. Y., is not to retire from the field of motorcycle manufacture but is to make preparations for re-entering the market in 1912, according to the plans approved by a large proportion of the company's creditors. The company, it is claimed, already has received acceptances from over half the creditors in connection with the offer made to the latter after the Reliance factory shut down recently, and it is expected that an overwhelming proportion of the creditors will agree to the proposition, rather than to insist that the business be closed out at a forced sale.

At the creditors' meeting held in New York on Friday of last week, the prevailing sentiment, as construed by the Reliance backers, was to permit the Bandlers to go ahead and manufacture machines for 1912. The offer made to the creditors by the company is that if the creditors will accept 1912 notes for their claims and permit the company to continue, the Bandlers, who with their friends have already advanced $40,000 for the business, will waive their claims against the company for this money, and will advance enough more to finance a 1912 output of machines, repaying to themselves only the money that they advance from this time on. The net proceeds of the 1912 output is to be divided pro rata among the creditors, after which the plant is to be sold for the benefit of the creditors unless the Bandlers decide to continue with it, in which case they would make satisfactory arrangements with all the creditors.

So confident are the Reliance people that the remaining creditors will generally take the same view as that indicated by those who already have accepted the proposal for continuance, that they are losing no time in making ready for next year. The defects in the engine and oiling system of the 1911 model, which were the cause of the company's suspending business, are being avoided in the 1912 model. A new engine has been designed and an improved oiling system is being tried out. The 1912 model is to be a single cylinder machine, and will be given adequate test and refinement before quantity production begins.

The Nightingale Will Warn No More.

The Nightingale Whistle Mfg. Co., 1777 Broadway, New York City, has been petitioned into bankruptcy. The company has been making warning exhaust whistles for motorcycles and automobiles. It is charged that the company is not only insolvent but has secretly transferred practically all of its assets to one of its creditors, Joseph J. Mackeown, in order to prefer him. The petitioning creditors are Stanley G. Flagg, Jr., $448; Schultz Bros., $83, and Charles L. Curtis, $19. The company was incorporated in January, 1909, with $1,000 capital, but has been at a standstill for several months.

S. D. Mfg. Co. Incorporates.

The S. D. Mfg. Co., of Brooklyn, N. Y., which has been making shaft drive motorcycles on a small scale, has been incorporated with a capitalization of $30,000. Its objects are stated to be the manufacture of automobiles, accessories and motorcycles. The incorporators are J. R. Spangler, H. Spangler and G. DeWald, all of Brooklyn.

SECOND HAND PROBLEM PRESSES

Dealers Find the Taking of Machines in Trade is Troublesome—A Tradesman's Suggestions.

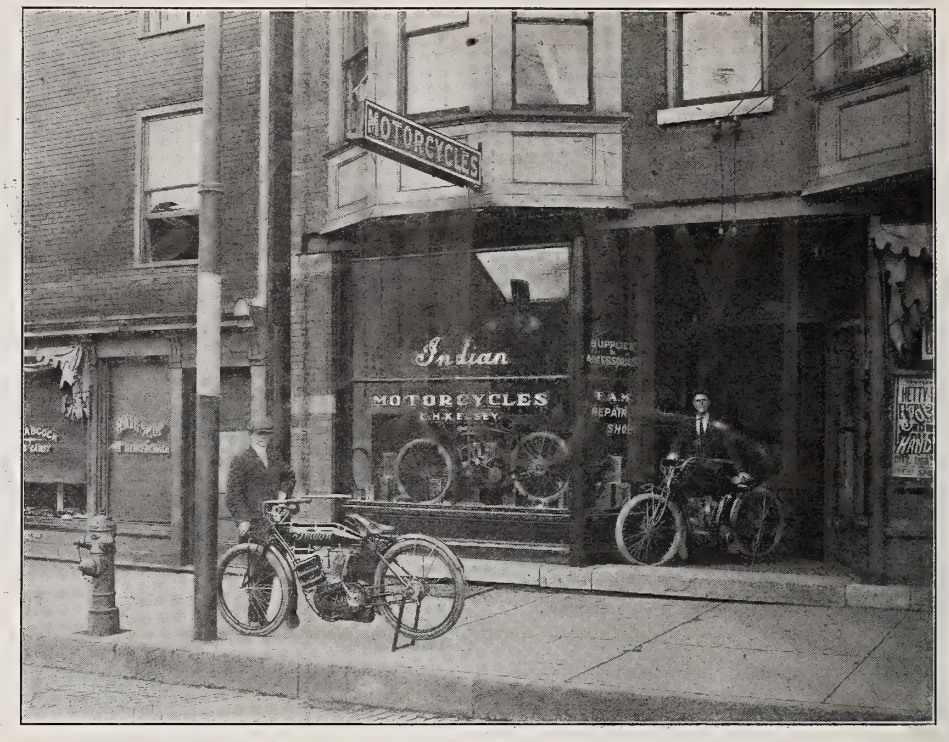
Second hand motorcycles are becoming an incubus that harasses not a few dealers who have not yet faced the second hand question squarely and arranged for its solution so far as they are concerned, and in some cases the selling representatives of the motorcycle manufacturers are being called upon to help dealers in the handling of the problem. In speaking of this phase of the trade, where dealers are encountering an embarrassing demand on the part of intending customers that old machines be made the basis for a liberal allowance on new mounts, a visiting selling expert says:

"All motorcycle dealers are confronted to some extent with the difficulty of having to take old machines in trade for new ones, but some dealers have it a great deal harder than others. In this respect the new dealers, especially in towns where motorcycling heretofore has not had much hold, are by far the most fortunate, as most of their customers are people who are buying their first mount and have no old machine to turn in. I find that practically all dealers, however, have to take old machines in trade or lose some sales.

"When a dealer asks my advice about second hand machines, the one thing that I urge is for him to avoid taking second hand machines and selling them in competition with the new machines for which he has the agency. If he must sell them from the same store, let him have a distinct second hand department, even if it be only a square space marked off with a chalk

line. His customers for second hand machines should be kept as a separate class from his prospective customers for new machines. What is of the next importance is that in taking old machines in trade, the greatest caution should be used not to allow too much. Lots of dealers forget that it takes as much time and effort to get their money out of a second hand machine on which they have been a little too liberal in making an allowance, as it would to convince the customer for the new machine that he should buy even if the allowance on his old machine is not quite as big as he expected.

"I foresee that there will come a time when the dealers in the different cities will get together and come to some understanding as to just how much should be allowed on old machines. In one city the dealers are considering the scheme adopted by some of the automobile agents, where all the agents in a town help maintain a central second hand establishment, to which the second hand machines taken in by the agents are sent to be sold. The manager of this second hand depot sets the price at which he will take any particular second hand machine, and no matter what agent it comes through, that price is the same. All the agents are thus placed on an equal footing so far as making an allowance to the customer who wants to turn in the old machine, and the agents suffer no losses through mistakes in allowing too much under stress of competition."



Miles of Paper in an Accessory Catalog.

Motorcycle supplies occupy a conspicuous place in the 1911 catalog of Charles E. Miller, the New York manufacturer, jobber, exporter and importer, who maintains 11 branches in various cities. The cover is in colors, and shows a motorcyclist and a party of automobilists watching an aeroplane cutting aerial capers over a motor boat. A huge edition of the catalog has been issued, and it required 40 one ton automobile truck loads to make delivery to the post office for mailing. The white paper as it came from the mill, would have made a band five feet wide extending from New York to Boston, and the finished catalogs, if piled on top of each other in one pile, would have made a tower in the air nearly 1,000 feet higher than the combined height of the three tallest buildings in New York—the Metropolitan, the Singer and the Park Row buildings—if they were placed one above the other.

Indian Twin Stolen at New Haven.

It is a long, long time since motorcycle thieves have operated in New Haven, Conn., but they have put the town on their visiting list again. On Wednesday night, 1st inst., a 1911 Indian 7 horsepower chain drive twin, finished in blue, was stolen from James F. Cox's garage at 165 Dover street. The motor number was 71C496. Any information concerning the stolen machine should be sent to Captain Thomas J. Dunn, detective bureau, police department, New Haven, Conn.

LITTLE FALLS, N. Y., HAS A NEW ESTABLISHMENT.

Charles Kelsey has opened a motorcycle salesroom and garage at 56 West Main street, where he also maintains a repair shop. He handles the Indian.

Twitchell Gauge Patent Sustained.

After a period of litigation, the W. D. Newerf Rubber Co., of Los Angeles, Cal., has obtained a victory sustaining the patents relating to its Twitchell air gauge for indicating the pressure in pneumatic tires, and has obtained an injunction against the Northam Auto Pressure Gage Co, preventing the later from manufacturing a similar device. Charles R. Twitchell, the inventor of the Twitchell gauge, was the complainant, and the decree in the United States Circuit Court for the Southern District of California, Southern Division, sustains the validity of his patent No. 927,298.

Cycle Exports Almost Doubled.

Almost a doubling of business for the month of April is shown in the exportation of American bicycles and parts in the official report for the month, as compared with the same month last year, the increase being from $58,138 last year to $107,698 for April of 1911. For the ten months ending with April, 1911, the total of cycle exports is $715,150, as against $486,670 for the corresponding ten months in 1910.

Death of R. E. Hardy.

R. E. Hardy, president of the R. E. Hardy Co., Chicago, Ill., died of heart failure on the 24th ult. He was 36 years old, and the end came suddenly and unexpectedly. The business of the R. E. Hardy Co. will continue as before, under the management of W. B. Canis, treasurer.

Senhouse in Business in Salt Lake.

Steve Senhouse has bought a half interest in the bicycle and motorcycle business of B. M. Anderson, 406 South State street, Salt Lake City, Utah, and has taken the agency for the R-S motorcycle. Senhouse has been a professional cycle racer for some four years or more, and just recently returned from a trip to his home in Australia.

Kreamer Loses Customs Protest.

As a result of a protest made by George I. Kreamer, of Los Angeles, against a tariff assessment of 45 per cent., the Board of General Appraisers in New York has ruled that motorcycles, as far as the tariff goes, cannot be considered as "household effects," and upholds the assessment.

Habich Takes Excelsior Agency.

Gus Habich, the Indiana agent for the Thor at Indianapolis, has bought out the Indianapolis branch of the Excelsior Motor Company, owned by A. C. Byerly, and Byerly has been retained by Habich as manager of the motorcycle department.

Have Merkel for Tacoma.

Tacoma, Wash., has a new motorcycle establishment, the firm name being Packard & Day. The proprietors are Ray Packard and Rae K. Day, and they have taken the Merkel agency. The salesroom and shop is at 944 South D street.

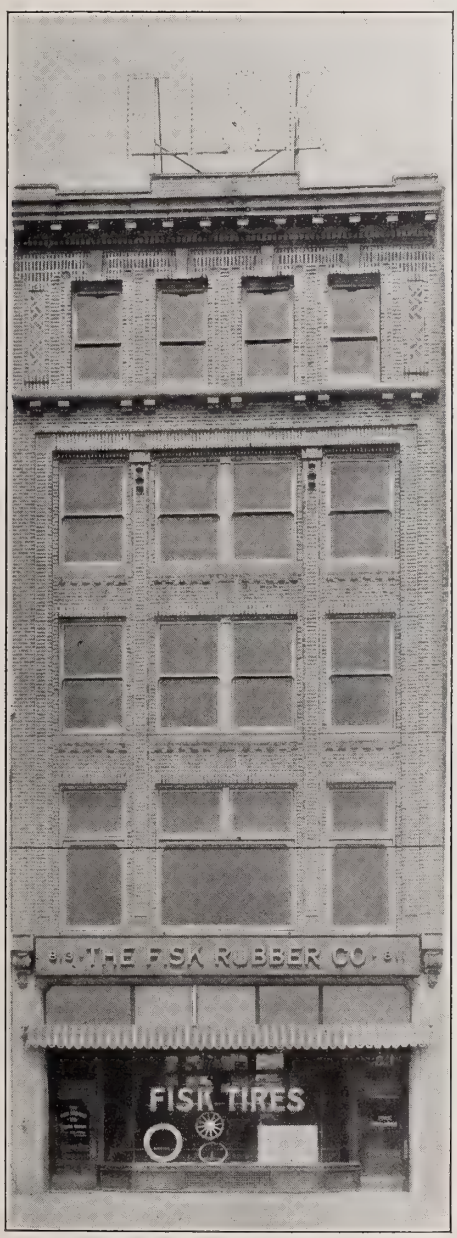
SIMPLE ACID TESTS FOR OILS

Page Tells Why They Are Valuable in Protecting Ball Bearings—Discovering Dangerous Adulterants.

Complaint has been made many times of late that some kinds of lubricants and greases have a tendency to corrode or eat the surface of ball bearings, making them rough, resulting in deterioration and reduction of efficiency. In fact one ball bearing manufacturer has gone so far as to prepare special greases and lubricants of his own for use in connection with ball bearings of his manufacture, in order that the bearings may not suffer from acid etching of the polished surfaces. On this point, however, Victor W. Page, of the engineering department of the New Departure Mfg. Co., Bristol, Conn., expresses the opinion that it is hardly necessary to go to this extreme, as there are a number of excellent standard greases on the market that contain no injurious substances or fillers. He points out that there are simple tests by which manufacturers, dealers or others interested in determining the suitability of any particular grease for ball bearings, may make sure for themselves whether acid or alkali as well as fillers of animal derivation, all of which have a material etching effect on highly finished components of the bearings, exist in the standard lubricants already available. He says:

"The simplest test for acid is to soak a piece of cotton candle wicking in the suspected oil and then wrap it around a brightly polished piece of steel shafting, putting it in a place exposed to the sun for a time. If the surfaces covered by the wicking are etched after 24 hours, it is a good indication that the lubricant has some acid in its composition or that there is alkali present. Obviously, the oil is not suited for ball bearings.

"The following test is also easily carried out: Procure from any druggist a solution of sodium carbonate and water, equal parts by weight. Take a small quantity of the oil to be tested and an equal amount of the sodium solution. Place them in a bottle or test tube and shake well, allowing the mixture to stand. If there is any acid present it will settle to the bottom as a precipitate and the amount of the deposit will then furnish some indication of the quantity of acid in the oil.



"Another test for acid: Dissolve a small quantity, say a teaspoonful, of the oil or grease in five or six times its bulk of boiling water, and while the oil will not mix with the liquid, any acid present will form a solution with it. A piece of red litmus paper is then placed in the liquid and if it remains red after soaking for some time, there is acid present. If the color of the paper quickly changes to a blue or purple, the oil contains an alkali, and if it changes to a pink tint very gradually, the oil is neutral. This test can also be made with a piece of blue litmus paper, which will quickly turn red if any acid is present, though it gradually assumes a purple hue if the oil is neutral. Litmus paper can be obtained from any druggist at small cost.

"As previously stated, many animal fats contain an acid, as one of the constituent elements, and this substance is generally found in grease made from tallow or 'filled' with some oil of other than mineral derivation. Others are thickened with vegetable oils. To test for either of these in an oil that is represented as a pure mineral product, the saponification test may be tried.

"Place five or six ounces of the suspected lubricant in a sauce-pan and add one or two ounces of caustic soda or concentrated lye. Boil the mixture for 15 or 20 minutes and set it aside to cool A teaspoonful of common salt thrown into the mixture while it is solidifying will hasten the process in many instances. When cooled, examine the compound. If the surface is covered with soap, the oil contains animal or vegetable fats; if not, it is a pure mineral substance.

"Many people may question the value of such tests and may feel that it is not worth while to make any one of the simple experiments detailed, to see if the oil used is at fault. Ball bearings are expensive, however, and as no manufacturer will replace those that have failed because of the chemical action caused by acids or alkali, it behooves one to ascertain definitely if the lubricant one is using is suitable for the purpose, and not to depend upon the word of a more or less interested dealer."

FISK'S NEW BOSTON BRANCH.

In Boston, Mass., the Fisk Rubber Co., of Chicopee Falls, has taken possession of its new building at 811-813 Boylston street, in Automobile Row.

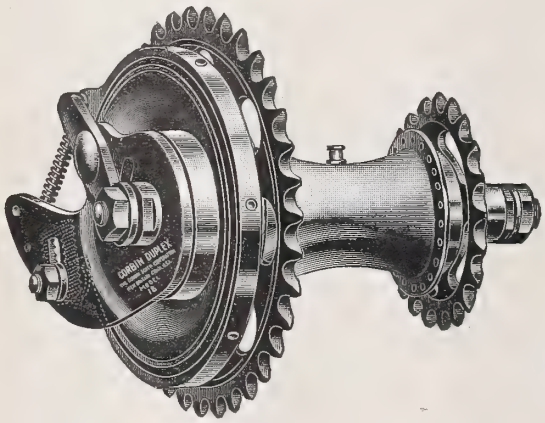
Describes Wide Range of Sundries.

Dressed in an attractive polka-dot cover, and loaded with illustrations and descriptions of a very complete assortment of standard bicycle sundries and bicycle shop tools, not forgetting guns and ammunition, the 11th bicycle supply catalog of F. A. Baker & Co., 10 Warren street, New York City, is ready for distribution. Several tables of value to repairmen are given, showing the sizes of ball retainers and hub cones used in various makes of bicycles, as well as other illuminative data.

Mystery in Mid-Air Eclipse.

That famous trick of the magicians, known as "levitation," is apparently accomplished with the Eclipse coaster brake that hangs suspended in the center of the new "mid-air" sign that the Eclipse Machine Co., of Elmira, N. Y., is sending out to dealers or that it will mail to anyone interested. The trick feature of the sign is such as to spur considerable curiosity, when one is a few feet away, as to how the brake is kept in position with no visible support.

"Personal Message" About Tires.

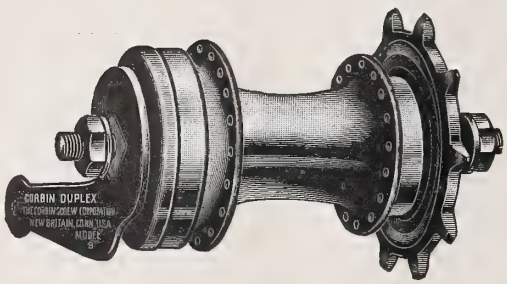


What is given the title of "A Personal Message from the United States Tire Company to Every Motorcycle Rider in the Country" is a 12 page booklet that is being distributed among riders and the trade, and which fully presents the company's case on the tire question. The various styles of United States tires for motorcycles are illustrated and described, and full tables of prices for the various sizes are given.

Gyrex Gyrates to a Royal Home.

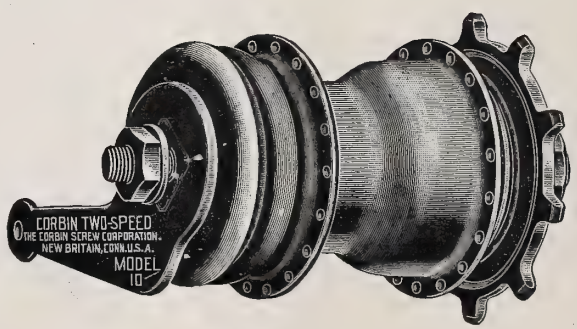
The Gyrex Mfg. Co., of New York City, making the Gyrex mixing device for attachment to carbureters, has been bought by the Royal Equipment Co., of Bridgeport, Conn. The Gyrex will hereafter be marketed by the Bridgeport company.

CORBIN



THE CORBIN SCREW CORP. CORBIN NEW BRITAIN, CONN. U.S.A.

Corbin V=Band Motorcycle Brake



Built on a scale commensurate with the duties of a high speed motorcycle brake.

By the use of a V=shaped drum and a triangular friction band, 50 per cent. more braking surface than on previous models, is obtained, and the flat band is superseded. The releasing mechanism is entirely outside, acting directly on the end of the brake band, making its action easy and reliable. There is no interference with chains. Altogether it is the most effective motorcycle brake on the market.

Corbin Duplex Bicycle Coaster Brake

In every part and function a truly perfect coaster brake.

Corbin Two=Speed Coaster Brake

Giving the cyclist high or low gear at will, together with coasting free wheel and efficient brake.

Corbin Screw Corporation

New Britain, Connecticut

Licensed Coaster Brake Manufacturers

To Facilitate Matters Our Patrons Should Address us at P. O. Box 649.

NEW YORK, JUNE 3, 1911.

"Novices" Should Be Novices.

While the F. A. M. competition rules do not define a novice specifically, it is time they did so, as otherwise the trade rider is going to take advantage of the omission and may seek to invade the preserves of the only real novice, the private owner. At present there is nothing in the rules prohibiting a trade rider who never has won a prize from competing in a novice race, and while the chairman of the competition committee holds this to be perfectly permissible, there are many persons who dissent.

According to the dictionary a novice is defined as a beginner or inexperienced person, while in motorcycle racing it is understood to mean a rider who never has won a prize. As a trade rider is classed as a person who is connected with the trade, it is most reasonable to assume that he is well informed in the operation and handling of motorcycles and therefore naturally has a big advantage over the private owner, even though neither ever has won a race.

When the trade rider is allowed to compete in a novice race, the private owner might just as well withdraw before the race starts and save his machine, for he already is beaten. He is required to own the machine he rides, while a trade rider can "ring in" a factory machine, which has not been pounded over the road every day, and the result is a foregone conclusion. Where it was a private owner who won the novice race at the opening meet at Guttenberg, the winner had his machine "tuned up" and stripped so that he beat the trade riders at their own game. An amendment to the rules that would make the novice race conform more nearly to the original intention and the dictionary meaning would make such preparation by a private owner unnecessary.

Widening the Sales Opportunity.

Big game is possible for dealers who go after it in the right way, in the sale of motorcycles in large lots for commercial use. Already dealers here and there have received single orders for a dozen, or 20 or 50 machines, from large business houses or corporations that have been educated to the utility of the motorcycle, but this field has not even been scratched as yet. It is hard drudgery to sell a big concern its first one or two motorcycles, but if those machines give good service the succeeding orders are apt to be of a kind to make the dealer throw his cap in the air with joy.

By no means is the selling of motorcycles for commercial use chiefly a tri-car or van proposition. In the big cities there are literally hundreds of companies that should have motorcycles for collectors, inspectors and other of their outside men. To get these companies to buy motorcycles requires that in the trial period the dealer or his representative devote a lot of time to educating the riders how to use their machines properly and in preparing statistics and cost accounts that will prove the efficiency and economy of motorcycle transportation; but the rewards are so rich and juicy when once the dealer begins to get the orders that they well repay him for his trouble.

Fortunately for dealers, they now have motorcycles that will really do the work and that are not subject to a thousand and one weaknesses, frailties and ailments such as marred the machines of a few years ago. Unfortunately, however, many dealers lack the "nerve" to tackle big corporations or business houses with a view to making customers of them. It requires more salesmanship than merely to answer the technical inquiries of a man who comes into the store to look at the machines.

Perhaps it would be easier, in some cases, to pick out one influential man in a concern that could use motorcycles to advantage, and make a convert of him if possible. Not that he would have to be made a motorcyclist himself, but the merits of the motorcycle as a means of quick and rapid transportation for the company's outside men could be presented to him, with the likelihood that he in turn would take the matter up with his fellow members of the company as a discovery of his own.

With one prominent house or company using the motorcycle he sells, the dealer has an opening wedge for similar business with others, as concrete example is ever more convincing and persuasive to business men than abstract argument.

Pretty good support is being given by the motorcycle manufacturers to dealers who make a strike for selling utility machines to corporations and business men. Special booklets and printed matter relating to this phase are supplied, and the makers can supply the names of concerns who are already using their machines and who may be called on for data and testimonials. Valuable information concerning exact detail costs of maintenance and upkeep for a given mileage is being collected and collated, and is being made available to the dealers who evince an interest in facts relating to the motorcycle's commercial use.

It may not be practicable for every motorcycle dealer to attempt the long, slow campaigns necessary to build up a big business in sales to customers of this kind. Limitations of one kind or another may prevent, but the better equipped dealers in the larger cities and towns can well do it. Two or three motorcycles planted as seed this year by a dealer are sure to mean a harvest later.

"I am interested to see the Bicycling World and Motorcycle Review taken by every bicycle dealer in my territory, as I find it of great benefit to trade. The increase in sales of high grade bicycles as shown by dealers who read your Review, is quite a noticeable fact, and it stimulates business with languishing dealers more than anything I know. As for myself, I would feel lost were I to miss it any week." —Joseph Redbinger, Southern traveler for Pope Mfg. Co.

Coming Events

June 3-4, Kenesaw, Wis.—Chicago Motorcycle Club's race meet.

June 4, Providence Motorcycle Club's first reliability run for Swenson trophy.

June 4, New York City—Concourse Motorcycle Club's fourth annual run to Savin Rock, Conn., and return; open.

June 4, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Greenfield, Springfield and return; 175 miles. Second section.

June 10, New Haven, Conn.—Motorcycle hill climb on Shingle Hill in West Haven.

June 11, Floral Park, L. I.—Italian-American "championship" 50 mile bicycle race.

June 17-18, St. Louis, Mo.—St. Louis Cycling Club's annual Pike County tour.

June 18, Baltimore, Md.—Crescent Bicycle Club's annual spring road race.

June 18, Floral Park, L. I.—Century Road Club of America, New York State Division, 50 mile handicap bicycle road race; open.

June 30, Douglas, Isle of Man, Great Britain—First junior international Tourist Trophy race; 187½ miles.

July 1, Waterloo, Ont.—Dominion cycle race championships.

July 3, Rockford, Ill.—Start of six days run of Illinois-Iowa Motorcycle Association.

July 3, Douglas, Isle of Man, Great Britain—Fifth senior international Tourist Trophy race; 187½ miles.

July 4, Birmingham, Ala.—Professional motorcycle races at Fair grounds track; open.

July 4, Jacksonville, Fla.—Jacksonville Motorcycle Club's race meet.

July 4, La Salle, Ill.—Third annual open motorcycle race meet of the Illinois Valley Motorcycle Club.

July 4, Worcester, Mass.—Worcester Motorcycle Club's race meet at Greendale track.

July 4, Savannah, Ga.—Savannah Motorcycle Club's race meet.

July 4, Asbury Park, N. J.– Opening motorcycle meet at the Asbury Park track.

July 4, Grand Rapids, Mich.—Annual open bicycle road race of the Western Michigan Cycle Club.

July 6-9, Elgin, Ill.—Illinois-Iowa Motorcycle Association race meet.

July 9-20, Providence, R. I.—Providence Motorcycle Club's tour to Niagara Falls, N. Y., and return; open.

July 10-15, Buffalo, N. Y.—Annual national convention and national championship race meet of the Federation of American Motorcyclists.

July 15, Rochester, N. Y.—Rochester Motorcycle Club's race meet at Crittenden Park.

July 16, New York City—Motorcycle Touring Club of New York's second cup trio-trial, Newburg and return, 150 miles; open.

July 18-21, Alliance, Ohio—Motorcycle races at Rockhill track.

August 1-2-3-4, Atlantic City, N. J.—Summer meeting of the Cycle Parts and Accessories Association and the National Association of Cycle Jobbers.

August 6, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Rockport and return; 200 miles.

August 20, Grand Rapids, Mich.—Annual open, six hour, two man bicycle team race of the Western Michigan Cycle Club.

September 4, Canton, O.—Canton Motorcycle Club's race meet.

September 10, New York City—Century Road Club Association's 100 miles record run; open. Rain date, September 17.

September 17, New York City—Motorcycle Touring Club of New York's third cup trio-trial, Newburg and return, 150 miles; open.

September 24, New York City—Century Road Club of America 100 mile bicycle record run, open, from Floral Park, L. I.; rain date, October 1.

October 1, Worcester, Mass.—Worcester Motorcycle Club's endurance run to Springfield, Boston and return; 200 miles.

More Money for New York State Roads.

Many miles of new road for New York State were assured this week with the signing by Governor Dix of several bills appropriating between $4,000,000 and $5,000,000 for the improvement of State highways, to be provided by bonds issued under the $50,000,000 highway act.

One of the measures makes provision for the completion of the unimproved highway between New York and Rouse's Point. This route, which is designed to connect, on the northern border, with a Canadian highway to Montreal, has been referred to as the modern Appian way. The measure appropriates $1,600,000 for the construction of macadam roads.

The improvement of a State highway through the Central Adirondack region from Fulton Chain to McKeever, an appropriation of $1,200,000 for the improvement of highways in Orange and Sullivan counties, and another of $600,000 for improving the highway between Albany and Binghamton, and another to Franklin county to spend $500,000 on roads are provided for in other bills signed by the Governor.

Vanderbilt to Woo on a Motorcycle.

While not a few fair lasses have been courted by motorcyclists heretofore, the practice bids fair to become even more popular now that no less a society personage than Harold S. Vanderbilt, of the illustrious New York family, has included motorcycles among the weapons he will use in laying siege to the heart of Miss Eleonora Sears, of Boston, this summer. Both Miss Sears, who is quite a sportswoman, and Vanderbilt will spend the summer at Newport, and in addition to his motor cars and yachts he will use three motorcycles in the campaign that—according to the gossips—he will make for her heart and hand.

Indianapolitans to Have a Treat.

All the motorcyclists in Indianapolis—and there are about a thousand of them—will be invited soon to go on the annual Gus Habich run. Habich, who is the Indianapolis agent for the Thor and a number of other motorcycles, is planning to give a big one-day run within the next month. Unlike other dealers, Habich believes in giving the run for everybody and not just for the riders of the makes of machine that he sells. The Habich run is the largest dealer run that is given at Indianapolis each year. Last year about 200 riders or more made the trip and ate dinner as his guests.

Weigher to Travel in a New Way.

On the 15th ult., the first motorcycle inspector of the Bureau of Weights and Measures of New York City was started out by Commissioner Walsh. He is Elwood Hanson and he rides an Indian. It will be the duty of this inspector to check up the various inspectors in the five boroughs and also do inspecting himself.

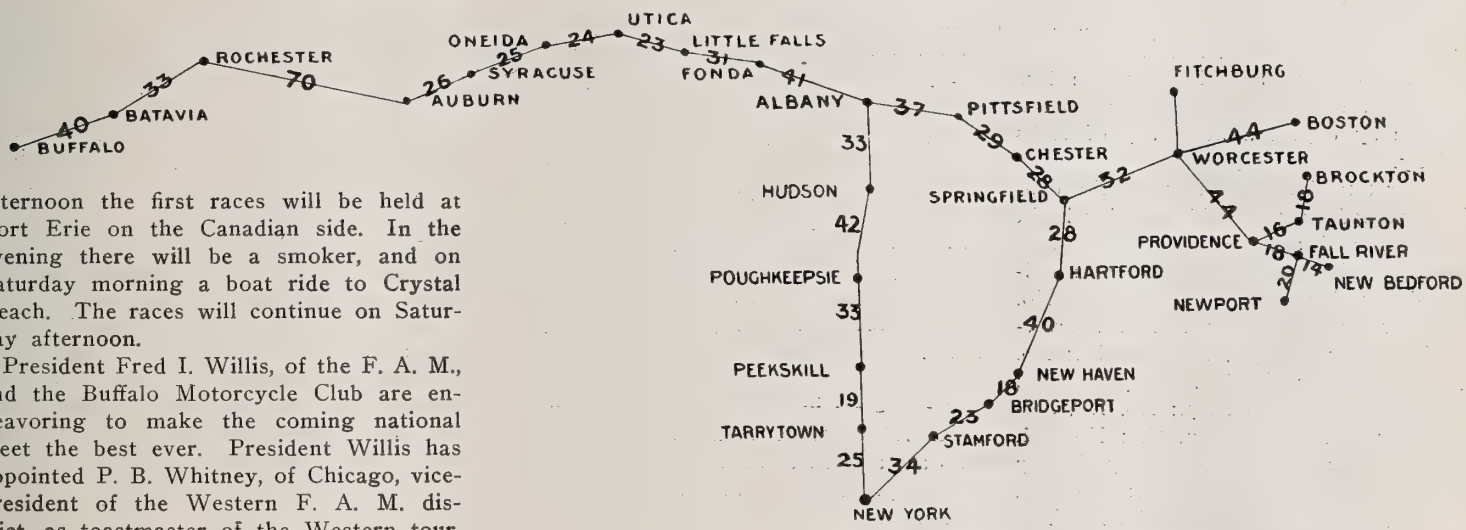
TOURMASTERS CHOSEN BY F. A. M.

Further Details Perfected for Eastern and Western Tours to Buffalo Convention—The Program.

Nothing is being left undone by the Buffalo Motorcycle Club in preparation for the national meet of the Federation of American Motorcyclists to be held in Buffalo starting July 10, and extending for a week. Three thousand riders are expected to arrive in that city on the two tours from New York and Chicago, and the program arranged leaves Monday, Tuesday and Wednesday for the arrival of the riders and delegates. A business meeting will be held on Thursday morning, and in the afternon a trip will be taken to Niagara Falls.

On Friday morning a big motorcycle parade will be held, and at 2 o'clock in the afternoon the first races will be held at Fort Erie on the Canadian side. In the evening there will be a smoker, and on Saturday morning a boat ride to Crystal Beach. The races will continue on Saturday afternoon.

President Fred I. Willis, of the F. A. M., and the Buffalo Motorcycle Club are endeavoring to make the coming national meet the best ever. President Willis has appointed P. B. Whitney, of Chicago, vice-president of the Western F. A. M. district, as toastmaster of the Western tour, which will probably start from Chicago; L. W. Thompson, of Louisville, vice-president of the Southern district, will take care of the Southern tour, and B. A. Swenson, of Providence, R. I., will look after the East.



According to present plans the Eastern tour will start in New York, and instead of taking the direct route to Albany, which the riders have gone over so often, it has been suggested that the trip be made through Stamford, New Haven and Hartford, as shown on the map. Going over this route the riders will find some of the best roads in America, and at Springfield will be able to meet the clubs coming from Providence, Boston, Worcester and surrounding territory. Swenson desires to hear at once from clubs and parties who desire to join the Eastern tour, and is particularly desirous of getting into communication with riders in the following cities: New Haven, Springfield, Little Falls and Rochester. His address is 298 Blackstone street, Providence, R. I. It is expected that the Eastern tour will arrive in Buffalo 1,000 strong.

Word comes from Buffalo that nothing will be left undone to make this meet and the races at Fort Erie the best ever, and there is no doubt that this will be the final verdict.

"Every fast motorcycle in America will be shipped here for this meet," says Winfield Graham, president of the Buffalo Motorcycle Club, which is to entertain the great gathering. "You will see exhibitions at Fort Erie in July that will make some of Barney Oldfield's stunts look like child's play. Just imagine 100 of the biggest and fastest motorcycles in the country banded together to battle it out for the premier honors of the game and you will have a faint idea of what our meet is going to be."

Will Punish Welching Promoters.

Promoters of motorcycle events, who have a penchant for failing to deliver prizes, whether they be clubs or individuals, are not going to get away with the trick in the future as easily as they have done in the past. Chairman Thornley, of the competition committee, has decided to "sic" the F. A. M. legal action committee after promoters who renig on prizes, and to haul them to court for breaking a written contract with the F. A. M. On the official sanction application blank is a paragraph stating that a promoter agrees, in consideration of the granting of a sanction, to hold the scheduled meet in conformance with the competition rules, and upon signing this application the promoter binds himself to abide by and fulfil the terms of the agreement, according to the chairman. Any legal action that may be taken against promoters will hinge on this agreement. Of course, where the referee secures from the promoters before the meet starts a check to cover the value of the prizes offered, as is provided in the rules, the riders are protected, but it does not appear that this precaution is observed in all cases. The screws already are being applied to two promoters for their failure to deliver prizes.

ROUTE OF THE EASTERN F. A. M. TOUR

MAY AFFILIATIONS WERE HEAVY

New Clubs Flock to F. A. M. Fold—Estabrook Reports Organization Progress All Over the Country.

Concerning the relations of the Federation of American Motorcyclists with the clubs and the progress made in the affiliation of new clubs, Chairman Estabrook, of the membership committee, under date of May 27, reports:

"The following clubs have affiliated with the F. A. M. during the past week: No. 134, Buffalo (N. Y.) Motorcycle Club, M. MacDonald, secretary, 6 Henkel building, 45 men, May 20; No. 135, Indian, F. A. M. Club, Kansas City, Mo., 25 men, May 20; No. 136, Indiana University Motorcycle Club, Bloomington, Ind., Lynn Lewis, secretary, 15 men, May 22; No. 137, Old Dominion Motorcycle Club, Richmond, Va., E. B. Ewell, secretary, 310 North Park street, 30 men, May 20; No. 138, Fostoria (O.) Motorcycle Club, G. W. Kesler, secretary, 661 Columbus avenue, 16 men, May 24; No. 139, Two Rivers (Wis.) Motorcycle Club, Roland Bleser, secretary, 2110 Washington street, 15 men, May 24; No. 140, Redskin Motorcycle Club, Monroe, Wis., Ferd. Ingold, secretary, 710 Washington street, 16 men, May 24; No. 141, Yavapi Motorcycle Club, Prescott, Ariz., B. N. Rudderow, secretary, in care Bank of Arizona, 13 men, May 24; Portland (Ore.) Motorcycle Club, Herbert Hussock, president, 900 Summer street, 40 men, May 25. The totals for the week show nine clubs affiliating 220 members and for the first 25 days in May, 28 clubs with 678 affiliated members.

"Acting as the spokesman for the motorcyclists of Pontiac, Mich., Mr. K. Van Deusen has asked for papers and by-laws, etc., relating to club organization and affiliation with the F. A. M., and thinks a local club will be a reality in the near future.

"The Bay Ridge (Wis.) Motorcycle Club, which was organized a few weeks since, has now a membership of 33 and is considering affiliation with the F. A. M.

"Mr. Joseph C. Smith, of LaPorte, Ind., local commissioner and F. A. M. member No. 1469, promised the chairman that he would organize an F A. M. club, and has made good. Twenty members have been signed up and formed a committee of the wholie to gather up stragglers before the charter closes, two weeks hence. A race meet has been decided upon in connection with the county fair and the club plans to be generally active. The officers are: President, Joseph C. Smith; vice-president, Closser LeRoy; secretary, Orton Carpenter; treasurer, Edwin C. Thompson; captain, Clarence Raymond; first lieutenant, Bernard Bowman; second lieutenant, Arnold Meinke.

"La Crosse, Wis., has about 27 active riders at present, and 21 of these are members of the La Crosse Motorcycle Club.. The club is reported to be in flourishing condition and will presently take a vote on affiliation with the F. A .M.

"Several dealers and interested riders have 'seen the light' during the past week and we may expect a new crop of clubs presently.

"The first twelve clubs to meet the conditions named in the 'Old Sol' headlight proposition and affiliate 15 or more new members, beginning May 10, have been officially declared and are as follows: No. 123, Cedar Rapids, Iowa; No. 124, Crawfordsville, Ind.; No. 125, Danville, Ill.; No. 126, Rome, N. Y.; No. 127, San Jose, Cal.: No. 128, Atlantic City, N. J.; No. 129, Salina, Kans.; No. 130, Macon, Ga.; No. 131, Oshkosh, Wis.; No. 132, McHenry County Motorcycle Club, Harvard, Ill.; No. 133, Cleveland, Ohio; No. 134, Buffalo, N. Y.

"The several clubs have been notified and upon receipt of shipping instructions the headlights will be forwarded direct by the donors, the Hawthorne Mfg. Co., Bridgeport, Conn. This generous and unsolicited gift has been entirely successful from an F. A. M. standpoint, as it has increased the monthly affiliations about 100 per cent., and the thanks of the F. A. M. officers, clubs and members generally are due the Hawthorne Mfg. Co.

"Affiliated clubs should not forget that three of these sun eclipsing headlights are to be awarded on June 10 to the three affiliated clubs who bring in the largest number of new F. A. M. members during the 30 days intervening between May 10 and June 10. Lots of time for member-getting yet; boost your membership.

"About the two great National F. A. M. Tours—one from Chicago and one from New York, and ending at Buffalo, the city of the national meet this year—it is expected that the F. A. M. clubs especially will show the true club spirit and take measures to invite every unattached rider. whether F. A. M. member or not, to accompany them over the route, and that they will look after their welfare and see that they have their share of the general good times.

"The F. A. M. is the motorcyclists' own organization and should not be built up on selfish lines. If there are riders too short-sighted or who lack the fraternal spirit or love the almighty dollar too dearly to part with it without being 'shown,' then let us show them."

Vice-President Wilber Resigns.

C. C. Wilber, vice-president of the Eastern District of the Federation of American Motorcyclists, has forwarded his resignation of that office to President Willis. In explaining the reasons for his resignation, Wilber says:

"I am sorry to be obliged to do this, and would not unless it seemed essential. I am going to try and take a rest for a spell, according to the doctor's orders. However, I intend to be present at the next District meeting if possible, which is soon to be called."

In his several years of service in the F. A. M. Wilber has established for himself a reputation as one of the most capable organizers that the organization has ever had. His own district he has made a model, as he has appointed commissioners for all the states in it, and has filled every committee appointment provided for by the F. A. M. constitution and by-laws. He has done a prodigious amount of general work for the organization, and has been one of its bulwarks of strength during trying times.

Georgia Amateurs Under Charges.

Several Georgia amateur motorcyclists who are alleged to have competed for cash against professionals at various race meets in that state have been posted for trial by Chairman Thornley, of the competition committee, to show cause why they should not be turned professionals. The men under indictment and their alleged offenses are as follows: Harry Glenn, competed against professionals and accepted cash; Ernest Calleway, competed for cash; Tom Brown, Macon, Ga., competed against professionals and for cash at Atlanta and Macon; Gus Scizgen, Atlanta, competed for cash and against professionals at Rome; Layton Brown, Macon, competed for cash and against professionals; B. H. Chambers, Rome, competed for cash in Birmingham and Rome; Henry Crowell, Atlanta. Warning is given that unless the riders mentioned offer an adequate defense to the chairman of the competition committee before the 15th inst. he will transfer them to the professional class.

Hill Climbing Contest in Johnstown.

Interest and excitement was created in Johnstown, Pa., on the 12th ult., by a hill climbing contest between a motorcycle and an automobile, that proved the superiority of the motorcycle in going up the steep grades. The scene of the contest was on the hillside road leading from Bedford street up through Meires Hollow to Daisytown. Cheered on by a large crowd, Carl Hack, on a 7 horsepower Indian, started up the grade at 7 p. m. Despite his inability to use all of his power, owing to the extreme roughness of the road, he reached the top of the hill in good order. Failure was the result of the attempt of the automobilist in a Ford motor car. At 9 o'clock the next morning the car was given another trial, after its failure of the previous evening. The automobile gave a good account of itself, but was unable to reach the top. Meires Hollow road is an unusually steep one, the grade varying from 25 to 40 per cent., the last 100 feet being five per cent. steeper than the incline plane leading to Westmont, which is one of the steepest roads in the United States. The length of the road is 700 feet. This is the first occasion on which any machine propelled by its own power succeeded in negotiating this hill. That it was not just a lucky trial, the two local Indian agents proved by going up the hill the following week in 24 and 25½ seconds, respectively, both being mounted on a 7 horsepower Indian, geared 4⅛ to 1. The interest created by the first trials have set all the city's motorcyclists to trying the hill.

Rochester Club's President Killed.

George H. Ellsworth, president of the Rochester Motorcycle Club, was killed on Sunday afternoon, May 28, in a collision with an automobile at Peck's Corners, N. Y., about 15 miles from Rochester. Mr. Ellsworth was returning to Rochester from a run to Canandaigua Lake, with 15 members of the Rochester club. He was thrown into the air by the collision and falling upon his wrecked machine was fatally injured, dying in 20 minutes. Clarence M. Baldwin, of New York, who was driving the automobile, states that as he was not familiar with the highways in that section he was driving his car slowly, but that Ellsworth was not only on the wrong side of the road but was going at a rate of about 50 miles an hour. Ellsworth was 36 years old and unmarried.

Stubbs Streaks Up Shades Grades.

Again demonstrating the superior climbing abilities of the motorcycle over the automobile, Robert Stubbs, on an Indian, made much better time than the automobiles in the hill climbing contests on Shades mountain, near Birmingham, Ala., on the 24th ult. Stubbs's fastest time was 1:57, while the best automobile time was 2:06. Only two bicyclists were successful in mounting the hill in the free-for-all bicycle race.

The road from Oxmoor up Shades mountain is an ideal one for such contests, having an elevation of 500 feet in 1.10 miles, and 22 curves, all told. Stubbs won all three motorcycle numbers.

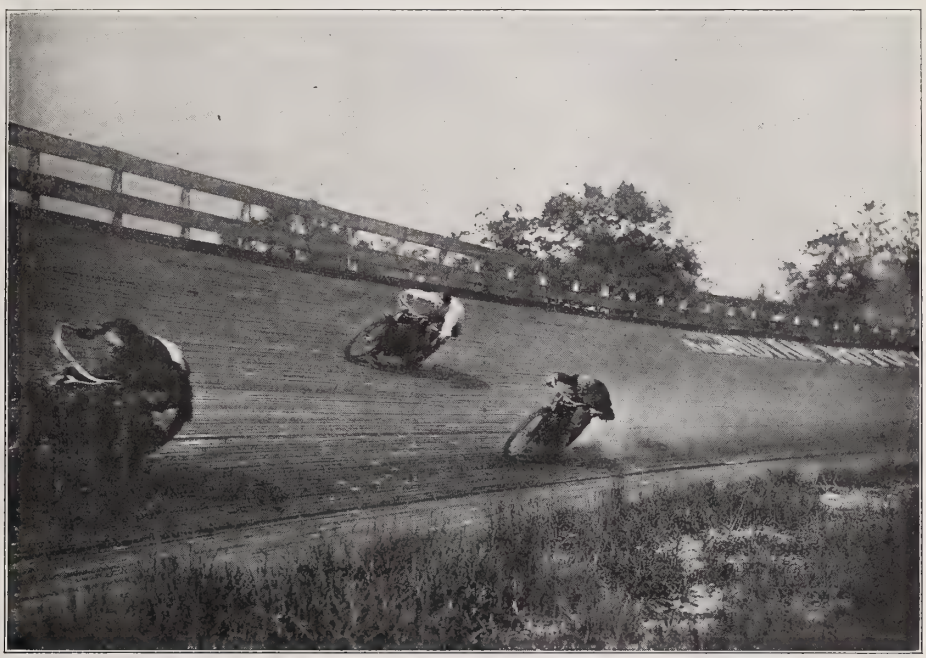
STIRRING SPORT AT SPRINGFIELD'S MEET

Motorcycle Racing on the Stadium Saucer Thrills a Record Crowd — Balke the Speed Star — Chapple Puts Up a Good Battle — Daring Riding by Amateurs — Humors of the Occasion.

Frenzied duels for speed, for money, for cups, for glory and for commercial blood, in one of the classiest fields of motorcycle jockeys ever gotten together in this country, signalized the resurrection of the "sport shot from guns" on the Springfield (Mass.) Stadium on Memorial Day, 30th ult. When the last shots had been fired and the smoke of battle had cleared away, the score sheets showed that Charles Balke, the California "bear cat," had taken both the professional races in whirlwind fashion, not forgetting the fat rolls of greenbacks that were glued to them. It was Balke's first appearance on the stadium in competition and he maintained the winning streak that he begun when he joined the Indian racing forces.

Next to the professional engagements, the other most important speed battle was the inter-city team race, with six cities represented. Some of the qualifying heats were very lively while others were tame, and it was not until the final that the action fermented enough to blow the cork from the thrill flask. Five starters in the final began the scramble for the cups even before the gun popped and kept it up all the way. After some spectacular riding, E. J. Mooney, of the Springfield team, on an Indian, crossed the line in front, leading Carver, Indian, of the Waterbury team, by several lengths. Mooney, who was the local favorite, got a big reception from the crowd.

Another local boy, Edward Carroll, Indian, carried off the novice race in a hurricane ride. Carroll, who is a mere youth in short pants and hardly weighs 80 pounds, is a protege of George Holden, the veteran rider, and fully came up to the expectations of his tutor. He had all kinds of nerve and looks to have the making of a star on the boards.

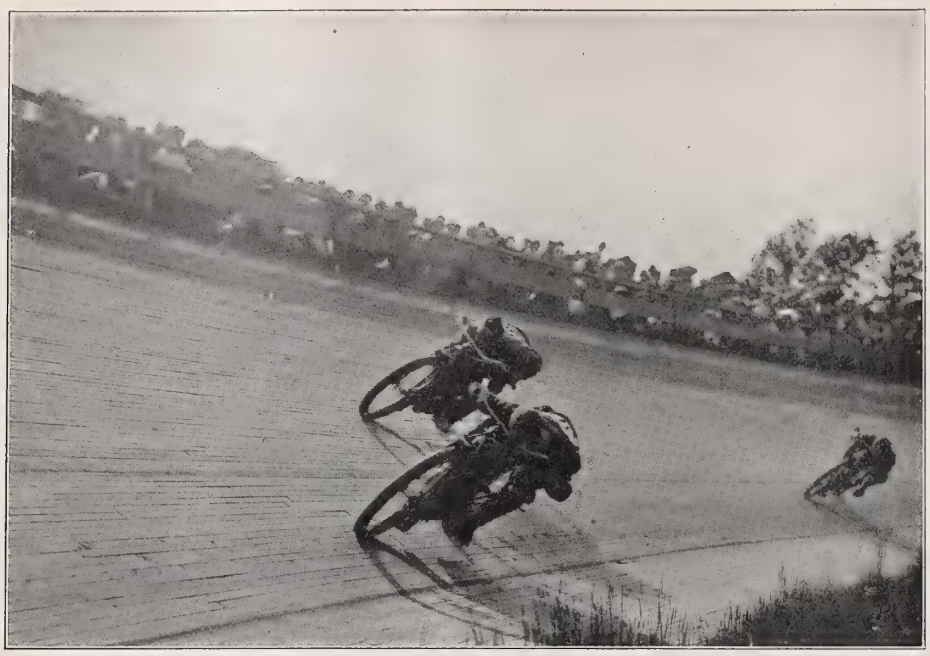


Because of the fact that it was the first time that the Merkel racing staff has invaded the Indian hunting grounds, and also because it offered the only real competition that the home product had, the yellow painted machines and their pilots, Chapple and Mitchel, created much speculation as to what they would do. They did not have the new Merkel racers that rumor had said would be uncovered publicly for the first time, and they used the old dirt-track warriors on which they have been campaigning for the last two years.

Had a bombshell been exploded under the track, no greater surprise could have been sprung on the spectators, and even the "wise ones" than the brilliant victory that Chapple scored in the first heat of the 10 mile professional. In the best race he ever has ridden, and the best and most sensational ever run on the Stadium, the New Yorker took the measure of "Blondie" Spencer and "Charlie" Gustafson, Jr., the prides of the Indian factory. This heat was the best race of the day, and was won by less than half a wheel, Gustafson taking second.

Unfortunately, Mitchel's machine was not in the same form as Chapple's when the Texan crossed speed with Balke, for the latter lapped Mitchel and never had to put on full steam. In the final, Chapple's machine "blew up" in the 17th lap after he had been tagged by both Balke and Gustafson and he withdrew. Mitchel was lapped several times, his machine running poorly, and he also dropped out in the 28th lap. No bonfire of wet leaves, or Broadway taxi motor fed on a diet of lard oil, had anything on the Merkels as smoke belchers. While their oil lasted they emitted great volumes of blue smoke at every puff and had a complete ring of blue vapor over the track.

By no means tame or uninteresting was the battle of the belts in the 15 mile handicap for private owners, although there is ground for doubt as to whether all of the contestants owned the machines they rode, and whether they were entitled to be classed as private owners. William Vetterman, riding a 1910 Indian undergeared belt machine, was the winner, with H. A. Wells, similarly mounted, less than a length behind. H. F. Smith, Excelsior, was the only other starter in this class to finish. Five machines started, three of them Excelsior twins, which were on scratch, the Indians having 3 minutes handicap. The Indian riders had things their own way from start to finish.



Showers Monday night and Tuesday morning made the outlok for racing rather ominous and there were not a few long faces. About 11 o'clock, however, the leaden skies broke, the sun poked his rays through, and all fears of "no racing" were dispelled. By 1 o'clock Old Sol was shining in full blast and it was not long before the crowds were sweltering.

POPE, OF BOSTON, WINNING SECOND HEAT OF THE INTER-CITY

Never in the two years since it was built has the Stadium held such a crowd as it did on Tuesday. Designed to accommodate 1,600 people, the stand was packed with nearly 2,000 spectators, while over 3,000 formed a fringe around the infield, where over 100 motorcycles and about 35 cars were parked. Outside the track enclosure there was an even greater gathering of motorcycles, and it safely can be said that there were 300 motorcycles present, making it the largest gathering of machines and riders ever held in New England.

Promptly at 2:30 p. m., the first race, the novice, was called. This was followed by the elimination heats of the inter-city team

MOONEY, OF SPRINGFIELD, CAPTURING INTER-CITY FINAL

race. These proved good blood accelerators for the 10 mile professional, which brought out the leading lights of the East, West and South. It also created two new pro's, Spencer and Gustafson, of Springfield, who will have to be reckoned with whenever they start. The first heat brought out Chapple, on a Merkel, and Spencer and Gustafson on Indians. The route was five miles, with flying start.

In the warmup of the trio, the spectators got a line on what was coming in the race itself. They all lined it out in heart disease style, and seemed to be trying to feel each other out, each to see how much the the others had. After several practice laps they were given the flag, Chapple having the pole and Spencer the outside. Things began to hum right off the reel, and Spencer nosed up in front for the first lap, with Chapple alongside and a few inches back. Gustafson was several lengths back, apparently waiting.

Spencer led at the end of the first mile and then Chapple forced the fight, and Gustafson also closed in on the outside. Chapple passed Spencer in the fourth round and took the lead. He never lost it again, but in the eighth lap Gustafson went alongside and worried him while Spencer slid around on the outside a few yards back. The local riders took turns at crowding Chapple, but they could not pry him loose from the lead. After the eighth lap all three were abreast or nearly so for the rest of the heat and fighting desperately. This was the first and only event of the day that brought the spectators to their feet and really roused their greatest enthusiasm.

In the last lap Spencer and Gustafson made final efforts to get by Chapple, but he met their increased spurts with a little more of the same stuff and crossed the line a winner by half a wheel. Gustafson beat Spencer by the same amount. The time, 3:15⅘, although it is not accurate, gives an idea of the terrific rate of speed at which the men traveled, for it averages 39⅕ seconds per mile. This is way under the track's record of 3:42 seconds, and both amateur and professional records for the distance. The inaccuracy of the timing is accounted for by the fact that the inexperienced starter fired his gun after the men were several yards over the starting line. This was a fault in all events, and times taken from the pistol were therefore subject to considerable error.

Having scored the first defeat ever administered to the Indian on its home track, the Merkel admirers were in high glee when Mitchel came on for the second round, to meet Balke on the Indian. Baxter, the Scotchman, on the Rex, was the other starter. Those who saw him in practice knew that he would be an "also ran," for the best miles he could tear off were 51 and 52 seconds. Balke and Mitchel left Baxter floundering in their smoke right at the getaway and Balke also shook off Mitchel. Balke lapped Baxter in the seventh lap and again in the ninth when the Scotchman retired. Mitchel also was losing ground steadily. He did not have the speed and was lapped in the 11th round. Balke then contented himself with riding alongside Mitchel beating him by an even lap.

Each side had one victory to its credit when the final was called and many looked to see Chapple repeat. Balke and Gustafson were inside and Chapple and Mitchel outside. Again Balke streaked away at the start and left the others 40 feet behind. Chapple was second, and Gustafson and Mitchel trailed behind. In the first lap it was apparent that Balke would win barring accident, as he drew away with ease and held the gap open. Mitchel was plugging along in last place in the fifth lap when Gustafson closed in on Chapple and Balke in front increased his gait a bit. The smoke which the Merkels belched enveloped the riders in a thick haze. At 10 laps Gustafson was fighting desperately to get by Chapple. The increased gait of Balke also enabled him to lap Mitchel in the 11th round. The Texan steadily was falling behind.

In the 15th lap, or the end of the fifth mile, Gustafson finally passed Chapple amid great cheers from the crowd. At this time the leaders were traveling fast. Chapple began to slow now and his machine did not belch as before. Balke lapped him in the 17th round and he dropped out with his motor clanking ominously as it coasted in. His oil was exhausted, being partly due to having ridden several laps before the race

CHAPPLE AND HIS CUTTLEFISH SMOKE WAKE

started. With Chapple out and Mitchel harmless, Balke and Gustafson engaged in a hammer and tongs scrap between themselves. Balke had almost a lap on Gustafson and completed it in the 21st round. Then Gustafson fought tooth and nail to stay with the Californian, but the latter would not have it that way, and soon commenced to pile up a second lap. Mitchel was lapped several times in this scramble of the leaders and dropped out in the 28th lap when his oil gave out. Balke beat Gustafson by 1⅓ laps.

After what happened in the ten mile professional there was not much doubt about the outcome of the 50 mile, and although it had been booked as the top liner on the card it proved quite tame. Balke, Gustafson, Mitchel and Baxter started. Chapple could not start, having no substitute for the broken manifold. Balke and Gustafson lapped Baxter in the sixth lap, and Mitchel was tagged three laps later. He then stopped and lost three laps before restarting. About this time the Rex was being lapped once in every mile. The race now lay between Balke and Gustafson. Balke had been streaking it out as usual and gained a lap on Gustafson in the 17th round.

Nothing eventful occurred until the 31st lap when Mitchel's Merkel suddenly got a new lease of life and spurted after Gustafson. The Texan caught and held Gustafson for a lap or so and gave the latter a good scare. Then Mitchel's machine flickered off again like a falling skyrocket. At 12 miles Baxter gave up the ghost and quit. After the 15th mile the race became a runaway for Balke and grew monotonous, for he simply rode rings around the others and piled up the laps steadily. Mitchel retired for good in the 18th mile with a broken valve.

Occasionally Balke and Gustafson relieved the dulness of things with some exciting scraps. These would last for a lap or two and then the riders would ease up for a spell. Gustafson was lapped successively in the 16th, 29th, 36th and 47th miles, and Balke won by five laps. When Balke got the finish flag Gustafson was right alongside and he stopped, too, but was told to restart and finish his five laps, which he did, this entitling him to second money.

NO THOUGHT OF MOTORCYCLE THIEVES

Six teams were represented in the intercity team race. The teams were very thin, usually consisting of two men and never more than three. In the first trial heat, G. R. Hill, Indian, of the Providence team, won by nearly half a lap over A. V. Howe, Indian. Donald Pope, Indian, of the Boston team, won by half a lap in his heat. Pope is a light youngster, and was quite a favorite. At the start he ran away from H. F. Smith, Excelsior, and then, after showing what he had in the speed line, he slowed down and teased Smith. Pope said "au revoir" again in the seventh lap and ran away for good.

Two teams, Worcester and Waterbury, were combined for the third elimination heat, as only one rider on each team was ready. H. C. Carver, Indian, of the Waterbury team, drew away steadily and lapped R Cristy, Indian, in the last lap The best heat up to this time was that of the Bridgeport team, Steiner and Mason on Indians. They rode several rounds with elbows scraping and to all appearances were fighting for "keeps." Steiner had plenty of reserve speed, however, and only lay back to make things interesting, for he cut loose in the last lap and won by 20 feet. Next came the Springfield team, Davis, Mooney and Firman, all on Indians and all even favorites. Their machines had better grooming, as the final later showed. It took several laps to get them away, as they tried to beat the gun and would not line up for an even start. Finally they were sent away with Mooney leading. The fight for victory lay between Mooney and Firman, for Davis could not hold the pace and trailed. It was nip and tuck until the eighth lap, when Mooney began to draw on his surplus power and stretched a 40 foot lead in front of Firman at the finish. This was the fastest heat, the three miles being turned in 2:34.

The semi-finals were cut out on account of the lateness of the day and the five heat winners started in the final. Mooney, of the Springfield team, started out to make a runaway, but Steiner, of Bridgeport, was not to be shaken. Pope, of Boston, and Carver, of Bridgeport, had a lively scrap for third position. Hill never was a factor.

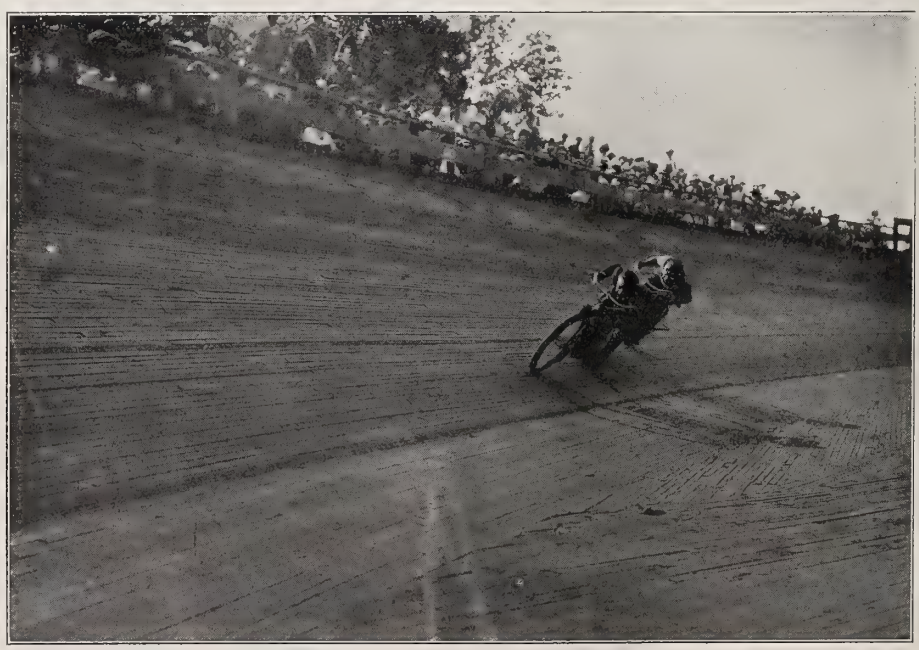
BALKE RUNNING AWAY FROM COMPETITION

After several miles of fighting, Carver pulled away from Pope and went after Steiner. He kept right on and passed the Bridgeporter, and the latter then dropped to last place. Mooney was having a runaway and all the action was taking place among the trio behind the leader. In a short time Steiner became dangerous again and went after Pope. They had a grand speed bout that woke up the spectators. Pope kept his grip on third position. Mooney won by half a lap, Carver took second easily and Pope beat Steiner for third by a foot.

GUSTAFSON AT HIS HIGH SPEED ANGLE

All of the three heats in the novice were two men affairs, with Indians against Excelsiors in all of them. L. Lakey, Indian, won the first heat, Edward Carroll, Indian, took the second and Russell Coes, Excelsior, collected the third. A. H. Mason, Indian, had the third heat won by half a lap when he misunderstood the last lap flag for the finish and shut down. Coes passed him on the far side of the track and won easily. When Mason found that he had lost through his own fault he was disposed to make a fuss, claiming that he did not know the signals, but Referee Pitman gave him small sympathy, as his excuse did not hold water. Carroll rode the fastest heat, 2:41. In the final, Coes beat the gun and gained a length, but Carroll pulled him down and held the lead at the finish of the first lap. After this he increased his lead at every round and almost lapped the field at the finish. His victory was very popular. Lakey was second and Coes third.

Remarkably consistent running was done by Vetterman and Wells on the undergeared Indians in the 15 mile belt handicap. Their machines overlapped all the way and while they were not fast they ground out the miles steadily. The Indians had 3½ laps, or 1⅓ miles, lead when the Excelsior trio started. Steiner, Excelsior, went out in the 14th lap with a broken valve. Coes, Excelsior, gained a lap on the Indians in the 17th round, but dropped out in the 21st. In the next lap the Indians recovered their lost ground for Smith, the only remaining Excelsior man showed signs of trouble. Smith was lapped in the 30th round. He stopped with belt trouble in the 36th lap, but restarted and finished. Vetterman won by a few feet over Wells, both having three miles lead on Smith.



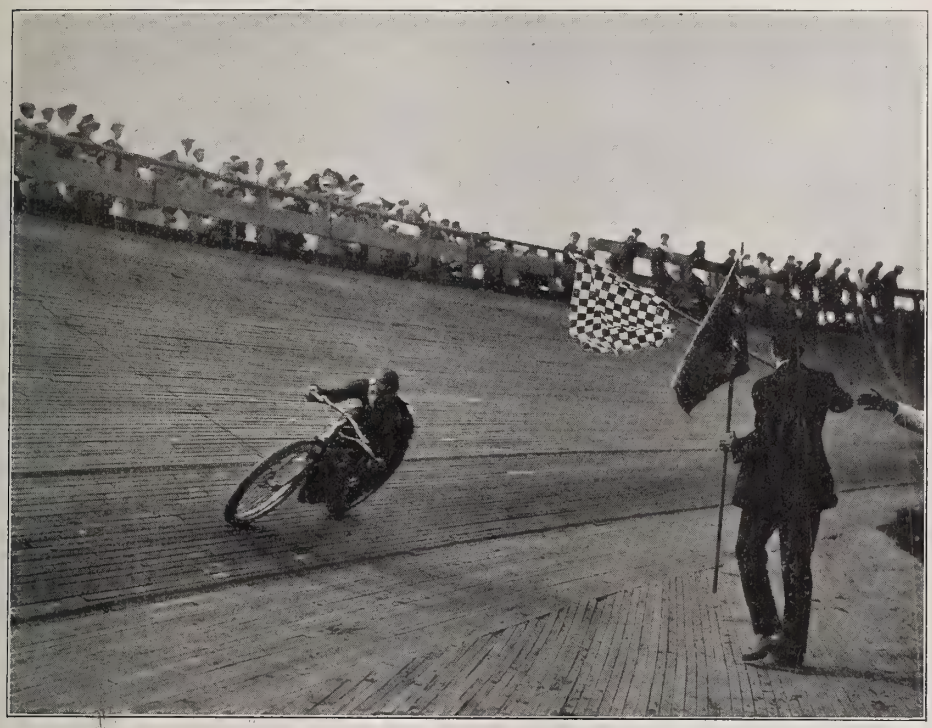
"Happy Days" Pitman, of New York, who refereed the meet, was right at home in Springfield, for he also had ruled at the big bicycle meets at Hampden Park, 25 years ago, the track that made the city famous all over the world. He is taking to his new job like Balke takes to turning his machine wide open. Everything went off smoothly, the only thing that ruffled Pitman being when he discovered that the Indians and Merkels had no brakes such as the rules call for. The matter will be adjusted later. There were no accidents and all of the riders were on their best behavior as far as clean riding went. The summary:

Three mile novice—First heat won by L. Lakey, Indian. Time, 2:46⅗. Second heat won by Edward Carroll, Indian. Time 2:41. Third heat won by R. R. Coes, Excelsior. Time, 3:03. Final won by Carroll; second, Lakey; third, Coes. Time, 2:41⅗.

Inter-city team race, three mile heats—First heat won by G. R. Hill, Indian, Providence team. Time, 2:55. Second heat won by Donald Pope, Indian, Boston team. Time, 3:03⅕. Third heat won by H. C. Carver, Indian, Waterbury team. Time, 2:40. Fourth heat won by R. J. Steiner, Excelsior, Bridgeport team. Time, 2:52⅖. Fifth heat won by E. J. Mooney, Indian, Springfield team. Time, 2:34. Final, five miles, won by Mooney, Indian, Springfield team; second, Carver, Indian, Waterbury team; third, Pope, Indian, Boston team. Time, 4:17⅕.

Ten mile professional, five mile heats—First heat won by A. G. Chapple, Merkel; second, Charles Gustafson, Indian; third, Charles Spencer, Indian. Time, 3:15⅘. Second heat won by Charles Balke, Indian; second, Arthur Mitchel, Merkel; third, James Baxter, Rex. Time, 3:46. Final, ten miles, won by Balke; second, Gustafson. Time, 7:32⅕.

Fifteen mile handicap, belt drive machines—Won by William Vetterman, In-



CARVER TAGGING A LAP ON CRISTY

dian undergeared (3:00); second, H. A. Wells, Indian undergeared (3:00); third, H. F. Smith, Excelsior. Time, 17:37⅗.

Fifty mile open, professional—Won by Charles Balke, Indian; second, Charles Gustafson, Indian. Time, 39:45.

Seated side by side in a tiny enclosed Ford runabout, in the infield, chatting calmly and puffing cigars, Oscar Hedstrom and Joe Merkel hobnobbed all afternoon. It was a striking refutation of irresponsible rumors occasionally heard to the effect that they are not friendly. Hedstrom never left the car during the races and Merkel did so only rarely to attend to his men. In their moments of respective victory and defeat they gave no sign of their feelings.

EDWARD CARROLL, HOLDEN'S PROTEGE, THE NOVICE WINNER

A good many people, including Referee Pitman, thought that the Merkels were made to belch clouds of smoke with the object of affecting the sight and breathing of riders who followed them. Joe Merkel said that because of their short stroke and higher piston speed they required more oil than long stroke motors. No one protested the smoke. When it stopped it was a sure sign that the Merkels soon would be in trouble.

The Indian racers were shod with Goodyear "blue streaks," and the Merkel footwear was the new Goodrich-Palmer wrapped treads. Bosch magnetos fired every machine except the Excelsiors, which used Herz.

During the first two races a lot of boys shinned up the stringpieces to the top rail, just beyond the further end of the stand. Before the ten mile professional was put on they got orders to clear out. Then the referee thought it would be cruel to spoil their fun and he told them to come over into the infield. In a twinkling there was a grand scramble and as soon as the urchins set foot on the track they upset and rolled down. It was very funny to see a dozen or so tumbling down, all curled up. One fellow was afraid to come down, but finally took a chance and lost his footing in a flash after he let go the rail. He came down in a heap, much to the delight of the crowd.

When Pitman found that none of the racing machines was fitted with brakes, he got real hot under the collar, as the rules call for brakes on all machines. He was told that brakes never are used on board tracks as they are too dangerous, and while he admits that this may be true, still—"there are the rules and I am going to enforce them." He nevertheless made a concession and allowed the brakes to be left off, but purely on the ground that it was a measure of safety for the riders.

When Referee Pitman asked young Carroll, winner of the novice, as to his age, Carroll was scared out of a year's growth, and quaking with fear answered that he was between 17 and 18 years. Asked when he was born, he got rattled and said 1864. The F. A. M. constitution provides that all members must be 16 years, and there is reasonable ground for questioning Carroll's age. He got his prize, however.

Donald Pope, the young Bostonian, had a peculiar style of riding. He hobbed his body up and down as if he were riding a horse and moving in unison with it. Pope comes of wealthy parents and is infatuated with motorcycle racing. As his parents would throw several fits if they should see him in action, he has to go a long way from home to indulge in his hobby.

Financially the meet was a big success, the receipts being close to $2,000. Several hundred tickets were taken out of the box and sold a second time to take care of all comers. A big meet for Labor Day is assured and preparations are already under way. The stands will be enlarged and several other improvements made.

BALKE, GUSTAFSON AND SPENCER

Quite a few well known New England tradesmen were present, as well as a good many dealers. It was the largest gathering of motorcyclists ever held in New England.

No fairer treatment could have been accorded the visiting contestants and every-

thing was done to make their stay pleasant. One of the Merkel machines was left in the Indian factory Monday night, while Hendee, Weschler, Merkel, Mitchel and Widmayer went out to dinner together.

There was 60 and 80 test "gasoline" on tap at the rooms of the Springfield Motorcycle Club on the night before and after the races. There was a crowd around there both nights exchanging experiences.

Baxter, on the Rex, was a disappointment, for something good had been expected of him. Changing his transmission over from belt to direct chain did not make him win, although it added a little more speed. His engine had a very soft purr and would have had more show against the "fives." He had a footrest on the right rear stay near the axle and had a very amusing style of hopping aboard. Incidentally that mounting step was vicious looking and the other riders took good care that it did not poke its nose into their spokes.

MERKEL COHORTS—WIDMAYER, MITCHELL, O'CALLAGHAN AND CHAPPLE

There were several scratches in the amateur events, but only one of the pro's—L. H. Guterman, of New York—failed to put in appearance. He was booked to ride Frank Hart's old R-S twin, which can step along pretty good, but claims that at the last minute the Reading Standard people would not let him use it, and that he sought in vain to obtain a machine of any sort.

Run to Colorado Springs.

About 200 members of the Kansas Short Grass Motorcycle Club, of Rexford, Kan., will ride to Colorado Springs early in August, returning home by way of Pueblo and Garden City, Kan. Dr. B. J. Patterson will visit the Springs early next month to make detailed arrangements for the party.

COX DAY AT GUTTENBERG TRACK

The Brothers Win All Four Events—Mix-up in the Novice Event—Novelty Race Amusing.

It was Cox day at Guttenberg on Sunday, 28th ult., when the Coxes, John and H. W. G., carried off the honors in all four events. Decoration Day meets all over the country took away all the professional and crack trade riders, but the four races on the card furnished interesting and exciting sport for the several thousand fans who witnessed them. C. Koehler, in the novice race, attempted to knock down the fence, but only succeeded in taking a board out. P. J. Constant, riding his first race, struck a stone at the turn of the backstretch and fell. Koehler coming up close behind turned to avoid him, went past Constant into the fence and turned a somersault ten feet into the air. He was badly bruised and cut and suffered a sprained leg. His machine came off with only a broken magneto and mudguard, and several minor breakages. H. W. G. Cox won the novice and followed this up by running away with the five-mile private owners' race. He finished nearly a hundred yards ahead of the second man, A. Graves.

Considerable amusement was created by the five mile novelty race. The conditions were that at the end of the first mile the competitors were to stop on the line, drink a bottle of soda, ride two more miles and take out a spark plug, hold it up and put it in again, and then ride the two miles to the finish. John Cox reached the line at the first mile ahead and amid the cheers and laughter of the crowd made frantic efforts to imbibe the contents of the bottle before the others arrived. Costello came along next and in his eagerness he was ten yards over the line before he stopped. He was back at the line and half through his bottle before Cox was off with a liberal sprinkling of soda over his face and clothes. Graves and Barnard brought up the rear and there was a general mix-up between these two and Costello before the three continued. At the third mile Cox was again in the lead and had his spark plug out and in again, at the expense of burnt fingers, before Costello came along, and he finished in a burst of speed a third of a lap ahead of Costello.

Starting from scratch with Costello, John Cox steadily gained on the three handicap men in the ten mile trade riders and private owners race and won handily in 11:02. Costello on a Peugeot fell on the upper turn and lost a lap at the second mile. He put up a game fight for the balance of the race and rapidly closed up on the handicap men. He had already passed Barnard, who had a minute handicap, when the latter dropped out at the fifth mile. Graves, who had a minute and a half, was too far ahead for either Costello or H. W. G. Cox (30 sec.), so that the race for third place was between these two. Their finish furnished the most exciting incident of the day. The crowd was with Costello and loudly cheered him at each mile and when he was seen to turn the backstretch about twenty yards behind H. W. G. Cox on the final lap the interest was intense. He gradually crept up closer, inch by inch, but the distance to go was too short and Cox crossed the line half a length ahead of him.

Considering that the races were put on at the last minute and the absence of the stars, the meet was very successful. The policing was bad and there was no bluecoat in sight to keep back the crowd when the accident occurred in the novice race, but outside of this the races were run off in an orderly manner. The summary:

Three mile novice—Won by H. W. G. Cox, 6 Excelsior; second, I. W. Barnard, 5 Indian; third, Wm. Pearson, 6 Excelsior. Time, 4:12.

Five miles, private owners—Won by H. W. G. Cox, 6 Excelsior; second, A. Graves, 4 Indian; third, Wm. Pearson, 6 Excelsior. Time, 6:52.

Five mile novelty, open—Won by John Cox, 7 Reading Standard; second, M. Costello, 7 Peugeot; third, A. Graves, 4 Indian. Time, 8:00.

Ten mile handicap, trade riders and private owners—Won by John Cox, 7 Reading Standard; second, A. Graves, 4 Indian (1:30); third, H. W. G. Cox, 6 Excelsior (30 sec.). Time, 11:02.

Joliet Riders Organize.

At a meeting on the 16th, the Joliet Motorcycle Club, of Joliet, Ill., was organized. More than 20 motorcyclists joined the club at the initial meeting and membership in the F. A. M. will be applied for.

PACIFIC COAST AMATEURS ON THE OAKLAND MOTORDROME.

Start of the 25 mile amateur race, May 21st. Alzina, the winner, at lower end of picture, defeated Broadrick in a brilliant sprint after the latter appeared to be having everything his own way.

Indiana Club Plays the Host.

Two hundred motorcyclists from all directions were the guests of the Indiana Motorcycle Club on Memorial Day. The 500 mile race at the Indianapolis Speedway was a drawing card for motorcyclists as well as automobilists. The Calumet Motorcycle Club, of Chicago, failed to make its endurance run to Indianapolis as was planned, on account of the motorcycle races at Chicago, so the Indiana club had about 100 less visitors than it was expecting. But without the Calumet riders, the Indianapolis motorcyclists had their hands full entertaining the motorcyclists that did go to Indianapolis.

The Indiana Motorcycle Club, of Indianapolis, will hold its big annual race meet at the Indianapolis Fair Grounds mile race track on the 3d and 4th of July. This is a certainty now, as the club has applied for a sanction and has closed a contract to furnish the motorcycle races at the Fair Grounds track on those two days, in connection with the annual picnic of the National Locomotive Engineers and Firemen's Union, that will be held at Indianapolis this year.

The program that the club will arrange will consist of not less than seven events each day, and a large number of the events will be open to riders all over the country. The union of the locomotive engineers and firemen is to furnish the cup and prizes for the races and the Indiana Motorcycle Club is to get a certain per cent. of the gate receipts also for staging the meet.

F. A. M. TWO-MILE CHAMPION.

Ben Broadrick, of San Francisco, winner of two mile championship, at Oakland.

Chicago Club Plans Two Day Meet.

Keeping up with the pace of the other big clubs in holding race meets on a big scale, the Chicago Motorcycle Club is to hold a two day meet at Kenosha, Wis., on June 3-4. This place was decided on as the location for the meet after a consultation with M. E. Kent, the owner of the track, who dropped in at a recent meeting of the club. He informed the members that the new mile track there is very hard-surfaced and fast, and will stand high speed, being banked ten feet on the turns. Kent will assume the work connected with pulling off the meet at his end of the line, while the club will handle the Chicago end. The racing committee has arranged a program for the two days including eight and nine events, respectively. The headline attraction of the second day is to be a club team race to be run off in two heats, one for 30.50 and one for 61.00 class machines. Two men will be on each team and the winning club will be decided on total points from the two heats. A handsome cup will be the trophy.

Great Interest in Cycle Pageant.

A bicycle and motorcycle parade, under the direction of the Williamsport (Pa.) Motorcycle Club and the Wolf Hound Bicycle Club, was held in Williamsport on Monday evening, May 22.

A POPULAR SOUTHERN CALIFORNIA AMATEUR.

Frank Loge, who won the "mile high" hill climb in Redlands, Cal., on April 28th, on a Merkel.

Malone Wins at Zanesville.

Motorcycle racing at Zanesville, O., had its start for the season on May 25, at the fair grounds. Lee Malone, on a Yale, was the star of the meet, easily winning all the events in which he started. The track was very heavy. Summary:

Half mile, flying start—Won by Lee Malone, Yale. Time, 0:39⅗.

Three miles, 4 horsepower belt machines—Won by Ben Tunis, Thor. Time, 5:42.

Two miles, 4 horsepower belt machines—Won by Pearl Brehmer, Excelsior. Time, 3:42.

Half mile novelty—Won by Lee Malone, Yale. Time, 4:37.

Five miles, 7 horsepower belt machines—Won by Lee Malone, Yale. Time, 8:41⅕.

Three miles, open—Won by W. Williamson, Indian. Time, 4:30.

Five miles, for 6 and 7 horsepower machines—Won by Lee Malone, Yale. Time, 6:44.

Eighth mile slow race—Won by Lee Malone, Yale. Time, 2:18⅕.

Kiel Wins Ten Mile Race at Fort Wayne.

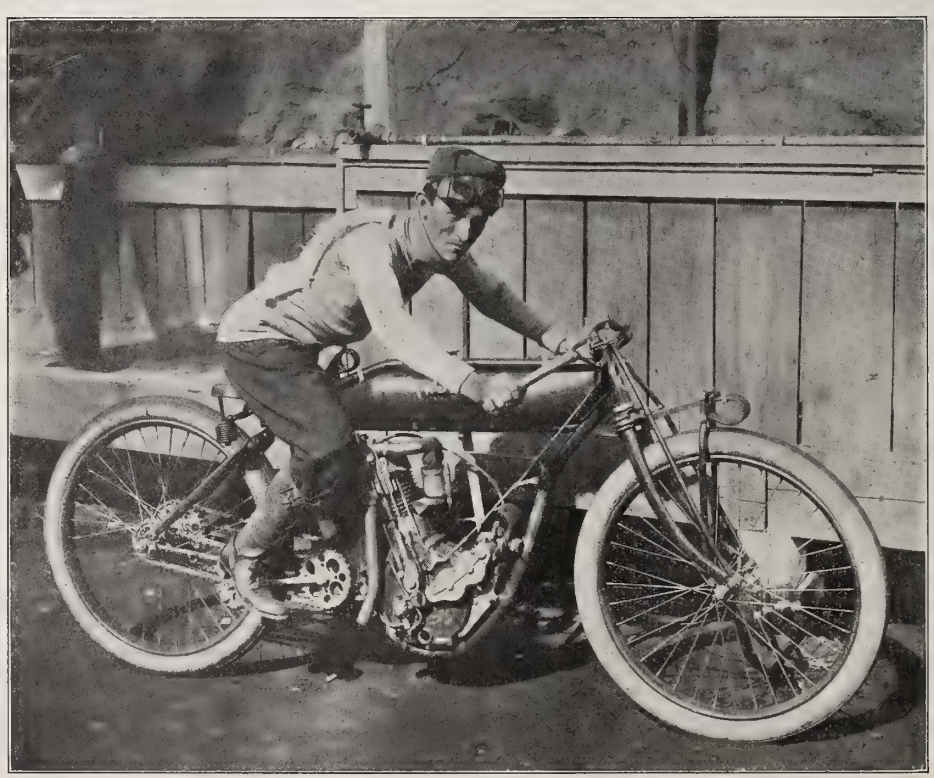
Walter Kiel won the ten mile motorcycle race held at Fort Wayne, Ind., in connection with the aviation meet. His time for the distance was 10:49. John Hughes, blinded by the lust, lost control of his machine, running into the fence resulting in a fracture of his skull. Kiel, the winner, did not know of the accident and continued on his course.

Opening of New Denver Motordrome.

Threatening weather did not keep away the crowd from the opening of the new saucer motordrome at the Tuileries, Denver, Col., on Sunday, 28th ult. Summary:

Ten miles, twins, professional—Won by Armstrong; second, Good; third, Albright. Time, 7:49.

Ten miles, singles, professional—Won by Wolters; second, Armstrong. Time, 9:52.



Five mile match race, professional, Armstrong vs. Clayton—Won by Armstrong; second, Clayton. Time, 4:35⅘.

Five miles open—Won by Armstrong; second, Good. Time, 3:52⅕.

Endurance Run of Toronto Club.

On May 24 a holiday in Canada, 20 members of the Toronto Motorcycle Club held an endurance run to Cobourg, Ontario, and return, a distance of 140 miles for the whole journey, 15 of the 20 lining up on the main street of the pretty little lake shore town at noon for their photograph. A feature of the run was the performance of the lightweight machines, which were in the going from the start to the finish. The president of the club, J. W. Gibson, straddled a little 85 pound Motosacoche and completed the journey as nicely as any competitor. The course was very hilly, but the Triumphs, Bradburys and Browns seemed right at home.

BURKE, A FAST ATLANTA SPEED MERCHANT.

Riding an Indian, he captured two events at Atlanta on May 21st—the ten mile novice and six mile open.

MANY PERFECT IN JERSEY 24 HOUR RUN

Night and Day Ride of 310 Miles Finds 29 Survivors—Three "Manufacturers" Teams in a Tie—Incidents Along the Route—The Man with the Hose.

Bleary eyed, tired and dusty, from an all night and all day ride over New Jersey's superb roads, 29 of the 39 motorcyclists who started from Newark on Monday night, 29th ult., in the 24 hour endurance run of the New Jersey Motorcycle Club, finished their twice-around-the-clock journey on Tuesday night. Twenty-four of them had perfect scores, entitling them to gold medals; two of them were penalized and will receive bronze medals, and the other three will not get anything, as they were not survivors as defined by the rules. They finished only as non-contestants. The distance was 310 miles, and it was the first contest of the sort ever held in this country.

THE LINE-UP BEFORE THE START, IN THE NEW JERSEY 310 MILE ENDURANCE RUN

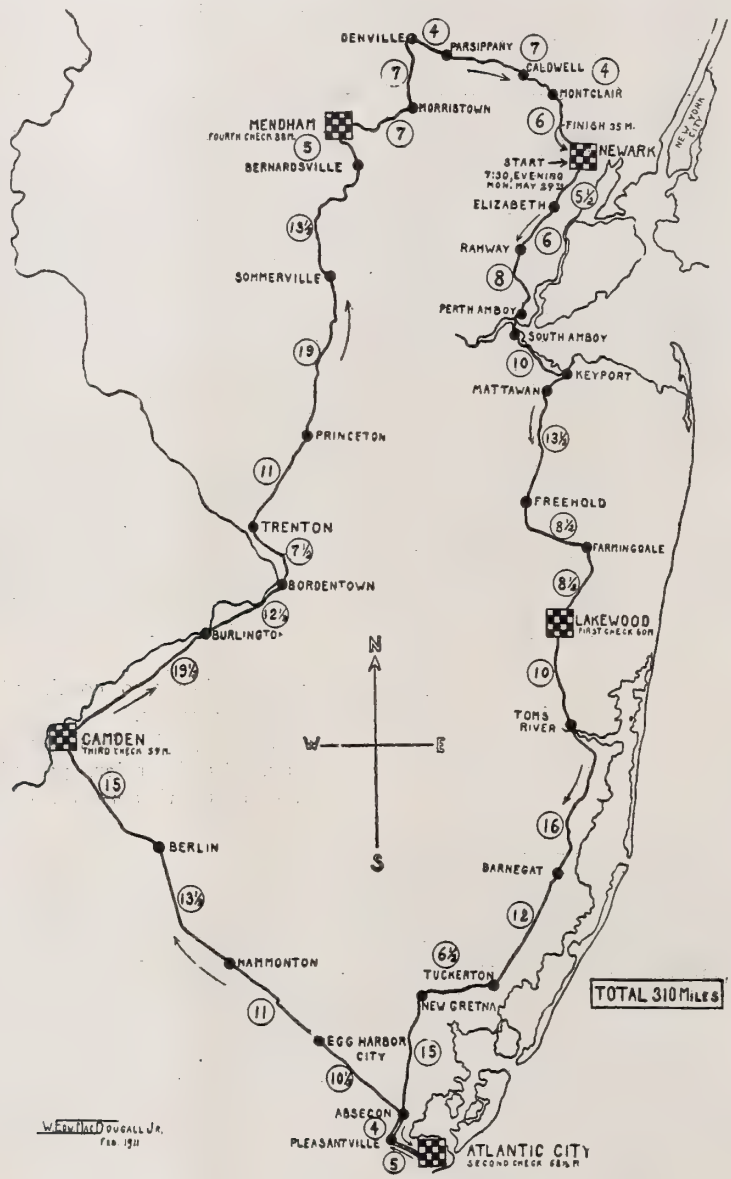
Four of the five teams that started in the manufacturers' division for the Pascal trophy finished, three of them with perfect scores. The Harley-Davidson, Excelsior and Yale teams made perfect scores, the Indian team lost two men and had but one survivor, and the Reliance team went out entirely. While the winner of the trophy is not yet known, it is said unofficially to be the Harley-Davidson team. The award will be based on consistent running, and will be decided by the secret control scores which are yet to be compiled.

Perfect weather favored the contestants all the way, and this in conjunction with ideal roads and an easy schedule went far toward making the run easy. At 7:30 p. m., Monday, the riders were sent away in squads from Newark, and the start was witnessed by a large crowd, which made starting difficult, the men having to ride between lanes of people for blocks.

Once out of the city, the riders bunched in groups of three or four and struck a steady pace and held it. There was no disposition to race or get up in front. Many of the riders had provided themselves with Prest-O-Lite tanks and big automobile lamps, and there was plenty of light, especially when the beams of three or four lamps were concentrated. All had tail lamps also, and it was easy to distinguish riders ahead. Very little traffic was encountered during the night, and a majority had little to do but ride and watch the road ahead.

From Newark the route led over fine roads to Lakewood via Elizabeth, Rahway, the Amboys and Freehold. This first leg was 60 miles, Lakewood being the first checking station. At Rahway the Reliance team was delayed and lost one of its members; the other two continued, but were forced out later on.

An amusing incident occurred below Rahway. As the riders passed through a street of a suburb a man with a hose who was sprinkling the road drenched the riders as they passed. He seemed to enjoy his fun hugely, although his victims did not. The riders "cussed" him roundly but did not go back to fight. At Morgan station, near Keyport, the riders encountered car tracks above the road and crushed



STARTING OFF IN SQUADS OF FOUR

stone, and several took spills. One of those who went down was G. L. Marshall, New Era. He smashed his lamp, as did several others. There were a few sand spots near Lakewood but nearly all got in O. K.

Half an hour was spent here at midnight for lunch, and then the contestants started the second leg to Atlantic City, 68½ miles from Lakewood. This stretch was one grand ride, with no troubles. The advance guard reached "the Board Walk" at 5:30 a. m. Tuesday morning, and nearly all checked on time here. Mr. and Mrs. Cox, in the N. S. U. side-car, withdrew at Atlantic City, having lost the two-speed several miles back

Again fine roads greeted the riders on the third leg, between Atlantic City and Camden, 59 miles. The riders loafed along easily, although the day schedule of 17 miles was in force. At every small town some riders left money at lunch rooms. At Camden the Yale Motor Co. had made excellent preparations for checking and furnishing food to the men and supplies for their machines. Local riders acted as guides in and out of town.

Trenton, Princeton and Somerville rolled off the route in rapid order. At the latter place the first secret control was located, just around a turn in the road, where the riders came on it unawares. Several of the riders had a hunch or tip of some sort as to the general location of the control and were prepared for it. R. B. Whitehead and H. C. Page, two members of the club, did the checking here.

PATH OF THE NEW JERSEY 24 HOUR ENDURANCE RUN

At Somerville Joseph Buckingham, of the Harley-Davidson team, fell and cut his knee. He did the same thing to the same knee at Bernardsville, but, after getting patched up at a farm house, he went on. Hamilton, of the Indian team, sprained his wrist in a fall at Keyport. He continued, but in some way got misdirected and got off the road. After floundering about helplessly he cut across country and picked up his companions near Mendham, but was out of the run.

The other secret control was at Morristown. Along this section the riders struck the only hills on the run. Thirty-five checked at Mendham. The last leg, to Newark, was over rolling country, mostly down hill with fine roads. Near Denville the road was closed and it was necessary to make a detour of 1½ miles across country roads, which were very dusty. Frost, of the Indian team, fell over a log and damaged his machine.

A big crowd was on hand to welcome the riders as they rolled into Newark, the finish, most of them fairly encrusted with dust and grime, but happy. The run was a big success, according to the club officials, and the large number finishing is accounted for by the easy schedule. Perfect checking arrangements and adequate supplies of food and fuel at controls helped materially toward the success of the contest. Riders from four states participated. J. B. Simmons, of Delaware, a 300 pounder, and the heaviest man on the run, came through perfect.

In the contest for the club trophy, a silver plaque, eight outside clubs competed. The New Jersey club had the most members, but was not eligible for this trophy. It was won by the Pennsylvania Motorcycle Club, of Philadelphia, which had three members in the contest. The other clubs represented were the North Jersey, Hackensack, Plainfield, New York, and both of the touring clubs of New York. The official scores already compiled are as follows:

Rider and Machine.	Score.
George Reichey, 4 Yale	1,000
Harold Nichols, 4 Yale	1,000
P. W. Stevens, 7 Yale	1,000
Howard Hill, 6 R-S	1,000
H. G. Truppner, 3½ Yale	1,000
B. Huerlander, 4 Yale	1,000
Stanley Beach, 6 Excelsior	1,000
C. B. James, 3½ Excelsior	1,000
Harvey Snyder, 4 Excelsior	1,000
W. E. MacDougall, Jr., 6 Excelsior	1,000
H. N. Davis, 4 Excelsior	1,000
Holmes Wright, 6 Excelsior	1,000
Robert Black, 4 Merkel	1,000
J. Buckingham, 4 Harley-Davidson	1,000
S. B. Thorpe, 4 Harley-Davidson	1,000
Otto Krause, 4 Harley-Davidson	1,000
Earle S. Eckel, 7 Indian	1,000
J. B. Simmons, 7 Indian	1,000
John Lake, 4 Minneapolis	1,000
J. J. Cox, 4 R-S	1,000
Watson Kluczek, 4 Harley-Davidson	1,000
John Benders, 4 Harley-Davidson	1,000
Alex Klein, 4 Harley-Davidson	1,000
J. C. Stevens, 4 Harley-Davidson	1,000
G. A. Smith, 6 Merkel	978
D. L. Marshall, 4 New Era	973

Manufacturers' Team Contest.

J. Buckingham, Harley-Davidson	1,000
S. B. Thorpe, Harley-Davidson	1,000
O. Krause, Harley-Davidson	1,000
G. Reichey, Yale	1,000
H. Nichols, Yale	1,000
P. W. Stevens, Yale	1,000
H. Snyder, Excelsior	1,000
W. E. MacDougall, Jr., Excelsior	1,000
H. Wright, Excelsior	1,000
E. S. Eckel, Indian	1,000
G. F. Frost, Indian	Out
G. Hamilton, Indian	Out
A. Boschen, Reliance	Out
P. Boschen, Reliance	Out
G. Rogers, Reliance	Out

SENSATIONAL RACING AT HAWTHORNE

National Five Mile Championship Captured by Hart—Harry Nixon Killed in a Crash—Paul Bailey Dangerously Injured—Chicagoans Give Three Day Program.

Five thousand motorcycle "fans" attended the opening of the three days' meet of the North Shore Motorcycling Club, at Hawthorne track, Chicago, Ill., on last Sunday. The opening event was just enough to set the crowd going and arouse their enthusiasm for what was to come. They were there with the expectation of seeing some hair raising stunts, and record breaking runs, and they saw even more than they hoped for.

Many of the best riders in the country, including Huyck, Teubner, Hart and Nixon, faced the starter in the second event—a ten mile traders, 61 class. The riders were off in a bunch. The first mile finished, "forty-eight seconds for the mile," announced the timer amid the cheers of the crowd; Hart was in the lead with Teubner in hot pursuit; the rest of the riders were scattered behind. At "Dead Man's Bend" Hart, who was speeding with the dare-devil courage for which he is noted, opened up the "juice" to the limit—there was a scraping and a thud!—in the lull that followed the leaders were hidden for the moment by a heavy cloud of dust! Hart had fallen! The front tire on his machine had burst, causing the rider to lose control, and he was down in a heap directly in the path of the racers behind. Nixon, Bailey and Hinckley were in a bunch. Bailey, without cutting his speed, dexterously avoided the heap of flesh and iron and streaked past for about a hundred feet, when, becoming blinded by the cloud of dust, he lost control of his machine and was tossed high in the air over the outer fence. In the meantime Nixon had dashed head on into the wreckage, his machine throwing him, and he struck the outer fence with such force that the top board was ripped away. By this time the crowd in the grandstands had become almost frenzied, pouring from the grandstand beyond all control, for the time, by the police. Hinckley's machine hit what was left of Hart's; Huyck in some way, unknown even to himself, had managed to worm his way through the mass of wreckage. Surgeons, trainers and policemen in less time than it takes to tell it had rushed to the spot. Nixon and Bailey were placed in an ambulance; others were assisted or hobbled off the track. Nixon died in the hospital a few minutes later, and Bailey is still suffering from fracture of the skull and internal injuries.

After things had quieted down, the officials announced that the race would be again started, and amid the thunderous cheers of the fans Frank Hart limped to the starting line, with Teubner and Galitzki beside him. When he came to the curve, however, Hart invariably slowed up, with the result that he finished last. Teubner came in first, on a Merkel, with Galitzki, in an Indian, second, and Hart, Indian, third. Time, 10:51⅗.

The first event was the novice, for light machines, and was won by W. F. E. Williamson on an Excelsior; Raymond on an Excelsior second and Mitchell on an M. M. third. Time, 6:18⅖.

Third race, five miles, private owners—Williamson, Excelsior, first; Turner, Merkel, second; Walsh, Harley-Davidson, third. Time, 6:13⅗.

Fourth race, ten miles—E. W. Mathews, Thor, first; Huyck, Merkel, second; De Salvo, Excelsior, third. Time, 10:58⅖.

Fifth race, five miles—Galitzki, Indian, first; Williamson, Excelsior, second; Turner, Merkel, third. Time, 6:03⅘.

The sixth, the last race of the day (four others having to be postponed on account of rain), was a five mile contest for the high powered machines and was won by Galitzki on an Indian; Hart, on an Indian, was second, and De Salvo, Excelsior, third. Time, 5:11 flat.

On Monday the main event was a ten mile free-for-all and was won by F. Sporleder, riding a Waverly. The time was 10:26, and, though this was not exceptional, the race was one of the most closely contested and sensational on the program. At the crack of the pistol Huyck on a Merkel took the lead and held it for three miles, when Sporleder passed him. In the fifth mile Huyck took the lead again, with Matthews, on a Thor, second, and Sporleder, third. The riders kept this position up to the ninth mile, when Sporleder went to the front. In the last mile the riders were all in a bunch, and struggled desperately for the position on the stretch, but Sporleder pulled away in the last 200 yards and won the race by a length. Sporleder established a competition record of 1:00⅗ for the track in a flying start, for singles, 30.50 class. Teubner, on a Merkel, in the time trials rode a mile in 0:55⅕. The summaries for the day were as follows:

E. W. MATHEWS AND HIS THOR 30:50 TEN MILE WINNER

Ten miles, free-for-all, 30.50 class—

Sporleder (Waverly)	1	1	1	1	1	1	1	1	1	1
Matthews (Excelsior)	4	4	4	4	4	3	2	2	2	2
De Salvo (Excelsior)	3	3	3	3	2	2	3	3	3	3

Time—10:51⅗.

Five miles, free-for-all, 61.00 class—

Teubner (Merkel)	2	1	1	1	1
Huyck (Merkel)	5	3	2	2	2
De Salvo (Excelsior)	4	4	4	3	3

Time—5:04.

Five miles, private owners, 30.50 class—

Turner (Merkel)	1	1	1	1	1
Williamson (Excelsior)	2	2	2	2	2

Time—6:15⅘.

Time trials, flying start—

Teubner (Merkel) 0:55¼

Sporleder (Waverly) 1:00⅗
Matthews (Thor) 1:05
De Salvo (Excelsior)..... 1:03⅘

Ten miles, free-for-all, 30.50 class—

De Salvo (Excelsior)...2 2 1 1 1 1 1 1 1 1
Matthews (Thor).....1 1 2 2 out

Five miles, private owners, 30.50 class—

Turner (Merkel) 1 1 1 1 1
Williamson (Excelsior) 2 2 2 2 2
Blankenheim (Indian) 3 3 3 3 3
Time—6:05⅕.

Ten miles, free-for-all—

Sporleder (Waverly)...3 2 2 1 3 3 2 2 1 1
Huyck (Merkel).....1 1 1 2 1 1 1 1 2 2
Matthews (Thor).....2 3 3 3 2 2 3 3 3 3
Time—10:26.

Hart met with another accident in the final race of the meet on Tuesday. He was riding at about a 65 mile clip, but on approaching the east curve of the track attempted to shut down his speed. His machine skidded and Hart was hurled 50 feet across the track, miraculously rolling under the fence to safety. The grandstands were packed to their full capacity, and 12,000 people gasped in horror expecting to see a repetition of Sunday's sad mix-up, but they sent up a roaring cheer when they saw the plucky rider rise, stagger to his machine and wheel it out of the path of the two other riders.

Hart was the star of the day, if not of the entire meet. His daring disregard for life and limb set the crowds going more than once in wild exclamations and cheers of appreciation. In the F. A. M. five mile national championship race Hart established a new track record for the Hawthorne course, winning the championship and covering the course in 4:54⅘. After a poor start he took a 20 foot lead over

HARRY NIXON

Teubner, keeping this distance to the finish.

In the 20 mile race in which Hart nearly lost his life, Teubner had a desperate struggle with Huyck all the way. Huyck pushed his opponent to the limit. He tried to crowd Teubner to the rail on the west curve of the final lap. Teubner was too wise for him, however, and won by about ten yards.
